HER MAJESTY'S GOVERNMENT

MEMBERS OF THE CABINET

(FORMED BY THE RT. HON. TONY BLAIR, MP, JUNE 2001)

PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—The Rt. Hon. Tony Blair, MP
DEPUTY PRIME MINISTER AND FIRST SECRETARY OF STATE—The Rt. Hon. John Prescott, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Gordon Brown, MP
SECRETARY OF STATE FOR FOREIGN AND COMMONWEALTH AFFAIRS—The Rt. Hon. Jack Straw, MP
SECRETARY OF STATE FOR THE HOME DEPARTMENT—The Rt. Hon. David Blunkett, MP
SECRETARY OF STATE FOR ENVIRONMENT, FOOD AND RURAL AFFAIRS—The Rt. Hon. Margaret Beckett, MP
SECRETARY OF STATE FOR TRANSPORT AND SECRETARY OF STATE FOR SCOTLAND—The Rt. Hon. Alistair Darling, MP
SECRETARY OF STATE FOR HEALTH— The Rt. Hon. Dr. John Reid, MP
SECRETARY OF STATE FOR NORTHERN IRELAND—The Rt. Hon. Paul Murphy, MP
SECRETARY OF STATE FOR DEFENCE—The Rt. Hon. Geoffrey Hoon, MP
SECRETARY OF STATE FOR WORK AND PENSIONS—The Rt. Hon. Andrew Smith, MP
SECRETARY OF STATE FOR TRADE AND INDUSTRY—The Rt. Hon. Patricia Hewitt, MP
SECRETARY OF STATE FOR CULTURE, MEDIA AND SPORT—The Rt. Hon. Tessa Jowell, MP
PARLIAMENTARY SECRETARY TO THE TREASURY—The Rt. Hon. Hilary Armstrong, MP
SECRETARY OF STATE FOR EDUCATION AND SKILLS—The Rt. Hon. Charles Clarke, MP
CHIEF SECRETARY TO THE TREASURY—The Rt. Hon. Paul Boateng, MP
LEADER OF THE HOUSE OF COMMONS, SECRETARY OF STATE FOR WALES AND LORD PRIVY SEAL—The Rt. Hon. Peter Hain, MP
MINISTER WITHOUT PORTFOLIO—The Rt. Hon. Ian McCartney, MP
LEADER OF THE HOUSE OF LORDS AND PRESIDENT OF THE COUNCIL—The Rt. Hon. The Baroness Amos
SECRETARY OF STATE FOR CONSTITUTIONAL AFFAIRS AND LORD CHANCELLOR (FOR THE TRANSITIONAL PERIOD) —The Rt. Hon. The Lord Falconer of Thoroton, QC
SECRETARY OF STATE FOR INTERNATIONAL DEVELOPMENT—The Rt. Hon. Hilary Benn, MP

DEPARTMENTS OF STATE AND MINISTERS

Office of the Deputy Prime Minister—
DEPUTY PRIME MINISTER AND FIRST SECRETARY OF STATE—The Rt. Hon. John Prescott, MP
MINISTERS OF STATE—
Minister for Local Government, Regional Governance and Fire—The Rt. Hon. Nick Raynsford, MP
Minister for Regeneration and the Regions—The Rt. Hon. The Lord Rooker
Minister for Housing and Planning— The Rt. Hon. Keith Hill, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Yvette Cooper, MP
Phil Hope, Esq, MP

Cabinet Office—
MINISTER FOR THE CABINET OFFICE AND CHANCELLOR OF THE DUCHY OF LANCASTER—Douglas Alexander, Esq, MP

Constitutional Affairs—
SECRETARY OF STATE FOR CONSTITUTIONAL AFFAIRS—The Rt. Hon. The Lord Falconer of Thoroton, QC
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Christopher Leslie, Esq, MP
David Lammy, Esq, MP
The Lord Filkin, CBE
Anne McGuire, MP (Parliamentary Under-Secretary of State for Scotland)
Don Touhig, Esq, MP (Parliamentary Under-Secretary of State for Wales)

Culture, Media and Sport—
SECRETARY OF STATE FOR CULTURE, MEDIA AND SPORT—The Rt. Hon. Tessa Jowell, MP
MINISTERS OF STATE—
Minister for Sport and Tourism—The Rt. Hon. Richard Caborn, MP
Minister for the Arts—The Rt. Hon. Estelle Morris, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
The Rt. Hon. The Lord McIntosh of Haringey (Minister for Media and Heritage)

Defence—
SECRETARY OF STATE—The Rt. Hon. Geoffrey Hoon, MP
MINISTER OF STATE—
The Rt. Hon. Adam Ingram, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Bach (Minister for Defence Procurement)
Ivor Caplin, Esq, MP

Education and Skills—
SECRETARY OF STATE—The Rt. Hon. Charles Clarke, MP
MINISTERS OF STATE—
Minister for School Standards—David Miliband, Esq, MP
Minister for Children—The Rt. Hon. Margaret Hodge, MP
Minister for Lifelong Learning, Further and Higher Education—The Rt. Hon. Alan Johnson, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Baroness Ashton of Upholland
Ivan Lewis, Esq, MP
Stephen Twigg, Esq, MP

Environment, Food and Rural Affairs—
SECRETARY OF STATE—The Rt. Hon. Margaret Beckett, MP
MINISTERS OF STATE—
Minister for Rural Affairs and Local Environmental Quality—The Rt. Hon. Alun Michael, MP
Minister for the Environment— Elliot Morley, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Whitty
Ben Bradshaw Esq, MP

Foreign and Commonwealth Affairs—
SECRETARY OF STATE—The Rt. Hon. Jack Straw, MP
MINISTERS OF STATE—
Minister for the Middle East—The Rt. Hon. The Baroness Symons of Vernham Dean
Minister for Europe— Denis MacShane, Esq, MP
Minister for Trade and Investment—Mike O'Brien, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Bill Rammell, Esq, MP
Chris Mullin, Esq, MP

Health—
SECRETARY OF STATE—The Rt. Hon. Dr. John Reid, MP
MINISTERS OF STATE—
The Rt. Hon. John Hutton, MP
Rosie Winterton, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Miss Melanie Johnson, MP
Dr. Stephen Ladyman, MP
The Lord Warner

Home Office—
SECRETARY OF STATE—The Rt. Hon. David Blunkett, MP
MINISTERS OF STATE—
Minister for Crime Reduction, Policing and Community Safety— Ms Hazel Blears, MP
Minister for Criminal Justice System and Law Reform—The Baroness Scotland of Asthal, QC
Minister for Citizenship and Immigration— The Rt. Hon. Beverley Hughes, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Paul Goggins, Esq, MP
Caroline Flint, MP
Fiona Mactaggart, MP

International Development—
SECRETARY OF STATE—The Rt. Hon. Hilary Benn, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—Gareth Thomas, Esq, MP

Law Officers' Department—
ATTORNEY-GENERAL—The Rt. Hon. Lord Goldsmith, QC
SOLICITOR-GENERAL—The Rt. Hon. Harriet Harman, QC, MP
ADVOCATE-GENERAL FOR SCOTLAND—Dr. Lynda Clark, QC, MP

Leader of the House of Commons—
LEADER OF THE HOUSE OF COMMONS—The Rt. Hon. Peter Hain, MP
DEPUTY LEADER OF THE HOUSE OF COMMONS—Phil Woolas, Esq, MP

Northern Ireland Office—
SECRETARY OF STATE—The Rt. Hon. Paul Murphy, MP
MINISTERS OF STATE—
The Rt. Hon. Jane Kennedy, MP
The Rt. Hon. John Spellar, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
Ian Pearson, Esq, MP
Angela Smith, MP

Paymaster General's Office—
PAYMASTER GENERAL—The Rt. Hon. Dawn Primarolo, MP

Privy Council Office—
LORD PRESIDENT OF THE COUNCIL AND LEADER OF THE HOUSE OF LORDS— The Rt. Hon. The Baroness Amos

Trade and Industry—
SECRETARY OF STATE AND MINISTER FOR WOMEN AND EQUALITY—The Rt. Hon. Patricia Hewitt, MP
MINISTERS OF STATE—
Minister for Energy, E-Commerce and Postal Services—Stephen Timms, Esq, MP
Minister for Trade and Investment—Mike O'Brien, Esq, MP
Minister for Industry and the Regions and Deputy Minister for Women and Equality— The Rt. Hon. Jacqui Smith, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Sainsbury of Turville (Minister for Science and Innovation)
Nigel Griffiths, Esq, MP (Minister for Small Business and Enterprise)
Gerry Sutcliffe, Esq, MP (Minister for Employment Relations, Competition and Consumers)

Transport—
SECRETARY OF STATE—The Rt. Hon. Alistair Darling, MP
MINISTER OF STATE—
Dr. Kim Howells, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
David Jamieson, Esq, MP
Tony McNulty, Esq, MP

Treasury—
PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—The Rt. Hon. Tony Blair, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Gordon Brown, MP
CHIEF SECRETARY—The Rt. Hon. Paul Boateng, MP
PAYMASTER GENERAL—The Rt. Hon. Dawn Primarolo, MP
FINANCIAL SECRETARY—Ms Ruth Kelly, MP
ECONOMIC SECRETARY—John Healey, Esq, MP
PARLIAMENTARY SECRETARY—The Rt. Hon. Hilary Armstrong, MP
LORDS COMMISSIONERS—
John Heppell, Esq, MP
Nick Ainger, Esq, MP
Jim Murphy, Esq, MP
Derek Twigg, Esq, MP
Joan Ryan, MP
ASSISTANT WHIPS—
Fraser Kemp, Esq, MP
Charlotte Atkins, MP
Gillian Merron, MP
Vernon Coaker, Esq, MP
Paul Clark, Esq, MP
Margaret Moran, MP
Bridget Prentice, MP

Work and Pensions—
SECRETARY OF STATE—The Rt. Hon. Andrew Smith, MP
MINISTERS OF STATE—
Minister for Work—Des Browne, Esq, MP
Minister for Pensions—Malcolm Wicks, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Rt. Hon. The Baroness Hollis of Heigham
Maria Eagle, MP
Chris Pond, Esq, MP

Her Majesty's Household—
LORD CHAMBERLAIN—The Rt. Hon. The Lord Luce, GCVO
LORD STEWARD—The Duke of Abercorn, KG
MASTER OF THE HORSE—The Lord Vestey
TREASURER—Bob Ainsworth, Esq, MP
COMPTROLLER—Thomas McAvoy, Esq, MP
VICE-CHAMBERLAIN—Jim Fitzpatrick, Esq, MP
CAPTAIN OF THE HONOURABLE CORPS OF GENTLEMEN-AT-ARMS—The Rt. Hon. The Lord Grocott
CAPTAIN OF THE QUEEN'S BODYGUARD OF THE YEOMAN OF THE GUARD—The Lord Davies of Oldham
LORDS IN WAITING—The Lord Bassam of Brighton, The Lord Evans of Temple Guiting
BARONESSES IN WAITING—The Baroness Farrington of Ribbleton, The Baroness Andrews, OBE, The Baroness Crawley

---

SECOND CHURCH ESTATES COMMISSIONER, REPRESENTING CHURCH COMMISSIONERS— Sir Stuart Bell, MP

HOUSE OF COMMONS

THE SPEAKER—The Rt. Hon. Michael J. Martin, MP

CHAIRMAN OF WAYS AND MEANS—The Rt. Hon. Sir Alan Haselhurst, MP

FIRST DEPUTY CHAIRMAN OF WAYS AND MEANS—Mrs. Sylvia Heal, MP

SECOND DEPUTY CHAIRMAN OF WAYS AND MEANS—Sir Michael Lord, MP

CHAIRMEN'S PANEL—
Mrs. Irene Adams, MP, David Amess, Esq, MP, Janet Anderson, MP, Nigel Beard, Esq, MP, Miss Anne Begg, MP, Joe Benton, Esq, MP, Sir John Butterfill, MP, Martin Caton, Esq, MP, David Chidgey, Esq, MP, Derek Conway, Esq, MP, Frank Cook, Esq, MP, James Cran, Esq, MP, John Cummings, Esq, MP, The Rt. Hon. Eric Forth, MP, Roger Gale, Esq, MP, Win Griffiths, Esq, MP, Mike Hancock, Esq, MP, Jimmy Hood, Esq, MP, Kevin Hughes, Esq, MP, Alan Hurst, Esq, MP, Eric Illsley, Esq, MP, John McWilliam, Esq, MP, Bill O'Brien, Esq, MP, Edward O'Hara, Esq, MP, Bill Olner, Esq, MP, Peter Pike, Esq, MP, Mrs. Marion Roe, MP, Jonathan Sayeed, Esq, MP, George Stevenson, Esq, MP, David Taylor, Esq, MP, The Rt. Hon. Miss Ann Widdecombe MP, Sir Nicholas Winterton, MP

HOUSE OF COMMONS COMMISSION—
The Rt. Hon. The Speaker (Chairman), The Rt. Hon. Peter Hain, MP, Oliver Heald, Esq, MP, Sir Archy Kirkwood, MP, Sir Stuart Bell, MP, Sir Patrick Cormack, FSA, MP

SECRETARY OF THE COMMISSION—Robert Rogers

ASSISTANT SECRETARY —Shona McGlashan

AUDIT COMMITTEE—
Oliver Heald, Esq, MP (Chairman), Sir Archy Kirkwood, MP, Sir Thomas S. Legg, KCB, QC, David Taylor, FCA

SECRETARY OF THE AUDIT COMMITTEE—Dr. Mark Egan

BOARD OF MANAGEMENT—
Roger Sands, (Chief Executive), George Cubie, CB (Clerk of Committees, Department of the Clerk of the House), Sir Michael Cummins (Serjeant at Arms), Priscilla Baines (Librarian), Andrew Walker (Director of Finance and Administration), Bill Garland (Editor of the Official Report), Sue Harrison (Director of Catering Services)

SECRETARY OF THE BOARD OF MANAGEMENT—Richard Ware, DPhil

SPEAKER'S SECRETARY—Roger Daw

SPEAKER'S COUNSEL—John Vaux

SPEAKER'S CHAPLAIN—Rev. Canon Robert Wright

MEDICAL ADVISER TO THE SPEAKER—Dr. Ron Zeegen, OBE, FRCP, MRCS, DObst, RCOG

PARLIAMENTARY COMMISSIONER FOR STANDARDS—Sir Philip Mawer

26 January 2004

Written Ministerial Statements

Monday 26 January 2004

HEALTH

Direct Payments

The Parliamentary Under-Secretary of State for Health (Dr. Stephen Ladyman): The Government are committed to see an increase in the take-up of direct payments, as they are an excellent way for individuals using social services to gain control and independence over their own lives. Direct payments are cash payments made in lieu of social service provisions to individuals who have been assessed as needing services. I understand that some councils are expressing some confusion about the ability of individuals using their direct payments to pay a spouse or other close relative.

Direct payments cannot be used routinely by individuals to pay spouses, or close relatives who live in the same household. The regulations were changed in April 2003 to give local councils some discretion in this matter. They can allow payments to be made in this way, but only where they are satisfied that securing the service from the relative is necessary to meet satisfactorily that individual's need for that service.

Regulations have never specified that close relatives living outside the household could not be paid using a direct payment and there is no legal restriction on individuals using their direct payment in this way. Councils are however able to make conditions about who can be employed in individual circumstances. There are often legitimate reasons for doing so but a decision should be taken according to the merits of each individual case.

Hepatitis C Compensation Scheme

The Secretary of State for Health (Dr. John Reid): The Department announced in August of last year the setting up of an ex-gratia payment scheme for people infected with Hepatitis C from National Health Service blood or blood products. Since that announcement, work has progressed on the detail of the scheme.

The UK scheme will award eligible claimants with initial lump sum payments of £20,000 to all those who now have Hepatitis C from blood or blood products, with a further £25,000 being awarded when people reach a more advanced stage of illness.

We feel that these are fair and reasonable payments and hope that they will help alleviate some of the problems people who have been affected in this way are experiencing.

Work is ongoing to set up the independent body that will administer the scheme and to introduce the necessary legislation so that people will not lose their social security benefits as a result.

In the course of negotiations we have been able to define a further level of detail on eligibility and scheme administration which will be advantageous to claimants. In particular, bureaucracy will be minimised for people making a claim, in recognition that it will be difficult for some people to gather evidence from twenty years ago.

The scope of the scheme has also been extended to include people who have cleared the virus as a result of treatment and to those infected as a result of the virus being transmitted from someone who was infected from blood or blood products. The scheme will also consider people who were infected with HIV as well as Hepatitis C in the same way as those only infected with the Hepatitis C virus.

Work is progressing on finalising the application process for awards and setting up the independent body that will administer the scheme. Organisations such as the Haemophilia Society and Hepatitis C Trust will be fully involved in that work to help ensure the procedures are as user friendly as possible.

We will work with the relevant organisations to ensure claimants know what to do to make an application.

NORTHERN IRELAND

Post-Primary Education

The Minister of State, Northern Ireland Office (Jane Kennedy): The Government are today publishing the report from the working group, chaired by Mr. Steve Costello, which was asked to provide advice about new post-primary arrangements in Northern Ireland. Copies of the report are being placed in the Library. As part of its remit, the working group was asked to take account of the responses to the extensive consultation on the Burns report, including the diversity of views on academic selection.

The working group's advice has been carefully considered. The review of post-primary education has been ongoing for over 5 years. The uncertainty about the shape of post-primary education must be ended. The Government believe that the advice provides a sound basis for moving forward and has accepted the recommendations in full.

Many Northern Ireland schools enjoy a high reputation, but the current transfer and post-primary arrangements have significant weaknesses. They do well for some pupils but not for others, and there are inequalities of access. These issues must be addressed.

The key concept of the new arrangements is an entitlement framework to guarantee access for all pupils to a wide range of academic and vocational course options. This will directly address the current disparity of access to courses and, for the first time, secure a proportion of provision as being vocational. It will complement the revised statutory curriculum being proposed by CCEA and will provide increasing choice and flexibility as pupils mature. Extensive collaboration among schools and with FE colleges will be required in order to secure the full range of provision in each locality.

The working group advised that any alternative selection arrangements would be no less problematical than the current arrangements; that it is educationally unsound to select pupils at age eleven; that eleven is too early to commit pupils to particular pathways; and that it is unsound to believe that the more able should follow only academic courses. Academic selection will end and new transfer arrangements will be based on informed parental and pupil choice. An academic route will remain available, but pupils and parents will choose this pathway rather than being selected for it.

Ending the transfer tests immediately would create a huge demand for places in popular schools and it will be necessary to create the conditions for new arrangements to work. The entitlement framework and the associated collaboration arrangements will need to be in place. The pupil profile, being developed by CCEA, will also need to be in place to give parents the information to help make informed decisions, and new admissions criteria will be required to determine admissions where schools are oversubscribed. The group recommended that further work is required to determine those criteria and Government will be taking this forward immediately.

To provide the time to create the conditions to end the tests, the working group recommended that the last tests should be held in Autumn 2008. The Government have accepted this advice.

The Government are not specifying what types of schools will exist under future arrangements. Any school offering access to the entitlement framework has a place in the new arrangements. These could include new school types such as specialist schools able to respond to local opportunities and needs. Schools where the curricular emphasis is on academic courses will continue to exist provided they meet the entitlement framework, including access to a range of vocational courses as well as academic courses.

Implementation will involve schools and FE colleges working together to develop arrangements for their area. Support will be provided to help them through this process and to facilitate local discussion and decision-making. Officials will be taking forward consideration of related policy issues such as school transport, open enrolment and the arrangements for school funding. This work, and the work on admissions criteria, will provide opportunities for consultation with education partners and others on the detailed aspects of the proposals.

The Government believe the working group has charted a way forward which deserves the widest support. It is a new and bold approach to guarantee access to an educational entitlement for every pupil irrespective of their background or circumstances, where they live, or the school they attend. It will impact on all schools and the Government will be working in partnership with the education sector to tailor the post-primary arrangements to meet the specific needs of Northern Ireland.

Pupils need to be prepared for life and work in a modern technological world and a global economic market where the pace of change is accelerating. The Government's decisions today create the conditions to take this forward, to raise standards for all pupils and provide the world-class education they rightly deserve.

Northern Ireland Prison Service

The Minister of State, Northern Ireland Office (Jane Kennedy): The Director General of the Northern Ireland Prison Service acts as accounting officer for the resources allocated to the prison service in accordance with the financial arrangements set out in the framework document.

To reflect current business needs, I have approved the following increases to this delegated authority.

	Amount and Conditions
1. Capital	
New works	£3 million plus VAT for any one project (previously £2 million plus VAT)
Purchase of land	£1 million for any one project (previously £150,000 plus VAT)
2. Losses	
Write off losses coming under Section 36 of "Government Accounting"	£50,000 (previously £10,000)

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Agricultural Merchants and Saddlers

The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs (Mr. Ben Bradshaw): With the consent of the Treasury, the schedule of fees for registration, retention and restoration of Agricultural Merchants and Saddlers with the Royal Pharmaceutical Society of Great Britain effective from January 2004 has been determined. This is given in the attached table:

	Fees	
Application in respect of each premises	*Previous fee* £	*New fee* £
Agricultural Merchants		
For registration under Article 5	232	232
For retention of registration under Article 5	153	161
For restoration of registration under Article 5	197	197
Saddlers		
For registration under Article 5	127	127
For retention of registration under Article 5	83	85
For restoration of registration under Article 5	107	107

DEFENCE

Future Strategic Tanker Aircraft

The Secretary of State for Defence (Mr. Geoffrey Hoon): I am pleased to report to the House the latest developments in our plans to provide the Royal Air Force with a modern replacement air refuelling capability. The future strategic tanker aircraft (FSTA) programme is planned to replace the RAF's ageing fleet

of VC10 and TriStar aircraft around the end of the decade. We have been considering for some time whether the FSTA capability can be provided through a service-based contract with industry under the private finance initiative (PFI). I can now report that, following a detailed assessment process, a bid from AirTanker Ltd has been judged to offer the best prospective value for money PFI solution to the FSTA requirement. This decision marks a key milestone on this vital project.

Under a PFI contract, industry would own and maintain the aircraft and provide training services, infrastructure and some personnel, whilst the RAF would undertake military operations. A PFI contract has the potential to offer considerable scope for innovation, not least because the contractor will be able to use aircraft not required by the RAF in peacetime to generate revenue, through commercial usage. Industry is also best placed to manage the through life risks of owning a fleet of modern jet airline aircraft. Two PFI consortiums submitted bids last year. AirTanker Ltd, which comprises Rolls Royce, EADS, Cobham and Thales, proposed a service using Airbus A330 aircraft, while the Tanker Transport Services Company (TTSC), which comprises BAE Systems, Boeing, Serco and Spectrum Capital, proposed a service using Boeing 767 aircraft. The competition was keenly fought. However, our judgment is that AirTanker's proposal offers the best prospective solution for the armed forces, the taxpayer and UK industry.

We will now take forward single bidder negotiations with AirTanker Ltd, aimed at concluding a PFI contract as soon as possible. I should stress however, this remains a complex and challenging PFI programme. A number of detailed issues remain to be resolved and we look to AirTanker to work with us over the coming months to resolve the outstanding issues. A final decision on whether or not to proceed with a PFI contract will not be taken until these negotiations have been satisfactorily concluded. I will of course ensure that the House is kept fully in touch with significant developments.

EDUCATION AND SKILLS

Higher Education Funding

The Secretary of State for Education and Skills (Mr. Charles Clarke): In my statement to the House on 8 January I set out measures to improve the student support arrangements that would operate alongside the introduction of variable tuition fees in higher education from autumn 2006. I said we would establish an independent review, working with the Office for Fair Access, to report to the House, on all aspects of the new arrangements based on the first three years' operation of the policy. I can now give more details on the draft remit of the review. During the passage of the Bill I would welcome comments and suggestions for amendments to this remit.

The review, which will be conducted by a commission, will work on the basis of evidence from the first three years' operation of the variable fee arrangements. It will report to Parliament and will cover three main areas.

The impact of the new arrangements on higher education institutions (HEIs):

Charging policies, and how far HEIs have varied their fees.

The additional income HEIs have raised and how they have used it.

The provision of bursaries and other financial support.

Any effect on the range, mix and take-up of subjects and qualifications offered, including any effect on foundation degrees, courses lasting longer than three years and the regional composition of HEI provision.

A financial assessment of the relative impact on different parts of the higher education sector, and an analysis of future funding pressures.

The impact of the new arrangements on students and prospective students

Overall level of application and participation in higher education.

Student support arrangements, including those for those from the poorest backgrounds as well as those above the threshold for Government support.

Choice of institution and course, mode of study (full time/part time)

Quality of teaching received, attainment, and likelihood of completing a course.

Levels of debt; students' assessment of the value of HE, and rates of return from gaining a degree.

Patterns in subsequent employment—particularly recruitment to the public services—or decisions to go on to further study.

Any differential effect on particular groups; for example, lower socio economic groups; men and women; different ethnic groups; people with disabilities; people from different regions.

Future policy

Whether any improvements should be made to the graduate contribution scheme and the upper limit for tuition fees.

What changes should be made to the arrangements for student support in order to ensure that students from the poorest family backgrounds on the most expensive courses receive support at a level equivalent to the maximum level of fees.

I would expect the commission to work with the Office for Fair Access, as well as seeking views from a range of other interests. The Government will consider any report before submitting any recommendation to the House on raising the upper limit of the tuition fee.

Work to establish baseline data for the review will begin in the 2004–05 academic year.

Written Ministerial Statements

Tuesday 27 January 2004

TRANSPORT

Highways Agency

The Parliamentary Under-Secretary of State for Transport (Mr. David Jamieson): The Highways Agency Annual Report and Accounts for 2002–03 has been laid before the House today under Section 7 of the Government Resources and Accounts Act 2000. Copies of the report have been placed in the Libraries of both Houses.

WORK AND PENSIONS

Disability and Carers Service

The Secretary of State for Work and Pensions (Mr. Andrew Smith): I am today announcing that the disability and carers service (DCS), the organisation responsible for delivering disability and carers benefits within the Department for Work and Pensions, will be assigned formal executive agency status with a chief executive appointed by open competition.

The DCS is a substantial business, employing over 7,000 staff and paying out in excess of £11 billion a year in disability living allowance, attendance allowance and carers allowance to just under 4.5 million people. The customers are some of the most disadvantaged in society and the benefits require specialist assessment of care and mobility needs.

In April 2002, my Department established Jobcentre Plus and The Pension Service as executive agencies to provide services to people of working age and pensioners. However, extra cost disability and carers benefits continued to be administered by an organisation with non-executive status. Since 2002, without formal agency status, the DCS has made substantial improvements in the speed and quality of decision-making. The new agency will keep up the momentum, actively building on these achievements. Agency status will improve efficiency and customer service, allowing the organisation to agree clear goals with me and then having the clear accountability for delivery.

As work to set up the agency progresses, my Department will consult with groups representing disabled people to ensure that the new organisation is designed in a way that best suits the needs of its customers.

The process of establishing the agency and selection of the chief executive by open competition will now commence. I have not yet set a date for launching the agency. It is important to ensure smooth transition with the minimum disruption to business delivery. I am, however, confident that these changes will sharpen accountabilities and improve services significantly for the millions of disabled people and their carers receiving these benefits.

Northampton Borough Council

The Parliamentary Under-Secretary of State for Work and Pensions (Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) follow-up inspection report on Northampton Borough Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper *"Quality and Choice: A Decent Home for All"*, published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

The BFI inspected Northampton Borough Council against the performances standards for housing benefits. The report finds that the council is not at standard for any of the seven functional areas of the performance standards—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud, and overpayments.

However, the report finds that the council has made significant improvements in the areas of counter-fraud and working with landlords, since the first BFI inspection report published in April 2000. Weaknesses remain in claims processing and overpayment performance.

The council's management information is very limited across all areas of its benefits administration and as a result, there is little awareness of the issues affecting performance. In particular, the lack of effective management controls and checks in claims processing and the overpayment process has hampered the council's ability to improve claims processing and recover overpaid benefits.

There were significant backlogs of work, with new housing benefits claims taking an average of 62 days to clear compared with the national target of 36 days.

The report finds good practices in the council's benefits service including quality training of its fraud investigators, clearly set out benefit claim forms and good working relations with key stakeholders.

In 2002–03, Northampton Borough Council administered some £46.7 million in housing benefits, about 39 per cent. of its gross revenue expenditure.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Housing Benefit

The Parliamentary Under-Secretary of State for Work and Pensions (Chris Pond): The outcome of the consultation on housing benefit sanctions for anti-social behaviour was published today. An analysis of the responses has been placed in the Library and also a copy put on the DWP website at http://www.dwp.gov.uk/consultations/2003/index.asp.

Tackling anti-social behaviour is a priority for the Government. It blights communities and can undermine the regeneration of the most disadvantaged areas, creating an environment where crime takes hold.

When my right hon. Friend the Secretary of State for Work and Pensions consulted on a housing benefit sanction between May and August 2003, he received 487 responses from a wide range of organisations and members of the public. One of the responses included a petition from the constituents of Paisley, South. If the signatories are counted as individual responses the final number of responses was 698. Everyone who responded agreed that anti-social behaviour must be stopped. Victims and local people in particular were supportive of the proposed measures, though concerns were expressed by a large number of respondents about whether the measures would be workable or effective.

In the light of these concerns, particularly from local authorities, who play a key role in preventing and dealing with anti-social behaviour and also both private and registered social landlords, we have decided not to proceed with a housing benefit sanction at this time.

There is already a wide range of tools to deal with the types of behaviour that makes people's daily lives a misery; for example, anti-social behaviour orders and acceptable behaviour contracts. The Government has recently strengthened these existing powers with further measures in the Anti-Social Behaviour Act 2003 and new proposals in the Housing Bill currently before Parliament. On 14 October, the Home Office published an action plan "*Together: Tackling Anti-Social Behaviour*". This action plan will help improve the response to tackling anti-social behaviour. This includes funding for every area of England and Wales, a new "together" action line, website and academy to provide help and support to practitioners and a range of projects to tackle nuisance families, begging and environmental crime. We want to make full use of the range of powers available before introducing a new measure. But we do not rule out other means, in the future as we learn from experience and establish what works.

DEPUTY PRIME MINISTER

Arson Control Forum Implementation Fund

The Minister for Local Government, Regional Governance and Fire (Mr. Nick Raynsford): I have today announced the outcome of the Arson Control Forum Implementation Fund launched on 20 August 2003.

We plan to pay grants totalling over £9.3 million over the period to March 2006 to support 66 local arson prevention initiatives throughout England and Wales. This demonstrates clearly the Government's commitment to tackling arson and doing more to prevent fires, as set out in the draft Fire and Rescue National Framework published on 11 December 2003. Our substantial investment in the efforts of the police and fire and rescue services, in partnership with others, will help to reduce the number of deliberate fires. The additional funding will also assist the Government's wider neighbourhood renewal plans and complements the Anti-Social Behaviour Action Plan launched by the Prime Minister in October 2003. Copies of a table summarising the payments we plan to make to local partnerships are available in the Libraries of both Houses.

DEFENCE

Race Equality Scheme

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): In accordance with undertakings in its Race Equality Scheme, the Ministry of Defence has produced a progress report, a copy of which is being place today in the Library of the House. The report shows that across the Department and the Armed Forces we are continuing to build on past experience and initiatives to eradicate harassment and unlawful discrimination and to develop a more proactive approach to race relations as part of our diversity programme. Good progress has been made but we recognise that more needs to be done. The report describes the steps that the Ministry of Defence will be pursuing to further its vision.

Written Ministerial Statements

Wednesday 28 January 2004

TRADE AND INDUSTRY

Cat and Dog Fur

The Minister for Trade and Investment (Mr. Mike O'Brien): On 17 July last year I made a written statement to the House, *Official Report* cols 79–80WS, on the issue of cat and dog fur. I asked interested parties to try within six months to produce hard evidence of the extent of imports of domestic cat and dog fur into the UK. I said that if such evidence could be produced, I would in principle, be prepared to support a ban on the import of these furs. If, after six months hard evidence had not been produced, the Government would not legislate until evidence is forthcoming.

The six month deadline has ended. The Government understands the ethical concerns about the alleged import of cat and dog fur and is therefore reporting back to both Houses on progress made over the last six months.

Our priority on this issue has always been, and remains, the need to establish the facts about the extent of this alleged trade and to act in a measured way. The Government has maintained regular contact with interested parties over the last six months. However, over this time, we have received only one alleged sample of domestic dog fur and no samples of domestic cat fur.

We have asked scientific experts at the former Laboratory of the Government Chemist (LGC Limited) to determine the reliability of mass spectrometry as a possible means of accurately distinguishing the furs of domestic cat and dogs from that of other animal species. Such a test is necessary to determine whether domestic cat and dog fur is being imported into the UK, to permit effective enforcement of the Trade Descriptions Act and that of any future legislation governing the import of these furs.

Known samples of fur from both domestic and wild species within the cat and dog families, fur from other animals and the alleged sample of domestic dog fur were sent for testing last year. Some of these samples were also tested in an altered state to replicate the effects of textile processing. Thirteen samples were tested in total, all of them were tested twice, further to the discovery that technical problems might have affected the initial results.

LGC Limited has confirmed that four of the thirteen samples were correctly identified in the initial testing and six out of thirteen were correctly identified in the subsequent testing. Less than half of the samples were therefore correctly identified, and probability ratios demonstrate that there is a high chance that these samples could in fact have come from another species. Given these results, LGC Limited has recommended that mass spectrometry is not yet currently sufficiently reliable as a means of identifying domestic cat and dog fur from the fur of other animal species.

I have placed copies of LGC Limited's report in the Library of the House.

Whilst these results are very disappointing, there is some evidence that the reliability of mass spectrometry may improve as the database of known samples is built up and the software improves.

In my previous written statement, I made clear that, whilst the Government is prepared to take practical and proportionate action to address this matter, any action would be most effective if taken at EU level. There is stronger evidence that domestic cat and dog fur has been used in products found in some other EU countries. For this reason, we have been working hard over the last six months to raise the profile of this issue at EU level. In November last year, I publicly supported calls by the European Parliament for an EU ban on trade in cat and dog fur, whilst making clear that it was also essential to have in place a reliable scientific test to ensure effective enforcement. The UK has also, in the context of various EU meetings, either raised the issue of cat and dog fur or supported calls by other Member States for the European Commission to consider this issue further. We continue to be in regular contact with officials from other countries and from the Commission in order to share information and our approaches to this emotive issue.

In July I undertook to give support to a ban on the import of domestic cat and dog fur if clear evidence could be produced of the extent of this problem in the UK. This has not been achievable over the last six months, and as I made clear last summer, I cannot therefore support an import ban at this point in time. However, this Government will continue to encourage interested parties to provide evidence of the extent of this problem. I have also asked LGC Limited to submit new known samples of fur for testing in order to further analyse the reliability of mass spectrometry and we will continue to push for greater EU involvement on this issue.

I can assure you that this Government remains fully committed to establishing the facts about this issue and to taking proportionate and practical action. I therefore further undertake to report back to Parliament on progress made at the latest within twelve months and earlier if there are any substantive developments.

WORK AND PENSIONS

Bury Metropolitan Borough Council

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) inspection report on Bury metropolitan borough council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "*Quality and Choice: A Decent Home for All*", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

The BFI inspected Bury metropolitan borough council against the performance standards for housing benefits. The report finds that the council is not at standard for any of the seven functional areas of the performance standards—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud, and overpayments. However, the council is performing well in a significant number of elements of the standards.

The report finds that historically the council's benefit service has been given low priority within the council and performance overall has been mixed. While counter-fraud performance has been sound, performance in the processing of claims has been weak and there are significant arrears of work.

The report finds that since the comprehensive performance assessment result, announced in December 2002, the council has made progress across many areas of the performance standards.

The major challenge for the council is to significantly improve its benefits processing performance. This will be helped by a more systematic approach to planning, backed up by project disciplines and gathering management information.

In 2001–02, Bury metropolitan borough council administered some £31.3 million in housing benefits, about 15.5 per cent. of its total gross revenue expenditure.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

TREASURY

Double Taxation Convention (United Kingdom and France)

The Paymaster General (Dawn Primarolo): A new comprehensive double taxation convention with France (which will replace the existing agreement) was signed on 28 January 2004. After signature, both texts were deposited in the Library of the House and made available on the Inland Revenue's website. The text of the convention will be scheduled to a draft order in council and laid for consideration by the House in due course.

Written Ministerial Statements

Thursday 29 January 2004

NORTHERN IRELAND

Alternatives to the Baton Round: Publication of Phase Four Report

The Minister of State, Northern Ireland Office (Jane Kennedy): On 9 April 2003, I issued a press statement on the use of baton rounds in Northern Ireland. It contained the following paragraph:

> "On the basis that an acceptable and effective and less lethal alternative is available, the baton round would no longer be used after the end of 2003. In the event that that has not been achieved, the Government would report on the progress of the fourth phase of the research programme and review the options for less lethal alternatives consulting widely with a range of interested parties including the Chief Constable and the Policing Board".

I have today placed in the Library a copy of the report on the fourth phase of the research programme into alternative policing approaches towards the management of conflict.

A multi-agency steering group was set up in 2000, following publication of the Patten report on policing in Northern Ireland. Its purpose was to take forward the programme to establish whether an acceptable, effective and less potentially lethal alternative to the baton round is available and to review the public order equipment which is presently available or could be developed in order to expand the range of tactical options available to operational commanders.

As Patten envisaged, it has been a wide-ranging and substantial programme. I am grateful to many contributors, including the police, those in government service, academics and other experts, for their sustained commitment.

This fourth report of the steering group, that I have published today, concludes that there is as yet no commercially available product that meets the criteria of an acceptable and effective and less potentially lethal alternative.

The Government will continue to keep all commercial products and technological research under review. It will ensure that those appearing to have real potential are tested and medically evaluated if appropriate.

Against this background, the Government have concluded that it would be right to continue with the development of the attenuating energy and discriminating irritant projectiles (AEP and DIP) which represent the best opportunity to get an alternative to the L21 A1 into service as rapidly as possible. The progress made in their development is set out fully in the report. While significant challenges remain, it is projected that the attenuating energy projectile would be available by the end of 2004, ready for operational use before summer 2005. Its development also follows up one of the recommendations for research by the independent medical advisers in their evaluation of the existing baton round, a copy of which was placed in the Library of the House on 2 April 2001.

Work is also continuing on a second new projectile, the discriminating irritant projectiles. This is inevitably a longer-term project. It is by no means certain that it can be successfully achieved, although the signs are positive thus far.

We believe that there is real value in this combined programme, which has the potential to provide an acceptable, effective and less potentially lethal alternative to the current baton round. The Government intend to consult with a range of interested parties, including the Chief. Constable of the Police Service of Northern Ireland and the Northern Ireland Policing Board.

In publishing the report today, I am inviting comments on it from interested parties.

DEFENCE

Army Technical Foundation College

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): In my statement to the House on 27 November 2003, *Official Report*, column 35WS, I announced that I had approved in principle, and subject to full trades union consultation, plans by the Army Training and Recruiting Agency (ATRA) to close the Army Technical Foundation College (ATFC) at Arborfield, and transfer students to, principally, the Army Foundation College (AFC) at Harrogate, where a technical training stream will be introduced. There will be other changes to the way in which junior recruits are trained within the ATRA, but these do not envisage closures of any establishments.

I can now confirm that the consultation exercise has now been concluded and no serious objections have been raised to the proposal. I have therefore agreed that the closure plans may be implemented. Training at the College will therefore cease with effect from August of this year (the last students being accepted at the beginning of this month (January) and the College will close in March 2005.

The principal aim of this proposal is to improve the quality and efficiency of training provided to junior entrants to the technical trades. It will not affect the Army's commitment or ability to accept suitable junior applicants onto appropriate courses at either the AFC or other ATRA Junior Entry establishments. I do not anticipate that this will have any major impact on the Army's recruiting plans in general.

WORK AND PENSIONS

Isle of Wight Council (Benefit Fraud Inspection)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond: On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on Isle of Wight Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "*Quality and Choice: A Decent Home for All*", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

The BFI inspected Isle of Wight Council against the performance standards for housing benefits. The report finds that the council is not at standard for any of the seven functional areas of the performance standards—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud, and overpayments.

Isle of Wight Council's performance on benefit administration was mixed. Verification of evidence to support new and renewal claims was generally completed to standard. However, delays in processing of claims, and in processing changes of circumstances, meant that performance was significantly below targets. New benefit claims were taking an average of 75 days to clear compared with the national target of 36 days. Overpayments were being allowed to continue because notified changes of circumstances were not being dealt with promptly.

A new benefits claim form based on the Department for Work and Pensions' national model was introduced from April 2003 which fully meets the requirements of the Standards.

The performance of the council's fraud investigation team was variable. The team appeared to take the majority of investigations through to their natural conclusion, but the action taken on cases and the reasons for decisions made were not adequately recorded.

Benefit overpayments were being recovered effectively from ongoing benefit, but the process for cases where benefit was no longer in payment was less effective.

In 2002–03, Isle of Wight council administered some £39.5 million in housing benefits, about 18 per cent. of its total gross revenue expenditure.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Benefit Fraud Inspectorate Work Programme

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) has today announced its Phase 9 programme of activity for 2004–05.

The BFI is an independent unit within the Department for Work and Pensions that inspects and reports directly to the Secretary of State for Work and Pensions on the standard of benefit administration and counter-fraud activity in local authorities and the Department's operations.

As part of its Phase 9 activity, the BFI will be undertaking shorter, targeted inspections focusing on the area of claims processing for housing benefits. The BFI will be selecting authorities that are taking 80 days or more to process housing benefits claims. Authorities will be selected on an on-going basis, depending on their quarterly management information returns to the Department for Work and Pensions.

Inspections on three other authorities—Breckland, Copeland, and Wyre—whose claims processing performance has improved significantly will be used to identify and disseminate good practice.

The BFI will be undertaking full inspections on 14 local authorities whose benefits administration has been identified as poor or fair in the Comprehensive Performance Assessment programme. Authorities whose assessment results have already been announced include Allerdale, Broxtowe, Hart, North Norfolk, Rossendale, Rutland, Torridge, and West Berkshire.

Full inspections on two other authorities—Herefordshire and Rotherham—who have shown significant improvements in their benefits administration during the comprehensive performance assessment programme will be used to identify and disseminate good practice.

The BFI will also be undertaking full inspections on Caerphilly and Merthyr Tydfil councils whose benefits service performance has been identified as at risk during the Wales programme for improvement.

The BFI will also be undertaking follow-up inspections on authorities to assess progress made since earlier BFI inspections.

Working with the Audit Commission, the BFI will continue to undertake the comprehensive performance assessments programme, undertaking assessments on 30 district authorities and re-assessing the performance of 116 single-tier authorities.

Working with Audit Scotland and the Audit Commission in Wales, BFI will continue its involvement in the Scottish best value programme and the Wales programme for improvement.

The BFI will also continue to offer practical support and advice to local authorities as part of its successful performance improvement action team, a service that has proved both popular and effective in improving performance in benefits administration. Demand for this service continues to increase.

Subject to further discussions, the BFI will be undertaking a specialist inspection on local authorities' compliance with disability discrimination Acts, and four specialist inspections on the business of the Department for Work and Pensions.

Written Ministerial Statements

Friday 30 January 2004

HOME DEPARTMENT

Police Grant Report (England and Wales 2004–05)

The Minister for Crime Reduction, Policing and Community Safety (Ms Hazel Blears): I have today placed in the Library a copy of the Police Grant Report (England and Wales) 2004–05 (HC 277). The report sets out my determination for 2004–05 of the aggregate amount of grants that I propose to pay under section 46(2) of the Police Act 1996, and the amount to be paid to each police authority and to the Greater London Authority for the Metropolitan Police Authority.

Allocations for each police authority for financial years 2003–04 and 2004–05 are set out in the table:

Police Authority	*2003–04*	*2004–05*	*% Change*
	Allocation[1] *£m*	*Allocation*[1] *£m*	
English Shire forces			
Avon & Somerset	157.1	162.2	3.3%
Bedfordshire	60.1	62.1	3.3%
Cambridgeshire	71.1	73.4	3.3%
Cheshire	103.9	107.2	3.3%
Cleveland	84.1	86.8	3.3%
Cumbria	57.7	59.6	3.3%
Derbyshire	97.9	101.2	3.3%
Devon & Cornwall	161.5	166.7	3.3%
Dorset	61.6	63.6	3.3%
Durham	81.5	84.2	3.3%
Essex	155.9	160.9	3.3%
Gloucestershire	57.0	58.9	3.3%
Hampshire	184.5	190.5	3.3%
Hertfordshire	101.5	104.8	3.3%
Humberside	110.9	114.6	3.3%
Kent	176.8	182.6	3.3%
Lancashire	177.1	182.9	3.3%
Leicestershire	98.8	102.0	3.3%
Lincolnshire	58.7	60.6	3.3%
Norfolk	79.6	82.2	3.3%
North Yorkshire	70.4	72.7	3.3%
Northamptonshire	62.2	64.3	3.3%
Nottinghamshire	123.6	127.6	3.3%
Staffordshire	105.8	109.2	3.3%
Suffolk	63.9	66.0	3.3%
Surrey	85.4	88.2	3.3%
Sussex	153.1	158.1	3.3%
Thames Valley	205.9	212.6	3.3%
Warwickshire	48.2	49.8	3.3%
West Mercia	104.4	107.7	3.3%
Wiltshire	58.7	60.6	3.3%
English Metropolitan forces			
Greater Manchester	380.8	393.2	3.3%
Merseyside	240.5	248.4	3.3%
Northumbria	214.3	221.4	3.3%
South Yorkshire	172.3	178.0	3.3%
West Midlands	386.5	399.3	3.3%
West Yorkshire	289.4	298.9	3.3%
London forces			
GLA—Police	1,764.1	1,822.0	3.3%
City of London [2]	32.5	32.7	N/A
English Total	6,699.2	6,917.7	3.3%
Welsh forces			
Dyfed-Powys	49.3	50.9	3.3%
Gwent	69.6	71.8	3.3%
North Wales[3]	73.3	75.8	3.3%
South Wales	162.9	168.2	3.3%
Welsh Total	355.1	366.7	3.3%
TOTAL	7,054.3	7,284.4	3.3%

Notes

1. Rounded to the nearest £100,000. Grant as calculated under the Local Government Finance Report (England) and Local Government Finance (Police) Report (Wales). This includes the Metropolitan Police special payment, and the effects of floors and ceilings.

2. Figures for the City relate to Home Office Grant only as calculated in the Police Grant Report (England and Wales). Revenue Support Grant is allocated to the Common Council of the City of London as a whole in respect of all its functions. The City is grouped with education authorities for the purposes of floors and ceilings.

3. Welsh Assembly Grant includes PFI payments in RSG funding. PFI payments will be made good to ensure equivalent treatment with English forces.

Firearms Consultative Committee

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): The Home Secretary has decided not to further extend the life of the Firearms Consultative Committee, which will cease to exist on 31 January. The Committee was originally set up for a period of five years from 1 February 1989 under section 22 of the Firearms (Amendment) Act 1988. A total of four orders were subsequently made to allow for its continued existence as provided for by section 22(8).

Since it was established the Committee has made eleven reports and the Home Secretary is grateful for the close scrutiny it has given to a whole range of difficult and complex issues. The Government are anxious to maintain a forum for consultation but would wish to do so on a broader basis than allowed by the existing statutory framework. Urgent consideration will be given to setting up a new consultative structure, possibly on the basis of a two-tier structure to look at detailed technical matters and the operation of firearms controls in the round.

DEPUTY PRIME MINISTER

Planning Obligations Policy

The Minister for Housing and Planning (Keith Hill): On 6 November 2003 the Government published a

consultation document setting out their proposals for the reform of planning obligations policy. The Government have also made amendments to the Planning and Compulsory Purchase Bill 2004 to facilitate their proposal to introduce an optional planning charge. The Government are today publishing a statement on the reform proposals and on Monday 2 February will also publish a summary of the responses received to the consultation. A copy of the Government's statement has today been placed in the Library of the House and is also available on the ODPM's website at www.odpm.gov.uk

Local Government Finance Settlement 2004–05

The Minister for Local Government, Regional Governance and Fire (Mr. Nick Raynsford): Yesterday I laid before the House the Local Government Finance Report (England) 2004–05. This report establishes the amounts of revenue support grant (RSG) and non-domestic rates (NDR) to be paid to local authorities in 2004–05, and the basis of their distribution. A draft of this report was issued for consultation on 19 November 2003. A revised draft was also issued on 11 December, following the announcement in the Chancellor's pre-Budget report of additional money for local authorities.

The Office of the Deputy Prime Minister received a total of 454 written representations within the consultation deadlines from the Local Government Association and the Association of London Government, from local authorities, local authority groups and hon. Members. ODPM Ministers met with delegations from six local authority associations and representative groups to discuss the proposals.

Having considered the views of the local authority associations and others who have commented on the provisional settlement, I have decided to confirm my proposals on the bases of distribution.

The final figures published today reflect the more accurate data and resource totals that have become available since we published our proposals, and also appropriate data corrections to reflect errors discovered by the Office of the Deputy Prime Minister or notified to us by local authorities.

This year's settlement provides another good increase in grant for local authorities. As last year, every local authority has been given a grant increase above the rate of inflation on a like for like basis. With this increase, we expect councils to continue to be able to provide good services while setting reasonable council tax increases. To this end, we have made an extra £640 million available for non-schools services in 2004–05. This is additional to the money allocated under the last spending review, and brings the total increase in money from Government to local councils to 30 per cent. since 1997 in real terms.

I shall be sending copies of this report to all local authorities, and making available full supporting information on the Office of the Deputy Prime Minister's website at http://www.local.odpm.gov.uk/finance/0405/grant.htm

I have placed copies of the report in the Journal Office; and copies of the report, tables showing each authority's formula spending shares and its allocation of RSG and NDR, and other supporting material are available in the Vote Office, the Printed Paper Office and the Libraries of the House.

FOREIGN AND COMMONWEALTH AFFAIRS

Export Licence Application

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): Following consultation with the Foreign and Commonwealth Office and the Ministry of Defence, the Department of Trade and Industry recently approved a further licence to export military list goods to Iraq. The arms embargo against Iraq remains in place under United Nations Security Council resolution 1483 (2003), with the exception of

"arms and other related material required by the Coalition Provisional Authority to serve the purposes of this and other related resolutions".

Accordingly, Her Majesty's Government consider it appropriate to grant exemptions for the export of riot shields which are to be used by Coalition Provisional Authority (CPA) peacekeeping forces in Iraq. The export is consistent with the consolidated EU and national arms export licensing criteria. Future applications will continue to be assessed on a case by case basis against the UN embargo and consolidated criteria, taking into account the circumstances prevailing at the time.

DEFENCE

Colchester PFI Announcement

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): There has been considerable interest in the House in the plans to redevelop the Colchester Garrison living and working accommodation. Detailed negotiations are taking place, and I intend to make an announcement to the House shortly.

Defence 2004

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): On 1 September 2003 I informed the House that the Defence 2003 exhibition, under the leadership of the Royal Air force, which was scheduled to take place at the Royal International Air Tattoo, had been postponed by 12 months because of operational pressures, *Official Report*, columns 913–14W. In light of the continued high level of operational commitments and the associated demands upon service personnel and their families, the Ministry of Defence has now concluded that Defence 2004 should not take place. However, the services will continue to fully support the Royal International Air Tattoo (RIAT) which will take place in July at RAF Fairford, including support for a Youth Day, an Armed Forces Careers Convention, and commemorations of Entente Cordiale and the D-Day anniversary. Over the coming months we will be working closely with the Royal Air Force Benevolent Fund Enterprises who organise the event, to help ensure that RIAT continues its tradition of great success.

EDUCATION AND SKILLS

Advisory Group on Teenage Pregnancy: Second Annual Report

The Minister for Children (Margaret Hodge): Today, 30 January 2004, the Government published their response to the second annual report of independent advisory group on teenage pregnancy.

In their report, the independent advisory group raised a number of issues for the Government's consideration and made eight recommendations. We have carefully considered and responded specifically to the recommendations put forward by the independent advisory group in their second annual report.

We continue to make good progress in implementing the teenage pregnancy strategy, which remains a Government priority. We welcome the early signs that our long-term sustained efforts to reduce the rates of teenage pregnancy are working. This includes a 10 per cent. reduction in conception rates in under 18s and an 11 per cent. reduction among under 16s since 1998.

The strategy draws on the best available research evidence of what works. This is a multi-faceted approach with a range of measures to help young people resist pressure to have early sex, to improve sex and relationship education, to support parents in talking to their children about sex and relationship issues, to improve young people's access to contraceptive advice and to support teenage parents in participating in education, training and employment.

The strategy is very much in tune with the vision of the Green Paper, "Every Child Matters", which provides our vision of how to help every child and young person fulfil their potential.

The Government welcome the recommendations made in the independent advisory group's second annual report and acknowledge the valuable contribution the group makes to the strategy and its implementation.

Our response recognises that in order to sustain the success of the strategy we cannot give way to complacency. There are still many lessons to be learnt and much to do to reach our goal and help young people reach theirs.

A copy of the Government's response has been placed in the Libraries.

Written Ministerial Statements

Monday 2 February 2004

TREASURY

Child Trust Fund

The Financial Secretary to the Treasury (Ruth Kelly): The Child Trust Funds Bill will ensure that every child, whatever their family background, will have access at the age of 18 when they begin their adult life to a stock of assets which they can invest in their future. The child trust fund will also help children and their parents to understand the benefits of saving and investment and how to engage with financial institutions.

The Government are today publishing draft child trust fund regulations. These draft regulations will be of particular interest to potential providers of the child trust fund.

The draft regulations include the requirements for a stakeholder child trust fund account. Every child trust fund provider will make a stakeholder account available as one of the investment options. A stakeholder child trust fund account will have its charges capped at 1.5 per cent. per year, and providers will be required to accept all contributions of £10 and above. No charges will apply to transfers between different types of accounts, including from stakeholder to non-stakeholder, and between providers.

The Government's decision on the charge cap is in the best interests of consumers, as it encourages as wide a selection of providers as possible to offer child trust fund accounts. A large number of providers will encourage competition and ensure the best value for consumers. The Government will continue to monitor that the level of the charge cap best meets the interests of consumers.

The decision was evidence-based and considered the particular characteristics of the child trust fund. The economics of the child trust fund are very different to other financial products, such as the stakeholder pensions. In particular child trust fund accounts will be smaller in terms of the average size of funds compared to pensions and will have a lower minimum contribution level than other stakeholder products.

The evidence on which the decision for the cap was based included the report commissioned by the Government from Deloitte, which looked at the trade-offs of different charge caps for providers and consumers. Deloitte's report will be published later this year, at the same time as their report on the other products in the stakeholder suite.

The minimum contribution for the stakeholder account has been set to ensure the child trust fund is accessible to all savers, including those who cannot commit to regular contributions. Providers will be free to accept lower contributions if they wish and it is expected that competition amongst providers could drive down the minimum amounts accepted.

The Government will continue to work with the Financial Services Authority on the development of an appropriate regulatory regime.

Copies of the draft regulations together with an explanatory commentary are available in the Vote Office and the Libraries of the House.

CONSTITUTIONAL AFFAIRS

Criminal Defence Service Cuts

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): I am today announcing that the Government intend to implement a package of measures which will help achieve better value for money in the Criminal Defence Service (formerly Criminal Legal Aid) while ensuring that help continues to go to those who need it most.

The package draws upon proposals contained in the consultation paper on the Criminal Defence Service (CDS) "Delivering Value for Money in the Criminal Defence Service", which was published last year. After considering the responses to the consultation we intend to introduce the following changes to the CDS:

Strengthening the operation of Recovery of Defence Costs Orders (RDCOs);

Abolishing advocacy assistance for early hearings;

Restricting the scope of the court duty solicitor scheme to remove access for clients who are not in custody and who are charged with non-imprisonable offences;

Abolish post-charge advice and assistance in criminal proceedings (except that provided by the court duty solicitor);

Limiting the provision of free police station advice in certain cases to telephone advice only (with limited exceptions).

I believe that these changes strike the right balance between ensuring the taxpayer receives good value for money and ensuring that publicly funded legal aid is available to those who need it most. We will of course keep the impact of these proposals under review.

DEPUTY PRIME MINISTER

Making it Happen: The Northern Way

The First Secretary of State and Deputy Prime Minister (Mr. John Prescott): I have published today a second progress report on the £22 billion sustainable communities plan, titled "*Making it Happen: The Northern Way*". It looks at the successes since the communities plan was published in February 2003, and at the challenges still to come. This follows on from the first statement, published in July 2003 on the Thames gateway and the growth areas.

The statement reports on the action being taken to regenerate our established urban and rural communities in the north and the midlands. It recognises the new confidence and energy that can be found in many of our northern and midland towns and cities, and seeks to build on this.

We recognise that establishing sustainable communities in the North is as much about economic growth and employment as it is in the rest of the country. The statement makes clear that the north needs

a long-term vision to exploit fully the economic and transport corridors connecting it—a "Northern Way", which looks east to west as well as north to south.

This idea of a northern way—a bold vision that exploits the economic and transport corridors that bind the north—is an example of the new ways of thinking that we need to tap the potential of the north.

We are convinced of the potential for an economic renaissance in the north, and we have pledged to work with the RDAs and the regional planning bodies to develop this vision, together with other key partners. This is alongside the other work that the Government is already doing to improve the relative economic performance of the north.

The report I am launching today offers a vision for renewal and growth that will bring the jobs, investment and renewed housing that can create truly sustainable communities across the northern regions.

We are working to revive communities, renew the homes and rebuild the streets in the areas most affected by abandonment and decay. I am announcing today that the Merseyside market renewal pathfinder will receive £86 million and that NewcastleGateshead market renewal pathfinder will receive £69 million until March 2006 to help tackle the terrible problems caused by low demand. This is in addition to an allocation of £4 million each for an early action programme.

By March 2006, Merseyside expects to deliver: the demolition of over 2,700 redundant and obsolete homes, the refurbishment of 325 homes, over 1,600 new homes built and the widespread delivery of additional management measures designed to overcome the problems of low demand.

By March 2006, NewcastleGateshead expects to deliver: the demolition of almost 2,000 redundant and obsolete properties, 100 new homes built, over 2,000 homes refurbished, and around seven hectares of land acquired for potential later development

Other announcements today include:

27 pilot areas have been identified to receive a share of the £89 million Liveability Fund, and these are listed in the progress report. This will help them develop innovative models for delivering a high quality local environment.

We are creating a sixteenth Urban Regeneration Company in Gloucester. Initial targets are to provide 3,000 new homes and 2,000 new jobs and to attract up to £400 million of private sector investment over 10 years.

We are also providing funding to support the creation of a Regional Centre of Excellence in every region. These will be used to improve the skills of people involved in the delivery of sustainable communities.

We will be holding a "Creating Sustainable Communities Summit" in Manchester at the start of 2005, following on from the successful Urban Summit in 2002.

The statement includes examples of the excellent work being done by our delivery partners—such as local authorities, English Partnerships, the regional development agencies, the Housing Corporation and urban regeneration companies—and of how we can work together in future to deliver a step change in sustainable communities.

I am also publishing today nine regional annexes, providing short progress reports on the delivery of the sustainable communities plan in each English region.

Copies of "*Making it Happen: The Northern Way*" and the regional annexes have been sent to all English Members. Further copies of the report and annexes are available in the Libraries of both Houses, and on the website of The Office of the Deputy Prime Minister at: www.odpm.gov.uk/communities.

London-Stansted-Cambridge Growth Area

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Yvette Cooper): I am today announcing the extension of the London-Stansted-Cambridge growth area to include Peterborough, and all of Cambridgeshire.

This takes account of the important role and potential of Peterborough in contributing to growth as part of the London-Stansted-Cambridge growth area, and the work of the Regional Planning Panel for the East of England in preparing new Regional Planning Guidance.

It also reflects the important work under way on sustainable housing growth across Cambridgeshire, and particularly through the Cambridge Sub Region Infrastructure Partnership, which includes Fenland, East Cambridgeshire and Huntingdonshire.

The complete list of local authorities now included in the London-Stansted-Cambridge growth area is:

Braintree
Broxbourne
Cambridge
East Cambridgeshire
East Hertfordshire
Enfield
Epping Forest
Fenland
Hackney
Haringey
Harlow
Huntingdonshire
North Hertfordshire
Peterborough
Redbridge
South Cambridgeshire
Stevenage
Uttlesford
Waltham Forest

Written Ministerial Statements

Tuesday 3 February 2004

HOME DEPARTMENT

Asylum Accommodation Centres

The Minister for Citizenship and Immigration (Beverley Hughes): Following a careful and detailed assessment of HMS Daedalus in Gosport as a potential accommodation centre for asylum seekers, we have concluded that the difficulties associated with the conversion of historic buildings and the creation of a suitable access point into the site mean that we will no longer be pursuing this site for the purposes of the trial. I can confirm that we will not be proceeding with a planning notification for this site.

It remains our intention to include within the trial of accommodation centres at least one centre which is smaller than the 750 bed model, and is located in, or near, an urban area. We are still in discussions with the Refugee Council about the core and cluster model proposed by them. We will not be putting details of potential sites into the public domain unless and until they appear to be a good prospect for the siting of an accommodation centre.

DEFENCE

Reserve Forces

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): We are making an important administrative change to the recruitment and re-engagement procedures for the volunteer reserve forces. From 1 April this year, new recruits to the volunteer reserve forces and applicants for re-engagement will be required to agree to their unit contacting their employer about their membership. The purpose of contacting employers is to ensure that they are aware of those employees who are members of the volunteer reserve forces and also to provide information about training and call-out liabilities.

As a safeguard, reservists will have a right to submit cases to their commanding officers if they believe that they have particular reasons for not having their membership of the volunteer reserve forces disclosed. Cases will be considered on their merits.

This change to our administrative procedures will enable employers to be in a better position to plan for the absence of employees who are reservists and also to be better informed about their rights and obligations. It builds on our policy of recognising that the effectiveness of the reserves ultimately depends on a three-way relationship between the Ministry of Defence, the reservists themselves and their employers.

Colchester Garrison PFI

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): I am very pleased to announce to the House that the Ministry of Defence has reached agreement with RMPA Services plc to redevelop and operate Colchester garrison. This PFI contract will provide effective services to the army for 35 years and is worth approximately £2 billion through the life of the project.

This is an arrangement which is beneficial to both parties and we shall shortly see work on the new barracks starting on the ground. The result will be a fully serviced and modern garrison for a modern army with living and working accommodation that is amongst the best, demonstrating our commitment to providing our armed forces with facilities that are up to date and appropriate for the 21st century. I expect approximately 190 civil service posts to transfer to the contractor and these will be handled in accordance with existing legislation. We do not envisage any redundancies arising out of this transfer.

Armed Forces Pension Scheme

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): Further to my answer to the hon. Member for Aldershot (Mr Howarth), *Official Report*, 21 January 2004, column 1244W, the proposals set out in the Treasury and Inland Revenue document "*Simplifying the taxation of pensions: the Government's proposals*", published on 10 December 2003, would allow all such pension guarantee lump sum payments to continue to be paid free of income tax, subject to the proposed £1.4 million lifetime allowance.

The original answer was incorrect following advice from officials across Government, and I unreservedly apologise for this inaccurate answer.

The new armed forces pension scheme currently in Committee stage will in the event of the member's death, be able to pay both death-in-service lump sums of the type already paid under existing pension arrangements and the new pension guarantee lump sums applicable in cases of death in retirement, without any income tax charge. So, subject to the £1.4 million allowance, the rate will not be 35 per cent. but zero.

I have today written to the hon. Member for Aldershot enclosing a copy of this statement.

TRADE AND INDUSTRY

Energy White Paper Annual Report

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): The Energy White Paper first annual report will be published shortly after the Easter recess. This will allow the Government to report on a full year from the launch of the White Paper in February 2003, as we are legally required to do by the Sustainable Energy Act 2003, as well as to capture some key energy statistics for the relevant period. Given the importance of energy efficiency to delivery of the Energy White Paper objectives, the Government intend to publish the energy efficiency implementation plan at the same time as the

Annual Report. The Government also envisage simultaneous publication of the fuel poverty strategy implementation plan and the CHP strategy.

HEALTH

Foundation Trusts

The Minister of State, Department of Health (Mr. John Hutton): I have been informed by the chairman of the independent regulator of National Health Service foundation trusts that applications for the first wave of NHS foundation trust status will be considered in two groups. This reflects the complexity of a number of applicants and the rigorous approach to assessment that the regulator is adopting.

Subject to assessment criteria being met, the first group will be considered for authorisation from 1 April 2004 and the second group of 12 from 1 July 2004.

The first group of 12 are:

- Basildon & Thurrock General Hospitals NHS Trust
- Bradford Hospitals NHS Trust
- Countess of Chester Hospital NHS Trust
- Doncaster & Bassetlaw Hospitals NHS Trust
- Homerton University Hospital NHS Trust
- Moorfields Eye Hospital NHS Trust
- North Tees & Hartlepool NHS Trust
- Peterborough Hospitals NHS Trust
- Rotherham General Hospitals NHS Trust
- Royal Devon & Exeter Health Care NHS Trust
- Stockport NHS Trust
- The Royal Marsden NHS Trust

The second group are:

- Addenbrooke's NHS Trust
- Calderdale & Huddersfield NHS Trust
- City Hospitals Sunderland NHS Trust
- Gloucestershire Hospitals NHS Trust
- Guy's & St Thomas' Hospital NHS Trust
- King's College Hospital NHS Trust
- Papworth Hospital NHS Trust
- Sheffield Teaching Hospitals NHS Trust
- Southern Derbyshire Acute Hospital Services NHS Trust
- The Queen Victoria Hospital NHS Trust
- University College London Hospitals NHS Trust
- University Hospital Birmingham NHS Trust

FOREIGN AND COMMONWEALTH AFFAIRS

Israel's Fence

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): On 8 December 2003 the UN General Assembly in Resolution ES-10/14 requested the International Court of Justice to render urgently an advisory opinion on the legal consequences arising from the construction of the wall being built by Israel in the Occupied Palestinian Territory. In response to the request, the International Court of Justice has invited UN Member States, Palestine and certain international organisations to contribute written and/or oral statements to the court if they wish to do so. On 30 January the UK submitted a national written statement to the International Court of Justice in The Hague.

As I have repeatedly made clear, here and elsewhere, the UK considers the building by Israel of a fence, or wall, in the West Bank to be unlawful. The UK's written statement submitted to the court recalls that we voted in favour of UN General Assembly Resolution ES-10/13, adopted on 21 October 2003, which demands that Israel stop and reverse construction of the wall in the Occupied Palestinian Territory. I regret that Israel has not complied with the General Assembly's demand. We recognise Israel's legitimate security concerns. The latest, horrifying suicide bombing in Jerusalem on 29 January only too clearly shows the continuing threat faced by Israel from terrorists, but building the fence on occupied land only complicates efforts to make progress towards a comprehensive peace settlement.

Despite our view on the illegalities of the fence, we argued against this question being referred to the International Court of Justice. This approach is one shared by all members of the European Union including all accession states. This is being communicated by the Irish Presidency to the court. The UK has also submitted a detailed written statement to the court arguing that the court ought to exercise its discretion to decline to give an opinion. Our arguments are about the use of the court's advisory jurisdiction. We believe that it is inappropriate to embroil the court in a heavily political bilateral dispute. We also believe the court should not be engaged where the consent of both parties has not been given. An opinion is not necessary to assist the General Assembly in reaching a view on the fence. Nor, in the absence of participation from one side, will the court have all the facts before it.

Submissions to the International Court of Justice are confidential until the court decides to make them public. We expect the court will make the written statements submitted to it public at the start of the oral proceedings, due to begin on 23 February. At that stage, I will place a copy in the Library of the House.

TREASURY

Census 2001

The Financial Secretary to the Treasury (Ruth Kelly): The 2001 Census National Report (part 2) for England and Wales is being published and laid before Parliament today by the Office for National Statistics. Copies are available in the Libraries of both Houses. The report is also available on the National Statistics website.

This follows the publication of the National Report (part 1) in May 2003. These two documents are prepared under section 4(1) of the Census Act 1920.

The printed National Report (part 2) contains tables on migration and on travel-to-work and workplace populations as well as new tables on members of the Armed Forces and on same-sex couples. The report is accompanied by a CD that includes all tables contained in either part of the National Report at regional and local authority level. Copies are being provided free of charge to all local authorities.

WORK AND PENSIONS

Working and Saving

The Secretary of State for Work and Pensions (Mr. Andrew Smith): The proposals we are publishing today are the next part of the Government's strategy for private and occupational pensions as set out in the pensions Green Paper.

Informed Choices for Working and Saving (Cm 6111) takes forward a central element of the pensions agenda and sets out our strategy for empowering individuals to make real and informed choices on working and saving for their retirement.

The Government's strategy is based around three steps—activation, education and information. We are determined:

to enable people to make the most of pension provision and encourage availability of the right pension products;

to raise people's awareness of their options and improve financial education; and

to ensure that everyone has high-quality, accurate and timely information.

We in Government want to build on our partnership working with employers, individuals, the financial services industry, trade unions and the voluntary sector who all have a part to play taking this agenda forward.

Our Informed Choice strategy is only one part of our wider pension reform programme. Alongside Informed Choice the forthcoming Pensions Bill will take forward measures that bolster security for scheme members while also making it easier, simpler and more flexible for employers and employees to contribute to pensions.

Benefit Fraud Inspection (Portsmouth City Council)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) inspection report on Portsmouth city council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "*Quality and Choice: A Decent Home for All*", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The performance standards for housing benefits' allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

The BFI inspected Portsmouth city council against the performance standards for housing benefits. The report finds that the council is not at standard for any of the seven functional areas of the standards.

There were some significant strengths in strategic management, customer services, processing of claims, internal security and working with landlords. However, in the areas of counter-fraud and overpayments, the council has much to do to improve its performance.

Although not at standard for customer services, the council delivers a comprehensive range of customer services throughout eight area housing offices, and the work in encouraging take-up of benefits through the access point initiative was particularly commendable. The council also produced comprehensive and well-documented procedures for selecting suitable landlords. New benefit claims were taking an average of 38 days to clear compared with the national target of 36 days.

Portsmouth city council needed to improve its counter-fraud work by revising its prosecution policy, developing procedures for counter-fraud officers and improving its management of investigations.

The council could not accurately report performance for benefit overpayments, and the areas of decisions, calculations and recovery of overpayments needed to be critically addressed.

In 2002–03, Portsmouth City Council administered some £61 million in housing benefits, about 14.6 per cent. of its total gross revenue expenditure.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Written Ministerial Statements

Wednesday 4 February 2004

TRANSPORT

Bus Quality Contracts

The Parliamentary Under-Secretary of State for Transport (Mr. Tony McNulty): The Department for Transport will shortly be taking steps to improve the potential effectiveness of the quality contracts provisions in the Transport Act 2000.

The Act requires each local transport authority, after consultation with local bus operators and other stakeholders, to prepare a bus strategy to ensure that bus services meet the transport needs of local people and are of an appropriate standard. These strategies are translating into excellent practical results in some areas, with improved services and waiting facilities and increased ridership. In these places passengers are getting a better deal through local authorities and bus operators working creatively together.

The Act provides various ways in which local transport authorities can more effectively influence local bus services—statutory quality partnership schemes, ticketing schemes and information strategies. We want local authorities to make full use of these powers. We are pleased that the first statutory quality partnership is to be launched shortly, and we hope to see more of these. Statutory quality partnerships are an essential element of our vision for buses in the context of an integrated transport approach.

The Act also enables local authorities to make quality contract (or "QC") schemes where such a scheme is the only practical way for an authority to implement the policies in its bus strategy, and would do so in a way which is economic, efficient and effective.

All proposed QC schemes need to be submitted to the Department for approval. Approval may be given if a scheme meets the criteria set out in the Act and is in the public interest. Although the provision has been in force since October 2001, no such schemes have been submitted to date. However, the provision is there to be used where the circumstances justify it.

Some local transport authorities believe that they might meet the criteria for making a QC scheme but have been deterred by the length of time which the process will take. A particular issue is the 21-month minimum period which must elapse between the making of the scheme (after it has been approved) and its coming into force.

I am persuaded that, where a local bus strategy cannot otherwise be delivered, 21 months may be too long in certain circumstances for passengers to wait for improvements. The Department will be issuing a consultation document shortly to give the bus industry, local authorities and other stakeholders an opportunity to express their views on the implications of reducing the 21 months to a shorter minimum period, in the range 6–15 months.

Some local transport authorities have requested guidance from the Department on the procedure to be followed in making an application, the supporting evidence required and the matters that will be taken into account in deciding whether to approve an application, including appraisal of the public interest. I have decided therefore that, in the interest of transparency, the Department should publish guidance on these matters that is available to all. The Department will shortly consult the main stakeholders on a draft guidance document before publishing it in its definitive form.

WORK AND PENSIONS

Wokingham District Council (Benefit Fraud Inspectorate Report)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on Wokingham District Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "performance standards for housing benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

The BFI inspected Wokingham District Council against the performance standards for housing benefits. The report finds that the council is not at standard for any of the seven functional areas of the standards—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud, and overpayments.

The report acknowledges the problems and challenges faced by the council since July 2002, when it brought its benefits service back in-house following a period of outsourcing.

The report finds that the council's management information was limited, and where information was being produced, its importance was not being considered. Performance in key areas was not being effectively reported or monitored. This was compounded by a very limited management-checking regime, which meant that the council could not provide any assurances about the quality and accuracy of benefits payments being made.

The process of gathering evidence to support benefits claims was generally good, but the speed of processing claims was poor. The report notes concern about the possible impact that unreasonable delays were having on existing and potential customers.

The council's fraud investigations were generally effective and procedures were in place to consider the most appropriate sanction to apply. However, a lack of active management for administration work resulted in unreasonable time delays, which in turn affected the council's ability to prosecute fraudsters. Effective debt recovery on overpayments was similarly being hampered by slow decision making.

In 2002–03, Wokingham District Council administered some £13.1 million in housing benefits, about 8.4 per cent of its total gross revenue expenditure.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

CULTURE, MEDIA AND SPORT

BBC News 24

The Secretary of State for Culture, Media and Sport (Tessa Jowell): On 5 December 2002 I placed the independent review of BBC News 24 by Richard Lambert in the Libraries of both Houses, together with a letter setting out my response.

In response to the review, I attached two further conditions to the approvals of BBC News 24. These required the Governors to publish their response to the Lambert report by the end of March 2003, and to promulgate revised commitments for the service, taking account of Richard Lambert's recommendations, by the end of May 2003.

In addition, I was minded to attach a third condition requiring the Governors to report more fully on the delivery of News 24 in the BBC's annual reports. I stated that I would reconsider the intention in the light of the BBC's formal response and subsequent 2003 annual report.

I have judged that these two documents provide enough information and demonstrate sufficient improvements to remove the need for a further condition on the approval.

CONSTITUTIONAL AFFAIRS

Advisory Group Enforcement Delivery Service

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): The fourth and final report by the Lord Chancellor's advisory group on enforcement service delivery, entitled: "The move to a regulated enforcement industry: transitional issues", has been published in November 2003 and copies placed in the Libraries of both Houses. I am pleased to announce that the advisory group has now fulfilled its original terms of reference. The group is therefore disbanded. I am grateful for valuable contribution provided by the members of the advisory group, throughout the four reports to my Department. Proposals for legislation will follow in due course.

TRADE AND INDUSTRY

Regional Development Agencies

The Minister for Industry and the Regions (Jacqui Smith): I have published the regional development agencies' reported mid-year tier three outputs as at the end of quarter two, 2003–04, which suggest all RDAs are on track to meet the annual targets set in their corporate plans.

The figures cover the creation and safeguarding of jobs, the amount of brownfield land brought back into use, the number of businesses added to the regional economies, the number of learning opportunities created and the amount of private sector investment attracted benefiting deprived areas, all as a result of RDA activity.

Press releases on the results have been issued in each region. Copies of these and the mid-year output results have been placed in the Libraries of the House. The results have also been placed on the DTI website at www.dti.gov.uk/rda/info.

TREASURY

Invest to Save Budget: Round 6

The Chief Secretary to the Treasury (Mr. Paul Boateng): I am pleased to announce that 13 bids from across the public and voluntary sectors have been successful in round six of the Invest to Save Budget at a cost of £46 million in total over the three years to 2006–07 for England. The allocated sum rises to £51 million to include consequential funding for the devolved Administrations. The attached table describes the winners of this round.

The Invest to Save Budget (ISB) is a joint Treasury/ Cabinet Office initiative. It provides support for projects which increase the extent of joint working between different parts of government, identify innovative ways of delivering public services and reduce the cost of delivering the services and/or improve the quality and effectiveness of services delivered to the public. This is the sixth round of the ISB which started in 1999.

It is expected that a total of around £370 million will be spent on ISB projects over the period from 1 April 1999 to 31 March 2006. Round one was restricted to central Government Departments and their agencies. In the second and third rounds local authorities, police and fire authorities, health authorities, non-departmental public bodies and public corporations could also apply. In the fourth round, voluntary sector bodies were able to apply for the first time. The fifth round built on the partnership theme and encouraged the risk adverse public sector to innovate. The sixth round continues to seek out projects to improve delivery of public services through innovation and partnership working.

Winning projects have to agree an implementation plan with the sponsor departments. Each project has to provide six-monthly progress reports and carry out an evaluation of its success once it has been completed. Wider dissemination of the good practice from completed projects is then fed back into the whole spectrum of public service providers.

Organisation	*Brief Description*	*Funding Amount*	*Region*
1. Crown Prosecution Service	Crown Prosecution Service led project to deliver, for the first time, a truly joined up partnership approach to provide care for victims and witnesses.	£27,123,000	England & Wales
2. Small Business Service	Project to develop an on-line facility for Government Departments to reduce barriers to effective competition for public sector contracts and for improving value for money in public sector procurement.	£1,250,000	National
3. Youth Justice Board	Project to address the risk factors associated with offending children so helping to reduce the number of children entering the Criminal Justice system	£1,365,000	England & Wales
4. Community Service Volunteers	Project to reduce the demand for specialist mental health services across London and to create a greater understanding of mental health issues in the broad population	£7,331,000	London
5. St Mungo's Inner London Detox Centre	Project to provide a detoxification centre in Central London to offer an alternative to police custody for homeless street drinkers arrested by the Metropolitan Police	£1,155,000	London
6. Prison Service	Prison Service led project to deliver support for families and specifically children who have a parent in custody.	£314,687	South West
7. Devon & Cornwall Constabulary	Project that establishes a Targeted Drug release programme which will provide access for drug using offenders to pass from the criminal justice system to the treatment system when released from prison.	£1,100,000	South West
8. Bath and Somerset Social Services and Housing Services	Project that establishes a dedicated mobile nursing team providing 24-hour cover designed to take services in a residential location rather than moving a seriously frail person to hospital.	£1,343,300	South West
9. Bristol City Council	Project to reduce out of authority placements for children with complex mental health, emotional and behavioural difficulties to reduce alienation from their communities and increase their life chances	£810,870	South West
10. Warrington Advice and Resource Centre	Project to reduce the number of young people running away in Warrington by providing reactive services as well as proactively engaging with families to reduce repeat runaways and preventing siblings duplicating the behaviour.	£458,064	North West
11. Gloucestershire City Council	Project to develop and deliver a Local Planning toolkit for public service providers and partnerships to plan their neighbourhood and community services using shared information across the different agencies	£100,000	West Midlands
12. Lincolnshire County Council	Project to educate local people in Rural and Coastal Academies by the development of an integrated curriculum provision to pupils who are out of mainstream school; and an area based identification, screening and support service for adults with dyslexia.	£1,092,000	East Midlands
13. Peterborough City Council	Project to create an integrated network of service providers, statutory agencies and support workers, which will ensure the successful integration of new arrivals into Peterborough in the short, medium and long term.	£2,262,400	East Midlands

DEPUTY PRIME MINISTER

Rosepark Nursing Home Fire

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Phil Hope): First, may I say that our thoughts are with the families and friends of the victims of this tragedy?

It is too early to speculate about the cause of the fire. Investigations are already under way in Scotland and we will be looking very closely at their findings and considering the implications for England and Wales.

The cornerstone of our policy remains the prevention of fire. When fires do occur, simple precautions such as keeping fire doors closed and installing smoke alarms can play a vital role in reducing death and injury. Integrated Risk Management Plans will make sure that more work is done by the Fire and Rescue Service to prevent fires in the first place, by identifying those people in the community most at risk, and targeting resources more effectively.

Sprinklers can also play an important role in suppressing fires where they have broken out, though it is too early to conclude that if the Rosepark Nursing Home had been fitted with a sprinkler system, any loss of life could have been prevented.

The Office of the Deputy Prime Minister has been actively investigating the effectiveness of sprinkler systems in tackling fires in residential properties. The results of this work, which is being undertaken on our behalf by the Building Research Establishment, are being fed into the review of the fire safety aspects of the Building Regulations (England and Wales), which is currently under-way. A report of the work will shortly be published, enabling those involved with fire safety in buildings to gain a more comprehensive understanding of residential sprinkler systems. However, the tragic incident at the weekend indicates that sprinklers may have a role to play in protecting vulnerable groups such as; homes for children, homes for elderly people, homes for disabled people, and, higher risk houses in multiple occupation.

In relation to existing premises, including residential care homes, an employer is required under the Fire Precautions (Workplace) Regulations 1997, as amended, and under the Management of Health and Safety at Work Regulations 1999 to undertake a risk assessment in order to safeguard the safety from fire not only of his employees but of all people on his premises affected by his work. This assessment can include the provision of sprinklers within the building. This requirement will be extended by the proposed Regulatory Reform (Fire Safety) Order to include most premises to which the public have access, and the duty imposed upon the employer will be extended to include any person who is responsible for managing the premises.

In the meantime our Community Fire Safety programme continues to educate people about the risks associated with fire and the measures which can mitigate against its occurrence. This programme has already been effective in reducing fire deaths and injuries from accidental fires.

Written Ministerial Statements

Thursday 5 February 2004

WORK AND PENSIONS

Benefit Fraud Inspectorate Report (Dundee City Council)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) follow-up inspection report on Dundee City Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for housing benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the Standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

The BFI inspected Dundee City Council against the Performance Standards for housing benefits. The report finds that the council is not at Standard for any of the seven functional areas of the Performance Standards—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud, and overpayments.

However, there had been some improvement since the first inspection report, published in June 1999, and the council's overall level of performance for administering benefits and counter-fraud activities was fair.

At the first inspection, BFI reported that Dundee City Council needed to develop a more effective and secure benefits administration system. The council lacked key safeguarding policies and procedures, and there were significant delays in processing benefit claims.

The follow-up report finds that the council had responded positively to the first inspection introducing 39 (71 per cent.) of 55 major recommendations. However, arrears of work and insufficient staff resources had prevented sustained improvement. Evidence gathering to support benefit claims was generally thorough but the council was failing to adequately protect the gateway to benefits due to processing delays. Performance was significantly below the clearance times required by the Standards. Overpayments were occurring because notified changes of circumstances were not being dealt with promptly.

The report finds that policies for safeguarding benefits had been introduced and sanctions were used to punish and deter benefits fraudsters. Recovery of housing benefits overpayments had improved markedly since the first inspection.

In 2002–03, Dundee City Council administered some £70 million in housing benefits, about 14 per cent. of its total gross revenue expenditure.

The report makes recommendations to help the council address weaknesses and to further improve the administration of Housing Benefit and Council Tax Benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Community Sentences and Benefits Pilots

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): The Department is today publishing a research report by the National Centre for Social Research that presents the findings of the evaluation of the policy to apply benefit sanctions to offenders found by the courts to have breached their community sentences. Copies have been placed in the Library.

The scheme has been piloted by Jobcentre Plus and the Probation Service in Derbyshire, Hertfordshire, Teesside and the West Midlands since October 2001. The evaluation looked at the effects of the policy between 15 October 2001 and 14 October 2002. Overall it found a small, positive impact on compliance with community sentences, with an estimated 1.8 per cent. increase in compliance among those on relevant benefits.

The Government gave a commitment not to extend the scheme nationally without considering carefully the findings of the evaluation. Although there has been a positive impact on compliance and over 1,490 offenders have been sanctioned since the pilots commenced, the report also identifies some problems in the administration of the scheme and the way it is explained to offenders.

On this basis we have decided to continue the pilots for a further year along with improvements to the monitoring and management of the probation processes together with better and more frequent explanations of the scheme to offenders themselves. These two changes, identified in the report as shortcomings during the first phase of the pilots, will ensure that the Department is informed of breaches, and a sanction imposed on the offender in all relevant cases. This in turn will help offenders to relate the sanction more clearly to the behaviour which gave rise to their breach.

The results of these operational improvements on the effectiveness of the scheme will be assessed before a decision is made on the long term future of the scheme.

FOREIGN AND COMMONWEALTH AFFAIRS

European Union Council

The Minister for Europe (Mr. Denis MacShane): The forthcoming business in the Council of the European Union is as follows:

Date	*Location*	*Event*
February		
4	Brussels	COREPER 2
4	Brussels	COREPER 1
6	Brussels	COREPER 1
9	Brussels	Meeting of Eurogroup

19	tbc	JHA Council

FAC Response to 2003 FCO Annual Report

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): This week, I laid before Parliament Government White Paper Command 6107, "Twelfth Report of the Foreign Affairs Committee Session 2002–03 Foreign and Commonwealth Office Annual Report 2003 Response of the Secretary of State for Foreign and Commonwealth Affairs".

The Committee draws a number of conclusions and makes various recommendations in its Report on a variety of issues including staff management, resources and the FCO's overseas estate. My response covers all these points.

The FCO welcomes the Committee's recognition among other things of its staffs commitment, often in difficult circumstances; its Public Diplomacy efforts with the BBC World Service and British Council to improve perceptions of the UK in the Arab and Muslim worlds; the improved management of its locally-engaged staff overseas and its innovative and effective handling of rapidly increasing visa applications. The FCO will build on good practice in these areas and report on progress in future annual reports.

The Command Paper addresses the Foreign Affairs Committee's concerns about the FCO's asset recycling programme. The programme permits the FCO to invest part of the funds gained from the sale of under-performing or unsuitable property in other projects such as ICT development. The Response provides details of how we identify potential property for sale, in line with the FCO's strategic priorities. It also explains that half such capital is reinvested into the FCO's estate and that this figure will rise to 80 per cent from 1 April this year. The Paper admits the difficulties involved in sustaining the programme over the long term, but also describes how it has allowed the FCO to develop important capital estate projects such as the UK's new Embassies in Berlin and Moscow.

The paper takes issue with the Committee's observation that the FCO attempted to conceal losses associated with a cancelled ICT programme in its 2003 Annual Report and emphasises its commitment to reporting FCO activity, including costs incurred, as clearly as possible.

In its report the Committee highlighted the increasing demands being placed on the Foreign and Commonwealth Office from new challenges such as Iraq while operating within a finite resource climate. Its report recommended that the Government increase the resources allocated to the FCO to prevent erosion of its core activity. The FCO's response welcomes the Committee's recognition of the difficult resource climate in which the FCO currently has to operate. It describes how the new FCO Strategy (Government White Paper Command 6052, "UK International Priorities: A Strategy for the FCO") which I laid before Parliament on 2 December 2003 will be a major tool in prioritising our work in future and ensuring that resources are targeted to achieve the most important goals of the Government's international policies.

We are now in the process of putting the FCO Strategy into practice. We have established a departmental change programme, derived from the Strategy, which sets out what we intend to do to focus our resources on priorities, become more flexible and responsive, improve the diversity of our people, skills and experience, and target our activity to meet the needs of our customers across Government and the UK public. As part of the Change Programme we are reviewing our organisation in London and abroad to ensure that it is aligned with our priorities and able to deliver the outcomes we seek.

The Foreign Affairs Committee outlines some concerns it has about the FCO's posts overseas. It recommends that the FCO open a new post in Kyrgyzstan, and suggests that where post closures are being considered, the Department should seek creative alternatives. The Response explains that, to meet its strategic priorities and ensure safe and secure working environments for its staff while working within resource limitations, the FCO is obliged to adapt and amend its pattern of overseas representation. The FCO has already introduced alternative methods of representation in some parts of West Africa and agrees with the Committee that such options are preferable to Post closure. The FCO's network of diplomatic posts will remain a vital means of delivering the Government's priorities and building UK influence abroad. We need to ensure that it is adequately resourced, secure and tasked to address our most important priorities.

NORTHERN IRELAND

Inland Fisheries Annual Reports

The Parliamentary Under-Secretary of State for Northern Ireland (Angela Smith): Copies of the Inland Fisheries Annual Reports of the Department of Culture, Arts and Leisure for 2000, 2001 and 2002 have been placed in the Libraries of both Houses.

These documents provide details of the Department's activities to conserve, protect and develop salmon and inland fisheries under the provisions of the Fisheries Act (Northern Ireland) 1966, as amended and include statistical information and income and expenditure details for those years.

TRADE AND INDUSTRY

Post Office Urban Reinvention Network

The Minister for Energy, E-Commerce and Postal Services (Mr. Stephen Timms): The urban re-invention programme aims to create a smaller, more viable network of post office branches adequate in number and suitably located to ensure accessible delivery of service to customers. At the end of the programme, within the UK as a whole, 95 per cent. of the urban population will still live within a mile of the nearest Post Office branch. It is supported directly by Government funding. This programme is absolutely necessary. If the Post office does not adapt to changing customer demands it will spiral into terminal decline.

During recent weeks Members of Parliament and Postwatch have become increasingly concerned about some aspects of the urban re-invention programme. In particular, the consultation arrangements have been criticised. There has been mounting evidence that in too many cases Post Office Limited has not handled them appropriately, or with sufficient sensitivity. Accordingly I asked Post Office Limited and Postwatch to review urgently the arrangements for the consultation currently employed and to propose changes to make them more inclusive and appropriate to achieve a viable network to serve the public after the programme is concluded.

They have responded to this challenge and I am pleased to announce the following changes applicable to the remainder of the programme which will take immediate effect.

Post Office Limited will advise MPs and local authorities as soon as possible of the remaining timetable for commencing consultations on plans for their area.

Local authorities will be invited to provide relevant information, in advance, on infrastructure and regeneration projects to assist Post Office Limited in the preparation of area plans.

When preparing an area plan, Post Office Limited will achieve a balance between sub-postmasters volunteering to leave the network, those offices which are not viable and the need for relocations and new openings.

Post Office Limited will advise MPs and members of the devolved administrations on a strictly confidential basis of proposals, including the overall rationale for the proposed area plan, one week before they are put out to public consultation.

Public consultation will be on the proposal to close an individual office but Post Office Limited will also take account of, and respond to, views expressed about the proposed service provision in the area in reaching decisions on individual closures.

Once final decisions have been made and announced, Post Office Limited will write to Postwatch, Members of Parliament and local authorities referring to the main points raised during the consultation and giving the reasons for its decision.

Public consultation will normally last for six weeks but will in future be extended to take account of public holidays that occur during that period.

In view of Post Office Limited's responsibility to notify its staff at directly-managed offices of any proposal to close the office before the proposal is put to public consultation, the advance notification of Postwatch, MPs and of the devolved administrations will be replaced by notification of the proposal the day before the proposal is made public and the public consultation period will be extended to eight weeks.

If branches previously identified as expecting to receive additional custom following closure of nearby offices, are themselves subsequently proposed for closure, Post Office Limited will provide a detailed explanation of its reasoning in putting forward the proposal for consultation.

Post Office Limited will establish a separate team dedicated to promoting and supervising the implementation of investment required to upgrade remaining offices to ensure the provision of adequate facilities for the additional custom provoked by the closure of nearby offices.

Criteria have been agreed to define the "exceptional circumstances" which may justify putting into public consultation a closure proposal for an office located within the 10 per cent. most deprived urban wards and with no other office within half a mile. The core criteria are: the branch proposed for closure being relatively small; having experienced a significant decline in business between March 2000 and March 2003 with a continuing trend which, if it has not already done so, will render the business non-viable; and having a dense network of surrounding offices with several accessible by reasonable transport links within half a mile to a mile. Other criteria which might also apply include: significant depopulation of the surrounding area or the geography of public service and retail provision has shifted; a clear majority of customers of the branch proposed for closure live within half a mile of alternative branches; and security issues which make it unlikely to be feasible to continue service.

Finally Post Office Limited has confirmed that the documentation between itself and a sub-postmaster does not create any binding arrangement for closure until the public consultation has been completed. No contract binding on Post Office Limited is signed before the public consultation process has ended.

The above new arrangements will be reviewed by Post Office Limited and Postwatch one month after commencement to ensure that the implementation is satisfactory.

Post Office closures will inevitably continue to be contentious. However, these changes to procedure should ensure that there is confidence in the consultation process.

Post Office Limited is committed to the successful implementation of the new arrangements and to working with Postwatch to ensure an effective consultation process designed to maximise the quality of judgment and transparency, and to produce a fair result for customers and the Company.

EDUCATION

Youth Council for Northern Ireland

The Minister of State, Northern Ireland Office (Jane Kennedy): I have published today the Accounts of the Youth Council for Northern Ireland for the period 1 April 2000 to 31 March 2001. Copies have been placed in the Libraries of both Houses.

Written Ministerial Statement

Friday 6 February 2004

FOREIGN AND COMMONWEALTH AFFAIRS

Gibraltar

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): The Chief Minister of Gibraltar wrote to me on 22 December, formally tabling proposals for reform of the 1969 Gibraltar Constitution. I have replied, acknowledging the importance of these proposals to Gibraltar, and saying that they will receive the most careful consideration. I expect to meet the Chief Minister soon for an initial discussion.

The cornerstone of our policy towards Gibraltar remains the sovereignty commitment, that the UK Government will never enter into arrangements under which the people of Gibraltar would pass under the sovereignty of another state against their freely and democratically expressed wishes. Whatever the outcome of the present proposals, that position will not change.

The starting point for consideration of these proposals is the Government's general policy towards the UK's relations with our Overseas Territories, as set out in the 1999 White Paper, "*Partnership for Progress and Prosperity: Britain and the Overseas Territories*" (Cm 4264). As my hon. Friend, the Under-Secretary of State for Foreign and Commonwealth Affairs said in his written statement of 18 December 2003, *Official Report*, cols 151–52WS, the security and good governance of the overseas territories remains a key foreign policy objective for this Government.

While the people of Gibraltar wish to remain British, it is essential that there should be an appropriate balance of powers as between the UK and Gibraltar. While we recognise the aspiration of the people of Gibraltar to manage more of their own affairs, the UK Government must have sufficient and effective powers to protect its overall responsibility for ensuring good governance; compliance with international obligations; and minimisation of contingent liabilities. An assessment of the powers required by the UK Government to deliver a balanced and modern relationship must, in particular, take full account of the fact that the UK is responsible for Gibraltar's compliance with EU law, including ultimately before the European Court of Justice and, in considering the constitutional relationship between the UK and Gibraltar, HMG will take account of Gibraltar's particular circumstances and the wider international context.

This Government will therefore study the proposals put forward by the Gibraltar Government, and looks forward to discussion of them in due course, with a view to the further development of a modern and appropriate relationship with Gibraltar.

Written Ministerial Statements

Monday 9 February 2004

DEPUTY PRIME MINISTER

Greater London Authority

The Minister for Housing and Planning (Keith Hill): The Greater London authority general grant for 2004–05 today been determined at £36,328,000, following consultation with the Mayor of London. This grant is a block grant paid for the purposes of the authority and its functional bodies.

HOME DEPARTMENT

National Asylum Support Service

The Minister for Citizenship and Immigration (Beverley Hughes): On 15 July 2003, I published the key findings from the report of the independent review of the Operation of the National Asylum Support Service (NASS), and I promised a further statement in due course about the action taken in the light of the review. As I indicated in July, the review has formed the basis of a major programme of reform. Progress against that programme continues to be overseen by a steering group chaired by Bill Jeffrey, Director General of the Immigration and Nationality Directorate reporting directly to me. The Steering Group includes an external perspective provided by Alan Barnish who was a member of the independent review team. I am now in a position to update the House on progress which has been made in—implementing this programme, since the review was completed six months ago.

The review made it clear that some key issues needed to be addressed. It is still the case that NASS faces significant challenges, due, among other factors, to the complexity and visibility of its role. But in the last six months NASS has both raised its performance in a number of specific areas highlighted by the review, and laid the foundations for sustained medium and longer-term improvements across its business as a whole. The timed action plan I referred to in my July statement is now in place.

Action in relation to Key Findings:

KEY FINDINGS (1) AND (2);

For NASS to perform at its best it needs to:

be clear what is expected of it and how its success will be judged;

have the financial and managerial resources to do the job;

have a thorough understanding of its own strengths and weaknesses;

have a clear view of what it needs to do to improve its performance;

understand its impact on the whole end to end asylum process;

sort out some of its key business processes and procedures;

get better at working with the rest of IND in a fully joined up operation.

NASS needs to have its purpose, aims and role clarified and re-affirmed by Ministers. It needs to be given a realistic remit and the necessary resources and political support to do that job.

The principles of good performance identified by the review have been accepted and are being applied. NASS's purpose, aim and role have been clarified and reaffirmed by Ministers. Appendix A shows the statement of NASS's purpose, aims and roles (collectively comprising NASS's strategic intent) which have been developed. Appendix A also shows the nine objectives on which NASS is now concentrating its effort upon support of the overall strategic intent.

KEY FINDING (3):

NASS needs urgently to improve its operational performance and standards of customer care. It needs to get better at working with its partners and stakeholders, and much slicker at sorting out basic processing errors especially when these affect individual asylum seekers and damage the reputation of the organisation.

The communications team within NASS has been strengthened and is developing a strategic framework for NASS's contact with external partners and stakeholders. A new National Asylum Support Forum has been established with partner organisations and has met three times since the statement on 15 July.

Significant improvements have been made to the performance of IND's Telephone Enquiry Bureau (INEB). As part of that, the average time it takes to get through to INEB's cash support helpline has fallen in the past eight months from over three and a half minutes to under one minute.

KEY FINDING (4):

NASS needs to strengthen its management capacity at all levels. Two new senior posts have already been created, but more needs to be done in the middle tier of the organisation which is under-resourced and hence weak.

A new governance structure has been developed and is now in place. The senior management team (SMT) has been strengthened through the appointment of experienced officials to the two new senior civil service posts. A separate and larger programme group is tasked with driving forward the many additional and cross-cutting strands of project-based work within the organisation. The middle tier of the organisation has been strengthened by the delivery, over the period, of management training to 150 NASS managers.

KEY FINDING (5):

NASS needs a realistic three-year budget and flexibility in the way it can be used to respond quickly to changing circumstances and opportunities without going through over elaborate bureaucratic processes.

An appropriate 3-year budget has been put in place together with arrangements for reviewing it, and therefore achieving flexibility within the context of IND's overall budgetary framework.

KEY FINDINGS (6) AND (7):

NASS needs support to develop and implement a medium term strategy. This must be produced in the context of an overall strategy for IND which clarifies and strengthens the links between NASS and the other parts of the asylum system.

A medium term plan needs to address:

What they should be aiming to get out of the next round of accommodation and other contracts;

What phase 2 of the regionalisation should look like;

How to work better as an integrated part of IND and develop meaningful relationships with key stakeholders.

In parallel with addressing the immediate concerns identified by the review, NASS is developing a medium term strategy to ensure improvements are sustained and built upon.

An IT steering group has been set up within NASS and a NASS IT strategy is being prepared. This work is fully integrated with ongoing IND-wide developments in the field of IT. The Home Secretary announced on 24 October 2003 that families who sought asylum in the UK more than three years ago would be considered for permission to live and work here. In implementing this announcement, we are piloting web-based software which enables NASS, others in IND, and our partners in central and local government, to have real time access to the live information we need to ensure an efficiently managed process.

A major stakeholder event was held in Woking in November 2003 to look at the challenges and priorities involved in renewing NASS's contracts with accommodation providers, many of which will expire in 2005. We are currently considering how to put the Woking recommendations into practice.

The first phase of regionalisation has successfully been rolled out and most of the necessary embedding of functions has been completed. NASS is now managing housing management, outreach and investigation work from its new regional locations. As a result there is much more face to face contact between the organisation and supported asylum seekers. Through the establishment of these closer links and those with its key partners, positive steps have already been taken to improve service delivery and to ensure that wider issues are dealt with more effectively.

Planning is now underway for the second phase. This will focus on improving the services currently provided centrally by NASS to dispersed asylum seekers through a wholesale review of current arrangements for managing casework. I believe this will be much welcomed by many of the key stakeholders concerned. This is a large and complex area of activity and will require a staged programme of work to ensure an effective transfer of functions.

KEY FINDINGS (8) AND (9):

NASS needs a period of stability to enable it to get on top of the job. It also needs confidence that it will not have to cope with any new initiatives and reviews without adequate time and resources to handle and implement them safely.

NASS needs to be allowed to use the breathing space provided by the drop in intake numbers to get on top of the job, not to take on new tasks.

Especial care is being taken to avoid allocating tasks to NASS which are not fully within its role and for which it is not equipped.

NASS's strategic intent comprises its purpose, aim and role, as follows:

Purpose—to provide a system of basic support to eligible asylum seekers;

Aim—to provide a system that is cost effective and which contributes to cohesive communities and to effective integration for those who are granted asylum;

Role—to;

arrange provision of accommodation to asylum seekers for the period they qualify;

arrange provision of subsistence payments to asylum seekers for the period they qualify;

work with the rest of IND to deliver an effective end to end asylum process, and to work in partnership with other agencies to deliver the above.

NASS' s strategic objectives are to:

improve day to day business performance;

reduce support costs;

fully engage and develop our staff;

improve responsiveness to queries relating to asylum support;

deliver effective and efficient regionalisation;

deliver appropriate and cost effective accommodation for asylum seekers;

deliver our business in a way which supports community cohesion;

improve linkages with other parts of the asylum process;

engage better with stakeholders and improve communications.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Bovine Tuberculosis

The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs (Mr. Ben Bradshaw): At last year's National Farmers Union annual general meeting the Secretary of State announced a review of our bovine tuberculosis strategy. Today I am launching a consultation document that represents the outcome of the first stage of that review. The consultation period will last for 12 weeks and close on Tuesday 4 May 2004.

Copies of the consultation document are available in the Libraries of both Houses and can also be viewed on the Department's website at www.defra.gov.uk/animalh/tb/index.htm

INTERNATIONAL DEVELOPMENT

Spring Supplementary Estimates

The Secretary of State for International Development (Hilary Benn): Subject to Parliamentary approval of the necessary supplementary estimate the Department for International Development DEL for 2003–04 will be

increased by £197,583,000 from £3,756,454,000 to £3,954,037,000 and the administration costs limit has been increased by £2,566,000 from £212,250,000 to £214,816,000. Within the DEL change, the impact on resources and capital are as set out in the following table:

(£'000)

Resources				*Capital*			
Change	*New DEL*	*Of which: voted*	*Non-voted*	*Change*	*New DEL*	*Of which: voted*	*Non-voted*
170,083	3,936,037	3,064,152	871,885	27,500	39,000	39,000	—

The change in the resource element of the DEL arises from

RfR 1: Eliminating Poverty in Poorer Countries

A transfer of £15 million from the unallocated subhead to the reducing poverty in the rest of the world subhead

The take up of DEL end year flexibility for 2002–03 of £102,791,000 resource for programme costs. £41,395,000 has been allocated to the reducing poverty in Africa subhead, £40,896,000 to the improve the effectiveness of multilateral aid;

A transfer of £1,500,000 resource from the reducing poverty in Asia administration subhead to the reducing poverty in Africa administration subhead;

A transfer of £1 million resource from the reducing poverty in the rest of the world administration subhead to the reducing poverty in Africa administration subhead;

A transfer of £1,500,000 resource from the developing innovative approaches to development administration subhead to the programmes contributing to multiple objectives administration subhead;

A transfer of £6,500,000 resource from the central reserve as a contribution to Iraq reconstruction to the reducing poverty in the rest of the world subhead;

A transfer of £15 million resource from the improve effectiveness of multilateral aid subhead to capital DEL; £13,240,000 to the reducing poverty in the rest of the world subhead and £1,760,000 to the reducing poverty in Africa subhead;

A transfer of £1,050,000 resource from the reducing poverty in Africa subhead to capital DEL. £530,000 to the reduce poverty in Africa capital subhead, £270,000 to the reducing poverty in the rest of the world subhead and £250,000 to the central departments subhead;

A transfer of £1,050,000 resource from the reducing poverty in Asia subhead to capital DEL. £210,000 to the reduce poverty in Asia capital subhead, £40,000 to the reducing poverty in the rest of the world subhead, £120,000 to the developing innovative approaches to development subhead, £170,000 to the programmes contributing to multiple objectives subhead and £510,000 to the central departments subhead;

A transfer of £950,000 resource from the reducing poverty in the rest of the world subhead to capital DEL, central department subhead; A transfer of £910,000 resource from sub-Saharan Africa conflict prevention non-voted departmental unallocated provision to the Ministry of Defence;

A transfer of £11 million resource from the Foreign and Commonwealth Office to the global conflict prevention subhead.

The change in the capital element of the DEL arises from:

transfers from the resource to the capital budget as listed above;

to reflect an expected reduction of £8,400,000 appropriation-in-aid in the capital DEL, and a corresponding reduction in the gross capital provision;

the take up capital DEL end year flexibility for 2001–02 of £8,621,000; £8,400,000 has been allocated to the improve efficiency of multilateral aid subhead and £221,000 to the central departments subhead.

The increase will be met by inter-departmental transfers or from the DEL Reserve and will not therefore add to the planned total of public expenditure.

TREASURY

Economic Reform in the EU

The Chancellor of the Exchequer (Mr. Gordon Brown): The Government are today publishing a new report on economic reform in the EU.

The report evaluates the progress made in reforming Europe's economy since the March 2000 Lisbon European Council, noting both the EU's achievements over the past four years, and the scale of the challenge ahead if Europe is to compete effectively in the global economy and meet its goals of higher productivity, more and better jobs and greater social cohesion. It notes that, while 6 million jobs have been created in Europe since 1999, a further 21 million are needed to meet the Union's target for 2010. Moreover, productivity in the US remains at least 14 per cent. higher than that in the EU.

The report concludes that further action is needed to improve efficiency and productivity in Europe, with steps to promote increased labour, product and capital market flexibility. It sets out a series of areas for reform ahead of the forthcoming spring European Council, including to improve the regulatory framework in Europe, strengthen the single market, deliver more and better jobs, promote enterprise and innovation, ensure an ambitious outcome to world trade negotiations, strengthen the transatlantic economic relationship, and meet the challenge of sustainable development.

Copies of the report are available in the Vote Office and the Library of the House.

HOME DEPARTMENT

Serious Organised Crime Agency

The Secretary of State for the Home Department (Mr. David Blunkett): Since 1997 crime in England and Wales has fallen by a quarter. The chances of being a victim of crime are now at their lowest for over 20 years. At the same time, we continue to face a major challenge from organised crime which costs the country billions of pounds in lost revenue, facilitates 70 per cent. of all illegal immigration to the European Union and can cause local communities huge damage, for example through its link with local drugs markets and all the

problems of addiction and crime that go with them. The UK crack and heroin markets alone are estimated to be worth £3 billion per year.

Organised criminals are willing to resort to extreme violence, intimidation and corruption to protect their illegal businesses. They often display detailed awareness of law enforcement methods and take sophisticated counter-measures including counter-surveillance techniques and elaborate money laundering arrangements. Through their involvement in people trafficking, organised criminals exploit the vulnerable and deal in human misery as appears to be the case in the tragic events at Morecambe Bay at the end of last week. They use every legal device available to them to evade prosecution when they are arrested.

Responsibility for tackling organised crime has until now been spread across a range of different agencies. Each of them has been highly effective in their own area of specialism—and I pay tribute to the outstanding work they and their staff have undertaken to date—but each must also work within its own priorities and departmental structures. This can make co-ordination difficult and has led to blurred lines of accountability in some key areas like drugs and fraud and to a lack of critical mass in some important skill areas like those required to tackle financial and other economic crime.

In response to these issues, the Prime Minister announced last July that the Government would be reviewing the structures of our national law enforcement agencies responsible for investigating serious organised crime.

Over the past six months we have undertaken detailed consultations with all those involved in fighting organised crime, including the police service and all of the relevant national agencies and regulators. The clear view from almost all we consulted was that the present arrangements were not satisfactory and that there was a strong case for rationalising existing structures.

I can therefore today announce the next step in this process. Drawing on the lessons from this consultation we intend to bring together in a single national agency—the Serious Organised Crime Agency—which will report to me, the responsibilities which currently fall to the National Criminal Intelligence Service, the National Crime Squad, the Home Office's responsibilities for organised immigration crime and the investigation and intelligence responsibilities of HM Customs and Excise in tackling serious drug trafficking and recovering related criminal assets. The agency will also bring a new focus to bear on dealing with the problem of financial crime.

The creation of the new agency is a key part of a wider series of changes including new powers available to tackle organised crime. I will set out the detail of all these changes in a statement to the House when I publish a policy paper within the next few weeks.

The new agency will have as its core objective reducing the harm caused to the UK and its citizens by organised crime including the trafficking of drugs and people. It will have the capabilities to make a real difference through enhanced intelligence, financial investigation skills, economic analysis and better and more sophisticated use of technology. It will develop a comprehensive strategy for reducing the harm caused by organised crime and will be much more than the sum of its parts, drawing on best practice and skills from all the existing agencies to focus on those criminals and criminal markets causing us the most harm. It will work very closely with the revenue departments which will continue to be responsible for tackling revenue and tax fraud. It will build on the determination, professionalism and success of the existing agencies and their staff and will be approaching 5,000 strong.

The new agency will work closely with police forces, regulators and others throughout the UK. Its focus will be on crime that crosses national and international frontiers. But, where a request is made, or where it is otherwise agreed, it will also have a key role in supporting individual police forces in tackling crime that crosses police force boundaries. It will provide intelligence from criminal activity to the wider law enforcement community, drawing on the intelligence they themselves provide in developing a firm understanding and strategy.

The agency will have a UK-wide remit. However, in Scotland and Northern Ireland, the Scottish Drug Enforcement Agency and the police service of Northern Ireland will continue to exercise the functions they currently undertake in partnership with existing UK agencies.

Specialist prosecutors answerable to the Attorney General will co-operate closely with officers of the new agency and work alongside them wherever this makes good operational sense. They will be available whenever required to provide comprehensive, practical and specialist advice to help shape investigations and develop strong and well-presented cases for prosecution. The specialist prosecutors will stay with each case from the outset of investigations right through to the point of sentence.

The arrangements for the agency's governance will be crucial. A Home Office-led taskforce, including representatives of those who will form part of the new organisation, will consult stakeholders on this and report back by the end of this month enabling me to give further details to the House in the statement to which I have already referred. The agency will need high powered and dynamic leadership to ensure it becomes a world leader in its field, so I am today appointing an executive search agency to help us recruit a Chairman and Director-General, with a view to having them in place by the early summer.

Until their appointment, representatives of all the agencies concerned will be driving forward the transition process, under Home Office chairmanship, to enable the agency to get off to a rapid and effective start.

We shall take the earliest opportunity to seek Parliament's approval for the legislation needed to establish the Serious Organised Crime Agency but will seek as far as possible to anticipate the benefits of these changes through closer joint working and operations, training and secondments so that this transitional phase enhances rather than disrupts this critical work.

Those who seek to damage our country and undermine our way of life through organised crime will continue to grow in expertise and sophistication. We must more than match them and ensure that the skills and insights we have developed in different areas are shared. These proposals will enable us to respond to these challenges effectively in the years ahead.

DEFENCE

Veterans

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): I am announcing the launch today of "Heroes Return". This forms a central element of what has now become the "Veterans Reunited" programme, and will enable all generations to join together to remember and commemorate the 60th anniversary of the remarkable events of 1944 and 1945 that led to the end of the Second World War.

The New Opportunities Fund in collaboration with the Department for Culture Media and Sport and the Ministry of Defence has made available £10 million of National Lottery funding for many thousands of veterans to return to the overseas areas in which they saw active service during the second world war. These visits will generate a rich supply of "living memories" for our schools and museums and young people will have the opportunity to learn from veterans experiences.

In addition to the crucial role of the New Opportunities Fund and DCMS, the Veterans Agency will provide applicants with advice and support through their free phone helpline on 0800 169 2277, and further information is available on the website at www.veteransagency.mod.uk.

CABINET OFFICE

Regulation Task Force Report: "Independent Regulators"

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): I am today publishing the Government's response to the Better Regulation Task Force's report "Independent Regulators", which the task force issued on 15 October 2003. I would like to take this opportunity to thank them for the work they have undertaken in producing their report, and to welcome the recommendations they have made, all 14 of which have been accepted by the Government.

In our response, we have emphasised our support for regulators to adopt the five principles of good regulation, and the code of practice on consultation; and to produce regulatory impact assessments for any new policies or initiatives which they originate. We commend the use of the enforcement concordat by relevant regulators. Government will consider very carefully the scope and scale of existing regulators before establishing a new one, and assess regularly their continuing effectiveness once established. We are to carry out a review of the variety and complexity of public bodies sponsored by central Government Departments, and this will encompass consideration of regulatory bodies.

The task force has rightly highlighted the point that the subject of the report was 'independent' regulators, so Government's role is to encourage, support and guide the regulators in their tasks, not to enforce rules and procedures. It is also the case that independent regulators are a very disparate band of bodies, so it would be impossible to produce a one size fits all set of very detailed responses. We must also be wary of increasing the costs of and burdens on the regulatory community, and those whom they regulate, unless we can be satisfied of the value of the outcomes achieved.

Copies of the report and the Government's response are available in the Libraries of both Houses, and will be available on the Better Regulation Task Force's website at:-

http://www.brtf.gov.uk/taskforce/pastreports.htm.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Rights of Way (Crime Prevention)

The Minister for Rural Affairs and Local Environmental Quality (Alun Michael): At a seminar in London later today, I will be announcing the names of those authorities whose nominated areas will included in a second designation order under section 118B of the Highways Act 1980. My Department and the Home Office are jointly sponsoring the seminar, which deals with crime reduction on rights of way. Over 180 delegates from local authorities, the police and crime and disorder reduction partnerships are expected to attend.

Designation will enable these highway authorities to make orders to close or divert rights of way to prevent crime. The designation order will be subject to the negative resolution procedure and will be laid as quickly as possible so that authorities can begin to use their new powers as soon as possible.

Two of the authorities concerned—Hillingdon and Leeds—were deferred from the first round of applications to give them the opportunity to provide the required level of evidence that rights of way in those areas are facilitating crime.

The remainder are all new applications received since last year. These are from Brighton and Hove, Middlesbrough, Nottingham, Oldham, York, Swale and the Wirral. A list of the authorities and the areas is set out below.

The quality of applications was very good and I am satisfied that in each of these areas there are very real problems with crime associated with the public rights of way, and that other means of crime prevention had been tried and had failed.

Tackling crime and antisocial behaviour remains one of the Government's top priorities. This announcement today is very good news for the many people living in areas such as these which are blighted by burglary, robbery, drug dealing and general antisocial behaviour.

I have written to each of the nine authorities to inform them of my decision. I have also written to those Members of Parliament whose constituencies are directly affected to let them know what has been decided.

It remains my view that, in general rights of way do not cause or facilitate crime, but that we need to act vigorously where there is a connection.

Authority (9 in total)	*Areas (20 areas)*
Brighton and Hove City Council	Whitehawk Estate
London Borough of Hillingdon	Frankie's Alley
Leeds City Council	1. Seacroft, Halton Ward 2. St Alban's Estate, Burmantofts Ward 3. St Martin's Gardens, Chapel Allerton Ward 4. University Ward 5. Wensley Green, Chapel Allerton Ward 6. Seacroft Ward 7. Calverley Gardens, Bramley Ward
Middlesbrough Council	Keswick Grove
Nottingham City Council	Rise Park
Oldham Metropolitan Borough Council	1. Werneth/Hollinwood 2. St Paul's/Alexandra 3. East Oldham—St Mary's/ Waterhead/Lees
Swale Borough Council	Marine Town
York City Council	1. South Bank 2. The Groves 3. Clifton/Bootham
Wirral Metropolitan Borough Council	1. Wallasey 2. Tranmere (Rock Ferry and New Ferry)

FOREIGN AND COMMONWEALTH AFFAIRS

Liberia

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): With the support of Her Majesty's Government, the United Nations Security Council on 22 December 2003 unanimously adopted United Nations Security Council resolution 1521(2003). The resolution revised the determination for the basis of sanctions against Liberia—UNSCR 1343(2001) was based on Liberia's (in particular former President Charles Taylor and the former Government of Liberia) threat to Sierra Leone. The new resolution is based on Liberia's instability and the threat of proliferation of arms and armed non-State actors (including mercenaries) and their potential threat to the greater sub-region. The measures against Liberia remain the same: an arms embargo, a travel ban, a timber ban and a diamond embargo. The lift criteria have been revised. The travel ban will be started from scratch and include those who constitute a threat to the peace process in Liberia, or who are engaged in activities aimed at undermining peace and stability in Liberia and the sub-region (including senior members of former President Charles Taylor's Government and their spouses and members of Liberia's former armed forces who retain links to former President Charles Taylor).

Sudan

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): With the support of Her Majesty's Government, the original council decision 94/165/CFSP of 15 March 1994 imposing a EU arms embargo against Sudan was repealed and replaced by common position CFSP/31/ 2004 on 9 January 2004. A council regulation will follow shortly. The embargo prohibits *(a)* the delivery or supply of arms and related matériel to Sudan; *(b)* the provision of technical assistance, brokering services and other services related to military activities and to the provision, manufacture, maintenance and use of arms and related matériel to any person, entity or body in. or for use in, Sudan; and *(c)* the provision of financing or financial assistance related to military activities to any person, entity or body, in or for use in. Sudan. Exemptions to the embargo are permitted for non-lethal military equipment intended solely for humanitarian or protective use, institution building programmes of the UN, EU and European Community, for matériel intended for EU and UN crisis management, for de-mining equipment and matériel for use in de-mining operations, and for the provision of financing, financial assistance and technical assistance related to such equipment.

Written Ministerial Statements

Tuesday 10 February 2004

CULTURE, MEDIA AND SPORT

Community Radio

The Secretary of State for Culture, Media and Sport (Tessa Jowell): I have today published a draft Community Radio Order, associated "Keeling Schedule" and explanatory memorandum for public consultation. Copies of these documents have been deposited in the House Libraries, and are available on the Department's website. The Department welcomes comments and the consultation period will last until 20 April 2004.

This Order proposes to introduce a new tier of very local, not-for-profit (or not profit distributing) radio. Community radio should be different from, and complementary to, existing independent local radio. Community radio offers potential benefits in terms of social inclusion, local education, training and experience, and wider access for communities to broadcasting opportunities.

The Communications Act provides for the possible establishment of a fund to support community radio.

OFCOM will shortly be publishing their own draft guidance on how to apply for community radio licences.

DEPUTY PRIME MINISTER

Fire and Rescue Authorities

The Minister for Local Government, Regional Governance and Fire (Mr. Nick Raynsford): I have today made available copies of a consultation document on charging for services by Fire and Rescue Authorities in the Libraries of the House.

Authorities already have a power under the Fire Services Act 1947 to charge for services other than fighting fires. The White Paper "Our Fire and Rescue Service" gave a commitment to continue to provide such a power and to consult on any proposals to extend the charging regime.

Clause 19 of the Fire and Rescue Services Bill currently before this House provides for the Secretary of State to specify by Order the services for which an authority may levy a charge.

The consultation document contains details of the services for which authorities in England and Wales currently levy a charge and these form the basis of our proposals. Comments are welcome on any part of our proposals. In particular, we welcome responses on the direction of travel in respect of the provision by authorities of detailed advice or consultancy.

The consultation period will close on 7 May 2004.

Housing and Employment Mobility Service Contract

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Yvette Cooper): The Office of the Deputy Prime Minister is today announcing to the House that we are letting a contract to provide housing and employment mobility services.

The principal objective for HEMS is to facilitate mobility—especially labour mobility for social housing tenants who want to move to other areas.

HEMS will have three main service components. One—facilitated mobility services to social landlords and their tenants and applicants to help tenants and applicants to find new homes. This will continue and enhance the provision of the grant funded mobility services currently provided by Housing Mobility and Exchange Services (HOMES) and LAWN (the Association of London Government scheme that helps tenants who want to, move out of London to areas with excess housing). Two—web-based information about available housing, neighbourhoods and job vacancies. Three—web access to information on vacancies in social housing.

TREASURY

Tax Avoidance

The Paymaster General (Dawn Primarolo): Legislation to prevent tax avoidance through manipulation of partnership losses is to be included in the Finance Bill 2004. The legislation will apply to individuals who do not spend a significant amount of time in the partnership trade. For trading losses which arise in any of the first four years that a partner carries on a trade, relief for set-off against other income will be limited to the partner's financial contribution to the business. It will also ensure that where a partner claims trading losses against other income and then disposes of rights to future income, a charge to income tax arises on the disposal. The changes will have effect from today.

A copy of today's Inland Revenue News Release giving the relevant background to this measure is being deposited in the Libraries of both Houses and is also accessible on the Inland Revenue website: http://www.inlandrevenue.gov.uk/.

NORTHERN IRELAND

Common Agricultural Policy Reform

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Ian Pearson): The Department of Agriculture and Rural Development for Northern Ireland launched a major consultation exercise in September 2003 covering the choice of the main implementation options arising out of the CAP reform agreement reached in Luxembourg on 26 June 2003. The consultation ended on 16 January 2004 and after having considered stakeholder responses and the relative merits of the available choices, I have decided deploy the following options in Northern Ireland.

Full decoupling of direct producer support will be implemented across the beef sheep and arable sectors.

Full decoupling of direct producer support will be introduced in the diary sector from 2005.

The model of decoupling used will be a static vertical hybrid based partly on eligible land held in 2005 and partly on past patterns of individual producer subsidy claims.

National envelopes will not be deployed at this point.

Decisions on the use of the additional Rural Development Regulation options are deferred and will be considered as part of a separate consultation exercise on future modulation policy scheduled to commence in March 2004.

TRADE AND INDUSTRY

Union Modernisation

The Parliamentary Under-Secretary of State for Trade and Industry (Mr. Gerry Sutcliffe): Today, I tabled an amendment to the Employment Relations Bill concerning the provision of a new funding scheme. The amendment inserts a new section into the Trade Union and Labour Relations (Consolidation) Act 1992 which would create a power for the Secretary of State to make funds available to independent trade unions and federations of trade unions to modernise their operations.

I envisage that the size of the fund would be in the region of £5 million—10 million in total, with expenditure spread over several years, probably beginning in 2005–06. The funding scheme would be used to support innovative projects in such areas as:

training union representatives (for example in the area of business and people management) in order to help promote the development of high performance workplaces;

reviewing internal union structures and organisation and to support more efficient management systems within unions;

enabling unions to broaden their dialogue with members by greater use of the internet and other new technologies and to develop innovative and user-friendly voting mechanisms; and

making union systems more accessible to young people and other under-represented groups within unions.

The case for establishing a Fund is compelling. Unions—just like businesses—need targeted support to speed their adaptation to changing labour market trends and to new ways of working. Unions have done much to modernise themselves and several, often supported by the TUC, have made significant progress in that direction. However, as a number of representations from unions have confirmed, without assistance the pace of change will be slow. By encouraging unions to adapt more quickly, we will ensure that they play their full and considerable part in building productive relations at work that will benefit union members, other workers, their employers and the economy more generally.

The fund will not therefore be used to support the day-to-day work of unions, and it will not impact directly on collective bargaining. It will not be used to support projects which could be funded from other Government programmes.

Subject to Parliamentary approval of this new provision, the Government will publish for full public consultation the draft rules and procedures of the fund after Royal Assent. It is likely these rules and procedures will draw on the example of the partnership at work fund, involving an independent advisory board who will make recommendations to my right hon. Friend the Secretary of State on the acceptability of union bids for fund money.

TRANSPORT

Air Transport White Paper

The Parliamentary Under-Secretary of State for Transport (Mr. Tony McNulty): I am announcing the publication of the supporting documents for the "*Future of Air Transport*" White Paper which was published on 16 December 2003. These reports provide some of the background to decisions taken in the White Paper.

A list of all 27 supporting documents has been placed on the Department's website with details for obtaining hard copies. All the documents, listed below, are available in the Libraries of the House.

Air quality assessments supporting the Government's Air Transport White Paper "The Future of Air Transport"

Written Ministerial Statements

Wednesday 11 February 2004

HOME DEPARTMENT

Anti-Terrorism, Crime and Security Act

The Secretary of State for the Home Department (Mr. David Blunkett): Lord Carlile of Berriew QC has completed the report on the operation of part IV of the Anti-Terrorism, Crime and Security Act 2001, in 2003, which will be laid before the House today.

I am grateful to Lord Carlile for his work and am pleased to note that he is again satisfied that I have certified persons only in appropriate cases and that I have exercised my independent judgment in each case having given due regard to advice from officials.

I welcome Lord Carlile's recommendations which I will be considering in detail over the next few weeks. They will provide a useful contribution to the debates.

Ms Sarah Woodhouse

The Minister for Citizenship and Immigration (Beverley Hughes): I am pleased to inform the House that Ms Sarah Woodhouse has been appointed as the independent monitor of certification of claims as unfounded under section 94 of the Nationality, Immigration and Asylum Act 2002.

Ms Woodhouse has been appointed as monitor for two years. She will monitor the operation of the use of the power to certify an asylum claim or human right claim (or both) as unfounded under section 94 of the NIA Act 2002. In particular she will consider the procedures used to determine whether claims are unfounded and the quality and effectiveness of decisions made under this procedure. She will report annually to the Secretary of State who will then lay a copy of the report before the House.

Police Firearms

The Minister for Crime Reduction, Policing and Community Safety (Ms Hazel Blears): The statistics for 1 April 2002 to 31 March 2003 show that the number of police operations in which firearms were issued was 14,827. The number of occasions on which conventional firearms were discharged by police was 37, which covered 10 incidents. There were also four occasions where a baton round was used as a less lethal alternative to a conventional firearm.

Armed response vehicles were deployed on 11,818 occasions and there were 5,763 authorised firearms officers in England and Wales

Full details are set out in the tables below:

Number of operations in which firearms were authorised

Written Ministerial Statements

Thursday 12 February 2004

TRANSPORT

London Transport Grant 2004–05

The Parliamentary Under-Secretary of State for Transport (Mr. Tony McNulty): The GLA Transport Grant for 2004–05 has today been determined by the Secretary of State for Transport at £2,224,536,000, following consultation with the Mayor of London. This grant is a block grant provided by the Government to Transport for London to support improvements to London Underground and other transport services in London.

EDUCATION AND SKILLS

Higher Education Reform

The Secretary of State for Education and Skills (Mr. Charles Clarke): I stated in the House on 27 January that I was commissioning a report to examine the gateways into the professions. I am pleased to announce the appointment of Sir Alan Langlands, VC of the University of Dundee, to lead this work.

Sir Alan will act as an independent person to oversee the report which will examine how the public sector and the professions can sustain and improve recruitment opportunities for graduates, especially those who do not qualify for the full £3000 support, and, to make recommendations to Ministers on action that can be taken by the employing organisations to provide clear accessible gateways for all graduates who want to pursue such careers and which will benefit the recruitment needs of these sectors.

The report will cover mainly the public sector but will also look at good practice in the private sector and will include those who work in a professional capacity in the voluntary sector. Additionally there will be reference groups established, one for each sector and with voluntary sector representation on each group.

On the public sector, the report will analyse support that is currently available, (through bursaries, golden hellos, fee payment and loan write-offs) its effectiveness and future plans for post autumn 2006. Furthermore it will assess whether these (plus any changes) are likely to continue to work after autumn 2006; and whether there are any gaps in what is available which are likely to create recruitment and retention problems.

On the private sector, it will research current and possibly international practice on incentives for graduates, and assess how employers might respond in a variable fees environment;

I am asking Sir Alan to start this work after Royal Assent this year with the aim of reporting to me by mid-2005.

Building Schools for the Future

The Minister for School Standards (Mr. David Miliband): I am pleased to announce further details about "Building Schools for the Future" (BSF), including the projects in the first wave, the establishment of Partnerships for Schools, and the publication of the exemplar designs of schools of the future. This follows my statements of 26 February and 26 June 2003.

These developments start to deliver the Government's long-term commitment to a programme of rebuilding and renewal to ensure that secondary education in every part of England has facilities of 21st century standard.

We are announcing today the projects that will make up wave 1 of "Building Schools for the Future", starting in 2005–06. Wave 1 will benefit from government support for £2.2 billion capital investment in our secondary schools. We hope to announce further waves during 2004.

The projects in wave 1 are:

the four BSF pathfinder projects, which were announced last March: Bradford, Bristol, Greenwich-Lewisham-Southwark (joint project), and Sheffield;

plus ten further projects. These are: Knowsley, Leeds, Manchester (phase 1 of their proposal only), Newcastle, Newham, Solihull, Gateshead/South Tyneside (joint project), Stoke-on-Trent, Sunderland, and Waltham Forest; and

two reserve projects: Lancashire (Burnley) and Leicester City.

That is a total of 16 projects involving 19 local education authorities (LEAs) and substantial investment in some 180 schools.

BSF must get off to a flying start, to ensure that the considerable benefits that this programme promises are delivered: greater impact on educational standards and local deprivation, improved procurement, and better value for money. Our focus on delivery will be enhanced through the creation of a new agent to support delivery— Partnerships for Schools. The Department will manage Partnerships for Schools jointly with Partnerships UK, and with the participation of 4ps (Public Private Partnerships Programme), to co-ordinate the national delivery of the programme and provide support for LEAs. This body aims to build on the many strengths of the LEAs, and will respond to their needs, with a view to complementing rather than duplicating their role.

At the national level, Partnerships for Schools will:

support the Government in selecting areas to receive investment; establish best practice in delivery, both nationally and locally; and

develop innovative and effective models of procurement, which help create long-term public-private partnerships (PPPs), reduce the burden of bid costs, and streamline procurement through standard documentation.

We are also publishing today a compendium of exemplar designs of the schools of the future. The designs are examples of high-quality school design by 11 leading architectural firms who have created some of the country's best modern buildings. The designs will help LEAs and schools to develop their educational vision and requirements, and will drive consistently high standards across all LEAs. They are not a straitjacket, but an inspiring basis for thinking about future provision.

The resulting designs are innovative and inspirational. The compendium contains the aims of the programme, detail of the designs themselves, as well as some of the common emerging themes across the designs. The designs balance the need to design schools for today—for example, incorporating concepts from extended schools and special needs—with innovative ideas for tomorrow—such as the potential teaching models of ICT- rich open learning spaces in all-through schools or schools-within-schools.

Further information can be found in the launch document which has been published today, copies of which have been placed in the Library.

LSC Annual Report and Accounts 2002–03

The Parliamentary Under-Secretary of State for Education and Skills (Mr. Ivan Lewis): I would inform the House that the Learning and Skills Council for England has today published its annual report and accounts for the period to 31 March 2003. Copies have been placed in the House Libraries.

CONSTITUTIONAL AFFAIRS

National Land Information Service

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): The Government have today accepted the recommendation of the review of the National Land Information Service Central Government Stakeholder Group that the Group should be abolished. Central Government Departments will continue to support the development of the National Land Information Service (NLIS) through direct contact and by liaising with each other to ensure a joined up response to issues relating to NLIS. A copy of the review has been placed in the Libraries of both Houses of Parliament.

Courts Boards

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. Christopher Leslie): Courts boards will be a means of ensuring local involvement in the way in which courts are run. They will work with the new unified courts agency, which will integrate the management of the courts within a single agency to replace the Magistrates Courts Committees and the Court Service. Courts boards will provide a vital local input, to ensure that the courts' administration is run in a way that meets the needs of their areas. We intend to appoint the first members to courts boards towards the end of 2004, so that the boards will run in shadow form before the new agency is launched in April 2005.

The consultation paper "C*ourts boards: constitution and procedures"* sought views on how appointments should be made to courts boards and the procedures by which they should operate. The consultation period ran from 25 September 2003 to 5 January 2004 and 141 responses were received.

A post-consultation report for the paper courts boards: constitution and procedures will be published on 26 February. The report will set out the Government's decisions on how courts boards will be set up, in the light of the responses received to consultation. It will also inform regulations which will be laid before Parliament on that day.

I am keen for courts boards to be set up in shadow form during this year so that the boards may then consider the draft business plans for the first year of the new unified courts agency.

PRIME MINISTER

Senior Salaries

The Prime Minister (Mr. Tony Blair): The 26th Report of the Review Body on Senior Salaries, which makes recommendations about the pay of the senior civil service, senior military personnel and the judiciary, is being published today. Copies are in the Vote Office and the Library of the House. I am grateful to the Chairman and Members of the Review Body for their work.

The main recommendations of the Review Body for the senior civil service are:

an increase from 1 April 2004 of 2 per cent. to the pay ranges for each of the senior civil service pay bands below permanent secretary;

a range of base pay awards from 0 to 9 per cent. depending on performance;

a minimum unconsolidated bonus payment of 3 per cent. or £2,500, whichever is the higher, for those making the greatest contribution; and

an uplift to the pay range for permanent secretaries resulting in a new range of £121,100 to £256,550; the uplift is broadly equivalent to the increase proposed to the pay ranges for the senior civil service pay bands below permanent secretary.

The main recommendation of the Review Body for the senior military is:

an increase from 1 April 2004 of 2.8 per cent. in the value of all points on the incremental pay scales for senior military officers

The main recommendation of the Review Body for the judiciary is:

an increase from 1 April 2004 of 2.5 per cent. in judicial salaries.

The Government have decided to accept these recommendations. Their cost will be met within existing departmental expenditure limits.

The Review Body has also recommended that broad salary linkage between its remit groups should be achieved from now on by maintaining general equivalence in salary levels at the top of the structures only. The Government will be considering this.

Pay increases for Members of Parliament and Ministers are linked automatically to the increase in pay bands for the senior civil service. Their pay entitlement will therefore increase by 2 per cent. from 1 April 2004.

HEALTH

Maternity Services (Select Committee Report)

The Parliamentary Under-Secretary of State for Health (Dr. Stephen Ladyman): The Government's response to the Health Committee's Fourth Report of Session 2002–03 on Provision of Maternity Services, the

Eighth Report of Session 2002–03 on Inequalities in Access to Maternity Services, and the Ninth Report of Session 2002–03 on Choice in Maternity Services (Cm 6140), has been published today. Copies have been placed in the Library.

The Government recognise that women and their families currently benefit from high standard maternity services provided by dedicated and hardworking National Health Service staff.

The Government are committed to maintaining and building on the quality of maternity services by tackling inequalities as a matter of priority and promoting choice for all women and their families.

David Bennett

The Minister of State, Department of Health (Ms Rosie Winterton): The report of the independent inquiry into the death of David 'Rocky' Bennett is published today. David Bennett's death is a tragedy and my sincere sympathies go out to his family for their loss. He died five years ago in a medium secure unit after being restrained by staff. The report raises a number of very important issues. We have a duty to understand these and act upon their findings.

It is essential that the health service is safe for service users and staff. Following a meeting with David Bennett's family, we established the Cross-Government Group on the management of aggression and violence. We have just published positive practice standards for local services, and have established a programme of work with the National Patient Safety Agency (NPSA) to help improve the organisation and quality of training for staff. The National Institute for Clinical Excellence will shortly publish guidance in this area.

I accept that there is discrimination in the NHS, both direct and indirect. There is no place for racism or discrimination. It is unacceptable; it contradicts the basic value of equity that is the cornerstone of the health service. In mental health we have already made a start by publishing "*Delivering Race Equality*" which outlines a national framework for local action.

Behaviours and processes that have grown up in mental health services mean that there is particular inequity in the provision of care and outcomes for people from black and minority ethnic groups. We are committed to rooting out racism, tackling these inequalities and ensuring that the experience of people from black and ethnic minority groups is improved. The consultation feed back on "*Delivering Race Equality*" and the recommendations of the David Bennett inquiry report will help inform future action.

We also need senior, committed, leadership to ensure that change happens. This is why Professor Kamlesh Patel, chair of the Mental Health Act Commission, has been asked to direct the national programme of work, including the work of the National Institute for Mental Health. A national steering group, co-chaired by Lord Victor Adebowale, from Turning Point will also inform us. I will expect quarterly reports on progress.

The National Institute for Mental Health has been set up to help improve local mental health services. Its largest programme is focused on black and minority ethnic mental health. It covers:

better quality and more intelligently used information;

more appropriate and responsive services; and,

increased community engagement.

In order to ensure that change is sustainable we need to work with local communities to help us understand their needs and to build their confidence. To help achieve this we will fund 80 community engagement projects and appoint 500 community development workers to make a direct connection between local people, staff and services.

In "*Delivering Race Equality*" we are absolutely committed to ensuring that staff have the knowledge and skills to enable them to deliver services to, and in partnership with, all groups in their community. This includes race equality training.

Last but not least, when serious incidents occur, we know that good communication is essential. Families and carers need to be involved, and different agencies must communicate more effectively with each other. We are therefore working with the Home Office and police to improve local liaison; and with the NPSA to reform the process of independent inquiries. This will help to ensure that families and carers can be more closely engaged, and that staff and services learn the lessons they need to. We deeply regret the death of David Bennett. We are committed to making change happen.

NHS Charges

The Minister of State, Department of Health (Ms Rosie Winterton): We shall lay before the House regulations to increase national health service charges in England from 1 April 2004. There will be a cash increase in the prescription charge of 10 pence from £6.30 to £6.40 for each quantity of a drug or appliance dispensed.

The cost of prescription prepayment certificates will rise to £33.40 for a four month certificate and £91.80 for an annual certificate. These offer savings for those needing more than five items in four months or 14 in one year.

Prescription charges are expected to raise some £462 million for the NHS in 2004–05.

Charges for elastic stockings and tights, wigs and fabric supports supplied through the hospital service will be increased similarly.

The maximum patient charge for a single course of dental treatment begun on or after 1 April 2004 will increase from £372 to £378.

The prescription charge increase is the same as in the previous five years and is well below the current level of inflation. The other increases are in line with this percentage increase.

The majority of optical voucher values will increase by 2.5 per cent. to help children and people on low income with the cost of spectacles or contact lenses. In recognition of the greater costs which people with high prescription lenses may face, vouchers for these individuals will increase by 10 per cent. We will continue to monitor the costs of high prescription lenses over the coming year to see if further changes are necessary.

NHS charges and optical voucher values in Scotland, Wales and Northern Ireland are a matter for the devolved administrations.

Details of the revised charges and optical voucher values have been placed in the Library.

NORTHERN IRELAND

Police (Northern Ireland) Act 2000 (Renewal)

The Minister of State, Northern Ireland Office (Jane Kennedy): On 21 September 2003, I announced a review of the effectiveness of the temporary provisions of the Police (Northern Ireland) Act 2000. Principally these relate to 50:50 recruitment. That review was initiated as part of the Secretary of State's statutory duty, under section 47 of that Act, both to have regard to progress made towards securing that membership of the police and police support staff is representative of the community in Northern Ireland, and to consult the Policing Board, when making a decision as to whether those temporary provisions should be renewed. The review ended on 19 December, but I have continued to meet with political parties on this issue until recently.

As a direct result of these temporary provisions, steady progress towards a more representative police service has been achieved. The number of Catholic applications to the PSNI has been unprecedented, averaging 35 per cent. over six competitions. As a direct result, the proportion of Catholic officers in the regulars has increased from around 8 per cent. to almost 14 per cent. Increase in Catholic representation among civilian staff has been slower, in part because 50:50 does not apply to all civilian recruitment competitions, only to those where six or more are sought in the same field at the same time.

A number of issues were raised during the review about the efficiency of the 50:50 recruitment process and its fairness to candidates. I am looking seriously at those issues and my officials are liaising with the police to assess the scope for potential improvements. The Government is keen to move forward with increasing the representativeness of the police service. The more progress we can make now, the sooner it may be possible to put an end to a procedure that is difficult for many people to accept, but justified in our view for the greater good.

For these reasons, and after considering carefully all the views expressed during the consultation period, the Secretary of State has now decided that those temporary provisions should be renewed for a further three years. That is why I am today laying before Parliament the draft Police (Northern Ireland) Act 2000 (Renewal of Temporary Provisions) Order 2004. There will be an opportunity to debate the Order in both Houses of Parliament.

Prison Service Pay

The Minister of State, Northern Ireland Office (Jane Kennedy): The report of the Prison Service pay review body on the pay of governor and officer grades in the Northern Ireland Prison Service for 2004 has been published today. Copies have been placed in the Libraries of both Houses.

Both the Secretary of State and I welcome the recognition in the report of the work of staff in the Northern Ireland Prison Service.

The Review Body has recommended a 2 per cent. increase (part consolidated— part non-consolidated) on existing rates of pay for the 12 month period commencing 1 April 2004.

I have decided to accept the recommendations and implement the award in full.

DEFENCE

Armed Forces Pay

The Secretary of State for Defence (Mr. Geoffrey Hoon): The 2004 Report of the Armed Forces Pay Review Body has been published today. Copies of the Report are available in the Vote Office and the Library of the House. I wish to express my thanks to the Chairman and members of the Review Body for their clear and wide-ranging report.

The AFPRB has recommended an increase in basic military salary of 2.8 per cent. for the majority of personnel and 3.2 per cent. for certain Privates and Lance Corporals (those on the lower pay range). The AFPRB has also recommended increases in the rates of Specialist Pay (eg Flying Pay, Submarine Pay, Diving Pay and Hydrographic Pay), and in accommodation charges. The AFPRB has also recommended a 3.2 per cent. increase to rates of longer separated service allowance and longer service at sea bonus which are designed to compensate for separation.

The additional cost to the defence budget will be £196M. This will be met within existing departmental expenditure limits.

The AFPRB's recommendations are to be accepted in full, with implementation effective from 1 April 2004.

WORK AND PENSIONS

Child Support

The Secretary of State for Work and Pensions (Mr. Andrew Smith): Progress in new scheme performance has continued to be made and future improvement is expected. The number of poor families now benefiting from the new child maintenance premium has almost tripled in the last quarter. More than three times as many non-resident parents have now made a first payment of maintenance as at the end of the previous quarter. In each of the three months during the quarter, the agency made more maintenance calculations on the new scheme than it made on the old scheme in the same months last year.

In clearing cases so far, the ratio of those reaching calculation to those that have been closed in the new scheme remained 6:4, compared with the ratio of 4:6 in the old scheme. During the third quarter, the agency cleared nearly as many cases as it did in the first two quarters combined, taking the total number of clearances (calculations and closures) to over 100,000.

The Department continues to retain around 15 per cent. of each monthly payment due to EDS, the service provider, due to the continuing problems with the computer and telephony systems.

Technical issues continue to preclude reliable figures on compliance for the latest quarter. However, the agency is focusing more effort on compliance and is working on alternative mechanisms to derive this information.

The current accuracy (to the nearest penny) level is estimated at 83 per cent. against a 90 per cent. target. We expect to see the target reached as further improvements are made to the computer support and staff become more and more familiar with the new scheme.

Because of continuing issues with the new computer's management information systems, we are still unable to provide a reliable throughput figure for the latest quarter. Alternative methods for measuring throughput are being developed.

Summary of Agency Performance to December 2003

Agency Performance	*Quarter 1 Mar—Jun 2003*	*Quarter 2 Jul—Sep 2003*	*Quarter 3 Oct—Dec 2003*	*Scheme to Dec 2003*
Applications received	73,582	78,982	85,306	237,870
Applications cleared	12,648	38,583	49,453	100,684
of which: Maintenance Calculations	6,671	23,857	29,672	60,200
Closures	5,977	14,726	19,781	40,484
First payments made through the Agency	461	5,164	11,473	17,098
First Child Maintenance Premium payments made	77	3,314	6,173	9,564

Agency Performance (March 2003 to June 2003)

	Mar-03	*Apr-03*	*May-03*	*Jun-03*	*Total In Quarter*
Applications Received	3,444	25,228	19,951	24,959	73,582
Applications Cleared	43	1,616	3,441	7,548	12,648
of which: Maintenance Calculations	10	721	1,810	4,130	6,671
Closures	33	895	1,631	3,418	5,977
First Payments Made Through the Agency		*136 for 1st 3 months		325	461
First Child Maintenance Premium Payments Made		*17 for 1st 3 months		60	77

Agency Performance (July 2003 to September 2003)

	Jul-03	*Aug-03*	*Sep-03*	*Total In Quarter*	*Scheme To Sep-03*
Applications Received	28,897	23,761	26,324	78,982	152,564
Applications Cleared	10,526	11,923	16,134	38,583	51,231
of which: Maintenance Calculations	6,922	7,199	9,736	23,857	30,528
Closures	3,604	4,724	6,398	14,726	20,703
First Payments Made Through the Agency	1,032	1,752	2,380	5,164	5,625

Agency Performance (July 2003 to September 2003)

	Jul-03	*Aug-03*	*Sep-03*	*Total In Quarter*	*Scheme To Sep-03*
First Child Maintenance Premium Payments Made	267	1,596	1,451	3,314	3,391

Agency Performance (October 2003 to December 2003)

	Oct-03	*Nov-03*	*Dec-03*	*Total In Quarter*	*Scheme To Dec-03*
Applications Received	35,724	28,841	20,741	85,306	237,870
Applications Cleared	19,832	16,011	13,610	49,453	100,684
of which: Maintenance Calculations	11,807	9,975	7,890	29,672	60,200
Closures	8,025	6,036	5,720	19,781	40,484
First Payments Made Through the Agency	3,978	3,503	3,992	11,473	17,098
First Child Maintenance Premium Payments Made	2,108	1,915	2,150	6,173	9,564

Notes:

1. Figures marked with * are not available on a monthly basis for this period.

2. Figures for August and September differ from those previously published as information relating to Northern Ireland Child Support Agency has now been removed. All figures now exclude Northern Ireland.

3. A proportion of cases that have a maintenance calculation in place may already be receiving payment directly, but will not be reflected in the figures shown above.

4. Figures for Child Maintenance Premium payments include an estimate of the number of parents who receive the premium by way of a disregard to their Income Support/income-based Jobseekers Allowance. The disregard has been added from August as data was not available prior to this, and has also been included into the scheme to date figure.

Average weekly child support maintenance payments to parents with care

	1 Qualifying Child	*2 Qualifying Children*	*3 Qualifying Children*
Average Weekly Payment	£31.56	£45.40	£48.70

Note:

Figures are for December 2003 only and are calculated as the total amount received and allocated divided by the number of cases.

DEPUTY PRIME MINISTER

Regional Assemblies

The Minister for Local and Regional Government (Mr. Nick Raynsford): The Regional Governance White Paper, Your Region, Your Choice: Revitalising the English Regions published in May 2002 announced that elected regional assemblies would:

> "have the power to request the Secretary of State to call in for his or her determination strategic planning applications which were not consistent with the regional spatial strategy" (paragraph 4.34).

The Office of the Deputy Prime Minister proposes to strengthen these arrangements so that they have the same effect as those in London. We propose to give elected assemblies a power to direct local planning authorities to refuse strategic planning applications on similar grounds to those in London. The Mayor of London can exercise this power where he or she considers it would be:

> "contrary to the SDS [Sustainable Development Scheme] or prejudice its implementation, or otherwise be contrary to good strategic planning in London" (paragraph 6.12 of Government Office for London Circular 1/2000).

European Parliamentary, Local Authority and Greater London Authority Elections 2004

The Minister for Local and Regional Government (Mr. Nick Raynsford): Following consultation with the Electoral Commission and other key stakeholders the following instruments have now been made and laid before Parliament:

> The Local Elections (Principal Areas) (Amendment) (England and Wales) Rules 2004, SI No. 223
>
> The Local Election (Parishes and Communities) (Amendment) (England and Wales) Rules 2004, SI No. 224
>
> The Greater London Authority Elections (Amendment) Rules 2004, SI No. 227

The Office of the Deputy Prime Minister have also laid before Parliament, following consultation, the following draft Instruments on which we are seeking the approval of the House:

> The Local Elections (Ordinary Day of Election 2004) Order 2004
>
> The European Parliamentary Elections Regulations 2004
>
> The Representation of the People (Combination of Polls) (England and Wales) Regulations 2004
>
> The Local Authorities (Conduct of Referendums) (England) (Amendment) Regulations 2004
>
> The Local Authorities (Mayoral Elections) (England and Wales) (Amendment) Regulations 2004

As a package of measures these instruments would:

> give effect to the Government's announced intention to move the date of the English local authority and Greater London Authority elections in 2004, so that they take place at the same time as the European Parliamentary elections, and make consequential amendments relating to:
>
> > the term of office of councillors affected by the postponement;
> >
> > the 'six month period' during which by-elections need not be held;
> >
> > the date of annual meetings for authorities affected by the postponement.
>
> make provision for the conduct of European Parliamentary elections in Great Britain and Gibraltar;
>
> provide revised rules for the combination of polls at all elections and also referendums pursuant to the Local Government Act 2000; and
>
> provide for other amendments to the Greater London Authority election rules.

A summary of the responses we received during consultation on the draft instruments has been made available in the Libraries of the House.

Supporting People Programme 2004–05

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Yvette Cooper): The Government are today publishing the Independent Review of the Supporting People programme, which was conducted by Eugene Sullivan of RSM Robson Rhodes LLP. Copies of the review will be available in the Libraries of both Houses and on the ODPM website www.spkweb.org.uk.

The Government is allocating £1.801 billion for the Supporting People programme in 2004–05, which will fund housing related support services for over 1 million vulnerable people including victims of domestic violence, older people and those with mental health problems. The programme funds an estimated 250,000 units of housing related support, compared to fewer than 100,000 in 2000.

On the basis of the Independent Review, local authorities will be expected to make efficiency savings of up to 2.5 per cent. in 2004–05, with a proportion of the savings reallocated to local authorities to fund services that have come on stream in 2003–04 and are reaching unmet need.

The Supporting People programme began in April 2003, drawing together nine different funding programmes, including Transitional Housing Benefit. Following significant late growth in costs last year, the government commissioned the Independent Review to look at value for money and the variation in unit costs and services across local authorities. The Review has found that there are wide variations in unit costs between authorities, and that £1.8 billion is too much to pay for the legacy services. It recommends that efficiency savings can be made, but that the pace of change needs to be managed to avoid difficulties for service users and small providers.

The Government are concerned to ensure that value for money is achieved and that valuable services for the vulnerable are sustained. The Office of the Deputy Prime Minister are therefore asking the Audit Commission to undertake detailed inspections in a series of local authorities with high unit costs, alongside their routine inspections, to inform the Spending Review and funding allocations for 2005–06.

The Office of the Deputy Prime Minister are also beginning today a consultation on the grant conditions for Supporting People in 2004–05, which we are proposing to keep broadly the same as 2003–04. The consultation ends on 24 March. We are writing to local authorities to inform them of their allocations.

Rent Service

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Yvette Cooper): Responsibility for the Rent Service, an executive agency, is to transfer from the Office of the Deputy Prime Minister to the Department for Work and Pensions. The Deputy Prime Minister has agreed with his right hon. Friend the Secretary of State for Work and Pensions (DWP), that this transfer will take place with effect from 1 April 2004.

The reasons for transferring the Rent Service (TRS) to the Department for Work and Pensions are that the vast majority of TRS's work (around 90 per cent.) is on

rental valuations to determine how much housing benefit (HB) claimants should receive. Although this is carried out primarily for local authorities, the policy and legislative lead rests with DWP. TRS, which will retain its executive agency status on transfer, will be better placed to assist with taking forward the on-going work on housing benefit reform—announced by the Secretary of State for DWP in October 2002—if it is operating within DWP.

Only a small percentage of TRS's current workload (around 10 per cent.) relates to the Office of the Deputy Prime Minister's responsibilities on fair rents. The transfer will not prevent the Agency from contributing to ODPM's policy objectives, as the role and functions of TRS remain the same.

The Office of the Deputy Prime Minister is consulting with the trade unions involved in this change of Departmental responsibilities.

HOME DEPARTMENT

Prison Service Pay

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): The Third Report of the Prison Service Pay Review Body (PSPRB) on the pay of in-charge governors and operational managers, prison officers and related grades in England and Wales in 2004 has been published today and copies placed in the Library.

The PSPRB have recommended a 2.4 per cent. basic increase to pay rates for prison officer and related grades and 1.5 per cent. to in-charge governors and other operational managers. Nearly all in-charge governors and other operational managers receive performance payments on top of their basic award, which contribute to earnings growth for them above the level of inflation.

The Home Secretary has decided that the recommendations will be implemented in full, with effect from the operative date of the award of 1 April 2004.

The key recommendations of the report are:

A 2.4 per cent. basic increase to pay rates for prison officer and related grades from 1 April 2004;

A 1.5 per cent. basic increase to in-charge governors and other operational managers from 1 April 2004;

Revised local pay allowance rates introduced from 1 April 2004:

from £3,800 to £4,000 per annum for the "top" rate

from £3,000 to £3,100 per annum for the "high" rate

from £2,500 to £2,600 per annum for the "middle" rate

the £1,100 per annum "lower" rate continues unchanged

Required hours addition for operational managers to be increased by the basic award figure 1.5 per cent. ;

Healthcare specialist allowance increased by 2.4 per cent. but all others frozen at current rates. Staff new to jobs attracting specialist allowances to get them at the current rates;

All other allowances, such as Tornado, bedwatch, on call, dirty protest, increased by 2.4 per cent.

TREASURY

Financial Services

The Financial Secretary to the Treasury (Ruth Kelly): As I set out in my written statement of 5 January, *Official Report*, column 1W, Lord Penrose delivered the report of his inquiry into Equitable Life to the Treasury on 23 December.

Further to that statement and my written answer to the Member for Preseli Pembrokeshire on 26 January, *Official Report*, column 110W, I wish to inform the House that named individuals from Equitable Life's current senior management and their advisers have now been shown limited extracts of Lord Penrose's report, to assist the Treasury with its public functions. The Treasury is also taking independent actuarial advice.

Consequently, the report, or extracts from it, are now the subject of examination by Treasury officials and their legal and actuarial advisers, named FSA and DTI officials, the Serious Fraud Office, and a small number of Equitable Life's current senior management and their advisers.

As I set out in my statement of 5 January, the Treasury intends to publish the report in full as soon as possible. I will continue to keep the House fully informed.

Written Answers to Questions

Monday 26 January 2004

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Badgers

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the total population of badgers in the UK; and in which areas the population is greatest. [148650]

Mr. Bradshaw: English Nature advises that there are likely to be in the region of 300,000 to 400,000 badgers in Great Britain. This figure is derived from a National Badger Survey which took place in the mid-1990s.

The survey also reported that there had been a 77 per cent. increase in badger numbers between the mid-1980s and mid-1990s. The increasing number of applications received by Defra for licences under the Protection of Badgers Act 1992 (up 50 per cent. since 1999) suggest that this trend is continuing.

Badgers densities are highest in the south-west of England, with high densities present throughout southern counties, the west midlands and Wales.

The Department has been funding the Winter Mammal Monitoring Project which is being carried out by the Mammal Society and the British Trust for Ornithology. This is a pilot study intended to develop a multi-species terrestrial mammal monitoring system. The project is still at the pilot stage—but is intended in the future to provide valuable data on the abundance of mammal species, including badgers. Early findings confirm the pattern of distribution report in the National Badger Survey.

Full details of the badger survey findings are published in: "Changes in the British badger population, 1988 to 1997" by G. Wilson, S. Harris and G. McLaren (1997), published by the People's Trust for Endangered Species (ISBN 1 85580 018 7).

Results from the Winter Mammal Monitoring Project are available online at: http://www.bto.org/survey/special/mammal_results.htm

Birds of Prey

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the impact of birds of prey eating and preying on other *(a)* birds, *(b)* mammals and *(c)* the food chain. [149443]

Mr. Bradshaw: A Raptor Working Group was set up in 1995, jointly chaired by the DETR and the Joint Nature Conservation Committee, following increasing concerns from grouse moor owners and racing pigeon fanciers over the impact of rising raptor populations on bird numbers. The recommendations from the Raptor Working Group's final report, published in 2000, provides the basis for and inform efforts to find an effective and acceptable solution to the problems caused by birds of prey.

Work is now being taken forward by the country conservation agencies, and other organisations. In addition, English Nature has signed a Memorandum of Understanding with the Moorland Association on addressing the issue of raptor predation in the uplands.

Implementation of the Working Group's report's recommendations in Scotland and Wales is a matter for the devolved Administrations. A paper on progress in implementing the recommendations of the Raptor Working Group Report was presented to the Joint Nature Conservation Committee, and noted by them, in September 2003. The paper is now publicly available on their website at: http://www.jncc.gov.uk/management/committee/papers03–09/jncc03N06.pdf

Copies of the Raptor Working Group report are available from the Library of the House.

Birds of prey are usually the top predators in their food chains. As with other predatory species, populations of birds of prey are normally heavily influenced by their prey populations rather than the other way around. The available evidence suggests that recovering populations of birds of prey are not responsible for recent declines in some songbirds and that other factors related to habitat change and the intensification of farming are mainly to blame. Although there is little specific information on the impact of birds of prey on mammal or other prey populations in the UK, the same general principle applies and population declines driven solely by predation are highly unlikely. Healthy bird of prey populations can exist only where their main prey species are sufficiently abundant.

Bovine Tuberculosis

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of whether wild deer are responsible for the spread of TB to cattle. [148655]

Mr. Bradshaw: In Great Britain, there is very limited evidence that deer have been responsible for transmitting tuberculosis to cattle. Wild deer in GB have generally been considered a sentinel or 'spill-over' host of infection in cattle and other wildlife, rather than the cause of it. Whether any wild deer populations (of any species) may constitute a reservoir of TB will depend upon the prevalence of TB, density and ecology of the hosts and the pathology that TB shows in those species.

Defra has funded a survey of wildlife in the Southwest of England by the Central Science Laboratory. The first phase established whether *Mycobacterium bovis* (*M. bovis*—the causative organism for bovine tuberculosis) was present in a number of wild mammal species, including deer. *M. bovis* has been confirmed in five of the six established wild and feral species of deer in GB. The second phase of the survey (due to end March 2004) is to estimate prevalence of *M. bovis* in those species where it is found, by carrying out a more targeted and extensive sampling.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the incidence of TB in cattle by 2008 if current measures are continued and there is no increase in activity by her Department; and what her projections are for costs of compensation for slaughter of cattle reactors in that period. [148657]

Mr. Bradshaw: Our latest assessment shows that bovine TB restrictions affected 5 per cent. of cattle herds (5,181 herds) in Great Britain at some point between January and November 2003. At any one point in time there are about 3 per cent. of herds under restriction.

The average annual increase in the number of animals slaughtered as a result of TB control measures between 1990 and 2001 was 20 per cent. It is too early to say whether this long-term trend has been altered by the interruption of the testing programme due to Foot and Mouth disease in 2001, and the priority testing of high-risk herds once the programme resumed.

In 2002/03 we paid out £31.1 million in TB compensation. With no new changes in policy, or disease dynamics, we could theoretically expect a 20 per cent. year on year increase in the compensation bill.

However, the TB programme will not remain static over the next four years. We recently consulted on proposals to rationalise compensation arrangements for all notifiable diseases including bovine TB and we will shortly be consulting on proposals for a new TB strategy and options for controlling the geographical spread of the disease in the short term. The key challenge for Government and the farming industry will be to work together to reduce the overall economic impact of bovine TB.

Departmental Advertising

Mrs. May: To ask the Secretary of State for Environment, Food and Rural Affairs (1) how much her Department spent on advertising in each year since its creation; [144885]

(2) how much her Department spent on marketing in each year since its creation. [144887]

Margaret Beckett: The Department does not maintain separate records of its expenditure on advertising. The expenditure for publicity by Defra's Communications Directorate, includes marketing, advertising, publications, events, shows and direct information literature mailings, and is recorded for the financial years since Defra's creation in June 2001 as follows:

	£ million
2001–02	6.6
2002–03	4.7
2003–04	[1]3.7

[1] Estimated.

This includes communication on a very wide range of matters of interest, both necessary and beneficial to the public, the wide range of industries in which Defra has an interest, together with local government, voluntary organisations and other bodies.

Large Combustion Plant Directive

Vera Baird: To ask the Secretary of State for Environment, Food and Rural Affairs what the *(a)* process and *(b)* timescale is for reaching a final United Kingdom position on implementation of the Large Combustion Plant Directive. [150231]

Alun Michael: We are continuing to assess the potential economic impact of the introduction of the Directive on the UK coal industry, and on the coal-fired electricity generating industry which is its major market, using both internal analyses and independent research. This will enable us to take a final decision on the right implementation approach for the UK in spring 2004.

Energy Efficiency

Dr. Gibson: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions she has had with the Chancellor of the Exchequer regarding economic means to promote energy efficiency. [149747]

Mr. Morley *[holding answer 22 January 2004]:* The Department holds regular discussions with the Treasury at both official and ministerial level regarding fiscal instruments and how they can continue to be developed and employed to improve the energy efficiency of the economy.

The Treasury and Defra published last year a joint consultation "Economic Instruments to improve household energy efficiency: consultation document on specific measures". The consultation closed on 24 October with over 80 responses, which are being actively considered to help inform policy development.

Fallen Stock

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on progress towards the setting up of the National Fallen Stock Scheme, with particular reference to the financial structure of the company concerned. [150067]

Mr. Bradshaw *[holding answer 22 January 2004]:* Good progress is being made in setting up the Scheme. The Company which will run the Scheme will be limited by guarantee and operate on a not for profit basis. Initially, it will be wholly government owned and obtain funding to carry out its functions from government aid and farmer subscriptions.

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how much her Department has spent on research into the development of selective fishing techniques in each of the last five financial years. [150308]

Mr. Bradshaw: The Department has spent the following amounts on research into the development of selective fishing techniques in each of the last five financial years:

	£
2002–03	320,305
2001–02	211,930
2000–01	211,308
1999–2000	141,604
1998–99	166,429

Flooding

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the role of the Environment Agency in the planning process with regard to the building of houses on flood plains. [149921]

Mr. Morley *[holding answer 22 January 2004]:* The Environment Agency has the lead role in providing advice on flood issues both at a strategic level and in relation to planning applications as stated in Planning Policy Guidance on "Development and Flood Risk" (PPG25). The Agency works with local planning authorities to help ensure inappropriate development does not take place in the flood plain.

Mrs. May: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to change the minimum one-in-75 year flood standard issued by the Government. [148280]

Margaret Beckett: No such 'standard' has been issued by the Government. In project appraisal guidance the Department sets out a range of indicative standards depending on land use. For intensively developed urban areas, the indicative target range is from 1 in 50 to 1 in 200 for river floodplains and 1 in 100 to 1 in 300 for areas at risk of coastal flooding. It should be emphasised that many houses situated behind defences with a nominal standard of, say, 1 in 50, will individually have a risk of flooding that is significantly less than this.

The project appraisal guidance will be subject to review and public consultation later this year but there are no current plans to change the range of indicative standards.

GM Crops

Joan Ruddock: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the recent research by Dr. Charles M. Benbrook on the impact of GM crops on pesticide use in the United States. [149875]

Mr. Morley *[holding answer 22 January 2004]:* The Advisory Committee on Releases to the Environment (ACRE) considered the report by Dr. Benbrook as part of its deliberations on the results of the Farm Scale Evaluation (FSE) trials. ACRE'S advice on the FSE results was published on 13 January and we are now considering this.

Snares

Mr. Edwards: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what guidance is issued to gamekeepers and others involved in the setting of snares; [148451]

(2) what checks are in place to ensure that the law is being enforced with respect to the setting of snares; [148452]

(3) what obligation the United Kingdom has under the Berne Convention on conservation of European wildlife and their habitats with respect to snaring; [148453]

(4) when she expects to publish the results of the review of the law relating to the use of snares; [148454]

(5) what representations she has received about the illegal use of snares; and if she will make a statement. [148455]

Mr. Bradshaw: The Wildlife and Countryside Act 1981 protects all wild birds and certain animals from killing and taking. Under Section 11 of the 1981 Act free running snares are permissible provided that the snare is not placed in such a way to allow injury to any animal listed on Schedule 6 of the 1981 Act, which includes badgers. Section 11(3) makes it an offence to set in position, or knowingly cause or permit to set in position, any snare which is of such a nature and so placed as to be calculated to cause bodily injury to any wild animal. The snare must also be inspected at least once every 24 hours, so as to avoid any animal held in the snare suffering unnecessarily through starvation or dehydration. All non-target species must be released from the snare.

Free-running snares are not considered an indiscriminate means of either capture or killing provided they are set correctly and are checked every 24 hours. They are designed to be a restraining device that is intended to slacken, not continually tighten, thus not causing bodily injury.

The purpose of Section 11 is to expressly prohibit the use of indiscriminate means of capture and killing, in accordance with our international obligations, under the Bern Convention. Penalties for offences under Section 11, including not checking snares and not releasing non target species, include fines of up to £5000 and/or a custodial sentence of up to six months for each offence. The Police are the main authority for enforcing this area of legislation.

The Department does not issue advice to gamekeepers on how snares should be set. However, the British Association of Shooting and Conservation has published a Code of Good Practice and the Game Conservancy Trust includes detailed guidance on best practice with all snares that they sell.

It is considered that a complete ban on the use of snares might encourage the use of more dangerous, indiscriminate and illegal alternatives, such as poisons. We have no current plans to alter the Wildlife and Countryside Act 1981 with regard to snares. It is important that until viable alternatives are available to land managers the humane use of traps and snares is improved. Officials have undertaken a stakeholder consultation to assess current practice; identify best

practice and methods that cause concern; as well as request suggestions for the improvements of snare operation and any potential alternative methods. The consultation period ended on the 13 November. Officials will be collating the comments over the next few months. A copy of the pre-consultation paper can be found on the Defra website at http://defra.gov.uk/corporate/consult/snares/letter.htm

Officials received 101 responses to the stakeholder consultation.

Sudden Oak Death

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she has taken to ensure that gardeners are aware of the *(a)* symptoms and *(b)* procedures for reporting cases of sudden oak death. [149114]

Mr. Bradshaw: The Government believe that the public should have as much information as possible about *Phytophthora ramorum*, the disease known as sudden oak death in the USA. Information about the disease and how to report it is available on the Defra website at http://www.defra.gov.uk/planth/oak.htm. An explanatory leaflet and poster are also available and copies will be placed in the Library of the House. Officials are in regular contact with interested organisations, for example the Royal Horticultural Society and the Horticultural Trades Association, so that information about the disease, its symptoms and guidance on reporting any suspected cases of infection can be disseminated to their members. This information has also appeared in a number of recent press and magazine articles.

Because the symptoms are difficult to distinguish from those caused by other pathogens, we are not relying on public awareness but are carrying out our own surveys of garden centres and nurseries in order to detect infected plants. Buyers of host species have been advised to check plants before purchase for symptoms of the disease and to contact their supplier if they subsequently develop.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many checks were carried out at ports of entry in order to prevent the import of plants infected with sudden oak death in *(a)* 2001, *(b)* 2002 and *(c)* 2003. [149235]

Mr. Bradshaw: Defra's plant quarantine surveillance programme is focused at nurseries, garden centres and other places where plants are received, rather than at ports of entry. Until May 2002 host plants of "P. ramorum" in intra-community trade were not subject to any specific plant health controls. The following numbers of inspections were carried out in the last three years on rhododendrons and viburnums, the two plant genera which have most often been found to be infected in Europe:

	Nurseries, garden centres etc.			*At ports*
	UK	*Other EC*	*Non-EC*	
2001	224	95	17	0
2002	3190	1147	43	1
2003	9081	2667	20	11

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what instructions she gave to port authorities to prevent the import of plants infected with sudden oak death in *(a)* 2001, *(b)* 2002 and *(c)* 2003. [149236]

Mr. Bradshaw: Inspectors from the Department's Plant Health and Seeds Inspectorate (PHSI) have authority to detain, inspect and sample plants at ports to ensure that they meet import requirements and are not carrying disease. These inspections relate to a wide range of plant pests and pathogens, not just "Phytophthora ramorum" Any consignment found to be infected or not to have the correct documentation is destroyed. In carrying out these duties, the Inspectorate may call on help from Customs, port health authorities and port operators.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what advice she has issued for *(a)* gardeners and *(b)* foresters to prevent the spread of sudden oak death. [149237]

Mr. Bradshaw: Both Defra and the Forestry Commission have published posters and placed information on their websites covering the horticultural and forestry sectors respectively.

Disease management measures are currently focused on nursery and garden centres to ensure that gardeners and other customers can be confident that they are purchasing disease-free plants. There is, as yet, no evidence that the disease is present on any trees in forests but a survey of 1000 woodland sites is currently underway and we hope, by April, to have a better understanding of the status of the disease in the wider environment. This work will enable us to ensure that appropriate advice is made available to foresters. In addition, the Forestry Commission is advising those engaged in routine forestry operations to take basic hygiene precautions to minimise the possibility of accidentally spreading diseases such as "P. ramorum".

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of *(a)* trees and *(b)* plants recover from infection with sudden oak death; and which species are most likely to recover. [149238]

Mr. Bradshaw: There is at present no evidence, from the UK or anywhere else, to indicate that any plants or trees infected by Phytophthora ramorum might recover. It is for this reason that the current measures require all infected material to be destroyed, either by burning or deep burial. Symptoms of "Phytophthora ramorum" can affect both leaves and stems. In some plants only leaves are affected and in these cases it is possible that plants could recover following the removal of affected leaves. Methods of eradicating infection from specimen plants and of protecting new growth from reinfection are being investigated as part of Defra and the Forestry Commission's programme of research into this disease.

Sporulation of the fungus on certain shrubs which are themselves relatively unaffected, showing only minor symptoms, is believed to have played a key role in the epidemiology of the disease in California.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) whether she has consulted the national authorities of other countries on the treatment of sudden oak death; and if she will make a statement; [149239]

(2) what information she has received from other countries about the treatment of sudden oak death. [149253]

Mr. Bradshaw: There is regular dialogue between plant health authorities in the UK and those in other countries affected by or at risk from "Phytophthora ramorum". It was as a result of this collaboration that the link was first made, even before the pathogen was identified, between the death of trees in California and symptoms seen on rhododendrons on the continent.

Exchange of information on Phytophthora ramorum takes place between officials and scientists in EU Member States on a regular basis, particularly within the framework of the Standing Committee on Plant Health. It was as a result of discussion in this forum that EU-wide emergency measures against the introduction and spread of "Phytophthora ramorum" were introduced in November 2002. They were reviewed by the Standing Committee on 11 December last year and it was agreed that they should continue. An EU funded research project on Phytophthora ramorum started this month and a second project is due to start in April. Both are being co-ordinated by UK scientists and involve consortia with members from 6 to 21 countries.

We have also had regular discussions with officials and scientists in the United States. A US delegation visited in November 2003 and a conference is being organised in the USA in March at which scientists and regulators from a number of countries, including the UK, will discuss developments in research and management of the disease.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will publish the results of research that her Department has commissioned into sudden oak death; what other research into sudden oak death her Department has assessed; and what research projects commissioned by her Department are on-going. [149248]

Mr. Bradshaw: The results of research conducted on this disease will be published over time. However some preliminary results are already available on the Defra website http://www.defra.gov.uk/planth/phnews/csl.htm. The Forestry Commission are conducting complementary research as part of the same overall programme.

As this is a relatively new disease the research commissioned in the UK following its discovery in October 2001 is still on-going. Within Europe, the majority of research is UK based. Germany and the Netherlands are also investigating aspects of the disease. Defra and Forestry Commission have good links with scientists in these countries and also with scientists in the USA facilitating a regular exchange of scientific information. As the pathotypes of the disease, the host plant species and the environmental conditions differ between the UK and the USA results may not be directly applicable and therefore must be considered carefully.

Defra are currently funding four research projects titled:

1. Comparison of "Phytophthora" ramorum populations from Europe and USA in support of pest risk assessment, management and policy.

2. Non-tree host range and diagnosis of "Phytophthora ramorum" in support of pest risk assessment, management and policy.

3. "Phytophthora ramorum" epidemiology: sporulation potential, dispersal, infection and survival.

4. Epidemiology of natural outbreaks of "Phytophthora ramorum".

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what treatments are available for sudden oak death. [149250]

Mr. Bradshaw: The only known method of eliminating "Phytophthora ramorum" is the removal and destruction of infected plant material. Currently approved fungicides have a suppressive effect, which masks symptoms rather than eradicating the pathogen from infected plants. However, research at Defra's Central Science Laboratory, funded by the Horticulture Development Council, is looking at a range of substances to evaluate their effectiveness in eradicating infection and preventing reoccurrence.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what organisations in the UK she has consulted on the treatment of sudden oak death; and if she will make a statement. [149251]

Mr. Bradshaw: The Department is in regular contact with the Royal Horticultural Society, the Horticultural Trades Association and the National Farmers Union about developments in the treatment of "Phytophthora ramorum".

Moreover, on 13 October, the Department hosted a meeting on "Phytophthora ramorum" at the Central Science Laboratory in York which was attended by over 65 people representing a range of interested organisations.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) which species are vulnerable to sudden oak death; [149252]

(2) what plant types are most susceptible to sudden oak death. [149261]

Mr. Bradshaw: The information requested is as follows.

Species found to be naturally infected with "Phytophthora ramorum" in America or Europe

Host	*Common name*	*Family*
Ornamentals		
Arbutus menziesii	Madrone	Ericaceae
Arbutus unedo	Strawberry tree	Ericaceae
Arctostaphylos manzanita	Manzanita	Ericaceae
Camellia spp.	Camellia	Ericaceae
Hamamelis virginiana	Virginian witch hazel	Hamamelidaceae
Heteromeles arbutifolia	Toyon	Rosaceae
Kalmia latifolia.	Mountain laurel	Ericaceae
Leucothoe spp.	Leucothoe	Ericaceae
Lonicera hispidula	California honeysuckle	Caprifoliaceae
Pieris spp.	Pieris	Ericaceae

Species found to be naturally infected with "Phytophthora ramorum" in America or Europe

Host	*Common name*	*Family*
Pittosporum undulatum[1]	Victorian box	Pittosporaceae
Rhamnus californicus	Californian coffeeberry	Rhamnaceae
Rhamnus purshianus[1]	Cascara	Rhamnaceae
Rhododendron	Rhododendron	Ericaceae
Rubus spectabilis[1]	Salmonberry	Rosaceae
Syringa vulgaris	Lilac	Oleaceae
Toxicodendron diversilobum[1]	Poison oak	Anacardiaceae
Trientalis latifolia	Western star flower	Primulaceae
Umbellularia californica	Californian bay laurel	Lauraceae
Vaccinium ovatum	Californian huckleberry	Ericaceae
Vaccinium vitis-idaea	Cowberry	Ericaceae
Viburnum spp.	Viburnum	Caprifoliaceae
Trees		
Abies grandis[1]	Grand fir	Pinaceae
Acer macrophyllum	Big leaf maple	Aceraceae
Aesculus californica	Californian buckeye	Hippocastanaceae
Aesculus hippocastanum	Horse chestnut	Hippocastanaceae
Castanea sativa	Sweet chestnut	Fagaceae
Corylus cornuta[1]	Californian hazelnut	Betulaceae
Fagus sylvatica	Beech	Fagaceae
Lithocarpus densiflorus	Tan Oak	Fagaceae
Pseudotsuga menziesii	Douglas fir	Pinaceae
Quercus agrifolia	Coast live oak	Fagaceae
Quercus cerris	Turkey oak	Fagaceae
Quercus chrysolepsis	Canyon live oak	Fagaceae
Quercus falcata	Southern red oak	Fagaceae
Quercus ilex	Holm oak	Fagaceae
Quercus kellogii	Californian black oak	Fagaceae
Quercus parvula var. shrevei	Shreve's oak	Fagaceae
Quercus rubra	Red oak	Fagaceae
Taxus baccata	Yew	Taxaceae
Sequoia sempervirens	Coast redwood	Taxodiaceae

[1] Hosts from which the pathogen has been cultured and/or detected by DNA tests, but pathogenicity not confirmed by laboratory.

Plants most likely to be potential hosts based on previous results of laboratory inoculation tests

Plant species	*Common name*	*Family*
Ornamentals or wild shrubs		
Arctostaphylos uva-ursi	Bearberry	Ericaceae
Eucalyptus	Eucalyptus	Myrtaceae
Fuchsia spp.	Fuchsia	Onagraceae
Gaultheria spp.	—	Ericaceae
Lonicera spp.	Honeysuckle	Caprifoliaceae
Olea europea	Olive	Oleaceae
Photinia arbutifolia	—	Rosaceae
Prunus spp.	Nectarine; cherry; Portuguese and cherry laurel	Rosaceae
Ribes sanguineum	Current	Grossulariaceae
Rosa canina	Dog rose	Rosaceae
Sambucus spp.	e.g. elder	Caprifoliaceae
Symphoricarpus albus	Snowberry	Caprifoliaceae
Vaccinium myrtillus	Bilberry	Ericaceae
Vaccinium x intermedium	Bilberry-cowberry hybrid	Ericaceae
Trees [1]		
Abies procera	Noble fir	Pinaceae
Acer spp.	Maple/sycamore	Aceraceae
Carpinus	Hornbeam	Betulaceae
Chamaecyparis lawsoniana	Lawson's cypress	Cupressaceae
Fraxinus excelsior	Ash	Oleaceae
Malus sylvestris	Crab apple	Rosaceae
Picea sitchensis	Sitka spruce	Pinaceae
Picea abies	Norway spruce	Pinaceae
Quercus spp.	Oaks	Fagaceae
Tilia cordata	Small-leaved lime	Tiliaceae
Tsuga heterophylla	Western hemlock	Pinaceae
Ulmus glabra	Wych elm	Ulmaceae

[1] Based on either sapling or mature log tests, and/or leaf tests. Tests may have been done using wound inoculation and may not predict natural susceptibility of unwounded tissue. Sapling susceptibility does not necessarily predict mature tree susceptibility. (NB. The table is not completely comprehensive, but includes only those considered to have most potential for natural susceptibility)

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department's budget is for the prevention of the spread of sudden oak death in 2003–04. [149254]

Mr. Bradshaw: Defra's 75 Plant Health and Seeds Inspectors are already employed for around 20 per cent. of their time on inspection and surveillance duties related to Phytophthora ramorum, known in the USA as sudden oak death. Therefore, although there is no specific budget allocation, this amounts to an expenditure of approximately £1.8 million in 2003–2004.

In response to the growing number of findings of this pathogen in England and Wales, Defra is redeploying around 20 additional staff to assist the Inspectorate in undertaking extra inspections at production nurseries, wild planting areas and ports of entry. They will be supplemented by the recruitment of six additional full time Inspectors for 2004–05. This is part of a package of measures announced on 4 December.

The Forestry Commission has diverted existing resources into a survey of woodlands thought to be at the highest risk of infection. This will cost in the region of £45,000.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many individual sites have reported incidents of sudden oak death in the recent outbreak. [149255]

Mr. Bradshaw: Although P. ramorum is a 'notifiable disease', it is difficult to identify visually, and symptoms are similar to those caused by other organisms. We do not rely on reports in order to locate outbreaks. Defra's Plant Health and Seeds Inspectors are carrying out inspections of all known nurseries and garden centres which trade in susceptible plants. They are also surveying other areas where susceptible plants are established (e.g. rhododendrons in historic gardens), and co-ordinating with the Forestry Commission inspectors who are surveying woodlands. Since the first finding was confirmed in April 2002, outbreaks at individual sites in England and Wales have now reached 302.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many cases of sudden oak death have been reported in each of the last five years. [149256]

Mr. Bradshaw: Phytophthora ramorum was first described as a new species in October 2001 and the first outbreak in the UK was not confirmed until April 2002. 130 cases of infection were confirmed in 2002 and 171 in 2003.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether she intends to increase the amount of money spent by her Department on research into sudden oak death. [149257]

Mr. Bradshaw: During this financial year additional money was allocated to the budget responsible for funding research on Phytophthora ramorum. The budget for the coming year has also been increased. The need for research on different plant health risks is regularly reviewed and any issues of redeployment of effort or funding addressed as necessary.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs in which soil types sudden oak death has been found to flourish. [149258]

Mr. Bradshaw: From limited findings on plants growing in soil in the UK (as opposed to container grown nursery stock), it is hard to draw any firm conclusions. Many of the most susceptible host plants of Phytophthora ramorum are members of the Ericaceae family which are known to prefer acid soil.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how much money has been spent by her Department on research into sudden oak death. [149259]

Mr. Bradshaw: To date Defra has commissioned research projects to a total value of £391k.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the risk to *(a)* nurseries, *(b)* gardens and *(c)* the countryside from sudden oak death. [149262]

Mr. Bradshaw: A Pest Risk Analysis (PRA) for the organism causing sudden oak death in California was first conducted in the UK by Forest Research in September 2000.

In November 2001 the causal organism was described as a new species, Phytophthora ramorum. Since that time research has been commissioned both in the UK and in the USA, the results of which are being used to develop the PRA, along with field observations from the UK, Europe and the USA.

The PRA has assessed the risks posed to naturally and experimentally susceptible plant species, including those raised on nurseries, grown in gardens and occurring naturally in the countryside.

The assessment is updated as scientific knowledge about this disease increases. Copies of the risk assessment were placed in the Library of the House on 13 February 2003 and updates have since been placed on the Defra website at http://www.defra.gov.uk/planth/pra.htm.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* of her Department's staff and *(b)* sub-contractors employed by her Department are researching sudden oak death. [149264]

Mr. Bradshaw: The Department has commissioned several research projects into the disease at the Central Science Laboratory (an executive agency of Defra), Forest Research (an agency of the Forestry Commission) and ADAS Consulting. In total there are approximately 22 staff working on these research projects. Around 20 per cent. of the work of the Plant Health and Seeds Inspectorate is currently spent on surveys aiming to determine the distribution of the pathogen and take action against it. This represents the equivalent of approximately 20 staff. A further twelve staff have been transferred from elsewhere in the Department to assist with the surveys.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what measures she has taken to encourage research into the *(a)* effect and *(b)* spread of sudden oak death. [149265]

Mr. Bradshaw: Since June 2002 the Department has commissioned research to the value of about £391k to investigate aspects of the biology of the disease including its effect and means of transmission between plants. The research programme is co-ordinated with, other research funded by the Forestry Commission and the Horticultural Development Council in order to maximise the scientific information obtained about this disease. Approximately 20 per cent. of the work of Defra's Plant Health and Seeds Inspectorate over the last year has been directed at surveillance for this pathogen.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether her Department operates a compensation scheme for those affected by sudden oak death. [149266]

Mr. Bradshaw: Plant disease campaigns over many years have not incorporated compensation for the destruction of affected plants. The one exception was the campaign against beet rhizomania disease from 1987 to 2001 when compensation was paid from an industry funded scheme. Our judgment is that the limited resources of the plant health service are better deployed in detecting and identifying outbreaks, and in carrying out research on risks and risk management measures. We have recently received an approach from industry organisations wishing to discuss possible risk-sharing mechanisms to avoid disproportionate losses to individual enterprises when action has to be taken against plant pests or diseases. We welcome this opportunity to explore the available options.

INTERNATIONAL DEVELOPMENT

Adam Smith Institute

Mr. Carmichael: To ask the Secretary of State for International Development what work his Department has commissioned from the Adam Smith Institute in the last five years; and how much each of these projects cost. [146938]

Hilary Benn: Pursuant to the response given to the hon. Member for Orkney and Shetlands on 12 January 2004, *Official Report*, column 518W which gave the figures for the original value of contracts awarded to Adam Smith International Ltd. The following table sets out the current value of these contracts, made up of the original value plus any increases or extensions since. All contracts with Adam Smith International Ltd. have been awarded and managed in line with DFID's standard procurement procedures.

	Project title	*Current value (£) (original contract value plus cost of any increases or extensions)*	*Country*
1999	PR Unit Support for Parastatal Sector Reform Commission (PSRC)	430,625	Tanzania
1999	Privatisation Project Phase 3 and 4 Managing Consultant	1,718,736	Guyana
1999	Privatisation Agency Support Project Consultancy	560,752	Zimbabwe
1999	Technical Assistance for Public Enterprise Reform in Orissa	3,667,571	India
1999	Assistance to the Palestinian Negotiations Affairs Department	9,131,555	West Bank and Gaza
1999	Additional Support to the Privatisation Board	106,241	Bangladesh
1999	UK-Ireland Privatisation and Regulation Study Tour	11,145	Tanzania
1999	Medium Term Programme of Capacity Building for PURC	1,559,960	Ghana
1999	Initital Support to the Budgetary Processes of the Government of Macedonia	44,315	Macedonia
2000	Rehabilitation of Cyclone Damaged Lift Irrigation Points in Orissa	1,296,327	India
2000	Seminar on Export Credits and Developing Countries	102,594	United Kingdom
2000	Lead Adviser to Parastatal Sector Reform Commission (PSCR)	229,966	Tanzania
2000	Russia Trade Policy Project	1,199,986	Russia
2001	Conference on Disinvestment	70,000	India
2001	Support for Public Sector Undertaking Reforms & Social Safety Net in Madhya Pradesh	80,000	India
2001	PSCR: Water Privatisation and Regulation Study Tour	54,924	Tanzania
2001	Communications Film for Department of Disinvestment	89,500	India
2001	Consultants for Standards, Technical Regulatory Barriers Programme	92,870	Global (non project specific)
2002	Trade Training for DFID Staff	20,075	United Kingdom
2002	Pilot Training and Capacity Building in International Watercourse Law	151,008	Kyrgyz Republic
2002	Trade Training for DFID Staff—Bangkok	32,328	United Kingdom
2002	Support for Capacity-building in the Ministry of Finance and Central Bank	3,277,815	Afghanistan
2003	Support Services for Public Enterprise Restructuring in South Africa	6,363,435	South Africa, Republic of
2003	Support to Water Sector Regulation by PURC—Ghana	1,079,100	Ghana
2003	Andhra Pradesh Economic Restructuring Programme—Public Enterprise Reforms, Phase II	416,435	India
2003	Economic Support within 1st Military Division HQ Basra.	55,510	Iraq
2003	Economic Development within 1st Military Division HQ Basra.	119,848	Iraq
2003	Support to the Office of the Prime Minister and to the Cabinet Office.	100,400	West Bank and Gaza
2003	ITD—DFID Staff Training	288,685	Global (non project specific)
2003	Asia Trade Consultancy	44,200	United Kingdom
2003	International Lawyer within 1st Military Division HQ Basra.	131,868	Iraq
2003	Economic Support to Coalition Provisional Authority South (CPAS)	111,255	Iraq
2003	Secondment of Negotiations Support Staff to the Office of Prime Minister.	75,800	West Bank and Gaza
	Legal Adviser within Coalition Provisional Authority South (CPAS)	72,925	Iraq

Note:
DFID contracts have been subject to untied international competition since 2001, using the EU Public Procurement Regulations.

Mr. Carmichael: To ask the Secretary of State for International Development pursuant to his answer of 12 January 2004, *Official Report*, column 518W, on the Adam Smith Institute, how much his Department has spent on work undertaken by the Adam Smith Institute in each of the last 10 years. [148671]

Hilary Benn: Information on payments is only available for the last six years. Payments to Adam Smith International Ltd. were as follows:

Adam Smith International Ltd.

	£
1998	1,547,082.92
1999	3,494,546.98
2000	5,450,964.35
2001	9,612,801.56
2002	7,050,473.82
2003	7,289,363.19

The above does not include payment data for any lower value locally let contracts. This information is not held centrally and could be provided only at disproportionate cost.

Mr. Challen: To ask the Secretary of State for International Development what outcomes have been monitored arising from contracted services provided to his Department by the Adam Smith Institute and its subsidiaries. [146959]

Hilary Benn: All DFID projects are monitored to ensure contracted services make the intended contribution to project outcomes. We have not made special arrangements for consultancy advice from Adam Smith International Ltd.

Advertising and Information

Brian Cotter: To ask the Secretary of State for International Development how much *(a)* his Department and *(b)* each agency and non-departmental public body sponsored by his Department has spent on (i) advertising and (ii) information campaigns in each year from 1995–96 to 2003–04 (estimated); and if he will make a statement. [149621]

Hilary Benn: Our expenditure on Publicity, which forms a part of our effort to raise development awareness and understanding of international development issues in the UK, has been as follows:

Year	*£*
1995–96	568,775
1996–97	579,916
1999–99	399,755
1999–2000	674,531
2000–01	1,484,281
2001–02	1,286,053
2002–03	[1]1,300,000
2003–04	[2]850,000

[1] Estimate
[2] Provisional forecast figure

We do not hold a separate advertising budget, The majority of advertising relates to recruitment advertising in newspapers and journals. Figures for the four calendar years are as follows:

Year	*Number*
2000	751,972
2001	1,208,191
2002	914,571
2003	871,246

Afghanistan

Joan Ruddock: To ask the Secretary of State for International Development how many refugees have returned to Afghanistan from refugee camps in *(a)* Iran and *(b)* Pakistan; and how many remain. [150648]

Hilary Benn: At the beginning of the United Nations High Commissioner for Refugees (UNHCR's) repatriation programme in April 2002, UNHCR's estimate of the Afghan refugee caseload in Iran was 1.5 million. Since then, over 500,000 people have returned to Afghanistan. Only five per cent. of these are believed to have originated in camps.

In Pakistan, the refugee caseload was estimated at 3.5 million in March 2002. Over 1.5 million were repatriated in 2002 and over 300,000 returned in 2003. The bulk of returnees so far, has consisted of refugees living in urban areas rather than camps. The 1.5 million remaining in Pakistan almost all live in camps.

Joan Ruddock: To ask the Secretary of State for International Development how many Afghans in refugee camps belong to women-headed households. [150649]

Hilary Benn: The United Nations Office of the High Commissioner for Refugees (UNHCR) as yet have no specific figures for the number of Afghans in refugee camps belonging to women-headed households. The most detailed information they can currently offer is that approximately 50 to 60 per cent. of refugees in camps in Pakistan are women and that five to 10 per cent. of these are of adult age. In Iran, only five per cent. of refugees live in camps, and of these, only 38 per cent. are women.

UNHCR, however, anticipate that more detailed information will become available over the next year. Elections in Afghanistan are planned for June 2004 and UNHCR is currently discussing ways to carry out voter registration for Afghan refugees with the Government of Pakistan and the UN Assistance Mission in Afghanistan (UNAMA). This should start to shed more light on the make-up of the refugee population. UNHCR also has plans for a separate census, which the Government of Pakistan have asked them to carry out in order to get a better picture of the remaining refugee caseload in Pakistan. It is expected that this will be carried out after voter registration of refugees to avoid confusion. UNHCR believes this will provide an insight, among other things, into the number of women-headed households and their dependents.

Civil Servants

Dr. Cable: To ask the Secretary of State for International Development how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150285]

Mr. Gareth Thomas: DFID occupies two offices in Central London, at 1 Palace street, SW1 and 20 Victoria street SW1. The sizes of these are 15,910 sq m and 1,178 sq m respectively. We have no other offices in Central London.

Democratic Republic of the Congo

Dr. Tonge: To ask the Secretary of State for International Development what recent discussions he has had with the Rwandan Government concerning military activity in the Democratic Republic of the Congo. [149824]

Mr. Mullin: I have been asked to reply.

We discuss regularly with the Government of Rwanda the situation in the Democratic Republic of the Congo (DRC). Since the withdrawal of the Rwandan Defence Force (RDF) from the DRC in October 2002 we have received several unconfirmed reports from a variety of sources about the continued presence of RDF personnel in eastern DRC. The UN Mission in the DRC (MONUC) has investigated these reports but has found no evidence to substantiate them. The Rwandan government, with whom we have raised these allegations, have denied they have forces in the DRC.

Mr. Bercow: To ask the Secretary of State for International Development what recent assessment he has made of the number of internally displaced people in the Democratic Republic of the Congo, broken down by region. [149974]

Hilary Benn: The most recent statistical data available from the Relief Web, puts the number of internally displaced persons (IDPs) in the Democratic Republic of the Congo (DRC) at over three million. These IDPs are mainly in eastern DRC.

The breakdown by numbers is as follows:

Democratic Republic of Congo	*Number*
Kinshasa	41,000
Equateur Province	168,000
Kasai Occidental	72,500
Kasai Oriental	72,500
Katanga Province	412,000
Maniema	234,000
North Kivu	1,209,000
South Kivu	413,700
Orientale	791,000

Departmental Funding

Mr. Bercow: To ask the Secretary of State for International Development if he will list the organisations funded by his Department in each of the last three years which have received *(a)* less than £1 million, *(b)* less than £750,000, *(c)* less than £500,000, *(d)* less than £250,000 and *(e)* less than £100,000. [148548]

Hilary Benn: This information is not readily available in respect of every type of organisation and could be obtained only at disproportionate cost. However, the funding DFID has provided to UK based civil society organisations within each of the financial thresholds over the last three financial years has been placed in the Library in a document entitled "Funding to UK Civil Society Organisations—Written Parliamentary Question 148548".

EU Aid Projects

Mr. Bercow: To ask the Secretary of State for International Development if he will list current EU aid projects. [149980]

Mr. Gareth Thomas: A breakdown of European Commission official development assistance in 2002 by country/region and sector, and details of individual project commitments can be found in the "Annual Report 2003 from the Commission to the Council and the European Parliament on the EC Development Policy and the Implementation of External Assistance in 2002"; a copy of which is in the Library of the House. Copies of the EC's Country and Regional Strategy Papers can be obtained from its website (www.europa.eu.int).

Mr. Bercow: To ask the Secretary of State for International Development how many staff in his Department devote a proportion of their working time to involvement in EU aid projects, broken down by grade. [149981]

Mr. Gareth Thomas: DFID's European Union department currently has a complement of 15 staff, headed by a Senior Civil Service Grade 5, and including four middle management grades and 10 junior management and administrative officers.

In addition, staff across the range of departments within DFID are engaged on work related to the EC's development assistance programmes. It is not possible to provide a breakdown by grade.

Global Fund

Mr. Bercow: To ask the Secretary of State for International Development if he will make a statement on the study by the London School of Hygiene and Tropical Medicine of the performance of the Global Health Fund. [148644]

Hilary Benn: As a board member of the Global Fund, we want to see that it clearly demonstrates its effectiveness as an instrument to tackle these three terrible diseases.

The London School of Hygiene and Tropical Medicine's (LSHTM) study showed that there is commitment to achieving the goals of the Global Fund and that it has had a positive effect in attracting new partners to the Fund. It also highlights the need for improved communication between countries and the Global Fund, and the Country Coordination Mechanisms. It shows the need for harmonisation of funding flows, a good financial management system and planning process and alignment of Global Fund activities with countries' own systems and processes. We are working closely with the Global Fund on all these issues.

DFID supports the role of independent evaluators and their contribution to improving performance through sound analysis. We recognise that such evaluations should be forward looking and form part of the Global Fund's overall monitoring and evaluation strategy.

HIV/AIDS

Mr. Woodward: To ask the Secretary of State for International Development what support he provides to programmes in the Great Lakes region of Africa that educate HIV-positive men about treatment for their condition. [149911]

Hilary Benn: DFID is supporting work on HIV in Rwanda, Burundi and the DRC. Our support to Burundi and Rwanda through the International Partnership against AIDS in Africa (IPAA), totalling £4.15 million for Burundi and £2.95 million for Rwanda over a three-year period, includes support for the education of HIV-positive men.

In the DRC, we have been supporting projects run by Médecins sans Frontières and Population Services International (PSI), which also cover the education of HIV-positive men. We plan to further increase our support to the fight against HIV/AIDS as an identified priority in DFID's recently published Country Engagement Plan for the DRC.

Dr. Tonge: To ask the Secretary of State for International Development what discussions he has had with *(a)* non-governmental organisations and *(b)* the UN concerning provision for AIDS orphans in Africa. [149819]

Hilary Benn: Meeting the needs of the growing number of orphans and vulnerable children in Africa is a challenge that the Department for International Development is determined to address effectively. DFID is continuing its work and discussions with the United Nations Joint Programme for HIV/AIDS (UNAIDS) and the United Nations Children's Fund (UNICEF) who are co-ordinating other development agencies and NGOs to develop: treatment programmes to prolong the lives of parents; free access to education and enhanced support to the families and communities caring for orphans and vulnerable children.

DFID is working with NGOs in a number of countries. In Zimbabwe, DFID is providing support for orphans and vulnerable children and child headed households through its NGO feeding programme. In addition, a bilateral programme with the Zimbabwe Red Cross and John Snow International is providing food to households affected by AIDS (including child-headed households) and some orphanages. We are also starting work with a faith-based organisation in South Africa (the Church of the Province of Southern Africa) to reduce stigma, improve home-based care and care for orphans and vulnerable children.

The launch of the UK's "Call for Action on HIV/AIDS" (On World Aids Day 1 December 2003) marked the first step in the intensification of this Government's efforts to tackle HIV/AIDS. On World Aids Day I hosted a meeting with NGO's on the UK's "Call for Action" and a new UK Strategy for HIV/AIDS. The issue of how to respond to the growing number of orphans and children made vulnerable by AIDS was raised during this meeting. We will be consulting further with NGOs on this important issue as part of our consultation process for the UK Strategy planned for publication in July 2004.

Dr. Tonge: To ask the Secretary of State for International Development what plans he has for ensuring the adequacy of healthcare systems in countries likely to *(a)* obtain and *(b)* use antiretroviral drugs for treatment of AIDS. [149858]

Mr. Gareth Thomas: DFID is committed to increasing access to treatment as part of a comprehensive response to HIV/AIDS, and welcomes the WHO/UNAIDS target to get three million people on treatment by 2005. The UK will provide £12.5 million to the World Health Organisation in 2003–04 to support its work, including '3 by 5'. We have supported WHO to make the strengthening of health services a key part of their strategy to reach the '3 by 5' target. As treatment programmes are expanded it will be essential to invest in health systems in order to ensure that services for HIV, including voluntary counselling and testing and the provision of treatment, and other health services, are of good quality and accessible by poor communities and particularly women. This includes better co-ordination of public, private and NGO treatment initiatives. We also support community involvement in health service delivery as a well-informed civil society has been shown to be essential in the sustainability of comprehensive health systems.

DFID has provided £1.5 billion since 1997 to the strengthening of health systems in developing countries and we see this as an essential element of the response to the HIV/AIDS epidemic. We are working with partners to build sound healthcare systems as the cornerstone of efforts to accelerate progress to achieve the Millennium Development Goals; to improve maternal and child health and reduce the impact of HIV and other major communicable diseases. The UK was a prime mover in setting up the High Level Forum on Health MDGs, which was held in Geneva in January 2004 and at which developing and donor countries discussed concrete actions to increase health service capacity to meet international development goals. DFID also supports the integration of HIV/AIDS into wider health sector policies and national poverty reduction strategies.

Infant Mortality

Mr. Bercow: To ask the Secretary of State for International Development what the result has been of the support provided by his Department to the Africa Regional Office of the World Health Organisation for malaria and childhood illness activities. [148554]

Hilary Benn: DFID has agreed an £18 million, six-year project of support to WHO Africa Regional Office in 2002 and it is now at the early stages of implementation. We reviewed progress in 2003 and felt that that the project was well on track. All the countries supported under the project having developed Roll Back Malaria (RBM) and Integrated Management of Childhood Illness (IMCI) plans.

Countries supported under the project have been able to use their malaria control plans to make applications to the Global Fund for AIDS, TB and Malaria (GFATM). The plans have helped GFATM approve and release significant malaria grants for six countries in the region. WHO has established an inter-country team for the region, which has responded to a number of emergencies such as flood assessments in Malawi and Mozambique. At the same time it has helped to develop country capacity through training and strengthening health systems.

The IMCI strategy is being implemented in most countries of the region and seven are now implementing it in more than 50 per cent. of their districts. There have been major achievements in improving health worker skills, demonstrated through Health Facility Surveys and Multi-Country Evaluations. Attention will now be focused upon strengthening some of the health systems issues in the delivery of IMCI.

Finally, the WHO's Regional Office for Africa (AFRO) itself has used the project to increase its institutional capacity and has recruited additional staff to work on both RBM and IMCI.

Mr. Bercow: To ask the Secretary of State for International Development what the involvement of his Department has been in international forums which form strategies to reduce child mortality, with particular reference to *(a)* the Child Survival Working Group and *(b)* the Saving Newborn Lives Initiative. [148555]

Hilary Benn: It is generally accepted that a significant improvement will be needed if, the MDG target to reduce under five mortality rates by two thirds by 2015 is to be achieved globally. Challenges include: the HIV/AIDS epidemic; economic decline and persistent poverty; inequality; under-resourced and poorly functioning health systems; and lack of progress in reducing the number of deaths of newborn babies.

In addition to country-level work, the Department for International Development makes significant contributions to UNFPA, UNICEF, the World Bank, the World Health Organisation and other international and national civil society groups to support their efforts to improve both maternal and child health. We contribute to global initiatives such as the Global Fund to Fight HIV/AIDS, TB and Malaria, the Global Alliance for Vaccines and Immunization and Roll Back Malaria, which have helped revitalise interest in childhood diseases and substantially increased the resources directed to child health. We support implementation of the Integrated Management of Childhood Illness Initiative with partners from the United Nations International Children's Fund, the World Health Organisation, the World Bank and the United States Agency for International Development. This initiative is building the quality and quantity of child health care within countries. The UK is also part of the recently inaugurated High Level Forum on Health which plans to address challenges to achieving the health related Millennium Development Goals.

A Child Survival Partnership (formerly Working Group) is being proposed by a number of international agencies which will bring together national governments, international organisations, donors and civil society

"to galvanise action at the global and national level aimed at revitalizing efforts to reach the under five mortality MDG target".

The specific activities that the partnership will undertake have not yet been defined, although they are likely to include advocacy for increased resources to be devoted to child survival, and work to scale up cost-effective child survival interventions at country level. DFID has been asked to contribute to thinking on the partnerships structure and objectives. As with any new initiative, over time we will judge the level of our involvement on its ability to deliver on its objectives and contribution to meeting the MDG targets.

We have been working with the Saving Newborn Lives Initiative (a Save the Children US Gates Foundation funded project) and the World Health Organisation to develop a Framework for Neonatal Health, which will provide a series of practical and flexible tools to enable policy makers to develop coherent and integrated strategies to reduce newborn deaths.

DFID is also represented on the steering committee of the Partnership for Safe Motherhood and Newborn Health together with the World Bank, the WHO, UNICEF, UNFPA, and other organisations.

Iraq

Tom Brake: To ask the Secretary of State for International Development what the Department's role is in the allocation of Coalition Provisional Authority funds. [149035]

Hilary Benn: The Head of DFID's office in Baghdad is the UK voting member of the Programme Review Board, which approves Coalition Provisional Authority (CPA) plans for expenditure from the Development Fund for Iraq. DFID secondees to the CPA also have a role, alongside US and other Coalition partners, in drawing up CPA expenditure plans. The US Government decide on the allocation of their own funding provided through the CPA.

Mr. Bercow: To ask the Secretary of State for International Development how many recent meetings officials from his Department have had with local Iraqi non-governmental organisations; and what the results of those meetings have been. [149982]

Hilary Benn: On average five to 10 Iraqi non-governmental organisations (NGOs) visit the DFID office in Baghdad each week (most NGOs prefer not to meet on their own premises). DFID has also sponsored several meetings, particularly on women's political participation and human rights, involving several hundred attendees, many of whom are from small Iraqi NGOs.

The issues raised by the NGOs range widely. One frequent topic is how best DFID and the coalition as a whole can support the development of Iraqi civil society. These discussions inform the development of DFID's strategy and our approach to funding. But many of the NGOs are embryonic and are simply seeking guidance on how to establish themselves properly. We are working with the Ministry of Planning and Development Cooperation and the Coalition Provisional Authority on a registration scheme for all NGOs in Iraq.

Mr. Bercow: To ask the Secretary of State for International Development what estimate he has made of the number of humanitarian aid stockpiles in Iraq that have been *(a)* destroyed and *(b)* stolen since April 2003. [149983]

Hilary Benn: DFID is not aware of any DFID-funded NGO or UN humanitarian aid stockpiles being destroyed or stolen since April 2003. However, some of our regular partners have had problems with other stockpiles. A warehouse of International Federation of Red Cross/Red Crescent Society goods funded by ECHO (and therefore 19 per cent. DFID-funded) was looted in April. The total stock was valued at approximately £280,000. An ICRC warehouse also suffered from looting during this period resulting in the loss of approximately £65,000 worth of stock as well as some vehicles being damaged or stolen.

In addition, there were small losses of some perishable foodstuffs and medicines under the UN Oil For Food programme, due to delays in transporting goods during and immediately after the conflict.

Mr. Bercow: To ask the Secretary of State for International Development how much money his Department has provided to the office of the United

Nations High Commissioner for Refugees since the start of the conflict with Iraq to assist with its work in Iraq and neighbouring countries. [149984]

Hilary Benn: DFID provided £1.75 million to the United Nations High Commission for Refugees (UNHCR) to support its work in Iraq and neighbouring countries in preparedness for the conflict. No further funding has been provided to UNHCR since the conflict.

Mr. Bercow: To ask the Secretary of State for International Development (1) what progress has been made with the plan of the UN High Commissioner for Refugees to assist the return of up to half a million Iraqi refugees; [149999]

(2) what progress has been made with plans to assist those displaced before the conflict in Iraq to return home. [150000]

Hilary Benn: Since the end of the conflict, United Nation High Commissioner for Refugees (UNHCR) has facilitated the return of relatively small numbers of Iraqi refugees. These include the voluntary return of over 4,000 Iraqi refugees who spent more than 12 years in the Rafha refugee camp in Saudi Arabia, and some 800 refugees from Iran.

UNHCR is not encouraging returns to Iraq because of insecurity in parts of the country, a lack of humanitarian access, and economic conditions that cannot support mass returns. However, UNHCR is supporting, where it can, the repatriation of people who actively seek to go back regardless of conditions inside the country. It appears that increasing numbers of refugees in neighbouring countries, particularly Iran, are choosing to return to Iraq without support.

Once conditions in Iraq improve, UNHCR plans to step up its work with the Iraqi authorities, the CPA, and governments in countries of asylum, as well as other United Nations agencies and NGO partners, to support the return of Iraqi refugees and internally displaced persons (IDPs). UNHCR has launched pilot projects for the return and reintegration of refugees and IDPs in the northern governorates of Erbil and Dohuk. These projects aim to provide shelter kits to returnee families and to upgrade water supplies for returnees and host communities.

An Iraqi Property Claims Commission is being set up to help resolve the claims of returnees whose property was confiscated under previous regimes. A new Ministry of Displacement and Migration has been established to manage issues relating to Iraqi refugees and displaced people.

Further information on UNHCR's work can be found at: http://www.unhcr.ch/welcome.htm

Mr. Bercow: To ask the Secretary of State for International Development if he will list the drugs of which there is a shortage in Iraq; and what conditions they are intended to treat. [150002]

Hilary Benn: The Iraqi Ministry of Health, the Coalition Provisional Authority and the World Health Organisation are working together on a comprehensive assessment of shortages of drugs, other medical supplies and equipment. This is expected to be complete by March.

Maternal Mortality

Mr. Bercow: To ask the Secretary of State for International Development what action his Department has taken to improve *(a)* coverage of skilled care at delivery and *(b)* the use of emergency obstetric care to reduce maternal mortality in sub-Saharan Africa. [148512]

Hilary Benn: The Millennium Development Goals are central to the Department for International Development's work, including the goal to improve maternal health, and its associated target of reducing maternal mortality. Constraints to reducing maternal deaths in Africa are weak and under-resourced health systems and the general human resource crisis in the health sector.

Access to skilled care at birth and emergency obstetric care are main elements to prevent maternal deaths, and help prevent ill health and disability as a result of complications in pregnancy or childbirth. DFID's Public Service Agreement includes ambitious targets on increasing access to skilled attendance at birth. The Department's strategy includes: highlighting the issue internationally; support to countries to strengthen health systems and improve access to maternal and reproductive health services; and support for research and improved measurement and monitoring for safe motherhood. DFID is actively engaged in a new international partnership for Safe Motherhood and Newborn Health.

We support the maternal health strategies of African countries through safe motherhood projects, for example in Kenya and Malawi, health sector budget support and, indirectly, through general budget support. We also fund international multilateral agencies and international NGOs active in supporting maternal health programmes in Africa. Since 1997 we have committed approximately £1.5 billion to support health systems. Through our participation in the High Level Forum on health we are promoting, with the WB, WHO and others, a renewed effort to accelerate progress towards all the health related MDGs.

Middle East

Richard Burden: To ask the Secretary of State for International Development what assessment he has made of the implications for the work of humanitarian aid agencies of the information bulletin being issued to foreign nationals arriving in Israel which informs them that entry to territories under the control of the Palestinian Authority is forbidden without written prior authorisation from the Israeli Government and that entry to those territories without such written authorisation may result in legal action being taken; and what representations he is making to Israel on the issue. [149934]

Hilary Benn: The Government is aware of the information bulletin, which has been issued to foreign nationals arriving in Israel, and is seriously concerned at the possible impact of such restrictions on humanitarian

and other aid organisations working in the West Bank. It could seriously disrupt the supply of essential emergency provisions for the most vulnerable Palestinians. We have raised our concerns with the Israeli government and is exploring with our EU partners further avenues for doing so.

Pakistan

Mr. Bercow: To ask the Secretary of State for International Development how many refugee camps in Pakistan are being run by the United Nations High Commissioner for Refugees. [149975]

Mr. Gareth Thomas: United Nations High Commissioner for Refugees provides full assistance (food, water, shelter, education and health care) in 13 new camps which opened after 11 September 2001. Just under 200,000 refugees reside in these new camps.

In addition, it is estimated that there are in the region of 200 old refugee settlements in Pakistan with a population of between 900,000 and 1 million. In these camps UNHCR provides assistance with health care and education.

Rwanda and Burundi

Mr. Love: To ask the Secretary of State for International Development what aid is being provided to *(a)* Rwanda and *(b)* Burundi (i) for development and (ii) to re-establish its justice system; and if he will make a statement. [148858]

Hilary Benn: Establishing a fair and effective justice system in Rwanda is crucial for the stability and prosperity of the country. The most immediate challenge is to process the more than 100,000 individuals currently in Rwandan prisons accused of genocidal crimes.

The UK Government has provided £715,000 for research into the efficiency and effectiveness of gacaca—the traditional justice system adopted by the Government of Rwanda to try those accused of genocidal crimes. This programme is managed by Penal Reform International (PRI). This financial year, the UK will also provide some £25 million to the Government of Rwanda as direct budgetary support. These funds support the implementation of Rwanda's PRSP, which highlights justice as a priority sector.

At the request of the Government of Rwanda, the Belgian Government leads donor activity in the justice sector. Other major donors in this sector include the Dutch Government (construction of gacaca courts), the Canadian Government (the administration of the Supreme Court), the European Union (rehabilitation of the Ministry of Justice and the Supreme Court), and the German Government (rehabilitation of judicial systems).

In the case of Burundi, the UK commitment in 2003–04 so far amounts to £11.62 million. Our programme consists of support to peace building and conflict resolution initiatives; and humanitarian assistance through the United Nations agencies, non-governmental organisations and other international agencies. We are also working with the Government of Burundi providing technical support and advice on their Poverty Reduction Strategy Paper and on capacity building issues. We are looking at the possibility of assistance in collaboration with others in the area of electoral reform.

Beyond this, we have no specific plans for support to the justice sector. However, the European Commission, under their recently agreed National Indicative Programme for Burundi for the period 2003 to 2007, are developing a significant support programme in good governance including the justice sector.

Sudan

Mr. Bercow: To ask the Secretary of State for International Development what recent assessment he has made of the levels of *(a)* fighting and *(b)* casualties in Darfur; and what they were in June 2003. [149998]

Hilary Benn: There is limited access to be able to accurately assess the situation in Darfur. Our Humanitarian Adviser is planning to visit the area this week, as well as eastern Chad.

We are very concerned about the situation in Darfur. NGOs in Chad are reporting an increase in numbers of wounded due to the aerial bombardments that are reported to have taken place. The latest UN information suggests that 600,000 people, out of a total population of about 6 million in Darfur, are currently displaced because of the conflict, with a further 90,000 refugees in Chad.

We are pressing all sides to re-establish a ceasefire and resume peaceful negotiations, to allow unfettered humanitarian access.

Think Tanks

Mr. Challen: To ask the Secretary of State for International Development what the *(a)* value and *(b)* purpose was of contracts entered into by his Department with independent think tanks or their subsidiary bodies since 1997, broken down by think tank or subsidiary body. [146958]

Hilary Benn: I have placed in the House of Commons Library a list of DFID consultancy contracts with think tanks. This does not include lower value contracts, details of which are not held centrally and could be provided only at disproportionate cost.

Uganda

Mr. Bercow: To ask the Secretary of State for International Development what recent assessment he has made of the effectiveness of the Uganda Presidential Peace Team. [149973]

Hilary Benn: The Presidential Peace Team (PPT) was formed in August 2002. It comprises a number of Acholi MPs, Army Officers, Government Ministers and officials. Between August 2002 and May 2003 the PPT was involved in a number of attempts to initiate dialogue with the LRA. However these were unsuccessful.

While the PPT still exists, our current assessment is that it is largely inactive, and therefore ineffective. A revitalised and suitably empowered PPT would be an

important component of an effective strategy to end the conflict. We have stressed this in our contacts with the Government of Uganda and will continue to do so.

World Food Programme (Southern Africa)

John Barrett: To ask the Secretary of State for International Development what shortfall exists in the World Food Programme appeal from July 2003 for food aid in southern Africa; what impact the shortfall has had on the ability to deal with the humanitarian situation in the region; and what steps are being taken to make up the shortfall. [150106]

Hilary Benn: Latest figures from the UN indicate that, so far, WFP has secured 69 per cent. of food aid requirements for this year's Consolidated Appeal for southern Africa. DFID contributions have helped ease the most pressing food shortages in key countries, notably Zimbabwe and Mozambique. The European Commission has recently announced a $25 million contribution for WFP programmes in Zimbabwe.

DFID has been supporting the work of the Vulnerability Assessment Committees in affected countries in order to better understand needs and direct resources to them. Assessments will be carried out in Swaziland and Lesotho over the next few weeks and a fuller assessment of Mozambique's food security situation will be undertaken in March. We are awaiting the release of the urban vulnerability study, which was recently undertaken in Zimbabwe. All of these studies are being funded by DFID.

The UN is seeking funding from a range of donors for the remainder of the Southern African Consolidated Appeal. DFID continues to be the second biggest bilateral contributor of humanitarian aid to southern Africa.

World Trade Organisation

Mr. Bercow: To ask the Secretary of State for International Development how many people made up the UK delegation to the World Trade Organisation ministerial conference in Cancun in September; and what the cost to public funds was of its attendance. [149112]

Mr. Mike O'Brien: I have been asked to reply.

There were 41 in the UK delegation to the 5th WTO Ministerial Conference held in Cancun last September.

Final accounts for the delegation are currently not available. Once the costs have been finalised, we will inform the House.

WALES

Civil Servants

Dr. Cable: To ask the Secretary of State for Wales how much space, expressed in square metres, the Office occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150281]

Mr. Touhig: The Wales Office occupies 494.25 square metres in central London for the offices of civil servants. It has no office space in Greater London.

Higher Education Bill

Mr. Jon Owen Jones: To ask the Secretary of State for Wales whether, under the provisions of the Higher Education Bill, English universities will be able to charge top-up fees to students resident in Wales; and what assessment he has made of the funding shortfall if such fees are not charged. [150116]

Mr. Touhig: Subject to their having an access agreement with the Office for Fair Access English HEIs will be able to charge variable fees. Welsh domiciled students will be charged a variable fee on the same basis as English domiciled students.

Mr. Jon Owen Jones: To ask the Secretary of State for Wales whether, under the provisions of the Higher Education Bill, Welsh universities will be able to charge top-up fees to students resident in *(a)* England and *(b)* Scotland; and what assessment he has made of the funding shortfall if such fees are not charged. [150117]

Mr Touhig: The provisions of the Higher Education Bill transfer to the Assembly responsibility for student support for students resident in Wales and HE tuition fee levels.

The Assembly Education and Lifelong Learning Minister has given a commitment that variable fees would not be introduced in Wales during the lifetime of the second Assembly. This means no student from England or Scotland entering a Welsh Higher Education Institution in academic year 2006–07 will be charged a variable fee, for the duration of his or her course. Funding of Higher Education Institutions in Wales is a matter for the Assembly.

Mr. Jon Owen Jones: To ask the Secretary of State for Wales whether, under the provisions of the Higher Education Bill, students resident in England will have to pay up-front fees if attending a Welsh university; whether they will be entitled to claim bursaries while attending a Welsh university; and what assessment has been made of funding methods for such bursaries. [150118]

Mr. Touhig: Fee deferment is an integral part of the new package of student support for which the HE Bill provides. English domiciled students studying in Wales will be eligible for loans for fees from the Department for Education and Skills on the same basis as a English domiciles studying in England.

Bursary provision by English HEIs will be directly connected with the terms of access plans with the Director of Fair Access which permit them to charge variable fees. The Welsh Assembly has said that it will not introduce variable fees during the lifetime of the second Assembly, therefore Welsh Higher Education Institutions will not need to provide access bursaries on similar terms to those being provided in England.

Mr. Jon Owen Jones: To ask the Secretary of State for Wales whether, under the provisions of the Higher Education Bill, students resident in Wales will have to pay upfront fees if attending an English university; whether they will be entitled to claim bursaries while attending English universities; and what assessment he has made of funding methods for such bursaries. [150119]

Mr. Touhig: The Assembly has given a commitment that should tuition fee and student support powers be transferred from 2006, Welsh domiciled students studying in England will be eligible for a loan for fees and therefore will not have to pay upfront fees. It will be for English institutions to set out the details of their own bursary schemes, but we would expect these to be equally available to Welsh students.

Mr. Jon Owen Jones: To ask the Secretary of State for Wales what the estimated cost is of compensating universities in Wales for lost revenue if top-up fees are not charged. [150120]

Mr. Touhig: The Higher Education Bill will transfer to the Assembly the responsibility for student support for students resident in Wales and Higher Education tuition fee level.

The Assembly has given a commitment that Higher Education Institutions in Wales will not be disadvantaged by not being allowed to charge variable fees in 2006–07. The Assembly will meet the costs of this commitment.

NORTHERN IRELAND

Obesity

Lady Hermon: To ask the Secretary of State for Northern Ireland how many people were recorded as obese in Northern Ireland in *(a)* 1985, *(b)* 1990, *(c)* 1995, *(d)* 2000 and *(e)* each year since 2001; what steps he is taking to reduce these figures; and if he will make a statement. [150685]

Angela Smith: The information requested is not available.

The Department of Health, Social Services and Public Safety is working with relevant departments and other agencies to tackle obesity through action plans on food and nutrition and physical activity.

Political Parties (Donations)

Mr. Lidington: To ask the Secretary of State for Northern Ireland what his policy is on the exemption of political parties in Northern Ireland from *(a)* the requirement publicly to declare donations received from individuals, organisations and businesses and *(b)* statutory restrictions on accepting donations from foreign and anonymous sources. [150629]

Mr. Spellar: The Political Parties, Elections and Referendums Act 2000 (Disapplication of Part IV for Northern Ireland Parties, etc.) Order 2001 exempted the Northern Ireland political parties from the requirement to comply with Part IV of the Act for four years. Part IV imposes restrictions on the source of donations so as to prohibit foreign and anonymous donations to political parties.

The Order expires February 2005. However, in line with a commitment made to Parliament during the passage of the Order, it is being reviewed ahead of that. The result of this review will be announced by way of a parliamentary statement.

TRANSPORT

Transport for London

Mr. Gardiner: To ask the Secretary of State for Transport (1) what the reasons were for the change in the level of funding by his Department for Transport for London in 2005–06 compared with 2004–05; [149579]

(2) what assessment he made, when allocating funds to Transport for London for *(a)* 2004–05, *(b)* 2005–06 and *(c)* 2006–07, of the investment required in London Underground to maintain services at their current level; [149580]

(3) what assessment he made, in determining his Department's funding for Transport for London in *(a)* 2004–05, *(b)* 2005–06 and *(c)* 2006–07, of the effect upon inward investment of (i) increasing, (ii) maintaining the existing level and (iii) decreasing the level of funding for the transport infrastructure in London. [149595]

Mr. McNulty: Government funding for Transport for London in 2004–05 and 2005–06 is expected to be £2,224 million and £2,142 million respectively. These allocations are based on an assessment of London's transport priorities, taking into account affordability following the 2002 spending review. They also take account of the investment needed to deliver a 12 per cent. capacity increase for London Underground by 2012 under the PPP. This is an increase of over 85 per cent. in funding levels from the equivalent provision in 2001–02, and a significant increase in the overall amount available for investment in transport infrastructure, including an unprecedented funding commitment for London Underground, averaging more than £1 billion a year to at least 2010–11. The overall provision for 2006–07 is subject to the current spending review, which is due to be completed this summer.

Vehicle Excise Duty

Mr. Curry: To ask the Secretary of State for Transport what the yield from vehicle excise duty was for each local authority area in England, based on the address of the licence holder, for the most recent year for which figures are available. [149378]

Dr. Howells: The net total raised from vehicle excise duty in the financial year 2002–03 was £4,825,741.000. Data based on local authority areas in England are not held centrally and could be provided only at disproportionate cost.

Aircraft (Carbon Dioxide Emissions)

Norman Baker: To ask the Secretary of State for Transport what assessment he has made of the effect on carbon dioxide emissions from aircraft by *(a)* 2010, *(b)* 2020, *(c)* 2030 and *(d)* 2050 arising from the proposals in the Aviation White Paper. [148587]

Mr. McNulty: The Department will publish a paper, "Aviation and Global Warming", in due course, which will include an analysis of the impact on emissions from the proposals in the Aviation White Paper.

Banned Airlines

Mr. Wilshire: To ask the Secretary of State for Transport whether airlines operating in UK airspace are banned from *(a)* Swiss, *(b)* Belgian and *(c)* Dutch airspace. [149971]

Mr. McNulty: *[holding answer 22 January 2004]:* I refer the hon. Gentleman to my answer to the hon. Member for Caithness, Sutherland and Easter Ross (John Thurso), on 12 January 2004, *Official Report*, column 546W which describes the database we have on actions taken by other European states. I understand that some restrictions have been placed on the use of specific aircraft, but am not aware that any airlines have been prevented from operating in Swiss, Belgian or Dutch airspace.

Biofuels Directive

Mrs. Shephard: To ask the Secretary of State for Transport what his Department's timetable is for consultation on the implementation of the EU bio-fuels directive; and what consideration has been given to ensuring that the UK's 2005 target for implementation of the directive is notified in the EU by July. [150782]

Mr. Jamieson: The European Union's Biofuels Directive requires member states to set their own indicative targets for sales of biofuels for road transport to be met in 2005 and 2010. The Directive must be transposed by 31 December 2004. The Government will be consulting shortly on the level of possible targets for the UK and on the steps it might take to meet them. This will allow us to report our intentions to the European Commission by July 2004.

Bristol/Bath to South Coast Transport Study

Mr. Key: To ask the Secretary of State for Transport when the Bristol and Bath to South Coast study will be published. [149881]

Mr McNulty: The study, which was commissioned to address the concerns of Bath and North East Somerset council and the South West Regional Assembly over the proposed detrunking of the A36/A46, has been further delayed because it has taken longer than anticipated for the consultants to complete the modelling and firm up their conclusions. However, I am pleased to be able to report that the revised final reports were cleared by the Steering Group when they met on 21 January 2004. It is anticipated that the reports will be printed at the end of January or in early February and copies will then be sent to the South West Regional Assembly for comment.

Following receipt of the study comments from the Regional Assembly, I will be in a position to make a response.

British Airways

Mr. Ancram: To ask the Secretary of State for Transport what precautions his Department has advised British Airways to take concerning threats posed to its aircraft over the Middle East and Arabian sub-continents; and if he will make a statement. [148432]

Dr. Howells *[holding answer 19 January 2004]:* The security of UK aviation, including that of UK airline operations overseas, is kept under active review, and security measures are adjusted as and when necessary. The Government do not disclose their advice to airlines.

Mr. Ancram: To ask the Secretary of State for Transport what information his Department has received concerning a threat to British Airways flights from light aircraft in flight over Saudi Arabian airspace; and what representations he has made to his Saudi Arabian counterpart. [148468]

Dr. Howells *[holding answer 19 January 2004]:* The Government keep the threat to civil aviation in all countries, including Saudi Arabia, under continuous review. We do not comment on intelligence matters, or on exchanges we may have had with foreign governments about them.

Bugaled Breizh

Andrew George: To ask the Secretary of State for Transport what discussions his Department has had with *(a)* French authorities, *(b)* Breton authorities, *(c)* the Ministry of Defence and *(d)* others following the sinking of the Bugaled Breizh off The Lizard on 15 January. [150988]

Mr. Jamieson: The Marine Accident Investigation Branch (MAIB) of the Department for Transport has been providing proactive support and advice to their counterparts in France—Bureau Enquêtes-Accidents Mer—since the loss of the Bugaled Breizh. During the incident, HM Coastguard at Falmouth was in regular contact with French search and rescue authorities regarding details of the stricken vessel, and maintained regular contact with them throughout the incident. Subsequently, the Maritime and Coastguard Agency (MCA) has provided French authorities with assistance in attempting to identify the movement of shipping within the area of the accident.

No specific discussions have been held with Breton regional authority separately from French national authorities.

The MAIB has been in contact with the UK Ministry of Defence with regard to the fact that the accident took place in a designated sea training exercise area.

Discussions have also taken place between MAIB/MCA and Devon and Cornwall police and HM coroner in Truro.

Civil Servants

Dr. Cable: To ask the Secretary of State for Transport how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150288]

Mr. McNulty: The Department for Transport occupies 21,521m^2 in Greater London, all of which is in central London.

Consultants

John Thurso: To ask the Secretary of State for Transport what the total value was of *(a)* technical and financial contracts, *(b)* technical consultants used on a call-off basis and *(c)* financial consultants used on a call-off basis by the section of (i) his Department and (ii) predecessor departments with responsibility for aviation, in each year since 1992. [149706]

Mr. McNulty: The Department was formed on 29 May 2002. In 2002–03 and the first 9 months of 2003–04 consultancy valued at £71.19 million and £4.74 million respectively was commissioned in relation to aviation.

John Thurso: To ask the Secretary of State for Transport what the total value was of *(a)* technical and financial contracts, *(b)* technical consultants used on a call-off basis and *(c)* financial consultants used on a call-off basis by the section of *(i)* his Department and (ii) predecessor departments with responsibility for transport strategy and local transport, in each year since 1992. [149707]

Mr. McNulty: The Department was formed on 29 May 2002. In 2002–03 and the first nine months of 2003–04 consultancy valued at £20.71 and £7.43 million respectively was commissioned in relation to transport strategy and local transport.

Crosswind Runway

John Barrett: To ask the Secretary of State for Transport what assessment he has made of the impact which increased use of the crosswind runway, as outlined in the Aviation White Paper, will have on *(a)* noise and *(b)* pollution levels in (i) North Gyle, (ii) Gogarloch, (iii) Wester Broom and (iv) Broomhall areas. [149362]

Mr. McNulty: Our assessment of noise and air quality impacts relating to increased use of the crosswind runway is summarised in the Scottish Consultation Document and set out in more detail in the supporting RAS 3 Study Technical Reports, which were published concurrently.

These indicate that there would be no local air quality exceedences affecting the four locations specified, that only at Gogarloch would the increased level of noise experienced exceed 57dBA Leq16 (taken to represent the approximate onset of significant community annoyance). These impacts would be eliminated if the crosswind runway closed following the opening of a new close parallel runway.

Edinburgh Airport

John Barrett: To ask the Secretary of State for Transport (1) what compensation will be made available to those residents living close to Edinburgh airport who face a loss in their property value in advance of the proposed construction of a second runway as outlined in the Aviation White Paper; [149667]

(2) if he will make a statement on the statutory blight provisions that will be available to residents living *(a)* close to and *(b)* affected by the planned expansion of Edinburgh airport as outlined in the Aviation White Paper. [149668]

Mr. McNulty: The White Paper recommends that people should have access to some form of redress at beyond the current statutory provisions, for example to help them relocate before any development takes place. Arrangements are being made for non-statutory schemes to be brought forward locally by the airports operators.

John Barrett: To ask the Secretary of State for Transport what assessment was made of the case for protection of the ancient Catstane site north of the existing Edinburgh airport runway in the formulation of the proposals for a second runway as outlined in the Aviation White Paper; and for what reason no mention was made of the site in the White Paper. [147833]

Mr. McNulty: Carlowrie Cat Stane is one of a number of Scheduled Ancient Monuments in the vicinity of Edinburgh Airport that were identified in the optioneering and appraisal studies that underpinned the Scottish Consultation Document. The Cat Stane was taken into account, alongside a range of other factors, in the design and appraisal of the options for a new runway at Edinburgh and the development of White Paper policy. The ancient monument would ultimately lie between a new runway and the existing one and is therefore unlikely to be affected by development. The necessary protection of the Cat Stane will be addressed in the master plan for the airport and any future planning application for the development of a new runway.

IT Contracts

Mr. Sayeed: To ask the Secretary of State for Transport if he will list information technology contracts in his Department with a value of above £20 million in each of the last 10 years; what the inception date for each system was; when it became fully functional; when it became fully debugged; and what the cost of over-runs has been. [146201]

Mr. McNulty: The Department for Transport was formed in May 2002. The Department has let no contracts that meet the description.

Light Rail Schemes

John Thurso: To ask the Secretary of State for Transport what light rail schemes will be built by 2010; what their expected cost is; and what their *(a)* construction start date and *(b)* completion dates are. [149710]

Mr. McNulty: Sunderland Direct opened in 2002 and Nottingham Express Transit is due to open in March 2004. A number of other light rail schemes are being considered and are in various stages of appraisal, assessment and procurement.

Local Authority Transport Projects

John Thurso: To ask the Secretary of State for Transport if he will set out the measures the Department is taking to enable local authorities to bring forward and implement projects given provisional approval within the last three years' annual transport settlements. [149650]

Mr. McNulty: The Department, through the Government Offices hold regular meetings with local authorities providing advice on funding issues, statutory processes, etc. Working closely with local authorities the Government Offices make sure scheme changes are reported promptly so that decisions on how to proceed can be taken at the earliest opportunity.

John Thurso: To ask the Secretary of State for Transport how many local authority projects given provisional approval within the last three years' annual transport settlements are delayed owing to *(a)* skills shortages and *(b)* the planning process. [149651]

Mr. McNulty: No local authority has identified skills shortages to the Department as a primary cause of delays to major local transport schemes since the introduction of the Local Transport Plan process.

The planning process has been identified as a contributory cause of delay to several major scheme proposals, but the effects of factors such as delayed planning permissions and delayed TWA approvals cannot be clearly separated from other factors.

Management Consultants

Mr. Flight: To ask the Secretary of State for Transport what the cost to his Department of using management consultants has been in each of the last five years. [148031]

Mr. McNulty: The Department was formed in May 2002. The Department spent £122.2 million in 2002–03 and £42.1 million in the period 1 April 2003 to 31 December 2003 on all types of consultancy excluding research. Separate figures for management consultancy are not held centrally.

Rail Freight

John Thurso: To ask the Secretary of State for Transport what progress has been made in the rail freight gauge and capacity enhancements *(a)* Felixstowe to Nuneaton (Phase 2), *(b)* Southampton to West Coast Mainline (Gauge), *(c)* north London and Great Eastern Freight Works, *(d)* West Midland Freight Works, *(e)* re-opening Portishead line for freight and new line to port, *(f)* Transpennine/South Humberside freight capacity works and *(g)* for freight services to Royal Portbury Docks, Bristol. [149709]

Mr. McNulty: Progress is as follows:

(a) Physical works between Felixstowe and Ipswich have been completed. A study commissioned by Network Rail for the Ipswich-Peterborough work has been completed.

(b) Detailed structure surveys are being undertaken.

(c) Gauge enhancement through the Ipswich Tunnel is programmed to take place this summer. Options to improve cross-London capacity are being evaluated.

(d) The Strategic Rail Authority (SRA) are considering whether work to provide additional capacity for freight can be carried out in conjunction with the routine re-signalling schemes proposed by Network Rail for the Saltley signal box area and at Stourbridge.

(e) The Portishead line has been re-opened and the new line to the port has been opened.

(f) Network Rail are considering the requirements and will report the cost estimates to the SRA in the spring.

(g) Freight services to the docks are now operating.

Mr. Llwyd: To ask the Secretary of State for Transport how many freight access grants have been made in the last 12 months; and what the total sum paid was. [150013]

Mr. McNulty: The Strategic Rail Authority (SRA) has not awarded any new Track Access Grants (TAGs) in the last 12 months, three existing grants had their contracts extended. Records of the amount paid through TAGs are held by financial years. Since April 2003 £14.2 million has been paid by the SRA in TAGs. Payments for previous years are reported in the SRA's Annual Reports, copies of which are available in the Library of the House.

Mr. Llwyd: To ask the Secretary of State for Transport whether he was consulted before the Strategic Rail Authority introduced its moratorium on freight access grants. [150050]

Mr. McNulty: Yes.

Rail Infrastructure Asset Register

John Thurso: To ask the Secretary of State for Transport what progress is being made by Network Rail to establish a comprehensive asset register of the rail infrastructure; what that register includes; and when it will be completed. [149712]

Mr. McNulty: Since April 2001, when the Rail Regulator modified Railtrack's network licence to require the company to establish and maintain an asset register, the company has thoroughly reviewed the state of its asset knowledge, established the key principles of how its asset information strategy needs to improve its business planning processes and developed detailed plans to meet these business needs. Good progress is being made, and Network Rail is continuing to press ahead with the implementation of these plans.

Development of the asset register comprises a number of key elements. It is replacing many old databases with new systems that will provide access to integrated and consistent, company-wide data for the first time. In some cases, existing data systems can be maintained, but they are being overhauled to ensure that data are accurate and fully up to date.

Much of this work is highly detailed and requires a painstaking review of large volumes of data. Inevitably, this is time consuming, but good progress is being made. Some elements of the project are complete, while others, such as the new system for managing maintenance work known as MIMS[1], are well developed and in the course of introduction. It is expected that MIMS will be fully implemented by April 2004.

As the asset register is being completed, new data collection and storage systems are being implemented, requiring significant changes to the culture of data management within Network Rail. Development will continue to take effect for many years, but it is expected that a fundamental milestone will be the completion of a baseline asset inventory which will contain accurate and fully up-to-date information about the key attributes of the network assets by mid-2005.

[1] Mincom Information Management System—initially developed for use in the mining industry.

Rail Network (Repair and Maintenance)

John Thurso: To ask the Secretary of State for Transport (1) if he will publish provisional findings from the comprehensive asset register on the cost of the backlog of repair and maintenance work on the rail network; [149713]

(2) if he will set a target date to remove the backlog of maintenance and renewal work to achieve steady-state condition. [149714]

Mr. McNulty: The purpose of the asset register is to ensure that Network Rail has appropriate knowledge of the condition, capability and capacity of the network assets. As its development continues, the asset register will introduce new techniques and better quality asset information that will enhance Network Rail's understanding of the age, use and behaviour of individual assets in service, so that it can improve:

(a) its planning for the appropriate maintenance and repair interventions;

(b) the accuracy of long-term predictive modelling of maintenance and renewal interventions; and

(c) the management and monitoring of actual performance against planned activities, and the costs of those activities.

Work to develop these long-term planning tools is still in progress but, in their early stages, they provided important input to the Rail Regulator's review of access charges during 2003—particularly in respect of track renewals.

The Regulator's conclusions, published on 12 December 2003, provide for increased levels of funding for infrastructure maintenance and renewals. It is now for Network Rail to respond by increasing its activities in accordance with the scope and priorities of work that it determines in response to the Regulator's review.

Recruitment Advertising

Miss Kirkbride: To ask the Secretary of State for Transport how much has been spent on recruitment advertisements in the press, broken down by publication, by *(a)* his Department, *(b)* quangos under the Department and *(c)* non-departmental Government bodies under the Department (i) in the last year and (ii) since the Department's creation. [145808]

Mr. McNulty: The Department for Transport was formed in May 2002. The Department uses the most appropriate publication for recruitment advertising, be it national, regional, trade magazine or website, depending on the nature of the vacancy.

The following are details of the costs incurred by DfT (Central) for recruitment advertising.

2002–03:	£241,868.87
2003–04 to date:	£349,117.32.

This does not include the Department's Agencies and NDPBs as they have responsibility for their own recruitment below the Senior Civil Service.

Royal Train

Mr. Rosindell: To ask the Secretary of State for Transport if he will make a statement on the future of the royal train. [149928]

Mr. McNulty: Last year, the royal household completed a review on the future of the royal train. The review concluded that the royal train should continue to be used as an integral part of royal travel but that the household and the Department should actively monitor costs to ensure that it is operated and maintained in the most cost effective manner.

Security Passes

Mr. Oaten: To ask the Secretary of State for Transport how many security passes have been reported *(a)* lost and *(b)* stolen by staff in (i) his Department and (ii) departmental agencies in the last 12 months. [147979]

Mr. McNulty: The number of permanent passes in the Department for Transport reported in the last 12 months as lost totals 71. A further two were reported as stolen. In the same period 147 Agency passes were lost and two stolen. A large number of the Department's access control systems are electronic and have the facility to invalidate a pass as soon as it is reported to have been lost. In areas where access is given on visual inspection of a pass, any increased threat that results from the loss of such a pass is assessed and appropriate action is taken.

Mr. Burstow: To ask the Secretary of State for Transport how many security passes have been reported *(a)* lost and *(b)* stolen by staff in his Department in the last 12 months. [150405]

Mr. McNulty: The number of permanent passes in the Department for Transport reported in the last 12 months as lost totals 71. A further two were reported as stolen. A large number of the Department's access control systems are electronic and have the facility to invalidate a pass as soon as it is reported to have been lost. In areas where access is given on visual inspection of a pass any increased threat that results from the loss of such a pass is assessed and appropriate action is taken.

Ships (Dangerous Cargoes)

Norman Baker: To ask the Secretary of State for Transport if he will list the occasions since 1975 when ships have lost dangerous cargoes overboard in *(a)* United Kingdom waters, *(b)* the English Channel and *(c)* the North Sea; what cargo was lost in each case; and what was subsequently recovered. [148594]

Mr. Jamieson: The Maritime and Coastguard Agency uses data provided by the Advisory Committee on Protection of the Sea (ACOPS) and information is not available in the form requested. However, Coastguard experience suggests that there are around five or six such incidents per year in UK waters. In 2001, for example, the Agency is aware of five incidents in UK waters. There were none in the English Channel and four in the North Sea. In 2002, the Agency is aware of five incidents in UK waters, including one in the English Channel and three in the North Sea.

The majority of the incidents in 2001 and 2002 involved chemical drums/containers washed up on beaches. In cases such as this, he local authority and/or Fire Brigade have arranged for safe disposal.

Station Improvements

John Thurso: To ask the Secretary of State for Transport whether the Strategic Rail Authority will set new targets to achieve its earlier target of delivering £370 million improvements to 1,000 stations by 2004. [149711]

Mr. McNulty: The current programme for providing new facilities under the Modern Facilities at Stations Scheme (MFAS) covers 68 stations. Work on these is scheduled for completion by 31 March 2005. Any extension of the scheme will depend on the availability of future funding following the Government's Spending Review later this year.

Statutory Sick Pay

Mr. Goodman: To ask the Secretary of State for Transport how many people employed in his Department have claimed statutory sick pay for *(a)* less than one week, *(b)* one to three weeks, *(c)* four to six weeks, *(d)* seven to 12 weeks, *(e)* 13 to 20 weeks and *(f)* 21 to 28 weeks in each year since 1997. [148624]

Mr. McNulty: The Department for Transport was established following machinery of Government changes in May 2002. The first complete year for which we have data on staff sick absence rates for staff in the centre of the Department for Transport is January to December 2003. During this period, the number of people taking sick leave was as follows:

Days	Number
(a) Four to seven	292
(b) Eight to 21	137
(c) 22 to 42	37
(d) 43 to 72	17
(e) 73 to 140	16
(f) 141 to 196	6

The Department is committed to managing sick absence effectively.

US Security (Passenger Screening)

Llew Smith: To ask the Secretary of State for Transport what liaison his Department has had with the United States Department of Homeland Security over the Computer-Assisted Passenger Pre-Screening System, Version 2 (CAPPS-11). [149605]

Mr. McNulty: The Department liaises closely with United States authorities on aviation security measures, and is aware in that context of the development of the CAPPS2 system.

CULTURE, MEDIA AND SPORT

Sports Activities (Children)

Mr. Burstow: To ask the Secretary of State for Culture, Media and Sport what the average time spent on all sports by those aged between six and 16 years was in terms of hours per week in each year since 1997. [149866]

Mr. Caborn: The information requested is not collected in this format. Taking into account time spent per week on curriculum PE, outside lessons in term time and during the previous summer holidays, the results of Sport England's Young People and Sport National Surveys suggested that, on average, young people spent eight hours 23 minutes a week on sport and physical activity in 1999 and that this had decreased to eight hours 12 minutes a week by 2002. Data are now being collected for the first time—for publication in April—on the percentage of school children who spend a minimum of two hours each week on high-quality PE and school sport within and beyond the curriculum.

Cinema

Mr. Gardiner: To ask the Secretary of State for Culture, Media and Sport what her Department's policy is on the recognition of cinema as a cultural and regenerative opportunity in unitary development plans. [149956]

Estelle Morris: The UK Film Council's network of Regional Screen Agencies (RSAs) work with key local authorities to position film within cultural plans, and to emphasise the value of cinema as a cultural and regenerative opportunity in unitary development plans.

A number of RSAs are also developing, with local authorities, proposals around cinema exhibition in rural and market towns. This research will emphasise the effects which a working cinema can have on a range of social, cultural and economic issues. The UK Film Council, in partnership with the British Film Institute (BFI) and the RSAs, is currently carrying out research into the social and economic impact of town centre cinemas which is expected to back up the work of RSAs with local authorities.

Civil Servants

Dr. Cable: To ask the Secretary of State for Culture, Media and Sport how many civil servants, broken down by grade, there are in the Department and the agencies for which the Department is responsible; and what the figures were in January 1997. [150255]

Mr. Caborn: The following table shows the numbers of individual civil servants employed by DCMS and the Royal Parks Agency.

	1 April 1997[1]	*1 January 2004*
DCMS		
SCS	22	25
A	61	85
B	101	146
C	64	115
D	104	104
Total	352	475
The Royal Parks		
A	5	8
B	15	23
C	25	30
D	19	23
SCS	1	2
Commander	1	0
Superintendent	1	1
Chief Inspector	0	1
Inspector	7	6

	1 April 1997[1]	1 January 2004
Police Sergeant	13	18
Police Constable	139	116
Horse Manager	1	0
Total	227	228

[1] Data for January 1997 are not available.

Dr. Cable: To ask the Secretary of State for Culture, Media and Sport how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150279]

Mr. Caborn: DCMS occupies five buildings/part buildings in central London. The space in occupation amounts to 10,557.94 square metres net usable area. There are no buildings occupied in the Greater London Area.

Commercial Radio Stations

Mr. Whittingdale: To ask the Secretary of State for Culture, Media and Sport (1) what assessment she has made of the use of the Radio Joint Audience Research system of audience measurement to calculate the amount of levy on the qualifying revenues of national commercial radio stations; [149892]

(2) if she will adopt a system of electronic audience measurement to calculate the amount of levy on the qualifying revenue of national commercial radio stations; [149893]

(3) what assessment she has made of the effect on revenue from the levy on qualifying revenues of national commercial radio stations of moving from the Radio Joint Audience Research system of audience measurement to a system of electronic audience measurement. [149895]

Estelle Morris: None. The calculation of qualifying revenue is a matter for Ofcom acting in accordance with the provisions of the Broadcasting Act 1990. Ofcom (formerly the Radio Authority) is required to draw up and from time to time review a statement setting out the principles to be followed in calculating qualifying revenue. Before doing so, Ofcom must consult the Secretary of State and the Treasury. This statement was last reviewed in November 1995. I understand there are currently no plans for further revisions.

Mr. Whittingdale: To ask the Secretary of State for Culture, Media and Sport if she will ask Ofcom to conduct a study into the accuracy of the Radio Joint Audience Research system of audience measurement. [149894]

Estelle Morris: No. The accuracy of audience is a matter for the industry. I understand that RAJAR are conducting extensive research into the merits of electronic measurement devices.

Film Distribution

Mr. Gardiner: To ask the Secretary of State for Culture, Media and Sport (1) what steps her Department is taking to help independent film distributors to compete with *(a)* mainstream products and *(b)* products distributed from Hollywood studios; [149952]

(2) what steps her Department is taking to broaden the audience base at cinemas; [149953]

(3) what steps her Department is taking to support the independent distribution sector in making available more prints of independent films; [149954]

(4) what steps her Department is taking to create incentives for exhibitors to show more independent films. [149955]

Estelle Morris: The UK Film Council, the Government's strategic agency for film, has recently announced a comprehensive Distribution and Exhibition Strategy costing £24 million over the next three years aimed at widening audiences for film and ensuring a broader and more diverse range of films is available.

£14 million of this funding will be allocated, in partnership with the Arts Council of England, to a Digital Screen Network which will enable the exhibition of a wider range of films, through the provision of equipment enabling the digital exhibition of films.

The strategy also includes a Specialised Print and Advertising (P&A) Fund, with £1 million per annum over the next three years, to assist distributors to widen the availability of films defined as "specialised". These are films characterised by an innovative cinematic style, or which engage with challenging subject matter, offering audiences a different experience of cinema from that provided by mainstream US studio-originated material. Support will be available under this fund to enable a distributor to increase the print run and media investment (P&A) for specialised films.

The £1 million UK Film Distribution Programme is another strand of the strategy which is aimed at assisting distributors to increase the theatrical release of indigenous UK films that are aimed at a wide, commercial market.

Heritage Lottery Funding

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how much Heritage Lottery funding has been awarded to Brent in each year since 1997. [150039]

Estelle Morris: Heritage Lottery Fund commitments made for the Brent Local Authority Area by financial year are as follows:

Financial year	£
1997–98	9,900
1998–99	Nil
1999–2000	Nil
2000–2001	184,600
2001–2002	912,000
2002–2003	1,099,400

Sarah Teather: To ask the Secretary of State for Culture, Media and Sport how much Heritage Lottery

funding has been awarded on average to London boroughs in each year since 1997. [150042]

Estelle Morris: The figures are in the table.

Financial year	£
1997–98	3,038,537
1998–99	1,616,752
1999–2000	351,044
2000–01	1,302,294
2001–02	1,260,987
2002–03	1,561,673

The figures include funding for National Museums and Galleries.

Imperial War Museum North

Llew Smith: To ask the Secretary of State for Culture, Media and Sport what plans she has to visit the Imperial War Museum North seminar on Nuclear Weapons Past and Future to be held on 11 February. [149969]

Estelle Morris: My right hon. Friend, the Secretary of State for Culture, Media and Sport has not received an invitation to this seminar.

National Lottery

Mr. Willis: To ask the Secretary of State for Culture, Media and Sport what the total value is of Lottery revenue used to support Government-sponsored projects within her Department since 1997. [149625]

Estelle Morris: One of the central strengths of the Lottery is its ability to harness other sources of funding, from the private, public and the not-for-profit sectors. 143,000 Lottery awards have been made since 1997. The cost of identifying which related to Government-sponsored projects would be disproportionate.

Michele Verroken

Mr. Hawkins: To ask the Secretary of State for Culture, Media and Sport what plans she has to re-appoint Michele Verroken to a position dealing with the campaigns against the misuse of drugs in sport in the United Kingdom. [150640]

Mr. Caborn: Michelle Verroken's contract of employment with UK Sport has not at this stage been terminated. It would therefore, be inappropriate to make any further comment at this time.

Ministerial Visits

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport what ministerial visits she has planned for the next six months. [145602]

Tessa Jowell: Over the next six months I have to date the following ministerial visits planned:

Venue	*Purpose of meeting*
Liverpool	To attend the LGA Conference
Bradford	To meet Bradford city council
Berlin	To have a bilateral meeting with the German Culture Minister and will attend the Treptow event
Harrow	Visit to Headstone Manor and Ladbroke Racing HQ.
India	To lead a British film delegation to the Frames film and entertainment festival
Nottingham	to attend the National Sports Development seminar
N Ireland	To attend Sports Cabinet
Cyprus	To visit the BOA training camp in advance of the Olympic games
Birmingham	BBC Charter Review Consultation
Leicester	BBC Charter Review Consultation
York	BBC Charter Review Consultation
Barbican	LSO event
Tate Modern	Terry Frost exhibition
ENO	Reopening
Photographers Gallery	Citigroup Photograph Prize
Royal Festival Hall	Concert
Highbury	Football match

Queen (Diamond Jubilee)

Mr. Rosindell: To ask the Secretary of State for Culture, Media and Sport (1) what preparations the Government is making to celebrate Her Majesty the Queen's Diamond Jubilee in 2012; [149927]

(2) if she will make a statement on plans for celebrating Her Majesty's Diamond Jubilee. [150393]

Mr. Caborn: It is too early to consider the celebrations that will mark Her Majesty the Queen's Diamond Jubilee. At an appropriate time the Government will begin discussions with the Palace as to the nature of these celebrations and the necessary preparations will be made.

Royal Family

Mr. Rosindell: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the extent to which the royal family features in material to promote tourism in Britain. [150187]

Mr. Caborn: Britain's royal heritage plays an important role in VisitBritain's work to promote Britain overseas as a tourism destination. Many of the publications and campaign materials produced by VisitBritain feature occupied Royal Palaces as well as historic buildings and castles with links to the monarchy. To celebrate the Golden Jubilee in 2002, VisitBritain published a map of 'Britain's Royal Heritage' featuring a foreword by HRH the Prince of Wales. In addition members of the royal family have supported the tourism industry through visits to VisitBritain's overseas offices and other promotional events such as Royal Tourism Day in June last year

Sports Expenditure

Mr. Gardiner: To ask the Secretary of State for Culture, Media and Sport how the funds allocated to Step into Sport have been spent; and how many volunteers have been recruited. [149962]

Mr. Caborn: The Department for Culture, Media and Sport and the Home Office jointly allocated £7 million to Step into Sport, enabling roll-out from April 2002 to 200 school sport partnerships. By summer 2004 it is expected that some 50,000 young people will have taken sports leaders awards of which 1) some 20,000 will have

helped run festivals of sport for primary schools and 2) some 4,000 will have been supported to begin volunteering in local sports clubs. In addition Sport England is supporting 16 national governing bodies of sport and all 45 county sports partnerships to develop and implement volunteer support strategies.

Mr. Gardiner: To ask the Secretary of State for Culture, Media and Sport pursuant to the answer of 4 December 2003, *Official Report*, columns 166–67W, on sports expenditure, if she will break down by funding block the £103.5 million spent by her Department on sport in 2003. [150023]

Mr. Caborn: The £103.5 million is analysed as follows.

Outturn figures for 2002–03

£

Sport	*Spend*
Children's Play	498,000
Commonwealth Games Ceremonies	8,301,000
Step into Sport	2,271,000
Other Support and Subsidy	1,094,000
Football Licensing Authority Grant in Aid	955,000
Sport England Grant in Aid	80,324,000
Space for Sports and Arts	10,100,000
Total	103,543,000

Sport England's Grant in Aid includes a £28 million allocation of funding to support Manchester Commonwealth Games.

Sportsmatch Scheme

Mr. Hawkins: To ask the Secretary of State for Culture, Media and Sport what plans she has to provide further support to the Sportsmatch scheme. [150638]

Mr. Caborn: The Sportsmatch scheme is funded by Sport England, which confirms that the present level of funding will be maintained until 2005–06. Sportsmatch will receive £3.675 million in each of the financial years 2003–04, 2004–05 and 2005–06. The level of funding for future years will be reviewed by the Department and Sport England well in advance of the end of the present funding arrangements.

Sub-regional Television Stations

Tony Cunningham: To ask the Secretary of State for Culture, Media and Sport what plans she has to discuss with the BBC during the review of its Charter the development of sub-regional television stations. [148164]

Tessa Jowell *[holding answer 19 January 2004]:* Charter review is an open and transparent process, characterised by extensive public consultation and debate. The process is at an early stage and the review will cover the full range of the BBC's activities.

Tourism

Mr. Sanders: To ask the Secretary of State for Culture, Media and Sport what plans she has to visit domestic tourist attractions *(a)* in and *(b)* outside London. [147248]

Tessa Jowell: During the next few months I have to date plans to visit the following domestic tourist attractions:

(a) In London:

Barbican—LSO centenary event

ENO—attend the re-opening

Donmar Warehouse—The Dark

Royal Festival Hall—Britten's Serenade for Horns and strings and Mahler 6

Highbury—Arsenal football match

Tate Modern—Terry Frost exhibition

London—Flora Marathon

Harrow West—Headstone Manor

(b) Outside London she plans to visit:

Cornwall—Eden Project and Royal Cornwall Museum

Cheltenham—Cheltenham Races

Cardiff—Millennium Stadium, FA Cup final

Twickenham—6 Nations rugby match

Silverstone—British Grand Prix

Royal Troon—British Open Golf

York—Heritage sites

UK Rowing

Mr. Hawkins: To ask the Secretary of State for Culture, Media and Sport what additional funding the Government will provide for UK rowing, to enable the UK to host the *(a)* 2005 Rowing World Cup and *(b)* 2006 Rowing World Championships. [150778]

Mr. Caborn: UK Sport is working closely with the Amateur Rowing Association on its application for funding for the 2005 Rowing World Cup, with the aim of submitting it to the Major Events Steering Group in April before further consideration by the UK Sports Council.

UK Sport has already made a grant under the Major Events Programme to the Association of £1,150,000 towards staging the 2006 World Championships.

UK Sport

Mr. Hawkins: To ask the Secretary of State for Culture, Media and Sport what plans she has to appoint a new long-term full-time chairman of UK Sport. [150639]

Mr. Caborn: The interim chair of UK Sport, Sue Campbell, was appointed in September 2003 for up to 18 months and we do not expect to appoint a permanent chair until her term of office expires.

MINISTER FOR WOMEN

Equal Pay

Mr. Woodward: To ask the Minister for Women what the Government's policy is on transparency of remuneration in relation to equal pay; and what plans the Government have to achieve equal pay for men and women performing the same job description where women are paid less than their male counterparts. [150293]

Jacqui Smith: The Government are taking the issue of transparency of pay seriously. We believe that secrecy can perpetuate the gender pay gap. Employers must ensure that pay systems and practices do not lead to pay inequalities between men and women. This is particularly important with discretionary performance pay and bonuses. We have introduced the equal pay questionnaire to help people who think they have an equal pay problem find out from their employers whether this is the case. We believe that carrying out an equal pay review should be good business practice for every employer and have developed a number of initiatives to help them, including funding the Equal Opportunities Commission to develop equal pay toolkits. We are working in partnership with business, trade unions, the EOC and Opportunity Now to ensure that 35 per cent. of large employers have done pay reviews by 2006. We are also improving the way the Equal Pay Act works in practice and will be consulting shortly on proposals to speed up and simplify complex equal value cases.

Sex Discrimination Act

Stephen Hesford: To ask the Minister for Women what plans she has to bring forward amendments to the Sex Discrimination Act to introduce a public duty to promote gender equality. [149562]

Ms Hewitt: The Government are taking forward a significant legislative agenda on equality matters, and they have committed themselves to introduce a duty on public bodies to promote equality of opportunity for women and men generally when parliamentary time allows.

PRIME MINISTER

Prisoners (Egypt)

Mr. Amess: To ask the Prime Minister pursuant to his oral answer of 21 January 2004, *Official Report*, column 1321, if he will *(a)* meet the relatives of the three detainees held in a Cairo prison and *(b)* make representations to President Mubarak on the case being adjourned twice. [150905]

The Prime Minister: As I explained to the hon. Member at Prime Minister's Questions, I am fully aware of the circumstances of this case and understand the disappointment of the men's relatives that the case has been adjourned again.

The UK Ambassador in Cairo has raised our concerns about the case with the Egyptian Foreign Minister on 15 January, one of many representations we have made to the Egyptian authorities. Foreign and Commonwealth Office Ministers have also met the men's families on four occasions.

As the Department which leads on consular cases overseas, the Foreign and Commonwealth Office Ministers should continue to make representations to the Egyptian Government where appropriate and maintain contact with the men's families.

CONSTITUTIONAL AFFAIRS

Advertising Expenditure

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the total expenditure on *(a)* information campaigns and *(b)* advertising was for the Lord Chancellor's Department in each year since 1997. [145384]

Mr. Lammy: The information is listed in the following table.

Over the period in question, the Lord Chancellor's Department spent £4,179,300 on one information campaign in 2000–01, of which £1,347,600 was spent on advertising. The purpose of this campaign was to raise public awareness of the Community Legal Service, set up in April 2000, to provide legal advice and guidance to the public.

Since it became the Department of Constitutional Affairs in June 2003, my Department has also run a campaign to recruit more people from under-represented groups and younger people to the magistracy. The total expenditure to date on this campaign has been £207,000 on regional bus, radio and press advertising.

[1] The Public Guardianship Office replaced PTO in April 2003.
[2] The Department for Constitutional Affairs replaced LCD on June 2003.

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the total expenditure on *(a)* information campaigns and *(b)* advertising was for his Department since its creation. [145385]

Mr. Lammy: Since it was set up on 12 June 2003, my Department has *(a)* spent £207,000 on one information campaign to encourage more people from under-represented groups and younger people to become magistrates.

(b) This information campaign has only comprised advertising, of which the expenditure to date is:

£176,000 for regional bus adverts;

£27,000 for press adverts;

£4,000 for radio advertising.

Legal Finance

Mr. Dismore: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will list the QCs who received the highest overall payments *(a)* from the Community Legal Service budget and *(b)* from the Criminal Defence Service budget in 2002–03. [141417]

Mr. Lammy: The highest total payments made directly from the Community Legal Service fund during 2002–03 were to Lord Brennan QC. Lord Brennan received £606,000 to the nearest thousand.

The highest value of aggregated payments made from the Criminal Defence Service budget during 2002–03 were to Mr James Sturman QC. Mr Sturman received in the region of £620,000.

Care should be taken not to misinterpret these payments as an indication of annual earnings for work carried out in the year for the following reasons:

Payments made during any financial year will include payments for work carried out before the start of the year, and will include payments for cases which started and concluded over several years.

Payments received during any financial year do not necessarily mean that they were paid for work carried out at the rank of QC. Barristers may be paid directly by an instructing solicitor as part a solicitors disbursement.

The figures quoted above are gross payments and are inclusive of VAT, and may include payments on account where applicable as well as travel and hotel expenses incurred.

Magistrates Courts

Chris Ruane: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will list the magistrate benches that *(a)* do and *(b)* do not co-operate in joint police, local authority and magistrate courts training. [144836]

Mr. Leslie: There is no central data collected on the information requested. It is a matter for each MCC whether joint training and other events take place in co-operation with local authorities and the police. In making these decisions MCCs will also take regard to the need to protect the judicial independence of the magistracy. Local Criminal Justice Boards (LCJB) are the forum through which such co-operation may be discussed and agreed. For example, we know of an LCJB which has been instrumental in developing a protocol on anti-social behaviour order matters which is used by all criminal justice service agencies.

LCJBs are run under a tripartite arrangement involving the Home Office, my Department and the Crown Prosecution Service and seek to include the chief officers from the Police, the Probation Service, Crown Prosecution Service, Crown and Magistrates' Courts, the Prison Service, and Youth Offending Teams. Magistrates' Courts are not represented by magistrates, but the Justices Chief Executive (JCE) does attend as the senior official from the local MCC on their behalf. The JCE has overall responsibility for ensuring that appropriate training is planned and delivered to magistrates and can direct as necessary on issues arising from LCJBs.

FOREIGN AND COMMONWEALTH AFFAIRS

Afghanistan

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will report on the work of the Special Rapporteur of the UN Commission on Human Rights in relation to Afghanistan. [149652]

Mr. Mike O'Brien: Kamal Hossain, the Special Rapporteur, in accordance with Commission on Human Rights resolution 2002/19, visited Afghanistan three times in 2002. His last, ninth report, issued on 13 January 2003, focused on the impact on human rights of Afghanistan's transitional process started by the Bonn Agreement of December 2001.

There has been progress on a range of human rights issues since the Special Rapporteur's last report. Most recently, Articles 5, 7 and 58 of the new constitution, agreed on 4 January 2004, oblige the Afghan State to

protect human rights, ensure unity and equality among all ethnic groups, abide by the Universal Declaration of Human Rights, and establish an Independent Human Rights Commission to promote the advancement and protection of human rights. Chapter Two of the constitution has 38 Articles covering the Fundamental Rights and Duties of Citizens. These include Articles 22 and 43 which establish equal rights for all Afghans (both men and women), including access to free education up to degree level; and Article 34 which states that freedom of expression is inviolable.

The Afghan Transitional Administration and international community are committed to providing the security and resources needed to support implementation of the new constitution, and to develop effective mechanisms to tackle continuing human rights violations and abuses, including those against women.

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the progress by the UN and Afghan Transitional Authority on measures concerning Afghan women and girls set out in Economic and Social Council Resolution 2002–04. [149653]

Mr. Mike O'Brien: Since Resolution 2002–04 there have been a number of significant developments affecting women and girls in Afghanistan.

On 5 March 2003, Afghanistan publicly demonstrated its intention to restore full and equal rights for women by ratifying the Convention on the Elimination of All Forms of Discrimination against Women. In the same month, the EU sponsored a resolution on Afghanistan at the Commission on the Status of Women, welcoming the progress that Afghanistan has made to improve the situation for women and urging the Afghan Transitional Administration (ATA) to ensure that a legal framework, protecting women's rights, was put in place.

The Special Rapporteur of the Commission on Human Rights on violence against women, submitted her report on the situation of women and girls in Afghanistan in October 2003. Many of the recommendations requiring action by the ATA were reflected in the new Afghan Constitution, agreed on 4 January 2004. 23 per cent. of the delegates to the Constitutional Loya Jirga were women from across Afghanistan. Articles 22, 43 and 44 of the new Constitution establish women's equal rights, including access to education; and place an obligation on the Afghan State to develop education programmes for women. By March 2003, the number of children attending the first day of school rose to 4.2 million: 37 per cent. of the students are girls, and a third of the teachers are women.

In late 2003, the UN appointed Luntan Bayarmaa as the Gender Adviser in the Office of the UN Assistance Mission in Afghanistan.

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the political parties registered in Afghanistan. [150643]

Mr. Mike O'Brien: According to the United Nations Assistance Mission in Afghanistan (UNAMA), no political parties have yet been registered in Afghanistan.

Saudi Arabia

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what action was taken by his Department as a result of the threat that light aircraft posed to British Airways planes in Saudi Arabia. [150528]

Mr. Straw: We are not able to comment on specific threats but I can assure the right hon. Gentlemen that we take very seriously every threat to aviation and take appropriate action, in coordination with the Department for Transport, airlines and, as necessary, the security and intelligence agencies and foreign governments.

British Indian Ocean Territory

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will assess the feasibility of resettling the population to those parts of British Indian Ocean Territory permitted to Chagossians under the Immigration Ordinance (British Indian Ocean Territory) dated 3 November 2002. [150188]

Mr. Rammell: A study by independent experts into the feasibility of resettlement of the Chagos islands was commissioned in April 2000. The report on the first phase of the study was completed in June 2000 and the report on the second phase, which incorporated findings from the first, was completed in June 2002. Copies of these reports are in the Library of the House.

The study concluded that short-term habitation for limited numbers would be possible but only on a subsistence basis while any long-term settlement would be precarious and costly. No final decisions have been taken on any further phase of this feasibility study.

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will place in the Library a list of actions taken since July 2002 to support the Chagossians. [150189]

Mr. Rammell: No specific measures in support of the Chagossian community have been taken since July 2002. But we continue to be in contact with the leaders and representatives of the community about the concerns that they have.

China

Mr. Ben Chapman: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on relations between China and the UK. [150040]

Mr. Rammell: We currently enjoy good relations with China. These have been built on regular high level visits in both directions, as well as lower level exchanges on many different issues.

As part of our efforts to increase collaboration between the UK and China, a Task Force was set up in September 2003 under my right hon. Friend the Deputy Prime Minister's leadership in order to make firm recommendations for action. Work is progressing and we hope to announce these in late spring.

We have welcomed China's support in the fight against terrorism and have encouraged her to engage constructively in international fora.

We do, nevertheless, continue to raise with the Chinese authorities areas where we disagree, such as Human Rights.

Cyprus

Sir Nicholas Winterton: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with his European Union counterparts on the future of Cyprus and if he will make a statement. [150033]

Mr. MacShane: I frequently discuss the future of Cyprus with my European colleagues. We all agree on the desirability of an early settlement of the Cyprus problem so that a united island can join the EU on 1 May. This remains the Government's objective.

Sir Nicholas Winterton: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of prospects for an agreement between Greece and Turkey on the issue of the future sovereignty of Cyprus when the island accedes to the European Union on 1 May and if he will make a statement. [150034]

Mr. MacShane: The Government continue to believe that a settlement to the Cyprus problem is achievable by 1 May. But this will only be possible if all sides meet the requirements set down by the UNSG in April last year, and make a full and clear commitment to reach a settlement on the basis of the UNSG's proposals. Current indications give some cause for optimism. I was impressed during my recent visit to Turkey by the Turkish Government's determination to work for an early settlement.

Sir Nicholas Winterton: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the role of the latest UN plan for the sovereignty of Cyprus in achieving an agreement between Greece and Turkey and if he will make a statement. [150035]

Mr. MacShane: The Government believe that the UNSG's proposals are the only basis for a just, lasting and comprehensive settlement to the Cyprus problem. The proposals are the product of involvement by the UN over many years. I can see no other solution that can adequately satisfy the legitimate concerns of all sides (including Greece and Turkey) on the island's future.

Sir Nicholas Winterton: To ask the Secretary of State for Foreign and Commonwealth Affairs when he last met the *(a)* Turkish ambassador and *(b)* Greek ambassador to discuss the future of Cyprus. [150036]

Mr. MacShane: My right hon. Friend the Foreign Secretary met the Greek Foreign Minister on 22 January 2004. The Greek ambassador was present. The Foreign Secretary has not had a substantive meeting with the Turkish ambassador so far this year. But we are in very close contact with the Turkish embassy, and with the Ministry of Foreign Affairs in Ankara. I met the Turkish ambassador on 21 January. The future of Cyprus was one of the main topics of discussion in all of these meetings.

Sir Nicholas Winterton: To ask the Secretary of State for Foreign and Commonwealth Affairs what priorities he has set for assisting in negotiations aimed at achieving an agreement between Greece and Turkey on the sovereignty of Cyprus. [150037]

Mr. MacShane: Our first priority regarding Cyprus is to work for a just, lasting and comprehensive settlement. We believe the best, and only realistic, way of achieving this is through the continued efforts of the United Nations. We are actively encouraging all sides to meet the UN Secretary General's requirements for an early resumption of negotiations based on the UNSG's proposals, so that a united Cyprus can join the EU on 1 May 2004.

Departmental Properties

Mr. Maples: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list residential properties sold by his Department since June 1997, and the net cash proceeds of each. [149856]

Mr. Rammell: Since June 1997 the Foreign and Commonwealth Office (FCO) has sold the following residential accommodation:

Head of post residences	*Staff accommodation*	*Properties*

Note:
The total receipts for the period covered is £88.5 million.

For reasons of commercial confidentiality the FCO cannot give under exemption 13 of Part 2 of the Code of Practice on Access to Government Information individual sales figures.

Mr. Maples: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the residential properties purchased by his Department since June 1997, and the total cash cost of each. [149857]

Mr. Rammell: Since June 1997 the Foreign and Commonwealth Office (FCO) has purchased the following residential properties:

Descriptions	
	Properties
1 April 1997 to 31 March 1998	Antananarivo: Residence
	Bridgetown: Staff house
	Kyiv: Staff Flat
	The Hague: Staff Flat
	Vienna: UK Residence
1 April 1998 to 31 March 1999	Montevideo: Staff Flat
	Seoul: Staff house

The FCO is withholding information in individual purchase figures under exemption 12 of Part 2 of the Code of Practice on Access to Government Information.

Entry Clearance

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) how many interviews were conducted by the British High Commission in Islamabad, Pakistan for entry clearance for settlement purposes in each month in the last two years. [149885]

(2) how long it took on average in 2003 for a person applying for entry clearance for settlement to be granted an interview; [149887]

Mr. Mullin: The table shows the number of interviews for entry clearance applications for settlement, conducted at our High Commission in Islamabad in each month during 2002 and 2003.

	Settlement interviews conducted in 2002	*Settlement interviews conducted in 2003*
January	1,607	Nil
February	758	Nil
March	1,065	Nil
April	1,296	Nil
May	697	Nil
June	Nil	Nil
July	Nil	Nil
August	Nil	Nil
September	Nil	Nil
October	Nil	196
November	Nil	123
December	Nil	164

Due to security concerns at the High Commission, three partial evacuations of staff were carried out between October 2001 and May 2002 and only essential staff remained in post by 8 June 2002. Although the number of entry clearance staff in post increased significantly during 2003, the Visa Section's ability to offer applicants an interview has been severely disrupted over the past two years.

During 2002 entry clearance interviews for applicants wishing to settle in the UK were only conducted from January to 21 May. During 2003 interviews for non-settlement applications resumed on 1 June, although interviews for settlement did notresume until 1 October 2003, since when the average wait for interview has been 10 working days. During 2004, 63 interviews are recorded as being conducted up to 20 January.

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs how many people are waiting to be granted an interview by the British high commission in Islamabad for entry clearance for settlement purposes. [149888]

Mr. Mullin: As at 20 January 2004, 62 people had scheduled appointments for settlement interviews up to 10 February. A further 66 applicants were waiting for their interview appointments to be arranged.

EU Countries (Access)

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what the estimated *(a)* number and *(b)* percentage is of the populations of (i) Bosnia and Herzegovina and (ii) Kosovo who have visa-free access to European Union countries by virtue of their Croatian passports or citizenship is; and if he will make a statement. [147734]

Mr. MacShane *[holding answer 14 January 2004]:* While we are aware that a number of Croatian citizens living in Bosnia and Herzegovina and Kosovo have visa-free access to European Union countries by virtue of their Croatian passports or citizenship, we do not have details of precise numbers. In order to travel to the UK, all Croatian citizens must have a visa.

Further research to determine the precise figures required by this question would incur disproportionate costs.

European Court of Human Rights

Mr. McNamara: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the membership of the panel responsible for drawing up the shortlist of United Kingdom candidates for the European Court of Human Rights, indicating *(a)* whom they represent and *(b)* who appoints them. [147791]

Mr. Mullin: The panel comprises:

Sir Hayden Phillips (chair), Permanent Secretary to the Department for Constitutional Affairs;

Lord Justice Laws, Judge of the Court of Appeal;

Lord Cullen of Whitekirk, Lord President of the Court of Session;

Sir Michael Wood, Legal Adviser to the Foreign and Commonwealth Office;

Ms Joanne Foster CBE, former Chair of the Equal Opportunities Commission (lay member).

The composition of the panel was approved by my right hon. Friend the Secretary of State for Foreign and Commonwealth Affairs and the Secretary of State for Constitutional Affairs.

Libya

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment his Department has made of continuing activity in Libya between March and September 2003 aimed at developing a nuclear capability; and what assessment was made on where material and development assistance was coming from. [150529]

Mr. Straw: Under exemption 1 of Part 2 of the Code of Practice on Access to Government Information I am not prepared to comment on particular operations and discussions.

Nuclear-related Technology

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government take to monitor sales of nuclear-related technology by *(a)* Canada and *(b)* France. [148964]

Mr. MacShane: We take a keen interest in supplies to countries of proliferation concern, whatever the source. But the UK Government do not directly monitor sales of nuclear-related technology by Canada and France. Both countries are members of the Nuclear Suppliers Group (NSG) export control regime which controls the supply of nuclear-related items and technology.

NSG members undertake not to transfer sensitive items where there is a risk of diversion to acts of nuclear terrorism, to nuclear explosive activity, or unsafeguarded nuclear fuel cycle activity. They exchange notifications issued as a result of national decisions to deny transfers of sensitive items, and undertake not to approve identical exports without first consulting the state that issued the original denial notification. Further information can be found at: www.nuclearsuppliersgroup.org

Both states are also members of the Zangger Committee, which serves as the "faithful interpreter" of the Nuclear non-Proliferation Treaty (NPT) to harmonise nuclear export controls for NPT parties. Committee members produce annual declarations that they have not transferred certain specified material to non-nuclear weapon states not party to the NPT. More information can be found at: www.zanggercommittee.org.

Olympic Games

Mr. Wyatt: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will ensure that *(a)* the British Council and *(b)* the BBC World Service are included in the diplomatic initiatives to win the 2012 Olympics for London. [150789]

Mr. Mullin: The International Olympic Committee rules of conduct forbid international promotion of the bid until 15 November.

Officials will be working with the British Council over the coming months to consider ways in which we can work together to support the bid once promotion is allowed.

The Foreign and Commonwealth Office has no editorial control over the BBC World Service.

Publicity Campaigns

Malcolm Bruce: To ask the Secretary of State for Foreign and Commonwealth Affairs how much each agency and non-departmental public body sponsored by his Department has spent on (i) advertising and publicity and (ii) information campaigns in each year from 1995–96 to 2003–04 (estimated); and if he will make a statement. [149922]

Mr. Rammell *[holding answer 22 January 2004]:* Budgets for Wilton Park, the Foreign and Commonwealth Office's only agency, and our 10 non-departmental public bodies are not held centrally. To compile this information would incur disproportionate cost.

Sri Lanka

Simon Hughes: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the effects of political tension between the Sri Lankan Prime Minister and President on the peace process and existing ceasefire. [151074]

Mr. Mike O'Brien: We support the Sri Lankan peace process both politically and practically and welcome the progress made since February 2002 when the ceasefire came into effect. We are concerned that the political dispute between President Kumaratunga and Prime Minister Wickremesinghe could have a detrimental effect on the process at a crucial stage. We continue to impress upon the two leaders the importance of resolving the underlying issues in a transparent way and of finding a rapid and positive way forward so that peace talks can resume as soon as possible. We are working closely with international partners to reinforce these messages. We are encouraged that the ceasefire continues to hold and we welcome the continued commitments of the President, Prime Minister and of the Liberation Tigers of Tamil Eelam (LTTE) to the ceasefire and the peace process.

St. Helena

Mr. MacDougall: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the modernising of the St. Helena constitution. [150095]

Mr. Rammell *[holding answer 22 January 2004]:* Councillors from St. Helena will be visiting London next week for a further round of talks with FCO officials on the proposed new Constitution. The intention is to have a new Constitution in place in time for the next dissolution of the Legislative Council in July 2005.

Mr. MacDougall: To ask the Secretary of State for Foreign and Commonwealth Affairs what the principal reasons were for Her Majesty's Government's refusal to accept the St. Helena proposals for a new constitution. [150096]

Mr. Rammell *[holding answer 22 January 2004]:* Discussions are still in progress on a revised constitution for St. Helena. Two councillors from St. Helena,

accompanied by their constitutional adviser, are due in London this week to participate in a further round of talks with Foreign and Commonwealth Office officials.

Taiwan

Mrs. Curtis-Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the accession of Taiwan to the World Health Organisation with full member status. [150636]

Mr. Rammell: There are difficulties over Taiwanese involvement in a UN forum where statehood is a prerequisite for full membership. We would consider with our EU partners any proposal for Taiwanese involvement in WHO which took account of these difficulties.

DEFENCE

Territorial Army

6. **Mr. Liddell-Grainger:** To ask the Secretary of State for Defence what role is envisaged for the Territorial Army in the light of the war in Iraq. [150158]

Mr. Ingram: The Strategic Defence Review emphasised the need for the Territorial Army to be integrated, relevant and usable. It is an essential part of the current and future structure of the Army. Operations in Iraq have underlined the importance of their role, providing key capabilities and skills which complement those of their regular counterparts.

Afghanistan/Iraq (Withdrawal of Troops)

Mr. Sarwar: To ask the Secretary of State for Defence if he will make a statement on the timetable for withdrawing British troops from *(a)* Afghanistan and *(b)* Iraq. [150160]

Mr. Hoon: We have no plans to withdraw British forces from Afghanistan, where they are helping to support the implementation of the Bonn Agreement. With regard to Iraq, the joint United States—United Kingdom declaration of 20 November 2003 on Iraq says:

"Our military participation in the multinational force in Iraq will serve the Iraqi people until the Iraqis themselves are able to discharge full responsibility for their own security."

Our engagement in both Afghanistan and Iraq is driven by clear policy aims, not by arbitrary timetables for withdrawal.

Eurofighter Typhoon

20. **Mr. Llwyd:** To ask the Secretary of State for Defence what the unit cost is of each Eurofighter aircraft; when it is expected that it will be brought into service; and if he will make a statement. [150173]

Mr. Ingram: The Unit Production Cost of a Typhoon aircraft as published in Major Project Report 2003 is £56.8 million. As my right hon. Friend the Secretary of State for Defence announced in his written statement on 30 June 2003, *Official Report*, column 1WS, Eurofighter Typhoon achieved Type Acceptance on that day triggering the process of bringing the aircraft into service with the RAF. Two aircraft have been accepted off contract and RAF pilot training and operational evaluation activities have begun. Operational Employment is due to be achieved in the second half of the decade.

Procurement (British Manufacturing)

22. **James Purnell:** To ask the Secretary of State for Defence if he will make a statement on defence procurement policy and British manufacturing. [150175]

Mr. Ingram: It is the Government's policy to provide the armed forces with the capabilities which they require at the best value for money for the taxpayer. As the Defence Industrial Policy that my right hon. Friend launched with the Secretary of State for Trade and Industry in October 2002 makes clear, we take fully into account the benefit to the United Kingdom economy from defence expenditure, and we seek to encourage a healthy and globally competitive UK defence industry.

Iraq

23. **Mr. Dalyell:** To ask the Secretary of State for Defence if he will make a statement on the death of an Iraqi civilian during a demonstration policed by British troops at Al-Amarah. [150176]

Mr. Ingram: Members of the 1st Battalion of the Light Infantry deployed to a riot in Al Amarah on 10 January to assist the Iraqi Police. Two Iraqis were shot by UK forces, one of whom died. Both were preparing to throw grenades, having already thrown other grenades or explosive devices at UK vehicles, and were a threat to our forces and to local Iraqi civilians.

Tony Wright: To ask the Secretary of State for Defence how many reservists deployed on Operation Telic have resigned following the operation. [149349]

Mr. Caplin: As at 16 January 2004, 8,694 reservists had been mobilised to support Operation Telic. Of these, 118 had left the reserve forces. Not all departures can be linked directly to Operation Telic. The reasons for leaving include having reached end of engagement, medical discharges, retirement and enlistment into another Service.

Norman Baker: To ask the Secretary of State for Defence how many individuals being held by UK forces in Iraq have died in custody; and if he will make a statement. [148578]

Mr. Ingram: I refer the hon. Member to the answer I gave on 19 January 2003, *Official Report*, column 1123W, to my hon. Friend the Member for Leyton and Wanstead (Mr. Cohen).

Alcohol Consumption

Mr. McNamara: To ask the Secretary of State for Defence what the cost was in the last year for which figures are available of alcoholic beverages bought and consumed on military barracks in *(a)* the UK and *(b)* overseas. [149727]

Mr. Caplin: The information requested is not held centrally and could be provided only at disproportionate cost.

Apache

Mr. Tynan: To ask the Secretary of State for Defence what progress has been made in the last year in respect of the training of aircrew for the WAH-64 Apache. [148956]

Mr. Ingram: WAH-64 Apache aircrew training has been proceeding to plan since January 2002 and we are on target to complete the first Conversion to Type course in March this year.

Atlantic Crusader

Mr. Carmichael: To ask the Secretary of State for Defence pursuant to his Answer of 14 January 2004,

Official Report, column 763W, on the Atlantic Crusader, under what flag the ship is sailing; for what purpose his Department has commissioned the vessel; and for how long the charter is. [149964]

Mr. Ingram: The Atlantic Crusader is sailing under the Cypriot flag and as I said in the answer I gave the hon. Member on 14 January 2004, *Official Report*, column 763W, is currently returning from a re-supply voyage to the Falkland Islands. She will then make a second return voyage to the Falklands and is due to complete her charter on 7 April 2004.

Depleted Uranium

Mr. Cousins: To ask the Secretary of State for Defence whether the Challenger 2 smoothbore tank gun demonstrator project will consider measures to end the use of depleted uranium ammunition. [149647]

Mr. Ingram: The 120mm smoothbore gun Technology Demonstrator Programme (TDP) aims to provide information on the application of a 120mm smoothbore gun technology to existing and future direct fire platforms, including Challenger 2.

Part of the TDP involves the investigation of non-Depleted Uranium (DU) 120mm smoothbore ammunition. This option may then be compared with the United Kingdom's existing ammunition in order to determine the optimum means of maintaining the UK's direct fire main armament capability.

Deployment

Mr. Drew: To ask the Secretary of State for Defence how many service personnel are assigned to *(a)* theatres of conflict and *(b)* peacekeeping duties, broken down by country or region involved. [150024]

Mr. Ingram *[holding answer 22 January 2004]*: There are approximately 12,000 British Service personnel deployed outside the United Kingdom to theatres of conflict and peace-keeping duties:

	Number
Iraq/The Gulf	9,800
The Balkans (Kosovo and Bosnia)	1,400
UN Peace-keeping operations:	
Cyprus	400
Afghanistan	340
Africa	40
Georgia	10

The figures exclude Service personnel onboard ships and MOD civilian personnel deployed to these locations in support of these operations.

Far East Prisoners

Mr. Dismore: To ask the Secretary of State for Defence in relation to the compensation scheme for civilian prisoners of the Japanese, how many claims *(a)* have been received, *(b)* have been paid, *(c)* have been refused and *(d)* are outstanding; in relation to *(b)*, how many were (i) not resident in the UK and (ii) not UK citizens but citizens of other Commonwealth countries at the time (A) of payment and (B) of retention; and in relation to *(c)*, how many claimed before 25 June 2001; how many were resident in the UK; and how many of each category were rejected on the grounds they could not show a parent or grandparent born in the UK. [149575]

Mr. Caplin: As of 16 January 2004, 2,922 claims for ex gratia payments have been received from former civilian internees, of which 1,882 have been successful; 1,032 have been unsuccessful, of which 851 were received before 25 June 2001; and eight remain to be dealt with. These figures do not include claims from the surviving spouses of former civilian internees, as these figures are not kept separately from the total of claims from the surviving spouses of all the groups covered by the scheme.

As my hon. Friend the Member for Kircaldy (Dr. Moonie) advised in his answer of 28 April 2003, *Official Report*, column 52W, at that time approximately 800 claims from former civilian internees, including surviving spouses with addresses abroad, were rejected on the blood link criterion, while approximately 300 claims from civilians, including spouses, with United Kingdom addresses were rejected on the blood link criterion. We do not have the other figures sought because the details necessary to produce them were either not required or sought from claimants, or not collated as part of the process of verification of claims.

Foreign Ship Chartering

Mr. Carmichael: To ask the Secretary of State for Defence what steps his Department takes to ensure that foreign ships it charters meet international convention standards for safety and working conditions. [149907]

Mr. Ingram: Vessels being considered for chartering are assessed for technical compliance against a number of key criteria which will include: Marine Superintendent's suitability reports, nature and volume of cargo.

A risk assessment is undertaken, which will include: Port State Inspection records, flag, classification society and age.

When considered necessary, a ship's survey will be undertaken by a recognised marine surveyor prior to any decision to charter.

Human Rights

Mr. McNamara: To ask the Secretary of State for Defence what special training has been provided for the Special Investigation Branch of the Royal Military Police on the implications of the coming into force of the Human Rights Act. [149661]

Mr. Ingram: Special training on changes to Special Investigation Branch (SIB) policies and procedures consequent upon the introduction of the Human Rights Act 1998 has been provided to all SIB units.

Mr. McNamara: To ask the Secretary of State for Defence what measures he has taken to guarantee the *(a)* effectiveness and *(b)* independence of investigation of suspicious deaths among Service personnel occurring overseas as required by Article 2 of the European Convention on Human Rights. [149662]

Mr. Ingram: The rules governing investigation of suspicious deaths of Service personnel outside the United Kingdom are detailed in the Queens Regulations for each Service. The Investigations Branch of the relevant Service Police conducts investigations, where appropriate, in conjunction with the local civilian police force. All cases of sudden death are investigated to Home Office standards using accepted best practice.

Where the body is returned to the United Kingdom, it automatically becomes subject to an inquest by HM Coroner or (in Scotland) the Procurator Fiscal.

Full account is taken of our obligations under ECHR.

Project Soothsayer

Mr. Martyn Jones: To ask the Secretary of State for Defence if he will make a statement on the progress of Project Soothsayer. [149543]

Mr. Ingram: Project Soothsayer is an important part of our investment in Network Enabled Capability (NEC), and was highlighted as such in the New Chapter to the Strategic Defence Review.

Soothsayer will provide Tactical Electronic Warfare equipment for the United Kingdom land forces, and is now in the demonstration and manufacture phase. The programme is proceeding to plan and is currently on track to meet its initial in-service date of 2006. It is also expected to meet its cost and performance targets.

Rape/Violence Against Women

Mr. McNamara: To ask the Secretary of State for Defence what progress has been made in investigating allegations of rape by UK military personnel in Kenya during the last 20 years. [149663]

Mr. Ingram: As part of their on-going investigations, the Royal Military Police Special Investigation Branch (SIB) deployed a team of 20 to Kenya in October 2003 to conduct witness interviews. The SIB completed in excess of 100 witness interviews prior to Christmas. This process, which involves taking video-taped statements of witnesses and gathering supporting evidence, is likely to continue throughout this year.

Mr. McNamara: To ask the Secretary of State for Defence what training is given to UK military personnel stationed abroad on gender sensitivity and issues around violence against women with particular reference to *(a)* rape, *(b)* trafficking and *(c)* forced prostitution. [149665]

Mr. Ingram: No specific awareness training is given to United Kingdom military personnel about violence against women, rape, trafficking and forced prostitution. All members of the armed forces are bound by codes of conduct that set out the standard of behaviour expected of them. They also receive regular diversity training, which includes gender awareness. Personnel posted abroad receive instruction on the customs and culture of the host country including, where relevant, the cultural status of women.

Reserve Forces

Mr. Hancock: To ask the Secretary of State for Defence what plans he has to revise the Reserve Forces (Safeguard of Employment) Act 1985, with particular reference to *(a)* simplifying the procedure, *(b)* taking into account loss of (i) pension and (ii) benefits and *(c)* the legal expenses required in progressing a defended case to a final hearing. [146181]

Mr. Caplin: I refer the hon. Gentlemen to the latter part of my reply of 20 January 2004, *Official Report*, columns 1124–25W.

Once this examination is complete we shall discuss with the Department of Trade and Industry (which is responsible for administering the Reinstatement Committees under the 1985 Act) what, if any, revisions might be necessary.

Mr. Swayne: To ask the Secretary of State for Defence in what circumstances his Department provides legal assistance to reservists to seek redress when they have lost their employment allegedly as a consequence of mobilisation; and if he will make a statement. [148932]

Mr. Caplin: The Ministry of Defence does not provide legal advice or representation to reservists seeking reinstatement to their civilian employment under the terms of the Reserve Forces (Safeguard of Employment) Act 1985. It does, however, provide advice to reservists on their legal right to reclaim their civilian employment and how to seek reinstatement. Each reservist receives a copy of JSP 532, "Guidance for Reservists Returning to Civilian Employment Following a Period of Mobilised Service". The Supporting Britain's Reservists and Employers (SaBRE) campaign team provides a help line and a website which gives additional information and advice.

Mr. Swayne: To ask the Secretary of State for Defence what evaluation has been made of the impact of the SaBRE campaign; and if he will make a statement. [R] [149423]

Mr. Caplin: Since the launch of the SaBRE campaign in October 2002, there have been two substantial pieces of independent research on the impact and effectiveness of the campaign, both commissioned through COI Communications. The reports found that while employers' awareness of the campaign in its first year of existence was low, over 60 per cent. of companies who had been in contact with SaBRE felt that that contact had been positive and worthwhile. The lessons we learn from both these and future studies will form a central part of future SaBRE campaign activity.

Mr. Swayne: To ask the Secretary of State for Defence how many reservists from volunteer reserve units in *(a)* each of the three armed Services and *(b)* each of the 11 areas of the country tasked with aiding the civil authorities in handling major incidents have been mobilised for Operation Telic. [R] [149425]

Mr. Caplin: The number of Civil Contingencies Reaction Force (CCRF) members who are serving on Operation Telic by CCRF region is detailed in the table. In the time available, we have only been able to identify those individuals currently mobilised to support Operation Telic. All are members of the Territorial Army.

	Number
2 South East Brigade (Bde)	26
49 East of England Bde	126
145 Home Counties Bde	39
43 Wessex Bde	2
143 West Midlands Bde	33
160 Wales Bde	25
15 North East Bde (N)	99
15 North East Bde (S)	147
42 North West Bde (N)	21
42 North West Bde (S)	18
51 Scottish Bde (Highland)	45
51 Scottish Bde (Lowland)	34
London Regiment	150
Northern Ireland	[1]0

[1] Only to the extent that once a member is deployed, he is replaced.

Royal Navy

Mr. Gordon Prentice: To ask the Secretary of State for Defence how many *(a)* frigates and *(b)* destroyers are in service with the Royal Navy. [150165]

Mr. Hoon: There are 20 frigates and 11 destroyers currently in service in the Royal Navy.

CABINET OFFICE

Central Office of Information

Mr. Ben Chapman: To ask the Minister for the Cabinet Office what progress has been made in making the Central Office of Information more responsive to Parliament. [147838]

Mr. Alexander: External performance targets are published each year by means of a written statement. Annual performance against external targets is reported and published in the Central Office of Information (COI) Annual Report and Accounts. This is laid before the House each year before the summer recess following the end of the financial year to which the report relates, and copies placed in the Libraries of the Houses.

Civil Contingencies Bill

Mr. Llwyd: To ask the Minister for the Cabinet Office if he will list the *(a)* dates and *(b)* venues of the public consultation in Wales on the draft Civil Contingencies Bill. [150021]

Mr. Alexander: The Public Consultation exercise for England and Wales took place over a period of 12 weeks from 19 June until 11 September.

Of the 379 responses received, 20 were received from organisations based in Wales such as the police, county councils and county borough councils.

Two consultation events took place took during the summer of 2003. The first event was held at Colywn Bay on 21 July for organisations from north Wales. Cardiff hosted the second event on 4 August, which was attended by organisations in south Wales.

The format at both events was the same. The Bill Team gave an extended presentation, followed by a full question and answer session.

Motor Vehicles

Mr. Hoyle: To ask the Minister for the Cabinet Office how many Government *(a)* cars, *(b)* vans and *(c)* trucks in use were built (i) in the United Kingdom, (ii) in the EU and (iii) outside the EU. [149968]

Mr. Alexander: The responsibility for the provision of ministerial cars and drivers has been delegated under the terms of the Framework Document to the Government Car Despatch Agency. I have asked its Chief Executive, Mr. Nick Matheson, to write to my hon. Friend. Copies of his letter will be placed in the Libraries of the House.

Public Services Audit

Mr. Gibb: To ask the Minister for the Cabinet Office if he will place in the Library a copy of the Cabinet Office paper containing an audit of public services referred to in *The Times* 14 January. [148758]

Mr. Alexander: Internal discussion and advice to Ministers remains confidential in line with exemption 2 set out in Part II of the Code of Practice on Access to Government Information.

Details of progress against the Government's Public Service Agreement (PSA) targets are available via: departmental reports; the HM Treasury website; http://www.hm-treasury.gov.uk/performance/ and in a presentation by Professor Michael Barber at the Prime Minister's Press Conference on 30 July 2003; http://www.number-10.gov.uk/output/Page4295.asp

Publicity Campaigns

Brian Cotter: To ask the Minister for the Cabinet Office how much *(a)* his Department and *(b)* each agency and non-departmental public body sponsored by his Department has spent on (i) advertising and (ii) information campaigns in each year from 1995–96 to 2003–04 (estimated); and if he will make a statement. [149623]

Mr. Alexander: Details of my Department's spend on advertising in each year from 1997–98 to 2003–04 (estimated) can be found in the table.

	Advertising (£000)
1997–98	144
1998–99	138
1999–2000	262
2000–01	464
2001–02	2,708
2002–03	400
2003–04 (estimated)	267

Information prior to 1997–98 is not held on our accounting system and is therefore available only at disproportionate cost.

Expenditure incurred on information campaigns is not separately identifiable on our accounting system. Any such expenditure is included within the advertising figures shown.

Expenditure incurred by non-departmental public bodies sponsored by my Department is not held on our accounting system and is therefore available only at disproportionate cost.

The increase in advertising expenditure from 1998–99 to 2000–01 from £138,000 to £464,000 is due to expenditure on recruitment advertising for posts within the Department. These posts range from administration and junior management level through to the senior civil service. Also included is recruitment advertising expenditure for specialist placements for the 'Development Centre', which is part of the Government Information and Communication Service.

The advertising figure for 2001–02 includes £2,491,000 incurred by the Office of the E-Envoy for the UK Online advertising campaign.

Regulatory Impact Assessments

Norman Lamb: To ask the Minister for the Cabinet Office what proportion of regulatory impact assessments fully complied with Government guidelines in terms of new content in 2003. [149420]

Mr. Alexander: The Cabinet Office Regulatory Impact Unit is working with Departments to ensure that Regulatory Impact Assessments (RIAs) are consistent with the most recent guidance and are proportionate to the likely impact of the proposal. Information on overall compliance with the guidelines is not collected, but from April this year, Departments will have to provide information on better regulation, including their compliance with the RIA process and their use of RIAs, as part of their annual reporting requirements.

Special Advisers

Dr. Cable: To ask the Minister for the Cabinet Office whether special advisers have access to the Knowledge Network; whether statistics are collected at constituency level by Government Departments specifically for use on the Network; and if he will make a statement. [148781]

Mr. Alexander: Access to the Knowledge Network is restricted to Ministers, their offices and civil servants, including special advisers, via the Government Secure Intranet. Government Departments do not collect statistics at constituency level specifically for use on the Knowledge Network.

TRADE AND INDUSTRY

Regional Development Agencies

Mr. Jenkin: To ask the Secretary of State for Trade and Industry which regional development agencies have *(a)* an office and *(b)* representatives situated outside the United Kingdom. [149703]

Jacqui Smith: I have been advised of the following answers by the individual Regional Development Agencies (RDAs).

Advantage West Midlands

Advantage West Midlands have offices in France (one person), Germany (one person), Sweden (two representatives who are not direct employees of the Agency) and Belgium (one person).

In North America, Advantage West Midlands shares representation with their partner agency, EMDA, under the British Midlands' brand. Together they have a total of five offices and seven full-time staff based in Washington, Boston, Chicago, San Jose and Toronto; they also employ the services of a telemarketing agency in North America. The British Midlands is also represented on a full-time basis in Japan with two staff. In South East Asia, India and Australia, the British Midlands has part-time representation with offices in Singapore, Mumbai and Sydney and a total of six agents.

East of England Development Agency (EEDA)

The East of England Developments Agency EEDA has an inward investment office in San Jose (Silicon Valley) a joint project between EEDA and Invest East of England. There are no representatives as the office is co-ordinated by the vice-president for business development at Invest East of England.

EEDA also subscribes to the East of England partnership office in Brussels and the Essex and East of England International Trade office in Jiangsu Province China (but does not have offices or representatives).

East Midlands Development Agency (EMDA)

The East Midlands Development Agency (EMDA) is represented in Europe by part-time agents in Germany (Munich—two staff) and Scandinavia (Malmo—one person); EMDA also employs a telemarketing agency in France.

In North America, EMDA shares representation with their partner agency, Advantage West Midlands, under the British Midlands' brand. Together they have a total of five offices and seven full-time staff based in Washington, Boston, Chicago, San Jose and Toronto; they also employ the services of a telemarketing agency in North America. The British Midlands is also represented on a full-time basis in Japan with two staff. In South East Asia, India and Australia, the British Midlands has part time representation with offices in Singapore, Mumbai and Sydney and a total of six agents.

The East Midlands Development Agency is also a partner in the East Midlands European Office (EMEO), based in Brussels. The partnership also includes the region's strategic local authorities, the Regional Assembly and the East Midlands Regional Local Government Association. In addition, EMDA line manages EMEO on behalf of the regional partnership.

London Development Agency (LDA)

The LDA is a partner in the London European Office, a staffed GLA partnership office in Brussels.

North West Development Agency (NMDA)

The North West Development Agency has an office with two members of staff (one full-time and one part-time) in Japan.

As part of a North of England collaboration (a joint venture with One NorthEast and Yorkshire Forward) there are offices in Australia (Sydney) and North America: Chicago (five people), Boston (two people), Atlanta (one person) and Los Angeles: (one person full-time and one person part-time).

The NWDA with the North West Regional Assembly (NWRA) jointly fund an office and one member of staff in Brussels.

One NorthEast

One NorthEast has offices in China: Shanghai (two people) Japan: Osaka (one person, part-time) and Tokyo (two people), Korea: Seoul (one person), Taiwan: Taipei (one person).

As part of a North of England collaboration (a joint venture with North West Development Agency and Yorkshire Forward) there are offices and representatives in Australia (Sydney) and North America (Chicago, Boston, Atlanta and Los Angeles).

There is also a North of England Office in Brussels, managed by the Regional Assembly.

South East England Development Agency

The South East of England Development Agency (SEEDA) shares an officer post with the Regional Assembly operating from South East England House in Brussels, co-located and working with other partners from around the Region. SEEDA is also represented in Washington DC by Odell Simms & Associates and has a representative in each of the following cities: Berlin, San Diego, Boston, Shanghai, Seoul, Tokyo, Osaka and Sydney (NSW), the latter post being part-time.

South West of England Regional Development Agency (SWRDA)

The South West of England Regional Development Agency (SWRDA) have an office in Japan with four staff and in North America, SWRDA have a dispersed team of four staff, however there is no central office there.

Yorkshire Forward

Yorkshire Forward has offices and representatives in Japan and China.

As part of a North of England collaboration (a joint venture with North West Development Agency and OneNorth East) there are offices and representatives in Australia (Sydney) and North America (Chicago, Boston, Atlanta and Los Angeles).

Malcolm Bruce: To the Secretary of State for Trade and Industry if she will provide a breakdown for each region of how her Department allocated its funding of the regional development agencies in 2003–04; and what amounts have been allocated to each region in each year since 1997. [147798]

Jacqui Smith: Eight RDAs were established in 1998 and their first full year of operation was in 1999–2000. The London Development Agency was established in 2000–01. The table shows the RDAs' grant allocation and expenditure for each of the financial years between 1999–2000 and 2002–03 and their initial allocations for 2003–04.

£ million

	1999–2000		*2000–01*		*2001–02*		*2002–03*		*2003–04*
RDA	*Allocation*	*Expenditure*	*Allocation*	*Expenditure*	*Allocation*	*Expenditure*	*Allocation*	*Expenditure*	*Allocation*
Advantage West Midlands	108	103	124	113	171	141	205	204	221
East of England	30	30	40	36	63	55	89	88	85
East Midlands	46	41	77	67	97	86	102	101	118
London	n/a	n/a	268	235	289	266	296	295	291
North West	141	141	159	156	277	270	275	274	318
ONE North West	92	92	101	98	163	156	193	193	219
South East	64	63	75	73	111	97	115	112	123
South West of England	43	43	63	62	92	85	103	103	101
Yorkshire Forward	121	121	148	125	246	207	211	211	243
Totals	645	636	1,054	965	1,508	1,363	1,589	1,581	1,719

Note:

These figures are the grant paid to Agencies and expenditure funded by grant. The Agencies total income will also include EU grants, receipts from sales of property and rental income.

DTI's own contribution to the RDAs was £2 million in 1999–2000, £17 million in 2000–01, £57 million in 2001–02, £161 million in 2002–03 and £177.7million in 2003–04.

Research and Development

Mr. Cousins: To ask the Secretary of State for Trade and Industry to whom expenditure on research and development is distributed; how many staff are directly employed as a result; and how many research establishments of the Department and its agencies there are in each region and nation of the United Kingdom. [149637]

Ms Hewitt: Research and development expenditure is distributed to a range of bodies and principally via the research councils to higher education institutes and their own research establishments. Some 11,000 staff are directly employed by the research councils. The following table gives a regional and national breakdown of the councils' research establishments. Funding is also distributed to industry via schemes such as LINK. Figures for staff directly employed as a result of such funding are not available.

Region/country	*Number of research establishments*
East Midlands	4
East of England	13
London	7
North East	0
North West	4

Region/country	Number of research establishments
Northern Ireland	1
Scotland	15
South East	20
South West	11
Wales	2

Trade Agreements

Mr. Bercow: To ask the Secretary of State for Trade and Industry if she will make a statement on proposals to improve rules of origin for economic partnership agreements. [148519]

Mr. Mike O'Brien: The UK Government recognise the need for a review of the current preferential rules of origin. Support for less onerous regulations on rules of origin is outlined in the Government's 2000 White Paper, "Eliminating World Poverty: Making Globalisation Work for the Poor".

With a number of ACP regions now having reached the stage of launching Economic Partnership Agreement (EPA) negotiations with the EU, there is an increased focus on some of the detailed issues facing EPAs, including rules of origin. An experts meeting on rules of origin for EPAs is planned for February 2004 in Brussels.

More generally on the issue of preferential rules of origin, the Commission (DG TAXUD) is consulting widely on this issue through its recently published Green Paper, "Future of Rules of Origin in Preferential Trade Agreements".

British Energy

Mr. Hancock: To ask the Secretary of State for Trade and Industry how much public subsidy has been given to British Energy *(a)* to cover cash shortfall for unexpected maintenance works and *(b)* for other reasons; how much interest is repayable; and when she expects the money to be repaid. [150213]

Mr. Timms: The credit facility is a loan facility to British Energy that must be repaid by the company under the terms of the restructuring plan. It has been provided in respect of only the company's working capital requirements and cash collateral for its trading activities. A commercial rate of interest of 1 per cent. over the London Interbank Offered Rate (LIBOR) is chargeable on amounts drawn for working capital, and a fee of 1 per cent. per annum on amounts drawn for cash collateral. The maximum amount available under the facility was £650 million but now stands at £200 million. As I said in my reply to my hon. Friend the Member for East Lothian (Anne Picking) on 14 January 2004, *Official Report*, column 780W, British Energy have repaid all outstanding amounts under the credit facility.

Bullying/Harassment

John Robertson: To ask the Secretary of State for Trade and Industry (1) what steps her Department is taking to encourage more employers to frame a formal policy on bullying and harassment in the workplace; [147901]

(2) what plans she has to improve the support available for employees who face bullying or harassment at work; [147902]

(3) what assessment her Department has made of the impact of current Advisory, Conciliation and Arbitration Service guidance relating to bullying and harassment in the workplace. [147903]

Mr. Sutcliffe: The Government take bullying at work very seriously and believe that employees should be able to work without fear of being bullied or harassed by employers, fellow employees or anybody else.

There is a safety net of legislation already in existence that employees can turn to. This includes the: Sex Discrimination Act, Race Relations Act, Disability Discrimination Act, Protection from Harassment Act, Health and Safety Act, Employment Rights Act and the Employment Act 2002.

In addition New Employment Equality Regulations came into force last December protecting those experiencing discrimination, harassment and victimisation at work on grounds of sexual orientation or religion or belief. We are working to support the dissemination of high quality best practice information on the new regulations to employers, individuals and—importantly—advice giving organisations and agencies through the funding we have allocated in the current financial year.

The Health and Safety Executive are producing a set of management Standards. The Standards are designed to provide a yardstick for organisations by which they can gauge the levels of stress and other associated problems among staff thereby helping them to identify where action is required. One of these, the Relationship Management Standard, focuses on bullying.

Assisting with the development of best practice operations is a group, under ACAS management called Race and Equality Advisory Service (REAS). This team of advisers deliver practical, best practice equality advice to organisations. This complements ACAS's wider role of providing services to organisations to help their businesses to flourish.

Continuing the promotion of best practice is the Partnership at Work Fund administered by DTI. This has provided grants to support organisations wishing to focus on best practice initiatives specifically encouraging employees and employers to work together to resolve issues. A number of projects have focused on reducing bullying, while others have included it as part of their wider objectives.

Bullying and harassment is an area of growing importance in the work of ACAS. It uses multiple channels for dissemination of guidance including: publications (available in hard copy and through the internet); face to face training and seminars; advice via the ACAS National Helpline; and also more in depth focused work within workplaces Two publications—'Bullying and Harassment: A Guide for Managers and Employers' and 'Bullying and Harassment: A Guide for Employees' with an annual distribution of approximately 26,000 copies offer guidance and form the basis of training programmes and seminars organised by ACAS.

In 2003, around 200 seminars and training events were run focusing on the subject of bullying and harassment. The feedback from delegates to ACAS events is overwhelmingly positive with, across the board, 97 per cent. reporting that they were satisfied with the quality and content of their training. Follow up work with delegates in 2003, around 200 seminars and training events were run focussing on the subject of bullying and has also shown that the guidance offered by ACAS has positive and lasting benefits with 60 per cent. saying that they review policy and practice after attending ACAS events and around a third actually implemented change or introduced new policies after attending events.

The ACAS National Helpline also plays an important role in disseminating guidance. Around 600 calls are received monthly on this issue. Overall the feedback on the helpline is found to be extremely beneficial with 92 per cent. reporting satisfaction with the service received from the Helpline and 84 per cent. of callers reporting that they found the information provided was valuable in fully answering their inquiry.

Business Link

Mr. Cousins: To ask the Secretary of State for Trade and Industry if she will list *(a)* the allocations to area-based Business Link teams, *(b)* the expenditure per head of population in each area and *(c)* the basis formula for the distribution of resources to each area for (i) 2003–04 and (ii) 2004–05. [149624]

Nigel Griffiths *[holding answer 22 January 2004]:* A breakdown of Business Link Operator (BLO) Core Services allocations for the 2003–04 financial year, together with a breakdown of the allocations divided by resident adult (16+) population data, by individual BLO is shown in the following table

The allocation formula for 2003–04 and 2004–05 is the same. However the data which make up the constituent parts of the formula was updated where possible for 2004–05, resulting in changes between these years. The formula is made up of the following four elements.

1. £99.5 million is allocated in line with current business population (indicator used is the Inter Departmental Business Register for all PAYE and VAT registrations).

2. £20 million for Business Start-ups. Funding is awarded in line in reverse proportion to an aspirational rate of 75 VAT registrations per 10,000 adult population (indicator used is VAT Registrations published by SBS and Resident Adult (16+) population data supplied by the ONS)

3. £10 million is allocated in line with Social Deprivation Index (indicator used is Deprivation data, weighted 2000 indices, produced by the Office of the Deputy Prime Minister).

4. £10 million is allocated in line with population (indicator used is latest Resident Adult (16+) population data supplied by the ONS).

£

Business Link Area	*BLO CS Allocation 2003–04*	*BLO CS Expenditure per head of population*[1]

Office for National Statistics (ONS))

Civil Servants (Disabilities)

Mr. Goodman: To ask the Secretary of State for Trade and Industry what progress has been made in meeting targets for the proportion of people with disabilities in senior posts in her Department. [145997]

Ms Hewitt: In 2000, benchmarks for staff with disabilities in DTI were set across all grades. Targets set internally for staff in senior civil service were:

Percentage

	Benchmark for SCS posts
2000 (base year)	3.8
2002	3.9
2004	4.2
2005	4.7

The Cabinet Office publishes statistical information about senior civil servants with disabilities on its website http://www.civilservice.gov.uk/statistics/documents/pdf/

disability-pct03.pdf. This shows that as of 1 April 2003, 4.0 per cent. of DTI HQ staff in the senior civil service had a disability.

I have recently launched the DTI Disability@Work strategy to further improve career opportunities for staff with disabilities. I expect this will benefit staff at all levels and help increase our representation throughout the grades over time.

Mr. Goodman: To ask the Secretary of State for Trade and Industry if she will set out the number of employees in her Department who have a disability, broken down by disability type. [148987]

Ms Hewitt: The information requested is in the following table:

Type of disability	*Number of staff*[1]
Hearing impairment	33
Visual impairment	23
Speech impairment	[2]—
Learning difficulty	5
Mental illness	13
Mobility impairment	70
Physical co-ordination	32
Reduced physical capacity	78
Severe disfigurement	[2]—
Other	29
Total staff with disabilities	287
Total DTI staff	4,031

[1] Data as at 1 January 2004.

[2] Five or less individuals; the DTI code of practice precludes us from reporting the numbers to preserve confidentiality.

Clergy Employment Rights

Mr. Ben Chapman: To ask the Secretary of State for Trade and Industry pursuant to the answer of 3 December 2003, *Official Report*, column 102W, when she will make an announcement regarding the implementation of section 23 of the Employment Relations Act 1999 in relation to employment rights for clergy. [149818]

Mr. Sutcliffe: We have been considering the current coverage of employment protections as part of the Employment Status Review, including the position of the clergy; we hope to publish a Government response shortly. The Government believe that all workers should be treated fairly, and welcomes the fact that the Church of England is giving serious consideration to the issue of employment protections for its clergy.

Credit Agencies

Jane Griffiths: To ask the Secretary of State for Trade and Industry if her Department will put in place regulations to oblige credit agencies to update their records on individuals; and if she will make a statement. [145399]

Mr. Sutcliffe: Individuals have the right, under existing legislation, to ask for their credit reference file to be amended if it contains information which is incorrect or which is about people with whom they have no financial connection.

If the credit reference agency refuses to comply with an individual's request they can ask the Information Commissioner to assess whether or not this decision is correct under the Data Protection Act 1998.

The Information Commissioner can be contacted at Wycliffe House, Water Lane, Wilmslow, Cheshire SK9 5AF or on 01625 545700.

Departmental Advertising

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how much *(a)* her Department and *(b)* each agency and non-departmental public body sponsored by her Department spent on (i) advertising and (ii) information campaigns in each year since 1995–96; what her estimate is for 2003–04; and if she will make a statement. [149721]

Ms Hewitt *[holding answer 21 January 2004]*: For expenditure on advertising by my Department through COI from 1995–96 to 2000–01. I refer the hon. Member to the answer I gave to the hon. Member for Twickenham (Mr. Cable) on 20 November 2001, *Official Report*, column 162W. Expenditure for 2001–02, 2002–03 and 2003–04 (to date) was £6,610,240, £13,741,906 and £2,044,497 respectively. These figures include advertising by the Small Business Service and exclude VAT.

Information on publicity expenditure from centrally held budgets is contained in the Government's Expenditure Plans and, more recently, the DTI's annual Departmental Report, which are available in the Libraries of the House. Figures relating to other information campaigns, and information on publicity and advertising by NDPBs, are not held centrally and could be produced only at disproportionate cost.

Letter from Claire Clancy to Mr. Malcolm Bruce, dated 26 January 2004:

I am responding to your recent Parliamentary Question to the Secretary of State for Trade and Industry on behalf of Companies House, which is an Executive Agency of the DTI. The expenditure on publicity and advertising is as follows:

£000

	1999–2000	*2000–01*	*2001–02*	*2002–03*	*Forecast 2003–04*
Publicity	199	237	322	252	343
Advertising	391	401	586	526	491

Data for years 1995–96 to 1998–99 are not readily available and can only be provided at disproportionate cost.

Letter from Desmond Flynn to Mr. Malcolm Bruce, dated 26 January 2004:

The Secretary of State for Trade and Industry has asked me to reply to you on behalf of The Insolvency Service in respect of your question (2003/980) asked how much *(a)* her Department and *(b)* each agency and non-departmental public body sponsored by her Department spent on (i) advertising and (ii) information campaigns in each year since 1995–96; what her estimate is for 2003–04.

Information on expenditure by The Insolvency Service Executive Agency through the Central Office of Information is only available from 1999 onwards. This publicity is the release of information on successful orders to disqualify directors under the Disqualification of Directors Act 1986. The expenditure was:

£000

	Amount
1999–2000	115,000
2000–2001	112,000
2001–2002	119,000
2002–2003	81,000
Estimated to end 2003–04	80,105

No other publicity or information campaigns have been carried out by The Insolvency Service in the period 1995 to date.

Letter from Roger Heathcote to Mr. Malcolm Bruce dated, 26 January 2004:

You tabled a question on 19 January 2004 to the Secretary of State for Trade and Industry, asking how much *(a)* her Department and *(b)* each agency and non departmental public body sponsored by her Department spent on (i) advertising and (ii) information campaigns in each year since 1995–96; what her estimate is for 2003–04; and if she will make a statement. I have been asked to reply in respect of the Employment Tribunals Service (ETS) which is an executive agency of the DTI.

The Employment Tribunals Service has not had and will have no expenditure on advertising or information campaigns for the years in question.

Letter from Caren Fullerton in Ron Marchants' absence to Mr. Malcolm Bruce, dated 26 January 2004:

I am replying to this parliamentary question, tabled on 19 January 2004, regarding the amount spent on advertising and information campaigns.

The Patent Office, an executive Agency of the DTI, has undertaken a number of activities aimed at highlighting the important contribution to innovation in the knowledge economy made by Intellectual Property to business, education and the wider community throughout the UK. The priority has been to develop partnerships with key organisations to deliver this message through the network of business advisors and information providers available in the UK to create an "IP literate society".

To achieve this aim we have used strategic advertising to target specific audiences. New guidance literature on patents has been developed which underline the office's commitment.

£000

1995–96	1,963
1996–97	1,719
1997–98	8,908
1998–99	12,364
1999–2000	2,951
2000–01	7,391
2001–02	4,822
2002–03	3,596
2003–04	1,500

The amount spent on information campaigns is only available from 2000–01. To obtain figures for early years would involve disproportionate costs. These figures are:

£000

2000–01	30,037
2001–02	82,814
2002–03	104,651
2003–04	160,000

In addition to the above the Patent Office maintains two internet websites (www.patent.gov.uk and www.intellectual-property.gov.uk which are used to advertise our services and events.

Letter from Dr. J. W. Llewellyn to Mr. Malcolm Bruce, dated 26 January 2004:

The Secretary of State for Trade and Industry has asked me to reply on behalf of the National Weights and Measures Laboratory (NWML) to your question about the Agency's spend on advertising and information campaigns for each year since 1995–96.

The Agency has a small publicity budget but the financial figures do not differentiate between advertising and information campaigns. Figures are not easily retrievable prior to 1999–2000. Expenditure on publicity for each year since 1999–2000 is as follows:

	Expenditure (£000)
1995–96	Not available
1996–97	Not available
1997–98	Not available
1998–99	Not available
1999–2000	37
2000–01	59
2001–02	88
2002–03	60
2003–04 (Estimate)	80

Departmental Grants

Brian Cotter: To ask the Secretary of State for Trade and Industry what funding was allocated for small business support under the Smart scheme from the time of its inception to its closure; and how much of this money was distributed directly to grant recipients. [145513]

Nigel Griffiths: Following a small pilot in 1986, the full Smart scheme was launched in 1988. Initially, there was no separately identifiable funding allocation for the scheme within the larger "Innovation Budget" which provided funds for several other schemes. Smart originally operated as a competition with a fixed number of "Stage 1", or feasibility, awards but a variable number of "Stage 2", or development, awards. The SPUR scheme was introduced in 1991 and merged with Smart in 1997. Since that time there has been a separate provision for the expanded Smart. Expenditure on Smart will occur for several years yet as existing projects progress. Provision, where separately identified, and expenditure were as follows:

£ million

Financial year	Expenditure Plans or Provision where separately identified[1]	Expenditure[1]
1988–89	—	3.0
1989–90	—	5.0
1990–91	—	9.0
1991–92	—	12.3
1992–93	—	18.0
1993–94	—	21.5
1994–95	21.6	21.9
1995–96	16.5	20.1
1996–97	—	20.5
1997–98	30.0	25.8
1998—99	30.0	24.9
1999–2000	32.1	26.5
2000–01	35.9	27.3

£ million

Financial year	Expenditure Plans or Provision where separately identified[1]	Expenditure[1]
2001–02	27	23.7
2002–03	27	32.1

[1] Including SPUR from 1991.

Brian Cotter: To ask the Secretary of State for Trade and Industry what funding has been allocated to finance the Knowledge Transfer Partnerships scheme; and to what timescale this funding applies. [145514]

Nigel Griffiths: DTI funding for Knowledge Transfer Partnerships in F/Y 2004–05, combined with the pre-existing commitments for the Teaching Company Scheme (TCS), which it succeeds, is planned to continue at about the same level as the expenditure in the current financial year, which is approximately £18 million. About a future £7 million per annum is currently provided by other pubic sector bodies.

Brian Cotter: To ask the Secretary of State for Trade and Industry what funding has been allocated for the new Grant for Research and Development scheme; and over what timescale this funding will be available. [145515]

Nigel Griffiths: An initial £100 million has been allocated for projects commencing in the financial years 2003–04, 2004–05 and 2005–06. There will be expenditure on those projects until 2010.

Brian Cotter: To ask the Secretary of State for Trade and Industry what funding her Department is providing in *(a)* 2003–04 and *(b)* in future years to support the Promoting Women's Enterprise Support Initiative. [145520]

Jacqui Smith: DTI is not aware of a programme entitled Promoting Women's Enterprise Support Initiative. It is believed that this is a reference to the measures the Government are taking to support the growth of women's enterprise nationally as they implement the recommendations of the Strategic Framework for Women's Enterprise launched last year.

In this regard, the Government will continue, in this and future years, to fund the promotion of women's enterprise through their key partners—in particular, the Business Link network and through their work with Regional Development agencies and a number of women's enterprise organisations.

Departmental Publications

Mr. Lazarowicz: To ask the Secretary of State for Trade and Industry what criteria her Department uses when deciding whether a leaflet which it publishes is to be made available only on its website. [149560]

Mr. Sutcliffe: The Department decides whether a leaflet should be published only on the internet on a case-by-case basis. Officials consider the intended target audience of the leaflet, whether the audience is likely to have internet access and the cost of publishing the document in hard copy. Where the publication is a lengthy or technical document, the Department may produce a hard copy executive summary, with the full document available only on the internet.

The Department constantly reviews feedback we receive on this issue to ensure that our publications are accessible to those who need them.

Agricultural Produce (Dumping)

Mr. Bercow: To ask the Secretary of State for Trade and Industry what quantitative assessment she has made of the impact of dumping of agricultural produce by developed countries on the economies and living standards of developing countries. [146639]

Mr. Mike O'Brien: The best source of information on this topic are the large number of studies which have already been undertaken by international organisations such as the World Bank, IMF, UNCTAD and the OECD, and by charitable organisations such as Oxfam. The work of these organisations demonstrates through individual case studies the adverse effects which dumping of subsidised agricultural products on world markets can have on developing country economies. It remains, however, very difficult to make an accurate quantitative economic assessment of the overall impact of dumping of subsidised agricultural produce on developing country markets. The World Bank have, however, estimated that the comprehensive reform of all aspects of agricultural policies in developed countries could boost the income of developing countries by as much as $100 billion.

EU Regional Funding

Mr. Woodward: To ask the Secretary of State for Trade and Industry how much EU regional funding has been invested in *(a)* the North West region and *(b)* Merseyside in each of the last five years. [147167]

Jacqui Smith: The following table shows spend over the last five years against the Objective 1, 2 and 3 EU funding streams. Objective 1 applies only to Merseyside, Objective 2 and 3 cover a range of areas across the North West, except for Merseyside.

£

Financial year	Objective 1	Objective 2	Objective 3
1999	101,303,112	37,446,891	41,642,065
2000	61,082,497	80,373,232	10,989,260
2001	123,604,787	83,988,081	26,187,632
2002	98,520,307	21,163,881	47,490,296
2003	84,503,461	138,730,194	27,052,777
Total	470,342,202	361,702,279	153,362,030

Fireworks Act

Ross Cranston: To ask the Secretary of State for Trade and Industry whether she plans to carry out a further fireworks monitoring exercise between October 2004 and January 2005 to assess the effectiveness of the Fireworks Act 2003; and if she will make a statement. [149012]

Mr. Sutcliffe: The Department will be assessing the effectiveness of regulations made under the Fireworks Act 2003 by using the following sources of information:

The 2004 fireworks injury statistics compared to data from previous years;

Information pertaining to retailer compliance provided by the Local Authority Co-ordinators of Regulatory Services (LACORS);

The level of prosecutions under the legislation in conjunction with police reports on, among other things, firework misuse in the street; and

The volume of complaints received from members of the public in relation to previous years.

Using this data, the effectiveness of regulations will be better judged after the fireworks season 2004 and new year festivities of 2004–05.

Friction Dynamex

Mr. Hancock: To ask the Secretary of State for Trade and Industry pursuant to her answers of 13 January 2004, *Official Report,* column 694W, on debarred directors, and column 706W, on Strikes (Dismissal), if she will disqualify Mr. J. Davies of Friction Dynamex as a company director. [149608]

Mr. Sutcliffe: An insolvency practitioner appointed to an insolvent company—which is one that has entered insolvent liquidation, administration, or administrative receivership—has a duty to report to my right hon. Friend the Secretary of State for Trade and Industry on the conduct of the directors of that company. This report is usually submitted to The Insolvency Service within six months of the insolvency practitioner's appointment. Once the report has been received it is reviewed by The Insolvency Service to ascertain whether disqualification proceedings are in the public interest.

In the case of Friction Dynamics Ltd.—the company to which it is presumed then question relates—no report has yet been received from the insolvency practitioner appointed.

The Company Directors Disqualification Act 1986 applies only to directors of a company. Therefore unless an individual can be shown to have been a director or to have acted as a director of a company in insolvency proceedings, they cannot be disqualified under this Act. Mr. J. Davies is not shown as a director of Friction Dynamics Ltd. but is believed to be a former employee.

Germany

Mr. Tynan: To ask the Secretary of State for Trade and Industry what discussions she has had with her German counterpart regarding the labour practices of the UK subsidiaries of *(a)* Deutsche Telekom AG and *(b)* other companies where the German Government retains controlling or significant shareholdings. [149576]

Mr. Sutcliffe: All UK subsidiaries of foreign-owned companies are subject to UK labour law. My right hon. Friend the Secretary of State for Trade and Industry has not had discussions with her German counterpart regarding the labour practices of UK subsidiaries of any company where the German Government retains significant shareholdings. However, the managing director of T-Mobile has been invited to meet with me as Minister responsible for Employment Relations to discuss the recent union recognition discussions at the company.

Home Security Systems

Helen Jones: To ask the Secretary of State for Trade and Industry what steps she is taking to prevent companies installing home security systems from falsely claiming that their systems are approved by the police or that their work is being carried out in conjunction with the police or the local authority. [149345]

Mr. Sutcliffe: It is an offence under the Trade Descriptions Act 1968 to make false claims about goods or services being supplied in the course of business. This includes false statements, about goods being tested or approved by any person, or about services being examined, approved or evaluated by any person. Local Authority Trading Standards Departments are responsible for enforcing the Act.

Honduras

Mr. Bercow: To ask the Secretary of State for Trade and Industry what quantitative assessment she has made of the effect of the opening 10 years ago of the market in Honduras to subsidised rice imports from the United States on *(a)* the economy and *(b)* living standards in Honduras. [149128]

Mr. Mike O'Brien: None.

Internet Usage

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what proportion of *(a)* under 15-year-olds, *(b)* 15 to 24-year-olds, *(c)* 25 to 34-year-olds, *(d)* 35 to 44-year-olds, *(e)* 45 to 54-year-olds, *(f)* 55 to 64-year-olds and *(g)* over 65-year-olds are regular users of the internet. [146118]

Mr. Alexander: I have been asked to reply.

58 per cent. of the adult population are now regular users of the internet compared to 40 per cent. in October 2000. The figures in the table from the National Statistics Omnibus survey show adults in Great Britain who had accessed the internet in the three months prior to interview in October 2003. They are broken down by age group as follows:

Age in years	*Percentage*
16 to 24	88
25 to 44	76
45 to 54	64
55 to 64	45
65 and over	16

Full results are available at www.statistics.gov.uk/pdfdir/intc1203.pdf

While the ONS Omnibus survey only focuses on those over 16, DfES commission a 'young people and ICT' survey each year. The latest results, from a survey in Autumn 2002 found that 84 per cent. of 5 to 18-year-olds use the internet. Full results are available at www.becta.org.uk.

Miners' Compensation

Ms Walley: To ask the Secretary of State for Trade and Industry what procedure is in place to pay the British Coal component part of miners' health

compensation claims in cases where negotiations are continuing with private small mines; and if she will make a statement. [148678]

Nigel Griffiths: The procedures in place are that the Department is making interim payments—of 75 per cent. of the estimated share of general damages payable by British Coal—to claimants who have worked for both British Coal and a small private mine, where no other interims have been paid previously. The first of these interim payments was made in December 2003. Where an interim payment has been paid previously—for example, on the basis that the claimant has previously received a DWP payment for respiratory disease—the Department will reassess the claim after having completed interim payments to those claimants who have received no payments, and will ensure that compensation is topped up to the equivalent of 75 per cent. of estimated British Coal share of general damages.

Mr. Todd: To ask the Secretary of State for Trade and Industry what progress has been made in settling chest disease claims from mineworkers who worked *(a)* in dirty surface environments and *(b)* underground only for short periods. [150843]

Nigel Griffiths: Claimants who worked underground for short periods are already eligible to claim compensation for respiratory disease under the Claims Handling Agreement (CHA).

With regard to discussions on surface dusty workers and chronic obstructive pulmonary disease (COPD), the Judge has instructed the claimants' solicitors' co-ordinating group (CG) to identify lead claimants and to investigate their medical circumstances and dust exposure. The Department is assisting the CG in this process by giving access to British Coal dust records. The CG are to report back to the Judge in February.

The Department and the CG are also in discussions about allowing surface only workers to claim for chronic bronchitis (CB) and temporary exacerbation of asthma (TEA), on the basis of proposals made by the Department to the CG. Any arrangement relating to claims for COPD, CB or TEA for surface workers would not be subject to the cut-off date agreed for the underground scheme.

Motor Industry

Mr. Bellingham: To ask the Secretary of State for Trade and Industry if she will make a statement on the operation of the Rover Task Force. [142124]

Jacqui Smith: The Rover Task Force (RTF) was set up in 2000 to look at the potential effects on the region's economy of the then expected decline of Rover and its supply industry—which was a severe risk at the time of the BMW withdrawal from the company. The report it produced has been carried forward primarily by Advantage West Midlands (the RDA). It remains one of the best examples of speedy response to a crisis coupled with long-term action to address structural change.

There are three themes arising from the RTF:

Modernisation—support to the automotive supply chain in its continuous improvement activity;

Diversification—promotion of and support to encourage businesses to engage in new activity to enable the region to be less dependent on its traditional industries; and

Regeneration—the creation of High Tech Corridors to support the modernisation and diversification of the region's economy by attracting and developing more high tech, high value added businesses by virtue of the presence of research institutions, universities and property opportunities.

Modernisation and Diversification projects are continuing with spend on target and outputs exceeding or in line with expectations. For example, at end of 2002–03 over 2,500 jobs have been safeguarded against a target of 1,700. Equally on the Regeneration agenda, a strategy is in place for High Tech Corridors to provide long-term sustainable development of the region.

Museums (Genetic Research)

Miss Kirkbride: To ask the Secretary of State for Trade and Industry if she will list the research that has been carried out following studies of genetic materials held in British museums. [145593]

Ms Hewitt: Museums hold a great deal of material that could be classed as genetic material: from human, animal or insect remains to collections of seeds and plants samples, even marine sediments contain genetic material which could be used in research.

There are many of possible funders including the Government Departments, devolved Administrations, Research Councils, universities, charities and the museums themselves. There is no central record of all the research funded by these different bodies or of the research carried out on the different sources of genetic material and it would be cost prohibitive to gather it.

National Business Angels Network

Andrew Selous: To ask the Secretary of State for Trade and Industry what sums of money put into the National Business Angels Network have been written off. [150195]

Nigel Griffiths: None.

Project Funding

Brian Cotter: To ask the Secretary of State for Trade and Industry what funding has been provided by her Department to help finance *(a)* the Passport to Export Success scheme, *(b)* the Overseas Project Fund, *(c)* the British Overseas Industrial Placement, *(d)* the Outward Missions Support Unit, *(e)* inward trade missions, *(f)* the Export Promoter Initiatives, *(g)* the Export Marketing Research Initiative, *(h)* the Export Communications Review, *(i)* the Framework Programme 6 and *(j)* the Link Collaborative Research Initiative for each financial year since the inception of each; what funding has been allocated to finance each in future financial years; and if she

will estimate the extent to which businesses have benefited from each initiative to date. [149446]

Ms Hewitt: The schemes at *(a)* to *(h)* are administered by UK Trade and Investment (a joint FCO/DTI Department), and those at *(i)* and *(j)* by the Office of Science and Technology (OST) at the DTI.

The funding figures available for UK Trade and Investment (UKTI) trade support schemes, and projected funding, are as follows.

(a) to (h): Funding details for UK Trade and Investment trade support schemes:

Since 2001, funding has been provided to the schemes as follows:

£ million

	Outturn			*Est. outturn*	*Plans*	
	2000–01	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*2005–06*
(a) Passport to Export	[1]0	2.1	3.6	5.5	5.0	5.0
(b) Overseas Project Fund	2.1	2.9	2.4	2.5	2.3	0.7
(c) British Ovs. Industrial Placement Scheme (BOND)	0.28	0.3	0.3	0.3	0	0
(d) Outward Missions Scheme[2]	1.9	2.1	2.2	2.2	2.2	2.3
(e) Inward Missions Scheme	0.3	0.4	0.3	0.3	0.3	0.4
(f) Export Promoters Scheme	4.4	3.0	2.6	2.6	2.8	2.9
(g) Export Market Research Initiative	1.1	1.2	1.2	1.2	1.2	1.2
(h) Export Communications Review	0.15	0.2	0.2	0.2	0.2	0.2

[1] Scheme under development.
[2] Vertical missions will be subsumed into the Support for Exhibitions and Seminars Abroad (SESA) scheme as of 1 April 2004.

The BOND scheme at *(c)* ends in March 2004.

The support provided by UK Trade and Investment helps businesses to trade successfully in international markets. Those that do so are shown by independent research to be more productive, to pay higher wages and to be more capital intensive than those that do not. The current formal evaluation of the benefits to business from UKTI trade schemes is contained in UKTI's (then British Trade International) Departmental Report (Cm 5915) of May 2003, and in the Autumn Performance Report (Cm 5711) of December 2003, copies of which are in the Libraries of the House. Details of UKTI's 2003–04 performance measurement will be available in late February 2004, and will be included in UKTI's Departmental Report to be published in April 2004.

(i) the Framework Programme 6

The EU's Framework Programmes are funded from the EU budget, not DTI. The current budget for the period 2002 to 2006 is €17.5 billion. The programme supports a range of activities including collaborative research and technological development, researcher mobility, scientific infrastructure and co-ordination of national research funding. The Government's Memorandum and response to the House of Commons Science and Technology Committee inquiry (UK Science and Europe: Value for Money?) in 2003 outlined evidence for the benefit to the UK. The Government are examining these issues further in preparation for negotiation of the next programme. UK businesses benefit from participation in the programme in terms of funding, gaining access to European markets and researchers and participation/risk sharing in R&D on cutting edge technologies.

(j) the Link Collaborative Research Initiative

My Department has funded the LINK Collaborative Research scheme as follows:

£000

	DTI	*Research Councils*	*Total*
1988–97 cumulative	86,873.5	70,369.1	157,242.6
1997–98	11,690.5	13,004.7	24,695.2
1998–99	9,498.1	20,307.3	29,805.4
1999–2000	7,475.1	21,968.2	29,443.3
2000–01	7,330.4	23,403.7	30,734.1
2001–02	9,887.6	23,656.3	33,543.9
2002–03	12,662.1	21,013.2	33,675.3
Total to 2002–03	145,417.3	193,722.5	33,9139.8

No specific funding amount is allocated for future years but follows the assessment of proposals for LINK Collaborative Research programmes.

Fourteen Government Departments and Research Councils sponsor LINK Collaborative Research. Participating businesses, which provide at least matching support for all Government funding, benefit from involvement in the scheme in a variety of ways. The report of a recent independent Strategic Review of LINK Collaborative Research included estimates of the economic benefits of LINK projects to UK business as follows.

Extra business turnover: £700 million-£2,400 million[1]

Increased profit: £250 million-£500 million[1]

Increased employment: 15,000–25,000 posts[1]

[1] Figures are low and high estimates for the direct effect of LINK Collaborative Research on the UK economy to 2000–01.

Relocation Offshore

Mr. Hopkins: To ask the Secretary of State for Trade and Industry (1) what research has been undertaken by her Department on consumer attitudes to locating call centre jobs and services offshore; [149200]

(2) what research has been undertaken by her Department to assess the regional impact of locating services and jobs offshore. [149201]

Ms Hewitt *[holding answer 22 January 2004]:* My Department has not undertaken any research specifically on consumer attitudes to offshoring call centre jobs and services. The DTI paper "Services and Offshoring: The Impact of Increasing International Competition on Services", published on 5 December, outlined the main issues on offshoring and highlights initial areas identified for further research. It invites all those with an interest in the wider offshoring debate, including businesses, employees and their unions, and consumer groups, to share their views with us. On 2 February I will be hosting a roundtable on offshoring with companies and organisations interested in offshoring issues. My Department is also commissioning research on the key factors contributing to the relative competitiveness of the UK's call centre industry to help identify any appropriate actions which need to be taken by industry or Government in response to the increasingly global market for call centre services.

Mr. Hopkins: To ask the Secretary of State for Trade and Industry (1) what research has been *(a)* commissioned and *(b)* undertaken by her Department to assess the economic costs and benefits to the labour market, in particular to women, of UK call centre jobs being located offshore; [149202]

(2) what research her Department has undertaken into whether costs savings are achieved by those UK companies who have located jobs abroad; and whether cost savings are passed on to the consumer; [149203]

(3) what assessment has been made by her Department of *(a)* the long-term trends in moving UK jobs and services abroad and *(b)* the benefits derived by UK manufacturing, utilities and financial services; [149522]

(4) if she will make a statement on the effect of offshoring jobs abroad on UK trade and industry; [149523]

(5) what assessment has been made of the quality of customer service achieved by those companies which have offshored jobs abroad; and how customer service has changed. [149525]

Ms Hewitt *[holding answer 22 January 2004]:* My Department has not commissioned or undertaken any research on the specific issue of economic costs and benefits to the labour market, in particular to women, of UK call centre jobs being located offshore. My Department is commissioning a study on the key factors contributing to the relative competitiveness of the UK's call centre industry. The study will help to identify any appropriate actions that need to be taken by industry or Government in response to the increasingly global market for call centre services.

Mr. Hopkins: To ask the Secretary of State for Trade and Industry when she will publish her Department's study into offshoring of UK call centre jobs. [149524]

Ms Hewitt *[holding answer 22 January 2004]:* The study will examine the key factors contributing to the relative competitiveness of UK call centres including the impact of offshoring. Subject to progress of the study, we will publish a report on its findings in April 2004.

Renewable Energy (Cambridgeshire)

Mr. Djanogly: To ask the Secretary of State for Trade and Industry if she will publish a list of pending applications for windfarm developments in Cambridgeshire, giving their *(a)* location and *(b)* proposed output in KW hours. [149677]

Mr. Timms: Proposals to construct and operate generating stations with a capacity greater than 50 megawatts (MW) require my right hon. Friend the Secretary of State's consent under section 36 of the Electricity Act 1989.

There are no applications for her consent to construct windfarms in Cambridgeshire.

Central Government does not hold records of proposals for on-shore windfarms below 50MW as these fall to be determined by the local planning authority under the normal planning regime.

Strategic Export Controls (Israel)

Richard Burden: To ask the Secretary of State for Trade and Industry what approvals have been given since the period covered by the last Annual Report on Strategic Export Controls for the export to Israel of categories of equipment covering *(a)* leg irons, *(b)* electric shock belts, *(c)* tear gas, *(d)* mortars, *(e)* rocket launchers, *(f)* anti-tank weapons, *(g)* military explosives, *(h)* infra-red and radar sensors and *(i)* chemical and biological agents. [149337]

Nigel Griffiths: Details of export licences approved for Israel in 2003 will be published in the 2003 Annual Report on Strategic Export Controls later this year. I can however confirm that, following the then Foreign Secretary's announcement in 1997 of a ban on the export and transhipment through the UK of equipment which has been shown to be used for torture and other cruel, inhumane or degrading treatment or punishment, items such as leg irons and electric shock belts are never approved for export from the UK. Similarly, in 2003 the Government did not authorise tear gas for export to Israel.

Wind Farms

Mr. Hoyle: To ask the Secretary of State for Trade and Industry if she will list applications for wind farm developments in Lancashire, broken down by *(a)* location and *(b)* output in kw per hour. [149967]

Mr. Timms: Proposals to construct and operate generating stations with a capacity greater than 50 megawatts (MW) require the Secretary of State's consent under section 36 of the Electricity Act 1989.

She is currently considering one application for her consent to construct a 65 MW wind farm at Scout Moor. The applicant estimates that the on site wind analysis

indicates a likely capacity factor of 35 per cent. which would indicate that the proposed wind farm would generate some 197,000,000 kWh per annum.

Central Government do not hold records of proposals for on shore wind farms at or below 50 MW as they fall to be determined by the local planning authority under the normal planning regime.

Transdepartmental Science and Technology Group

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will break down how funding for knowledge transfer programmes was allocated in 2003–04; and what amounts were allocated in each year since 1997. [147800]

Ms Hewitt: The information is as follows:

£ million

	1999–2000	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*2005–06*
Science Enterprise Challenge	25	—	—	5	10	—	—
University Challenge	10	10	20	5	—	—	—
Higher Education Innovation Fund (OST)	—	—	20	20	40	61	70
Higher Education Innovation Fund (DfES)	—	—	—	—	20	20	20
Public Sector Research Establishment	—	—	10	—	—	5	10
Total	35	10	50	30	70	86	100

There was no expenditure prior to 1999, as the first of these programmes were announced in the pre-Budget statement November 1998. The Higher Education Innovation Fund is run jointly with DfES and their contributions have been included in the table. A number of other DTI initiatives contribute to knowledge transfer, but are recorded under separate headings in DTI's annual report.

Work-Life Balance

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry when the full report on the Work-Life Balance survey will be published. [150348]

Mr. Sutcliffe: The Second Work-Life Balance Study: Results from the Employers' Survey report was published in November 2003 and can be found at www.dti.gov.uk/er/infomr.htm. The accompanying employee survey report will be published in spring 2004, although preliminary findings can be found at www.dti.gov.uk/er/emar/wibstwo_employee.pdf.

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry what assessment she has made of the level of discrimination against pregnant women in the workplace. [150349]

Ms Hewitt: There has been no formal assessment of the level of discrimination against pregnant women in the workplace. However, the Equal Opportunities Commission (EOC) launched a formal investigation into pregnancy discrimination on 1 September 2003 using its powers under the Sex Discrimination Act 1975. The final report is expected in February 2005.

WORK AND PENSIONS

Council Tax Benefit

Mr. Waterson: To ask the Secretary of State for Work and Pensions what steps he plans to take *(a)* to make council tax benefit more accessible for pensioners through (i) a simpler benefit and (ii) simpler claim forms and *(b)* to ensure effective administration of the benefit; and if he will make a statement. [148234]

Mr. Pond: We have recently introduced a single, streamlined, claim form for claiming both housing benefit and council tax benefit; we are now rolling out a shortened version for pensioners, which will simplify the claims process even further.

On-going practical support to local authorities is being provided through the Help Team, monitoring teams, and the Benefit Fraud Inspectorate to help remove barriers to poor performance. We are maintaining the investment in the Performance Standards Fund over this and the next two years, amounting to some £200 million over all.

From 1 April 2004, we are abolishing the current restriction whereby people living in band F, G or H properties have their council tax benefit restricted to the maximum help available for band E properties.

In addition we will be taking forward the council tax benefit take-up campaign, which was announced on 15 December 2003, to support authorities in ensuring that those entitled to help with their council tax bills claim council tax benefit.

Stakeholder Pensions

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the average level of employer contributions, net of tax relief, into stakeholder pension schemes since their introduction. [150458]

Malcolm Wicks: Inland Revenue data show that in 2001–02 the average contribution to stakeholder pension schemes made by employers was £420 per annum.

This figure represents the average contribution for the financial year 2001–02 to schemes where an employer is contributing. The data are for the full year and does not include a scheme start date, so where a scheme was started in-year, although the contributions would only have been made for part of the year they have been averaged over 12 months. Therefore the estimate will not reflect the true annual average if the scheme had operated for a full year.

At present comparable figures for subsequent years are not yet available as although we have data on total contributions made and number of schemes receiving

tax relief, data showing the schemes which received employer contributions has not yet been released; data for 2002–03 will become available in summer 2004.

Between 2001–02 and 2002–03 total contributions to stakeholder schemes by employers have risen by 267 per cent. from £150 million per annum to £400 million per annum.

Advice Organisations

Mr. Webb: To ask the Secretary of State for Work and Pensions what assessment he has made of the overlap between existing Citizens Advice Bureaux and the new advice-based organisations funded by his Department; and if he will make a statement. [148528]

Mr. Pond: Our Agencies provide advice to people on those areas for which this Department is responsible, ensuring that people understand their rights and responsibilities within the benefit system, the benefits that they are entitled to, the job opportunities open to them, and what services are available to improve their job prospects. However, we do not give the broad range of advice that is available from Citizens Advice Bureaux.

In some cases, the best way to provide our services is in conjunction with other organisations within the community. For example, Jobcentre Plus is working with Cornwall Neighbourhoods for Change on its Neighbourhood Pathway project. It is providing its knowledge and skills in helping people back in to work, and has invested £883,890 during the period April 2003 to December 2003, supporting 420 people into work and 320 people into training and mainstream Jobcentre Plus programmes.

Benefit Payments (Computer Downtime)

Mr. Webb: To ask the Secretary of State for Work and Pensions how many hours of system downtime relating to the computer dealing with direct payment there have been in each month since it was introduced. [147653]

Mr. Pond *[holding answer 13 January 2004]*: Information is not available in the format requested.

The Department has contingency arrangements in place to maintain continuity of benefit payment, in the unlikely event of benefit system failure.

The figures for Service Availability across all Departmental Systems over the past 6 months has been 99.98 per cent. Availability has not dipped under the 99.2 per cent. target over the past year.

Carers Allowance

Simon Hughes: To ask the Secretary of State for Work and Pensions how many people *(a)* over and *(b)* under 65 were entitled to carers allowance but did not receive payment in each (i) constituency and (ii) local authority area in London in the last year for which figures are available. [146088]

Maria Eagle: Information on people in London local authorities who are entitled to Carers Allowance but are not receiving a payment due to the overlapping benefit rules, as at 31 August 2003, the latest data available is given in the table.

Local Authority	*All*	*Under 65*	*65 and over*

Note:

Figures are rounded to the nearest 5, totals may not sum due to founding

Source:

IAD Information Centre, 100 per cent. sample

The following table contains the figures for the number of people who have an entitlement to Carers Allowance but do not receive it due to overlapping benefit rules, but receive a Carer Premium[1].

[1] The carer premium is intended to focus help on those who have limited opportunity to gain income from work because of providing care for a person with disabilities. It is awarded where the carer receives Carer's Allowance or has an underlying entitlement to Carer's Allowance. The premium is paid in addition to other benefits and premiums, and where both the claimant and their partner satisfy the conditions, two carer premiums are paid.

The figures include Minimum Income Guarantee (MIG) data. They include all IS (over and under 60s) and JSA(IB) cases with a carer premium but with no CA. From October 2003, Pension Credit replaced Income Support for people over 60. The Pension Credit calculation for people who are entitled to Carer's Allowance includes an additional amount equal to the carer premium in Income Support.

	Thousands
	Total
All	50.6
Under 65	24.7
65 and Over	26.0

Notes:

1. Figures are based on a 5 per cent sample and are therefore subject to a degree of sampling variation.
2. Figures have been rounded to the nearest hundred and are expressed in thousands. Totals do not sum due to rounding.
3. Income-based JSA will include those receiving Income-based JSA with an underlying entitlement to Contribution-based JSA.
4. There is an equivalent premium called the Additional Amount in Pension Credit. There are no data available on this as yet.

Child Support Agency

Mr. Peter Duncan: To ask the Secretary of State for Work and Pensions what powers the Child Support Agency has in making deductions from earnings orders against army personnel. [145678]

Mr. Pond: None. However, the Agency can ask Her Majesty's forces to use their discretionary powers to make deductions from the pay of Service personnel.

John Barrett: To ask the Secretary of State for Work and Pensions what steps are taken by the Child Support Agency to verify the financial status of a resident parent who has a new unmarried partner in cases where the non-resident parent has applied for departures in CSA maintenance. [147835]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to John Barrett, dated 26 January 2004:

In reply to your recent Parliamentary questions about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked what steps are taken by the Child Support Agency to verify the financial status of a resident parent, who has a new unmarried partner, in cases where the non-resident parent has applied for departures in CSA maintenance.

In all cases falling under the "old scheme" where the resident parent (that is, the parent with care) is not receiving a prescribed benefit or Tax Credit, the Agency will seek to verify that parent's financial circumstances. Specifically we will ask the parent with care for evidence of their earnings and any other income, as well as their housing costs. We will do this whether or not the parent with care has a partner and whether or not the non-resident parent has applied for a departure.

It may help you to know that, under the "old scheme", if the parent with care has a partner, the Agency will ask for verification of that partner's income only if they share a child. This is because the only relevance of the partner's income is in determining whether we should make full allowance for the shared child in the parent with care's exempt income, or whether the partner can contribute to the support of the child. Under the revised Child Support scheme the Agency does not take into account the financial circumstances of the parent with care in any way.

Mr. Jenkins: To ask the Secretary of State for Work and Pensions what the projected date is for moving all existing child support cases to the new computer system. [149472]

Mr. Pond: I refer the hon. Member to the written answer I gave the hon. Member for Castle Point (Bob Spink) on 18 December 2003, *Official Report*, column 1092W.

Disability Living Allowance

John Robertson: To ask the Secretary of State for Work and Pensions what percentage of applicants for disability living allowance assessed by a Benefits Agency Medical Service doctor were *(a)* successful and *(b)* unsuccessful in their applications in 2003. [148450]

Maria Eagle: The numbers of DLA New Claim decisions made, which have included an Examining Medical Practitioner's Report as part of the evidence used, are set out in the following table.

January-November 2003

	Number (percentage)
Total decisions including an EMP report in the evidence used	126,760
Awards	56,780(45)
Refusals	69,980 (55)

Note:
Figures are rounded to the nearest five.
Source:
100 per cent. MIS data

Figures include awards made as a result of new claims only. Figures are for January to November 2003 as December 2003 figures are not yet available.

Incapacity Benefit

Chris Ruane: To ask the Secretary of State for Work and Pensions what plans he has to review the requirement for persons who have *(a)* chronic mental health problems and *(b)* chronic physical conditions to undergo (i) IB50 and (ii) personal capability assessment. [149715]

Maria Eagle: The Personal Capability Assessment, which includes completion of IB50 self-assessment where relevant, is an effective method of determining a person's functional ability.

The IB50 self-assessment questionnaire has been designed to give people the opportunity to provide information about their problems, mental or physical, that they feel the decision maker should take into account in relation to functional assessment.

People with a severe mental illness are exempt from the Personal Capability Assessment, and procedures have been developed so that people who meet the exemption criteria are identified at the earliest possible stage. Any cause of incapacity which may include a mental health problem triggers a request for a report from the person's GP or medical specialist. People who are exempt are not required to complete a self-assessment IB50.

We have no plans to change these arrangements at present.

Chris Ruane: To ask the Secretary of State for Work and Pensions what plans he has to improve access for incapacity benefit claimants to personal capability assessment tests by introducing peripatetic surgeries in rural areas. [149716]

Maria Eagle: Under the contract for provision of Medical Services, SchlumbergerSema must ensure that customers are not required to travel for more than ninety minutes by public transport, on a single journey, for an examination, unless previously agreed with the customer; SchlumbergerSema will pay all reasonable and actual expenses to customers who attend for an examination and apply for reimbursement.

Information leaflets are provided to customers, advising them to contact the Client Help desk if they expect to experience difficulties in travelling to the Medical Examination Centre. Under certain circumstances, SchlumbergerSema will authorise the refund of taxi fares if agreed in advance with the Client Help desk; domiciliary visits can also be arranged, where it is determined that a customer is unable to travel on medical grounds.

We have no plans to change these arrangements at present.

Annabelle Ewing: To ask the Secretary of State for Work and Pensions how many appeal tribunal decisions on incapacity benefit appeals have been challenged by social security offices in *(a)* Scotland and *(b)* the rest of the United Kingdom in each of the last two years; and how many challenges were successful in each case. [148746]

Maria Eagle: Decisions of tribunals may be appealed on a point of law to Social Security Commissioners. The numbers of tribunal decisions appealed in incapacity benefit cases in the last two years are in the tables.

Tribunal decisions on incapacity benefit appealed by the Secretary of State on a point of law during 2002

	Scotland	*Elsewhere in the UK*
Decisions appealed	7	11
Successful	7	8
Unsuccessful	0	3

Tribunal decisions on incapacity benefit appealed by the Secretary of State on a point of law during 2003

	Scotland	*Elsewhere in the UK*
Decisions appealed	11	34
Successful	5	13
Unsuccessful[1]	1	6
Result awaited	5	15

[1] Figure for elsewhere in the UK includes one appeal withdrawn.
Note:
Successful appeals include decisions set aside by a tribunal chairman and those found by a Social Security Commissioner to be erroneous in law.

New Deal

Mr. George Osborne: To ask the Secretary of State for Work and Pensions how many people have taken part in the New Deal for Musicians in each year of the programme's existence. [147952]

Mr. Browne: The information requested is in the table.

Number of participants in New Deal of Musicians

Year	*Total in year*
1999	1,515
2000	3,484
2001	4,015
2002	2,859
2003[1]	1,590
Total	13,463

[1] Up to 28 August 2003

Source:
New Deal for Musicians Database

Mr. George Osborne: To ask the Secretary of State for Work and Pensions how many people in *(a)* his Department and *(b)* JobCentrePlus are employed in administering the New Deal for Musicians. [147953]

Mr. Browne: There is no separate administrative resource allocated specifically to New Deal for Musicians as it is delivered as part of the wider New Deal for Young People and New Deal 25 plus.

Mr. George Osborne: To ask the Secretary of State for Work and Pensions how many people have been placed in sustainable employment by the New Deal for Musicians; and what percentage that represents of the total number of people taking part in the programme. [147954]

Mr. Browne: Since November 2002 New Deal for musicians has been adopted as part of the mainstream New Deals; New Deal for young People and New Deal 25plus. The successful job outcomes of New Deal for Musicians therefore contribute to the total data of those two programmes as appropriate.

Separate statistical information on the number of New Deal for Musicians participants finding sustainable jobs is not available and could only be obtained at disproportionate cost.

Mr. George Osborne: To ask the Secretary of State for Work and Pensions what the annual cost is of the New Deal for Musicians *(a)* this year and *(b)* for each year of the programme's existence. [147955]

Mr. Browne: The estimated cost of the three year New Deal for Musicians national pilot was £9 million. Annual costs are not available for this period. The spend on New Deal for Musicians for 2002–03 is £3.1 million and 2003–04, to December 2003, is £2 million.

Occupational Pension Schemes

Mr. Tynan: To ask the Secretary of State for Work and Pensions what guidance he has issued to *(a)* the trustees and *(b)* the administrators of occupational pension schemes where, on winding-up, the remaining assets of the scheme are insufficient to cover SERPS liabilities for some members. [148977]

Malcolm Wicks: Section 74 of the Pensions Act 1995 sets out the provisions on overriding scheme rules so as to enable the trustees of a scheme to discharge their liabilities to members for pensions and other benefits even if the those pensions and benefits are not fully secured. When an occupational pension scheme is winding up, it ceases to contract-out and its trustees must secure members contracted-out rights.

The Inland Revenue manual CA15 (Cessation of Contracted-out Pension Schemes) contains guidance on securing contracted-out rights. CA15 is available via the Inland Revenue website at: www.inlandrevenue.gov.uk. Inland Revenue writes to scheme administrators making them aware of the guidance once the scheme has ceased to contract-out. Also, when they are informed that a scheme is no longer contracted-out, the Inland Revenue sends form CA7992 to scheme trustees. This gives general guidelines on securing the liabilities, and the options that are available.

No guidance has been issued by the Department for Work and Pensions on this subject.

Pension Credit

Mr. Peter Duncan: To ask the Secretary of State for Work and Pensions what percentage of pensioners from *(a)* the UK, *(b)* Scotland and *(c)* Dumfries have received pension credit since its introduction. [145684]

Malcolm Wicks: The information requested is not available in the format requested. Such information as is available is given in the table based on numbers of pension credit recipients in Great Britain, Scotland and Dumfries and Galloway.

Recipients of pension credit, 31 December 2003

	Numbers of pension credit recipients	*Percentage of population aged 60 and over (percentage)*
Great Britain	2,533,960	21.1
Scotland	263,290	24.5
Dumfries and Galloway	8,615	22.5

Notes:
1. Figures are rounded to the nearest 5.
2. Percentages have been calculated using the ONS population estimates for mid 2002.
3. Figures for recipients include a small number of partners under age 60.

Mr. Djanogly: To ask the Secretary of State for Work and Pensions what the overall sum paid to pensioners under the pension credit scheme is to date in *(a)* England, *(b)* Cambridgeshire and *(c)* Huntingdon. [149686]

Malcolm Wicks: The information is not available in the format requested. The information that is available is as follows.

The latest departmental information suggests that between 1 October 2003 and 30 November 2003:

An estimated £688 million was spent on Pension Credit in England;

An estimated £5.0 million was spent on Pension Credit in Cambridgeshire;

An estimated £0.7 million was spent on Pension Credit in Huntingdon.

Notes:
1. Pension Credit was introduced on 6 October 2003, therefore this figure includes 5 days of expenditure on the Minimum Income Guarantee (the benefit Pension Credit replaces).
2. This figure is based on total expenditure on Pension Credit in Great Britain (GB) from the departmental Programme Accounting Computer System (PACS) data. The country, county and constituency level expenditure is estimated using 100 per cent. Generalised Matching Service (GMS) data.

3. The estimate for England has been rounded to the nearest million pounds.
4. The estimates for Cambridgeshire and Huntingdon have been rounded to the nearest £100,000.

Mr. Djanogly: To ask the Secretary of State for Work and Pensions (1) how many people resident in *(a)* the constituency of Huntingdon and *(b)* Cambridgeshire have received pension credit since its introduction; [149687]

(2) how many people resident in *(a)* the constituency of Huntingdon and *(b)* Cambridgeshire have applied for pension credit since its introduction. [149688]

Malcolm Wicks: At 31 December 2003 there were *(a)* 2,018 pensioner households (2,397 individuals) in the Huntingdon constituency and *(b)* 12,974 pensioner households (15,474 individuals) in Cambridgeshire receiving pension credit. Information on the number of people who have applied for pension credit is not available in respect of individual constituencies or counties.

Mr. Djanogly: To ask the Secretary of State for Work and Pensions what percentage of pensioners in the constituency of Huntingdon have received letters setting out their rights under the pension credit scheme. [149689]

Malcolm Wicks: Information on the number of people in individual constituencies who have received a letter about pension credit is not available.

Sarah Teather: To ask the Secretary of State for Work and Pensions (1) how many people have claimed pension credit in Brent, East since it was introduced; [149908]

(2) how many people are entitled to claim pension credit in Brent, East. [149909]

Malcolm Wicks: At 31 December 2003 there were 3,205 pensioner households (3,786 individuals) in the Brent, East constituency receiving pension credit. Information on the number of people who have applied for or are eligible for pension credit is not available in respect of individual constituencies. However, we estimate that approximately 450,000 pensioner households in the London region are eligible for pension credit.

Pensions

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the *(a)* number and *(b)* percentage of working age people contributing to a non-state pension scheme. [150452]

Malcolm Wicks: The number of working age people currently contributing to a non-state pension scheme is 11.7 million.

The percentage of working age people currently contributing to a non-state pension scheme is 36 per cent.

Source:
Family Resources Survey 2002–03.

Notes:
1. Those who are 'contributing' are members of a non-state pension schemes who are themselves currently contributing to the scheme.
2. All figures are estimates and are taken from the Family Resources Survey (FRS). 2002–03 is the latest year for which data is available. The coverage of the Survey is the UK.
3. Non-state pension refers to either an occupational pension or personal pension
4. Stakeholder pensions are included as personal pensions in the estimates.
5. Working age has been defined as 20–59 for women and 20–64 for men.
6. Some individuals may contribute to both an occupational and a personal pension scheme but there are no overlaps. The figures include those contributing to either an occupational pension or a personal pension.

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the *(a)* number and *(b)* percentage of working age people accumulating rights in a non-state pension scheme. [150453]

Malcolm Wicks: The number of working age people who are currently accumulating rights to a non-state pension scheme is 14.5 million

The percentage of working age people who are currently accumulating rights to a non-state pension scheme is 44 per cent.

Source:
Family Resources Survey 2002–03.

Notes:
1. Those 'accumulating rights' includes those who are members of a non-state pension with either themselves or their employer currently contributing. The figures do not include 'deferred' pension rights as neither themselves nor their employer are currently contributing.
2. All figures are estimates and are taken from the Family Resources Survey (FRS). 2002–03 is the latest year for which data is available. The coverage of the Survey is the UK.
3. Non-state pension refers to either an occupational pension or personal pension
4. Stakeholder pensions are included as personal pensions in the estimates.
5. Working age has been defined as 20–59 for women and 20–64 for men.
6. Some individuals may contribute to both an occupational and a personal pension scheme but there are no overlaps. The figures include those contributing to either an occupational pension or a personal pension.

Post Office Card Accounts

Mr. Wyatt: To ask the Secretary of State for Work and Pensions what arrangements he has made for wheelchair users who cannot use their hands to collect benefits and pensions at post offices when using the new PIN card system. [150786]

Dr. Stoate: To ask the Secretary of State for Work and Pensions what arrangements his Department has made to help partially sighted clients with post office card accounts, who have difficulty in using a PIN number, but do not wish to nominate another person to collect their money for them, to obtain their payments from the post office branch. [150998]

Mr. Pond: Our information campaign has an important role to play in the way we take customers through the changes, including collecting their money from their account at the post office if they wish. Customers will be supplied with information, which clearly sets out their 'account options' and enables them to freely choose the best account to suit their circumstances.

For some people, a card-based account may not be the most suitable option and they may prefer to use an account with a cheque book or building society pass book. If post office access is a priority, people in these circumstances can choose one of the accounts that are accessible at post office branches.

The Post Office is working to ensure its services are as accessible to as many customers as possible and is planning to make adjustments to the PIN pads installed in Post Office branches.

We have always recognised that there will be some people, such as those who cannot open or manage any sort of account that we cannot pay by Direct Payment. In consultation with a range of bodies representing those affected, we are developing an exceptions method of payment to meet the needs of people in these circumstances, which will be accessible at Post Office branches.

Retirement Pension

Mr. Cousins: To ask the Secretary of State for Work and Pensions how many claims are outstanding or not fully resolved relating to *(a)* the retirement pension assessment of widows and widowers, *(b)* the retirement pension assessment of those who have experienced divorce and *(c)* change of circumstances in retirement pension assessments for those already of pensionable age for (i) the most recently available month and (ii) each same month in the three previous years. [149635]

Malcolm Wicks: The information is in the table.

Number of outstanding claims or not fully resolved

	December 2003	*December 2002*	*December 2001*	*December 2000*
(a) the RP assessment of widows and widowers	5,702	[1]—	[1]—	[1]—
(b) the RP assessment of those who have experienced divorce	10,240	[1]—	[1]—	[1]—
Total	15,942	10,604	4,457	3,831
(c) change of circumstance in RP assessments for those already pension age (bereaved customers)	20,293	4,782	[1]—	1,825

[1] Not available

Notes:

1. Prior to December 2003 *(a)* and *(b)* RP claims were counted together.
2. Figures relating to *(c)* refer to a change in entitlement for a surviving spouse when one or both in a couple are in receipt of RP and one of the couple dies. We have no figures available for *(c)* in relation to Dec 2001 due to changes in organisational structure. NPC deals with other changes of circumstance to RP eg increases in RP due to a change in the customer's contribution record. These changes of circumstance are not included in the figures stated against *(c)* in the table.

Mr. Cummings: To ask the Secretary of State for Work and Pensions how many retired pensioners are using *(a)* post offices, *(b)* banks and *(c)* building societies to receive their pension in the Easington constituency. [148853]

Malcolm Wicks: The information is not available in the format requested.

However from information available as at 29 November 2003, in the Easington parliamentary constituency, the number of pensioners (women aged 60 and over, men aged 65 and over) who receive their state pension is given in the following table by type of method of payment.

	Number
Total paid at a post office, by either order book or post office card account	9,038
Paid direct to a bank or building society account (some of which can be accessed at post office branches)	3,685
Total number of state pensioners	12,723

Source:
IAD Information Centre, 100 per cent. sample

Information available does not differentiate between bank and building society account for payments direct to accounts. No information is held as to the number of pensioners who receive payments direct to a normal or basic bank or building society accounts who then collect all or part of their pension at the Post Office.

The data exclude state pension recipients who receive state pension combined with another benefit and are paid through another benefit system.

Sema Group

John Robertson: To ask the Secretary of State for Work and Pensions what assessment his Department has made of the performance of the Sema Group in its contracts to operate the Benefits Agency Medical Service. [148497]

Maria Eagle: The Department undertook a major review of the contract in 2001 as a basis for negotiating new and more stretching service level targets for the extension of the existing contract to 2005; the revised targets reflected recommendations for improvements made by the Social Security Select Committee and the Public Accounts Committee.

There are more than 60 targets against which Medical Service's performance is measured, including targets for speed, accuracy and quality; achievement of these targets is reviewed on a monthly basis, with the vast majority being regularly met. For example, in respect of incapacity benefit examinations, the actual average clearance times target of 32 working days (from the receipt of the referral for examination from the DWP to the return of the case to the DWP) has consistently been met, with a year to date performance of 29.5 working days.

The latest report published by the National Audit Office on 17 October 2003 recognised that there has been good progress, and significant improvements to the contracted services.

TREASURY

Bank of England

Keith Vaz: To ask the Chancellor of the Exchequer when he last met the Governor of the Bank of England. [151064]

Ruth Kelly: Ministers and civil servants have meetings with a wide range of organisations and individuals as part of the process of policy development and analysis. As with previous Administrations it is not this Government's practice to provide details of all such meetings. All such contacts are conducted in accordance with the Ministerial Code, the Civil Service Code and Guidance for Civil Servants: Contacts with Lobbyists, as appropriate.

Civil Servants

Dr. Cable: To ask the Chancellor of the Exchequer how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150274]

Ruth Kelly: The current space occupied by civil servants of the Treasury, the Inland Revenue and the Customs and Excise in *(a)* central London is 202,453 sq m and in *(b)* Greater London is 28,017 sq m.

Complaints

Rob Marris: To ask the Chancellor of the Exchequer what proportion of complaints to *(a)* the Inland Revenue, *(b)* HM Customs and Excise and *(c)* district valuers' offices receive a substantive response within 30 working days. [146853]

Dawn Primarolo: The Inland Revenue, Customs and Excise and the Valuation Office do not capture information about substantive responses within 30 working days.

In the nine months ended 31 December 2003, the Inland Revenue provided a substantive response to 76 per cent. of complaints within 15 working days. In the same period, the Valuation Office provided a response to 74 per cent. of complaints within 20 working days. For the six months ended 30 September 2003, Customs and Excise provided a substantive response to 84 per cent. of complaints within 10 working days.

Compliance Performance Targets

Mr. Gray: To ask the Chancellor of the Exchequer pursuant to his answer of 15 January 2004, *Official Report*, columns 868–69W, on taxation adjustment, whether performance related pay has been paid as a consequence of adjustments in *(a)* the whole and *(b)* part of the Large Business Office's Compliance performance in the years 1999–2000 to 2001–02. [151095]

Dawn Primarolo: Performance assessment is not linked to nor based on the individual's contribution to yield or taxation adjustments achieved. No performance related pay was paid in consequence of the Large Business Office's performance yield figures reported above.

Mr. Gray: To ask the Chancellor of the Exchequer what compliance performance targets were set for the *(a)* Large Business Office (CT) and *(b)* Inland Revenue in each of the years 1998–99 to 2002–03; and on what dates these targets were set. [151096]

Dawn Primarolo: The information is as follows:

(a) Large Business Office (LBO) compliance performance targets for 2002–03 are set out in the LBO Annual report for the year ended 31 March 2003. For 1998–99 to 2001–02 they are set out in the Board's Annual Reports for these years. These targets are agreed in January/February before the start of each financial year.

(b) National Inland Revenue compliance performance targets for 1998–99 to 2002–03 are set out in the Board's Annual Reports for these years. These targets are agreed as part of the annual planning round.

Correspondence

Mr. Kaufman: To ask the Chancellor of the Exchequer when he will reply to the letter to him dated 16 October 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. J. Miah. [151236]

Dawn Primarolo: Following confirmation that the letter referred to was dated 18 December, I have replied to my right hon. Friend.

Financial Services

Mrs. Lawrence: To ask the Chancellor of the Exchequer if he will make a statement on financial services. [151508]

Ruth Kelly: As I set out in my written statement on 5 January 2004, *Official Report*, column 1, Lord Penrose delivered the report of his inquiry into Equitable Life to the Treasury on 23 December.

I can report that Lord Penrose has also made his report available to the Serious Fraud Office; and having studied the contents of the report the Treasury has asked the Serious Fraud Office to consider a number of issues raised in the report.

As I set out in my statement of 5 January, the Treasury intends to publish the report in full as soon as possible. I will keep the House fully informed.

I can also confirm that, purely for the purpose of informing the Government's response on specific items of policy, relevant extracts of the report have been shown to named officials of the DTI.

Green Minister

Norman Baker: To ask the Chancellor of the Exchequer what work his Department's Green Minister has undertaken in the last three months. [150874]

John Healey: As the Treasury's Green Minister, I am committed to 'greening' the Department's operations, to integrating environmental considerations across policy areas, and to improving the economic analysis underpinning the Government's environmental initiatives.

In the last three months, as the Treasury's Green Minister my work has included membership of the Ministerial Sub-Committee on Green Ministers and the Sustainable Development Taskforce, and meetings with representatives of non-governmental organisations and other key stakeholders on topics ranging from climate change to waste to aviation.

I have written to senior officials responsible for sustainable development in each of the Chancellor's Departments and agencies to stress the importance attached to ensuring that appropriate priority and commitment are given to meeting the Government's sustainable development objectives and targets, and I led a meeting of the Working Group of responsible officials from across each of these Departments and agencies in October.

In addition, the development of a range of environmental policy measures, including those announced in the pre-Budget report (PBR) on 10 December 2003 (Cm 6042), is my responsibility. The measures contributing to the Government's sustainable development strategy set out in PBR 2003 include:

announcing plans for changes to the eligibility criteria for climate change agreements that will provide better incentives for businesses to encourage energy efficiency and scope to extend the sectors eligible;

the extension, subject to state aid approval, of relief from levy for aggregates used in processed products and virgin aggregate in Northern Ireland;

a proposed framework for alternative fuels including a commitment to providing three year certainty on duty differentials for all alternative fuels;

a gradual increase in the duty rate for LPG to a level which better reflects its relative environmental benefits;

recycling landfill tax revenues to businesses; and

a consultation in early 2004 on tackling diffuse water pollution, including a consideration of the pros and cons of economic instruments.

As I confirmed in reply to a question from my hon. Friend the Member for Morley and Rothwell (Mr. Challen) on 13 November 2003, *Official Report*, column 408, all Government Departments will be required to consider sustainable development as part of the 2004 spending review process, as they were in 2002.

Information Technology

Mr. Allan: To ask the Chancellor of the Exchequer what assessment he has made of the extent to which information technology procurement has improved as a result of the Gateway review process. [150927]

Mr. Boateng: Quantitative assessment of the Gateway process is provided to OGC's Supervisory Board three times yearly. In addition, the National Audit Office are currently compiling details of the value for money benefits to projects of the OGC Gateway review process.

This assessment shows that use of the OGC Gateway process leads to a significant improvement in likelihood of success for all procurement projects and programmes—including IT-enabled—and this improvement is particularly marked where the process is applied to projects or programmes in their early stages.

Inland Revenue

Mr. Goodman: To ask the Chancellor of the Exchequer what section of the Inland Revenue is responsible for co-ordinating the activities of the Inland Revenue in relation to people with disabilities. [150411]

Dawn Primarolo: The Inland Revenue co-ordinates its activities in relation to people with disabilities through two sections: services for taxpayers with disabilities are co-ordinated by a team in Service Delivery; the Human Resources section co-ordinates activities and services relating to the employment of people with disabilities. The Inland Revenue also has a full time specialist disability adviser who supports both areas and works with external disability organisations.

Mr. Goodman: To ask the Chancellor of the Exchequer what plans he has to appoint a disabilities champion to take responsibility for the Inland Revenue's service delivery to people with disabilities. [150412]

Dawn Primarolo: A member of the Board of the Commissioner of the Inland Revenue has already been appointed as a consumer champion and as such covers a wide range of service delivery areas, including service to people with disabilities.

Mr. Goodman: To ask the Chancellor of the Exchequer what recent representations he has received in relation to the definition of an incapacitated person used in tax and VAT legislation; and if he will make a statement. [150413]

Dawn Primarolo: The Government have received a number of representations on a wide variety of subjects, including a report from the Low Incomes Tax Reform Group on disability and the tax system, which included representations on this specific issue.

Mr. Goodman: To ask the Chancellor of the Exchequer what measures are taken by the Inland Revenue to advertise home visits for those with disabilities *(a)* in leaflets and *(b)* on the Inland Revenue website. [150414]

Dawn Primarolo: Inland Revenue are currently developing a strategy to promote their home visits arrangements to the target groups that will include information on the internet and in leaflets.

Mr. Goodman: To ask the Chancellor of the Exchequer whether the Inland Revenue has a disabilities helpline; and if he will make a statement. [150416]

Dawn Primarolo: At present the Inland Revenue has no plans to establish a disabilities helpline. Advisers in our telephone contact centres are trained to deal with telephone calls from the full range of our taxpayers. We believe that this approach provides the flexibility to respond to the differing requirements of our taxpayers base.

Mr. Goodman: To ask the Chancellor of the Exchequer whether all Inland Revenue offices have textphone or similar communication aids. [150418]

Dawn Primarolo: All Inland Revenue Enquiry Offices are registered with the BTTypetalk service.

Mr. Goodman: To ask the Chancellor of the Exchequer what equipment is available in Inland Revenue offices open to the public for those with hearing difficulties. [150419]

Dawn Primarolo: When last audited in early 2002, out of a total of 323 of Inland Revenue Enquiry Offices providing a face to face service, 86 per cent. had portable loop systems and 27 per cent. of them had fixed induction loop systems. We are in the process of carrying out another audit.

In spring 2003 Inland Revenue introduced a set of national standards for their Enquiry Offices specifying that they be equipped with a fixed and portable induction loop system, and a crystal listening device. They are progressing to all of their Enquiry Centres meeting this standard.

Mr. Goodman: To ask the Chancellor of the Exchequer what training is given to frontline Inland Revenue staff in dealing with people with disabilities. [150422]

Dawn Primarolo: All new members of staff receive disability awareness material as part of the Inland Revenue's induction process.

During the last three years over 90 per cent. of staff have received diversity awareness training which includes disability related issues.

In addition, individual staff are nominated for training courses according to the requirements of their role and 22,752 staff have attended a training course specifically covering disability issues over the last three years.

Inward Migration

Mrs. Curtis-Thomas: To ask the Chancellor of the Exchequer if he will make a statement on progress in establishing an appropriate method for measuring net migration into the UK. [150333]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mrs. Claire Curtis-Thomas, dated 26 January 2004:

As National Statistician, I have been asked to reply to your request for a statement on progress in establishing an appropriate method for measuring net migration into the UK. (150333)

A substantial amount of work in this area has already been completed, and a program of further work is ongoing.

The results of the 2001 Census showed that the mid-year population estimates had over-estimated the population of the UK over the previous decade. Subsequent research showed that this was partly because net migration into the country had been over-estimated. The Office for National Statistics (ONS) made several improvements to the methodology for estimating total international migration, making fuller use of the available sources. The improved methodology was used to produce the international migration estimates for 2001, and was also applied retrospectively from 1992 onwards in order to produce revised total international migration estimates for the inter-censual decade. ONS released final revised international migration estimates for 1992–2001 in June 2003. The revised methodology was used again to produce the 2002 international migration estimates published in November 2003, which are available on the National Statistics website at the following address: http://www.statistics.gov.uk/pdfdir/inme1103.pdf

It was already recognised that international migration is the hardest component of population change to measure before the results of the 2001 Census were published. A National Statistics Quality Review of international migration statistics was initiated in March 2002. This was aimed at identifying the means of making the required improvements to the reliability and comprehensiveness of international migration statistics. The National Statistics Quality Review report was published on the National Statistics website in September 2003. Following the publication of this report, ONS produced an implementation plan for taking forward the review's recommendations. This was published on the National Statistics website in January 2004. Both the review and the implementation plan are available at the following address: http://www.statistlcs.gov.uk/methods_quality/quality_review/population.asp

The work outlined in the implementation plan is already underway. ONS, in conjunction with the Home Office are working to complete some of the actions identified by the end of 2004. Other actions are suitable for longer term planning, and in some cases are dependent on developments in other government departments for their successful completion.

Lamfalussy Committee of Banking Supervisors

Mrs. Lawrence: To ask the Chancellor of the Exchequer if he will make a statement on the announcement on 20 January about the new Lamfalussy committee of banking supervisors. [151509]

Mr. Gordon Brown: I am delighted to inform the House that on 20 January EU Finance Ministers agreed to base the new Lamfalussy committee of banking supervisors ('CEBS') in London. The equivalent committee for securities supervisors ('CESR') will continue to be based in Paris and that for insurance ('CEIOPS') will be based in Frankfurt. The location of these regulatory committees in Europe's major financial centres is a good outcome for the UK and for financial markets in the EU. This high-level committee of EU banking supervisors and central banks will be a key forum for national authorities to improve supervisory practices and advance the EU's legislative agenda. It should help ensure that more flexible EU legislation is adopted quicker, with improved consultation, transparency, and greater input from market practitioners. This should help drive forward the EU Financial Services Action Plan, providing Europe with a more dynamic, innovative, efficient and competitive financial services sector, to the benefit of consumers and businesses. The banking committee will meet at least three times a year, and should meet in London for the first time in the spring. It has already assumed its responsibilities and is currentiy looking to secure permanent offices in London. The committee is currently chaired by Jose Maria Roldan, Director General of the Bank of Spain, and around forty senior regulators and central bankers will participate in its meetings.

National Insurance

Mr. Webb: To ask the Chancellor of the Exchequer if he will estimate the additional revenue to the Exchequer that would be generated by increasing the rate of Class 4 National Insurance contributions by 3 per cent. [150459]

Dawn Primarolo: I refer the hon. Gentleman to the publication "Tax ready reckoner and tax reliefs, December 2003" which is available in the Library of the House and also on the Treasury website (http://www.hm-treasury.gov.Uk/media//AAB24/pbr03_trr.pdf). The figures exclude any estimate of behavioural response to the tax change.

Public Bodies

Keith Vaz: To ask the Chancellor of the Exchequer who the members of National Savings and Investments were on 1 January; what their term of office is in each case; and what their remuneration is. [151308]

Ruth Kelly: As of 1 January 2004, National Savings and Investments have six Executive Directors and four Non Executive Directors:

Name	*Term of office*	*Salary*[1] (£000)	*Bonus*[1] (£000)
Alan Cook—Chief Executive	5 years	145–150	10–15
Trevor Bayley—Finance Director	5 years	115–120	10–15
Steve Owen—Partnerships and Operations Director	Permanent	85–90	10–15
Gill Cattanach—Commercial Director	Permanent	90–95	10–15
Sandra Postles—HP Director	Permanent	75–80	10–15
John Prout—Sales Director	Permanent	95–100	10–15
Richard Wright—Non Executive Director and Chair of the Board	3 years	15–20	0
Marie Stafford—Non Executive Director	3 years	10–15	0
Paul Spencer—Non Executive Director	3 years	10–15	0
Michael Medlicott—Non Executive Director	3 years	10–15	0

[1] As banded in our Annual Report and Accounts.

Public Service Contracts

Mr. Laxton: To ask the Chancellor of the Exchequer what progress has been made in the inquiry led by Mr. Alan Wood into the awarding of public service contracts in the EU; whether its remit includes awarding train franchises; and when he expects the inquiry to report. [150992]

Mr. Boateng: The Review was announced in the pre-Budget report on 10 December 2003. Work has now commenced and Mr. Wood will report in Summer 2004.

The Review's scope is all sectors covered by the EC Directives on public procurement in the fields of Services, Supplies and Works[1].

[1] 92/50/EEC, 93/36/EEC, 93/37/EEC.

Security Passes

Mr. Oaten: To ask the Chancellor of the Exchequer how many security passes have been reported *(a)* lost and *(b)* stolen by staff in (i) his Department and (ii) departmental agencies in the last 12 months, including the Inland Revenue and Her Majesty's Customs and Excise. [147982]

Ruth Kelly: The number of passes reported lost or stolen between 1 January and 31 December 2003 by staff and contractors in HM Treasury and departmental agencies can be found in the following table:

Department	*Lost*	*Stolen*	*Total*
HM Treasury	125	3	128
HM Customs and Excise[1]	26	15	41
Debt Management Office	11	0	11
The Government Actuary's Department	8	0	8
Inland Revenue	n/a	n/a	n/a
National Savings and Investments	13	4	17
Office of Government Commerce	14	3	17
OGC Buying Solutions	0	0	0
Office of National Statistics	101	0	101
Royal Mint[2]	n/a	n/a	11
Valuation Office Agency	73	4	77

[1] HM Customs and Excise figures cover their offices nationwide, but some losses and thefts may have been dealt with locally, and not reported to Head Office.

[2] Royal Mint do not keep separate records for losses and thefts.

Passes are invalidated as soon as they reported missing, so they cannot be used if found. The passes do not contain information identifying them to their respective building or organisation. Staff are regularly reminded of the importance of keeping their security pass safe, through the induction programmes and security awareness publicity.

Sport, Health and Fitness

Mr. Gardiner: To ask the Chancellor of the Exchequer (1) what assessment he has made of the benefit to the UK economy of *(a)* professional and *(b)* amateur sports in (i) 2001, (ii) 2002 and (iii) 2003; [149948]

(2) what assessment he has made of the benefit to the UK economy of the health and fitness sector in *(a)* 2001, *(b)* 2002 and *(c)* 2003. [149949]

Mr. Caborn: I have been asked to reply.

In June 2003, Sport England published the report, "The Value of the Sports Economy in England", which presented a summary of the value of the sports economy to the economy in England. The data in the report relates to 2000, the last year for which comprehensive data is available. The report found that sport generated more than £9.8 billion in value added to the economy in England, approximately 1.5 per cent. of total gross value added (GVA) for England. The breakdown according to sector is as follows:

	Value added (£ million)
Commercial sport	3,553
Of which:	
Spectator sports	709
Participation sports	380
Retailing	966
Sport-related manufacturing	840

	Value added (£ million)
Commercial non-sport	4,226
Of which:	
Higher education establishments	422
Voluntary sector	1,215
Local Government	844
Total	9,838

Sports Clubs

Mr. Gardiner: To ask the Chancellor of the Exchequer (1) what estimate he has made of the financial benefit to amateur sports of setting the thresholds at which community clubs are exempt from corporation tax at £50,000; [149951]

(2) what estimate he has made of the financial benefit to amateur sports of mandatory rate relief at 80 per cent. for registered community amateur sports clubs. [149950]

John Healey: The doubling of the corporation tax exemption thresholds for community amateur sports clubs will remove the requirement to complete an annual tax return for eligible clubs enabling them to concentrate on the development of their clubs. The financial benefit to amateur sport clubs will depend on the financial circumstances of each club.

The financial benefits of mandatory rates relief for registered community amateur sports clubs will depend upon the size and structure of each club and whether it previously received discretionary rates relief from its local authority.

Standard Life

Dr. Cable: To ask the Chancellor of the Exchequer what representations his Department has received from policy holders regarding the future of Standard Life. [149728]

Ruth Kelly: I refer the hon. Gentleman to the answer I gave to my hon. Friend the Member for Preseli Pembrokeshire (Mrs. Lawrence) on 13 January 2004, *Official Report*, columns 634–35W. The Financial Services Authority has regulatory responsibility for Standard Life. I understand that no Standard Life policy holders have made representations to the Treasury concerning the future of Standard Life.

Tax Collection

Mr. Letwin: To ask the Chancellor of the Exchequer how many staff are employed by the Inland Revenue to administer the collection of unpaid tax. [R] [149809]

Dawn Primarolo: The Inland Revenue's Receivables Management Service is responsible for the collection of unpaid tax and national insurance. As at 1 January 2004 the Receivables Management Service had 5,800 staff directly employed in collection of tax and national insurance.

Tax Credits

Mr. Webb: To ask the Chancellor of the Exchequer if he will place in the Library a copy of the most recent standard mailing issued to all tax credits recipients by the Inland Revenue. [148967]

Dawn Primarolo: A copy of the most recent general mailing to tax credits recipients, the first issue of Tax Credits Update, has been placed in the Library of the House.

Mr. Webb: To ask the Chancellor of the Exchequer when the child elements of Jobseeker's Allowance and Income Support will transfer to Child Tax Credit payments; and whether modifications to the new tax credits IT system will be needed to facilitate the transfer. [150532]

Dawn Primarolo: I will make a statement shortly on our plans for bringing IS/JSA claimants with children into the Child Tax Credit.

Teenage Pregnancies (Yorkshire)

David Davis: To ask the Chancellor of the Exchequer what the number of teenage pregnancies has been in (i) Haltemprice and Howden and (ii) East Riding of Yorkshire in each of the last five years. [149669]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. David Davis dated 26 January 2004:

As National Statistician I have been asked to reply to your recent question on what the number of teenage pregnancies has been in (i) Haltemprice and Howden and (ii) East Riding of Yorkshire in each of the last five years. (149669)

To protect the confidentiality of individuals, figures for Haltemprice and Howden parliamentary constituency cannot be released as this might reveal small numbers of cases in individual wards.

The number of teenage pregnancies for East Riding of Yorkshire UA for 1997 to 2001 (the latest year for which figures are available), are shown in the table below.

In the answer provided, teenagers are interpreted as those under 18 at the time of conception, because the target set by The Government Strategy on Teenage Pregnancy is for this age-group.

	East Riding of Yorkshire
1997	195
1998	196
1999	167
2000	174
2001 (Provisional)	173

Wales

Mr. Llwyd: To ask the Chancellor of the Exchequer how much money is being awarded to Wales above the Barnett block to cover the costs of Objective One projects in 2003–04. [150654]

Mr. Boateng: The additional funding was set out in the 2002 Spending Review: New Public Spending Plans, 2003–2006 (Cm 5570).

VAT

Mr. Prisk: To ask the Chancellor of the Exchequer (1) what assessment his Department has made of the change in unreclaimable tax for small businesses following the recent increase in the starting threshold for VAT; [149767]

(2) what assessment his Department has made of the impact on unreclaimable costs for small businesses of the recent increase in the starting threshold for VAT. [149768]

John Healey: With the increase in the VAT threshold to £56,000 at Budget 2003, 2,000 small businesses were removed from compulsory VAT registration. Businesses who wish to continue to be VAT registered may, of course, continue to do so voluntarily.

There is therefore no impact on unreclaimable costs for small businesses.

EDUCATION AND SKILLS

Assistance Funding (Tower Hamlets)

Ms Oona King: To ask the Secretary of State for Education and Skills what funding will be available to fund organisations helping parents in Tower Hamlets in the next 12 months; and what proportion of funding will be allocated to *(a)* national organisations and *(b)* local organisations. [146232]

Margaret Hodge: Funding in the next financial year—to support parents both nationally and locally—will be available from a number of sources within my department. Our best estimates of the funding options available in Tower Hamlets are as follows:

In the financial year 2004/05 £331,909 is available in Tower Hamlets for groups to apply to the Local Network Fund for Children and Young People.

The Local Network Fund (LNF) provides community groups with small grants to support local projects and activities for 0 to 19-year-olds experiencing disadvantage and social exclusion. The fund enables local people to identify solutions to local issues affecting children and young people through grants ranging between £250 and £7,000 to community groups under four themes: Aspirations and experience; Economic disadvantage; Isolation and access; and Children's voices. Groups whose activities support parenting, involve or target parents, providing there is a clear outcome for children and young people are eligible to apply for a Local Network Fund grant.

Decisions on allocating funding are made by assessment panels comprising local people with knowledge of issues faced by children and young people in the communities served by the funds.

Funding for Sure Start local programmes and children's centres in Tower Hamlets over the next financial year is as follows:

Programme name	*Revenue funding 2004/05 (£)*
Ocean Estate	764,650
Chrisp Street and Teviot	761,063
Weavers	768,750
Around Poplar	750,000
Shadwell	750,000
St. Peter's and Redcoats	750,000
Bromley to Burdett	680,000

In addition each local programme has been allocated a capital grant of just over £1 million bringing the total capital investment to £7.7 million.

For children's centres Tower Hamlets has been given indicative funding to March 2006. Revenue funding is £1,621,304 and capital funding is £4,472,384. The local authority is now planning their proposed profile of spend between now and March 2006.

In the financial year 2004/05, £75,000 is available to Tower Hamlets from the Sure Start Plus pilot programme to provide personal support and advice for teenagers who discover that they are pregnant, so that they can make responsible and well-informed decisions according to their individual circumstances.

In the financial year 2004/05, approximately £35,000 from all Tower Hamlets Sure Start local programmes will provide a teenage pregnancy midwifery lead for teenage parents offering one-to-one case worker support, running teenage parent ante-natal classes and developing working protocols for maternity services in supporting this group.

Tower Hamlets received a Teenage Pregnancy Local Implementation Grant of £25,258 to enable adjustments to George Greens Children's Centre to support teenage parents with babies in returning to education, training and employment and support positive parenting.

Tower Hamlets Children's Fund spent £200,649 on services delivering parental education during July to September 2003. Further funding will be available in 2004–05 to enable the Children's Fund to continue to deliver preventative services for children, young people and their families.

Tower Hamlets also has an allocation of over £62 million for children's social services in 2004–05 through the local government finance settlement, some of which may be available to support organisations helping parents.

Projects in Tower Hamlets may also benefit from national programmes such as the Family Support Grant and Parenting Fund. Parents in all parts of England are able to use Parentline Plus's helpline which receives core funding from the Family Support Grant.

Asylum Seekers

Mr. Dawson: To ask the Secretary of State for Education and Skills what powers social services departments will have to assist children and families from whom welfare benefits are withdrawn under clause 7 of the Asylum and Immigration (Treatment of Claimants) Bill. [143800]

Margaret Hodge *[holding answer 15 December 2004]*: Local authorities may exercise any of their Children Act 1989 powers and duties to assist the children of such families. They may use section 20 to accommodate the children or section 17 to provide other support. They may not use section 17 to assist any adult member of the family unless it is to prevent a breach of the European Convention of Human Rights (ECHR).

Carer Breaks

Mr. Gerrard: To ask the Secretary of State for Education and Skills what guidance he has issued to local authorities regarding the provision of short breaks for families caring for children with severe learning disabilities. [146484]

Margaret Hodge: "Guidance and Regulations Volume 6 Children with Disabilities" was issued following the Children Act 1989. The guidance clearly sets out local councils' responsibilities for the provision of short-term or respite care.

In August 1995 LAC(95)14 "Respite Care: Services Short-Term Placements of Children" was issued setting out Regulations where services of pre-planned short-term placements could be treated as a single placement.

In previous circulars issued under the Quality Protects Programme, short breaks were identified as a priority area for the Children's Services Grant.

More recently, Guidance was issued to accompany the Carers Grant 2004/05 setting out the Grant's objective to encourage councils to provide breaks services for disabled children and their families.

Child Care Strategy

Harry Cohen: To ask the Secretary of State for Education and Skills how many *(a)* new places have been created and *(b)* children have been helped under the National Child Care Strategy in the London boroughs of (i) Redbridge and (ii) Waltham Forest since April 1999; what the current year's Childcare Grant is; what is proposed for the next financial year; and if he will make a statement. [147394]

Margaret Hodge: 1,990 new child care places were created in the London borough of Redbridge between April 1999 and June 2003, helping some 3,700 children. Net of places closing, this added 1,423 places to the stock of child care places in the borough. Grant of £764,400 is available to Redbridge in financial year 2003–04 to support the creation of new places. Grant allocations for 2004–06 are not split between the two financial years. For the two financial years together, £2,185,200 is available to Redbridge, including £1.1 million capital funding to create children's centres.

3,037 new child care places were created in the London borough of Waltham Forest between April 1999 and June 2003, helping some 5,600 children. Net of places closing, this added 2,936 places to the stock of child care places. Grant of £988,800 is available in financial year 2003–04 to support the creation of new places. For the two financial years 2004–06, £4,780,200 is available to Waltham Forest, including £3.1 million capital funding to create children's centres.

Child Poverty

Tim Loughton: To ask the Secretary of State for Education and Skills what the average cost was in 2002–03 of raising a child to the age of 18. [145661]

Mr. Stephen Twigg: Research on expenditure on children is made complicated by the difficulty of separately identifying child and non-child expenditure within family expenditure and the issue of children sharing in the wealth of their parents. There is no consensus on the factors to be included in estimating the cost of raising a child.

Academic and business research on this question highlights the complexities involved and has resulted in a large range of estimates. For example, a study commissioned by the Joseph Rowntree Foundation in 1997 suggested a cost of around £50,000 for 'regular' support up to the age of 17. Recent research by the Centre for Economics and Business Research for the Liverpool Victoria Friendly Society suggested a much higher average cost of £140,000, which includes spending on both 'necessities' and 'luxuries'. Such results are of course not directly comparable due to the differences in the factors included and the methodology used.

Notes:

Child Protection

Mr. Djanogly: To ask the Secretary of State for Education and Skills how many children resident in *(a)* Cambridgeshire and *(b)* Huntingdon were on the Child Protection Register on 31 December 2003. [149673]

Margaret Hodge: Information on the number of children and young people on the Child Protection Register in *(a)* Cambridgeshire and *(b)* Huntingdon at 31 December 2003 is not collected centrally for this date. However, information about children who are registered on child protection registers is collected centrally from local councils with social services responsibilities at 31 March each year. The most recent figure, which was for 31 March 2002, shows that there were 100 children on the register maintained by Cambridgeshire county council. Information is not collected below this organisational level.

Details of the number of children and young people on Child Protection Registers at 31 March 2003 will be published by the Department for Education and Skills (DfES) on Thursday 29 January 2004.

Mr. Djanogly: To ask the Secretary of State for Education and Skills how many children resident in *(a)* Cambridgeshire and *(b)* Huntingdon who were on the Child Protection Register on 31 December 2003 had previously been registered. [149674]

Margaret Hodge: Information on the number of children and young people on the Child Protection Register in *(a)* Cambridgeshire and *(b)* Huntingdon at 31 December 2003 is not collected centrally for this date. However, information about children who are registered on child protection registers is collected centrally from local councils with social services responsibilities at 31 March each year. The most recent figure, which was for 31 March 2002, shows that there were 30 children on the Child Protection Register maintained by Cambridgeshire county council who had previously been registered. Information is not collected below this organisational level.

Details of the number of children and young people on Child Protection Register at 31 March 2003, including details of re-registrations, will be published by the Department for Education and Skills (DfES) on Thursday 29 January 2004.

Mr. Djanogly: To ask the Secretary of State for Education and Skills how many children resident in *(a)* Cambridgeshire and *(b)* Huntingdon who were on the Child Protection Register on 31 December 2003 were also looked after by local authorities. [149675]

Margaret Hodge: Information on the number of children and young people on the Child Protection Register in *(a)* Cambridgeshire and *(b)* Huntingdon at 31 December 2003 is not collected centrally for this specific date. However, information about children who are registered on child protection registers is collected centrally from local councils with social services responsibilities at 31 March each year. The most recent figure, which was for 31 March 2002, shows that there were 15 children on the Child Protection Register maintained by Cambridgeshire county council who were also looked after by local authorities on that date. Information is not collected below this organisational level.

Details of the number of children and young people on Child Protection Register at 31 March 2003, including details of those also looked after on that date, will be published by the Department for Education and Skills (DfES) on Thursday 29 January 2004.

Mr. Djanogly: To ask the Secretary of State for Education and Skills how many children resident in *(a)* Cambridgeshire and *(b)* Huntingdon who were removed from the Child Protection Register during 2003 had been on it for more than two years. [149676]

Margaret Hodge: Information on the number of children and young people on the Child Protection Register in *(a)* Cambridgeshire and *(b)* Huntingdon at 31 December 2003 is not collected centrally for this date. However, information about children who are registered on child protection registers is collected centrally from local councils with social services responsibilities at 31 March each year. The most recent figure, which was for 31 March 2002, shows that 15 children were removed from the Child Protection Register maintained by Cambridgeshire county council who had been registered for more than two years. Information is not collected below this organisational level.

Details of the number of children and young people on child protection registers at 31 March 2003, including details of de-registrations, will be published by the Department for Education and Skills (DfES) on Thursday 29 January 2004.

Tim Loughton: To ask the Secretary of State for Education and Skills for how many quangos dealing with child protection issues his Department is responsible. [145664]

Margaret Hodge: None of the non-departmental public bodies for which the Department for Education and Skills is responsible has direct responsibility for child protection issues.

On 12 January responsibility for the Children and Family Court Advice and Support Service (CAFCASS) was transferred from the Lord Chancellor to the Secretary of State for Education. CAFCASS is not directly responsible for child protection but part of its role is to safeguard and promote the welfare of children involved in family court proceedings.

Disabled Children

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills (1) what response his Department will make to the recommendations in the latest report from the National Working Group on Child Protection and Disability; [146292]

(2) what his response is to the recommendations in the latest report from the National Working Group on Child Protection and Disability; [146301]

(3) what measures are in place to protect disabled children from abuse; and if he will make a statement. [146296]

Margaret Hodge: We welcome the publication of the NSPCC report, "It doesn't happen to disabled children"—child protection and disabled children. We will consider the recommendations contained in the report carefully.

We recognise the particular vulnerability of disabled children to abuse, which increases when, as a result of their disability, children are unable to communicate abuse. That is why Government guidance on safeguarding children, including Working Together to Safeguard Children (1999) and Framework for the Assessment of Children in Need Practice Guidance (2000), highlights the need to promote a high level of awareness of this increased vulnerability and sets out measures that should be taken to strengthen the capacity of disabled children and their families to communicate abuse.

Both the measures outlined in the Green Paper and the forthcoming National Service Framework for Children, Young People and Maternity Services will address the issue of safeguarding all children, including disabled children.

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills (1) what research has been conducted on the effectiveness of the child protection system in addressing abuse of disabled children; what the findings were; and what further research is planned; [146293]

(2) what research has been conducted on the reasons for the higher incidence of abuse and neglect of disabled children compared to non-disabled children. [146297]

Margaret Hodge: The Department for Education and Skills has not commissioned research in this area.

We recognise that there is a need to improve the research base in respect of safeguards for disabled children. We will consider the best way to take this forward.

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills what the role of support services is in preventing abuse of disabled children. [146294]

Margaret Hodge: Section 17 of the Children Act 1989 sets out the duties of local authorities for safeguarding and promoting the welfare of children in need, including disabled children. Services for disabled children and their families are provided through local authorities, the health service and the voluntary sector. These services help to support families safeguard children and improve their life chances. Support services include short term breaks; day care; home help; domiciliary care; nursing and medical support; social events and outings for parents and children, as well as advice, guidance and counselling. In cases where there are concerns about possible abuse and neglect of disabled children, support services should work closely with local child protection services to ensure that all necessary steps are taken to safeguard the child.

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills (1) what representations have been received from disabled children and adults in preventing abuse; and what action has been taken as a result; [146295]

(2) if he will assess the child protection system in respect of disabled children; [146298]

(3) what *(a)* the national and *(b)* local mechanisms are in place for monitoring and reviewing child protection policies, procedures and practices relating to disabled children; and if he will make a statement. [146299]

Margaret Hodge: We have not had specific representations about abuse of disabled adults. However, the Department of Health liaises closely with a number of organisations who represent vulnerable adults and the Government is aware of their concerns in this area.

The abuse of vulnerable adults is of great concern to the Government. We have already instigated a range of general measures, such as the National Service Framework for Older People and National Minimum Standards for particular aspects of service provision, to raise the standards of care of older people and other vulnerable adults. It has implemented specific measures to tackle abuse, principally "No Secrets" guidance, which councils, the NHS and police forces have used to establish and strengthen their local procedures for preventing and tackling abuse. By June 2004, we intend to introduce the Protection of Vulnerable Adults list, which in practice will amount to a workforce ban on those who have abused or mistreated vulnerable adults in their care.

The Department for Education and Skills regularly receives correspondence from parents and voluntary groups about issues affecting disabled children including child protection. This has included reports from the NSPCC, the Joseph Rowntree Foundation, and the National Working Group on Child Protection and Disability, which have influenced policy development. In particular, recent representations from the NSPCC were taken into account by the Disabled Children's External Working Group developing standards as part of the National Service Framework for Children, Young People and Maternity Services which will be published later this year.

The Joint Chief Inspectors' Report Safeguarding Children, published in October 2002, contained a recommendation that all relevant Inspectorates should ensure that, prior to the next report, appropriate inspection activity had been undertaken on children with disabilities.

Safeguarding Children asked Chief Inspectors to consider whether there was a need to supplement the planned programme of inspections in any way. In planning for the next children's safeguards review, the Inspectorates have identified that additional acitivity is required in relation to children with disabilities and special needs and are developing plans to enhance their programmes in this area.

Local mechanisms for safeguarding disabled children are set out in chapter six of the Government's child protection guidance, "Working Together to Safeguard Children (1999)".

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills what resources are available to promote the safeguarding of disabled children. [146300]

Margaret Hodge: It is for local councils to decide the level of resources they allocate to the safeguarding of disabled children in their area.

Overall the local government settlement has increased resources for Children's Social Services from almost £3.7 billion in 2003–04 to just over £4.0 billion in 2004–05. This provides for an increase in total resources of some 8.7 per cent. overall.

Every council will be receiving additional resources provided for Children's Social Services as a result of the Government's decision to provide an additional £100 million. £90 million for every council for safeguarding children, enabling councils to respond to the recommendations contained in the Victoria Climbie Inquiry Report and the Joint Chief Inspectors' report "Safeguarding Children".

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills in what ways the forthcoming National Service Framework will contribute to the safeguarding of disabled children's needs. [146302]

Margaret Hodge: The NSF for Children, Young People and Maternity Services will address a number of cross cutting areas including the safeguarding of children. The External Working Group for Disabled Children has looked at child protection and has made a number of recommendations. These, alongside other recommendations are currently being considered before the final NSF is published later this year.

Children (Right of Contact)

Tim Loughton: To ask the Secretary of State for Education and Skills what discussions he has had with ministerial colleagues regarding an automatic assumption of equal right of contact by parents to children who are subject to marital break-up. [149757]

Margaret Hodge *[holding answer 22 January 2004]:* I have regular meetings with my ministerial colleagues on the issue of child contact. In particular, I work closely with Lord Filkin, the Minister at the Department for Constitutional Affairs with responsibility for Family

Justice. I recently hosted a seminar on child contact, where academics presented findings from research to improve Ministerial awareness and understanding.

We continue to view children's interests as being paramount and we want to encourage contact between children and non-resident parents where it is in the best interest of the child and safe for all family members.

Working with my hon. Friends in the Department for Constitutional Affairs, we are considering carefully how the family justice system and related children's services can better meet the needs of all children and their parents following relationship breakdown. We want to ensure that better outcomes are achieved for children by, where possible, helping parents agree contact arrangements without the intervention of the courts. We expect to conclude these considerations in the early part of this year and then to publish the Government's response to the Children Act Sub-Committee's report 'Making Contact Work'.

Children's Fund

Ms Keeble: To ask the Secretary of State for Education and Skills (1) what variations there have been to the Children's Fund allocations for 2003 to 2006 notified in writing to local fund managers in January; [144925]

(2) what the final allocations for the Children's Fund were for 2002–03; [144926]

(3) when he will make an announcement on Children's Fund allocation for 2004–05. [144931]

Margaret Hodge: Allocations to Children's Fund partnerships came to £119 million in 2002–03.

We conducted a mid year review of expenditure in November 2003 for this financial year to identify and take back genuine under spend from the first half of the year.

We wrote to all partnerships on 19 December advising them that the programme had become over-committed. This is because after initial under spends Partnerships are now spending much closer to profile against allocations which deliberately exceeded budget provision because of the history of under spends. The higher spending by partnerships together with the contributions made by the Children's Fund to other initiatives for the 5 to 13-year-old age group.

All this means there will be some reduction in allocations for 2004–05 and 2005–06 in order that the programme can meet all its commitments and stay within its overall limit.

I am not able to confirm allocations for 2004–05 or 2005–06 before the end of January. I can confirm though that the Government remain committed to the valuable work of the Children's Fund and that next year's budget will enable the programme to continue to deliver preventive services for children and young people.

Mr. Pickthall: To ask the Secretary of State for Education and Skills what funding will be made available to the Lancashire Children's Fund for *(a)* 2004–05 and *(b)* 2005–06. [147041]

Margaret Hodge *[holding answer 12 January 2004]*: I am not able to confirm the allocations for Lancashire Children's Fund for 2004–05 and 2005–06 before the end of January. My officials have met with the appropriate representative bodies and wrote to all partnerships on 19 December 2003 explaining the difficulties that had occurred because of over programming coupled with mistaken estimates of partnerships ability to spend. This together with the contribution made to other initiatives means there will be some reduction in allocations for 04–05 and 05–06 in order that the programme can meet all its commitments and remain within its financial limits.

I can confirm though that the Government remain committed to the valuable work of the Children's Fund and that next year's budget will enable the programme to continue to deliver preventative services for children and young people.

Tim Loughton: To ask the Secretary of State for Education and Skills (1) how many projects are funded by the Children's Fund; and if he will list them and the responsible parent organisation, where applicable; [147729]

(2) for what reason cuts have been made to Children's Fund grants in the middle of the year of operation; [147730]

(3) for what reason Children's Fund grants to projects signed up for three years will now not be paid in full; [147731]

(4) how many projects funded by the Children's Eund are likely to face cuts to their funding in the next financial year; [147732]

(5) how many projects funded by the Children's Fund have closed in the current financial year; [147733]

(6) how many Children's Fund-funded projects have appealed to the Children's Directorate appeal system against costs to their funding; and how many have been successful; [147748]

(7) for how long it is intended to run the appeal system set up for projects funded by the Children's Fund to appeal against cuts to their funding; [147749]

(8) what arrangements are in place to replace funds being cut to Children's Fund-funded projects with other public funds. [147750]

Margaret Hodge: There are 149 Children's Fund partnerships in England. These are listed in the annexe together with their lead and accountable bodies. The programme was launched in November 2001 and runs until March 2006. Each partnership is made up of representatives from the voluntary and statutory sector.

Children's Fund partnerships will continue to receive grants for 2004–05 and 2005–06. These grants will enable the partnerships to continue to deliver preventive services for five to 13-year-olds in their area. In the early years of the programme the Partnerships under spent their allocations. To avoid this recurring partnerships were allowed to increase their planned commitment with increased allocations and monies used for other initiatives for five to 13-year-olds. However, it has become clear that the partnerships have been more effective in their spending, to the point that they are

spending more closely to profile. In order to avoid over-spends, not permitted under Government accounting, the Department is taking action now so as to reduce the levels of over-commitment without damaging the programmes already in place.

A mid year review of expenditure was undertaken in November 2003 to identify and take back genuine under spend from the first half of 2003–04 and to estimate and take back likely under spends from the second half of the year.

The Department did not have a formal process for appealing against mid year review decisions. However, following representations from 11 partnerships, the Department wrote to all 149 on 19 December. We advised them that decisions on taking back under spend would be revisited where they were too harsh and that we would restore funds where partnerships ability to meet contractual commitments were compromised by our decisions. These measures will ensure the mid year review does not mean partnerships have to implement redundancies or close services. I expect the process of identifying the total number that need funds restored to be completed by the end of January.

In a letter to all partnerships before Christmas the Department also explained that there was over-commitment in the programme and that there will therefore be some reduction in allocations for 2004–05 and 2005–06 in order that the programme can spend within its limits. Officials are currently assessing the extent of over-commitment in the programme. I expect this work to be completed by the end of January so that we can confirm partnerships' allocations for 2004–05. Until then we have advised partnerships not to commission any new services.

There has not been any closure of Children's Fund partnerships. It is a key characteristic of the fund that decisions on which services to commission are taken locally, not by central Government, against the aims and objectives of the Children's Fund programme. Partnerships themselves may decide which services to retain or close at any time, in response to evolving local circumstances.

Dr. Tonge: To ask the Secretary of State for Education and Skills what steps he is taking to ensure that the appeals process following mid-year changes to the Children's Fund is available to relevant organisations. [148911]

Margaret Hodge: The Department met representatives from the main voluntary sector organisations involved in the Fund together with the LGA and the ADSS on 18 December. Following that meeting officials wrote to all Children's Fund partnerships on 19 December 2003.

We advised partnerships that where our decisions at the mid-year review had compromised partnerships' ability to their meet contractual obligations, we would revisit them. Furthermore, we set aside money to assist with this and to ensure that there was no premature closure of projects. The Children's Fund regional teams have been discussing the detailed implications with partnerships and I expect the process to be complete by the end of January.

Dr. Tonge: To ask the Secretary of State for Education and Skills when he intends to announce resources for the Children's Fund for 2004–05. [148912]

Margaret Hodge: I expect to announce resources for the Children's Fund in 2004–05 at the end of January or early February.

Children's Green Paper

Tim Loughton: To ask the Secretary of State for Education and Skills what his policy is, under the proposals outlined in the Children's Green Paper, on retention of data files kept on children when they become adults; and under what circumstances *(a)* children and *(b)* those with parental responsibility will have access to them. [145707]

Margaret Hodge: The Queen's Speech said that a Bill will be introduced to improve services designed to protect children. This will implement proposals contained in the Children's Green Paper "Every Child

Matters", and, subject to consideration of responses to the Green Paper consultation, will include proposals that each local authority should set up a local information sharing system to enable practitioners to share early information about children and young people so that better services can be provided to them and their families.

The Green Paper proposals relate to children and young people to age 19. Local authorities will be responsible for the proposed local information hubs and will be required to comply with the Data Protection Act in the way they manage and run the hubs. The data protection principles set out in the Act include requirements that personal data shall be accurate and up to date, not excessive for the purpose for which it is held and that it is kept for no longer than necessary. Data held on information hubs will be held in accordance with these requirements. How long data on any particular child is held will depend upon individual circumstances.

Except where there is an exemption under the Data Protection Act, children or those with parental responsibility for them would have access to the information held about them on the proposed information hubs, under the subject access provisions of the Data Protection Act. They would also be able to comment on any information held on the system that was inaccurate or which needed updating.

Class Sizes

Sarah Teather: To ask the Secretary of State for Education and Skills what the average class size for *(a)* primary schools and *(b)* secondary schools in (i) Brent East constituency, (ii) the London Borough of Brent, (iii) London and (iv) England was in each year since 1997. [149897]

Mr. Stephen Twigg: The requested information is given in the tables.

Maintained primary schools[1] : average class size[2] position in January each year, 1997 to 2003

	Classes taught by one teacher						
Location	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*
Brent East Constituency	26.1	27.0	27.1	27.3	27.4	26.4	26.9
Brent LEA	26.5	26.7	27.2	27.4	27.3	27.1	27.6

Divorce Courts

Mrs. Iris Robinson: To ask the Secretary of State for Education and Skills which of Mr. Justice Nicholas Wall's recommendations regarding the divorce courts system have been implemented. [148940]

Margaret Hodge: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Monmouth (Mr. Edwards) on 6 January 2004, *Official Report*, column 293W.

Failing Schools

Mr. Paice: To ask the Secretary of State for Education and Skills what assessment he has made of the impact on the number of failing schools of providing a higher score as a result of failing in English than of failing in maths and science. [149873]

Mr. Miliband *[holding answer 22 January 2004]:* The Department has made no assessment of this particular matter. The weight attached to particular judgments within an individual school inspection is a matter for Ofsted. I have asked HM Chief Inspector, David Bell, to write to the hon. Member and place a copy of his letter in the Library.

Formula Spending Share (Deprivation)

Mr. Andrew Turner: To ask the Secretary of State for Education and Skills what the value of the formula spending share for each primary school pupil for deprivation is in each local authority for 2004–05. [150070]

Mr. Miliband *[holding answer 22 January 2004]:* The education formula spending share allocates the same value for each primary aged pupil with additional educational needs. For 2004–05, this value is £1,370. The proportion of primary aged pupils with additional educational needs is estimated in each authority using

measures of children in families in receipt of income support, children in families in receipt of working families tax credit and pupils who do not have English as their mother tongue.

Further Education Funding

Sarah Teather: To ask the Secretary of State for Education and Skills what the level of funding per pupil in further education was in *(a)* Brent East, *(b)* the London borough of Brent, *(c)* London and *(d)* England in each year since 1997. [149901]

Alan Johnson: The Department does not collect information on the level of funding per pupil in further education at the local or regional level. Mark Haysom the Learning and Skills Council's Chief Executive will write to the hon. Member with details of further education spend per pupil in *(a)* Brent East, *(b)* the London borough of Brent, and *(c)* London. A copy of his letter will be placed in the House Library.

The following table shows funding per full-time equivalent student in further education in England from 1997–98 to 2003–04. These are cash figures that show total funding for the further education (FE) sector. The figures include monies provided for participation and certain funding for earmarked purposes, including capital, the Standards Fund and other special grants to colleges. These figures are consistent with those published in the 'Departmental Annual Report 2003'.

Funding per full-time equivalent student in further education 1997–98 to 2003–04

£

	Total funding
1997–98[1]	3,070
1998–99[1]	3,090
1999–2000[1]	3,380
2000–01[1]	3,640
2001–02[2]	3,890
2002–03[3]	4,020
2003–04[3]	4,240

[1] Actual
[2] Provisional
[3] Planned

Rob Marris: To ask the Secretary of State for Education and Skills what research his Department has undertaken to examine what the effect on provision would be were all the further education colleges funded by the Further Education Funding Council to withdraw from all work-based learning provision. [150006]

Alan Johnson: None. There is no evidence of which the Department is aware that further education providers are considering withdrawal from Work Based Learning for Young People (WBL) on a large scale. Further education providers currently deliver around 20 per cent. of WBL provision and are an important and valued means of delivering such learning to young people. Further education providers are now funded by the Learning and Skills Council, the body responsible for planning and funding all post-16 learning (other than higher education).

Higher Education

Chris Grayling: To ask the Secretary of State for Education and Skills what assessment he has made of the reasons why 10 per cent. of the pupils who achieve two A level passes do not go into higher education. [147015]

Alan Johnson: The Youth Cohort Study shows that around nine in 10 young people who achieve two or more A-levels by the age of 18 progress to Higher Education by the time they are 21.

Research published by the Department in 2001 ("Social Class and Higher Education: Issues Affecting Participation by Lower Social Class groups" Connor, H. at al DfEE Research Report No. 246) looked at the factors affecting participation in HE by different social class groups. It found that among those who were qualified to enter higher education but had decided against going, the main reasons were because they wanted to start work, because they did not need a higher education qualification for their chosen career or because of the expected costs involved.

In addition, the Youth Cohort Study identified other reasons for choosing not to enter HE:

to earn money and become financially independent;

not achieving the grades for their chosen course;

self belief, with young people thinking they could not get in or they would find higher education too difficult.;

lack of interest.

Other research has identified ethnicity, housing tenure and parental education as significantly affecting the decision to enter higher education.

Dr. Tonge: To ask the Secretary of State for Education and Skills what research he has commissioned into the effects of tuition fees on medical manpower planning. [149759]

Alan Johnson: I have not commissioned such research. Since the introduction of tuition fees in 1998, demand for places on medical courses has continued to outstrip significantly the number of places, despite an increase in the number of places available. Between 1999 and 2001, plans for some 2,250 more medical school places in the UK were announced. As a result of the extra investment, the number of students entering medical school will increase to over 7,300 in 2005. The number of UK applicants to study medicine at UK universities is also at its highest since 1986 (the earliest year for which data is available).

We do not anticipate any significant impact on demand for medical courses after the introduction of variable fees. The Department of Health will, however, be monitoring demand for, and take-up of, places on medical courses. Department of Health Ministers have made it clear that they will, if necessary, take measures to ensure that any increase in the level of tuition fees will not have an adverse impact on the supply, retention, diversity or quality of students on health professional courses, including medicine.

Dr. Tonge: To ask the Secretary of State for Education and Skills what research he has commissioned into the repayment of tuition fees by women medical students. [149760]

Alan Johnson: I have not commissioned such research. Medical students do not have to repay student loans until they graduate and earn over £15,000 per year. Doctors earn considerably in excess of the national average: a newly qualified GP can expect to earn over £45,000, and will receive considerably more than that in time. Consultants will earn even more. So medical graduates will be able to pay off their student loan for living costs and for tuition fees comparatively rapidly.

If, despite the high salary levels generally, some doctors who work part time or take career breaks pay off their student loans more slowly, the student support proposals announced by my right. hon. Friend on 8 January are helpful. The Government intend to write-off outstanding student loan balances after 25 years. This will apply to those entering HE from 2006 and cover maintenance and fee loans.

Mr. Paul Marsden: To ask the Secretary of State for Education and Skills if he will estimate the number of higher education students who will be affected by the introduction of top-up fees. [149774]

Alan Johnson: The number of students affected by variable fees will depend on a wide range of factors, including decisions on fee levels to be taken by institutions providing higher education to full time undergraduates.

Mr. Gordon Prentice: To ask the Secretary of State for Education and Skills whether he will require universities charging higher than average variable fees to pay their academic staff more. [149947]

Alan Johnson: Higher education institutions are responsible for their own academic and administrative affairs, including pay for their staff. The Government plays no part in setting levels of pay in the higher education sector. Universities themselves are the best judges of how to deploy the funding they receive.

Annabelle Ewing: To ask the Secretary of State for Education and Skills what the current higher education participation rate in England is with respect to people under the age of 30. [149509]

Alan Johnson *[holding answer 20 January 2004]*: The current Higher Education Initial Participation Rate (HEIPR) is 43.9 per cent. for 2001/02.

The HEIPR covers English-domiciled 17 to 30-year-old first-time entrants to Higher Education courses who remain on their course for six months or more.

The HEIPR will replace the Initial Entry Rate (IER) as the way that we measure progress toward 50 per cent. A time-series of HEIPR figures will be published in Spring 2004.

The IER was recently quality-reviewed under guidelines issued by the Office for National Statistics. The review (published in November 2003) concluded that the IER was "basically robust"[1] but highlighted some minor shortcomings which the HEIPR corrects for. More detail can be found in the report of the review, a copy of which has been placed in the House of Commons Library.

An Age Participation Index (API) also exists for Great Britain—though does not include students aged over 20 or part-time students. The current figure for 2001/02 is 35 per cent.

[1] Review of the Initial Entry Rate into Higher Education, DfES, p6.

Learning and Skills Council

Mr. Willis: To ask the Secretary of State for Education and Skills from which Learning and Skills Council-funded work-based learning providers funding contracts were removed in 2002–03. [149990]

Alan Johnson: This is a matter for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to the hon. Member with this information and a copy of his reply will be placed in the Library.

Rob Marris: To ask the Secretary of State for Education and Skills how much was spent by each Learning and Skills Council on employer initiatives in 2003; and if he will make a statement. [150007]

Alan Johnson: As a member of the national Skills Alliance the Learning and Skills Council has a major part to play in securing the effective implementation of our Skills Strategy. The Strategy sets a new framework for tackling our long-standing skills gaps.

The amount spent by each local LSC on employer initiatives is an operational matter and I have asked Mark Haysom, the Council's Chief Executive, to write to my hon. Friend with this information and a copy of his reply will be placed in the Library.

Mr. Hammond: To ask the Secretary of State for Education and Skills what discussions his Department has held with the Office of the Deputy Prime Minister on the appropriateness of transferring responsibility for skills from Learning and Skills Councils to elected regional assemblies. [150089]

Alan Johnson: The Government's national Skills Strategy, published in July 2003, emphasises the need for all relevant agencies to work together collaboratively in support of the skills agenda. We are committed to building strong and effective Regional Skills Partnerships, which will enable Regional Development Agencies, local Learning and Skills Councils, and other key stakeholders to work together to deliver skills, training, business support and employment services. The partnerships will help take forward the priorities identified in the regional economic strategies.

Elected Regional Assemblies also have an important role in training and skills, and in our White Paper 'Your Region, Your Choice' we set out proposals for each Assembly to appoint two members to the Board of each local LSC in its region, and for the national LSC to consult Assemblies on its guidance to local LSCs.

As well as these regional and sub-regional roles, there is a vital national dimension to the planning and funding of learning and skills, discharged by the Learning and Skills Council. The Skills Alliance Delivery Partners Group, which is chaired by the LSC Chief Executive Mark Haysom and includes an RDA representative, is

charged with stimulating co-ordinate action between the relevant national and regional agencies to secure effective delivery of the skills strategy.

Nursery Vouchers

Mr. Laurence Robertson: To ask the Secretary of State for Education and Skills (1) if he will give parents of three-year-old children flexibility to use the 10 hours per week nursery voucher; and if he will make a statement; [149501]

(2) what assessment he has made of the number of children in *(a)* England and *(b)* Gloucestershire who attend nursery schools for 10 hours or more per week; and if he will make a statement. [149502]

Margaret Hodge: The Nursery Education Voucher scheme ended in May 1997. It was replaced by an entitlement to a free high quality nursery education place which may be taken up at a range of providers in the maintained, private, voluntary and independent sectors. From April 2004, six months ahead of the original target, the entitlement will be extended to all three year olds. A free place consists of a minimum of five two and a half hour sessions for thirty-three weeks of the year. It is underpinned by a statutory Code of Practice which encourages local authorities and providers to allow parents to take up their entitlement flexibly.

Around 88 per cent. of three year olds nationally are already receiving some free provision. The latest figures on Under 5's provision in England were published in Statistical Bulletin 'Provision for children under five years of age in England—January 2003', a copy of which is available on the Department's website www.dfes.gov.uk/statistics .The number of free nursery education places taken up by three and four year olds in Gloucestershire Local Education Authority area and England was as follows:

Number[1] of free nursery education places taken up by three and four year olds in Gloucestershire Local Education Authority area and England

Location	*Three year olds*		*Four year olds*		
	Maintained nursery and primary schools[2]	*Other maintained and private, voluntary and independent providers[3]*	*Maintained nursery and primary schools[2]*	*Other maintained and private, voluntary and independent providers[4]*	*Total 3 and 4 year olds[5]*
Gloucestershire LEA	50	4,200	4,200	2,200	10,600
England	218,700	226,100	472,200	107,100	1,024,000

[1] Part-time equivalent number of children.
[2] Includes classes in maintained primary schools only. Gloucestershire does not have any maintained nursery schools.
[3] Part-time equivalent number of children aged three at 31 December in the previous calendar year from the Nursery Education Grant data collection exercise.
[4] Part-time equivalent number of children aged four at 31 December in the previous calendar year from the Early Years Supplementary data collection exercise.
[5] The totals do not add up to their constituent parts due to rounding.

Ofsted

Mr. Paice: To ask the Secretary of State for Education and Skills how many inspectors have resigned from Ofsted in each year since 1996–97. [149872]

Mr. Miliband *[holding answer 22 January 2004]:* This is a matter for Ofsted. HM Chief Inspector, David Bell, will write to the hon. Member and place a copy of his letter in the Library.

Parentline

Tim Loughton: To ask the Secretary of State for Education and Skills (1) what the total cost to public funds has been of supporting the charity Parentline Plus since its inception; [147715]

(2) what the percentage change in the number of telephone calls to Parentline by parents is expected to be once the investment of £763,000 has been made; [147716]

(3) what the cost to public funds is estimated to be per email answered by the charity Parentline; [147717]

(4) what the estimated number of service users is for the email service of the charity Parentline; [147718]

(5) how many parents are expected to benefit from the recent investments made to the charity Parentline. [147719]

Margaret Hodge: Parentline Plus is the operating name of FamilyLives, and was formed through the merger of Parentline UK, Parent Network and the National Stepfamily Association, in winter 1999. Parentline Plus is a registered charity.

Family support helpline

From financial year 2000–01 onwards (the first full financial year applicable), central Government funds supporting Parentline Plus in its work as a family support helpline have been:

£

	2000–01	*2001–02*	*2002–03*	*2003–04*
Family Support Grant (ex-Home Office, now Department for Education and Skills)				
Project to develop materials for Afro-Caribbean communities	145,000			
Core funding		1,000,000	1,000,000	1,000,000
Share Parent Plus for activity based materials project			48,000	
Project to support parents of teenagers	45,000	40,000		

£

	2000–01	2001–02	2002–03	2003–04
Telephone parenting support funded with Department of Health		20,000	20,922	
Parenting Fund (Department for Education and Skills)	n/a	n/a	n/a	[1]762,690
Totals	190,000	1,060,000	1,068,922	1,762,690

[1] Family Support Helpline extension, as detailed below

The Home Office commissioned an evaluation of the Parentline Plus family support helpline. This was carried out between August 2002 and March 2003 by the Thomas Coram Research Unit at the Institute of Education, University of London, and will be published on the Home Office website shortly. The evaluation recognised that Parentline Plus provides a good quality helpline service to over 60,000 callers pa (three quarters of whom were first-time callers), and that further expansion in the helpline service is necessary to meet demand from callers. The charity makes significant use of trained volunteers.

The main work supported by the recent £762,690 investment from the Parenting Fund is:

(a) expanding helpline provision to answer 75,000 calls pa (equivalent to a 25per cent. increase in call numbers);

(b) developing and piloting an email service to answer an anticipated 10,000 emails pa;

(c) developing and piloting a more efficient system for call handling, in particular for improved ways of working with more specialist providers of family support advice;

(d) developing a ring-back telephone support service offering more detailed support to those parents who need most help;

(e) establishing telephone-based parenting groups; and

(f) promotion of the helpline and email service.

Staffing and systems at Parentline Plus will be flexible so that call-takers can deal with either telephone calls or emails. This means that the 75,000 telephone call/10,000 email balance may change, to best meet demand. It is therefore not possible to quote the cost per email dealt with. It is not possible to state the exact number of parents benefiting from recent investment, although the number of calls/emails are detailed above.

Other work

From the financial year 2000–01 onwards (the first full financial year applicable), central Government funding (including that from Children's Fund partnerships) to Parentline Plus for other work has been:

£

	2000–01	2001–02	2002–03	2003–04

Totals	304,914	382,144	497,739	515,674

[1] Preliminary work on Change Development Project

Procurement (Outsourcing)

Norman Lamb: To ask the Secretary of State for Education and Skills if he will make a statement on his Department's procurement policy with regard to offshore IT and call centre outsourcing; whether his Department is outsourcing IT and call centre jobs to offshore companies; to which countries his Department has outsourced these jobs; how much his Department has spent on this outsourcing in each of the last two years; and how much has been budgeted for this purpose for the next two years. [147592]

Mr. Stephen Twigg: My Department's procurement policy is based on value for money, having due regard to

propriety and regularity. My Department complies with the EU Treaty, including the principle of non-discrimination, the EC procurement directives and the UK's international obligations. Provided these principles, and other more detailed arrangements such as those set out in the "Staff Transfers in the Public Sector—Statement of Practice", are satisfied, there is no reason why my Department should not let contracts to offshore companies. This said, my Department has not outsourced any former internal IT and call centre jobs to offshore companies. We have no plans to do so. My Department also lets a considerable number of contracts for services with a very wide variety of partners. Some of those contracts have included IT and call centre elements as an integral part of the delivery arrangements. In no case has there been a direct contractual relationship with an offshore company for an IT or call centre related contract.

Pupil Referral Units

Mr. Hoban: To ask the Secretary of State for Education and Skills how much *(a)* revenue and *(b)* capital funding each local education authority has been allocated by the Department to establish pupil referral units. [148430]

Mr. Miliband *[holding answer 19 January 2004]*: The Department does not allocate funding specifically for the setting up or maintaining of pupil referral units. Local education authorities receive revenue funding for pupils with high cost needs through the high cost pupil sub-block of the Education Formula Spending Share. The proportion of pupils with high cost needs is estimated for each authority using population data, children in families in receipt of Income Support and low birth weight.

School Meals

Bob Russell: To ask the Secretary of State for Education and Skills whether a school governing body can refuse to accept delegation from a local education authority of responsibility for the school meals service. [150028]

Mr. Stephen Twigg *[holding answer 22 January 2004]*: The effect of the Education (Transfer of Functions Concerning School Lunches etc.) (England) (No. 2) Order 1999 is that when a school's budget share includes funding for meals, the statutory duties to provide school lunches (including free school meals for eligible pupils), and to comply with nutritional standards, are transferred to the school's governing body. The governing body cannot refuse. In Essex funding is delegated in budget shares for all schools and consequently the statutory duties rest with the schools' governing bodies. If the authority provides a 'buy-back' service a school may choose to purchase that from the authority; if it does not, the school governing body must make alternative provision. The Department is in touch with Essex County Council regarding support for schools as the current contract comes to an end.

Mr. Hurst: To ask the Secretary of State for Education and Skills whether there is a responsibility upon a local education authority to provide school meals to pupils attending its schools. [150908]

Mr. Stephen Twigg: Local education authorities have a duty to provide free and paid for school meals that meet nutritional standards. Where a school has a delegated budget for meals, this duty becomes the responsibility of the governing body. From April 2000, funding for school meals was delegated to all secondary schools. Primary and special schools can opt for delegation.

Secondary Schools (Collaboration)

Mr. Drew: To ask the Secretary of State for Education and Skills how many *(a)* formal, *(b)* federated and *(c)* informal collaborations are taking place (i) between secondary schools and (ii) between secondary schools and further education colleges, broken down by local education authority. [150025]

Mr. Charles Clarke *[holding answer 22 January 2004]*: 70 per cent. of all secondary schools are involved in at least one formal collaborative network with other secondary schools. The numbers of schools involved in formal collaborative networks by LEA are contained in the following table.

The Department does not hold details of collaboration taking place between secondary schools and further education colleges; nor does the Department collect information on collaboration that takes place informally.

Number of schools involved in formal collaborative networks by LEA

Mr. Drew: To ask the Secretary of State for Education and Skills what plans his Department has to provide help to develop management information systems where secondary schools or further education institutions are *(a)* undertaking collaborative working and *(b)* are part of a federated structure. [150026]

Mr. Charles Clarke *[holding answer 22 January 2004]:* The Department has provided funding and is working closely with LEAs to support them in ensuring they have an infrastructure for management information systems in all their maintained schools, including those schools working collaboratively with other educational institutions or those within a federated structure. Total funding is £30 million via LEAs in 2001–02 and £7 million supplementary in 2002–03. Collaborative working is also supported in the form of access to on-line communities through the National College of School Leadership's Talk2Learn facility and will be part of a single annual conversation with the education system on targets, priorities and support and improved data flows.

Student Finance

Mr. Djanogly: To ask the Secretary of State for Education and Skills what the average student loan taken out by students from *(a)* Huntingdon, *(b)* Cambridgeshire and *(c)* England was in each year since 2000–01. [149685]

Alan Johnson: The tables show the average full-time income-contingent loan taken out by students in Cambridgeshire and in England and the average mortgage style loan taken out by students in England.

Data on the average student loan taken out by students from Huntingdon are not available.

Average income-contingent loan[1,2] taken out by domicile of students in academic years 2000/01 to 2002/03[3] (£)

	Academic year		
	2000/01	*2001/02[4]*	*2002/03 (provisional)*
Cambridgeshire[5,6]	3,170	3,210	[7]—
England	3,160	3,190	3,240

[1] New student support arrangements were introduced from academic year 1998/99. New students in 1998/99 (apart from certain specified exceptions) received support for maintenance expenditure through means-tested grants (comprising about a quarter of the support available) and non income-assessed student loans (comprising about three quarters of the support available). From 1999/2000 students who entered higher education after 1998/99 received support for maintenance expenditure through loans, of which approximately three quarters of the value was non income-assessed. Loans made under these arrangements are repayable on an income contingent basis.

[2] Excludes the fixed rate loans (£500) for eligible part-time students, introduced in September 2000

[3] Figures have been rounded to the nearest 10

[4] Latest year for which data by local education authority (LEA) are available

[5] LEA of domicile of student

[6] LEA level data have been taken from available information and may include a small number of loans which have been authorised for payment but not paid.

[7] Regional breakdown not yet available

Source:
Student Loans Company

Average mortgage style[1] loan taken out by domicile of student—academic years 2000/01 to 2002/03[2]

£

	Academic year		
	2000/01	*2001/02*	*2002/03 (provisional)*
England	1,460	1,520	1,580

[1] Loans available to students who entered higher education up to academic year 1997/98 and those who entered in 1998/99 under existing arrangements. These loans are non income assessed and are repayable on a fixed term, mortgage style, basis.

[2] Figures have been rounded to the nearest £10.

Source:
Student Loans Company

Data on the local education authority of domicile of students taking out fixed rate mortgage style loans (normally those who entered higher education before 1998/99) are not available because applications are made through the students' education institution. The data provided in the answer relate to student loans available from the Student Loans Company and do not include bank loans, overdrafts, and informal loans from family and friends.

Mr. Yeo: To ask the Secretary of State for Education and Skills (1) how many students he expects to receive the full £1,500 maintenance grant, assuming current student numbers; and how many will receive an amount of grant; [148563]

(2) what estimate he has made of the cost to public funds of the introduction of higher education maintenance grants of £1,500 in 2006. [148575]

Alan Johnson: Based on the current student cohort we estimate about 30 per cent. of English and Welsh students will benefit from the full grant when it is introduced in the 2004/05 academic year. Approximately a further 10 per cent. of students should benefit from a partial grant. I refer my hon. Friend to the Regulatory Impact Assessment, published on 8 January, which sets out the costs of increasing the grant to £1,500 a year from 2006/07. Copies of the Regulatory Impact Assessment were placed in the Library of the House it is also available on the Department for Education and Skills website.

Mr. Steinberg: To ask the Secretary of State for Education and Skills what fees will be chargeable to students for part-time degrees at *(a)* universities and *(b)* further education colleges under the provisions of the Higher Education Bill. [150537]

Alan Johnson: Universities and further education colleges are currently free to determine the level of fees which are chargeable to part-time students in higher education. The Higher Education Bill will not change this.

Sure Start

Mr. Goodman: To ask the Secretary of State for Education and Skills if he will make a statement on the steps his Department is taking to monitor the effectiveness of the Sure Start programme. [148641]

Margaret Hodge: A major evaluation of the Sure Start programme began in January 2001. It will examine the effectiveness of Sure Start on children, families and communities, both in the short, medium and long-term by tracking a sample of eight thousand (8,000) children and their families over time. The first information on impact and effectiveness will become available over the next 12 months.

Martin Linton: To ask the Secretary of State for Education and Skills how many children have had contact with Sure Start in Battersea since its inception. [144773]

Margaret Hodge: Contact by Sure Start local programmes is defined to mean that a child aged 0–3 years and/or their parent or carer has taken up services. Since its inception in October 2000 Sure Start Battersea reports that it has provided services to some 630 children under four living in the catchment area.

Chris Grayling: To ask the Secretary of State for Education and Skills what the annual budget is for the Sure Start Childcare and Early Years magazine. [147929]

Margaret Hodge: The Sure Start Childcare and Early Years magazine was published twice in 2003. The cost for

the two issues was £66,339.61 including distribution to 37,000 partners.

The Sure Start Childcare and Early Years magazine was merged with our Upstart magazine at the end of 2003. The new magazine is called Sure Start. The planned annual budget for the new magazine is approximately £160,000 which includes distribution to 60,000 partners.

Helen Jackson: To ask the Secretary of State for Education and Skills which constituencies in Yorkshire and Humberside have one or more Sure Start initiatives. [149344]

Margaret Hodge: The following table shows the constituencies in Yorkshire and Humberside that have operational Sure Start local programmes, Early Excellence Centres, neighbourhood nurseries and children's centres based within them. Figures for neighbourhood nurseries however are changing by the day as new settings open. The Government intend that, wherever possible, existing Sure Start provision will develop into children's centres as part of the expansion of high quality integrated services to all pre-school children and their families living in the 20 per cent. most disadvantaged wards in England.

Mr. Andrew Turner: To ask the Secretary of State for Education and Skills how many toothbrushes have been distributed free by each Sure Start project. [149398]

Margaret Hodge *[holding answer 21 January 2004]:* This information is not collected. It is estimated that to date some 450,000 packs have been distributed to families under the Department of Health's Brushing for Life scheme. This scheme operates in the 29 former district health authority areas with the highest levels of tooth decay and all Sure Start Local Programmes in areas where the water is not fluoridated. Many Sure Start Local Programmes also distribute similar packs to babies and young children under their own oral health promotion schemes.

Mr. Andrew Turner: To ask the Secretary of State for Education and Skills what legal services and goods Sure Start projects are *(a)* authorised and *(b)* forbidden to provide at no cost to the recipient. [149399]

Margaret Hodge *[holding answer 21 January 2004]:* There are 524 Sure Start local programmes delivering services to children under 4 and their families in the most disadvantaged areas of the country. They aim to achieve better outcomes for children, parents and communities by increasing the availability of child care, improving health, education and emotional development for young children, and supporting parents as parents and in their aspirations towards employment. Services to meet these aims are designed in consultation with families in the area to ensure they reflect local needs. Programmes are neither prevented nor required to provide any goods or legal services free of charge.

Mr. Burstow: To ask the Secretary of State for Health what plans he has to evaluate Sure Start schemes; and what arrangements have been made to ensure that lessons from such evaluations are disseminated. [145079]

Margaret Hodge: A comprehensive evaluation of the Sure Start programme began in January 2001. It will examine the effectiveness of Sure Start on children, families and communities in the short, medium and long-term by tracking a sample of eight thousand (8,000) children and their families over time. The first information on impact and effectiveness will become available over the next 12 months.

Lessons from the evaluation will be disseminated widely; through the Sure Start Unit Research Publication series, academic journals and practitioner publications and through workshops, seminars and conferences for both practitioners and the academic community.

Teacher Qualifications

Mr. Wiggin: To ask the Secretary of State for Education and Skills (1) if he will make a statement on the relative value of the *(a)* English and *(b)* Welsh Qualified Teacher Status qualifications; [150599]

(2) what assessment he has made of obstacles to prospective teachers who live on the Welsh borders qualifying as teachers; [150600]

(3) whether a teacher who completes their initial teacher training course in England may undertake the practical experience element in a Welsh school. [150603]

Mr. Miliband: The funding, content and standards required of courses of initial teacher training provided by Welsh institutions are matters for the National Assembly for Wales. Courses funded by the Department for Education and Skills through the Teacher Training Agency and which lead to the award of Qualified Teacher Status by the General Teaching Council for England are governed by the Education (School Teachers' Qualifications) (England) Regulations 2003. These require that any periods of practical experience undertaken as part of a course of initial teacher training in England must take place wholly or mainly at schools in England, but do not preclude some periods of teaching experience taking place elsewhere. The same regulations provide for the automatic recognition in England of teaching qualifications awarded by the General Teaching Council for Wales.

Teenage Parents

Mr. George Osborne: To ask the Secretary of State for Education and Skills what estimate he has made of the proportion of teenage parents who were in local authority care in each of the last five years. [147334]

Margaret Hodge: The information requested is not currently available at national level. Officials within DfES are currently identifying ways in which this data can be collected. At the meeting of the Technical Working Group on Personal Social Services Statistics, held on 23 October 2003, it was agreed that the question "Was the young person a parent at 31 March (if female)" would be included in the SSDA903 return for 2004–05. In addition, the Technical Working Group agreed that other questions for future returns and detailed guidance be referred to an ad hoc Working Group for further consideration. The newly established Working Group will assess the feasibility of obtaining information about births among young people in and leaving care and identify methods for collecting this information, taking account of legal and confidentiality considerations.

Tribunal Judgments

Mr. Boswell: To ask the Secretary of State for Education and Skills what mechanism exists for monitoring and enforcement of local authority compliance with Special Education Needs and Disability Tribunal judgments; and if he will make a statement. [146979]

Margaret Hodge: There are no formal mechanisms to monitor or enforce the Special Educational Needs and Disability Tribunal's decisions on special educational needs appeals or disability claims. By law, local education authorities (LEAs) must carry out the Tribunal's decision. If a parent believes that an LEA has failed to comply with the Tribunal's decision within the given timescale they can write to complain to the Secretary of State for Education and Skills, who will consider what action to take.

Universities (Children in Care)

Mr. George Osborne: To ask the Secretary of State for Education and Skills what proportion of children in care went to university in each of the last five years; and how many completed their course in each year. [147331]

Margaret Hodge: The Department for Education and Skills collects data from local authorities about accommodation and activity of children and young people in their nineteenth year, who were recently looked after by local authorities. This data collection was introduced for the first time in 2002–03. The collection specifically records the number of young people who were in education, training or employment at age 19 and of those, the number involved in higher education. It does not identify which are at university or those in other age groups.

In 2002–03, of the 4,900 young people in the cohort, 2,400 were in education, training or employment on their nineteenth birthday. Of these, 280 were in higher education (6 per cent. of children). This figure includes those studying for degrees, diplomas in higher education, teaching and nursing qualifications. Data is not available on how many completed their courses.

University for Industry

Mr. Willis: To ask the Secretary of State for Education and Skills whether University for Industry-funded learning targets were achieved in *(a)* 2001–02 and *(b)* 2002–03. [149992]

Alan Johnson: In 2001–02, my Department set Ufi/learndirect 12 targets. Of these nine can be classified as "learning targets"—the others referred to the information and advice service/learning materials. Ufi achieved eight out of these targets. In 2002–03, Ufi/learndirect met four out of seven "learning targets".

Website Publications

Mr. Lazarowicz: To ask the Secretary of State for Education and Skills what criteria his Department uses when deciding whether a leaflet which it publishes is to be made available only on its website. [149556]

Mr. Charles Clarke: The Department does not publish leaflets on websites only. We do make printed material available on our websites but it is not departmental policy to publish leaflets online only.

Working Skills

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what steps he is taking to increase the proportion of the working age population in the West Midlands reaching degree level qualifications. [149832]

Alan Johnson: These are a range of initiatives from which the region will benefit.

Foundation Degrees are a positive step in expanding opportunities for people to enter higher education. The combination of academic study and work-based learning with this flexible approach means that they appeal to a wide variety of people including those already in work. The Higher Education Funding Council for England has invited the region to bid for 1,000 additional student places in 2004/05.

For mature learners we are providing an important pathway to higher education through Access to HE Courses. The West Midlands is served by one of the larger Access providers—the Open College Network for the West Midlands.

The Aimhigher Programme in conjunction with the Higher Education Funding Council for England and the Learning and Skills Council is very active in the region in improving links between its schools, FE colleges and HEIs, with part of its remit to encourage more young people to take up degrees.

We are also funding five 14–19 pathfinders in the West Midlands to test local delivery of 14–19 education and training with the aim, amongst other things, of equipping young people to enter further or higher education.

Excellence in Cities is raising aspirations and attainment in Schools. A part of their remit is to encourage pupils to consider higher education. From 2005 Excellence in Cities will be involved in all secondary schools across the City of Coventry.

DEPUTY PRIME MINISTER

Cambridge Private Planning Application

Mr. Wyatt: To ask the Deputy Prime Minister whether he will allow the Cambridge private planning application to proceed. [150787]

Keith Hill: My right hon. Friend, the Deputy Prime Minister issued his decision to grant planning permission for the application by Cambridge University to build a B1(b) research centre on 20 November 2003. My right hon. Friend, the Deputy Prime Minister has no further jurisdiction with regard to this matter and cannot therefore make any further comment. The implementation of this permission is now a matter for Cambridge University. However, the decision is the subject of a legal challenge.

Council Tax

Mr. Rosindell: To ask the Deputy Prime Minister what guidance he has issued to local authorities on the minimum council tax level appropriate for a band D home. [150123]

Mr. Raynsford: The Office of the Deputy Prime Minister has issued no guidance on the minimum level of council tax.

Mr. Rosindell: To ask the Deputy Prime Minister what the *(a)* average, *(b)* maximum and *(c)* minimum council tax is for a band D home. [150378]

Mr. Raynsford: The average area council tax for a Band D property occupied by two adults in England in 2003–04 is £1,102. The maximum is £1,294 and the minimum is £570.

In practice, lower figures than those quoted above are payable where discounts have been granted, and zero council tax is payable for Band D properties that are exempt.

Erith Marshes

John Austin: To ask the Deputy Prime Minister what assessment he has made of the environmental consequences of building on the Erith Marshes; what assessment he has made of whether such development conflicts with the *(a)* local council's biodiversity plan and *(b)* recommendations of the biodiversity team of the

Mayor of London; what assessment he has made of the increased flood risk in adjacent areas if the development proceeds; and if he will make a statement. [150904]

Keith Hill: These are matters for consideration by the local planning authority as part of the planning process. Where a project is receiving funding through the Thames Gateway programme a flood risk assessment is required, and applicants must consult with the Environment Agency where there is a potential risk of flooding.

EU Funding

Ann Winterton: To ask the Deputy Prime Minister what the funding amount allocated from the European Regional Development Fund is during the 2000 to 2006 period to *(a)* the North-East, *(b)* the North-West and *(c)* Yorkshire and Humberside. [150091]

Mr. Raynsford: The following amounts of European Regional Development Fund (ERDF) have been allocated for the period 2000 to 2006. The allocations are in euros.

	€
North-East Objective 2	581,330,000
North-West Objective 1	893,048,000
North-West Objective 2	808,330,000
Yorkshire and Humber Objective 1	785,588,000
Yorkshire and Humber Objective 2	448,360,000

Ann Winterton: To ask the Deputy Prime Minister from which budget within his Department the sum for funding for the European Regional Development Fund is allocated. [150092]

Mr. Raynsford: In England, all Departments with European Regional Development Fund (ERDF) policy responsibilities provide their own budgetary cover. However, all income and related expenditure from ERDF are accounted to parliament by the Office of the Deputy Prime Minister as the Managing Authority. The devolved administrations have separate arrangements for their own geographical areas.

Fire and Rescue Service

Mr. Gale: To ask the Deputy Prime Minister what estimate he has made of the changes in the number of jobs in Kent County Fire and Rescue Service that would arise as a result of the proposed regionalisation of the Fire and Rescue Service. [149306]

Mr. Raynsford: I refer the hon. Member to the answer given to him and to the hon. Members for Buckingham (Mr. Bercow), for Taunton (Mr. Flook), for North Wiltshire (Mr. Gray), for Runnymede and Weybridge (Mr. Hammond), for Poole (Mr. Syms) and for Spelthorne (Mr. Wilshire) on 22 January 2004, *Official Report*, columns 1457–58W.

Mr. Gale: To ask the Deputy Prime Minister (1) if he will list those whom he has consulted on the plans to regionalise the Kent Fire and Rescue Service; [149307]

(2) what discussions he has had with *(a)* retained and *(b)* full-time firefighters in Kent on his plans to regionalise the Fire and Rescue Service; and what their advice was. [149309]

Mr. Raynsford: I refer the hon. Member to the answer given to him and the hon. Members for Buckingham, Taunton, North Wiltshire, Runnymede and Weybridge, South East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2004, *Official Report*, columns 1454–57W.

Mr. Gale: To ask the Deputy Prime Minister under what powers he would implement the regionalisation of the Fire and Rescue Service in Kent without the consent of Kent county council. [149308]

Mr. Raynsford: I refer the hon. Member to the answer given to the hon. Members for Buckingham, Taunton, North Wiltshire, Runnymede and Weybridge, South East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2004, *Official Report*, columns 1458–59W.

Mr. Gale: To ask the Deputy Prime Minister what research relating to Kent he has commissioned to provide the evidential basis for his plans to regionalise the Fire and Rescue Service. [149310]

Mr. Raynsford: I refer the hon. Member to the answer given to the hon. Members for Buckingham, Taunton, North Wiltshire, Runnymede and Weybridge, South East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2004, *Official Report*, columns 1453–54W.

Charles Hendry: To ask the Deputy Prime Minister what level of grant has been provided to each *(a)* metropolitan fire authority, *(b)* county council fire authority and *(c)* combined fire authority for each year since 1997; and if he will make a statement. [150949]

Phil Hope: The Office of the Deputy Prime Minister will put the information that the hon. Member for Wealden has asked for in relation to metropolitan fire authorities in the Library once officials have completed work on the local government settlement.

However, the Office of the Deputy Prime Minister is unable to provide the information that the hon. Member has asked for in relation to county council fire authorities because the grant that they receive is general grant to cover all services supplied by the county. No amount is hypothecated for fire and rescue services. Nor can the Office of the Deputy Prime Minister provide the requested information on combined fire authorities because they will not have received any grant before 2004–05.

Nonetheless, the Government have delivered another good settlement for fire and rescue authorities. The Government have ensured that once again all authorities receive above inflation increases, with fire and rescue authorities receiving increases in grant between 3.5 per cent. and 5 per cent. and averaging 4.3 per cent. Since taking office, this Government have increased funding by 30 per cent. in real terms.

	Expenditure provision for the fire and rescue service in England (£ million)	*Increase on previous year (percentage)*
1997–98	1,237	4.4
1998–99	1,299	5.0
1999–2000	1,346	3.6
2000–01	1,393	3.5
2001–02	1,463	5.0
2002–03	1,521	4.0
2003–04	1,583	4.0

Charles Hendry: To ask the Deputy Prime Minister what guidance he gives to fire authorities on the level of financial reserves they should maintain. [150950]

Phil Hope: My right hon. Friend the Member for Greenwich and Woolwich (Mr. Raynsford) wrote to all fire and rescue authorities with guidance on 23 January. In that letter my right hon. Friend acknowledged that for Combined Fire Authorities the transition to precepting status has raised a number of issues, including the level of financial reserves. The letter clarified the Government's position on a number of points, including:

(a) In line with CIPFA guidance, there is no recommended level of reserves.

(b) The impact on council tax payers should be considered by authorities when considering reserves. This may point to spreading any burden on council tax payers over a number of years.

(c) The level of risk will not change as a result of the move to precepting status. CFAs should explore arrangements with their constituent authorities that reflect this.

Fire Service Circular 1/2004, also issued on 23 January, contained more detailed guidance on these issues.

Charles Hendry: To ask the Deputy Prime Minister if he will take account of the need for fire authorities to build up reserves in decisions on capping precepting fire authorities. [150951]

Phil Hope: My right hon. Friend the Deputy Prime Minister has made it clear that he expects council tax and precept increases in all authorities to be in low single figures. This applies to all authorities, including fire and rescue authorities. My right hon. Friend the Deputy Prime Minister is prepared to use his capping powers if necessary. When considering capping, the Office of the Deputy Prime Minister would want to look closely at local authorities' budgets and council tax rises before coming to a view on what might be appropriate factors to take into account.

Flooding

John Mann: To ask the Deputy Prime Minister how many flood plains in England have been given planning permission for housing in each of the last five years. [147737]

Keith Hill: Data on planning permissions granted within the flood risk areas defined by the Environment Agency is not collected or held centrally, and could be provided only at disproportionate cost. However, the Environment Agency and local planning authorities report annually under the Department for Environment, Food and Rural Affairs (DEFRA's) High Level Target 12 on consultations on developments in floodplains and the extent to which the decision follows the agency's advice. The report for 2002–03 can be found on the Environment Agency website at www.environment-agency.gov.uk.

The Office of the Deputy Prime Minister land use change statistics show that for the period 1998 to 2001, 9 per cent. of land that changed to residential use in England was in flood risk areas, and 12 per cent. of new dwellings were in the areas defined by the Environment Agency as at risk from coastal or river flooding. Some 64 per cent. of these were on previously developed land, much of which was defended against flooding to an appropriate minimum standard. About 12 per cent. of the land area of England is within the river and coastal flood risk areas.

Housing

Sir Archy Kirkwood: To ask the Deputy Prime Minister if he will place in the Library copies of the Chief Executive of the Rent Service's correspondence with the Rent Service's area manager for London since November 2001. [150138]

Keith Hill: Correspondence between the Chief Executive of the Rent Service and the Rent Service's Area Manager for London is largely of a confidential nature under Part 2 (2) of the Code of Practice on Access to Government Information. To identify any correspondence that is not confidential would incur disproportionate cost.

Mr. Rosindell: To ask the Deputy Prime Minister what steps he is taking to find new sites upon which to build *(a)* private and *(b)* social housing; and what budget has been allocated for that purpose in 2003–04. [150379]

Keith Hill: The Sustainable Communities Plan sets out the policies, resources and partnerships necessary create a better balance in housing supply and demand. This includes the steps the Office of the Deputy Prime Minister is taking to improve site assembly for both private and social housing. It is backed by £22 billion investment over three years.

Key initiatives include:

Provision of additional homes in designated growth areas, with £610 million over three years for site assembly, delivery mechanisms, additional affordable housing and essential local infrastructure. Combined with London, the growth areas have the potential to deliver an extra 200,000 homes above planned levels.

Making better use of surplus public sector land, for instance through a new register established by English Partnerships and through the introduction of new arrangements for its disposal. Identifying sites for additional housing, which would include developments for both private housing, affordable housing and homes for key workers, is one of the key priorities for English Partnerships.

Proposals to allow local authorities to seek affordable housing on smaller sites where this is justified, a measure particularly important in the South-east where almost 80 per cent. of housing sites are less than half a hectare in size.

Mr. Rosindell: To ask the Deputy Prime Minister what measures he has taken to ensure that new housing estates are not built on land that is prone to flooding; and what plans he has for further measures. [150381]

Keith Hill: The Government's policy requirements for England have been given in Planning Policy Guidance Notes 3 "(Housing)" and 25 "(Development and Flood Risk)". PPG25 categorises the suitability of land for various types of development, including housing, of the basis of the flood risk maps issued by the Environment Agency. The policies in PPG25 are due to be reviewed later this year against possible developments in flood risk assessments since it was issued in 2001.

Mr. Rosindell: To ask the Deputy Prime Minister what percentage of social housing is owned and operated by private housing foundations; and what plans he has for the further transfer of social housing to such foundations. [150382]

Keith Hill: In 2003 the breakdown between social housing owned by registered social landlords and local authorities was 41.4 per cent. and 58.6 per cent. respectively. The transfer of local authority housing to registered social landlords remains one of the three options available to local authorities where additional resources are required to deliver decent homes.

Mr. Rosindell: To ask the Deputy Prime Minister what plans he has to encourage council tenants to take better care of their rented property. [150384]

Keith Hill: The duty to carry out on-going repairs and maintenance as well as any necessary major improvement works to a home lies with the local authority landlord rather than the tenant. Certain small, urgent repairs which are likely to affect the tenant's health, safety or security are covered by the 'Right to Repair', which means that by law, these must be carried out by the local authority quickly and at no cost to the tenant.

However, through their tenancy agreement, tenants may have responsibilities to carry out certain types of repair or to behave in a way which does not cause nuisance or annoyance to neighbours. The Council Tenant's Charter, published by the Office of the Deputy Prime Minister is readily available to councils and tenants and provides further details of the rights and responsibilities of council tenants.

Ms Buck: To ask the Deputy Prime Minister (1) what proportion of tenants in the social rented sector are paying rents above the average rent for the appropriate bedroom category in *(a)* England, *(b)* each region and *(c)* each London borough; [150400]

(2) what proportion of tenants in the social rented sector are paying rents £10 or more above the average for their bedroom size in *(a)* each region of England and *(b)* each London borough; [150401]

(3) what proportion of tenants in the social rented sector are paying £10 or more above the average for properties with *(a)* one bedroom, *(b)* two bedrooms, *(c)* three bedrooms and *(d)* four or more bedrooms. [150402];

Keith Hill: The Housing Corporation and the Office of the Deputy Prime Minister hold data on rents paid by tenants, but only at the level of the average rent paid to RSLs/LAs for each bedroom category. However, the information requested is not held centrally, and could only be provided at disproportionate cost.

Andrew Selous: To ask the Deputy Prime Minister what assessment he has made of the effect on demand for housing in the UK of the housing needs of nationals of the EU accession states who may come to the UK. [151066]

Keith Hill: No assessment has been made of the impact upon demand for housing of immigrants who may come to the UK from EU accession countries.

However, this Government does not believe that housing shortages in London and the south-east can be blamed on international migration. We recognised in the Sustainable Communities Plan that for more than 30 years all Governments failed to meet housing need.

The Sustainable Communities Plan sets out the policies, resources and partnerships that will achieve the step change essential to turn around the legacy of decades of neglect and under-investment, including:

£5 billion for more affordable homes to be built, including at least £1 billion for key worker housing.

Measures to ensure delivery of 930,000 new homes in existing regional plans for the south-east to 2016.

Additional homes to be provided in designated growth areas, with £610 million over three years for site assembly, delivery mechanisms, additional affordable housing and essential local infrastructure. Combined with London, the growth areas have the potential to deliver an extra 200,000 homes above planned levels.

Measures to make better use of the existing housing stock, especially to bring empty properties back into use.

IT Contracts

Mr. Sayeed: To ask the Deputy Prime Minister if he will list information technology contracts in his Department and its predecessors with a value of above £20 million in each of the last 10 years; what the inception date for each system was; when it became fully functional; when it became fully debugged; and what the cost of over-runs has been. [146190]

Yvette Cooper: The Office of the Deputy Prime Minister and those components of former Departments that make up the Office of the Deputy Prime Minister have not let any contracts that meet this description.

Local Government

Mr. Dorrell: To ask the Deputy Prime Minister if he will list the total value of central government grant paid to each local authority in Leicestershire in each financial year between 1996–97 and 2003–04. [149464]

Mr. Raynsford: The information requested is tabled as follows.

£ million

RA and RS returns to ODPM

Mr. Flook: To ask the Deputy Prime Minister (1) what representations he has received from Taunton Deane borough council on the level of increase received in *(a)* revenue support grant and national non-domestic rates and *(b)* rent allowances for handling rents and council tax benefit; and if he will make a statement; [150065]

(2) by what percentage central Government funding to Taunton Deane borough council has changed in 2004–05; [150066]

(3) what the *(a)* revenue support grant and *(b)* national non-domestic rate settlement for Taunton Deane was for (i) 2003–04 and (ii) 2004–05. [150084]

Mr. Raynsford: The Office of the Deputy Prime Minister has received two representations from Taunton Deane borough council on the provisional local government finance settlement 2004–05, which include comments on the transfer of funding for rent allowances and council tax benefit (CTB) to the Department of Work and Pensions (DWP).

In order to make a fair comparison, the Office of the Deputy Prime Minister has assessed what Formula Grant the authority would have received in 2003–04 had the transfer of benefits taken place in the previous year. On this basis the Revenue Support Grant (RSG) plus National Non-Domestic Rates (NNDR) will increase by 3.3 per cent.

In 2003–04 Taunton Deane received £3.458 million in RSG and £3.579 million in NNDR. Under the Government's proposals for 2004–05, Taunton Deane receives £3,680 million in RSG and £2,824 million in NNDR.

Mr. Djanogly: To ask the Deputy Prime Minister (1) what his policy is on enabling councils to raise a greater proportion of their income themselves; [150133]

(2) what plans he has to reform the way in which local councils are funded; [150376]

(3) what discussions he has had with *(a)* the Chancellor of the Exchequer and *(b)* the Prime Minister regarding re-structuring the way in which local councils are funded. [150377]

Mr. Raynsford: The ways in which local councils are funded are being considered by the Balance of Funding Review which is due to report in the summer. Papers for the Review's Steering Group are available on the Office of the Deputy Prime Minister's website at http://www.local.odpm.gov.uk/finance/balance.htm.

Lottery Revenue

Mr. Willis: To ask the Deputy Prime Minister what the total value is of Lottery revenue used to support Government-sponsored projects within his Department since 1997. [149627]

Phil Hope: The Office of the Deputy Prime Minister has no policy or operational responsibility for distribution of National Lottery Fund.

I refer the hon. Member to the answer given by my right hon. Friend the Member for Birmingham, Yardley (Estelle Morris) on 26 January 2004, *Official Report*, column 45W.

Parliamentary Questions

Mr. Andrew Mitchell: To ask the Deputy Prime Minister when he will reply to the Questions tabled by the hon. Member for Sutton Coldfield for Named Day Answer on 19 January, reference *(a)* 148012, *(b)* 148011 and *(c)* 148014. [150230]

Yvette Cooper: The Parliamentary Questions tabled by the hon. Member for Named Day answer on 19 January were all duly answered on the day requested.

PPG25

Norman Baker: To ask the Deputy Prime Minister how many and what percentage of planning applications rejected by planning authorities pursuant to revised PPG25 have been subsequently allowed on appeal. [150873]

Keith Hill: The Environment Agency's report on the Department for Environment, Food and Rural Affairs (Defra) high-level target 12—Development and flood risk—contains details of 50 appeals in 2002–03, which had involved a sustained objection by the agency on flooding grounds. Of these, two were withdrawn by the appellant and in five cases the flooding objection was resolved before the appeal decision.

In four cases (8 per cent.), appeals for minor development were allowed contrary to advice from the Environment Agency. Six appeals (12 per cent.) were allowed with the agency's objections fully mitigated through planning conditions and 33 appeals (66 per cent.) were dismissed, 30 of which were for minor developments. 28 cases are reported as dismissed using agency advice and five as dismissed not using Agency advice. Further details are in the report, which is available on the Internet at www.environment-agency.gov.uk

Prison Leavers

Mr. Hayes: To ask the Deputy Prime Minister what strategy the Government have for the reintegration of prison-leavers into social housing and their surrounding community. [144094]

Paul Goggins: I have been asked to reply.

The Social Exclusion Unit report on reducing re-offending by released prisoners, published in July 2002, recommended that the Government develop and implement a National Rehabilitation Strategy involving all relevant departments and agencies. In response, the Home Office has set up two inter-departmental groups of Ministers and officials to develop an action plan planned for publication in early 2004. Its work strands include finance and benefits; drugs; health; employment, training and education; children and families; and accommodation.

Within the accommodation strand, the Home Office, Office of the Deputy Prime Minister (ODPM), and the Department for Work and Pensions are working together to devise an accommodation strategy for offenders. This will aim initially to increase the number of people leaving prison with some form of accommodation arranged. Its longer terms aims will be: to assess and identify the particular accommodation needs of each offender; to enable offenders to maintain or, where appropriate/to close down their accommodation while in

custody; and to develop systems that enable offenders to access appropriate and sustainable housing options on release. The strategy will encompass the roles and responsibilities of the correctional services, local authorities and other housing providers, the voluntary sector and Jobcentre Plus. Pilots are currently being developed to test how best to join up these services, working initially with street crime offenders.

The strategy will build on some important provisions already in place in the community and custody: the Homelessness Act 2002; the Homelessness (Priority Need for Accommodation) (England) Order 2002; the Supporting People programme; and the Prison Service's Custody to Work Initiative.

Regional Assemblies

Mr. Hammond: To ask the Deputy Prime Minister whether elected regional assemblies will have power to determine transport-related priorities within their regions. [150077]

Mr. Raynsford: The transport powers of elected regional assemblies were set out in the White Paper "Your Region, Your Choice: Revitalising the English Regions" (Cm 5511).

Elected regional assemblies will be responsible for identifying transport priorities and producing a regional transport strategy, advising the Government on funding allocations for local transport schemes and for allocating Rail Passenger Partnership grants. They will also have powers to make proposals to the Highways Agency and the Strategic Rail Authority for schemes of regional importance.

Mr. Hammond: To ask the Deputy Prime Minister whether he expects elected regional assemblies to have the power to determine how public spending within the region is allocated. [150079]

Mr. Raynsford: The finance powers of elected regional assemblies were set out in Chapter 5 of the White Paper "Your Region, Your Choice: Revitalising the English Regions" (Cm 5511).

Assemblies will be funded primarily by central Government grant and will have freedom to spend their funding as they judge best.

Mr. Hammond: To ask the Deputy Prime Minister which powers elected regional assemblies will take from existing local authorities. [150080]

Mr. Raynsford: The powers and responsibilities of elected regional assemblies were set out in the White Paper "Your Region, Your Choice: Revitalising the English Regions" (Cm 5511). The Fire White Paper, "Our Fire and Rescue Service" (Cm 5808), published in June 2003, subsequently announced that responsibility for the fire and rescue service will transfer to a regional level in regions which choose to have an elected assembly. Other than this element, the powers of elected regional assemblies will not be drawn from local authorities.

Regional Economic Disparities

Mr. Jenkin: To ask the Deputy Prime Minister what steps he has taken since 1997 to close economic disparities between the English regions. [149692]

Mr. Raynsford: The Government have pursued an active regional policy since 1997 by:

Setting up the Regional Development Agencies to promote economic development and regeneration in the regions and supporting their work with £1.8 billion (for 2003–04) in annual funding;

Facilitating the establishment of voluntary regional chambers/assemblies, and developing the role of Government Offices;

Announcing proposals for directly elected regional assemblies in those regions that wish to have them which will assist in improving regional economic performance;

Putting in place a stable macroeconomic framework to provide an essential basis for economic growth both nationally and regionally;

Agreeing a PSA target to make sustainable improvements in the economic performance of all English regions and to reduce the persistent gap in growth rates between the regions;

Commissioning Sir Michael Lyons to make recommendations on the relocation of civil service and other public sector posts to the English regions.

Regional Government

Mr. Jenkin: To ask the Deputy Prime Minister what the total number of staff working in the Government Office for the Regions in each region is; what change in staff numbers there would be in regions where an elected regional assembly is established; and what the total savings would be consequent on these reductions. [149648]

Yvette Cooper: The total number of staff currently working in the Government Office by region is:

Government Office	*Number of staff*
London	296
East	266
West Midlands	320
East Midlands	283
North West	351
North East	256
Yorkshire and Humber	306
South West	344
South East	320

The number of people that may transfer from each Government Office when an elected assembly is created will vary between regions. But it will probably be between 60 to 100, based on existing staffing levels for the activities that would be expected to transfer to an elected regional assembly, including responsibility for administering EU structural funds.

It is estimated that about £5 million per year of the running costs of regional assemblies will be directly offset because staff will be transferring from existing bodies, including the region's Government Office.

Mr. Jenkin: To ask the Deputy Prime Minister what additional scrutiny the regional chambers in each of the English regions have undertaken since 2001. [149702]

Mr. Raynsford: Since 2001, the regional chambers have undertaken a variety of scrutiny activities in respect of the work of the Regional Development Agencies (RDAs), funded by Government grant. Chambers report to the region on the work of the RDAs and provide recommendations that seek to improve their effectiveness.

The reports and recommendations arising from these activities are published and widely disseminated to regional partners. Chambers usually issue between two and four reports every year.

Rehousing (Brent)

Sarah Teather: To ask the Deputy Prime Minister what the average waiting time for a person to be rehoused in Brent was in each year since 1997. [149883]

Keith Hill: The information on the average waiting time for a person to be rehoused in Brent is not held centrally, and could be provided only at disproportionate cost.

Sarah Teather: To ask the Deputy Prime Minister how many people are on the housing list waiting to be rehoused in Brent. [149884]

Keith Hill: Local authorities in England report the numbers of households on their housing waiting list (excluding tenants awaiting a transfer) as at 1 April in their annual Housing Investment programme return. As at 1 April 2003 the latest reported figures are 13,425.

Skills Funding

Mr. Hammond: To ask the Deputy Prime Minister whether it is his policy that powers and funding in relation to skills should transfer from Learning and Skills Councils to elected regional assemblies. [150088]

Mr. Raynsford: The powers and responsibilities of elected regional assemblies were set out in the White Paper, "Your Region, Your Choice": "Revitalising the English Regions" (Cm 5511). Paragraph 4.29 sets out the responsibilities elected regional assemblies will have for learning and skills.

Telecoms Companies

Michael Fabricant: To ask the Deputy Prime Minister how many telecommunication companies have been overcharged in business rates in the last five years; and how much was repaid to them on appeal in each year. [149210]

Phil Hope: The information requested is not held centrally and could be provided only at disproportionate cost.

Thames Gateway

John Austin: To ask the Deputy Prime Minister what discussions he has had with the Association of British Insurers regarding flood risk in the Thames Gateway Development Area; and if he will make a statement. [150903]

Keith Hill: The Association of British Insurers (ABI) has regular meetings with my hon. Friend, the Member for Scunthorpe (Mr. Morley), to discuss flood management issues generally. Officials at the Office of the Deputy Prime Minister will shortly be discussing flood management issues in the Thames Gateway growth area with the ABI.

HEALTH

Alendronate

Mr. Brady: To ask the Secretary of State for Health what assessment his Department has made of the clinical efficacy of Alendronate (Fosamax) in the treatment of osteoporosis, following trials at Manchester Royal Infirmary. [149385]

Dr. Ladyman *[holding answer 20 January 2004]:* The National Institute for Clinical Excellence (NICE) have been looking at five osteoporosis drugs, including Fosamax (Alendronate), as part of a technology appraisal. Their draft recommendations are currently out for consultation. NICE has a key role to play in widening choice. Patients and carers need clear authoritative advice on the sort of care that might be appropriate for them and the standards of care they can expect from the national health service. NICE is due to publish its technology appraisal on drug therapies for osteoporosis in June 2004.

Ambulance Services

Helen Jones: To ask the Secretary of State for Health what recent discussions have taken place between the Mersey Regional Ambulance Service and the Greater Manchester Ambulance Service on improving *(a)* the handling of 999 calls and *(b)* other matters relating to ambulance services. [148252]

Miss Melanie Johnson: The information requested is not collected centrally.

Antibiotics

Dr. Murrison: To ask the Secretary of State for Health what antibiotic usage was for each NHS hospital in England in the last year for which figures are available, broken down by specialty; and if he will make a statement. [147509]

Miss Melanie Johnson: This data is not collected centrally.

Cancer

Mrs. Curtis-Thomas: To ask the Secretary of State for Health how many incidents of skin cancer there have been in the United Kingdom in each of the last five years; and what assessment he has made *(a)* to determine the causes of skin cancer and *(b)* to determine the action needed to reduce the incidence of skin cancer. [147936]

Miss Melanie Johnson: Data on the number of incidents of skin cancer overall are not available in the form requested. Cancer registrations for non-melanoma skin cancer are unreliable and incomplete as the registers are being continuously updated retrospectively.

The number of registrations of newly diagnosed cases of malignant melanoma of the skin in the United Kingdom for each of the last five years are shown in the table.

Registrations of newly diagnosed cases for skin cancer in the United Kingdom, 1996–2000 [1]

	Malignant melanoma of the skin[2]
1996	5,700
1997	6,000
1998	6,100
1999	6,000
2000	7,000

[1] Figures rounded to nearest 100.

[2] International Classification of Diseases, Tenth Revision (ICD-10) code C43.

Sources:

1. Office for National Statistics.
2. Welsh Cancer Intelligence and Surveillance Unit.
3. Scottish Cancer Registry.
4. Northern Ireland Cancer Registry.

A new sun awareness initiative, SunSmart, was launched on 27 March 2003 by Cancer Research UK to make the public aware of the dangers of exposure to the sun. The campaign is based on the successful SunSmart campaign in Australia. The campaign has received funding from the United Kingdom Health Departments' this year. We will be providing further funding for the campaign for next summertime.

The campaign's aim is to increase the profile of the issue of skin cancer and methods of effective sun protection. The key objectives are to increase knowledge of the causes of skin cancer, to increase awareness of actions that can be taken to prevent skin cancer and to influence positively attitudes to sun protection.

The Department has separately developed the SunSafe web pages in 2002, designed with children in mind. These are available on the Department's website at: www.doh.gov.uk/sunsafe

Information is also contained on the Wired For Health website at: www.wiredforhealth.gov.uk/teaching/sun/intro.html

We continue to fund annually the Meteorological Office to provide the daily ultra-violet index in the media (television, radio, Meteorological Office website).

The Department also provides core funding to the National Radiological Protection Board, which provides expertise on ultra-violet radiation issues.

Mrs. Curtis-Thomas: To ask the Secretary of State for Health how many incidents of lung and cervical cancer there were in the North West in each of the last five years; and what action has been taken in the North West *(a)* to prevent cancer, *(b)* to inform the public about the causes of cancer, *(c)* to provide equipment and services to treat cancer and *(d)* to provide palliative care for patients who are terminally ill. [147937]

Miss Melanie Johnson: The information requested on lung cancer and cervical cancer in the North West is shown in the tables.

1. Primary Diagnosis (ICD10 code C34) Lung Cancer: Finished in-year admission episodes by regional office of treatment—NHS hospitals in England, 1998–99 to 2002–03

	North West Regional Office	Unknown
1998–99	16,023	—
1999–2000	5,088	—
2000–01	5,878	—
2001–02	6,881	—
2002–03	7,299	1,163

2. Primary Diagnosis (ICD10 code C53) Cervical Cancer: Finished in-year admission episodes by regional office of treatment—NHS hospitals in England, 1998–99 to 2002–03

	North West Regional Office	Unknown
1998–99	2,415	—
1999–2000	672	—
2000–01	691	—
2001–02	718	—
2002–03	796	81

Notes:

1. Finished in-year admissions—a finished in-year admission is the first period of in-patient care under one consultant within one healthcare provider, excluding admissions beginning before 1 April at the start of the data year. Please note that admissions do not represent the number of in-patients, as a person may have more than one admission within the year diagnosis (Primary Diagnosis)—The primary diagnosis is the first of up to 14 (seven prior to 2002–03) diagnosis fields in the Hospital Episode Statistics (HES) data set and provides the main reason why the patient was in hospital.

2. Grossing—figures are grossed for both coverage and missing/invalid clinical data, except for 2001–02 and 2002–03, which are not yet adjusted for shortfalls.

Source:

Hospital Episode Statistics (HES), Department of Health.

Information about the Merseyside and Cheshire Cancer Network and its work can be found in its annual report, which is available on www.mccn.nhs.uk.

Care Provision

Mr. Burns: To ask the Secretary of State for Health what measures the Government is taking to ensure that there is provision in place in *(a)* residential and *(b)* domiciliary care settings to provide sufficient care to cover the projected increase in the number of those requiring it. [150598]

Dr. Ladyman: The Planning and Priorities Framework 2003–06 sets a target for local councils to increase the number of those supported intensively to live at home to 30 per cent, of the total being supported by social services at home or in residential care. The average annual increase in resources for personal social services of six per cent, over these three years is consistent with this target. It is for local councils to use these increased resources to ensure that the right amount and range of care is made available, taking account of local circumstances and priorities.

Cataracts

Mr. Chope: To ask the Secretary of State for Health what action he is taking to reduce the costs of NHS cataract services to a level equivalent to that being achieved by Netcare. [149028]

Mr. Hutton *[holding answer 19 January 2004]:* We are developing a nationally set tariff for most national health services activity, including cataract activity, based on NHS average prices. All NHS trusts will be expected to achieve tariff by 2008.

Through the treatment centre programme and the introduction of a single agreed care pathway for cataract we are aiming to maximise productivity, improve clinical outcomes and reduce variation in cost and quality.

Mr. Jenkins: To ask the Secretary of State for Health (1) how many patients are waiting for cataract operations; [149473]

(2) how many patients joined the waiting list for cataract operations in each of the last five years. [149475]

Mr. Hutton: Central waiting list returns are collected by specialty, for example, ophthalmology. Information on the number of patients waiting for cataract operations specifically is therefore not available, as cataract operations are a procedure within ophthalmology.

Mr. Jenkins: To ask the Secretary of State for Health how many cataract operations were carried out in each of the last five years. [149474]

Mr. Hutton: Published information on the number of hospital admissions for cataract operations is available up to 2002–03. The number of operations in each of the last five years for which information is available is shown in the table.

	Number of finished episodes
2002–03	270,605
2001–02	247,847
2000–01	237,507
1999–2000	201,020
1998–99	201,682

This information is available on the Department's web-site under hospital episode statistics.

Children's Diets

Mr. Burstow: To ask the Secretary of State for Health if he will set out for each of the last 10 years for *(a)* England, *(b)* each NHS region and *(c)* each strategic health authority the number and proportion of (i) boys, (ii) girls, and (iii) children aged (A) 4–5, (B) 6–7, (C) 8–9, (D) 10–11, (E) 12–13, (F) 14–15 and (G) 16–17 who have nothing to eat before school (1) once a week, (2) twice a week, (3) three days a week, (4) four days a week, (5) every school day and (6) at weekends. [146352]

Miss Melanie Johnson: Information is not collected in the form requested. However, the National Diet and Nutrition Survey, which carried out a survey in 1997 of the food consumption of young people aged four to 18 years, found that the youngest group of children, aged

four to six years, were significantly more likely than the oldest group, aged 15 to 18 years, to have eaten breakfast cereals (not whole-grain or high fibre types). Boys were more likely than girls to eat non-whole-grain or high fibre cereals—74 per cent, to 64 per cent.

Civil Service (Disabled People)

Mr. Goodman: To ask the Secretary of State for Health if he will set out the number of employees in his Department who have a disability, broken down by disability type. [148991]

Ms Rosie Winterton: The information requested is shown in the following table:

Disability broken down by disability type	*Total number of employees*
Visual impairment	20
Hearing impairment	30
Speech impairment	3
Walking impairment	13
Physical co-ordination impairment	26
Reduced physical capacity	26
Severe disfigurement	1
Learning difficulties	3
Mental illness	21
Progressive conditions	20
Neurological conditions	12
Other[1]	28

[1] This figure refers either to an unspecified disability or a disability that is outside of the categories for which data is collected.

Staff in the Department provide information on disability on a voluntary basis so the figures in the table may not reflect the total number of staff who have a disability.

Colonoscopy

Mr. Baron: To ask the Secretary of State for Health what proportion of those undertaking colonoscopy had been fully trained to do so in the latest year for which figures are available. [150235]

Mr. Hutton: All professional staff who undertake colonoscopy procedures have received the appropriate training to do so. A national initiative to improve standards of training for all endoscopic procedures is under way. £9 million has been made available over the next three years.

Information about the number of staff who undertake colonoscopy is not held centrally.

Departmental Staff

Ms Walley: To ask the Secretary of State for Health how many staff in his Department work in *(a)* the West Midlands and *(b)* North Staffordshire. [146906]

Ms Rosie Winterton: The Department has 56 staff who work in the West Midlands, including those who work in North Staffordshire. The number of staff working in North Staffordshire is not recorded separately.

Departmental Website

Mr. Lazarowicz: To ask the Secretary of State for Health what criteria his Department uses when deciding whether a leaflet which it publishes is to be made available only on its website. [149557]

Ms Rosie Winterton: Leaflets, being short publications primarily intended for a public audience, are printed. However, it is our policy to make the content of these and other publications available on the Department of Health's web-site and other departmental-commissioned web-sites, in line with the Government's e-delivery objectives.

There are occasions when other types of publications are made available only electronically. In this case, consideration of audience access to the internet is important and documents may be published exclusively on the web when the intended audience is a specialist one with ready access to the internet.

Digital Hearing Aids

Mr. Chope: To ask the Secretary of State for Health pursuant to his answer of 5 January to questions, reference 145050 and 145051, if he will list those audiology departments in England that do not fit digital hearing aids routinely. [147758]

Dr. Ladyman *[holding answer 13 January 2004]:* The Department of Health does not hold centrally a list of audiology departments in England. However, details of those audiology departments that are or will be involved in the modernising hearing aid services project are available at www.mhas.info. Details have been placed in the Library.

Electronic Recruitment

Mr. Andrew Mitchell: To ask the Secretary of State for Health whether the Department will retain the intellectual property rights for the services developed by third parties for the NHS electronic recruitment project. [144825]

Mr. Hutton: The electronic recruitment service for the national health service will be provided by Methods Consulting Ltd. under contract to the Department of Health for five years from 11 August 2003. Methods Consulting owns the intellectual property.

Eye Infections

Mrs. Curtis-Thomas: To ask the Secretary of State for Health whether contact lens wearers are at risk, when washing their face with tap water, of developing a serious eye infection caused by the water borne amoeba acanthamoeba keratitis; and what is being done to reduce the incidence of acanthamoeba keratitis in tap water. [147939]

Ms Rosie Winterton: There is always a risk of contracting acanthamoeba keratitis when contact lenses are exposed to water as acanthamoeba can be found in chlorinated swimming pools, baths, showers and bottled water as well as in domestic tap water; with approximately one in 30,000 contact lens wearers

contracting the disease. It is believed that any increased risk for contact lens wearers by washing their face with tap water is minimal.

Contact lens solutions have been developed in recent years to take account of this. All contact lens wearers are advised to only use recognised cleaning solutions and follow practitioners' directions when cleaning their lenses.

Surface water is treated in a manner to minimise the risk of parasites entering the distribution system and the main risk to water lies with 'natural' contamination of water in domestic storage.

Foundation Hospitals

Mr. Gardiner: To ask the Secretary of State for Health pursuant to his answer of 12 January 2004, *Official Report*, columns 602–3W, on foundation hospitals, whether guidance and best practice will be automatically sent to foundation hospital trusts without the need for a specific request. [149505]

Mr. Hutton: National health service foundation trusts will, like NHS trusts, receive the NHS Chief Executive's bulletin. This includes information on all Departmental guidance issued, which can be accessed through the Department's website.

General Medical Council

Mr. Baron: To ask the Secretary of State for Health if he will list the individuals and organisations from which his Department, its executive agencies and the non-departmental public bodies for which his Department is responsible received a response to the consultation, Reform of the General Medical Council: a paper for consultation. [149871]

Mr. Hutton *[holding answer 22 January 2004]:* The Department of Health received responses to its consultation on the Reform of the General Medical Council from the following:

Academy of Medical Royal Colleges
Association of Surgeons of GB and Ireland
British Medical Association (BMA)
BMA Wales
Department of Health, Northern Ireland
General Chiropractic Council
General Medical Council
Joint Consultants Committee
Medical Defence Union
Medical Defence Organisation
Medical Practitioners' Union
Royal College of Anaesthetists
Royal College of General Practitioners
Royal College of Midwives
Royal College of Nursing
Royal College of Ophthalmologists
Royal College of Paediatrics and Child Health
Royal College of Pathologists
Royal College of Physicians
Royal College of Physicians (Edinburgh)
Royal College of Physicians and Surgeons of Glasgow
Royal College of Radiologists
Royal College of Surgeons
Association of Community Health Councils for England and Wales
Consumers' Association
Diabetes UK
Harrogate CHC
National Consumer Council
North Staffordshire CHC
Welsh Consumer Council
Joint Committee on Postgraduate Training and General Practice
UK Centre for the Advancement of Interprofessional Education
West Midlands Deanery
Association of British Pharmaceutical Industries
National Clinical Assessment Authority
National Patient Safety Agency
Privy Council Office
The Wellcome Trust
Amber Valley Primary Care Trust
Basildon PCT
Eastern Wakefield PCT
Gloucester Partnership NHS Trust
Harrow PCT
Kennet and North Wilts PCT
Lewisham PCT
North Surrey PCT
North East London Health Authority
Northamptonshire Heartlands NHS Trust
Northumbria Healthcare NHS Trust
Oxfordshire Mental Healthcare NHS Trust
Queen Elizabeth Hospital, Woolwich
Royal London Hospital
South East London Strategic Health Authority
South Gloucestershire PCT
SW London and St. Georges Mental Health NHS Trust
Wakefield West PCT
West Yorkshire Health Authority
Weston Area Health NHS Trust
Dr. W. I. Jones
Mr. T. Benson
Dr. J. Cawson
Dr. P. Anastassiadis
Dr. J. Jin
Dr. A .Robbins

General Practitioners

Mr. Barnes: To ask the Secretary of State for Health how many complaints the Health Service Ombudsman has received about general practitioners removing patients from their practice lists in each of the past five years; how many of these complaints led to investigations; how many investigations led to criticisms of the general practitioners' decisions; and how many patients have then been reinstated on to the lists of the general practitioners concerned. [148152]

Ms Rosie Winterton: This information is not held by the Department. The Health Service Ombudsman publishes information about the handling of cases in her

annual report, copies of which are available in the Library and on the Ombudsman's website at: www.ombudsman.org.uk

Mr. Drew: To ask the Secretary of State for Health what discussions he has had with primary care trusts on night-time cover following the introduction of the new contract for general practitioners. [142259]

Mr. Hutton: The Department is working closely with strategic health authorities to ensure that primary care trusts and local providers of out of hours medical services are ready to accommodate the changes arising from the new general medical services contract.

Haemoglobinopathies

Mr. Rosindell: To ask the Secretary of State for Health (1) for what reason there is no centre for information, screening and support on haemoglobinopathy in Havering; [147892]

(2) for what reason Havering council does not provide services for sickle cell and thalassaemia support groups; [147893]

(3) for what reason there is no integrated comprehensive network care for sickle cell and thalassaemia sufferers in Havering. [147898]

Mr. Hutton: It is Department of Health policy, within the framework set out in the NHS Plan and the "Shifting the Balance of Power" initiative, to devolve funding decisions to the front line. It is now for primary care trusts (PCTs), in partnership with strategic health authorities (SHAs) and their local stakeholders, to determine how best to use their funds to meet national and local priorities for improving health based on the specialised knowledge they have of the local community.

However, I understand from the North East London SHA that Havering is regarded as a priority area for introducing screening for haemoglobinopathies. Neonatal screening started across the North East London SHA from 1 September 2003 and antenatal screening is planned to start from April 2004.

I am informed by North East London SHA that sickle cell and thalassaemia services are at present provided by a specialist unit based at Newham General Hospital. The North East London sector wide network is currently considering proposals for Havering PCT to link into the Newham sickle cell and thalassaemia service, with satellite basis for local access.

There is also a support group for sickle cell and thalassaemia, based in Romford, which is part of the Sickle Cell Society, which is part funded by the local authority.

Mr. Rosindell: To ask the Secretary of State for Health (1) what preparations are being made for the Government's health plan on the Haemoglobinopathy Screening Programme for pregnant women and neonates; [147896]

(2) where the special designated team to implement the Haemoglobinopathy Screening Programme is based. [147899]

Miss Melanie Johnson: Local implementation of the national health service sickle cell and thalassaemia screening programme in England is being supported by a UK National Screening Committee development programme. The programme is being developed in partnership with the key community and voluntary sector stakeholders.

Key elements of the national work include developing laboratory services, standards and quality assurance, an education and training strategy for professionals and identifying and involving communities, professionals, women and their partners.

The national team supporting the NHS implementation is based at the Department of Public Health Sciences at Guy's, King's and St. Thomas' School of Medicine in London.

Mr. Rosindell: To ask the Secretary of State for Health how the Government plans to address the change in the numbers of sickle cell and thalassaemia sufferers travelling to inner London hospitals to seek medical attention. [147897]

Mr. Hutton: The Department has already started to do preliminary work on looking at services for haemoglobinopathy patients.

The Department is working with professional organisations to consider proposals for clinical networks of services to be developed allowing patients to be cared for locally. However, it will ultimately be a decision for the primary care trusts, which have discretion over where best to commission health care from national health service hospitals or other public, private or voluntary sector health care providers.

Healthcare Costs (Patient Contributions)

Adam Price: To ask the Secretary of State for Health how many people in poor health in England contributed to the cost of their healthcare on the last date for which figures are available. [148925]

Ms Rosie Winterton: We do not collect information on the number of people who contribute to the cost of their health care through national health service charges.

Health Forums

Dr. Tonge: To ask the Secretary of State for Health how much is being spent in supporting patient and public involvement at local level. [149765]

Ms Rosie Winterton: It is not possible to provide this information, as individual NHS trusts and primary care trusts decide how much to invest in patient and public involvement. The Government, however, have made available £35.4 million to the Commission for Patient and Public involvement in Health for 2003–04.

Dr. Tonge: To ask the Secretary of State for Health what changes will be required to patient and public involvement in health forums established in NHS trusts which gain foundation status. [149769]

Ms Rosie Winterton: The Health and Social Care (Community Standards) Act 2003 requires a patients' forum to be established for national health service foundation trusts. When a NHS trust becomes a NHS foundation trust, it is intended that the membership of the patients' forum will remain the same and the Commission for Patient and Public Involvement in Health will notify members that they are now members of a NHS foundation trust patients' forum.

Dr. Tonge: To ask the Secretary of State for Health when the Commission for Patient and Public Involvement in Health renamed the local network providers as forum support organisations; and for what reasons the change was made. [149770]

Ms Rosie Winterton: Since 1 December 2003, local network providers have been known as forum support organisations because the new name more accurately reflects their purpose of providing practical support to patients' forums.

Dr. Tonge: To ask the Secretary of State for Health how the Commission for Patient and Public Involvement Forums monitors and assesses the performance of forum support organisations. [149771]

Ms Rosie Winterton: The regional centres of the Commission for Patient and Public Involvement in Health are responsible for managing the contracts placed with the forum support organisations—this includes performance management of those contracts.

Health Professionals

Dr. Kumar: To ask the Secretary of State for Health how many additional *(a)* doctors, *(b)* nurses and *(c)* matrons have been employed (i) in each region and (ii) in Middlesbrough South and East Cleveland since (A) 1997 and (B) 2001. [148405]

Mr. Hutton: Information on the number of doctors and nurses in England, each Government Office Region and within County Durham and Tees Valley and Northumberland, Tyne and Wear Strategic Health Authorities areas for the years requested is shown in the table. Separate information is not collected centrally on the number of matrons employed in the national health service.

Health Services (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health (1) what assessment he has made of the impact population growth will have on Chorley and South Ribble primary care trust; and what extra monies will be made available; [148214]

(2) what extra staff and funding at Chorley Hospital he plans to make available to meet population growth in Chorley; [148215]

(3) what assessment he has made of the impact that population growth in Chorley will have on Chorley Hospital. [148216]

Miss Melanie Johnson: An assessment of the impact of population growth on the local health economy has been made by Lancashire Teaching Hospitals National Health Services Trust. It is noted from population forecasts provided by local councils that the population is due to decline slowly over the 10 years from 2001. There is no perceived impact on the local health economy, including Chorley and South Ribble Primary Care Trust (PCTs), or Lancashire Teaching Hospitals NHS Trust and its services across Chorley, South Ribble or Preston, and Chorley Hospital in particular.

For each round of allocations, the weighted capitation formula used to inform funding for PCTs is updated to take account of the best available measure of population from the Office for National Statistics.

Revenue allocations for PCTs covering the period 2003–04 to 2005–06 were announced on 11 December 2002. There are no plans to revisit these allocations.

Any changes in population figures will be used for the next round of allocations. We will commence preparatory work on the next round of allocations early this year.

Healthy Living Centres

Chris Grayling: To ask the Secretary of State for Health pursuant to his answer of 18 December 2003, *Official Report*, column 1124W, on healthy living centres, what funding he is providing for centres *(a)* providing activities covering diet and nutrition and *(b)* offering physical and sporting activities. [148039]

Miss Melanie Johnson: 114 healthy living centres—167 in the United Kingdom—are providing activities covering diet and nutrition and 207 healthy living centres—282 in the UK—are offering physical and sporting activities. A substantial number of health living centres are addressing all of these: diet, nutrition and physical activity. Healthy living centres are funded through the New Opportunities Fund and do not receive any central funding from Department of Health.

Hip and Knee Replacements

Sandra Gidley: To ask the Secretary of State for Health what the cost per operation is for *(a)* hip and *(b)* knee replacements in each hospital trust; and if he will make a statement. [149007]

Mr. Hutton: The information requested has been placed in Library. The table contains the average unit costs (per operation) for each national health service trust in England for primary hip replacements and primary knee replacements where the operation is undertaken as an elective (planned) admission.

The data source is the Reference Costs 2002 Collection, relating to the financial year 2001–02. This is the most current data available in the public domain.

Calculation of the costs provided are based on all activity and costs associated with each procedure, regardless of the specialty in which the activity is recorded.

Hospital-acquired Infection

Dr. Murrison: To ask the Secretary of State for Health what proportion of patients with MRSA bacteraemia in NHS hospitals in England died of their infection in the last 12 months for which figures are available; and what comparable figures his Department has collated regarding mortality in other countries. [147499]

Miss Melanie Johnson: Information on deaths from methicillin resistant Staphylococcus aureus (MRSA) bacteraemias is not routinely available. Currently, mortality data can only be provided by enhanced surveillance or special studies. We do not have figures for other countries.

Tim Loughton: To ask the Secretary of State for Health (1) which members of staff and at what level of seniority will be filling the new posts of directors of infection control; [144139]

(2) how the performance of the newly created directors of infection control will be managed; and by whom; [144140]

(3) whether it is his policy that existing consultant microbiologists or infection control nurses will be redeployed to the new posts of directors of infection control. [144141]

Miss Melanie Johnson: The director of infection prevention and control is not a new post but an extra responsibility for an existing senior health professional within every organisation providing national health service services. They will:

report directly to the chief executive and the board and not through any other officer;

have the authority to challenge inappropriate clinical hygiene practice as well as antibiotic prescribing decisions;

assess the impact of all existing and new policies and plans on infection and make recommendations for change; and

be an integral member of the organisation's clinical governance and patient safety teams and structures.

We would expect consultant microbiologists and infection control nurses to be among the healthcare professionals taking on this role but designation of the new director is a local decision. However, what is important is that the individuals concerned have the appropriate expertise and authority to act to reduce infection rates.

Strategic health authorities will monitor performance against the objectives of "Winning ways" and the Commission for Healthcare Audit and Inspection will be asked to give priority to assessing NHS performance in reducing health care associated infection.

Human Tissue Authority

Nick Harvey: To ask the Secretary of State for Health on what date the Retained Organs Commission will be wound up; on what date he proposes that a shadow Human Tissue Authority will be created; and what transitional arrangements he will put in place to bridge any gap between these two dates. [149379]

Ms Rosie Winterton: The Human Tissue Bill, which received its second reading on 15 January 2004, sets out plans to create a Human Tissue Authority. The intention is to establish a shadow authority, in advance of the new authority, once the Bill receives Royal Assent.

The Retained Organs Commission was scheduled to close on 31 March 2003. It was extended for a further year until 31 March 2004 to enable it to complete its work.

The aims of the Commission are primarily to oversee national health service arrangements for the return of human organs and tissue and to ensure that any returns reflect families' wishes and take place promptly and sensitively. As the Commission's support to the NHS in dealing with inquiries from families will cease, it is currently engaging with trusts and strategic health authorities (SHAs) to secure the sensitive transfer of these responsibilities to them before it closes.

The Commission also issues guidance, and advises Government on the retention and use of human organs and tissue from post-mortems. It will issue final guidance to SHAs and trusts before it closes and provide a final report to Government. Any subsequent guidance in this area will be issued by the Department of Health or by the Human Tissue Authority in due course.

Independent Diagnostic and Treatment Centres

Mr. Burstow: To ask the Secretary of State for Health if he will make it his policy to disclose information concerning the *(a)* financial and *(b)* clinical performance of independent diagnostic and treatment centres on the same basis as information collected and reported on direct NHS services. [148684]

Mr. Hutton: Providers of independent sector treatment centres will be paid a fixed price for the period of the contract to provide an agreed number of procedures. They will be expected to provide full activity and outcome information, as required for hospital episode statistics data. The Department has also developed a national, standardised set of performance indicators for independent sector treatment centres.

Mr. Burstow: To ask the Secretary of State for Health if he will place in the Library copies of the performance standards set for the first wave of independent diagnostic and treatment centres. [148685]

Mr. Hutton: Performance standards for the first wave of independent sector treatment centres are part of the project agreement for the contract between national health service sponsors and providers. The performance standards are subject to continuing commercial negotiation and will be placed in the Library once commercial agreement has been reached on all projects.

Influenza

Mr. Burstow: To ask the Secretary of State for Health pursuant to his answer of 3 December 2003, *Official Report*, column 77W, on influenza, what steps have been taken to ensure there are adequate supplies of medication to treat cases of influenza. [142796]

Miss Melanie Johnson *[holding answer 8 December 2003]:* Officials are in regular contact with manufacturers to monitor the quantities of antiviral medications they have in stock.

IT Contracts

Mr. Sayeed: To ask the Secretary of State for Health if he will list information technology contracts in his Department above £20 million in each of the last 10 years; what the inception date for each system was; when it became fully functional; when it became fully debugged; and what the cost of over-runs has been. [146194]

Mr. Hutton: The information technology (IT) contracts let by the Department of Health and its arms length bodies in the last 10 years in excess of £20 million are shown in the table. Costs are shown as whole life costs and may, therefore, include elements of internal costs. A number of the contracts listed are IT framework contracts which National Health Service organisations can utilise to deliver IT infrastructure and software services.

Information about when NHS systems became fully debugged and the cost of over-runs is not held centrally.

	Contract	Whole life cost (£m)	Inception date	Fully functional
1994	(None awarded in 1994)			
1995	NHSNet central framework contract with BT and Cable & Wireless	129.6	1995	7–10 year contract 1996 for BT 1997 for Cable & Wireless
	Nation-Wide Clearing Service	30.0	1996	8 year contract (basic contract period of 5 years plus option to extend for 3 years).
1996	Infrastructure Management Services Framework agreement	40.0	1996	5 year contract with Fujitsu to support DH infrastructure services, with optional extension up to 7 years
1997–99	(None awarded in 1997–99)			
2000	Project Connect (formerly GPNet).	150.0	2000	6 year contract, with gradual rollout from date of contract signature in December 2000. This funding represents the cost of Wide Area Networks to connect GPs to NHSNet. In addition to this, £318 million more was committed to the provision of the necessary Local Area Networks within each GP practice. However, as this effectively involved one contract per practice, all of this money was committed in small contracts.
	Clinical Messaging	50.0	2000	7 year contract. Gradual rollout from 2000.
	NHS Direct—Clinical Decision Support Software	22.3	2000	7 year contract. The level of cash-releasing benefits means that the contract pays for itself.
2001	Microsoft software enterprise agreement	138.6	2001	3 year contract. This is a software purchase contract
	Electronic Staff Record	325.0	2001	10 year contract. Gradual rollout from 2001
2002	Shared Services Centres two pilot centres	21.0	2002	2 year contract
	NHSNet purchase of additional bandwidth	96.5	2002	5 year contract. Gradual rollout from 2002
	Email and directory services	326.2	2002	10 year contract. System scheduled to be completely rolled out by March 2003
	Dental Practice Board—reprocurement of IT systems	40.0	2003	Two related contracts, both running for 7 years—one with IBM (£31. 9m) and one with Astron (formerly Hays) (8. 1m)
	Infrastructure Management Services Framework Agreement	60	2002	7 year contract with CSC to support DH IT infrastructure services, with optional extension up to 10 years.
2003	NHS Direct intelligent phones	29.7	2003	6 year contract
	National Programme: National Electronic Booking System	64.5 (core services)	October 2003	5 year contract. National rollout complete 2005. Options exist for extensions to contract length and range of services provided.
	National Programme: NHS Care Record Service (NCRS) "data spine"	620	December 2003	9 year contract plus one year optional extension.
	National Programme: NCRS, London Cluster	996 (core services)	December 2003	9 year contract plus one year optional extension.
	National Programme: NCRS, North East Cluster	1,099 (core services)	December 2003	9 year contract plus one year optional extension.
	National Programme: NCRS, North West and West Midlands Cluster	973 (core services)	December 2003	9 year contract plus one year optional extension
	National Programme: NCRS, Eastern Cluster	934 (core services)	December 2003	9 year contract plus one year optional extension
2004	National Programme: NCRS, South Cluster		Contract yet to be signed	
	National Programme: New National Network (N3) infrastructure		Contract yet to be signed	

Lancashire Ambulance Service

Mr. Hoyle: To ask the Secretary of State for Health how many times ambulance services had 999 calls passed to them by BT operators who were unable to connect the call to the Lancashire Ambulance Service in the last 12 months. [148375]

Miss Melanie Johnson: The information requested is not held centrally.

Medical Records

Ms Walley: To ask the Secretary of State for Health what guidance was available in the *(a)* 1970s and *(b)* 1980s in respect of routine recording of myodil injections on medical records; and if he will make a statement. [148778]

Miss Melanie Johnson: We are unaware of any specific guidance available in the 1970s or 1980s on the routine recording of Myodil injections on medical records.

Memory Clinics

Mrs. Brooke: To ask the Secretary of State for Health what information he collates on access to memory clinics in England. [150150]

Dr. Ladyman: No information is collected centrally on access to memory clinics.

Meningitis

Mr. Drew: To ask the Secretary of State for Health what progress is being made towards the introduction of a meningitis B vaccine. [148274]

Miss Melanie Johnson: No vaccine is yet available to protect against meningitis B. However, a number of candidate vaccines are being developed. The Health Protection Agency is working closely with manufacturers to ensure the prompt evaluation of the candidate vaccines as they become available. We are also monitoring developments in this area abroad.

Sensory Impairment

Sandra Gidley: To ask the Secretary of State for Health what estimate he has made of the number of people aged 65 years and over who suffer from sensory impairment, broken down by sense. [149790]

Dr. Ladyman: The Department collects statistics on the numbers of people in England who are registered with councils as blind, partially sighted, deaf and hard of hearing. The numbers of people over 65 years so registered, as at 31 March 2003, were: blind—121,115; partially sighted—22,165; deaf—19,030, hard of hearing—116,070. Registration is voluntary.

Mental Health

Sandra Gidley: To ask the Secretary of State for Health how many care homes are registered as catering for the needs of the elderly mentally infirm. [149791]

Dr. Ladyman: Data on the number of care homes that are registered as catering for the needs of the elderly mentally infirm are not centrally available. The available information is shown in the table.

Figures for later years have been collected by the National Care Standards Commission, but comparable details are not available.

Table: Number of care homes primarily for people with mental illness—England at 31 March 2001

	Residential[1]	*Nursing*[2]
18 and over	3,050	820
Of which:		
65 and over	1,130	[3]

[1] Includes dual registered homes
[2] Excludes dual registered homes
[3] Not available
Source:
DH forms RA and RH(N)

Mr. Burstow: To ask the Secretary of State for Health how many and what percentage of prisoners with severe mental illness have a care plan. [150045]

Dr. Ladyman: National health service mental health in-reach teams will be in place in some 90 prisons in England by March 2004, covering those establishments where mental health need is greatest. Our expectation is that where such teams are fully operational, care plans will have been drawn up for all prisoners with severe mental illness.

NHS Direct

Mr. Hoyle: To ask the Secretary of State for Health what statistics he has collated on the use of NHS Direct in Lancashire, broken down by constituency. [149939]

Ms Rosie Winterton: The statistics collated by NHS Direct North West Coast for the last six months—1 July to 31 December 2003—broken down by constituencies, are shown in the table.

Constituency	*Number of calls*
Blackburn	31,632
Blackpool	6,343
Burnley	4,473
Chorley	1,151
Darwen	4,096
Hyndburn	7,487
Lancaster and Wyre	4,181
Morecambe and Lunesdale	1,321
Preston	18,289
Ribble Valley	1,120
Total	80,093

NHS Pay (Leeds)

Mr. Battle: To ask the Secretary of State for Health how many *(a)* male and *(b)* female NHS employees in Leeds are paid (i) below £5,000, (ii) £5,001-£10,000, (iii) £10,001-£12,500, (iv) £12,501-£15,000, (v) £15,001-£17,500, (vi) £17,501-£20,000, (vii) £20,001-£22,500, (viii) £22,501-£25,000, (ix) £25,001-£27,500, (x) £27,501-£30,000, (xi) £30,001-£35,000, (xii) £35,001-£40,000, (xiii) £40,001-£45,000, (xiv) £45,001-£50,000, (xv) £50,001-£60,000, (xvi) £60,001-£70,000, (xvii) £70,001-£80,000, (xviii) £80,001-£90,000, (xix) £90,001-£100,000, (xx) £100,001-£150,000, (xxi) £150,001-£200,000 and (xxii) above £200,000. [149033]

Miss Melanie Johnson: This information is not held centrally.

NICE Guidance (Pregnancy)

Jane Griffiths: To ask the Secretary of State for Health when the National Institute for Clinical Excellence will publish guidance on managing problems in early pregnancy; and if he will make a statement. [149302]

Dr. Ladyman: The National Institute for Clinical Excellence (NICE) published a clinical guideline entitled, "Ante-Natal Care: routine care for the healthy pregnant woman", on 22 October 2003. Full details of this guideline are available on the NICE website at www.nice.org.uk.

Nurses

Mr. Baron: To ask the Secretary of State for Health pursuant to his answer of 8 January 2004, *Official Report*, column 467W, how many public health nurses there were in the NHS in each of the last 10 years. [148910]

Mr. Hutton *[holding answer 19 January 2004]:* Workforce information currently collected by the Department does not identify either school nurses or communicable disease control nurses, two of the main groups of public health nurses. Health visitors are the only public health nurses separately identified in the non-medical workforce census. The following table shows the number of health visitors employed in the national health service since 1992.

NHS hospital and community health services: Qualified health visitors in England as at 30 September each specified year

	Headcount
1992	12,038
1993	12,059
1994	11,548
1995	12,079
1996	12,350
1997	12,410
1998	12,572
1999	12,800

NHS hospital and community health services: Qualified health visitors in England as at 30 September each specified year

	Headcount
2000	12,827
2001	13,053
2002	12,774

Notes:
1. A new classification of the non-medical workforce was introduced in 1995.
2. Information based on this classification is not directly comparable with earlier years.

Department of Health Non-medical Workforce Census

Obesity

Chris Grayling: To ask the Secretary of State for Health how much funding he has provided for *(a)* the Weight Wise website and *(b)* Weight Concern's toolkit on obesity. [147931]

Miss Melanie Johnson: The Department of Health has provided £66,700 over two years to the British Dietetic Association for the development of the Weight Wise website. The website went live on 3 December 2003 and is designed to be used by both health professionals and members of the public.

Funding of £130,000 over three years was provided for Weight Concern's toolkit on obesity. The funding was used to recruit experts in psychology, nutrition and exercise to develop materials, create a workbook to assist individuals and professionals managing obesity, and carry out a preliminary evaluation.

Funding for both these pieces of work was provided through the Department's Section 64 grant scheme.

Operation Telic

Tim Loughton: To ask the Secretary of State for Health (1) what percentage of military personnel serving in Operation Telic who have returned from Iraq have since received treatment for mental health problems; [147744]

(2) of those who suffered from mental health problems after participating in Operation Telic, how many suffered from and were treated for *(a)* depression, *(b)* post-traumatic stress disorder, *(c)* Gulf War Syndrome, *(d)* panic disorder, *(e)* anxiety disorder and *(f)* motor neurone disease; [147746]

(3) of those who suffered from mental illness on returning from Operation Telic, how many were treated *(a)* by the NHS and *(b)* privately. [147747]

Mr. Caplin: I have been asked to reply.

This information is currently being collated. I expect to be able to write to the hon. Gentlemen shortly and a copy of my letter will be placed in the Library of the House.

Pain Management Clinic (Guys and St. Thomas')

Mr. Chope: To ask the Secretary of State for Health what steps he is taking to ensure that the waiting list for access to the INPUT pain management clinic at Guys and St. Thomas's hospital is reduced; and when he will respond to the letter from Mrs. Jackson of Christchurch dated 5 December 2003 on this subject. [150536]

Mr. Hutton: Officials responded to Mrs. Jackson's letter of 5 December 2003 regarding the INPUT pain clinic on the 13 January 2004.

I am assured by Guy's and St. Thomas' Hospitals National Health Service Trust that they have taken steps to reduce waiting times for the INPUT pain clinic:

Extra clinic sessions have been added.

All referrals have to be validated by the consultant.

The non-general practitioner referral waiting list is currently being validated to ensure that patients still wish to attend for assessment.

Improvements in the administration system mean it now provides better information about clinic slot availability and facilitates the offer of vacant slots to non-GP referral patients.

Staff are now able to compile reports in order to manage clinics more effectively.

A review of the systems for sending out-patient appointments has taken place and a reminder system will be introduced to minimise the number of appointment slots, which might otherwise be wasted if patients did not attend.

To increase psychologist out-patient capacity, the weekly timetable for all psychologists is currently being reviewed, in order to identify how their workloads can be altered to allow more outpatient assessment time.

The trust also plans to employ a service improvement facilitator to help improve the service provided by the clinic.

Practice Staff (Complaints)

Mr. Burstow: To ask the Secretary of State for Health what representations his Department has received about the treatment of practice staff by general practitioners; what the complaints procedure is in the event of staff concerns; and if he will make a statement. [144940]

Mr. Hutton: General practitioners are independent contractors to the national health service. They are responsible for employing their own staff, and for agreeing their terms and conditions of employment. Practice staff, like all other employees, have statutory employment rights which are enforceable by the employment tribunal.

Public Health

Mr. Burstow: To ask the Secretary of State for Health what assessment he has made of the public health content of strategic health authority local development plans; and if he will make a statement. [144784]

Mr. Hutton: Strategic health authorities were required to produce local delivery plans to deliver the national priorities set out in "Improvement, Expansion and Reform: The next three years: Priorities and Planning Framework (PPF) 2003–2006." A copy is available in the Library.

The plans cover a whole range of areas—improvements to cancer services; tackling coronary heart disease; reducing health inequalities and improving access to services—which will improve the public's health.

Public Health Laboratory Service

Dr. Murrison: To ask the Secretary of State for Health what the funding for the Public Health Laboratory Service was in each year from its establishment until 1996–97. [147658]

Miss Melanie Johnson: The funding for the Public Health Laboratory Service is described in its annual report and accounts, copies of which are available in the Library.

Stroke (Gloucestershire)

Mr. Laurence Robertson: To ask the Secretary of State for Health what facilities there are in the NHS in Gloucestershire to identify those most at risk from strokes; and if he will make a statement. [149468]

Ms Rosie Winterton: In line with our policy of Shifting the Balance of Power, it is now for primary care trusts, in partnership with health authorities and other local stakeholders, to determine how best to use their funds to meet national and local priorities for improving health, tackling health inequalities and modernising services, based on the specialised knowledge they have of the local community.

I am informed by Avon, Gloucestershire and Wiltshire Strategic Health Authority that the National Health Service in Gloucestershire is involved in a wide range of prevention programmes, including exercise and diet, linked to health promotion. There is regular screening in primary and secondary care for example for high blood pressure, smoking and other familial factors with prescribing where appropriate. The NHS in Gloucestershire also participates in audits to monitor and improve practice in general practitioner surgeries and hospitals.

Mr. Laurence Robertson: To ask the Secretary of State for Health what NHS services are offered to stroke victims in their homes; and if he will make a statement. [149469]

Dr. Ladyman: People who have experienced a stroke for the first time should be admitted to hospital for immediate assessment and to plan for their rehabilitation. Many stroke units are now developing early discharge schemes to help some people (usually those with satisfactory domestic caring arrangements) to return home at an early opportunity to continue rehabilitation at home for a few more weeks. Most disabled stroke patients who are discharged from hospital at any stage of their care will benefit from a period of post-discharge rehabilitation. This has been shown to stabilise the patient's function and make a small additional improvement in independence. During the period following discharge, there will also commonly be contact with mainstream health and social care community services. These will include: the patient's general practitioner; community nurses; and the home care service. These contacts often continue long-term for patients with persisting disability. The national service framework for older people has stipulated that stroke patients should have a review, performed by a stroke co-ordinator six months after discharge, to reassess their care needs.

Waiting Times

Mr. Baron: To ask the Secretary of State for Health how many cancer patients waited longer than two months between urgent general practitioner referral and first treatment in each of the last eight years. [149918]

Miss Melanie Johnson *[holding answer 22 January 2004]:* The data requested are not available centrally.

The NHS Cancer Plan sets out our strategy to reduce waiting times for cancer patients. A maximum two month wait from urgent referral to treatment was introduced for breast cancer in December 2002. Data on performance of this target has been reported from the first quarter of 2003–04 and is shown in the table.

	Quarter	
	Qtr 1 (April-June 2003)	*Qtr 2 (July-September 2003)*
Number of patients treated for breast cancer within two months of urgent referral by their GP	3,844	4,047
Percentage of breast cancer patients treated within two months of urgent referral by their GP	96.8	97.8
Number of patients treated for breast cancer during the quarter but not within two months of urgent referral by their GP	127	91

By 2005, all cancer patients will receive their first treatment within two months of urgent referral for suspected cancer by their general practitioner, except for a good clinical reason or through patient choice. Targets of one month from urgent referral for suspected cancer to the start of treatment were introduced in 2001 for testicular cancer, acute leukaemia and children's' cancers. Data on achievement of NHS Cancer Plan waiting times targets are published on the Department's website or strategic health authorities and trusts, at www.doh.gov.uk/cancerwaits.

Working Time Directive

Tony Baldry: To ask the Secretary of State for Health how many new medical posts NHS hospital trusts have bid for to help respond to the EU Working Time Directive. [149341]

Ms Rosie Winterton: This information is not available centrally.

Strategic health authorities are currently working with their respective trusts locally on plans to achieve compliance for doctors in training from August 2004.

HOME

Infanticide

Tim Loughton: To ask the Secretary of State for the Home Department (1) how many *(a)* women and *(b)* men are in prison having been convicted of causing the deaths of their own children; [145030]

(2) how many *(a)* women and *(b)* men have been convicted in each of the last 10 years for causing the deaths of their own children. [145031]

Paul Goggins: Available information is in the form of all suspects convicted of homicide by type of homicide and sentence. The latest 10 years data were published in "Criminal Statistics England and Wales 2001–2002: Supplementary Volume", Table 1.10.

Data for suspects causing the deaths of their own children are not published separately.

Animal Experiments

Norman Baker: To ask the Secretary of State for the Home Department what steps the minister responsible for animal experimentation takes to secure advice on these matters from sources independent of officials. [148849]

Caroline Flint: Under sections 9(1) and 18(2) of the Animals (Scientific Procedures) Act 1986, members of the Animals (Scientific Procedures) Inspectorate provide the Secretary of State with expert technical advice about whether and on what terms applications for licences and certificates should be granted, and on their review, amendment or variation. The Inspectorate is the only source of such advice considered necessary in dealing with most applications for project licences, personal licences and certificates of designation. The Inspectorate has no powers to grant, refuse, revoke or vary licences or certificates. That responsibility lies with the Secretary of State.

Where issues arising from project licence applications prompt the Secretary of State to seek advice from other experts, the 1986 Act makes provision, under section 9(1), for the appointment of independent assessors. This option is seldom used, but may be exercised in a variety of circumstances. For example, advice may be sought when the issues raised require specific, expert knowledge not available within the Inspectorate. It may also be appropriate when there is debate within the scientific or welfare communities, or between the Inspectorate and an applicant, as to the scientific validity of the hypothesis or methodology; the scope for further refinement of the programme of work; the benefits likely to arise from a programme of work; or the welfare costs to the animals.

Section 12 of the Act defines the actions to be taken by the Secretary of State when it is proposed to refuse an application for authorities under the Act, or to vary or revoke existing authorities other than with the consent of the holder of the licence or certificate. In such circumstances, the Act allows the appointment of a person of suitable legal qualification to consider any representations against such proposals and to report the outcome to the Secretary of State..

Sections 19 and 20 of the 1986 Act establish the Animal Procedures Committee, an independent body created to advise the Secretary of State on matters concerned with the Act and the Secretary of State's powers under it. The Committee may consider and advise on matters of its own choosing, as well as those that are referred to it by the Secretary of State. In its considerations, the Committee must have regard both to the legitimate requirements of science and industry and to the protection of animals against avoidable suffering and unnecessary use in scientific procedures. The Committee regularly publishes general advice to Ministers, most recently in its reports on the use of non-human primates and on the cost benefit assessment, and also offers additional advice on the limited range of project licence applications referred to it.

The Secretary of State is not bound by the advice received from the Inspectorate, assessors, persons appointed to consider representations, or the Animal Procedures Committee, in respect of licence applications. Such advice only informs the Secretary of State's decision.

More generally, as the Home Office Minister responsible for the implementation of the 1986 Act, I regularly meet representatives of the scientific community and animal welfare and animal protection groups, as well as Ministerial colleagues in other Government Departments and Members of Parliament, to discuss policy relating to the use of animals in scientific procedures. I also receive correspondence and a variety of reports and written representations from these and other sources on the use of animals in scientific procedures.

Anti-drugs Strategy

Dr. Iddon: To ask the Secretary of State for the Home Department what progress has been made towards the 10-year anti-drugs strategy targets of *(a)* halving the number of young people using Class A drugs, *(b)* halving the availability of Class A drugs, *(c)* doubling the number of drug misusers in treatment and *(d)* halving the levels of re-offending by drug-misusing offenders. [149865]

Caroline Flint: The Updated Drug Strategy published in December 2002 sets out revised targets aimed at reducing the harm caused by drug misuse to society communities, individuals and their families.

The current Drug Strategy targets are as follows:

Reduce the use of Class A drugs and the frequent use of any illicit drug among all young people under the age of 25 especially by the most vulnerable young people;

Reduce the availability of illegal drugs by increasing the proportion of heroin and cocaine target on the UK which is taken out;

the disruption/dismantling of those criminal groups responsible for supplying substantial quantities of Class A drugs to the UK market;

the recovery of drug-related criminal assets;

contribute to the reduction of opium production in Afghanistan, with poppy cultivation reduced by 70 per cent. within five years and elimination within 10 years;

reduce drug-related crime, including as measured by the proportion of offenders testing positive at arrest;

increase the participation of problem drug users in drug treatment programmes by 55 per cent. by 2004 and by 100 per cent. by 2008. And increase year on year the proportion of users successfully sustaining or completing treatment programmes.

Information on progress against these targets is available as follows:

The Home Office Annual report 2002–03 published in May 2003 provides details of progress against each of the drug strategy targets.

In addition, the Home Office Autumn report published in December 2003 provides an update on the young people and drug related crime targets. Both of these documents are in the Library and on the Home Office website.

Recent information on the number of drug users receiving treatment was announced on 11 December 2003 and is available in the Library and on the Department of Health's website.

Recent information on progress to reduce the availability of drugs which cause the most harm is available on Her Majesty's Custom & Excise website. The Foreign and Commonwealth Office website provides an update on the progress of poppy eradication in Afghanistan.

Asylum Seekers

Tim Loughton: To ask the Secretary of State for the Home Department how many people aged under 18 have been returned to their families in their countries of origin in each of the last three years. [144992]

Beverley Hughes: Information on the ages of those people removed from the United Kingdom is not collated centrally and would only be available by examination of individual case-files at disproportionate cost.

Although statistics of the removal of failed asylum seekers include unaccompanied minors; they are not separately identified. However, as a matter of policy, unaccompanied children are not removed under Immigration Act powers unless we are satisfied that suitable arrangements have been made for their reception and care in the destination country.

Tom Cox: To ask the Secretary of State for the Home Department how much benefit was paid to asylum seekers living in the United Kingdom in 2003. [148953]

Beverley Hughes: The budget for asylum support costs for 2002–03 is £1,067 million. The actual outturn will be published in the audited resource accounts for the Home Office.

Young Offender Institutions

Mr. Oaten: To ask the Secretary of State for the Home Department how many times control and restraint have been used on children in *(a)* Stoke Heath, *(b)* Huntercombe and *(b)* Castington Young Offender Institutions in each of the last 12 months. [144355]

Paul Goggins: Information on the use of control and restraint was not recorded centrally until the beginning of last year. The data for the period 1 January 2003 to 31 November 2003, in Stoke Heath, Huntercombe and Castington Young Offender Institutions is set out in the table.

	Stoke Heath	*Huntercombe*	*Castington*
January	16	28	24
February	11	32	7
March	4	33	18
April	14	26	15
May	7	12	22
June	9	18	27
July	11	26	32
August	8	31	18
September	9	38	34
October	7	23	17
November	4	27	14

Mr. Oaten: To ask the Secretary of State for the Home Department how many children were held on the basic level of incentives and earned privileges scheme in *(a)* Stoke Heath, *(b)* Huntercombe and *(b)* Castington Young Offender Institutions in September. [144356]

Paul Goggins: Data on the number of children held at each level under the rewards and sanctions scheme (formerly known as incentives and earned privileges scheme), including those on basic, for September 2003, is set out in the table.

Establishment	*Basic*	*Standard*	*Enhanced*
Stoke Heath	12	133	27
Huntercombe	13	210	95
Castington	13	175	41

Cleveland Coroner

Vera Baird: To ask the Secretary of State for the Home Department how many inquests were outstanding in the jurisdiction of the Cleveland Coroner in *(a)* July, *(b)* August, *(c)* September and *(d)* October 2003. [147649]

Paul Goggins *[holding answer 13 January 2003]:* The number of inquests in the jurisdiction of the Cleveland coroner which were outstanding at the end of July, August, September and October 2003 respectively is shown in the table.

	Inquests outstanding at date
31 July 2003	273
31 August 2003	268
30 September 2003	261
31 October 2003	245
30 November 2003	238

Vera Baird: To ask the Secretary of State for the Home Department how many inquests in the jurisdiction of the Cleveland Coroner were heard in *(a)* August, *(b)* September and *(c)* October 2003 by the (i) coroner, (ii) deputy coroner and (iii) assistant deputy coroner. [147650]

Paul Goggins: The number of inquests heard by the Cleveland coroner and his deputies in the months of August, September, October and November 2003 respectively is shown in the table.

	Inquests heard by:		
	Coroner	Deputy coroner	Assistant Deputy Coroner
August 2003	20	2	3
September 2003	23	1	6
October 2003	22	7	6
November 2003	19	11	3

The figures include all inquests concluded in the relevant months (i.e. a verdict was delivered, or the coroner (or deputies) declared that the inquest was not to be resumed after a Secton 16 adjournment).

Community Justice Centre

Mr. Oaten: To ask the Secretary of State for the Home Department what his timetable is for the establishment of the pilot community justice centre announced on 10th September. [143407]

Paul Goggins: The Home Office, Department for Constitutional Affairs and Crown Prosecution Service are working together to develop the first pilot Community Justice Centre in the United Kingdom, which is to be located in Liverpool. Our current timetable is for the Centre to be operational by the end of 2004. This will be conditional on a number of factors, including the identification of an appropriate site to accommodate the Centre and ensure it is fit for purpose. We also want to develop the Centre with the full engagement of the local community. From early 2004 a local community needs assessment will be undertaken which will feed into the design of the Centre and into community sentence planning and community work. From April 2004 these community projects which will be run in conjunction with the Centre.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department where in Liverpool the pilot community justice centre will be located. [146311]

Paul Goggins: The Home Office, Department for Constitutional Affairs and Crown Prosecution Service are working together to develop the first pilot Community Justice Centre in the United Kingdom, which is to be located in Liverpool. The area of the city that the Community Justice Centre will be located is in the Liverpool north. This part of the city has experienced the problems that the Justice Centre will aim to tackle, such as anti-social behaviour and low-level criminal activity, but maintains a strong sense of community spirit and pride that the Justice Centre can build on and enhance.

Agents, with experience of developing court buildings, are working with Liverpool City Council to locate suitable sites for the Justice Centre in this part of the city. The site will accommodate a building housing a multi-jurisdictional court room as well as criminal justice and other agencies to provide on-site services for offenders, victims and the wider community. The exact location of the Liverpool Community Justice Centre is due to be announced later this year to ensure that the Justice Centre can commence operations at the end of 2004.

Corporate Manslaughter

Mr. Dismore: To ask the Secretary of State for the Home Department when he expects to publish *(a)* the draft Corporate Manslaughter Bill and *(b)* the legislative timetable for the Bill; and if he will make a statement. [140793]

Paul Goggins *[holding answer 1 December 2003]*: The Government are committed to reforming the law on corporate manslaughter. We intend to publish our proposals for legislation in the near future, followed by a draft Bill in the spring.

Correspondence

Mr. Kaufman: To ask the Secretary of State for the Home Department (1) when he will reply to the letter to him dated 23 November 2003 from the right hon. Member for Manchester, Gorton with regard to E. Elbasani; [147611]

(2) when he intends to reply to the letter to him dated 13 November 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. E. Elbasani. [149549]

Mr. Blunkett: I wrote to my right hon. Friend on 23 January 2004.

Crime Reduction Initiatives

Dr. Kumar: To ask the Secretary of State for the Home Department what action is being taken to reduce and tackle persistent offending through targeting *(a)* prolific offenders and *(b)* improving security; where such schemes and projects are being trialled; and how and when such initiatives will be introduced in Middlesbrough South and Cleveland, East. [144756]

Paul Goggins: The national Persistent Offender Scheme was launched in April 2003. It is a component of Local Criminal Justice Boards' action plans to increase the number of offences brought to justice, aimed at targeting a small group of prolific offenders who are responsible for a disproportionate amount of crime. Areas have devised their own 'premium service' protocols which include elements of proactive policing, improved investigation and case management, priority court listings, and strategies for rehabilitation.

The National Probation Service is piloting 15 Intensive Supervision and Monitoring Schemes (ISMSs) for persistent offenders in local probation/police areas. All Schemes involve joint working between probation and police. In addition, some Schemes are testing mechanisms for involving the prison service in pre-release work with persistent offenders. ISMSs target the most prolific offenders in a locality, based on police intelligence. They provide intensive surveillance and supervision of offenders, offering fast access to services and support for rehabilitation, alongside swift action and penalties for non-compliance. They involve other partner agencies such as providers of housing, education and training, alcohol and drug abuse treatment groups and employment services.

In addition, the Government has given the courts new secure remand and tagging powers for 12- to 16-year olds who repeatedly offend on bail, funded the Youth Justice Board'sIntensive Supervision and Surveillance

Programmes for the most prolific young offenders and renewed its commitment to maintain the time from arrest to sentence for persistent young offenders at or below 71 days.

The following local schemes cover the Middlesbrough South and East Cleveland constituency:

Intensive Supervision and Monitoring Scheme for adult offenders (Police/Probation).

Intensive Supervision and Surveillance Programmes for young offenders (Youth Offending Teams).

Both schemes operate throughout Middlesbrough, Redcar and Cleveland.

Criminal Justice Intervention Programme (CJIP)—there is an existing scheme operating in Middlesbrough, and Redcar and Cleveland will benefit from the CJIP funding being made available to all parts of the country.

Criminal Injuries Compensation

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what plans he has to formulate a definition of a crime of violence in relation to the Criminal Injuries Compensation Scheme. [146281]

Paul Goggins: None. The Scheme has functioned effectively since its inception in 1964 without the need to define what is meant by such terms as 'criminal injury' or 'crime of violence'. Any detailed definition runs the risk of being too prescriptive and excluding borderline cases where discretion might reasonably be exercised. There would also be the risk of failing to include sufficient scope to accommodate changes in the nature of crime, such as deliberately infecting someone with Aids, or stalking. We consider that in its present form the Scheme strikes an appropriate balance between breath of scope and necessary clarification.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what steps the Government is taking to ensure the Criminal Injuries Compensation Scheme does not deem physical violence to be an essential component of a sexual offence. [146282]

Paul Goggins: The Criminal Injuries Compensation Scheme already recognises that physical violence is not an essential component of sexual offences by making provision (at paragraph 9 of the 2001 Scheme) for compensation to be paid where such offences have caused mental injury alone.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how the Criminal Injuries Compensation Scheme deals with the role of grooming as a tactic of abusers. [146283]

Paul Goggins: In considering applications for compensation submitted in respect of alleged abuse of children, claims officers of the Criminal Injuries Compensation Authority take account of any available evidence of grooming and/or abuse of power when they decide whether an applicant was able to give and actually gave informed consent to what took place.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what research has been conducted on the suitability of trusts as a means for victims to retain their eligibility for benefits after a compensation pay-out; and if he will make a statement. [146285]

Paul Goggins: The Home Office has conducted no such research, nor is any planned.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department whether he will accept the recommendations of Victim Support in their report Insult to Injury. [146286]

Paul Goggins: We have issued a consultation paper inviting views on ways in which the Criminal Injuries Compensation Scheme might be changed to release resources for wider victims' programmes. Victim Support has been consulted about the developing proposals. We will consider their report's recommendations, and any further comments they wish to offer.

Criminal Justice Interventions Programme

Stephen Hesford: To ask the Secretary of State for the Home Department if he will make a statement on the role of the Criminal Justice Interventions Programme in addressing drug-misusing offenders. [148428]

Caroline Flint: The Criminal Justice Interventions Programme (CJIP) is a programme of measures designed to help drug misusing offenders reduce their offending behaviour by accessing drug treatment. The programme includes enhanced arrest referral, drug testing on charge and a range of initiatives to improve treatment needs of offenders while serving their sentence. CJIP also encourages the positive reintegration into society of drug misusers after they have left the judicial system.

CJIP rolled out on April 2003 and will expand its coverage from April 2004.

Criminal Justice System

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what research is planned on disabled children and young people's *(a)* access to and *(b)* experience of the criminal justice system. [146291]

Paul Goggins: There is no specific research planned on disabled children's and young people's access to the criminal justice system. However work is under way with the Department for Education and Skills (DfES) to ensure that the criminal justice system is adequately covered in the Citizenship section of the National Curriculum. As part of this we will ensure that disabled children have the same opportunities to learn about and experience the criminal justice system as other children.

Andrew Rosindell: To ask the Secretary of State for the Home Department what plans he has to improve the efficiency of the criminal justice system. [146670]

Paul Goggins: The Home Office, Department for Constitutional Affairs and the Crown Prosecution Service share a Criminal Justice System tri-lateral Public Service Agreement target to increase value for money from the Criminal Justice System by 3 per cent. a year. The technical note for how this target will be achieved was published and announced in the House in July 2003.

Criminal Offences

Mr. Oaten: To ask the Secretary of State for the Home Department if he will list, broken down by Act, the criminal offences created in legislation sponsored by his Department in session 2002–03. [143273]

Paul Goggins: The following offences have been created, modified or re-enacted by the Sexual Offences Act 2003:

section 1: Rape

section 2: Assault by penetration

section 3: Sexual assault

section 4: Causing a person to engage in sexual activity without consent

section 5: Rape of a child under 13

section 6: Assault of a child under 13 by penetration

section 7: Sexual assault of a child under 13

section 8: Causing or inciting a child under 13 to engage in sexual activity

section 9: Sexual activity with a child

section 10: Causing or inciting a child to engage in sexual activity

section 11: Engaging in sexual activity in the presence of a child

section 12: Causing a child to watch a sexual act

section 13: Child sex offences committed by children or young persons

section 14: Arranging or facilitation commission of a child sex offence

section 15: Meeting a child following sexual grooming etc

section 16: Abuse of position of trust: sexual activity with a child

section 17: Abuse of position of trust: causing or inciting a child to engage in sexual activity

section 18: Abuse of position of trust: sexual activity in the presence of a child

section 19: Abuse of position of trust: causing a child to watch a sexual act

section 25: Sexual activity with a child family member

section 26: Inciting a child family member to engage in sexual activity

section 30: Sexual activity with a person with a mental disorder impeding choice

section 31: Causing or inciting a person with a mental disorder impeding choice to engage in sexual activity

section 32: Engaging in sexual activity in the presence of a person with a mental disorder impeding choice

section 33: Causing a person, with a mental disorder impeding choice, to watch a sexual act

section 34: Inducement, threat or deception to procure sexual activity with a person with a mental disorder

section 35: Causing a person with a mental disorder to engage in or agree to engage in sexual activity by inducement, threat or deception

section 36: Engaging in sexual activity in the presence, procured by inducement, threat or deception, of a person with a mental disorder

section 37: Causing a person with a mental disorder to watch a sexual act by inducement, threat or deception

section 38: Care workers: sexual activity with a person with a mental disorder

section 39: Care workers: causing or inciting sexual activity

section 40: Care workers: sexual activity in the presence of a person with a mental disorder

section 41: Care workers: causing a person with a mental disorder to watch a sexual act

section 45: Indecent photographs of persons aged 16 or 17

section 46: Criminal proceedings, investigations, etc

section 47: Paying for sexual services of a child

section 48: Causing or inciting child prostitution or pornography

section 49: Controlling a child prostitute or a child involved in pornography

section 50: Arranging or facilitating child prostitution or pornography

section 52: Causing or inciting prostitution for gain

section 53: Controlling prostitution for gain

section 55: Penalties for keeping a brothel used for prostitution

section 56: Extension of gender-specific prostitution offences

section 57: Trafficking into the UK for sexual exploitation

section 58: Trafficking within the UK for sexual exploitation

section 59: Trafficking out of the UK for sexual exploitation

section 61: Administering a substance with intent

section 62: Committing an offence with intent to commit a sexual offence

section 63: Trespass with intent to commit a sexual offence

section 64: Sex with an adult relative: penetration

section 65: Sex with an adult relative: consenting to penetration

section 66: Exposure

section 67: Voyeurism

section 69: Intercourse with an animal

section 70: Sexual penetration of a corpse

section 71: Sexual activity in a public lavatory

section 72: Offences outside the United Kingdom—extension of jurisdiction

section 91: Offences relating to notification (breach of the notification requirements)

section 113: Breach of sexual offences prevention order or interim sexual offences prevention order

section 122: Breach of foreign travel order

section 128: Breach of risk of sexual harm order or interim risk of sexual harm order.

Under section 81 of the Crime (International Co-operation) Act 2003 it is now an offence to obstruct a person carrying out an inspection of the Schengen Information System, the Europol Information System or the Customs Information System. Section 88 of the Act extends the scope of section 5 of the Forgery and Counterfeiting Act 1981 so it will also apply to the forgery of bankers drafts, promissory notes and debit cards.

The Anti Social Behaviour Act 2003 creates a number of new offences. Under section 4 of the Act (closure of premises where drugs are used unlawfully) a person commits an offence if he remains on or enters premises in contravention of a closure notice. A person also commits an offence if:

(a) He obstructs a constable or authorised person acting under section 1(6) (service of a closure notice) or section 3(2) (entering the premises or doing anything reasonably necessary to secure the premises against entry).

(b) He remains on premises in respect of which a closure order has been made.

(c) He enters the premises.

Under section 32 (Dispersal of groups) a person who knowingly contravenes a direction given to him under section 30(4) (to disperse, to leave the relevant locality or prohibiting a return to the relevant locality) commits an offence.

Under section 37 it is an offence to carry an air weapon (whether loaded or not) or an imitation firearm in a public place without lawful authority or reasonable excuse.

Under section 38 it is an offence for a person under the age of 17 to have with him an air weapon or ammunition for an air weapon.

Under section 38 it is an offence for a 14 to 16-year-old to fire an air weapon beyond the boundary of private land under the circumstances where he has the permission of the occupier to shoot unsupervised.

Under section 39 it is an offence for a person to possess, purchase or acquire, or manufacture, sell or transfer any air rifle, air gun or air pistol which uses, or is designed or adapted for use with, a self-contained gas cartridge system. If at the time that this provision comes into force, a person has such an air rifle, air gun or air pistol in his possession, he will not be prevented from continued possession, but it will be an offence for him to continue possession without a licence.

Under section 40 a person commits an offence if without reasonable excuse he permits premises to be open in contravention of a closure order issued because a public nuisance is being caused by noise coming from the premises.

Under section 54 a person commits an offence if he sells an aerosol paint container to a person under the age of 16.

Under section 58 a person commits an offence if he knows that a direction under section 63(2) of the Criminal Justice and Public Order Act 1994 has been given which applies to him and he makes preparations for or attends a rave within 24 hours of the direction being given.

Under section 61 a person commits an offence if he knows that a direction under section 62A of the Criminal Justice and Public Order Act 1994 has been given which applies to him and he fails to leave the land as soon as reasonably practicable, or if, within three months of the direction being given, he enters any land in the area of the relevant local authority as a trespasser with the intention of residing there.

Under section 75 a person commits an offence if he fails to comply with a remedial notice to take action in relation to a high hedge.

Under section 77 a person commits an offence if he intentionally obstructs a person exercising the powers to enter the neighbouring land in order to carry out their functions under the Act.

As a result of legislation introduced by private members, the following offences were enacted in the Female Genital Mutilation Act 2003:

section 1: Offence of female genital mutilation

section 2: Offence of assisting a girl to mutilate her own genitalia

section 3: Offence of assisting a non-UK person to mutilate overseas a girl's genitalia

section 4: Extension of sections 1–3 to extra-territorial acts.

Sections 1 and 2 of the 2003 Act re-enact existing offences under the Prohibition of Female Circumcision Act 1985. Sections 3 and 4 introduce new offences.

Crown Prosecution Service

Mr. Drew: To ask the Secretary of State for the Home Department what plans he has to allow the Crown Prosecution Service to have early access to police files to assist case preparation. [144016]

Paul Goggins: Following successful pilots of the Auld recommendation to increase the role of crown prosecutors in charging decisions, measures to put this on a statutory footing have been enacted in the Criminal Justice Act 2003. The relevant provisions will be brought into effect in April 2004, and the new arrangements will then be implemented on an area-by-area basis.

In preparation for that implementation, Crown Prosecution Service areas and their police partners are establishing shadow charging arrangements in each area. This will provide an infrastructure of duty prosecutors working in police operational units to provide on-the-spot advice to investigators, to be available for early consultation in investigations, and to make charging decisions in a wide range of cases.

Early guidance will focus on the lines of enquiry to be pursued in individual cases, the likely charges to be preferred and the evidential requirements to support these. Guidance will also be given on the case preparation requirements in each individual case.

Charging decisions will be made by crown prosecutors following a review of all the available evidence in each case. Where the evidence presented by an officer is insufficient for the charging decision to be made at that time, further guidance will be given on continuing case preparation and evidential requirements.

Curfew Orders

Mr. Oaten: To ask the Secretary of State for the Home Department what the average length was of *(a)* an electronically monitored curfew order and *(b)* a home detention curfew in financial year 2002–03. [143411]

Paul Goggins: In the financial year 2002–03 the average length of an electronically monitored curfew order was 95 days, and the average length of a home detention curfew was 52 days.

Departmental Leaflets

Mr. Lazarowicz: To ask the Secretary of State for the Home Department what criteria his Department uses when deciding whether a leaflet which it publishes is to be made available only on its website. [149559]

Fiona Mactaggart: The decision process to make information available only on the Home Office website is as follows:

The target audience for every publication is ascertained at the initial planning stage of each project.

If, after investigation, it is the case that the most cost-effective and efficient method of disseminating the information is by way of the website then that method would be employed. The approved information will also be sent for Legal Deposit in compliance with the Legal Deposit Act 2003 extension covering non-printed materials.

Informability aspects are also considered at this initial stage, therefore the document may appear in additional formats such as the Welsh or ethnic minority languages or in formats for people with disabilities.

Departmental Press Releases

Mr. Laws: To ask the Secretary of State for the Home Department how many press releases were issued by his Department in 2003. [148508]

Fiona Mactaggart *[holding answer 19 January 2004]*: The number of press releases issued by the Home Office in 2003 was as follows:

	Number of press releases
Home Office	374
Prison Service	43
Criminal Justice Service	13
Prisons Inspectorate	68
Probation Inspectorate	11
Police Inspectorate	3
Advisory Council on Misuse of Drugs	1
Animal Procedures Committee	2
Assets Recovery Agency	1
Compact Working Group	1
UK Passport Service	3
Total	520

Detention and Training Orders

Miss McIntosh: To ask the Secretary of State for the Home Department what assessment he has made of the early release scheme for detention and training orders issued since 2001. [145648]

Paul Goggins: The Youth Justice Board (YJB) commissioned an internal study from PA Consulting on the factors inhibiting or assisting the take up of early release.

PA's report, in September 2003, found that establishments generally saw early release as a useful incentive to influence the behaviour of trainees serving terms of eight months or more. Where early release was not granted, the main reasons were decisions by review meetings that trainees were unsuitable; lack of appropriate accommodation for them to go to; and young people's refusal of early release. PA recommended monitoring the reasons for decisions not to agree early release; investigating ways of improving the availability of suitable accommodation; and developing a system to record centrally the outcomes of early release decisions. The YJB are pursuing these recommendations.

Discharged Cases

Mr. Oaten: To ask the Secretary of State for the Home Department how many defendants in *(a)* 2003 and *(b)* each of the last four years have been discharged due to delays in gathering evidence, pressure of work and errors on the part of the (i) police and (ii) Crown Prosecution Service; and if he will make a statement. [143964]

Paul Goggins: The Home Office does not keep any data on the reasons for discharges and the Crown Prosecution Service holds no central records of reasons for the outcome of proceedings. The Crown Prosecution keeps data on the number of unsuccessful outcomes (finalisations other than a conviction) for magistrates and crown courts, and the stage at which the outcome was unsuccessful.

The proportion of total magistrates court outcomes that were unsuccessful as a result of being-discontinued or bound over; write off; discharged committals; dismissal no case; or dismissals after trial was 22.0 per cent. for 2003 (to September). The corresponding figure was 23.4 per cent. in 2002, 23.5 per cent. in 2001, 23.5 per cent. in 2000, and 23.1 per cent. in 1999.

The implementation of the compass case management system will enable a full record of the reason for all unsuccessful outcomes in magistrates courts and in the crown court to be provided.

Drug or Alcohol Treatment

Mr. Hancock: To ask the Secretary of State for the Home Department what the average time was between the referral by courts of individuals with criminal convictions for drug or alcohol treatment and the commencement of their treatment programmes in each of the last five years. [146539]

Paul Goggins: Information relating to the national average waiting time to access drug or alcohol treatment by offenders in the community in each of the last five years is not available. However, since October 2000 drug treatment can only be imposed by the courts as a provision of a drug treatment and testing order (DTTO). The DTTO National Standard requires that appointments are arranged to take place with the Probation Service within one working day and with the treatment provider within two working days of the order being made and this is being achieved in over 75 per cent. of cases. From 2004–05 areas have been set a target to increase this performance to 90 per cent.

Forensic Medical Examiner Training

Vera Baird: To ask the Secretary of State for the Home Department when the toxicology awareness module for forensic medical examiner training will be in use; and when details of it will be available. [146768]

Paul Goggins: Training on collecting evidence for toxicology is already in place for Forensic Medical Examiners (FMEs). It is incorporated in the Association of Forensic Physicians (AFP) introductory and development training courses. More specialised teaching also occurs at regional training courses and at conferences. The courses include training on toxicology issues relating to complainants of sexual assault and drug facilitated sexual assault.

Gun Crime

Ms Abbott: To ask the Secretary of State for the Home Department what meetings his Department has had with community organisations working to combat gun crime. [149785]

Caroline Flint: We have held three round-table meetings on gun crime, the most recent on 25 November 2003. These have included representatives from community groups and organisations. The meetings have provided opportunities to take stock of existing action to tackle gun crime and gun culture and have helped to inform our forward approach.

In addition, the Home Office hosted a major gun crime/community involvement event in Birmingham on 19 and 20 January this year. The event brought together individuals from communities, local groups, voluntary organisations, young people, the police and policy makers to explore the nature of gun crime and gun culture and to help identify what more can be done to tackle these issues.

Home Detention Curfew

Mrs. Gillan: To ask the Secretary of State for the Home Department which offences are assessed as being unsuitable for release on home detention curfew. [149088]

Paul Goggins: Prisoners currently serving sentences for the following offences are statutorily excluded from release under the Home Detention Curfew scheme:

Violent and sex offenders serving an extended sentence

Prisoners serving a sentence for an offence under section 1 of the Prisoners (Return to Custody) Act 1995 (for failure to return to custody following a period of temporary release)

Prisoners serving a sentence imposed under paragraph 3(1)(d) or 4(1)(d) of Schedule 2 to the Criminal Justice Act 1991 in a case where the prisoner had failed to comply with a requirement of a curfew order

Fine defaulters and contemnors, whether civil or criminal.

Prisoners who are liable to the registration requirements of the Sex Offenders Act 1997 are also excluded from the scheme.

In addition, with effect from 14 July 2003, prisoners serving sentences for the following categories of offences are presumed unsuitable for release under the Home Detention Curfew scheme unless there are exceptional reasons to grant release:

Homicide

Causing explosions, placing explosives, possessing explosives

Possession of offensive weapons

Possession of firearms with intent

Cruelty to children

Racially aggravated offences

The presumption against suitability also applies to prisoners with any history of sexual offending.

Mrs. Gillan: To ask the Secretary of State for the Home Department what evaluation he has made of the effectiveness of the Home Detention Curfew Scheme. [149089]

Paul Goggins: The operation of the Home Detention Curfew (HDC) scheme is monitored on a weekly basis. Between January 1999, when the scheme was introduced, and 9 January 2004, over 86,000 prisoners have been released under the Home Detention Curfew scheme. At any one time about 3,600 low risk prisoners, who would otherwise be filling prison places, are serving the last part of the custodial portion of their sentence on HDC. Since the scheme began 90 per cent. of those granted HDC have completed their curfew period without any problems at all and 2 per cent. are reported as having been convicted, cautioned or are awaiting prosecution for an offence committed while subject to HDC.

In addition, the Home Office published an evaluation of the operation of the first 16 months of the scheme in June 2001 (Home Office Research Study 222: "Electronic Monitoring of released prisoners: an evaluation of the Home Detention Curfew scheme").

I am satisfied that the scheme continues successfully to provide suitable prisoners with a smoother and more effective re-integration back into the community by enabling them to be released from prison early while still subject to restrictions placed on their liberty.

Mrs. Gillan: To ask the Secretary of State for the Home Department what assessment he has made of the confidence of the public in the Home Detention Curfew Scheme. [149090]

Paul Goggins: The Home Office has not carried out a survey specifically addressing public attitudes to the Home Detention Curfew (HDC) scheme but the scheme has been running successfully for over four years and public confidence in the Prison Service over this period has remained good. Ministers regularly receive correspondence about the scheme. Most of this concerns individual cases; only a small proportion expresses any concerns about the principles that underpin HDC.

Human Trafficking

Mrs. Lawrence: To ask the Secretary of State for the Home Department what support his Department offers to *(a)* women and *(b)* children who have been victims of human trafficking; and what funding has been allocated to this work. [144610]

Paul Goggins: The White Paper "Secure Borders, Safe Haven"—published in February 2002—sets out our general proposals for assisting the victims of trafficking.On March 10, we launched a pilot scheme offering protection and support to adult female victims of trafficking for purpose of sexual exploitation. The victims who are willing to come forward to the authorities, and help law enforcement against organised criminals, are offered protection—through safe accommodation, and a range of support services such as counselling and health checks, managed by a voluntary sector organisation.

We will also consider, in the light of individual circumstances, whether it would be appropriate to allow such victims who have co-operated to remain here. Where they are to return home, we will assist them to do so, providing them with initial counselling, ensuring that they have suitable accommodation to return to, and providing help to enable them to re-integrate into their own community and find employment.

Under the provisions of the Children Act 1989, minors are the responsibility of local authority social services departments. It is not possible for minors to be admitted to the pilot scheme.

The funding allocation over three years (2002–05) is £1.3 million.

Identity Cards

Mr. Sheerman: To ask the Secretary of State for the Home Department what assessment he has made of the potential costs and benefits of identity cards in reducing automated fraud within Government departments; if he will make a statement on current levels of effectiveness in dealing with automated fraud within Government departments; and how his Department plans to ensure personal privacy once identity cards are introduced. [147447]

Beverley Hughes: The Cabinet Office Study on Identity Fraud (published in 2002) estimated the cost of identity fraud in a number of Government departments. According to the Study the main departments affected by identity fraud are Department of Health, Customs and Excise, Department for Work and Pensions and the Home Office—the amount lost in 2000–01 was estimated to be £681 million.

The incorporation of biometric information into identity documents, which was announced by my right hon. Friend the Home Secretary in his statement on a national identity cards scheme, will provide a unique link between the identity document and the person to whom it is issued. This will allow Government departments who provide a public service to identify uniquely whom they are dealing with and therefore help to prevent losses caused by identity fraud.

Identity cards will also allow Government departments to prevent unauthorised access to services, an example would be claims to free non-emergency NHS treatment by people whose immigration status does not entitle them to this treatment.

The Home Office has recently established a cross public-private sector work programme to tackle identity theft and identity fraud. This programme is specifically examining:

- policy development (eg identify opportunities for combating identity fraud through data sharing or creating new criminal offences)
- developing and sharing good practice (eg improving the procedures for checking and issuing official documents such as passports and driving licences)
- scoping studies and potential pilots to identify new systems to counter identity fraud

In addition to this work, the Passport Service is piloting a system to conduct more background checks on passport applications. DVLA is working with the Passport Service and other Government Departments to raise the quality of its identity checks using good practice already identified elsewhere.

We have also looked at legislative changes to make identity theft or fraud easier to prosecute or to ensure that the penalties associated with fraudulent use of documents reflect their use in creating false, or stealing genuine, identities. The Criminal Justice Act 2003 changed the law to align the penalty associated with fraudulently obtaining a driving licence with that for fraudulently obtaining a passport and to make these offences arrestable. This will ensure consistency of approach during prosecution so that fraudulently obtaining either document will incur a maximum penalty of two years imprisonment, serving as a more effective deterrent and ensuring that neither document is considered a weak link in establishing a false identity.

We have also announced our intention to create a new offence relating to being in possession or control of false identity documents, without reasonable cause. This offence will provide the police with the means to disrupt the activities of organised criminals and terrorists at an earlier stage of their activities.

The Home Office and its Agencies take every reasonable action to identify fraudsters and pass on their details to the police for appropriate action.

We are satisfied that an identity cards scheme that complies with the Data Protection and Human Rights Act can be developed and implemented, just like other similar schemes operating currently in European countries.

"Identity Cards—The Next Steps" (Cm 6020), published in November 2003, by my right hon. Friend the Home Secretary explained that the National Identity Register would only contain basic identity information such as name, address, date of birth, gender, immigration status and a confirmed biometric—and that this will be set out in statute. Organisations using the National Register to verify identity will not be able to get other personal information, for instance health or tax records, via the Register.

The police and other organisations will not have routine access to data stored on the National Register. However, there are strong arguments for giving them access to help fight serious crime and terrorism. Such access will be set out in statute and there will be independent oversight of the arrangements as there is at the present time. There will be no new power for the police to stop someone and demand to see their card.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department when the compulsory phase for the holding of an identity card will commence. [149206]

Beverley Hughes: In his announcement on 11 November 2003, my right hon. Friend the Home Secretary stated that the Government have decided to build a base for a compulsory identity cards scheme. We intend to proceed by incremental stages. When the conditions are right, the first stage phased roll-out will be followed by a move to a compulsory card scheme in which it would be compulsory to have a card, though not to carry it.

A final decision on a move to compulsion will require a full debate and a vote in both Houses of Parliament.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what discussions his Department has had with representatives from other countries on the *(a)* benefits and *(b)* best practice in the introduction of identity cards; and what the outcome of those meetings was. [149207]

Beverley Hughes: Identity card schemes have existed in all EU countries for many years, with the exception of Denmark and Ireland.

Home Office officials have had detailed discussions with colleagues involved in the operation of identity card schemes in Italy, Sweden and the Netherlands and lessons learned have informed the development of policy where appropriate.

In addition, comprehensive information has been supplied by each of the EU member states on the operation of their card schemes, including its introduction and the benefits associated with the card scheme. The results of this work comprise Annex 3 of "Entitlement Cards and Identity Fraud: A Consultation" (CM 5557) published in July 2002, and have since been updated.

Home Office officials will continue to work closely with colleagues in EU member states.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what estimate he has made of the cost per card of introducing identity cards; and what percentage of this each card-holding citizen will be expected to pay. [149208]

Beverley Hughes: In his announcement on 11 November 2003, my right hon. Friend the Home Secretary stated that the Government have decided to begin the process of introducing a national identity cards scheme.

Set up costs for the first three years have been estimated at £186 million. Costs thereafter will be covered by charges. It would not be appropriate to publish more detailed information than that set out in the Identity Cards—The Next Steps publication while we prepare options for procurement and implementation of the identity cards scheme. However, we are continuing to work with potential suppliers and partners to ensure estimates are accurate, realistic and deliverable.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department whether *(a)* private and *(b)* public companies will collect the biometric information necessar for the proposed identity card scheme. [149209]

Beverley Hughes: In his announcement on 11 November 2003, my right hon. Friend the Home Secretary stated that the Government have decided to begin the process of introducing a national identity cards scheme.

The first stage of the process will include close work across Government to develop effective technology, particularly on biometrics, and to introduce systems to ensure that biometric data can be collected, stored and used effectively. This includes a biometric pilot which is being run by the United Kingdom Passport Service to test the recording of face, iris and fingerprint biometric information.

It is too soon to make any decisions on the types of organisation which may collect biometric information.

Sarah Teather: To ask the Secretary of State for the Home Department (1) what assessment he has made of the implications of the introduction of identity cards for the common travel area between the UK and Ireland; [149931]

(2) when he next plans to meet Irish government officials to discuss the introduction of identity cards in the UK; [149932]

(3) what negotiations he has had with the Irish Government concerning the introduction of identity cards in the United Kingdom. [149933]

Beverley Hughes: There have been discussions with the Irish Government at both Ministerial and official level about those aspects of the introduction of identity cards which are of particular relevance of them, including the Common Travel Area. The Common Travel Area cover the Channel Islands and the Isle of Man as well as Ireland, and the UK and its operation affects everyone travelling within it, whatever their nationality. Routine immigration checks are not carried out on people travelling within the area. The Government's proposals for identity cards do not compromise the principle of the Common Travel Area. Discussions will continue with the Irish Government on those issues.

Identity Theft

Brian White: To ask the Secretary of State for the Home Department what steps he is taking to counter identity theft. [148596]

Beverley Hughes: Following the conclusion of the consultation on Entitlement Cards and Identity Fraud in July 2003, the Home Office is taking work forward on the introduction of identity cards, including examining the role identity cards could have in countering identity theft and fraud.

In addition to this work, the Passport Service is piloting a system to conduct more background checks on passport applications. DVLA is working with the Passport Service and other Government Departments to raise the quality of its identity checks using good practice already identified elsewhere.

We have also looked at legislative changes to make identity theft or fraud easier to prosecute or to ensure that the penalties associated with fraudulent use of documents take account of their use in creating false, or stealing genuine, identities. The Criminal Justice Act 2003 changed the law to align the penalty associated with fraudulently obtaining a driving licence with that for fraudulently obtaining a passport and to make these offences arrestable. This will ensure consistency of approach during prosecution so that fraudulently obtaining either document will incur a maximum penalty of two years imprisonment, serving as a more effective deterrent and ensuring that neither document is considered a weak link.

We also announced in 2003 our intention to create a new offence relating to being in possession or control of false identity documents, without reasonable cause. This offence will provide the police with the means to disrupt the activities of organised criminals and terrorists at an earlier stage of their activities.

The Home Office has recently established a cross public-private sector work programme to tackle identity theft and identity fraud. This programme is specifically examining:

policy development (e.g. identify opportunities for combating ID fraud through data sharing or creating new criminal offences);

developing and sharing good practice (e.g. improving the procedures for checking and issuing official documents such as passports and driving licences); and

scoping studies and potential pilots to identify new systems to counter ID fraud.

Brian White: To ask the Secretary of State for the Home Department what guidance he has issued to the public on the protection of their personal details. [148599]

Beverley Hughes: It is not currently a criminal offence for a person simply to use another identity. However, false identities are often used to facilitate other offences such as deception and money laundering. Crimes such as theft and robberies are carried out sometimes to obtain personal documents, which are subsequently used to create false identities.

The general guidance we have issued on being safe, secure and how to avoid being a victim of crime, will help prevent personal documents from being stolen and misused. This includes caution on sending financial details in emails and ordering goods over the internet and being mindful of carrying valuables on the person.

Police forces offer advice to the public on how to avoid being a victim of identity theft as part of their crime prevention activity.

Passports and driving licences are the two main official documents that are used currently to help prove identity. The UK Passport Service has produced guidance on keeping passports safe and what to do if they are lost or stolen. It highlights that

"If your passport is lost or stolen you should be aware that, in addition to the inconvenience of acquiring a replacement, the document (passport) and your identity are open to misuse".

The booklet also explains how to keep your passport secure when abroad.

DVLA is considering the advice that it currently provides and is looking into what guidance it can offer to drivers on looking after their licences, including the fact that their identity could be open to misuse if their licence is lost or stolen.

We have encouraged financial organisations and utilities to provide regular guidance to their customers on how to safely dispose of statements and bills, which are often used to help prove identity. We hope that private sector organisations will play their part in raising public awareness on how to handle and safely dispose of these and other types of personal documents.

International Criminal Conduct

Mr. Dalyell: To ask the Secretary of State for the Home Department what powers the Secretary of State has to intervene in matters of international criminal conduct, in relation to imprisonment in the UK of those found guilty of crimes. [147122]

Paul Goggins *[holding answer 13 January 1003]:* The investigation and prosecution of those suspected of criminal conduct are matters for the competent police and judicial authorities and the Secretary of State cannot intervene in the decisions taken. As a general rule, the courts here can only deal with crimes committed in this country. There are some exceptions to the general territorial rule including murder, terrorism, sexual offences against a child and torture. Decisions on whether to seek a person's extradition for the purposes of prosecution are also a matter for the competent authorities.

Under the terms of the Repatriation of Prisoners Act 1984, and international agreements to which the United Kingdom is a party, the Secretary of State can request the repatriation to the United Kingdom of British nationals imprisoned overseas and authorise the repatriation of foreign nationals imprisoned here. Under the International Criminal Court Act 2001, the United Kingdom can also reach agreement with the Court so that persons convicted by the Court can serve their prison sentences in this country.

Juvenile Prisoners

Mr. Oaten: To ask the Secretary of State for the Home Department how many incidents of self-injury have been recorded at each of the prisons in the juvenile estate since 1 December 2001. [144357]

Paul Goggins: The information requested is provided in the table. As the establishments hold both juveniles (aged 15–17 years) and young offenders (YOs, aged 18–20 years), a breakdown of self-harm incidents by age range is also provided.

	Establishment					
	Ashfield	*Hollesley Bay*	*Huntercombe*	*Werrington*	*Wetherby*	*Total*
Juveniles						
December 2001	13	0	0	1	1	15
2002	166	4	4	1	9	184
2003[1]	159	2	38	2	14	215
Total juveniles	338	6	42	4	24	414
YOs						
December 2001	4	0	0	0	0	4
2002	48	0	2	0	0	50
2003[1]	101	0	7	0	0	108
Total YOs	153	0	9	0	0	162
Total incidents	491	6	51	4	24	576

[1] Up to 30 November 2003.

Note:
The figures provided are number of incidents, not number of individuals. Some individuals will repeatedly self-harm. In December 2002, a new form for reporting self-injury (the F213SH) was introduced across the prisons estate, which seeks to address the problem of under-reporting of self-injury.

A number of intervention strategies have been introduced into prisons, young offender and juvenile establishments for people who self-harm. These include counselling, support groups, and specialised psychological interventions.

Intercept Evidence

Mr. Oaten: To ask the Secretary of State for the Home Department what plans he has to review the admissibility of intercept evidence in criminal trials. [144579]

Paul Goggins: A review is currently under way.

Magistrates Courts

Mr. Oaten: To ask the Secretary of State for the Home Department whether the Government intends to introduce the extension of magistrates courts' sentencing powers under the Criminal Justice Act 2003 *(a)* before and *(b)* after the planned implementation of the custody plus scheme. [143295]

Paul Goggins: No final decisions have been made about the timing of implementation of these two provisions.

Merseyside Crime Initiative Unit

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many swift justice cases there have been due to the Street Crime Initiative Unit in Merseyside. [146238]

Paul Goggins: Under the Street Crime Initiative, courts are ensuring that street crime cases move through the criminal justice system without unnecessary delay and that trials are given hearing dates as early as practicable.

Merseyside aim to provide a good quality of prosecution, using the Premium Service approach. The Crown Prosecution Service are co-located and work closely with the police from an early stage of investigation to progress cases through the courts. In one case last year a defendant was charged and convicted in the Liverpool Crown court in 30 hours.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department (1) how many and what percentage of witnesses on Merseyside applied for special measures in giving evidence in the last year for which figures are available; and how many and what percentage had their request granted; [146240]

(2) what assessment has been made of witnesses' reactions to the special measures available in Merseyside to allow them to give their best evidence in court; [146241]

(3) what research has been undertaken on witnesses' views of their treatment by Merseyside Crown Prosecution Service. [146242]

Paul Goggins: In 2003 the Crown court at Liverpool received 497 applications for Special Measures. Information on the number of applications received by magistrates courts and youth courts is not held centrally. The number and percentage of successful requests in the Crown court is also not held centrally. These figures could be produced only at disproportionate cost.

Surveys of witnesses' views towards special measures were conducted before and after the first phase of implementation of the special measures. The findings of the pre-implementation survey were published in 2001 (Home Office Research Findings 147, http://www.homeoffice.gov.uk/rds/pdfs/r147.pdf). The post-implementation survey was conducted in 2003 and is currently being written-up.

The Witness Satisfaction Surveys of 2000 and 2002 measured general witness satisfaction with various agencies, including the Crown Prosecution Service (CPS). http://www.homeoffice.gov.uk/rds/pdfs/hors230.pdf, http://www.homeoffice.gov.uk/rds/pdfs/r133.pdf, http://www.homeoffice.gov.uk/rds/pdfs2/f189.pdf

Witnesses interviewed for these surveys were drawn from courts throughout England and Wales and analysis was done on that basis. Apart from the disproportionate cost of gathering the information requested, the number of interviews carried out in Merseyside would probably be too small to allow statistically meaningful analysis.

Miscarriages of Justice

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department which unit in his Department dealt with reviewing alleged miscarriages of justice before the establishment of the Criminal Cases Review Commission; how many applications the unit received in each of the last five years for which figures are available; how many cases were referred to the appropriate court of appeal; and how many sentences were *(a)* reduced and *(b)* quashed as a result of referral in each of the last 10 years for which the unit operated. [143482]

Paul Goggins: C3 was the unit responsible for reviewing alleged miscarriages of justice before the establishment of the Criminal Cases Review Commission in 1997.

Figures for the number of applications to C3 are not readily available and could be obtained only at disproportionate cost. However, it is recorded that

> "the figure for 1992 was 790 of which 634 involved a custodial sentence".

Figures relating to referrals of convictions are only readily available from 1989 onwards and referrals of sentences from 1990. The convictions referred to the Criminal Division of the Court of Appeal by the Home Secretary from 1990 to the establishment of the Criminal Cases Review Commission and their outcomes are as follows:

	Convictions referred	*Convictions upheld*	*Convictions quashed*
1989	6	0	6
1990	20	0	20
1991	12	0	12
1992	13	4	9
1993	10	4	6
1994	12	7	5

	Convictions referred	Convictions upheld	Convictions quashed
1995	17	7	[1]10
1996	12	2	10
1997[2]	3	1	2

[1] Includes one case where only two of several counts were overturned.
[2] January to March only.

In addition the Home Secretary referred sentences back to the Court of Appeal as follows:

	Sentences referred
1990	3
1991	8
1992	1
1993	0
1994	3
1995	2
1996	7
1997[1]	0

[1] January to March only.

However, the information available on their outcomes is uncertain and could be verified only at disproportionate cost.

Multi-agency Public Protection

Mr. Oaten: To ask the Secretary of State for the Home Department how many offenders are covered by the multi-agency public protection arrangements; what proportion of these are *(a)* registered sex offenders, *(b)* other sexual offenders or *(c)* violent offenders; and how many are considered to pose a high risk to the public. [143390]

Paul Goggins: The total number of offenders falling within the remit of the multi-agency public protection arrangements (MAPPA) in the reporting period 2002–03 was 52,809. 41 per cent. were registered sex offenders; 56 per cent. were violent offenders and other sexual offenders; and 3 per cent. were other offenders who fall into neither of the first two categories but who pose a risk of serious harm. In 2002–03, 2,843 MAPPA offenders were referred to a multi-agency public protection panel because they posed the highest risk of harm and/or because the management of those risks was particularly difficult.

Mr. Oaten: To ask the Secretary of State for the Home Department how many offenders have been referred to a multi-agency public protection panel in the last 12 months. [143391]

Paul Goggins: In the reporting year 2002–03, 2,843 offenders subject to the multi-agency public protection arrangements (MAPPA) were referred to a multi-agency public protection panel.

Mr. Oaten: To ask the Secretary of State for the Home Department how many offenders subject to the multi-agency public protection arrangements are under covert surveillance; and what estimate he has made of the cost per day of such surveillance. [143392]

Paul Goggins: Covert surveillance includes a range of monitoring activities which can vary greatly in scale and duration. No record of the number of surveillance operations on Multi-Agency Public Protection Arrangements (MAPPA) offenders is kept; and because of the broad range of this type of activity no generalised estimate of cost has been made.

Mr. Hancock: To ask the Secretary of State for the Home Department what assessment he has made of the performance of multi-agency public protection panels. [145271]

Paul Goggins: Two pieces of research into the multi-agency public protection arrangements (the MAPPA) are being conducted and will report next autumn. One will evaluate the effectiveness of the statutory framework of the MAPPA; the other will analyse the offenders referred to the multi-agency public protection panels and will identify good practice.

In addition, the publication of an annual report on the MAPPA by each area of England and Wales provides a regular review of this important area of work. My written statement to the House on 15 September 2003 announcing the publication of these reports, indicated that the MAPPA have made a significant contribution to improving public protection.

There is a further requirement where the court is considering making a Detention and Training Order on an offender below the age of 15: the court must additionally be satisfied that the young person is a persistent offender. (The Detention and Training Order is the standard order for offenders under 18 who are sentenced to custody).

National Offenders Management Service

John McDonnell: To ask the Secretary of State for the Home Department how many staff employed by the 42 probation areas in England and Wales will be transferred to the National Offenders Management Service Regional Structure; and what their duties will be. [147660]

Paul Goggins: In the short term probation staff will continue to be employed by their probation board. It is too early to say how many staff will be needed in the new structure.

Individual probation areas will continue to function as they are for the moment. However, as the new organisation develops, offender managers from the National Offender Management Service will assume end to end responsibility for offenders and will contract with providers of services from the public, private and voluntary sector. We have not as yet finalised our view as to the future of the 42 boards within this framework. My right hon. Friend, the Home Secretary has, therefore, specifically sought the views of key stakeholders.

Mr. Llwyd: To ask the Secretary of State for the Home Department what steps will be taken to ensure that there will not be an increase in the administrative demands on front-line staff following the creation of the National Offenders Management Service; and if he will make a statement. [148165]

Paul Goggins *[holding answer 19 January 2004]*: The Government are committed to the reduction of unnecessary bureaucracy, particularly in regard to demands on front-line staff. The National Offender

Management Service implementation team will seek to reduce the administrative demands on front-line staff wherever possible.

Mr. Llwyd: To ask the Secretary of State for the Home Department whether it is his intention that local probation areas will become an integral arm of the National Offenders Management Service and retain operational freedom; and if he will make a statement. [148166]

Paul Goggins *[holding answer 19 January 2004]:* Individual probation areas will continue to function as they are for the moment. As the new organisation develops, offender managers from the National Offender Management Service will assume end-to-end responsibility for offenders and will contract with providers of services from the public, private and voluntary sector. We have not as yet finalised our view as to the future of the 42 boards within this framework. My right hon. Friend the Home Secretary has, therefore, specifically sought the views of key stakeholders.

National Probation Service

Mr. Hancock: To ask the Secretary of State for the Home Department how many posts are vacant in the National Probation Service; for how long these posts have been vacant; what the average length of time taken to fill vacant posts was in the last 12 months; and if he will make a statement. [145287]

Paul Goggins: The information requested is as follows:

The total number of vacant posts within the National Probation Service as at 30 June 2003 was 1,059.9 full time equivalent, which equates to 5.61 per cent. of the total workforce and is based on agreed funded establishments as at the 1 April 2003.

The National Probation Directorate (NPD) does not collect information on the length of time for which posts remain vacant nor on the average length of time taken to fill vacant posts. The management of the recruitment process is the responsibility of each individual area and as such, will be influenced by area service-delivery priorities and external forces such as the local labour market.

Mr. Oaten: To ask the Secretary of State for the Home Department how many of the probation areas in England and Wales will receive less in real terms under the financial settlement for 2004–05, after central recharging and performance-linked penalties are taken into account. [141802]

Paul Goggins: A final decision about the budget for the National Probation Service has not yet been made. The gross domestic product (GDP) deflator set by the Treasury is 2.5 per cent. for 2004–05. It is not expected that any probation areas will have an increase in their main resource allocation of less than the GDP deflator, after central recharging (outside the control of the local area) and performance-linked penalties are taken into account.

Official Receptions

Mr. Grogan: To ask the Secretary of State for the Home Department if he will make a statement on his Department's policy on the serving of beer at official receptions. [145778]

Fiona Mactaggart: A mixture of both soft and alcoholic drinks are served at official functions as appropriate.

Parliamentary Questions

Mr. Chope: To ask the Secretary of State for the Home Department pursuant to his answer of 2 December 2003, *Official Report*, column 43W, on written answers, how many of the parliamentary questions tabled prior to the last four days available for tabling have now been answered; and if he will list in respect of those not yet answered *(a)* the date of tabling and *(b)* the reason for the delay. [145053]

Fiona Mactaggart *[holding answer 18 December 2003]:* All parliamentary questions tabled prior to the last four days of tabling have now been answered with the exception of ten which still await a full reply. Of these five were tabled either at the end of October or in early November. The majority of these have been delayed because the detailed information requested is being compiled.

Passports (Vivien and Ambrose Cofie)

Mr. Wyatt: To ask the Secretary of State for the Home Department when the Passport Office will return to Vivien and Ambrose Cofie their passports. [144102]

Beverley Hughes *[holding answer 15 December 2003]:* I wrote to my hon. Friend on 23 January 2004.

Prison Deaths

Mr. Greg Knight: To ask the Secretary of State for the Home Department how many non-natural deaths have occurred in prisons in England and Wales during the last five years for which figures are available. [148607]

Paul Goggins: The information requested is provided in the following table:

	Number of self-inflicted deaths[1]	*Number of homicides*[2]	*Other non-natural causes of deaths*[3]
1999	91	0	0
2000	81	3	1
2001	73	0	0
2002	95	0	2
2003	94	1	1

[1] The Prison Service employs the term "self-inflicted death" which includes all those deaths where it appears the person may have acted specifically to take his/her own life.
[2] Includes alleged homicides
[3] Includes accidents

Reducing the number of self-inflicted deaths and instances of self-harm in prison establishments is a ministerial and Prison Service priority. A proactive three-year programme to develop policies and practices to reduce prisoner suicide and manage self- harm began in April 2001. The programme has included:

The training of suicide prevention coordinators, now operating in the majority of prisons

The increased provision of prisoner peer support through schemes such as 'Insiders' and Samaritan-led 'Listeners'

- An investment of £21 million in six 'safer local' prisons: Feltham, Leeds, Wandsworth, Winchester, Eastwood Park and Birmingham

Projects to develop safer prison design, including safer cells.

Over recent months a wide-ranging review of this programme has taken place in consultation with partner agencies such as the Youth Justice Board and outside organisations such as Samaritans, taking into account the evaluations of pilot projects and emerging research findings. This review will inform future suicide prevention strategy beyond April 2004.

The Prison Service is also developing a violence reduction strategy that re-addresses problems of inter-prisoner violence and bullying by providing a national framework of protective mechanisms and positive behaviour management. A new national cell-sharing risk assessment tool was introduced in June 2002 to enable staff at reception to identify those who may be high-risk prisoners, to prevent cell sharing that may generate prisoner-on-prisoner assaults, and to take the necessary steps to minimise potential harm to others. This procedure is currently being revised in the light of the alleged homicide in 2003.

Prison Disturbances

Mr. Oaten: To ask the Secretary of State for the Home Department how many disturbances there were at prisons in England and Wales in *(a)* 2001, *(b)* 2002 and *(c)* 2003; at which establishment the disturbances took place; and what the cost to the Prison Service was of the damage caused by each disturbance. [143292]

Paul Goggins: The incident classification system used by the Prison Service does not include 'disturbance'. Incident types most often associated with disturbances are concerted indiscipline, hostage taking, at height incidents (including rooftop protests), barricades and combinations of these. The information given in the following table records the numbers and location of incidents that were serious enough to warrant the opening of the Gold Command suite at Prison Service Headquarters. The Prison Service does not maintain a record of the cost of damage arising from incidents and such information could only be gathered at disproportionate cost.

Number of incidents for which Gold Command suite was opened in 2001

Establishment	*Total*
Ashfield	1
Aylesbury	1
Belmarsh	2
Bullingdon	1
Canterbury	1
Castington	3

Total	24

Prison Population

Mr. Gibb: To ask the Secretary of State for the Home Department if he will make a statement on the probable accuracy of each of the different forecast average prison populations set out in scenarios A-D in the Home Office Prison Population Brief, England and Wales: March 2003 (27/10/03). [143838]

Paul Goggins: The prison projections model has been shown to be accurate in predicting the prison population given the correct assumptions about sentencing. It is not possible to be certain about the direction of future trends in sentencing because trends observed over a number of years cannot be assumed to continue. It is for this reason that the projections cover a range of different scenarios and are regularly updated to take account of changing trends and new policies affecting the prison population. The central projections were updated in the summer and published in the April Prison Population Brief in September. The actual prison population was 116 below the projection used for planning purposes on 12 December 2003.

The projections take into account known changes in policy and legislation where the relevant legislation has been passed and a timetable agreed for implementation. The impacts of the new Criminal Justice Act are therefore yet to be included.

Prison Suicides

Bob Spink: To ask the Secretary of State for the Home Department how many *(a)* men, *(b)* women and *(c)* juveniles have committed suicide while held by the Prison Service in each of the last five years for which records exist. [146751]

Paul Goggins: The information requested is provided in the following table.

Calendar year	*Number of male self-inflicted deaths (not including juveniles)*	*Number of female self-inflicted deaths (not including juveniles)*	*Number of juvenile self-inflicted deaths (aged 15–17)* [1]
1999	84	5	2
2000	70	8	3
2001	64	6	3
2002	84	9	2
2003	80	14	0

[1] These 10 self-inflicted deaths all involved male juveniles.
The Prison Service employs the term 'self-inflicted death' rather than 'suicide.' This includes all those deaths where it appears the person may have acted specifically to take his/her own life.

Reducing the number of self-inflicted deaths and instances of self-harm in prison establishments is a ministerial and Prison Service priority. A proactive three-year programme to develop policies and practices to reduce prisoner suicide and manage self-harm began in April 2001. The programme has included:

The training of suicide prevention coordinators, now operating in the majority of prisons.

The increased provision of prisoner peer support through schemes such as 'Insiders' and Samaritan-led 'Listeners'.

An investment of £21 million in six 'Safer Local' prisons: Feltham, Leeds, Wandsworth, Winchester, Eastwood Park and Birmingham.

Projects to develop safer prison design, including safer cells.

Over recent months a wide-ranging review of this programme has taken place in consultation with partner agencies such as the Youth Justice Board and outside organisations such as Samaritans, taking into account the evaluations of pilot projects and emerging research findings. This review will inform future suicide prevention strategy beyond April 2004.

Prisoner Transfers

Julie Morgan: To ask the Secretary of State for the Home Department what assessment he has made of the time it takes to transfer *(a)* male and *(b)* female remand prisoners to prison from court. [149526]

Paul Goggins *[holding answer 22 January 2004]:* Private sector contractors are responsible for carrying out the movement of prisoners from courts to prisons. Remand and convicted prisoners, including male and female prisoners, can travel in the same vehicle. No central record of journey times is kept, nor is it possible to identify any differences in journey times between remand and convicted, male and female prisoners.

Contractors are required to deliver prisoners to courts before 9.30 am and back to prisons before their receptions close. Contract managers are robust in monitoring their performance and there are financial remedies built into the present contracts for failure to deliver prisoners to prisons on time.

Mr. Oaten: To ask the Secretary of State for the Home Department how many prisoners have been transferred between prisons due to population pressures in the last year. [143293]

Paul Goggins: There are around 100,000 prisoner moves between prisons each year. These moves may be for a number of reasons, such as security, discipline or as a result of normal sentence planning. In addition,

prisoners may be moved to ensure full and effective use of places within the prison estate. The reasons for prisoner moves are not recorded centrally.

Prisoners on Release

Andrew Mackinlay: To ask the Secretary of State for the Home Department whether the monetary grant made available to prisoners on release from gaol is different if a prisoner provides no fixed abode as their address. [149519]

Paul Goggins *[holding answer 21 January 2004]:* A higher rate of discharge grant (£94.40) is paid to prisoners on release only if there is a need to seek, obtain and pay for accommodation. It is only paid to prisoners with no accommodation arranged in advance if this arises through no fault of the prisoner. Otherwise the standard rates of discharge grant paid are £46.75 (for prisoners aged 25 and older) or £37 (for prisoners aged 18 to 24).

Andrew Mackinlay: To ask the Secretary of State for the Home Department how many prisoners were released from gaol in the most recent year for which figures are available. [149521]

Paul Goggins *[holding answer 21 January 2004]:* 91,100 sentenced prisoners were discharged from prisons in England and Wales in 2002.

Prisons

Mrs. Gillan: To ask the Secretary of State for the Home Department when Bromsfield prison will be ready to receive prisoners. [147371]

Paul Goggins: Construction of Her Majesty's Prison Bromsfield is progressing to schedule and the prison will be ready to open on 17 June 2004, the date specified in the contract.

Mrs. Gillan: To ask the Secretary of State for the Home Department what the *(a)* annual cost and *(b)* original budget figure for running each prison was in each year since 1997. [147418]

Paul Goggins: The table sets out the expenditure, net of any receipts from other Government Departments (Department for Education and Skills, Department of Health and Youth Justice Board), for the public sector prisons for the financial years 1997–98 to 2002–03.

It would incur disproportionate cost to provide details of the original budget allocations to establishments.

Establishment	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
Acklington	8,909,492	10,023,027	11, 335,355	12,276,018	12,306,951	13,054,221
Albany	8,749,528	8,697,711	8,909,118	9,585,057	9,638,824	10,214,992
Aldington	2,411,489	2,434,701	,886,808	7,833,229	7,977,359	8,886,442
Ashwell	6,697,763	7,408,379	7,680,868	2,697,533	2,802,068	3,010,142

Mrs. Gillan: To ask the Secretary of State for the Home Department (1) if he will list the smaller prisons that are being considered for closure to redirect resources into community punishments; [147431]

(2) if he will list the sites that are being considered to erect the new generation of larger prisons; [147432]

(3) if he will publish the detailed investment case that the Department is making to the Treasury to close smaller prisons and erect larger prisons. [147433]

Paul Goggins: The Home Office is working on a value for money case for a replacement programme to create a new generation of la ger prisons with the facilities needed to deliver effective programmes designed to reduce re-offending. New large prisons could also provide economies of scale, which would allow us to close some smaller prisons and redirect resources to community punishments. This case will be subject of discussion in the forthcoming Spending Review the outcome of which will be published. We will not publish the case we make to the Treasury on which decisions are taken.

There is an established procedure for the announcement of decisions to change the role of or close prisons. Once Ministers take a decision to change the role of or close a prison, staff and local MP's affected by the change or closure are briefed before the formal announcement.

A survey has been commissioned to identify suitable sites for new, large prisons although no sites nave yet been purchased or other commitments made. To be effective in delivering regimes that aid rehabilitation and reduce re-offending new sites need to be close to, or have good transport links with, large conurbations. The search is concentrating on sites available in London and the south east, the west Midlands, the north west and Wales. These are the regions that have the greatest need for additional prison capacity at this stage.

Mr. Oaten: To ask the Secretary of State for the Home Department (1) what recent research he has commissioned into the effectiveness of mandatory drug testing in prisons; [143382]

(2) when he will publish the findings of the research into the effectiveness of mandatory drug testing in prisons. [144261]

Paul Goggins: A research study on the impact of the Mandatory Drug Testing programme in prisons is being undertaken by the Office for National Statistics and National Addiction Centre. Their report is now expected to be available in the Spring of 2004.

Mr. Oaten: To ask the Secretary of State for the Home Department (1) what assessment he has made of seasonal variations in the seizure of illegal drugs *(a)* within prisons and *(b)* from individuals visiting prisons; [143402]

(2) what assessment he has made of seasonal variations in the rate of positive mandatory drug tests in prisons. [144269]

Paul Goggins: Available data on seizures of drugs in prisons and on visitors involved in suspicious incidents do not show any seasonal trends. Random mandatory drug test (MDT) rates in prisons fluctuate quite widely on a monthly basis. However, there is some evidence nationally of a pattern of slight increases in drug misuse in the months of July, August and December.

Probation Boards

Mr. Oaten: To ask the Secretary of State for the Home Department what the cost of establishing and running probation boards was in *(a)* 2000–01, *(b)* 2001–02 and *(c)* 2002–03. [147627]

Paul Goggins: The cost of running the local probation boards in the three years in question is:

	£ million
2000–01 (Estimated)	529.5
2001–02	580.1
2001–03	626.8

The estimated transition costs incurred to set up the new board arrangements was £2 million, excluding the costs of amalgamating some of the boards. Prior to April 2001, there were 54 probation committees. These were largely autonomous organisations, and produced their own accounts under local authority rules and guidelines. The accounts were not consolidated by the Home Office. The accounts for 2000–01 also included the cost of the Family Court Welfare Service, which transferred out of the Probation Service on 1 April 2001 and is therefore not included in the costs for 2001–02 and 2002–03.

Rape/Sexual Offences Helpline

Vera Baird: To ask the Secretary of State for the Home Department when the national helpline for victims of rape and sexual offences will be operational. [146769]

Paul Goggins: Plans for the national rape helpline are currently being developed and this matter is under consideration.

Sex Offender Orders

Mr. Oaten: To ask the Secretary of State for the Home Department how many offenders are subject to sex offender orders; and how many sex offender orders have been granted in each year since 1999. [143388]

Paul Goggins: Sex Offenders Orders (SOOs) came into force on 1 December 1998 under the Crime and Disorder Act and were subsequently amended by the Police Reform Act 2002. There is no centrally held record of the number of offenders currently the subject of a SOO. However, a SOO has effect for a period not less than five years and can only be discharged before the end of this period with the consent of the police and the defendant. In addition, an individual may only be subject to one SOO at any one time. Therefore the number of SOOs granted by the courts may be used as an estimate to the number of offenders currently subject to such orders.

Since 2001, statistics on the number of SOOs have been collated under the Multi-Agency Public Protection Arrangements (MAPPA). On 15 September this year, I made a Written Statement to the House announcing the publication of the 2002–03 MAPPA Annual Reports, copies of which I placed in the Library.

Statistics in MAPPA annual reports show that in the period 2002–03, 91 orders were granted. In the period 2001–02, 81 orders were granted.

Between 1 December 1998 and 31 March 2001, it is estimated that a total of 92 SOOs were made.

Child Protection

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what steps are being taken to ensure that all relevant Inspectorates implement Recommendation 2.15 of the Joint Chief Inspectors' report on Arrangements to Safeguard Children. [146289]

Paul Goggins: The three relevant Home Office Inspectorates are Her Majesty's Inspectorate of Constabulary, Her Majesty's Inspectorate of Prisons and Her Majesty's Inspectorate of Probation. I am not able to comment on action by other Inspectorates.

Inspection activity is currently being undertaken by the Home Office Inspectorates in respect of relevant aspects of recommendation 2.15 of the joint Chief Inspectors' report, as follows:

(a) In relation to young offender institutions, inspection of child protection arrangements is a central part of each inspection by Her Majesty's Inspectorate of Prisons of Young Offender Institutions and Immigration Removal Centres holding children and young people aged under 18 years. Her Majesty's Inspectorate of Prisons also advises Her Majesty's Prison Service on children's safeguarding matters, for example supporting a recent review of safeguarding arrangements in all Young Offender Institutions holding children. The inspectorate also undertakes joint inspection of Secure Training Centres with the Social Service Inspectorate.

(b) In relation to the impact of domestic violence on children:

Police issues: Domestic violence is an area of police activity specifically considered by Her Majesty's Inspectorate of Constabulary (HMIC) during scheduled Inspections of police forces undertaken during a year. In addition, during 2003, a joint inspection of domestic violence was undertaken by HMIC and the Crown Prosecution Services Inspectorate, which included specific consideration of children's safeguarding issues. The report is due to be published early in 2004. A major HMIC Thematic Inspection on Child Protection is also planned for 2004, to address one of the recommendations made by Lord Laming following the Climbie Inquiry.

Probation issues: A thematic element on domestic violence, with a clear focus on children, has been included in the main inspection programme of probation areas by Her Majesty's Inspectorate of Probation—the Effective Supervision Inspection programme. The report on this element is due to be published in summer 2004. The Effective Supervision Inspection programme also includes general consideration of child protection issues in all probation areas.

(c) In relation to the work of Youth Offending Teams (YOTs), a joint inspection programme of YOTs is under way, led by Her Majesty's Inspectorate of Probation with involvement from Her Majesty's Inspectorate of Constabulary and Her Majesty's Inspectorate of Prisons (along with four other inspectorates). The methodology has been designed to ensure that children's safeguarding issues are covered specifically from early in 2004.

More generally, alongside the specific work above, the Government have put in place arrangements to commission from the Chief Inspectors of services involved with children a joint report on children's safeguards every three years. The next report is due in 2005, A Steering Group involving nine Inspectorates or other regulatory bodies and led by the Social Services Inspectorate has been established to prepare for this.

It is intended that the aim of the report will be:

To review the arrangements across agencies to safeguard children, giving particular attention to children's views and experiences, progress since the last report and the areas identified within the first review as requiring more attention. The review will result in a report to Government making recommendations as necessary.

The themes and subject areas identified have been chosen to ensure that each of the issues highlighted in recommendation 2.15 of the last report is covered. Much of the inspection work will relate to cross-cutting issues between agencies.

Vulnerable Witnesses

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department if he will assess the effectiveness of the guidance on vulnerable and intimidated witnesses under the Youth Justice and Criminal Evidence Act 1999. [146290]

Paul Goggins: Comprehensive guidance about vulnerable or intimidated witnesses (VIWs) was issued to practitioners in January 2002. There are no current plans to review this guidance.

Rules of Court relating to Special Measures Directions under the 1999 Act came into force on 24 July 2002. These rules are now being reviewed to improve their effectiveness and it is expected that amending rules will be issued in the spring.

Individual issues of effectiveness are considered as they arise by the national VIW steering group which meets regularly.

Sexual Assault Referral Centres

Vera Baird: To ask the Secretary of State for the Home Department (1) whether it is his policy that sexual assault referral centres should be at hospitals; [146765]

(2) what allocations have been made from the Home Office funds for sexual assault referral centres in 2003; and to whom; [146773]

(3) what plans he has to increase the numbers of sexual assault referral centres; when he intends further such centres to be in operation; and where they will be located; [146774]

(4) whether it is his policy that health trusts should be involved in the *(a)* establishment and *(b)* running of sexual assault referral centres in co-operation with the police; [146766]

(5) when the results of the evaluation of the sexual assault referral centres *(a)* Star, *(b)* Reach and *(c)* St. Mary's will be published; [146775]

(6) what the current estimate is of *(a)* the cost of establishing a sexual assault referral centre if a new build is necessary and *(b)* the annual cost of running a sexual assault referral centre; [146770]

(7) what directive has been issued to police forces on the role they ought to play in establishing sexual assault referral centres in areas where there are none; [146771]

(8) how he intends that further sexual assault referral centres should be financed for *(a)* capital and *(b)* revenue costs; [146772]

(9) when he expects to publish the evaluation of the Forensic Nurse project at St. Mary's Sexual Assault Referral Centre. [146777]

Paul Goggins: The Government are currently considering ways in which further support may be provided to victims of sexual crime. This objective may be achieved through the use of Sexual Assault Referral Centres (SARCs); rape crisis and other counselling and support services; national or local telephone helplines; or some combination of these. We are looking at all the options as part of the work being undertaken to implement the national strategy for victims and witnesses, which was published in July 2003.

An Inter Departmental Ministerial Group (IDMG) on Sexual Offending has been set up. It comprises representation from the Home Office, Department of Health, Department for Education and Skills, Department for Work and Pensions, Department for Constitutional Affairs, Law Officers' Department, Department of Trade and Industry and the Office of the Deputy Prime Minister. The group will focus on: prevention, protection, and support; taking forward the implementation of the Sexual Offences Act; and promoting an effective, joined up approach to tackling sexual offending. The Inter Departmental Ministerial Group will consider provisions for victims of sexual offences, including issues around the development and funding of SARCs throughout England and Wales.

The Home Office has funded research into three existing SARCs: St. Mary's, Reach and Star. The interventions, which were funded from July 2000 to the end of March 2003, included: training a forensic nurse to conduct forensic examinations; an intervention to help reduce attrition; and an intervention to support young victims of sexual violence. An independent evaluation of these interventions and of the overall services of the three SARCs has now been completed and the findings are due to be published in late spring 2004.

No directive has been issued to the police or health trusts on the role that they ought to play in the establishment of SARCs. The research findings and the Inter Departmental Ministerial Group will inform future policy on the development and funding of SARCs, including the development of good practice guidance. This will draw on the experience of existing SARC managers and victims.

Many existing SARCs are based at hospitals and the police have worked closely with health trusts in their establishment. However, different models of SARC will be best suited to different areas and the needs of the local community. Funding of existing SARCs has been negotiated and agreed locally, in most cases between the police and local health authority. The cost of establishing and running a SARC will vary according to the model.

The Home Office recently made funds available to support the development of SARCs. In September all police authorities were invited to bid for this funding. Grant offers are being finalised and an announcement will follow shortly.

Sexual Offenders

Mr. Djanogly: To ask the Secretary of State for the Home Department (1) which steps are being taken to avoid offenders on the sexual offenders register *(a)* absconding and *(b)* changing their names without informing the police; [149680]

(2) how frequently offenders on the sexual offenders register who are resident in *(a)* Cambridgeshire and *(b)* Huntingdon receive visits by the Cambridgeshire Constabulary. [149683]

Paul Goggins: The requirement for sex offenders to notify the police of their name and address was introduced in the Sex Offenders Act 1997 and has proved an invaluable tool in helping the police to monitor convicted sex offenders within their area. An offender who is subject to the notification requirements must inform the police within 14 days of using a new name or moving to a new address. A failure to comply with the requirements is a criminal offence, with the maximum punishment set at five years imprisonment. We estimate that compliance with the requirements is currently around 97 per cent.

We are improving the notification requirements through the Sexual Offences Act 2003. Once the Act comes into force, relevant offenders will have to go to their local police station at least once every 12 months to confirm that the details held by the police are correct. They will also have to provide the police with their

national insurance number and notify any change to their name or address within three days, rather than the current 14 days.

The Sexual Offences Act also includes a new power which will enable the information notified by registered sex offenders to be regularly checked against information held by the Department of Work and Pensions, the UK Passport Service and the Driver Vehicle and Licensing Agency. The purpose of this is to verify that the information notified by relevant offenders is correct and this will help to identify more quickly those cases where an offender assumes a new name or address without telling the police or where an offender absconds.

Sex offenders who are subject to the notification requirements will also:

(a) continue to be visited by police officers as part of the routine management of sex offenders living in the community;

(b) be subject to the Multi-Agency Public Protection Arrangements which provide an increasingly effective way of enhancing public protection through better joint-agency working, including intelligence on where an offender is living and any other homes they may use;

(c) have their details recorded on the new Violent and Sex Offender Register (ViSOR) database which will hold additional information and improve the sharing of intelligence between law enforcement agencies.

Mr. Djanogly: To ask the Secretary of State for the Home Department (1) how many offenders on the sexual offenders register resident in *(a)* Cambridgeshire and *(b)* Huntingdon are classed by the police to be low risk; [149682]

(2) how many sexual offenders resident in *(a)* Cambridgeshire and *(b)* Huntingdon were on the register for sexual offences on 1 January. [149684]

Paul Goggins: On 15 September 2003 I made a Written Statement to the House announcing the publication of the 2002–03 Multi-Agency Public Protection Arrangements (MAPPA) Annual Reports, copies of which I placed in the Library of the House. Each of the 42 Areas of England and Wales publish a MAPPA Annual Report and this year's contain a more detailed breakdown of the number of sexual and violent offenders in each area and some of the outcomes of multi-agency public protection work. Cambridgeshire's MAPPA report stated that there were 282 registered offenders in the area on 31 March 2003. Statistics are not available for each town in the county.

Cambridgeshire Constabulary has informed me that 42 per cent. of registered sex offenders in the county are classed as "low risk". In line with other police areas, the offenders classed as "very high risk" are visited at least once a month; those classed as "high risk", at least once every two months; those classed as "medium risk", at least once every six months and those classed as "low risk", at least once every 12 months.

Small Businesses

Brian Cotter: To ask the Secretary of State for the Home Department whether his Department uses a database of individual small businesses for consultation purposes. [142476]

Fiona Mactaggart: Yes, the Home Office has used the small firms database supplied by the Small Business Service twice

Speeding

Simon Hughes: To ask the Secretary of State for the Home Department how much revenue the Metropolitan Police received from the operation of *(a)* speed and *(b)* red light cameras in 2002; and how much was (i) imposed and (ii) collected in fines resulting from (A) speed and (B) red light cameras in London in each of the last five years. [149795]

Caroline Flint: The amount of revenue which the Metropolitan Police received from the operation of safety (speed and red light) cameras in 2002 is not yet known. Police forces receive income from safety camera fixed penalties under the provisions of the national safety camera netting-off scheme. The London Safety Camera Partnership, of which the Metropolitan Police are a member, joined the scheme in July 2002. Partnership performance and revenue received, from this time up to March 2003, will be detailed in the next report on the progress of the national safety camera scheme. The Department for Transport, which manages the scheme, expect to publish this report in March 2004.

Before 2002, the Metropolitan Police received no income from safety the number of speeding and red-light offences detected by cameras in the Metropolitan and City of London Police areas and the estimated revenue for the five years up to 2001 is shown in the table. Information for 2002 will be available in the next few months.

Fixed penalty and court proceedings data for speeding and traffic light offences detected by cameras[1,2,3] in the Metropolitan Police District (including city of London), 1997–2001

	Fixed Penalties		*Court Proceedings*		
Offence and year	*Number of tickets*	*Estimated revenue (£)*	*Number of fines*	*Total amount of fine (£)*	*Average fine (£)*
Speeding offences[2]					
1997	15,300	612,900	2,500	259,600	102
1998	14,200	566,200	2,900	356,800	125
1999	13,000	521,920	2,600	288,400	111
2000	44,100	1,910,700	2,200	256,700	115
2001	52,100	3,128,600	4,500	513,700	114
Traffic light offences[3]					
1997	10,800	433,900	1,300	94,200	75
1998	9,700	386,700	1,200	95,500	78
1999	12,100	483,200	2,000	178,300	88

Fixed penalty and court proceedings data for speeding and traffic light offences detected by cameras[1,2,3] in the Metropolitan Police District (including city of London), 1997–2001

	Fixed Penalties		Court Proceedings		
Offence and year	Number of tickets	Estimated revenue (£)	Number of fines	Total amount of fine (£)	Average fine (£)
2000	22,200	961,400	5,900	525,900	88
2001	10,800	646,900	6,600	478,800	73

[1] Automatic cameras until 1998, all camera types from 1999.
[2] Offences under the Road Traffic Regulation Act 1984 and The Motor Vehicles (Speed Limits on Motorways) Regulations 1973.
[3] Offences under the Road Traffic Act 1988 and The Traffic Signs Regulations and General Directions 1994.
Note:
1. Paid i.e. no further action.
2. Estimate based on £40 fixed penalty charge to October 2000. From November 2000 the penalty was raised to £60.
3. Estimates were made to cover the loss of fixed penalty data by the Metropolitan Police for October 1999.
4. Excludes City of London

Widows and Widowers

Mr. Willetts: To ask the Secretary of State for the Home Department how many *(a)* widows and *(b)* widowers have been widowed in such a way that an inquest has been required in each of the years 1997 to 2002. [145978]

Paul Goggins: This information is not collected centrally.

The number of inquests held in each year from 1997 to 2002 is contained in Table 3 of the Home Office Statistical Bulletin "Deaths reported to coroners, England and Wales, 2002", a copy of which is in the Library. It is not possible to deduce from this table the proportion of deceased persons represented by those inquests who would have left a widow or widower.

Women Prisoners

Joan Ruddock: To ask the Secretary of State for the Home Department what steps the Government are taking to reduce the number of women held on remand. [142892]

Paul Goggins: The significant increase in the female prison population, and the wider consequences of this in terms of disruption to their families, particularly their children, underlines the importance of using custody as a last resort.

The Women's Offending Reduction Programme (WORP) is a three-year programme that aims to promote a more focused and joined-up response to the range of factors that have an impact on why women offend.

A long-term aim of the WORP is to reduce the number of women in custody. We are particularly concerned about the 58 per cent. of women held on remand who do not go on to receive a custodial sentence. This is why the WORP focuses on the need to maximise the opportunities for diversion at the pre-sentence stage.

Gender specific training and guidance for sentencers, court report writers and bail information staff will be supported by the development of more appropriate community interventions that are better tailored to meet the needs of women, particularly those with mental health and substance misuse problems. Ensuring appropriate housing or bail hostel provision for women will also be key to reducing the use of remand. The potential for diversion is likely to be increased by improving the court's confidence in available community provision.

Young Offenders

Mr. Oaten: To ask the Secretary of State for the Home Department what arrangements are made by youth offending teams to escort juvenile prisoners home on release from prison. [144367]

Paul Goggins: Arrangements for escorting juveniles home on release are made on a case-by-case basis, usually at the final review meeting at the end of the period in custody. The preferred arrangement is for a parent, relation or other carer to meet the young person and take him or her home. Where this is not possible—for example, where alternative accommodation has been arranged—a youth offending team worker will usually accompany the young person.

In reaching decisions the age and assessed vulnerability of the young person is always taken into account.

Mr. Hoyle: To ask the Secretary of State for the Home Department if he will make a statement on his plans to provide drug treatment for young offenders addicted to drugs in *(a)* the north west and *(b)* Lancashire. [149965]

Caroline Flint: To ensure that effective treatment is available when it is needed, we have made significant investments in the youth justice system and drug treatment sector throughout the United Kingdom with the north west and Lancashire among those areas benefiting.

Sustained investment in young peoples drug treatment, means that by March 2004 95 per cent. of all drug action teams (DATs) will provide a minimum of six different types of treatment interventions, which meet a tough set of young peoples focused quality standards. The interventions include restricted and Tier 3 services.

In addition, the Youth Justice Board (YJB) is providing £8.5million funding each year to give all 155 youth offending teams across England and Wales access to an allocated named drugs worker. The drugs worker is able to assess the needs of young people and ensure that they receive appropriate treatment or other interventions. This project is currently being evaluated by the Home Office.

An arrest referral scheme for young people is currently being piloted, to get young offenders into treatment or other appropriate interventions as early as possible. £6 million is being invested to pilot arrest referral for young people in 10 high crime areas across England including Liverpool and Manchester. Trained staff in the police custody suites identify if young people have a substance misuse issue and refer them to appropriate treatment or intervention.

Youth Justice System

Mr. David Stewart: To ask the Secretary of State for the Home Department if he will make a statement on the use of deprivation of liberty in the youth justice system. [145172]

Paul Goggins: Young offenders should be deprived of their liberty only as a last resort. Courts considering a custodial sentence must be satisfied that the offending behaviour is so serious that only a custodial sentence can be justified or, in the case of a violent or sexual offence, that such a sentence is needed to protect the public from serious harm. The only other situation where custody can be given is where the young offender refuses to co-operate with the requirements of a supervision order or a drug treatment and testing order. The court must also explain in open court its reasons for giving custody.

There is a further requirement where the court is considering making a Detention and Training Order on an offender below the age of 15: the court must additionally be satisfied that the young person is a persistent offender. (The Detention and Training Order is the standard order for offenders under 18 who are sentenced to custody).

Mr. David Stewart: To ask the Secretary of State for the Home Department what plans he has to ensure that the principle of non-discrimination is fully implemented within the youth justice system. [145174]

Paul Goggins: In 2004–05, the Youth Justice Board (YJB) for England and Wales will have a new diversity target. The precise form of words is still to be agreed but the aim will be to ensure that local youth offending teams in England and Wales have measures in place to tackle differential outcomes for different ethnic groups within the youth justice system.

To support this target, the YJB are working with the National Association for the Care and Resettlement of Offenders to help youth offending teams to produce action plans. This work will be informed by research commissioned by the YJB from Oxford University looking at the experiences of young black people in the youth justice system. This research is due to be published early in 2004.

Dr. Vis: To ask the Secretary of State for the Home Department how many *(a)* secure children's home places and *(b)* places for children in prison were available in (i) 1997 and (ii) 2003; and if he will make a statement. [145213]

Paul Goggins: In April 2000, the Youth Justice Board for England and Wales (YJB) assumed responsibility for commissioning and purchasing secure accommodation for juveniles from the prison service, private sector, and local authority secure children's homes, and for setting and monitoring standards. Before then, there was no separate juvenile secure estate.

Information is available on places in secure children's homes (see table) though not all would be used for young people in the criminal justice system. There were no designated places in 1997 for juveniles in prison service accommodation. For 2003–04, 3,066 places have been designated as being available for 15 to 17-year-olds in Young Offender Institutions—Young people below the age of 15 are not held in prison service accommodation.

In 2003, in addition to the above, 194 places in England and Wales are available in Secure Training Centres (STCs). No STCs were in operation in 1997.

Places approved at local authority secure children's homes in 1997 and 2003 were as follows:

	As at 31 March	
	1997	*2003*
England	330	425
Wales	20	20
England and Wales	350	445

Written Answers to Questions

Tuesday 27 January 2004

SOLICITOR-GENERAL

Domestic Violence

Mrs. Curtis-Thomas: To ask the Solicitor-General how many cases the Crown Prosecution Service has prosecuted on Merseyside that concern domestic violence which have been pursued by the police as primary complainant without the corroboration of the individual assaulted. [150145]

The Solicitor-General: The Crown Prosecution Service does not routinely collect data that show the nature of the evidence on which a domestic violence case proceeds. CPS Policy Directorate is currently analysing the results of a national snapshot survey of cases finalised in December 2003. This will provide some information about the point raised by the hon. Member with regard to cases finalised in December 2003. Until CPS case-tracking systems are fully computerised, the detailed information requested could be obtained only at disproportionate cost.

Serious Fraud Office

Mr. Llwyd: To ask the Solicitor-General what the overall conviction rate for cases pursued by the Serious Fraud Office was in 2003. [150062]

The Solicitor-General: The Serious Fraud Office's (SFO) statistical information is recorded by financial year (5 April to 4 April). Since 5 April 2003, the SFO has convicted 19 out of 29 defendants, a conviction rate of 66 per cent. The conviction rate since the inception of the SFO in April 1988 is 70 per cent. (403 convictions from 575 defendants).

TRANSPORT

Cycle Lanes

Mr. Chaytor: To ask the Secretary of State for Transport what guidance he has issued to local authorities in respect of the width of cycle lanes; and if he will make a statement. [149535]

Mr. Jamieson: Advice on the recommended widths of cycle lanes is contained in "Cycle Friendly Infrastructure", published in 1996 by the then Department of Transport in conjunction with the Institution of Highways and Transportation and others.

Speed Cameras

Mr. Baron: To ask the Secretary of State for Transport pursuant to his answer of 6 January 2004, *Official Report*, column 216W, on speed cameras, how much money was raised in fines by the Essex Safety Camera Partnership for each of the five years prior to 2001–02. [147572]

Mr. Jamieson *[holding answer 13 January 2004]:* The amount raised in fines detected by speed cameras within the area covered by Essex Safety Camera Partnership between 1997 and 2001 was as follows:

Court proceedings and fixed penalties data for speeding offences detected by cameras[1,2] in the Essex police force area, 1997–2001

	Court proceedings			Fixed penalties	
	Number of fines	Total amount (£)	Average fine (£)[3]	Number of tickets[4]	Estimated revenue (£)[5]
1997	880	93,900	107	18,800	753,700
1998	1,700	227,400	134	8,700	346,600
1999	2,100	357,400	169	19,800	791,400
2000	2,800	317,800	115	46,300	2,007,200
2001	6,500	651,200	101	81,900	4,911,100

[1] Automatic cameras until 1998. All camera types from 1999.
[2] Offences under the Road Traffic Regulation Act 1984 and The Motorway Vehicles (Speed Limits on Motorways Regulations 1973).
[3] Includes fines imposed by courts (cases where fixed penalty notices were originally issued but not paid and subsequently referred to court).
[4] Paid i.e. no further action.
[5] Estimate based on £40 fixed penalty charge to October 2000. From November 2000, the fixed penalty was raised to £60.

DEFENCE

Aircraft Carriers

Mr. Soames: To ask the Secretary of State for Defence whether he will meet the March deadline for awarding the full-production contract for the CVF. [147280]

Mr. Ingram: The Future Carrier (CVF) programme is currently in Stage 3 of the Assessment Phase, which is due to continue until spring 2004. It is our intention that, at this point, Ministers will consider proposals on the overall CVF programme, and make a decision on when to proceed to the Demonstration and Manufacture Phases of the carriers. The target in-service dates for the carriers remain 2012 and 2015.

Airfield Support Service Project

Mr. Clifton-Brown: To ask the Secretary of State for Defence what part of his Department's budget the equipment and services to be provided under the Airfield Support Service Project will come from; and what the cost will be. [149058]

Mr. Ingram: The estimated cost of the Project is some £1.2 billion over 15 years. It will be funded from within the budgets of the stakeholders involved in the project.

Body Armour

Mr. Hancock: To ask the Secretary of State for Defence how many sets of body armour have been issued by the Army since 1989; to which units they have been issued, and in what quantities; how many men served in each of those units; and if he will make a statement. [149655]

Mr. Ingram: I will write to the hon. Member and a copy of my letter will be placed in the Library of the House.

Foreign Defence Equipment

Mr. Hoyle: To ask the Secretary of State for Defence how many foreign aircraft, and of what makes and type, have been hired by his Department in each of the last five years. [150408]

Mr. Ingram: This information is not held centrally and could be provided only at disproportionate cost.

Future Rapid Effects Project

Mr. Gerald Howarth: To ask the Secretary of State for Defence when he expects to announce the name of the company selected to undertake the assessment phase of the Future Rapid Effects System project; how much has been allocated to fund the assessment; and when FRES is due to enter service with the Army. [149564]

Mr. Ingram: I hope to be in a position to make announcements on the way ahead for the FRES programme shortly. We are planning on early variants of the system being introduced into service around the end of the decade.

Reservists

Mr. Swayne: To ask the Secretary of State for Defence how many man training days were available to reserve forces in each of the last five years. [R] [149407]

Mr. Caplin *[holding answer 26 January 2004]:* The number of man training days available to the volunteer reserves varies by Service, category of reserve, unit role, level of readiness, and individual trade or specialism. In each of the last five years all volunteer reservists have had enough man training days available to qualify for bounty.

Sea King Helicopters

Andrew George: To ask the Secretary of State for Defence whether Royal Navy Sea King helicopters engaged in military action in the Gulf in March 2003 were supplied with *(a)* night vision equipment and *(b)* night flying aids. [150991]

Mr. Ingram *[holding answer 26 January 2004]:* Night Vision Goggles (NVG) can be operated only in aircraft that have been specifically modified for this role. Naval helicopters are fitted to allow operation with NVG according to their tactical role in operations. Of the 20 Royal Navy Sea King helicopters deployed to the Gulf, the 10 amphibious assault helicopters were fitted with NVG, as their operational role required.

Aircrews are fully trained to fly at night without NVG under normal operating procedures. Safety is provided by a variety of other aids and by individual action. These include: operating procedures such as, air traffic control, awareness of hazards through radar detection, communications, lighting and lookout.

Service Personnel (Osteoporosis)

Llew Smith: To ask the Secretary of State for Defence what assessment has been made of the incidence of osteoporosis in British Service personnel and military medical auxiliaries who served in *(a)* the 1991 Gulf War and *(b)* the invasion of Iraq in Operation Telic in 2003. [149606]

Mr. Caplin: The Ministry of Defence has no centralised system for monitoring and recording the health status of Service and ex-Service personnel. However, over 3,220 veterans of the 1990–91 Gulf Conflict have been seen at the Gulf Veterans' Medical Assessment Programme (GVMAP) to date. At the time they were seen, none had been diagnosed with osteoporosis. There are currently no data relating to the incidence of osteoporosis in those who served in Operation Telic.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Bovine TB

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what liaison takes place between English Nature and her Department in relation to the potential disease status of badgers targeted for removal and relocation. [150580]

Mr. Bradshaw: I refer the hon. Member to the answer on 6 January 2004, *Official Report,* column 249W, and on 20 January 2004, *Official Report,* column 1186W.

The Department's Veterinary Endemic Diseases and Zoonoses Division (VEDZD) advise the badger licensing authorities in Defra's Rural Development Service and in English Nature, on potential bovine tuberculosis disease transmission risks associated with badger relocations. No licence is issued without first seeking advice from VEDZD.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the status is of *(a)* the Independent Science Group and *(b)* the TB Forum in relation to the control of TB; what requirement there is for her to (i) abide by and (ii) consider the advice of these organisations; and whether these organisations can veto proposals made by her Department. [150543]

Mr. Bradshaw: The Independent Scientific Group on Cattle TB is an advisory NDPB. Its primary objective is to oversee the design and analysis of the Randomised Badger Culling Trial. Its complete Terms of Reference can be accessed on the Defra website.

The TB Forum aims to bring together experts and organisations with an interest in the Government's policy on bovine TB, to consider new measures which might be taken to control the disease in cattle.

Ministers consider carefully the advice of these bodies in formulating policy. However, there is no requirement for Ministers or the Department to abide by their advice, nor do these bodies have any formal power to veto departmental proposals.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report,*

column 217W, how many closed herds where disease prevention measures have been judged by her officials to be adequate have suffered TB breakdowns in the last 10 years. [150551]

Mr. Bradshaw: Defra does not keep a record of which herds are closed and definitions of a 'closed' herd vary. Defra keeps a record of cattle births and deaths, and their movements from known locations in England, Scotland and Wales. Were a 'closed' herd to be very strictly defined, it would be possible to identify closed herds from records of holdings that only register births and deaths, but have no animal movements on. However, this could be done only at disproportionate cost.

A survey of TB breakdowns (known as 'TB99') is under way and is designed to assess potential risk factors that may predispose herds to TB outbreaks.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 15 December, *Official Report*, columns 629–30W, on bovine TB, if she will take steps to compensate herd owners for uninsurable consequential losses arising from the TB infection, where there is clear evidence of no culpability. [150846]

Mr. Bradshaw: There are no plans to compensate farmers for consequential losses after a TB breakdown.

Bumble Bees

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment has been made of the relationship between the size of the bumble bee population and the size of the badger population in England. [150942]

Mr. Bradshaw: Badgers are known to excavate and eat the nests of bumble bees and have the potential to exert an influence on the abundance of the bees locally.

The Department has not commissioned any studies to assess the relationship between the abundance of badgers and bumble bees, nor are we aware of any research specifically examining this topic.

Commission on Food and Farming

Mr. Jack: To ask the Secretary of State for Environment, Food and Rural Affairs how her Department's budget for the implementation of the Commission on Food and Farming's recommendations is to be spent in each year of its duration. [148441]

Alun Michael: The Government announced a sum of £500 million to implement the Strategy for Sustainable Farming and Food as part of the 2002 Spending Review, in addition to existing spending by Defra and other Government Departments which is already being used to deliver aspects of the strategy.

This sum covers a number of major aspects of the strategy. These include the new Environmental Stewardship Scheme (Entry Level and Higher Level) and the IT system to underpin all the England Rural Development Programme (ERDP) schemes; improvements in livestock traceability and other major animal health and welfare measures; and new food chain initiatives such as the Food Chain Centre and English Farming and Food Partnerships.

The cost breakdown is shown in the table.

£ million

	2003–04	*2004–05*	*2005–06*	*Total*
Additional money to be made available via grant schemes	9	11	11	31
Investment into research and new technology	1.8	1.8	1.8	5.4
Development and implementation of new agri-environment and rural development schemes, including IT development costs	27	54	151	232
Development and implementation of new Whole Farm Approach to reduce bureaucracy and burden on farmers	2.7	7	8	17.7
IT systems to support livestock identification and tracing	20	48	68	136
Investment to reduce the likelihood and impact of an animal disease outbreak	25	45	45	115
Total				537.1

Dairy Farming

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the future economic viability of the dairy industry in the United Kingdom; and if she will make a statement. [148697]

Alun Michael: Low farmgate prices for milk have caused considerable problems over the last few years and the dairy sector faces considerable problems in adjusting to the new conditions that will be created by a reformed common agricultural policy. The Government recognise these difficulties, but believe that the UK dairy sector has a sustainable future and will work alongside the industry to facilitate and support its development in line with its "Strategy for Sustainable Farming and Food". The UK has a comparative advantage in terms of climate, farm efficiency and size over many of its competitors. If the dairy supply chain can work together to maximise this potential and address some of the difficulties it faces, then there is no reason why it should not succeed.

Departmental Staff

Mr. Russell Brown: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of staff employed within her Department are over 55 years of age; and what *(a)* number and *(b)* percentage of staff recruited over the last 12 months are over 55 years of age. [145933]

Alun Michael: I refer the hon. Member to the answer given by my hon. Friend the Minister of State for the Cabinet Office (Mr. Alexander) on 20 January 2004, *Official Report*, column 1130W.

EU Regulations (Fruit)

Sir Teddy Taylor: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the impact on imports of bananas from Commonwealth nations in islands around Jamaica arising from the decision of the Law Lords on the EU regulations relating to the shape of bananas. [147013]

Alun Michael: The House of Lords judgment in the Asda case has no bearing on imports of bananas. It confirms the validity of UK enforcement powers and has no effect on the EU Marketing Standards, whether for bananas or other fruits and vegetables, which are directly applicable under EU law.

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what difference there is in mortality rates in round fish escaping through diamond mesh compared with square mesh. [149131]

Mr. Bradshaw: Experiments to compare the mortality among fish escaping from diamond mesh codends, square mesh codends and diamond mesh codends fitted with square mesh panels have been inconclusive. This is because the techniques used were at an early stage in development. No significant difference in mortality for cod or any other gadoid was evident between the different gears.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the estimated mortality is in immature cod entrained by commercial trawl nets which escape through the mesh. [149129]

Mr. Bradshaw: Experiments conducted by the FRS Marine Laboratory at Aberdeen and other European institutes indicate that the survival of immature cod 25m or more in length escaping from trawl cod-ends is likely to be high (>90 per cent.).

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the primary foods consumed by *(a)* haddock and *(b)* cod in the North Sea are; and what food they consume if their primary foods are not available or in short supply. [149132]

Mr. Bradshaw: Cod feed opportunistically on many species of invertebrates (e.g. worms, molluscs, brittle stars, crabs, shrimps and prawns) and fish (e.g. whiting, cod, haddock, Norway pout, plaice, dab, sprat, herring, and sandeel). Haddock feed similarly on a wide range of invertebrates and a rather narrower range of fish. In young gadoids, invertebrates predominate, but as fish become older the amount of fish in their diet increases. Diets vary very considerably in detail from one place, season or year to another. Cod and haddock may concentrate on one or two individual prey species when these are very abundant, but when such prey become scarce, cod in particular can move and switch from one species to another.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the estimated cod by-catch from the industrial fishing fleet in the North sea was in each of the last five years, broken down by *(a)* percentage and *(b)* tonnage. [149138]

Mr. Bradshaw: The by-catch of cod in industrial fisheries in the North sea comprises a part that is sent for reduction to fishmeal and oil, and a part that is sorted and landed for human consumption. As reported to ICES, these represent less than 1 per cent. of the total quantity of North sea cod landed.

North sea cod: industrial by-catch, in weight and as a percentage of the total international cod landings (ICES, 2003)

	Reduction		*Human consumption*	
	Tonnes	*Percentage*	*Tonnes*	*Percentage*
1998	400	0.27	530	0.36
1999	100	0.10	230	0.24
2000	60	0.08	200	0.29
2001	100	0.20	125	0.25
2002	30	0.06	100	0.19

Ann Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what the scientific expectancy is of fish stock improvement in the North sea following the 10 per cent. cut in the sandeel quota. [146681]

Mr. Bradshaw: The provisions on North sea sandeels agreed at the December Council of Ministers include not only the reduced quota for 2004 but also new effort regulations to improve management of the stock. Sandeels are short-lived, and the state of the sandeel stock itself is very dependent upon this year's "recruitment" of young. Consequently we welcome both the quota and effort restrictions. We attach importance to the effective management of this fishery, and will continue to seek further improvements.

However, the sandeel fishery does affect other fisheries. It does this through the by-catch of other commercial fish (such as haddock and whiting), and through the removal of fish which are prey to other larger fish. Some by-catch is allowed for in the agreed quotas, and ICES reports that the remaining by-catch is small. A reduction in the sandeel fishery was also found to have little effect on the availability of prey to other fish. To sum up, the evidence does not suggest that the sandeel restrictions will have a significant effect on our roundfish stocks, but what effect there is should be to their benefit. However, we do not think that this is the last word on the subject and are continuing to undertake research on the effect of sandeel fisheries.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment her Department's scientists have made of the effect on cod fisheries in the North sea of heavy exploitation of sandeels. [149136]

Mr. Bradshaw: Exploiting sandeels could potentially affect cod through the food chain, or through the by-catch of cod in the sandeel fishery. Work is still in progress on these questions. On the food chain issue,

large scale stomach sampling by ICES shows that cod feed on a wide range of prey species, and that for the North sea as a whole sandeels account for 5–15 per cent. of the diet of cod aged two years and older. At the North sea level, sandeel shortages tend to be short lived, and have not yet been shown to be critical for cod, but the question of more local effects needs further study. On the by-catch issue, small-meshed sandeel fishing occurs in some areas where early stages of cod may settle onto the sea bed, but sampling results officially reported to ICES indicate that the cod by-catch in sandeel landings is very low.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what types of fishing gear are used by the Scottish white fish fleet. [149116]

Mr. Bradshaw: The main types of demersal fishing gear used by the Scottish whitefish fleet are single boat trawl, pair trawl, pair seine, twin trawl. There are few Scottish vessels operating Scottish seines, gillnets or lines.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how the fishing capacity of a vessel is measured in relation to the effect of different engine power between vessels of similar tonnage. [150900]

Mr. Bradshaw: The capacity of fishing vessels is measured both in terms of their tonnage and in terms of their engine power. Engine power is recorded as kilowatts. The ceilings on the overall size of the fleets of each EU member state are defined as separate limits on tonnage and engine power.

For the purpose of licence transfers in the UK the Vessel Capacity Unit is currently used. This is a measure of vessel capacity which is solely related to the physical dimensions of a vessel and its engine power:

VCU = length (m) x breadth (m) + 0.45 x power (KW)

It is thus possible that two vessels of the same tonnage could have different capacities when calculated under this method if there are differences in length, breadth or engine power. The Fisheries Departments in the UK are reviewing the present capacity penalty arrangements with the intention of moving to a system based on tonnage and engine power rather than VCUs.

Common Agricultural Policy

David Davis: To ask the Secretary of State for Environment, Food and Rural Affairs how much money from the Common Agricultural Policy has gone into the Yorkshire and Humber region in each of the past five years. [143305]

Alun Michael: The table shows the payments made by the Rural Payments Agency and its predecessors under the Common Agricultural Policy in the Yorkshire and Humber region in each of the past five European Agriculture Guidance and Guarantee Fund years—16 October to 15 October. The figures quoted for 1999 relate to the period from 1 March of that year when the Agency introduced its new accounting system.

	Amount (£)
1999	147,906,481.89
2000	265,826,830.32
2001	265,162,593.53
2002	254,428,355.91
2003	256,035,777.90

Foot and Mouth

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what conditions have been imposed by the European Commission in respect of the submission of claims for expenditures incurred and payments made by her Department in relation to foot and mouth disease. [150850]

Mr. Bradshaw: The European Commission has been very specific with regards to the timing for the submission of the UK claims, and the type of expenditure eligible for re-imbursement from the Community for eradication of FMD in 2001. Eligible expenditure is detailed in Council Decision 90/424/EC (Article 11) and includes compensation for slaughter of animals; the destruction of milk; the cleaning and disinfection of premises; and the transport and destruction of carcasses.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what specific and general requirements are imposed or otherwise demanded by the European Commission in relation to establishing and proving an audit trail for expenditures incurred and payments made by Her Majesty's Government during the foot and mouth epidemic, in respect of sums repayable in whole or in part by the Commission. [150552]

Mr. Bradshaw: The Commission auditors continue to carry out on the spot checks of the costs incurred during the 2001 FMD outbreak. These checks include the examination of invoices and supporting documentation in line with recognised auditing procedures.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total value is of the claims made by Her Majesty's Government to the European Commission in respect of costs incurred in dealing with the foot and mouth disease epidemic of 2001; and what the total value is of the payments made by the Commission. [150553]

Mr. Bradshaw: The total value of the claims made to the European Commission in respect of costs incurred in dealing with the foot and mouth disease epidemic of 2001 was £1,581 million. The maximum rate of reimbursement is 60 per cent. of these costs; so the potential reimbursement is £949 million.

The Commission's auditors are still auditing the claim and have not indicated when they will complete their audit. To date the Commission has made payments to the United Kingdom of £238 million.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what the cost to date is to her Department of *(a)* auditing and *(b)* legal fees in respect of (i) investigating claims relating to foot and mouth disease payments, (ii) pursuing and prosecuting alleged or suspected fraudulent claims, and (iii) conducting civil actions; [150556]

(2) what the total value is of work undertaken by contractors in respect of works commissioned by her Department and its predecessor, carried out in relation to the foot and mouth epidemic of 2001, that remain unpaid by her Department. [150559]

Mr. Bradshaw: I refer the hon. Member to the answers I gave to the hon. Member for Weston-super-Mare (Brian Cotter) on 6 January 2004, *Official Report*, columns 259–62W.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total payments made to date are to farmers in respect of compensation for animals slaughtered by her Department, and its predecessor, in relation to the foot and mouth epidemic of 2001. [150557]

Mr. Bradshaw: The total payments to farmers to date in respect of compensation for animals slaughtered, by the Department and its predecessor, in relation to foot and mouth disease is £1,033 million.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total value is of the payments due to farmers in respect of compensation claimed for animals slaughtered by her Department in relation to the foot and mouth epidemic of 2001, that remain unpaid by her Department. [150558]

Mr. Bradshaw: The total value of the payments due to farmers in respect of compensation claimed for animals slaughtered in relation to the foot and mouth epidemic of 2001 was £1,033 million. All the farmers have been paid the sums due to them.

Maize Subsidy

Mr. Cousins: To ask the Secretary of State for Environment, Food and Rural Affairs what the present subsidy regime is for maize production; and what the total amount spent on subsidising maize production was in the last three financial years. [149638]

Alun Michael: Maize is among the crops which are eligible for support under the EU support system for producers of certain arable crops, implemented through the Arable Area Payments Scheme (AAPS). In the last three financial years (2001–02 to 2003–04), payments for maize to AAPS claimants in England after modulation are calculated to be £13.5 million.

The EU Common Market organisation for cereals also provides for public intervention for maize and export refunds.

Milk

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the operation of the milk-dairy supply chain. [148693]

Alun Michael: Last year the Milk Development Council commissioned a study by KPMG on "Prices and Profitability in the British Dairy Chain" which highlighted a number of areas where the operation of the dairy supply chain might contribute to low farmgate prices in the UK, including the structure of the UK industry, the low value of the product mix and the low level of product innovation within the UK compared with some member states. The Report also identified a number of areas where supply chain efficiency could be improved, through rationalisation or benchmarking.

Many of these factors are for the industry itself to address. However, the Government can and has taken action to facilitate industry action in line with its Strategy for Sustainable Farming and Food. In particular:

Lord Whitty has chaired meetings of a Dairy Supply Chain Forum, which has been looking at co-operative solutions to improve supply chain efficiency, as well as other issues;

Under the auspices of the Forum, the Milk Development Council has initiated an innovations workshop to look at barriers to innovation in the sector and how to overcome them;

Defra is participating in a further two sub groups of the Forum, which aim to facilitate the long term sustainable development of the dairy supply chain and help it adjust to the new environment created by the reformed CAP;

The Government has made a grant of nearly £0.5m to the Food Chain Centre to examine how to improve dairy supply chain efficiency; and

We have established English Food and Farming Partnerships to encourage co-operation and collaboration across all agricultural sectors.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on fluctuations in the level of the farm gate price of milk in the last 20 years. [148694]

Alun Michael: The fluctuations in the farmgate price of milk over the last 20 years are caused by a number of factors, including the level of supplies, demand on EU and world markets and exchange rates. However, none of these factors are sufficient to explain why UK farmgate prices have been constantly below the EU average with the exception of a few years after deregulation of the milk market in 1994. This question was examined by KPMG in its report on "Prices and Profitability in the GB Supply Chain", which was commissioned by the Milk Development Council and published last year. The Report concluded that low farmgate prices in the UK were largely the product the structure of the UK industry, the low value of the product mix and the low level of product innovation within the UK compared with some Member States. The Report also identified a number of areas where farmgate prices could be improved by increasing supply chain efficiency, through rationalisation or through benchmarking.

Many of these factors are for the industry to address itself, the Government has taken action in line with its Strategy for Sustainable Farming and Food to facilitate industry action. In particular:

Lord Whitty has chaired meetings of a Dairy Supply Chain Forum, which has been looking at collaborative solutions to improve supply chain efficiency, as well as other issues;

Under the auspices of the Forum, the Milk Development Council has initiated an innovations workshop to look at barriers to innovation in the sector and how to overcome them;

Defra is participating in a further two sub groups of the Forum, which aim to facilitate the long term sustainable development of the dairy supply chain and help it adjust to the new environment created by the reformed CAP;

The Government have made a grant of nearly £0.5 million to the Food Chain Centre to examine how to improve dairy supply chain efficiency; and

We have established English Food and Farming Partnerships to encourage co-operation and collaboration across all agricultural sectors.

Organic Farms

Mr. Llwyd: To ask the Secretary of State for Environment, Food and Rural Affairs how many organic farms there were in England and Wales *(a)* in 2000 and *(b)* on the latest date for which figures are available. [150055]

Mr. Bradshaw: The figures are as follows:

	August 2000[1]	*March 2003*[2]
England	1,925	2,622
Wales	401	618

[1] Source: Defra internal record
[2] Source: Defra statistical notice—Stats Org UK1—issued on 28 July 2003

Permitted Killing Methods

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the permitted methods are for killing *(a)* moles and *(b)* rabbits in their runs and burrows. [150574]

Mr. Bradshaw: The information requested is as follows.

(a) Moles

The permitted methods typically used to kill moles in their runs are:

Poisoning using worm baits impregnated with strychnine hydrochloride. This can only be used under a specific authority obtained from Defra.

Poisoning with an approved fumigant (aluminium phosphide)

Trapping. There are there are two main types in common use, the scissor (pincer) trap or metal half-barrel trap (Duffus).

Certain other methods are permitted (for example shooting and live capture traps), but these are not widely used in the UK. Further details and advice on the range of available options for managing mole problems are given in the Defra leaflet WM03 "Moles" which is available online at: www.defra.gov.uk/wildlife-countryside/vertebrates/leaflets.htm.

Guidance on how to apply for permission to use strychnine hydrochloride for mole control is available online at: www.defra.gov.uk/wildlife-countryside/vertebrates/mole.htm.

(b) Rabbits

The permitted methods typically used for killing rabbits in their burrows are:

Poisoning with an approved fumigant (aluminium phosphide or hydrogen cyanide)

Trapping. Traps currently approved by the Spring Traps Approval Order 1995 are the Imbra Trap Mark I and Mark II, Juby Trap, Fenn Rabbit Trap Mark I, Fenn Vermin Trap Mark VI (Multi Purpose), Springer Mark VI (Dual Purpose), Victor Conibear 120–2 and the BMI Magnum 116.

Further details and advice on the range of available options for managing rabbit problems are given in the following Defra leaflets WM01, WM16 and WM17 and in Forestry Commission leaflet FCPN002, which are available online at: www.defra.gov.uk/wildlife-countryside/vertebrates/leaflets.htm.

A full list of approved traps and the relevant conditions of use can be found online at: www.defra.gov.uk/wildlife-countryside/vertebrates/approved-traps.htm

Pesticides

Paul Flynn: To ask the Secretary of State for Environment, Food and Rural Affairs what support the Department provides to the Voluntary Initiative on Pesticides website. [151008]

Alun Michael: Defra provides no support for the website of the Voluntary Initiative on Pesticides.

Mr. Gummer: To ask the Secretary of State for Environment, Food and Rural Affairs what recent discussions *(a)* she and *(b)* her officials have had with the Treasury regarding a tax on pesticides. [150031]

Alun Michael: Providing that it is fully implemented, the industry-led voluntary initiative on pesticides should successfully deliver the reduction in adverse environmental impact of pesticide use to which the Government are committed However, Defra and Treasury officials are continuing to consider options for a tax or other economic instrument should the voluntary initiative fail to deliver agreed objectives within a reasonable timescale. Defra and Treasury Ministers have had no recent discussions on a possible pesticides tax.

Pig Welfare (Poland)

Mr. Gummer: To ask the Secretary of State for Environment, Food and Rural Affairs what evaluation she has made of the pig welfare regulations in force in Poland; how they will change on accession to the EU; and in what respects they *(a)* differ now and *(b)* will differ upon accession from those in force in the UK. [150030]

Mr. Bradshaw: We have made no evaluation of the existing pig welfare rules in Poland. Poland is committed to implementing the EU pig welfare rules in full, by 1 May 2004, into its national legislation. The European Commission is responsible for monitoring how each accession state is progressing in preparing to implement Community law (the 'acquis').

After 1 May 2004, the Commission will continue to monitor Poland's application of the animal welfare acquis, in the same way as it does in existing member states, in order to ensure uniform application of EU legislation.

Poultry

Dr. Starkey: To ask the Secretary of State for Environment, Food and Rural Affairs what information her Department collates on the *(a)* quantity and *(b)* type of (i) therapeutic and (ii) non-therapeutic drugs given to chickens in the UK in the last year. [150218]

Mr. Bradshaw: The Veterinary Medicines Directorate (VMD), an executive agency of Defra, collates and publishes data on an annual basis on the UK sales of veterinary antimicrobials. These data are supplied by industry on a voluntary basis.

In November 2003 the VMD published figures for sales of antimicrobial products used as veterinary medicines, for the year 2002. These indicate that there was a slight decrease in sales of therapeutic antimicrobials indicated for use only in poultry (from 20 tonnes of active ingredient in 2001 to 13 tonnes in 2002). In addition a proportion of the 313 tonnes of active ingredient sold in products authorised for use in more than one species may also have been used in poultry, although it is not possible at this time to quantify this proportion. The figures also show that 250 tonnes of active ingredient of coccidiostats and 27 tonnes of growth promoters were sold. Although these figures have not been broken down by species, the majority of these sales were products authorised only for use in poultry. Full details are available on the VMD's website (www.vmd.gov.uk).

Defra does not collect on a regular basis data on use of other veterinary medicinal products in poultry.

Prosecutions

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs how many prosecutions her Department has initiated in the last 12 months; how many of them resulted in *(a)* a conviction and *(b)* an acquittal; and how many were dismissed by the Court on the grounds of an incompetent prosecution. [148920]

Alun Michael: The Department has commenced 159 prosecutions in the last 12 months:

64 have resulted in convictions.

6 have resulted in acquittals.

89 prosecutions remain outstanding.

None of the prosecutions have been dismissed by the Court on the grounds of "an incompetent prosecution".

US Farm Bill

Mr. Bercow: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions she has had with her counterparts in the United States since the breakdown of the World Trade Organisation ministerial conference in Cancún about the likely impact of the United States' Farm Bill on the *(a)* economies of and *(b)* living standards in, developing countries. [149119]

Mr. Bradshaw: There is on-going contact between UK and US officials about all aspects of the World Trade Organisation (WTO) Round, including on the US Farm Bill. During these discussions we have made clear our opinion that the Bill runs counter to our shared goal, as laid down at Doha, of reducing trade-distorting subsidies in the WTO. While it is difficult to make an accurate economic assessment of the impact that the US Farm Bill might have on the economies and living standards of developing countries, World Bank studies estimate that the comprehensive reform of all aspects of agricultural policies in developed countries could raise the incomes of developing countries by up to $100 billion.

HOME DEPARTMENT

Action on Elder Abuse

Sandra Gidley: To ask the Secretary of State for the Home Department if he will contribute funding to the telephone helpline run by Action on Elder Abuse. [145628]

Dr. Ladyman: I have been asked to reply.

The abuse of vulnerable adults is of great concern to the Government. Since the launch of Action on Elder Abuse in 1993, the Department of Health has used grants to fund both the core functions of the organisation and a variety of specific projects including the telephone helpline. Action on Elder Abuse received just under £160,000 over the three years from 1997–98 to 1999–2000 to help establish and successfully operate the national helpline.

Bids for section 64 funding are currently being considered and will be announced on the normal way.

Advertising Expenditure

David Davis: To ask the Secretary of State for the Home Department what the total expenditure on information campaigns and advertising was for his Department for each year since 2001–02. [145696]

Fiona Mactaggart: The total amount spent on public information campaigns by the Home Office was:

	£ million
2001–02	25.1
2002–03	18.3

This amount includes the cost of Home Office publications and literature, campaign research, creative development and production, as well as the amount spent on advertising media.

The proportion of these totals spent on advertising media was:

	£ million
2001–02	14.4
2002–03	9.9

During 2002–03 our campaigns included the award winning police recruitment campaign an essential part in the successful recruitment of record numbers of police

officers. Other campaigns contributed to a reduction in vehicle crime, the national firearms amnesty and advising parents and children on safe use of the internet.

In 2001–02 our campaigns again focused on police recruitment, vehicle crime and child protection on the internet. We also ran campaigns to support a reduction in drug misuse, and the introduction of postal voting.

Total expenditure for 2003–04 has yet to be finalised.

Asylum Seekers

Tom Cox: To ask the Secretary of State for the Home Department how many *(a)* men and *(b)* women who had entered the United Kingdom from Somalia and who were refused the right to remain were removed from the United Kingdom during 2003. [148069]

Beverley Hughes: Information on the total number of people who are removed from the United Kingdom is not available by nationality and gender, except by examination of individual case-files at disproportionate cost.

Tom Cox: To ask the Secretary of State for the Home Department what the longest outstanding asylum case still awaiting a final decision is; and if he will make a statement. [148954]

Beverley Hughes: Information on individual decisions, up to and including the outcome of all potential appeals, is not readily available and could be obtained only by examination of individual case files. This would incur disproportionate cost.

29,100 cases were awaiting an initial decision at the end of September 2003, the lowest level for more than a decade; of these 8,500 cases were work in progress i.e. the application had been outstanding for six months or less.

Provisional data show that 81 per cent. of applications received in the period April to June 2003 had initial decisions reached and served within two months and that 74 per cent. of applications (excluding withdrawals and third country cases[1]) received in 2002–03 were decided and served within two months. This exceeded the Government's target of 65 per cent. for 2002–03 and was a significant increase on the corresponding figure of 61 per cent. for 2001–02.

Information on the number of asylum applications awaiting initial decision and the timeliness of initial decisions is published quarterly on the Home Office website at: http://www.homeoffice.gov.uk/rds/immigration1.html.

[1] Cases which may be the responsibility of other EU member states under the Dublin Convention.

Tom Cox: To ask the Secretary of State for the Home Department how many people sought *(a)* political and *(b)* religious asylum in the United Kingdom in 2003; how many were granted the right to remain; and how many failed in their applications and were removed. [148955]

Beverley Hughes: The number of people applying for asylum in the United Kingdom during 2003 is not currently available. Provisional data for the number of asylum applications made in 2003 will be published as part of the quarterly asylum statistics on 24 February, on the Home Office Research Development and Statistics Directorate website at: http://www.homeoffice.gov.uk/rds/immigration1.html

Information on the outcomes of asylum applications made in 2003 will be published in the annual Home Office Statistical bulletin 'Asylum Statistics United Kingdom'. It is planned that the annual publication for 2003 data will be published at the end of August 2004.

Tony Baldry: To ask the Secretary of State for the Home Department what estimate he has made of the number of people making asylum applications over the next three years. [149338]

Beverley Hughes: We have already reduced the number of asylum applications by half since October 2002, meeting the ambitious target set by my right hon. Friend, the Prime Minister. Current policy initiatives, such as juxtaposed controls in France and the deployment of detection technology at continental ports, are designed to prevent those who seek to circumvent our controls at specific ports of entry from doing so. Measures in the Asylum and Immigration Bill currently before Parliament—for example, measures aimed at those who deliberately destroy their documents to obstruct the processing of their case—will help deter unfounded claims. Together, these measures will reduce overall numbers still further.

Tony Baldry: To ask the Secretary of State for the Home Department what percentage of those seeking asylum he expects to be housed in accommodation centres pending their applications being determined. [149339]

Beverley Hughes: Accommodation centres will be introduced on a trial basis with a total capacity of up to 3,000 places during the trial period. We cannot predict what proportion this would constitute of the total number of asylum seekers: this will depend on the average length of stay at an accommodation centre, as well as the number of people claiming asylum and the average period it takes to determine their applications.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what provision is in place for asylum seekers delayed from leaving the United Kingdom through no fault of their own, under the Immigration and Asylum Act 1999. [150336]

Beverley Hughes: The current legislation requires that, with the exception of families including children under the age of 18, support for asylum seekers whose claims are unsuccessful must end once a final decision is made on the asylum claim. Families continue to receive support until they leave or fail to comply with directions for their removal. Unsuccessful asylum seekers are expected to leave the country but, where this is not possible due to circumstances entirely beyond the person's control, they may be provided with accommodation under section 4 of the Immigration and Asylum Act 1999. Generally speaking accommodation will be full board since there is no provision for payment of financial support.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what measures are in place to ensure that child asylum seekers are only detained for very short periods prior to removal. [150337]

Beverley Hughes: Unaccompanied minors are not detained other than in one very limited circumstance: where, exceptionally, it is necessary to detain a child while alternative care arrangements are made and, then, normally just overnight.

Families with children may be detained in the following circumstances: initially, while their identities and basis of claim are established; where there are reasonable grounds for believing that they will fail to comply with the conditions of temporary admission or release; or to effect removal. In addition, families whose asylum claims appear to be capable of being decided quickly may be detained as part of a fast-track process.

The detention of families with children is subject to rigorous and frequent review by a central unit within the Immigration and Nationality Directorate (IND). Where detention is for the purpose of effecting the removal of the family concerned its continuation will be authorised only where it is clear that there is a realistic prospect of removal within a reasonable period of time and that satisfactory progress is being made towards removal. If these criteria are not met, further detention is unlikely to be authorised. In the majority of such cases, detention will last for just a few days immediately prior to removal. For those cases where, exceptionally, detention for a longer period is necessary we have introduced a system whereby the detention of any family with children beyond 28 days is subject to Ministerial authority and review. In addition, a senior IND official has been appointed to oversee all detained family cases to ensure that there are no administrative barriers to speedy case progression.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what progress has been made in ensuring consistent standards in removal centres. [150339]

Beverley Hughes: It is clearly important for standards across the immigration removal estate to be more consistent and we are working to ensure that this is the case.

All removal centres are already required to operate under the Detention Centre Rules 2001, which regulate the operation and management of removal centres and the treatment of detained persons.

In addition, a comprehensive set of Operating Standards are in the process of being developed and issued to all removal centre operators. These Operating Standards set out the minimum requirements expected of operators. It is, of course, open to individual operators to exceed these minimum requirements or, where no single approach is stipulated, to select the most appropriate means of meeting a particular standard in the centre concerned. The individual standards are subject to extensive consultation. To date, Operating Standards have been issued on the following subjects: activities (adults and children); catering; complaints and requests procedures; female detainees; health care; race relations; religion; suicide and self-harm; temporary confinement; and use of force.

Dr. Tonge: To ask the Secretary of State for the Home Department what assessment is made of the needs of children before they go to detention centres. [149823]

Beverley Hughes: The general needs of children are considered when a decision to detain a family is made and when the family is taken into detention. Once detained, rule 11(3) of the Detention Centre Rules 2001 requires removal centre operators to provide everything reasonably necessary for detained persons' protection, safety and well-being and for the maintenance and care of infants and children.

Families with children are currently detained at either Dungavel or Tinsley House Removal Centres or Oakington Reception Centre. In all cases they are accommodated in dedicated family rooms within the centre so as to ensure that family members are not separated and, so far as practicable within the constraints of detention, are able to maintain family life. These centres are well equipped and the staff that work there are well qualified to recognise children's needs and where necessary ensure special provision is made.

At Dungavel, where there is a well-established education provision for school-age children, all children are assessed when they arrive to establish their learning needs. We have recently announced our intention to enhance these assessments and introduce contingency curriculum arrangements for children in longer term detention.

Dr. Tonge: To ask the Secretary of State for the Home Department what provision is made for children to be educated in detention centres. [149825]

Beverley Hughes: Removal centres that may hold families with children for anything more than a few days are required to have arrangements in place to provide educational classes to the children concerned. At present, this relates only to Dungavel Immigration Removal Centre and Oakington Reception Centre. The education provision at Dungavel is well established. Classes run every day throughout the week for all school age children. A range of subjects is covered including English, maths, science, food technology and history. Music and art are also provided. The position at Oakington is different in that the need for educational provision has arisen only comparatively recently and is in the process of being developed.

Correspondence

Tony Lloyd: To ask the Secretary of State for the Home Department when he will reply to the letters from the hon. Member for Manchester, Central dated *(a)* 19 August 2003 re Mr. N. reference 0/985393 and *(b)* 28 August 2003 re: Mr. AA, reference PO 13028/3. [148510]

Beverley Hughes *[holding answer 19 January 2004]:* The information is as follows:

(a) A reply was sent to my hon. Friend on 16 January 2004.

(b) I wrote to my hon. Friend on 26 January 2004.

Mr. Salmond: To ask the Secretary of State for the Home Department when he intends to reply to the letter dated 8 December 2003 from the hon. Member for Banff and Buchan regarding asylum seekers in Scotland. [149777]

Beverley Hughes: I wrote to the hon. Member on 23 January 2004.

Mr. Salmond: To ask the Secretary of State for the Home Department when he intends to reply to the letter dated 31 October 2003 from the hon. Member for Banff and Buchan regarding his constituent, Mr. G Christie of Fordyce. [149779]

Beverley Hughes: I wrote to the hon. Member on the 22 January 2004.

Criminal Justice Board (Gloucestershire)

Mr. Drew: To ask the Secretary of State for the Home Department if he will list the membership of the local Criminal Justice Board in Gloucestershire and indicate the bodies represented. [144017]

Paul Goggins: The members of the Gloucestershire Local Criminal Justice Board are:

Member	*Body represented*
Tim Brain	Chief Constable (Chair)
John Carter	Chief Officer, National Probation Service, Gloucestershire
Withiel Cole	Chief Crown Prosecutor
Alan Davies	Justices' Chief Executive, Magistrates Courts
David Gentry	Group Manager, the Court Service
Enid Castle	Representing Gloucestershire Police Authority
Phil Kendrick	Gloucestershire County Council Youth Services
David Chalmers	Her Majesty's Prison Service

Drug-related Crime

Mr. Hoyle: To ask the Secretary of State for the Home Department if he will make a statement on the level of drug-related crime in *(a)* the North West, *(b)* Lancashire and *(c)* Chorley; and what the cost of drug-related crime was in each area in each of the last three years. [149966]

Caroline Flint: Recorded crime figures include statistics on drugs offences, such as possession, and on acquisitive crimes, such as burglary, but do not record whether the latter are related to an offender's drug habits.

The NEW-ADAM research programme of interviewing and drug testing those arrested by the police sheds some light on the links between drugs and crime, although the conclusions do not relate specifically to Lancashire and the North West region. Data from eight locations (1999–2000) indicated that more than three-fifths (by value) of acquisitive crime was committed by users of both heroin and cocaine/crack.

The total number of acquisitive crimes recorded by the police in Lancashire and the North West region in 2002–03 are set out in Table 1 as follows (data are not available for Chorley). Acquisitive crimes are burglary, theft, handling stolen goods and robbery.

Table 1: Acquisitive crimes recorded by the police, 2003–03

	Number
Lancashire	89,993
North West	588,566

Source:
"Crime in England and Wales 2002–2003" Home Office Statistical Bulletin 07/03.

Estimates of the costs of drug-related crime are not available annually or broken down by region. However, a recent study published by the Home Office provides estimates of the total economic and social costs of Class A drug use and puts these in the range of £10.1 to £17.4 billion for the year 2000. These costs include the costs of drug-related crime, which are estimated to fall in the range £8.8 to £15.8 billion. The costs of drug-related crime include victim costs and those accruing to courts, prisons and other parts of the criminal justice system.

Entry Clearance

Mr. Lidington: To ask the Secretary of State for the Home Department how many appeals against refusal of entry clearance from Pakistan by *(a)* spouses, *(b)* fiancées, *(c)* dependent children and *(d)* dependent elderly relatives are being processed by his Department; what the average time taken in the last 12 months was between receipt of papers from UK Visas and papers being sent to the Independent Appellate Authority; and if he will make a statement. [145402]

Beverley Hughes: I regret that the information on the number of appeals against refusal of entry clearance by nationality is not currently available in the form requested. Appeals against refusal of entry clearance are not sent to UK Visas but go directly to the Appeals Processing Centre (APC) and then to the Immigration Appellate Authority (IAA). Data on the average time taken between receipt of papers by the APC and being sent to the IAA are not currently available.

Statistics on the total numbers of refusals of entry clearance are published annually. The latest publication, Control of Immigration: Statistics United Kingdom 2002, is available on the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Roma

Mr. Paice: To ask the Secretary of State for the Home Department what estimate he has made of the numbers of members of the Roma community who will migrate into the UK from Eastern Europe after enlargement of the EU on 1 May. [150821]

Beverley Hughes *[holding answer 26 January 2004]*: Research conducted by University College London for the Home Office, published in June last year ("The impact of EU enlargement on migration flows", Home Office On-Line Report 25/03), estimates that the numbers of people expected to migrate to the UK from the new member states in the years following enlargement will not be significant. The research corroborates a number of other independent studies, which have been summarised in reports by the European Commission in 2000 and the former Department for Education and Employment in 1999. It is based in part

on experience of previous EU enlargements, where the large increases in migration flows predicted before enlargement did not materialise.

None of this research has been able to predict exact numbers expected from specific countries or ethnic groups to the UK. However, Roma would have been included in the overall numbers.

Citizens of the new member states who come to the UK will work, contribute to the economy, and pay taxes. The Habitual Residence Test will ensure that no one can simply come here and claim benefits. Powers to deport are available where non-British EU citizens commit offences.

Enlargement should also improve the quality of life for all citizens in the new member states as their governments must enforce human rights and minority rights, including protection against racial discrimination, to EU standards before accession and subsequently. EU accession should also improve economic prospects in the new member states so reducing the incentive for economic migration.

If, contrary to the available evidence, there is a large influx of workers posing a real threat to UK jobs, we will be able to re-introduce restrictions. We will of course be monitoring the situation closely.

Fines

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what assessment he has made of the reasons for non-collection of fines. [150355]

Mr. Leslie: I have been asked to reply.

There are a number of reasons why, in the past, the collection of fines has not been as effective as it should have been. They include: imposing fines that do not reflect the ability to pay due to lack of information on offenders' income/expenditure; lack of information on offenders' current whereabouts; and a lack of an alternative for those who genuinely cannot pay.

This is being addressed through the seven point action plan I announced in June last year, the Courts Act 2003 measures, and the overall enforcement programme being taken forward by the Department for Constitutional Affairs. These are specifically designed to tackle the root causes of non-collection and secure sustained improvement in fine enforcement performance.

Immigration Appeals

Mr. Malins: To ask the Secretary of State for the Home Department how many presenting officers were in post on 1 October in each of the last four years. [143357]

Beverley Hughes: The number of presenting officers in post and available to present appeals at adjudicator hearings is shown in the following table:

	Number of officers in post
13 November 2000	202
1 October 2001	192
1 October 2002	233
1 October 2003	279

A recruitment exercise is currently under way and a further 65 presenting officers will be in post by mid March 2004.

Medicines (Disposal)

Ian Lucas: To ask the Secretary of State for the Home Department how many *(a)* prosecutions and *(b)* convictions there have been in the last five years for the offence of theft of *(a)* controlled drugs and *(b)* time-expired pharmaceuticals from sites disposing of NHS waste. [150440]

Caroline Flint: The information collected centrally on court proceedings does not allow the theft of drugs to be distinguished from other thefts, nor are details of the location of thefts collected.

Penalty Points

Mrs. Iris Robinson: To ask the Secretary of State for the Home Department whether an individual can receive penalty points in respect of more than one driving offence committed on the same day. [148949]

Caroline Flint: Where more than one offence involving obligatory endorsement is committed on the same occasion, the total number of penalty points to be attributed is the number that the most serious offence would attract. Two or more offences committed on the same day but not on the same occasion would attract points separately. It would be for the police, the Crown Prosecution Service and courts to decide whether the different offences amounted to separate incidents or whether they were part of the same continuing incident.

Police Guidelines

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department (1) whether amendments made by the Association of Chief Police Officers to their media and disciplinary guidelines are publicly available; [143464]

(2) what amendments have been made, following agreement with the Association of Chief Police Officers, to the media and disciplinary guidelines issued to police forces. [143480]

(3) whether anonymity will be granted to those accused of sexual offences if they have learning difficulties. [143481]

Paul Goggins: This matter was debated during the passage of the Sexual Offences Act 2003.

The Government believe that informed and strengthened guidance to the police and the media is preferable to legislation.

Following discussions between the Association of Chief Police Officers and officials the updated Media Advisory Group Guidance Notes have given greater prominence to this issue. They underline that suspects should not be named before charge and go on to highlight the possible dangers of doing so. The Guidance Notes are available to the public and can be viewed on the website www.acpo.police.uk.

Prisons (Foreign Nationals)

Mrs. Brooke: To ask the Secretary of State for the Home Department what procedures are in place to ensure that the Immigration Service *(a)* monitors the sentences of foreign national prisoners, with particular reference to those liable to deportation and *(b)* takes action to ensure repatriation or deportation takes place as soon as a prisoner's sentence has expired. [151082]

Beverley Hughes *[holding answer 26 January 2004]*: HM prisons are instructed to notify the Immigration and Nationality Directorate (IND) of all foreign nationals sentenced to a term of imprisonment, together with their release dates once calculated.

IND then considers whether a person should be deported or removed and it is our aim, wherever possible, to remove such persons in line with their release from custody.

There are, however, reasons why this may not happen in a particular case. These may include such factors as the need to consider an appeal or application for leave to remain, the non-availability of travel document, difficulties with travel arrangements or other matters which have to be considered or addressed before the deportation or removal can be effected.

IND and the Prison Service work closely together and with individual inmates to keep any delays in effecting removal to a minimum.

Racist Incident Reporting Form

Mr. Chope: To ask the Secretary of State for the Home Department if he will place in the Library a copy of the standardised multi-agency racist incident reporting form. [150875]

Fiona Mactaggart *[holding answer 26 January 2004]*: The minimum data content for the standardised multi agency racist incidents reporting form is in the Code of Practice on reporting and recording racist incidents. This is currently in stock in the Library.

Risk of Sexual Harm Orders

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department for what reasons his Department deems it unnecessary to be required to report to Parliament the numbers of risk of sexual harm orders that are issued on an annual basis. [150126]

Paul Goggins: The Home Office will monitor the use of risk of sexual harm orders (RSHOs) but, as was stated in the response to the Home Affairs Committee's report on the Sexual Offences Act 2003, we do not feel that there is any need for the number of such orders to be reported annually to Parliament. In common with the other civil preventative orders in Part 2 of the Act, statistics will be collected on the number of RSHOs taken out each year and this information will be available if requested.

Terrestrial Trunked Radio

Mr. Chidgey: To ask the Secretary of State for the Home Department which recommendations of the National Radiological Protection Board report on health and safety issues of terrestrial trunked radio have been implemented. [149177]

Ms Blears *[holding answer 22 January 2004]*: The Home Office took expert advice from the National Radiological Protection Board (NRPB) independent Advisory Group on Non-ionising Radiation (AGNIR) on the health aspects of TETRA technology. The AGNIR experts concluded that on the basis of current evidence, it was unlikely that TETRA posed a hazard to health. They also made a number of recommendations for further research on remaining areas of uncertainty. No research on masts was suggested. The AGNIR recommendations have been taken forward by the Mobile Telecommunications Research Programme and by the Home Office. Regularly updated information is available at www.homeoffice.gov.uk/docs/tetra.html.

Terrorism

Mr. Hancock: To ask the Secretary of State for the Home Department pursuant to his answer of 15 January 2004, *Official Report*, column 894W, on the Terrorism Act, if he will break down, by region, the stops and searches carried out since 2001 under section 44 of the Terrorism Act 2000; what reasons were given for using these powers; and what assessment he has made of the reasons for the increases. [150329]

Mr. Blunkett: A breakdown of stop and searches by Police Force area under section 44(1) and section 44(2) of the Terrorism Act 2000 for the financial years 2001–02 and 2002–03 is provided in the table. This is taken from information published in the Home Office Statistical Bulletin.

Stop and Searches under Section 44(1) or (2) may only be exercised for the purposes of searching for articles of a kind which could be used in connection with terrorism. The decision to authorise use of the powers is made against the background of the current threat level and the assessment of the risk to any designated or whole force area.

The increase in stops and searches can be attributed to an increase in general security throughout the year following September 11 (2001).

[1] Stops and searches of vehicles and occupants and pedestrians are not separately available for 2002–03

Mr. Oaten: To ask the Secretary of State for the Home Department what meetings have been held since 25 June of the pilot group tasked with taking forward the recommendation adopted at the EU Justice and Home Affairs Council in Brussels on 28 and 29 November 2002 in relation to terrorist profiling; and what was discussed at those meetings. [143380]

Caroline Flint: The informal pilot group held its second workshop on terrorist profiling at the headquarters of Europol on 24 November 2003, with United Kingdom representation. This meeting was essentially a stock take, as the research needed to inform this long-term and complex project is ongoing.

Visa Requirement

Mr. Tynan: To ask the Secretary of State for the Home Department if he will introduce a visa requirement for all non-EEA nationals entering the UK in the course of business, where the prime purpose of that entry is to engage in anti-trade union activities. [149578]

Beverley Hughes: We have no plans to introduce a specific visa requirement for those seeking entry to engage in anti- trade union activities. However, the Immigration Rules contain provision for the refusal of entry to a person where it is judged that their presence in the United Kingdom is not conducive to the public good. This would allow for the refusal of a person where their character, conduct or associations made their entry undesirable.

Yarl's Wood Removal Centre

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department when the findings of Mr. Stephen Shaw's investigation into the management of Yarl's Wood Removal Centre will be published; and how they will be made available. [150190]

Beverley Hughes: The timing of the completion of the inquiry into the allegations of racist behaviour and attitudes among staff at Yarl's Wood Removal Centre is a matter for Stephen Shaw. However, we understand that Stephen Shaw would hope to complete his inquiry and report his findings as soon as possible. The report will be published although the details of exactly how this will done have yet to be determined.

Youth Justice System

Mr. David Stewart: To ask the Secretary of State for the Home Department when consolidating legislation to create consistent definitions and terminology within the youth justice system will come into effect. [145173]

Paul Goggins: We have no plans to make consolidating legislation on youth justice.

We published on 8 September a consultative document "Youth Justice—The Next Steps" as a companion document to the main Green Paper "Every Child Matters". In "Youth Justice—The Next Steps" we set out a number of proposals, including clarification of the purpose of sentencing a juvenile, and simplification of sentencing. The consultation period ended on 1 December and we are currently analysing the responses. Some of our proposals, if taken forward, will require legislation. This would be brought forward as soon as Parliamentary time permits.

SCOTLAND

IRA Terrorism

Mr. Barnes: To ask the Secretary of State for Scotland on which dates terrorist incidents ascribed to the IRA have taken place in Scotland since 1973. [142753]

Mrs. McGuire: I refer my hon. Friend to the answer given by my right hon. Friend the Home Secretary, on 11 December 2003, *Official Report*, column 618W.

Post Office/Banking Services

John Thurso: To ask the Secretary of State for Scotland what recent discussions he has held with *(a)* the Royal Bank of Scotland, *(b)* Halifax Bank of Scotland and *(c)* Clydesdale Bank concerning the provision of banking services in the Post Office; and if he will make a statement. [150396]

Mrs. McGuire: I plan to meet representatives from the Royal Bank of Scotland in the next month to discuss a range of issue affecting the banking sector.

The three banks mentioned currently allow access to basic bank accounts through the Post Office branch network, but have not agreed to extend this access to other accounts. While the Government would urge all banks to provide their customers with access to their accounts through Post Offices, decisions to do so are commercial ones for individual institutions.

John Thurso: To ask the Secretary of State for Scotland what assessment he has made of the impact on the Scottish rural post office network of three of the major Scottish banks not offering full bank services at the Post Office; and if he will make a statement. [150397]

Mrs. McGuire: I have made no such assessment. Decisions on whether to extend access to full banking services at Post Offices are commercial ones for individual institutions.

Public Expenditure

Sir Nicholas Winterton: To ask the Secretary of State for Scotland when he last made a needs-based assessment of public expenditure levels in Scotland. [149630]

Mrs. McGuire: My right hon. Friend has made no such assessment. The details of the funding arrangements were set out in the "Statement of Funding Policy", published by the Treasury in July 2002. The Government have no plans to change the Barnett formula.

Sir Nicholas Winterton: To ask the Secretary of State for Scotland when he next plans to conduct a needs-based assessment of public expenditure levels in Scotland; and whether he anticipates that such an assessment would conclude that current levels are *(a)* higher, *(b)* lower or *(c)* the same as current needs. [149631]

Mrs. McGuire: My right hon. Friend has no plans to conduct an assessment. The details of the funding arrangements were set out in the "Statement of Funding Policy", published by the Treasury in July 2002. The Government have no plans to change the Barnett formula.

Sewel Motions

Annabelle Ewing: To ask the Secretary of State for Scotland if he will list Sewel motions passed by the Scottish Parliament since 26 June 2003 that apply to his Department's responsibilities and legislation he has sponsored. [148749]

Mrs. McGuire: As part of its responsibility for Scotland's devolution settlement, the Scotland Office is involved as necessary in discussions between Government Departments and the Scottish Executive on the application of the Sewel Convention, providing advice in line with Devolution Guidance Note 10. My right hon. Friend the Secretary of State for Scotland has not sponsored any legislation that has been the subject of a Sewel motion.

Solectron Dunfermline

Mr. Beggs: To ask the Secretary of State for Scotland what sums have been paid to the Solectron plant in Dunfermline; and whether funds will be offered to Solectron Dunfermline to assist the relocation of work being carried out by Solectron Carrickfergus. [151004]

Mrs. McGuire: Issues relating to financial assistance to industry were devolved under the Scotland Act and now fall within the responsibility of the Scottish Executive.

TREASURY

Banking Supervision

Keith Vaz: To ask the Chancellor of the Exchequer how many complaints have been received concerning banking supervision in each of the last three years. [151063]

Ruth Kelly: The Financial Services Authority is responsible for banking supervision. The Financial Services and Markets Act 2000 required an arrangement for the investigation of complaints against the FSA to be established. Accordingly, the FSA's Complaints Scheme was introduced with effect from 3 September 2001.

The following table sets out the number of complaints received under the Financial Services Authority's complaints scheme concerning an alleged failure to supervise deposit taking institutions.

	Complaints received
3 September to 31 December 2001	0
Calendar year 2002	1
Calendar year 2003	2

Benefit Fraud

Mr. Webb: To ask the Chancellor of the Exchequer how many staff in his Department have been *(a)* investigated, *(b)* suspended, *(c)* dismissed, *(d)* prosecuted and *(e)* convicted for involvement in benefit fraud in each of the last six years; and what the amounts involved were in each of these categories listed. [151461]

Ruth Kelly: None.

Economic Survey

Mr. Martyn Jones: To ask the Chancellor of the Exchequer what assessment he has made of the paper, "Economic Survey-United Kingdom 2004", published by the Organisation for Economic Co-operation and Development. [150884]

Ruth Kelly: The OECD's assessment of the UK economy was published on 20 January 2004. The Government welcome the report and notes the positive assessment of the performance of the economy over the past few years.

Financial Services Authority

Mr. Flight: To ask the Chancellor of the Exchequer pursuant to the answer to the hon. Member for East Worthing and Shoreham (Tim Loughton) of 14 January 2004, *Official Report*, column 816W, on the Financial Services Authority, for which firms the Financial Services Authority has reduced fees; by how much; which fees these were; and when. [151090]

Ruth Kelly: The Financial Services Authority (FSA) reduces fees for all firms in those areas of business where fines have been levied. It received £100,000 in financial penalties in the financial year 2001–02. This was applied

to the benefit of fee-payers in fee block A.7 (fund managers), reducing the fees for all firms in this fee block paid in 2002–03 by 0.5 per cent. of those fees.

The FSA received £9,169,000 in financial penalties in the financial year 2002–03. It applied this amount to the benefit of fee-payers in six fee blocks. In fee block A.1 (deposit-acceptors) there was a reduction of 1.5 per cent. of the 2003–04 fee, in fee block A.4 (firms conducting insurance activities subject to both prudential and conduct of business regulation) a reduction of 3.1 per cent., in fee block A.7 (fund managers) a reduction of 1.7 per cent., in fee block A.12 (advisory arrangers dealers or brokers (holding or controlling client money and/or assets)) a reduction of 29.0 per cent., in fee block A.13 (advisory arrangers, dealers or brokers (not holding or controlling client money and/or assets)) a reduction of 3.1 per cent., and in fee block A.16 (Pensions Review levy firms) a reduction of 11.6 per cent.

Public Finances

Mr. Redwood: To ask the Chancellor of the Exchequer what action the UK is planning to address the Government deficit mentioned in COM (2004) 29. [151490]

Ruth Kelly: The projections for the public finances presented in the 2003 pre-Budget report show that the Government remain on track to meet their strict fiscal rules over the economic cycle on the basis of cautious assumptions, with public finances remaining sustainable in the long term.

Furthermore, the UK continues to meet a prudent interpretation of the Stability and Growth Pact, that takes into account debt and long-term fiscal sustainability more generally, the need for public investment, and the economic cycle.

Infant Mortality

Tim Loughton: To ask the Chancellor of the Exchequer how many children under the age of one year have died suddenly in each of the last 10 years; and what main reasons have been attributed to those deaths in the most recent of those years. [151094]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Mr. John Pullinger to Mr. Tim Loughton, dated 27 January 2004:

The National Statistician has been asked to reply to your recent question on how many children under the age of one year have died suddenly in each of the last 10 years; and what main reasons have been attributed to those deaths in the most recent years. I am replying in his absence. (151094)

Information collated at death registration does not generally indicate duration of the conditions leading to death. It is therefore not possible to identify all sudden deaths. However, for any infant death where the certifier mentioned "sudden infant death" or related term e.g. "cot death" or "sudden infant death syndrome", these figures are published as "sudden infant deaths". These figures are shown in the table below. Because of the method used to identify these deaths no further information is available on the reasons attributed to these deaths.

Sudden infant deaths—England and Wales 1993–2002

	Numbers	*Rates*[1]
1993	458	0.68
1994	454	0.68
1995	398	0.61
1996	424	0.65
1997	393	0.61
1998	289	0.45
1999	280	0.45
2000	246	0.41
2001	240	0.40
2002[2]	187	0.31

[1] Rate per 1,000 live births.
[2] Provisional.

Information Technology

Mr. Allan: To ask the Chancellor of the Exchequer what audit mechanisms are in place to determine whether information technology *(a)* hardware and *(b)* software products are being used properly in his Department. [150931]

Ruth Kelly: The information requested is as follows:

Inland Revenue

There is a full right of access for audit (including National Audit Office) and security interest across the whole of the Inland Revenue and the IT supplier. This enables the reviewing bodies to fully cover any area of risk as determined by their work planning processes.

All major new computer projects or enhancements have to provide an audit trail of all computer activity by users. IA monitors activity to detect potential fraud and misuse. There is a standard set of audit checks carried out over these developments in order to ensure compliance with all legal and departmental requirements and IA has a seat on the project steering committee to ensure appropriate consideration is given to audit findings.

IA has a specialised computer audit team of qualified professionals who carry out a programme of technical audits over the provision of IT services both hardware and software. They use an international computer audit standard (CoBIT) to risk assess the services and to measure provision against a set of detailed controls. All findings are reported to the responsible senior manager and followed up to ensure appropriate action.

Overall, IA and DSU have a direct reporting line to the Departmental Audit and Security Committee to raise issues that are high risk or that IA/DSU consider are not being addressed adequately by managers.

As already referred to, National Audit Office also carry out pieces of review activity across the Partnership and often work in joint teams with IA and/or DSU.

HM Treasury

The Treasury uses a combination of line management overview and procurement scrutiny to determine whether information technology hardware and software products are being used properly in the Department. These are supported by internal audit and security reviews wherever appropriate. Staff identified as making unacceptable use of IT will be subject to disciplinary procedures.

There are two overarching controls over the use of IT in the Treasury: the Departmental IT strategy which sets the tone for the use of IT, and the annual Business Planning and Budget Planning round which subjects all proposals to high-level business scrutiny.

Further down the line, all IT purchases, whether hardware or software, are required to be supported by a business case to ensure that there is a formal requirement by the Department for the facilities. After implementation, the Treasury has guidelines (promulgated to all staff) on the acceptable use of information technology. Certain rules are enforced (e.g. construct and length of passwords and enforced screen savers) and firewalls are used to protect HMT systems from attack, to protect staff from unwanted correspondence (spam) and to disable unacceptable internet web access.

In general, line managers are responsible for enforcing the acceptable use of IT facilities provided to their staff. However, they have access to the resources of the departmental internal audit and security teams to investigate specific incidents. There are also more general internal audits of IT themes and running contract arrangements to ensure that processes are sound, efficient and effective. The Department is required to conform to Government security regulations and is subject to security audits to ensure that it remains compliant.

HM Customs and Excise

Guidance and standards are published covering the procurement, development and use of IT hardware and software. HM Customs and Excise has developed a single approach to the management of business change—the Business Change Lifecycle. This covers all stages of IT system development and is aligned with the OGC Gateway Review process. It identifies the stages and products that must be produced to comply with the HMCE standards. Once implemented the use of hardware and software is controlled through security standards and acceptable use policy.

It is the responsibility of all managers to ensure that the IT systems provided to their staff are used in accordance with the guidance and standards, although additional assurance mechanisms are in place. Managers can call upon the services of our Internal Investigation Division to investigate specific incidents. Compliance is also monitored through an internal assurance programme which contributes to the annual Statement of Internal Control. Our Internal Audit Division also provides assurance over the operation of IT systems through their annual programme of audits. Systems are selected for examination based on a risk assessment, and take account of the significance and materiality to achieving the Department's business objectives. In addition, external audit is carried out by the NAO. Their audit programme includes IT security and specific controls for key systems.

Mr. Allan: To ask the Chancellor of the Exchequer what cost savings have been made in his Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151044]

Mr. Boateng: A Centre of Excellence was established within HM Treasury, Inland Revenue and HM Customs and Excise in June 2003 to integrate the essential functions which underpin the successful delivery of all types of acquisition based programmes and projects. As cost benefits will not accrue until improvements start to take effect, it is too early to measure cost savings. All Centres of Excellence are currently developing future plans and as part of this process measurement of savings will be defined.

Public Bodies

Keith Vaz: To ask the Chancellor of the Exchequer who the members of the *(a)* Financial Services Authority and *(b)* VAT and Duties Tribunal were on 1 January; what their term of office is in each case; and what their remuneration is. [151459]

Ruth Kelly: The information is as follows:

(a) Financial Services Authority

As of 1 January 2004. the members of the FSA Board were:

Member	*Position*
Callum McCarthy	Chairman
Stewart Boyd	Deputy Chairman, Non-executive Director
John Tiner	Chief Executive
Moira Black	Non-executive Director
Tom de Swann	Non-executive Director
Kyra Hazou	Non-executive Director
Michael Foot	Executive Director
Deirdre Mutton	Non-executive Director
Sir Andrew Large	Non-executive Director
Dr. Shamit Saggar	Non-executive Director
Steve Thieke	Non-executive Director
Clive Wilkinson	Non-executive Director

The Chairman is formally appointed to the FSA board for five years and other members for three years. Reappointment is possible for non-executive directors. Executive directors have renewable three year terms of office which coincide with the length of their executive posts at the FSA. Information on the remuneration of board members is published in the FSA annual report. The latest available information is for 2002–03 when the then Chairman received £385,730, Deputy Chairman £45,000, Non-executive directors £20,000 and executive directors between £293,452 to £361,904.

For a list of members of the VAT and duties tribunal, I refer the hon. Gentleman to the answer given to him by the Paymaster General on 3 July 2003. The only changes to the membership since then are that Gordon Burnison and Roger Cockfield are no longer members of the panel. Members are appointed for a standard term of five years, at the end of which they may be considered for re-appointment. Members are remunerated a standard fee of £227 for each day sitting.

CULTURE, MEDIA AND SPORT

Heritage Lottery Funding

Mr. Hoyle: To ask the Secretary of State for Culture, Media and Sport how much Heritage Lottery funding

has been awarded to each Lancashire district in each of the last five years. [150410]

Estelle Morris: Figures by district are not available. The following is the information by local authority:

Local authority	Financial year 1998–99	1999–2000	2000–01	2001–02	2002–03	Total for the last five financial years
Burnley	11,550	1,119,000	99,300		64,657	1,294,507
Chorley	221,450	—	28,500	926,600	43,662	1,220,212
Fylde	—	—	329,000	100,000	36,000	465,000
Hynburn	—	221,500	—	24,000	—	245,500
Lancaster	—	153,400	329,000	1,746,500	60,630	2,289,530
Pendle	47300	250,000	50,000	—	996,000	1,343,300
Preston	90000	103,548	149,800	2,070,500	485,690	2,899,538
Kibble Valley	—	156,000	77,200	15,400	—	248,600
Rossendale	248,500	—	—	—	165,000	413,500
West Lancashire	—	—	—	—	972,500	972,500
Wyre	28,300	—	144,600	—	—	172,900

Information Technology

Mr. Allan: To ask the Secretary of State for Culture, Media and Sport what audit mechanisms are in place to determine whether information technology *(a)* hardware and *(b)* software products are being used properly in her Department. [150937]

Mr. Caborn: The Department has a range of auditing and monitoring systems in place to ensure that hardware and software are used in accordance with the Department's policies. We have inventory management systems in place for both hardware and software and a metering system monitors all software use. The Department is a corporate member of FAST, the Federation Against Software Theft.

All internet access is logged along with all e-mail. Systems are configured such only authorised software may be installed. All staff sign the Department's Acceptable Use Policy before being allowed access to the Department's IT systems and resign it on an annual basis thereafter. Our procedures are audited both by the Department's own internal audit function and by independent external auditors on a regular basis.

Mr. Allan: To ask the Secretary of State for Culture, Media and Sport what cost savings have been made in her Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151053]

Mr. Caborn: The Department has established a Centre of Excellence and is working with its sponsored bodies to ensure that IT procurement is effectively managed. It is too early at present to identify any savings that have accrued.

Royal Family

Mr. Rosindell: To ask the Secretary of State for Culture, Media and Sport what estimate she has made of the contribution to the economy in terms of revenue from tourism generated by the Royal Family in each of the last three years. [150200]

Mr. Caborn: We have no rigorous basis on which to estimate the contribution to the economy in terms of revenue from tourism generated by the Royal Family, but that contribution is certainly substantial.

Significant recent events include the Golden Jubilee in 2002, which proved to be a big draw for visitors from around the world, and the Royal Tourism Day in June 2003.

In addition to such contributions, some of Britain's most popular attractions are directly associated with the Royal Family, including Buckingham Palace, the Tower of London, Windsor Castle, Hampton Court, the Palace of Holyroodhouse and most recently Clarence House. The Palace and the Tower of London are named more than any other attractions by overseas visitors to London, with about a third of them planning to visit them. The biggest free attraction is the Changing of the Guard at Buckingham Palace which is a 'must see' on most visitors' itineraries.

Royal Parks Constabulary

Chris Grayling: To ask the Secretary of State for Culture, Media and Sport when she plans to brief employees of the Royal Parks Constabulary about the details of its proposed merger with the Metropolitan police and the implications for their terms and conditions. [150290]

Mr. Caborn: The Government have been unable to find the parliamentary time to bring forward legislation to merge the Royal Parks Constabulary (RPC) with the Metropolitan Police Service (MPS) during the current parliamentary session. It remains our intention to do so at the earliest possible opportunity. In the meantime we are working closely with the MPS and have provided extra funding to establish from 1 April an MPS Operational Command Unit within the Parks to work alongside the RPC to ensure the Parks continue to be policed effectively. The Chief Executive of The Royal Parks wrote to all RPC staff on 16 January to bring them up-to-date with these plans.

Stonehenge (Parker Plan)

Mr. Key: To ask the Secretary of State for Culture, Media and Sport what discussions *(a)* her Department and *(b)* English Heritage have had with the proposers of the Parker Plan for road construction near Stonehenge. [149882]

Estelle Morris *[holding answer 26 January 2004]:* None. In accordance with paragraph 19(1) and (2) of Schedule 1 to the Highways Act 1980, the Highways

Agency on behalf of the Secretary of State for Transport published a notice directing that anyone who intended to submit an alternative route to the draft Orders for the A303 Trunk Road (Stonehenge Improvement) should do so by 19 December 2003. An alternative, locally known at the 'Parker Plan or Parker Route', has been received and will be considered before an independent inspector at the public inquiry.

UK Sport

Mr. Hawkins: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the recent decisions made by UK Sport concerning *(a)* the departure of leading officials in sports administration and *(b)* sports funding. [150641]

Mr. Caborn *[holding answer 26 January 2004]:* UK Sport recently made the following announcements:

(a) Richard Callicott has stood down as Chief Executive. Liz Nicholl was appointed in his place, with effect from December 2003.

(b) UK Sport recently announced changes in its sport funding arrangements. 10 sports have been agreed across the Sports Councils as being of UK wide significance from participation through to success.

The aim is to support the 10 sports in the development of a One Plan, providing more effective linkages between their UK and home country governing bodies.

This approach will provide sports with a simplified funding process and help foster improved co-ordination, communication and consultation between UK and home country governing bodies and their partners.

CABINET OFFICE

Civil Service Pensions

Mr. Chope: To ask the Minister for the Cabinet Office if he will take action to ensure that payments of civil service pensions by Capita Hartshead to retired civil servants resident in France enjoy the same rate of exchange as payments of the state pension; and if he will make a statement. [150877]

Mr. Alexander: The rate of exchange for payments in overseas currency is determined by the UK banks responsible for the conversion. The rates offered on any one day may vary from bank to bank, and within each bank depending on the terms and conditions applicable to each customer. However, in view of the relative volume of payments to state pensioners resident overseas, it is unlikely that any bank would offer exactly the same terms and conditions to an occupational pension scheme as those agreed for the state scheme.

The bank responsible for converting overseas payments for occupational pension schemes administered by Capita Hartshead regularly monitors its rates against those offered by competitors, including those responsible for converting payments for other occupational pension schemes, to ensure it offers a competitive service.

INTERNATIONAL DEVELOPMENT

Angola

John Barrett: To ask the Secretary of State for International Development what representations he has made to the Government of Angola about ensuring *(a)* greater transparency in the management of oil revenues and *(b)* that oil revenues are focused on social programmes in that country. [150111]

Hilary Benn: The UK Government are active in promoting greater transparency in oil revenue management in Angola, including through the Extractive Industries Transparency Initiative launched by the Prime Minister at the 2002 World Summit on Sustainable Development. We are currently in discussions with the Angolan Ministry of Finance on providing technical support so that Angola can develop and adopt legislation to implement the Initiative.

The UK is also supporting the World Bank's programme to promote greater transparency in the Angolan oil industry. Specifically, DFID is funding an oil expert to take part in the Bank's Public Expenditure Management and Financial Accountability Review (PEMFAR). The results of this review should help clarify financial relationships between the Government, the Central Bank and the state oil company Sonangol. It will also make recommendations on how Angola can adopt transparent, internationally accepted practices in oil revenue management. Finally, the UK is demonstrating its commitment to strengthening Angolan civil society by supporting a coalition of national NGOs active in advocating on transparency issues including oil revenue management.

Greater fiscal transparency in Angola is only one element in ensuring that more public resources are spent on reducing poverty. With this in mind, DFID funded an economist to help prepare Angola's first ever three-year macro-economic framework which has since been incorporated into the recently published Angolan draft Poverty Reduction Strategy Paper (PRSP). The macro-economic framework income is assisting the Government to plan spending increases in the social sectors.

The UK will continue to work with the Government and people of Angola to ensure that greater transparency in oil revenue management is converted into tangible programmes for poverty reduction.

John Barrett: To ask the Secretary of State for International Development how many Angolan refugees in Zambia he estimates will reject the voluntary repatriation programme; and what assessment he has made of the impact this will have on *(a)* the humanitarian requirements in Zambia and *(b)* the humanitarian requirements in Angola. [150108]

Hilary Benn: The Office of the United Nations High Commissioner for Refugees (UNHCR) estimate that at 30 November 2003 there were a total of 167,184 Angolan refugees in Zambia.

Under their voluntary repatriation programme, UNHCR estimate that 20,000 Angolans refugees would be repatriated in 2003 and 40,000 in 2004. It is too early to predict how many will reject the voluntary repatriation programme. This will become clearer during the course of 2004, and in the light of UNHCR's discussions with the Government of Zambia over the rights of Angolans to remain in Zambia legally.

Burundi

John Barrett: To ask the Secretary of State for International Development pursuant to his answer of 19 January 2004, *Official Report*, column 929W, on Burundi, what assessment he has made of the levels of cholera in the Cibitoke region of Burundi since December 2003. [150103]

Hilary Benn: My previous answer was based on information available at that time from the World Health Organisation (WHO). Since then the WHO in Bujumbura has reported 127 cases of cholera, including four deaths in Cibitoke Province since 5 December 2003. The situation is now under control with only one case reported in the past week.

WHO has also reported that during the past two weeks there have been 35 reported cases of suspected cholera including one death in the province of Bururi. WHO are assessing the situation.

Congo

Mr. Bercow: To ask the Secretary of State for International Development if his Department will *(a)* arrange and *(b)* fund a delegation of senior former Members of Parliament to the Democratic Republic of the Congo to advise on democracy building. [149192]

Hilary Benn: We are in discussion with Members of the Congolese Parliament, groups outside Parliament and the Westminster Foundation here, about the best ways in which the UK can support the strengthening of democracy during the transition in the DRC. For example, we are just beginning an important project with the Electoral Institute of Southern Africa to help develop frameworks for political party development and the democratic functioning of the Parliament. We are also currently considering support to the constitutional process, and possible visits by Congolese politicians to other countries to focus on particular issues of interest. We will keep in view whether a visit by senior former Members of Parliament would be a priority activity for democratic development in the DRC during the short transitional period.

John Barrett: To ask the Secretary of State for International Development what assessment he has made of the ability of the Democratic Republic of Congo to hold a general election in 2005; and if he will make a statement. [150109]

Hilary Benn: The Electoral Assistance Division of the UN Department of Political Affairs recently completed a feasibility study to assist the transitional Congolese authorities to identify a comprehensive set of options for organising and conducting elections in 2005. The objective is to ensure that the transitional government receives the support necessary to enable it to hold a successful general election at that stage. Experts from the European Commission are also advising the government on options, in consultation with the rest of the international community. DFID is participating in these discussions.

Iraq

Mr. Swayne: To ask the Secretary of State for International Development what amounts were spent by his Department on *(a)* reconstruction of civilian infrastructure and *(b)* humanitarian relief in the first 100 days following the end of high intensity military operations in Iraq. [150222]

Hilary Benn: In the first 100 days after military operations, DFID pledged £100 million to the United Nations Consolidated Appeal. Of this, £65 million was allocated to specific humanitarian programmes including £16 million to the reconstruction of civilian infrastructure. In the same period, DFID committed £32 million to the Red Cross and £6 million to NGOs for humanitarian relief.

Mr. Carmichael: To ask the Secretary of State for International Development how much of the money pledged by the UK Government at the Madrid Conference has been *(a)* allocated to reconstruction projects in Iraq and *(b)* remains uncommitted; and how much money his Department plans to spend in Iraq in each of the next five years. [151156]

Hilary Benn: To date, DFID has committed £220 million towards humanitarian and reconstruction work in Iraq, £188 million of which has been allocated to specific activities.

At the Madrid Conference in October, the UK made a total financial pledge towards Iraq's reconstruction of £544 million for the three years from April 2003. That figure included £38 million as our share of projected European Community spending in Iraq.

In the current financial year, DFID and other Government Department spending is expected to total £312 million, including £23 million as our share of EC spending. Future UK contributions to Iraq reconstruction are expected to be £134 million in 2004–05 and £98 million in 2005–06. Of these figures, the DFID programme for Iraq reconstruction is expected to account for £91 million and £86 million respectively. The balance is made up of the UK share of currently agreed European Community aid, and other UK Government programmes including the Global Conflict Prevention Pool which is jointly managed by DFID, the Ministry of Defence and the Foreign and Commonwealth Office.

No decisions have yet been taken on spending on Iraq beyond 2005–06.

Nigeria

John Barrett: To ask the Secretary of State for International Development what assessment he has made of the supplies of anti-retroviral drugs in Nigeria; and what steps he will take to assist in the event of a shortfall. [150113]

Hilary Benn: Supplies of anti-retroviral (ARV) drugs in Nigeria are critically low. Most hospitals have run out of ARVs over the past months. This is due to delays in

the release of Government funds, and because over 14,000 people were started on a treatment programme designed for 10,000.

In order to address the situation, President Obassanjo recently approved an extra £2 million for ARVs, and a supply contract is currently being awarded. It is expected that the Global Fund will provide £25 million worth of ARVs, and further supplies have been promised by the United States and the World Health Organisation.

However, ensuring reliable ARV treatment is not just a question of supply, it is also about strengthening the health system. The Nigerian Health Minister has developed an excellent strategy for reform of the health sector' which DFID plans to support. We are in addition providing £1 million to the National Action Committee on AIDS, which is coordinating the national response.

Preferential Access

Mr. Bercow: To ask the Secretary of State for International Development what assessment he has made of the European Commission proposal that the G20 be invited to give preferential access to products from the poorest countries. [146600]

Mr. Mike O'Brien: I have been asked to reply.

All exports from least developed countries (LDCs), with the exception of arms, currently enjoy duty and quota free access to the European Union market under the Everything-but-Arms argument (EBA). Other G8 countries have similar but less extensive arrangements.

The Government fully supports the commitment by the World Trade Organisation, made in the Doha Declaration in November 2001, to seek an agreement with 'the objective of duty-free, quota-free market access for products originating from LDCs', and the further commitment 'to consider additional measures for progressive improvements in market access for LDCs'. We encourage all members of the World Trade Organisation to deliver on that commitment.

South Africa

Mrs. Curtis-Thomas: To ask the Secretary of State for International Development what measures are in place to provide the poorest families of South Africa with *(a)* water, *(b)* power and *(c)* health facilities. [150343]

Hilary Benn: Since the democratic elections in 1994, the South African Government has made extending services to the poor a priority. Their recent review of progress over the last 10 years concludes that much has been achieved while recognising that more remains to be done.

Since 1994, 8.4 million people have gained access to water, and the government has introduced a Free Basic Water policy under which poor households are entitled to 6,000 litres of water per month free of charge. 3.8 million households have been connected to the electricity grid and the Free Basic Electricity policy entitles poor households to 50 kilowatt hours of electricity per month free of charge. Free access to primary health care has been introduced and investment in health infrastructure has increased significantly.

Sunset Clauses

Mr. David Stewart: To ask the Secretary of State for International Development if he will make a statement on his policy on the use of sunset clauses in legislation; and which Acts containing such clauses relevant to his Department were passed in each year since 1997. [149333]

Hilary Benn: The Department for International Development actively promotes the better regulation agenda and the use of sunsetting where appropriate. Two Acts of Parliament have been sponsored by DFID since 1997. They are the Commonwealth Development Corporation Act 1999 and the International Development Act 2002. Neither contained sunset clauses.

Zimbabwe

John Barrett: To ask the Secretary of State for International Development if he will make a statement on malaria levels in Zimbabwe. [150107]

Hilary Benn: In recent months, reported numbers of malaria cases and malaria deaths have been close to the seasonal average. However, the risk of a serious worsening of the malaria situation is increasing owing to incomplete coverage of routine prevention measures and inadequate stocks of antimalarial drugs as the rainy season progresses and the peak season for malaria approaches.

The ability of the Zimbabwe Ministry of Health and Child Welfare to control malaria is currently threatened by lack of staff and lack of access to foreign currency for purchase of insecticides and drugs. Zimbabwe is one of the countries that benefits from a grant of £17.3 million over six years provided by DFID to the Africa Regional Office of the World Health Organisation for the purpose of accelerating action to control malaria and childhood illness.

PRIME MINISTER

Iraq

Mr. Stephen O'Brien: To ask the Prime Minister pursuant to the answer of 21 January 2004, *Official Report*, column 1319, on Iraq, when he was first informed of the lack of chemical filters on the tanks and armoured vehicles; what action he took as a result, and when; and when he was informed of the inability of tank crews and crews of other armoured vehicles to wear their personal NBC kit when in their tanks and armoured vehicles. [151432]

The Prime Minister: In the first instance, issues of this kind are for force commanders in theatre. Troops are trained to operate armoured vehicles wearing their personal NBC equipment, irrespective of whether the vehicle has a collective NBC protection system.

Parliamentary Questions

Mr. Andrew Mitchell: To ask the Prime Minister if he will instruct the Office of the Deputy Prime Minister to answer named day questions on the day specified. [150236]

The Prime Minister: I refer the hon. Member to the answer the Under-Secretary of State, the Office of the Deputy Prime Minister gave to him on 26 January.

Vice-chancellor (Buckingham University)

Mr. Andrew Turner: To ask the Prime Minister pursuant to his Oral Answer of 21 January to the right hon. and learned Member for Folkestone and Hythe (Mr. Howard), if he will *(a)* name the publication from which or person from whom he sourced the quotation from the vice-chancellor and *(b)* make a statement on the accuracy of the vice-chancellor's quotation. [151473]

The Prime Minister: The quotation was taken from an article published in *The Guardian* on Friday 12 December 2003. Copies have been placed in the Library in the House.

FOREIGN AND COMMONWEALTH AFFAIRS

Iraq

5. **Laura Moffatt:** To ask the Secretary of State for Foreign and Commonwealth Affairs what progress is being made towards democratic elections in Iraq. [150691]

Mr. Straw: We are committed to the establishment of a democratic Iraq. On 15 November 2003, the Iraqi Governing Council announced a process for achieving this. This envisages the creation of a sovereign transitional government by 30 June 2004, the holding of direct elections to a Constitutional Convention by March 2005, and, following approval of the constitution, the holding of full democratic elections by the end of 2005. The UN Secretary-General has agreed to consider sending a technical team to Iraq to examine the feasibility of holding elections to the Transitional National Assembly, a move which we welcome.

A committee of the Governing Council drafted the Statute for the Special Tribunal with assistance from, among others, the Coalition Provisional Authority (CPA) Office of Human rights and Transitional Justice. The UK provided comments on the Statute through the UK Special Representative for Iraq's office and the CPA Office of Human Rights and Transitional Justice. Our comments and advice were focused mainly on the application of international law and the scope of the Tribunal. This drew on the experience of our involvement in other Tribunals including the ICTY, ICTR and Sierra Leone. The UK is considering requests for further assistance.

Mr. Challen: To ask the Secretary of State for Foreign and Commonwealth Affairs what the total value is of *(a)* contracts so far issued to British companies working on the reconstruction of Iraq and *(b)* contracts expected to be issued in the next six months. [150608]

Mr. Mike O'Brien: British companies have won significant sub-contracts for the reconstruction process in Iraq. However, most of the contracting authorities in Iraq do not publish information on contracts awarded, and companies are not required to notify HMG of contracts won. I am unable to give a total value for contracts awarded to UK companies.

The Program Management Office of the Coalition Provisional Authority (CPA) will run an open tender process; a number of UK companies are bidding. Sub-contracting opportunities are also likely to arise from this process.

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has *(a)* to second (i) electoral registration officers and (ii) other officials and *(b)* to provide resources to enable the Iraqi Governing Council to facilitate free and fair elections; and if he will make a statement. [150216]

Mr. Rammell: At a meeting in New York on 19 January between the Iraqi Governing Council and the coalition, Kofi Annan undertook to consider sending a UN technical team to Iraq to look into the feasibility of holding elections. Once we have seen their recommendations, we will consider any requests for assistance.

Israel

18. **John Robertson:** To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he is taking to encourage *(a)* the Israeli Government to dismantle settlements in the Occupied Territories and *(b)* the Palestinian Authority to prevent further suicide attacks in Israel. [150704]

Mr. Rammell: The Government regularly presses the Israeli Government to freeze settlement activity and dismantle outposts in line with Israel's commitments under the Roadmap.

We also reiterate at every opportunity the need for the Palestinian Authority to take visible steps to degrade terrorist capabilities. My noble Friend the Baroness Symons of Vernham Dean did so in the Occupied Territories on 21–23 January.

Richard Burden: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the information bulletin being issued to foreign nationals arriving in Israel which informs them that they now require written prior authorisation from the Israeli Government to visit territories under the control of the Palestinian Authority and that failure to obtain such authorisation many result in legal action being taken against them by Israel. [149886]

Mr. Rammell: We are aware of the information bulletin, which has been issued to foreign nationals arriving in Israel, and are seriously concerned at the possible impact of such restrictions on media, humanitarian organisations, and civil society groups operating in the Occupied Territories. We have raised our concerns with the Israeli Government, and are exploring with our EU partners further avenues for doing so.

As Foreign and Commonwealth Office travel advice makes clear, we still advise against travel to the West Bank and Gaza, along Israel's border with Lebanon, and close to the Israeli side of the Israel/Gaza border.

Richard Burden: To ask the Secretary of State for Foreign and Commonwealth Affairs what mechanisms the Israeli Government used to consult the United Kingdom before issuing warnings to British citizens and other foreign nationals arriving in Israel that entry to territories

under the control of the Palestinian Authority is now forbidden without written prior authorisation from the Israeli Government and stating that entry to those territories without such written authorisation may result in legal action being taken; and what representations he is making to Israel on the issue. [149935]

Mr. Rammell: The Israeli Government did not consult directly with the United Kingdom about the entry changes referred to in warnings to foreign nationals arriving in Israel. We have raised our concerns with the Israeli Government, about the possible impact of such restrictions on media, humanitarian organisations, and civil society groups operating in the Occupied Territories, and are exploring with our EU partners further avenues for doing so.

Richard Burden: To ask the Secretary of State for Foreign and Commonwealth Affairs whether there are alternative entry points to those controlled by the Israeli military for British passport holders visiting territories under the administration of the Palestinian Authority; and what assessment he has made of the implications for the freedom of movement of British passport holders of the introduction by Israel of regulations forbidding foreign nationals entry to Palestinian territories without written prior authorisation from the Israeli Government and stating that entry to those territories without such written authorisation may result in legal action being taken. [149940]

Mr. Rammell: There are no alternative entry points to the Occupied Territories to those covered by the new regulations. We have raised our concerns with the Israeli Government about the possible impact of such restrictions on media, humanitarian organisations, and civil society groups operating in the Occupied Territories, and are exploring with our EU partners further avenues for doing so.

Richard Burden: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he plans to have with his EU counterparts about the introduction by Israel of regulations forbidding foreign nationals entry to territories under the control of the Palestinian Authority without written prior authorisation from the Israeli Government. [150132]

Mr. Rammell: The Government have raised the issue of changes to entry regulations for the Occupied Territories with fellow EU members. They share our concerns about the possible impact of such restrictions on media, humanitarian organisations, and civil society groups operating in the area. We have raised our concerns with the Israeli Government and are exploring with our EU partners further avenues for doing so.

Guantanamo Bay

19. **Mr. Lazarowicz:** To ask the Secretary of State for Foreign and Commonwealth Affairs what progress is being made in securing proper judicial process for the prisoners at Guantanamo Bay. [150706]

Mr. Mullin: The focus of the Government's discussions with the United States Administration has been on how to resolve the position of the British nationals detained at Guantanamo Bay. All legal proceedings against the British detainees are currently suspended. The Government have made clear to the United States our view that any trial procedure the British detainees may face must be fair and meet generally recognised principles.

The position on the Government's discussions with the US remains as the Prime Minister explained to the House on 7 January.

> "Talks are continuing on the issue...I hope that we will shortly be able to tell the House how the issue will be handled."

Hamdi Acikgoz

20. **Mr. Allen:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the application by Mr. Hamdi Acikgoz, in Istanbul, for a visa to visit the United Kingdom. [150707]

Mr. Mullin: As my hon. Friend is aware I cannot disclose details of individual entry clearance cases. I am therefore withholding the information requested under Exemption 5 of Part II of the Code of Practice on Access to Government Information. I wrote to my hon. Friend about this case on 23 December. I would be happy to discuss it further with him privately.

Occupied Territories

21. **Richard Burden:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has received concerning restrictions on movement within and into the Occupied Palestinian Territories by *(a)* Palestinians and *(b)* foreign nationals; and if he will make a statement. [150708]

Mr. Rammell: We have received a number of representations from MPs, Peers, non-governmental organisations and members of the public concerning restrictions on movement within and into the Occupied Territories for both Palestinians and foreign nationals. Palestinian Minister of Foreign Affairs, Nabil Sha'ath, also raised his concerns about the impact of the fence, which contributes to curtailed freedom of movement, with the Foreign Secretary on 8 January.

We remain deeply concerned about the consequences for freedom of movement into and within the Occupied Territories for Palestinians and foreign nationals resulting from Israeli actions, including the imposition of curfews and closures, construction of the fence and introduction of access controls, including permits. We continue to call on the Government of Israel to do all it can to ease movement restrictions. We have raised the recently introduced entry regulations with the Israeli government and are exploring with our EU partners further avenues for doing so.

The Netherlands

22. **Mr. Andrew Turner:** To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Dutch Government on prospects for a referendum in the Netherlands on a proposed European Constitution; and if he will make a statement. [150709]

Mr. MacShane: I have regular discussions with my EU counterparts on a wide range of aspects of the IGC. The question of whether to hold a referendum on

the Constitutional Treaty is a matter for individual governments themselves, according to their constitutional traditions.

As I have made clear in the House before, we have no plans to hold a referendum.

Palestinian Authority

23. **David Cairns:** To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Palestinian Authority concerning terrorism. [150710]

Mr. Rammell: We regularly discuss the security situation with our contacts at all levels in the Palestinian Authority.

Most recently, my noble Friend the Baroness Symons of Vernham Dean discussed the need for the Palestinian Authority to fulfil its roadmap commitments on security, and intensify its efforts to tackle groups and individuals engaging in terrorist activity when she visited the Occupied Territories on 21–23 January.

Burma

24. **Mr. Luke:** To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the political situation in Burma. [150711]

Mr. Mike O'Brien: We remain concerned about the political situation in Burma. Although the Burmese regime's plans for a National Convention are a step forward, the process needs to be inclusive and transparent, involving representatives from the democratic opposition and the ethnic groups. Convention participants must be allowed full freedom of speech, movement and political activity. As a first step Daw Aung San Suu Kyi and her NLD colleagues must be fully released and NLD offices re-opened.

Civil Servants

Dr. Cable: To ask the Secretary of State for Foreign and Commonwealth Affairs how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150287]

Mr. Rammell: The Foreign and Commonwealth Office occupies a total of 54,558 square metres in central London, and 3,116 square metres in Greater London.

Ethiopia/Eritrea

John Barrett: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the outcome of the visit by the Parliamentary Under-Secretary of State to Ethiopia and Eritrea. [150112]

Mr. Mullin: I visited Ethiopia and Eritrea from 13 to 19 January. My programme included meetings with President Isaias of Eritrea and Prime Minister Meles of Ethiopia. We discussed a range of issues, including the border dispute between the two countries. I stressed the importance of avoiding any return to war, implementing the Boundary Commission decision, and building confidence between the two parties by the establishment of a dialogue.

European Constitution

Mr. Austin Mitchell: To ask the Secretary of State for Foreign and Commonwealth Affairs in what form minutes were taken of the Intergovernmental Conference on the European Constitution; who took them; to whom they are available; and where they are available. [150196]

Mr. MacShane: No minutes were taken of any meetings during the Intergovernmental Conference (IGC), although the Italian presidency published revised Treaty texts following some of the meetings. These are available on the Italian presidency website: www.ueitalia.it The European Council Conclusions issued by the Italian presidency are the only formal statement of progress in the IGC to date.

European Union

Mr. Spring: To ask the Secretary of State for Foreign and Commonwealth Affairs what his Department's position is on the United Kingdom's rebate in the context of the negotiations on the EU's multi-annual financial framework; and if he will make a statement. [150781]

Mr. MacShane: Initial discussion of the next financial perspective should begin next month, after the Commission publishes its future financing communication. The current financial perspective expires at the end of 2006, and the Government look forward to the successful negotiation of a new financial perspective, for the period beginning in 2007. The Government believe that the rebate remains fully justified as a fair means of redressing the UK's disproportionate high net contribution to the EC Budget.

Andrew Selous: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to implement the transitional restrictions which the UK can apply in regard to the nationals of the EU accession countries. [151067]

Mr. MacShane: Under the EU Accession Treaty, nationals of Cyprus and Malta have the same rights to work in another member state as are currently enjoyed by nationals of the existing member states. However, nationals of the Czech Republic, Estonia, Latvia, Lithuania, Hungary, Poland, Slovenia and Slovakia ("the eight relevant states" are subject to transitional provisions.

Under the transitional arrangements, until 30 April 2006 member states are free to apply national measures or bilateral agreements restricting the rights of nationals from the eight relevant states to work in their country. From 1 May 2006, member states must either grant these nationals the right to move freely for the purpose of work in accordance with Community law, or continue to apply national measures or bilateral agreements. Any grant of this right may, however, be subject to suspensions if the member state undergoes or foresees disturbances to its labour market which could seriously threaten the standard of living or level of employment in a particular region or occupation Such suspensions may last, at the latest, until 30 April 2011.

In line with its announcement of December 2002, the Government intend to grant citizens of the eight relevant states the right to work freely in the UK labour market from 1 May 2004. Section 2 of the EU (Accessions) Act 2003 provides a power to make regulations to give effect to this decision. The Immigration (European Economic Area) Regulations 2000 (S.I. 2000/2326), which currently implement Community law rights of European Economic Area (EEA) nationals to enter and reside in the UK, will be applied to nationals of the eight relevant states as they apply to nationals of the EEA.

From accession the Government will be monitoring the effect of their decision on the UK labour market. In the unexpected event of a large influx of workers to the UK, which seriously threaten the level of employment or standard of living in a particular region or occupation, there are safeguards available to re-impose restrictions on workers. The Government could, in the normal way, re-impose restrictions on some or all of the eight relevant states by repealing or suspending the application of any regulations made under the Act and could exclude nationals of one or more of the eight relevant states from the right to work in the UK under powers contained in the Act.

Genocide

Rev. Martin Smyth: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the international community is taking to prevent crimes of genocide. [151157]

Mr. Rammell: The creation of the International Criminal Court (ICC) on 11 March 2003 is an important step forward by the international community to prevent genocide, crimes against humanity and war crimes. The court has jurisdiction over crimes committed since 1 July 2002. The UK is a strong supporter of the court. Our objective is to work for global ratification of the ICC Statute so that the court enjoys the widest possible remit.

I am attending the Stockholm Forum on the Prevention of Genocide from 26–28 January 2004, at which more than 30 states will discuss possible measures to prevent genocide. The UK is supporting the Forum Declaration, which seeks to build consensus around how the international community can best carry forward this agenda.

Gibraltar

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Government policy on Gibraltar. [150432]

Mr. MacShane: I refer the hon. Member to the answer I gave to the hon. Member for East Worthing and Shoreham (Tim Loughton) on 16 December 2003, *Official Report*, column 1417.

Information Technology

Mr. Allan: To ask the Secretary of State for Foreign and Commonwealth Affairs what audit mechanisms are in place to determine whether information technology *(a)* hardware and *(b)* software products are being used properly in his Department. [150933]

Mr. Rammell: The Foreign and Commonwealth Office uses a number of means to determine whether its IT is being used properly. These include:

constantly monitoring activity on the IT infrastructure system, Firecrest, including access to websites, and following up any unusual activity;

information systems audits by our internal audit department;

requiring all IT users to read and complete an annual certificate of compliance with the security operating procedures; and

checks by IT security advisers that security operating procedures are being followed.

Post implementation reviews are conducted after a project to deliver new IT has finished, to assess whether the expected benefits are being achieved. The way the system is being used is one aspect of this assessment.

Mr. Allan: To ask the Secretary of State for Foreign and Commonwealth Affairs what cost savings have been made in his Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151050]

Mr. Rammell: The Foreign and Commonwealth Office's (FCO) Centre of Excellence was established in June 2003 in accordance with Office of Government Commerce guidelines. It has had a positive impact in improving programme and project management across the FCO, but cost savings cannot be calculated at this early stage.

International Criminal Court

Mr. David Atkinson: To ask the Secretary of State for Foreign and Commonwealth Affairs what the *(a)* budget and *(b)* UK contribution to the budget for the International Criminal Court (i) is for the current year and (ii) will be for each of the next five years; and if he will make a statement. [150219]

Mr. Rammell: The total International Criminal Court (ICC) budget for the calendar year 2004 is approximately £39.5 million. The UK is expected to contribute some 11 per cent. of this sum i.e. approximately £4.3 million.

The ICC budgets for the next five years have yet to be set. The Court has not yet reached its full establishment and its caseload also remains an unknown budgetary factor.

The United Kingdom nevertheless remains committed to maintaining the strictest possible budgetary control and ensuring the ICC makes the most effective use of the funds at its disposal.

The United Nations' scales of assessments, on which the UK contribution is based, are recalculated every two years and follow the general principle of capacity to pay. We would not expect great fluctuation in this rate.

Libya

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what new resources he is committing to assist Libya is undertaking the disarmament and dismantling of its weapons of mass destruction and related research and production infrastructure. [147027]

Mr. MacShane: We have made it clear that we are prepared to offer assistance with the dismantlement of Libyan programmes, but at this stage it is impossible to quantify what resources it may be necessary to commit. There are already a number of sources of funding for global co-operative threat reduction programmes. If it is necessary to allocate additional resources in order to assist Libya in the destruction of its weapons programmes we will do so, as we believe that money spent on reducing the threat posed by weapons of mass destruction is money well spent.

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs when Her Majesty's Government first confirmed that Libya was developing nuclear weapons contrary to its commitments under the Nuclear Non-Proliferation Treaty (NPT); when the United Kingdom informed the governments of the two other depository states for the NPT of its knowledge of Libya's breach of its NPT commitments; when the United Kingdom first informed *(a)* the Director General and *(b)* board members of the International Atomic Energy Agency of its knowledge of Libya's nuclear programme; and what information he has collated on the suppliers of Libya's nuclear weapons programme. [147029]

Mr. MacShane: We have had concerns for some time about Libya's nuclear programme and first raised the matter in the course of discussions with the International Atomic Energy Agency (IAEA) in late 2001, and again in mid 2002. Libya is now in contact with the IAEA and it will be for Libya to make a national declaration providing the full details of its programme to the IAEA. The IAEA will then proceed to verify the extent and nature of Libya's covert nuclear activity. Only the IAEA, acting within its remit can underwrite Libya's commitment to stop this activity. We are working in close co-operation with both the Libyan authorities and the IAEA to move this process forward.

Overseas Territories

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent communications he has had with the governments of the *(a)* overseas territories and *(b)* crown dependencies. [150424]

Mr. Rammell: My right hon. Friend the Foreign Secretary addressed and exchanged views with Chief Ministers and Government leaders of the UK Overseas Territories at the annual Overseas Territories Consultative Council meeting in London on 10 December 2003.

He has had no recent communications with the crown dependencies. My right hon. Friend the Secretary of State for Constitutional Affairs is responsible for the United Kingdom's relations with the crown dependencies.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs how often he communicated with the governments of Britain's overseas territories in the last three years. [150428]

Mr. Rammell: My right hon. Friend the Foreign Secretary visited Gibraltar in May 2002, and has been in direct contact with the Chief Minister on several occasions over the last three years. He communicated directly with the governments of the other overseas territories when he addressed Chief Ministers and their equivalents at the annual Overseas Territories Consultative Council in London on 10 December 2003.

I maintain regular contact with the overseas territories as does my hon. Friend the Minister for Europe as Minister of State responsible for Gibraltar. Governors, of course, are in constant contact with the governments of the overseas territories.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what the cost of administering Britain's overseas territories is in 2003–04. [150430]

Mr. Rammell: According to the published, audited 2002–03 Foreign and Commonwealth Office (FCO) Resource Accounts, available in the Library of the House, the total cost of supporting the overseas territories in 2002–03 was approximately £21 million (ref: Objective 9, Schedule 57 FCO Resource Accounts). This is the full economic cost of supporting the overseas territories, and represents the cost of the total effort expended at post/missions and in the UK of supporting the overseas territories. The costs in 2003–04 are expected to be about the same.

It is not possible to quantify the costs to other Government Departments of their role in administering the overseas territories.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to visit overseas territories over the next year. [150431]

Mr. Rammell: Overseas engagements for my right hon. Friend the Foreign Secretary and other Ministers are kept under constant review. It is not practice to announce such visits until they are firm. Because of the unpredictable nature of world events, final decisions on overseas visits are often not possible until very shortly before the day of travel.

I visited Ascension Island and the Falkland Islands in November 2003, and I hope to visit others in the future. My hon. Friend the Minister for Europe visited Gibraltar in July 2003.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the London office of the governments of *(a)* the Falkland Islands, *(b)* Gibraltar and *(c)* the Cayman Islands during the last 12 months. [150433]

Mr. Rammell: My right hon. Friend the Foreign Secretary has had no direct discussions with the London offices of the governments of the Falkland Islands, Gibraltar or the Cayman Islands during the last 12 months. The Foreign Secretary addressed the Overseas Territories Consultative Council in December 2003, which the London representatives attended.

I met the London representatives at the Overseas Territories Consultative Council last December. The London representative of the Falkland Islands Government also attended a meeting between myself and Falkland Island Councillor Richard Cockwell in June 2003. I will have a further opportunity to meet the representatives at a lunch prior to the UK Overseas Territories Association AGM next month.

State Visits

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what plans he has to accompany Her Majesty the Queen on State visits in the next two years; [150387]

(2) what overseas visits are planned for Her Majesty the Queen during the next two years. [150390]

Mr. Straw: Her Majesty The Queen announced in her Gracious Speech at the State Opening of Parliament that she is to make a State Visit to France from 5 to 7 April 2004 to mark the official start of events commemorating the Centenary of the Entente Cordiale. I will accompany her on that visit.

At the Anglo/French summit on 24 November 2003, Her Majesty was invited by President Chirac of France to attend the 60th anniversary commemoration of the Normandy Landings on 6 June.

Beyond that, the forward programme of visits by Her Majesty is not yet finalised. In the normal course of events I would accompany Her Majesty on State Visits, as I did on Her Majesty's State visit to Nigeria in December 2003.

Ukraine

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what records *(a)* his Department has and *(b)* have been released on the extent to which the Department was aware of the scale of loss of life as a result of Soviet policy in the Ukraine in 1932–33; whether all relevant documentation has been released; and if he will make a statement. [150926]

Mr. MacShane: Records relating to Soviet policy in the Ukraine in 1932–33 are contained in the archives of the Foreign Office's then Northern Department. There are approximately 65 files, all of which have long been in the public domain at The National Archives. No papers have been withheld from these files. Indeed, some documents pertaining to the famine were published in the FCO's official series "Documents on British Foreign Policy 1919–39" in 1958 (Series II, Volume VII).

UN Security Council Resolution 1325

Joan Ruddock: To ask the Secretary of State for Foreign and Commonwealth Affairs what his policy is in relation to UN Security Council Resolution 1325, with particular reference to Iraq and Afghanistan. [150773]

Mr. Rammell: The United Kingdom is committed to working towards the full implementation of UN Security Council Resolution 1325 (2000) and ensuring that the necessary mechanisms are in place for monitoring progress.

The situation of Afghan women and girls has developed significantly in the last two years. On 5 March 2003, Afghanistan ratified the Convention on the Elimination of All Forms of Discrimination against Women.

23 per cent. of the delegates to the Constitutional Loya Jirga were women from across Afghanistan. Articles 22, 43 and 44 of the new constitution, agreed on 4 January, establish equal rights for men and women, which also reflected many of the recommendations of the Special Rapporteur of the Commission on Human Rights on violence against women. The Afghan Transitional Administration and international community are committed to providing the security and resources needed to support implementation of the new constitution, and to develop effective mechanisms to tackle continuing human rights violations and abuses, including those against women.

The UK is working to encourage Afghan women to take their rightful role in the forthcoming elections. This includes ensuring that women and men are included in voter registration programmes, that they develop the capacities to participate as campaigners and officials and that women are empowered to take advantage of their quotas for representation in Parliament.

We are also supporting the Afghan Judicial Commission in its work to improve access to justice for all Afghan communities, taking into account the special needs of women.

The UK actively seeks to deploy female British officers to peacekeeping missions and other conflict prevention/resolution operations. This has included a senior gender expert working with the Coalition Provisional Authority (CPA) in Baghdad, We try to ensure that those members of the various UK teams in Iraq, especially those working in or with the CPA, are fully briefed on the gender aspects of their work. The UK's Special Representative, Sir Jeremy Greenstock recently met my right hon. Friend the Secretary of State for Trade and Industry, Minister for Women and Equality, a representative group of Iraqi women, and representatives of UK non-governmental organisations, including the Women's National Commission, active in the field.

Encouraging Iraqi women to participate fully in the reconstruction of their country is a key aim of the Government's conflict prevention strategy for Iraq.

TRADE AND INDUSTRY

Reinstatement Committees

Mr. Hancock: To ask the Secretary of State for Trade and Industry pursuant to the answer of 19 January 2004, *Official Report*, column 922W, on reinstatement committees, if she will make a statement on the training regime undergone by members of employment tribunals, with particular reference to reinstatement committees. [150208]

Mr. Sutcliffe: There is little to add to my previous answer. The chairmen of employment tribunals are trained to research the relevant law as necessary before any hearing and to give guidance to the lay members on the relevant legal principles and their application to any particular case.

Business Link

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how many Business Link organisations are in operation; and how much money was spent by each of them in each year since their formation. [148197]

Nigel Griffiths: There are 42 Business Link Operators (BLOs) delivering local business support services in 45 sub-regions in England, with three BLOs operating in two areas.

The following table shows the total expenditure on BL branded activity by sub region including that supported by non-DTI funding, for the last two financial years. The Business Link network was re-engineered and the new BLOs operational from 26 March 2001.

BLO expenditure 2001–02 and 2002–03

£

BLO sub-region	*Expenditure 2001–02*	*2002–03*
North East		
County Durham	2,652,539	3,441,153
Northumberland	2,300,765	2,878,904
Tees Valley	4,141,342	5,088,231
Tyne and Wear	5,736,800	9,064,600
North West		
Cumbria	22,221,795	3,859,512
North and Western Lancashire	4,192,499	5,917,278

Based upon quarterly financial returns provided by BLOs to the Small Business Service, DTI.

Emissions Trading Directive

Brian Cotter: To ask the Secretary of State for Trade and Industry what discussions her Department has had with the Department of the Environment, Food and Rural Affairs regarding the EU Emissions Trading Directive. [147603]

Mr. Timms: Defra and DTI have a joint public service agreement that commits to moving towards a 20 per cent. reduction in CO_2 emissions by 2010. The EU ETS represents a central element in Government plans for reducing emissions. DTI and Defra have worked together very closely, with other Government Departments and the Devolved Administrations, to ensure that the appropriate arrangements are in place for the successful implementation of the EU ETS.

Brian Cotter: To ask the Secretary of State for Trade and Industry what assessment her Department has made of the impact that the EU Emissions Trading Directive will have on the United Kingdom glass industry. [147609]

Mr. Timms: The EU Emissions trading scheme (ETS) is a cost-effective approach to ensuring emissions of greenhouse gas fall to target levels. The impact on individual sectors has been considered during work to prepare for the introduction of the EU ETS. A draft National Allocation Plan has been released and sectors will be able to comment on the allocation proposed for them. Analytical work on the competitiveness implications will also be released shortly.

Insolvency Service

Keith Vaz: To ask the Secretary of State for Trade and Industry how many people are employed by the Insolvency Service; and how many were employed in 1997. [151009]

Mr. Sutcliffe: As at 1 January 2004, the full time equivalent number of staff employed by the Insolvency Service was 1,634.

The number of staff employed in the Insolvency Service in earlier years is published in the agency's Annual Report and Accounts.

Keith Vaz: To ask the Secretary of State for Trade and Industry what complaints she has received on the operation of the Insolvency Service in the last three years. [151010]

Mr. Sutcliffe: The number of complaints received by the Insolvency Service in the last three years, and the nature of those complaints, is set out in the following table:

Nature of complaint	*2000–01*	*2001–02*	*2002–03*
Quality	350	400	342
Efficiency	86	43	32
Legislation	190	97	61

Internet Usage

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what steps are being taken to encourage use of the internet by those who have said that a lack of *(a)* knowledge, *(b)* confidence and *(c)* interest was a barrier to use. [146142]

Mr. Alexander: I have been asked to reply.

A network of over 6,000 UK online centres offer free or low cost internet access, especially for those who may need additional support to get online. A December 2003 report on CMF funded centres, found that centres are successfully helping users improve their confidence (79 per cent.) and learn new skills (84 per cent.). The 'Get Started' campaign, which promoted the benefits of the internet to disinterested groups, helped drive nearly 37,000 people to UK online centres for a free internet starter session.

We have recently published guidelines to help employers implement Home Computing Initiatives. HCI schemes promote home computer access and use which can help reach out to individuals who are less confident with technology.

IT Contracts

Mr. Sayeed: To ask the Secretary of State for Trade and Industry if she will list information technology contracts in her Department with a value of above £20 million in each of the last 10 years; what the inception date for each system was; when it became fully functional; when it became fully debugged; and what the cost of over-runs has been. [146202]

Mr. Timms: The Department has directly let one IT contract with a lifetime value of more than £20 million in the last 10 years. This is the ELGAR PFI contract for the provision of IT desktop, application support and development, and business re-engineering services. The contract was awarded on 27 November 1998 and the initial desk top service became operational on 31 March 1999, as planned. System Acceptance testing of the new desk top service was completed on 30 November 1999, and the system became fully functional on 31 March 2000. Following user acceptance testing, the system was accepted by the Department and the system was fully debugged by 15 July 2000. There were no additional costs to the Department for over-runs on this migration.

A Service for the provision of Electronic Records Management was also supplied under the ELGAR contract. The inception date for this was 30 March 2001, the system became fully functional on 30 November 2001 and it was fully debugged by 30 April 2002. There was no overun on costs.

Manufacturing Employment

Mr. Djanogly: To ask the Secretary of State for Trade and Industry how many manufacturing jobs have been *(a)* created and *(b)* lost in (i) Cambridgeshire and (ii) Huntingdon in each of the last three years. [146447]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Djanogly, dated 27 January 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question on manufacturing jobs in Cambridgeshire and Huntingdon. (146447)

Figures are not available for jobs created or lost, but the net changes from year to year in numbers of jobs can be determined from the Annual Business Inquiry (ABI). The most recent figures available are set out in the attached table.

Net annual change in number of manufacturing jobs in Cambridgeshire and Huntingdon, 2000–02

	Cambridgeshire	*Huntingdon Local Authority District*
2000	196	-322
2001	70	-576
2002	-1,299	-887

As with any sample survey, estimates from the ABI are subject to sampling variability.

Market Access

Mr. Bercow: To ask the Secretary of State for Trade and Industry whether it is her policy to seek to extend duty-free and quota-free access for all least developed countries exports into all developed countries as part of a development friendly agreement with the World Trade Organisation. [146642]

Mr. Mike O'Brien: All exports from least developed countries (LDCs), with the exception of arms, currently enjoy duty and quota free access to the European Union market under the Everything-but-Arms argument (EBA). Other G8 countries have similar but less extensive arrangements.

The Government fully support the commitment by the World Trade Organisation, made in the Doha Declaration in November 2001, to seek an agreement with 'the objective of duty-free, quota-free market access for products originating from LDCs', and the further commitment 'to consider additional measures for progressive improvements in market access for LDCs'. We encourage all members of the World Trade Organisation to deliver on that commitment.

Post Office Account Cards

Mr. Chope: To ask the Secretary of State for Trade and Industry if she will set out the circumstances in which her Department authorises Post Office counter clerks to *(a)* reject and *(b)* confiscate Post Office account cards; and on how many occasions this has happened. [150878]

Mr. Timms *[holding answer 26 January 2004]:* The Department of Trade and Industry has no role in the operation of the Post Office card account, which is a

commercial matter that falls within the day-to-day responsibility of Post Office Ltd. I have therefore asked the Chief Executive to reply direct to the hon. Member.

Post Offices

Sarah Teather: To ask the Secretary of State for Trade and Industry how many post offices have closed in Brent in each year since 1979. [149896]

Mr. Timms: Decisions on post office closures are an operational matter for Post Office Ltd. and I have asked the Chief Executive to reply direct to the hon Member.

Mr. Llwyd: To ask the Secretary of State for Trade and Industry how many post offices there were in England and Wales *(a)* in 1996 and *(b)* on the latest date for which figures are available. [150053]

Mr. Timms: I understand from Post Office Ltd. that as at end September 2003, the latest quarter for which figures are currently available, that the numbers of post offices in England was 12,938 and Wales was 1,318.

The Department does not have the corresponding historical figures for 1996 and I have asked the Chief Executive of the company to reply direct to the hon. Member.

Lembit Öpik: To ask the Secretary of State for Trade and Industry what the outcome was of each of the completed public consultations on proposed post office closures in Wales. [150102]

Mr. Timms: Decisions on post office closure proposals following public consultation are an operational matter for Post Office Ltd. and I have asked the Chief Executive to reply direct to the hon. Member.

Regional Development Agencies

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how much has been spent by each of the regional development agencies in each year since their formation. [148191]

Jacqui Smith: Eight RDAs were established in 1998 and their first full year of operation was in 1999–2000. The London Development agency was established in 2000–01. The table as follows shows the RDAs grant allocation and expenditure for each of the financial years between 1999–2000 and 2002–03 and their initial allocations for 2003–04.

£ million

	1999–2000		*2000–01*	
RDA	*Allocation*	*Expenditure*	*Allocation*	*Expenditure*
Advantage West Midlands	108	103	124	113
East of England	30	30	40	36

South East	111	97	115	112	123
South West of England	92	85	103	103	101
Yorkshire Forward	246	207	211	211	243
Total	1,508	1,363	1,589	1,581	1,719

Note:
These figures are the grant paid to Agencies and expenditure funded by grant. The Agencies total income will also include EU grants, receipts from sales of property and rental income.

DTI's own contribution to the RDAs was £2 million in 1999–2000, £17 million in 2000–01, £57 million in 2001–02, £161 million in 2002–03 and £177.7 million in 2003–04.

Sugar

Mr. Bercow: To ask the Secretary of State for Trade and Industry whether she has received proposals from the European Commission on reform of the sugar regime; and if she will make a statement. [149137]

Alun Michael: I have been asked to reply.

The European Commission published a Communication on reform of the sugar regime in September 2003 outlining three broad options for political debate in preparation for making legislative proposals later this year. The UK stakeholder consultation on these broad options closed on 16 January 2004 and the Government are currently considering the various responses received.

Work-Life Balance

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry how many and what percentage of working parents requesting *(a)* flexible working and *(b)* adoption leave since April 2003 were women. [150347]

Mr. Sutcliffe: There are no requirements to notify DTI people on the number of men or women who have requested flexible working or adoption leave since April 2003.

The preliminary findings of the 2003 DTI Work-Life Balance Survey of employees suggest that one in six employees (17 per cent.) had approached their employer

(in the previous two years) to make a request to change how they regularly work for a sustained period of time. These requests were most likely to be made by women, mothers, parents whose youngest child was under two-years-old and those in services and sales, and least likely by older employees (45+ years) and full-time workers.

As part of the Department's monitoring of the new laws for working parents it is collecting evidence from number of sources to build up a picture of the demand and uptake, of flexible working.

The Department has commissioned questions on the take-up of flexible working which currently appear in the Office for National Statistics Omnibus Survey. The results of these will be available in spring 2004. In addition the Department is working with key intermediaries, such as Working Families and Maternity Alliance who are collating data through member/support surveys, to obtain qualitative evidence to support the quantitative research under way.

There are less than 4,000 adoptions a year and given that statutory adoption leave was introduced only in April 2003 it is far too early to make any assessment of take-up.

DEPUTY PRIME MINISTER

Council Tax

Mr. Goodman: To ask the Deputy Prime Minister what central guidance is issued by his Department in relation to the display by local councils of the qualifying rules for council tax disability reduction, with particular reference to occupants of Band A properties with disabilities. [150423]

Mr. Raynsford: The Council Tax and Non-Domestic Rating (Demand Notices) (England) Regulations 2003 requires the explanatory notes to contain a general indication as to the circumstances in which a person may be eligible for the purposes of the Council Tax (Reductions for Disabilities) Regulations 1992. The Office of the Deputy Prime Minister has issued no central guidance.

Nick Harvey: To ask the Deputy Prime Minister what account he will take of the Budget Red Book's estimate for the rise in council tax revenues in 2004–05 in determining the level of council tax rises at which he will exercise capping powers. [150209]

Mr. Raynsford: In order to consider public expenditure in the round, the Treasury does make projections of council tax yield for future years. These projections are based on a number of assumptions about changes in the council tax rate, the tax base, the collection rate and council tax benefit payments. It would be wrong for the Treasury to make a detailed forecast of council tax rates, as these are set by local authorities, not by the Government. The rate is therefore assumed to rise in line with past trend.

This does not represent a judgment by the Government on a likely or acceptable level of council tax, and has no effect whatsoever on grant allocations to local authorities.

With the significant extra investment the Office of the Deputy Prime Minister put into local government and the scope for efficiency improvements, our view is that local authorities can and should deliver council tax increases in low single figures in 2004–05.

Local Government Pension Scheme

Mr. Chope: To ask the Deputy Prime Minister when the review of the Local Government Pension Scheme began; when it will be concluded; and when the conclusions will be published. [151247]

Phil Hope: A programme of work to ensure the Local Government Pension scheme in England and Wales continues to provide reasonable pensions at an affordable cost to employers, members and tax payers has been under way since October 2002. Changes to the scheme's current regulatory framework are programmed to take effect in April 2004 and in April 2005, within a strategy framework announced in July 2003. Proposals to ensure the sustainability of the scheme for the longer term will be circulated later this year.

Cambridgeshire Schools Budget

Mr. Djanogly: To ask the Deputy Prime Minister on what date he was informed of the intention of the Secretary of State for Education and Skills to direct Cambridgeshire County Council to increase its school budget by £4.5 million. [150834]

Mr. Raynsford: The Office of the Deputy Prime Minister has regular discussions with the Department for Education and Skills, including on the possible use of the power to set a minimum schools budget for a local authority.

Fire and Rescue Service

Mr. Jenkin: To ask the Deputy Prime Minister under what powers he would implement the regionalisation of the Fire Service in Essex without the consent of Essex County Council. [149698]

Miss Kirkbride: To ask the Deputy Prime Minister under what powers he would implement the regionalisation of the Fire Service in Hereford and Worcester without the consent of Herefordshire and Worcestershire county councils. [149838]

Mr. Raynsford: I refer the hon. Member to the answer given to the hon. Members for Buckingham, Taunton, North Thanet, North Wiltshire, Runnymede and Weybridge, South-East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2004, *Official Report*, column 1458W.

Miss Kirkbride: To ask the Deputy Prime Minister what research he has assessed that indicates that the optimum structure for the Hereford and Worcester Fire and Rescue Service is one based on the existing Government Office West Midlands Region. [149834]

Mr. Jenkin: To ask the Deputy Prime Minister (1) what research relating to Essex he has commissioned to provide the evidential basis for his plans to regionalise the Fire Service; [149701]

(2) what research he has assessed that indicates that the optimum structure for the Essex Fire and Rescue Service is one based on the existing Government Office East of England Region. [149694]

Michael Fabricant: To ask the Deputy Prime Minister what research relating to Staffordshire he has commissioned to provide the evidential basis for his plans to regionalise the Fire and Rescue Service. [149849]

Mr. Raynsford: I refer the hon. Member to the answer given to the hon. Members for Buckingham, Taunton, North Thanet, North Wiltshire, Runnymede and Weybridge, South-East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2004, *Official Report*, column 1453W.

Miss Kirkbride: To ask the Deputy Prime Minister (1) what estimate he has made of the change in the number of jobs in Hereford and Worcester Fire and Rescue Service that will be consequent on the proposed regionalisation of the Fire and Rescue Service; [149836]

(2) what change in the number of managerial jobs he expects to result from the regionalisation of the Fire Service in Herefordshire and Worcestershire. [149837]

Mr. Jenkin: To ask the Deputy Prime Minister (1) what estimate he has made of the change in the number of jobs in Essex Fire and Rescue Service that will be consequent on the proposed regionalisation of the Fire and Rescue Service; [149696]

(2) what change in the number of managerial jobs he expects to result from the regionalisation of the Fire Service in Essex. [149697]

Mr. Raynsford: I refer the hon. Members to the answer given to the hon. Members for Buckingham (Mr. Bercow), Taunton (Mr. Flook), North Thanet (Mr. Gale), North Wiltshire (Mr. Gray), Runnymede and Weybridge (Mr. Hammond), South-East Cambridgeshire (Mr. Paice), Brentwood and Ongar (Mr. Pickles), Poole (Mr. Syms) and Spelthorne (Mr. Wilshire) on 22 January 2004, *Official Report*, column 1456W.

Mr. Mark Field: To ask the Deputy Prime Minister what discussions he has had with the Greater London Authority on his plans to regionalise the Fire and Rescue Service. [149891]

Mr. Raynsford: The London Fire and Emergency Planning Authority already operates on a region wide basis.

Mr. Djanogly: To ask the Deputy Prime Minister how many retained firefighters were employed by the Cambridgeshire Fire and Rescue Service on 1 January. [149672]

Mr. Raynsford: Information provided by the Cambridgeshire Fire and Rescue Service shows that there were 384 retained firefighters employed by them on 15 January 2004 (including 19 volunteers).

Housing

Mr. Kidney: To ask the Deputy Prime Minister how many local housing authorities in England have published a housing strategy; and how many of the published strategies contain policies for reducing the incidence of empty homes. [150124]

Keith Hill: All local housing authorities in England have housing strategies. Information on the number which include specific policies on empty homes is not held centrally and could be provided only at disproportionate cost.

Mr. Rosindell: To ask the Deputy Prime Minister if he will make a statement on the provision of affordable housing; and what plans he has to improve its availability. [150383]

Keith Hill: The Government is acutely aware of the difficulties associated with shortages of good quality housing at an affordable price. A programme of action to address this, and to tackle poor condition housing and low demand and abandonment, was set out in "Sustainable Communities: Building for the Future", launched on 5 February 2003. The programme for affordable housing focuses on: improving the effectiveness of the planning system; the establishment of four growth areas to alleviate the overall housing pressures in London and surrounding areas; and targeted limitations on the right to buy. In addition Kate Barker, a member of the Bank of England's Monetary Policy Committee, is carrying out a review of issues underlying the lack of supply and responsiveness of housing in the UK.

The Office of the Deputy Prime Minister has increased the funding for provision of additional affordable housing through the Housing Corporation's Approved Development Programme to around £5 billion for the three years 2003–04 to 2005–06; £1 billion of this will be spent on housing for key workers. Some £600 million is being made available over the same period to support work in the growth areas which will be used for site assembly/remediation of brownfield land and infrastructure as well as providing additional affordable housing.

Mr. Rosindell: To ask the Deputy Prime Minister what plans he has for the re-development of council-owned housing estates during the next 10 years. [150385]

Keith Hill: The Sustainable Communities Plan sets out the policies, resources and partnerships necessary to transform our communities. This includes the steps we are taking to regenerate council-owned housing estates, for example, through the work of the market renewal pathfinders, our decent homes policy and through various liveability initiatives.

Key among these are:

£500 million over the next two years to secure transformation of housing markets in stock in nine areas where demand is particularly weak. All of the nine market renewal pathfinder project intervention areas contain a mixture of social and private sector housing. The pathfinder schemes are being designed in such a way as to bring major benefits both in terms of improving demand for housing and reaching decent homes target;

a commitment to ensuring that all social housing is made decent by 2010. In delivering this commitment, local authorities are encouraged to ensure the outcome is sustainable in the long term by taking a view about the future demand for their council estates. Therefore in some areas delivery may be achieved through a mixture of demolition, re-modelling and refurbishment; and

£201 million for programmes to create more liveable places and improve the local environment for communities.

In addition, the National Strategy for Neighbourhood Renewal is helping to tackle multiple deprivation in the most deprived neighbourhoods in the country with a focus on the five key themes of crime, health, employment, education, and housing and the physical environment. For instance, housing interventions as part of the New Deal for Communities programme include renovating houses, the development of master plans for housing, elimination of vacant and derelict housing and redevelopment projects.

Mr. Hoyle: To ask the Deputy Prime Minister what the average waiting time is for a person to be re-housed in Chorley for *(a)* all housing and *(b)* old age pensioner housing. [150406]

Keith Hill: The average waiting time for people to be re-housed by Chorley Borough Council is tabled as follows:

Average wait to be re-housed (days)

	All housing	*OAP*	*Statutory homeless*
2000–01	245	402	67
2001–02	244	425	43
2002–03	270	377	89
2003–04	244	331	135

Mr. Hoyle: To ask the Deputy Prime Minister what the waiting list figures are in Chorley for *(a)* all housing and *(b)* old age pensioner housing for each of the last five years. [150407]

Keith Hill: The waiting list figures for Chorley Borough Council in each the last five years are tabled as follows:

Current waiting list figures (houses)

	OAP	*Others*	*Total*	*Homeless applications*	*Total*
1999–2000	83	112	195	Unknown	195
2000–01	110	257	367	459	826
2001–02	133	507	640	508	1,148
2002–03	191	937	1,128	493	1,621
2003–04	270	1,385	1,655	434	2,089

New Build (Chorley)

Mr. Hoyle: To ask the Deputy Prime Minister what estimate he has made of the amount of brownfield land available for new build in Chorley. [150016]

Keith Hill: The 2002 National Land Use Database of Previously Developed Land shows a reported 310 hectares of previously developed land potentially available for development in Chorley. This includes 188 hectares of vacant or derelict land and buildings, and 122 hectares currently in use with the potential for redevelopment.

Permitted Development Order Review

Mrs. Calton: To ask the Deputy Prime Minister if he will list the organisations and individuals consulted in the Permitted Development Order Review England, published in September 2003. [150999]

Keith Hill: The research study into permitted development was commissioned from consultants Nathaniel Lichfield & Partners Ltd. in 2002. A list of those organisations who were consulted by the researchers can be found in Annex 1 of the report which is available on the Office of the Deputy Prime Minister's website at www.odpm.gov.uk. Copies are also available in the Library of the House.

Mrs. Calton: To ask the Deputy Prime Minister what additional consultation is required before progress can be made with the recommendations of the Permitted Development Order Review England, with respect to railway undertakings and telecommunications masts. [151000]

Keith Hill: The research study into permitted development was commissioned from consultants Nathaniel Lichfield & Partners Ltd. in 2002. Informal comments were invited on the recommendations contained in the report on the review of permitted development rights when it was published in September 2003. The Office of the Deputy Prime Minister are putting together proposals on which we will conduct a full consultation exercise later this year.

Regional Assemblies

Mr. McLoughlin: To ask the Deputy Prime Minister what the budget of the information campaign, Elected Regional Assembly: Your Say, is *(a)* in total, *(b)* for the East Midlands and *(c)* for West Derbyshire. [150890]

Mr. Raynsford: 'Your Say' is intended to inform everyone in the North East, the North West and Yorkshire and the Humber who will have a chance later this year to vote in referendums on whether to establish an elected regional assemblies.

The total budget for this financial year is £500,000.

It is not intended that the other five English regions should have a referendum this year. Therefore, there is no 'Your Say' budget allocation for the East Midlands or the West Derbyshire sub-region.

EDUCATION AND SKILLS

British Monarchy Studies

Mr. Rosindell: To ask the Secretary of State for Education and Skills (1) how much time secondary school students spent studying the British monarchy in the last period for which figures are available; [150360]

(2) what provision is made in the national curriculum for *(a)* primary and *(b)* secondary education to teach school children the values and history of the British monarchy. [150388]

Mr. Charles Clarke: The history and development of the British monarchy is a key feature of the statutory programmes of study for National Curriculum History in primary and secondary schools. In addition, through the Citizenship National Curriculum which is a statutory requirement for all pupils aged 11–16, pupils will be taught about the United Kingdom and the institutions which underpin our democracy, including

the role of the Queen. There is no information collected on the time school pupils spend studying the British monarchy.

Child Poverty

Mr. McLoughlin: To ask the Secretary of State for Education and Skills how many children in *(a)* the East Midlands and *(b)* West Derbyshire lived in poverty in (i) 2001–02 and (ii) 2002–03. [150924]

Mr. Pond: I have been asked to reply.

I refer the hon. Member to the answer I gave to my hon. Friend the Member for the City of York (Hugh Bayley) on 8 January 2004, *Official Report*, column 462W.

Departmental Staff

Mr. Russell Brown: To ask the Secretary of State for Education and Skills what percentage of staff employed within his Department are over 55 years of age; and what *(a)* number and *(b)* percentage of staff recruited over the last 12 months are over 55 years of age. [145934]

Mr. Charles Clarke: I refer my hon. Friend to the reply given by my hon. Friend the Minister for State at the Cabinet Office (Mr. Alexander) on 20 January 2004, *Official Report*, column 1130W.

Employer Training Pilots

Rob Marris: To ask the Secretary of State for Education and Skills if he will list, broken down by region, the *(a)* firms and *(b)* companies taking part in Employer Training Pilots; and how much public funding each of them has received in (i) 2001–02, (ii) 2002–03 and (iii) 2003. [150008]

Mr. Ivan Lewis: As the Employer Training Pilots did not commence until September 2002, no public funding was given to employers during 2001–02. Since September 2002 over 6,000 employers have signed up for the pilots. Details of funding paid to participating employers is not held centrally, but by the local Learning and Skills Councils operating the pilots, and the information cannot be collated to the level of detail requested without incurring disproportionate cost. I have, however, asked Mark Haysom, the Learning and Skills Council's Chief Executive, to write to the hon. Gentleman with details of the total amounts of public funding paid to or on behalf of participating employers under the Employer Training Pilots in each of the pilot areas, and the names of participating businesses. A copy of his reply will also be placed in the House of Commons Library.

Rob Marris: To ask the Secretary of State for Education and Skills what the success rate as defined by his Department is for Employer Training Pilots; and if he will make a statement. [150009]

Mr. Ivan Lewis: The Employer Training Pilots were set up in September 2002 and will run until August 2005. They are testing the effectiveness of a range of measures designed to increase employer-based training for low-skilled employees, resulting in the acquisition of basic skills or level 2 qualifications. An evaluation report on the first year of the pilots has been produced for DfES by the Institute for Employment Studies. These interim findings show that at the end of August 2003:

- there were over 3,000 employers and 14,000 learners registered as taking part, with more in the process of starting;
- more than two in five employers engaged with the ETPs have had no previous involvement with government agencies such as the Learning and Skills Councils or Business Links;
- ETP learners tend to be aged between 26 and 45, in full-time low-skilled jobs, and earn an average of £6 an hour. Over half of the learners were female;
- both employers and employees were expressing high levels of satisfaction with the programme.

At this interim stage it is too early to draw any definitive conclusions about the pilots and the second year will be used to explore a number of issues in more depth; these include the numbers achieving qualifications, which elements of the pilots are most attractive to employers and employees, and the longer term impact of the training on both businesses and individuals.

The first year evaluation report was published in December 2003 and is available on the DfES website. A copy is also being placed in the House of Commons Library.

Modern Apprenticeships

Rob Marris: To ask the Secretary of State for Education and Skills how many expressions of interest were received between the start of the advertising campaign in London in 2002 promoting modern apprenticeships and three months after the conclusion of the campaign; and how many of these expressions of interest translated into modern apprenticeship courses started. [150010]

Mr. Ivan Lewis: This is a matter for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to the hon. Gentleman with this information and a copy of his reply will be placed in the Library.

Oath of Allegiance

Mr. Rosindell: To ask the Secretary of State for Education and Skills if he will make provision for school children to swear an oath of allegiance to the Queen and the United Kingdom. [150386]

Mr. Charles Clarke: There are no plans to make provision for school children to swear an oath of allegiance to the Queen and the United Kingdom. However, understanding about the rights and duties of citizens of the UK and the role of the Queen in our democracy are part of Citizenship education, now a statutory subject for 11 to 16-year-olds.

Pupil Exclusions

Mr. Rosindell: To ask the Secretary of State for Education and Skills if he will make a statement on the Government's policy on pupil exclusions. [146665]

Mr. Ivan Lewis: The Government are investing in a wide-ranging programme of measures to improve standards of behaviour and to develop and encourage the use of alternatives to exclusion. But exclusion must

continue to be one of the sanctions for serious misbehaviour available to schools. And, when a head excludes for good reasons, that decision should not be overturned. We have therefore reformed the legislation governing exclusion appeal panels to strike a better balance between the interests of the individual pupil and those of the school community as a whole.

Rural Youth Grant

Mr. Flook: To ask the Secretary of State for Education and Skills if he will list the amount of rural youth grant given to each local authority in the South West since 1997. [148874]

Mr. Ivan Lewis: The Department for Education and Skills does not make rural youth grants to local authorities.

Schoolbags

Lady Hermon: To ask the Secretary of State for Education and Skills what measures are in place in England and Wales to protect children from back injuries sustained through carrying excessively heavy schoolbags to, in and from school; and if he will make a statement. [148812]

Mr. Ivan Lewis: My Department advises local education authorities and schools in England to provide storage facilities and to plan timetables so that pupils need not carry excessively heavy bags to, in or from school. It is for local authorities and schools to assess and manage the health and safety risks of handling heavy loads.

School Drinking Water

Mr. Burstow: To ask the Secretary of State for Education and Skills what provision his Department has made to enable schoolchildren to have access to clean drinking water during the school day. [149862]

Mr. Ivan Lewis: The Education (School Premises) Regulations 1999 requires all schools to have a wholesome supply of water for domestic purposes, including drinking water. Further guidance is available in Building Bulletin 87 (Guidelines for Environmental Design in Schools), which can be viewed on the website: www.teachernet.gov.uk/energy. However, it is for local education authorities, governors and schools to decide how and when drinking water should be made available to pupils.

University Attendance

Mr. Hepburn: To ask the Secretary of State for Education and Skills what the average public subsidy is for each person attending university in 2003–04. [148444]

Alan Johnson: Our latest estimate is that, on average, a student in higher education will benefit from around £5,300 in public subsidy. This estimate includes the average amount that the Higher Education Funding Council for England (HEFCE) pay the institution as grant for teaching, the economic costs to the Government of issuing a maintenance loan, and any fee remission and other grants.

University for Industry

Mr. Willis: To ask the Secretary of State for Education and Skills how much was spent on the University for Industry in *(a)* 2002–03 and *(b)* 2003–04; and what proportion was spent on (i) administration and (ii) staffing. [149991]

Mr. Ivan Lewis: My Department makes grant funding available annually to Ufi which helps to fund Ufi's infrastructure and operating costs including the costs of operating the learndirect information and advice service. Ufi also receives LSC funding indirectly through the sale of learndirect courses and materials to the national network ("hubs") that Ufi has established to deliver learndirect courses.

In 2002–03, £53.800 million was spent from funding allocated to Ufi directly from my Department. Ufi also received £28 million from the sale of learndirect materials to hubs for learning subsidised with public funds. From this income £12.8 million (15.6 per cent.) was spent on staff related costs and £10.5 million (12.8 per cent.) on other administration costs. We are not able to provide the same information for 2003–04 because the financial year is not complete.

Mr. Willis: To ask the Secretary of State for Education and Skills what proportion of funding provided to the University for Industry by his Department was taken up by learners in 2002–03. [149993]

Mr. Ivan Lewis: In the academic year 2002/03, £139.5 million was set aside for Ufi/learndirect provision by the LSC from its "Learning Participation" budget. From this budget £116 million (83.1 per cent.) was taken up by learners. (The grant funding made available annually by my Department to Ufi does not cover learner costs. Figures are not available for the financial year 2002–03.)

The LSC is currently conducting an audit of the learning undertaken in academic year 2002/03. This audit is expected to be completed in February 2004. The figures provided here are based on interim and pre-audit data and might be subject to subsequent revision.

Mr. Willis: To ask the Secretary of State for Education and Skills what proportion of the Learning and Skills Council low priority adult funding budget will go to the University for Industry in each local Learning and Skills Council region in 2004–05. [149994]

Mr. Ivan Lewis: On 4 December 2003 the Secretary of State for Education and Skills wrote to the LSC setting out LSC budgets for 2004–05. In this letter £6,311.616 million was set aside for the "Learning Participation Budget". This budget (which supports the delivery of a number of Departmental priorities and is not a "low priority" budget) funds participation and achievement in learning by young people and adults and supports workforce development.

The LSC will shortly decide how much of this budget to set aside for learndirect provision in England on the basis of 2003–04 performance.

Mr. Willis: To ask the Secretary of State for Education and Skills what liaison takes place between local Learning and Skills Councils and the University for Industry; and if he will make a statement. [149995]

Mr. Ivan Lewis: Ufi liaises with the 47 local Learning and Skills Councils to agree targets for the engagement through learndirect of different types of priority learners. This results in contracts between the local Learning and Skills Councils and their local learndirect hubs for the delivery of learndirect provision in their area. In year performance is monitored on a regular basis and a biannual review of hubs is undertaken to optimise the contribution of learndirect to local priorities.

There are also regular strategic reviews between Ufi Regional Directors and local Learning and Skills Councils (and other key local and regional partners) to assess and optimise the contribution of learndirect to the achievement of local skills development priorities.

From August 2004, the LSC will contract nationally with Ufi. Provision will, however, continue to be planned locally and local Learning and Skills Councils will monitor performance.

CONSTITUTIONAL AFFAIRS

Judicial Review

Mrs. Curtis-Thomas: To ask the Parliamentary Secretary, Department for Constitutional Affairs how the Government intend to deal with judicial review of decisions formerly made by the Immigration Appeals Tribunal. [150179]

Mr. Lammy: The Government have introduced measures in the Asylum and Immigration (Treatment of Claimants, etc.) Bill to establish a new single tier Asylum and Immigration Tribunal. This will merge the two current tiers of appeal in asylum and immigration cases. The judicial determinations and decisions made by the new tribunal will be final and can only be challenged in the higher courts on the grounds that a tribunal member has acted in bad faith.

Court Service

Ian Lucas: To ask the Parliamentary Secretary, Department for Constitutional Affairs what guidance his Department gives to the Court Service on political neutrality. [150442]

Mr. Leslie: The Civil Service Management Code sets out the standards of conduct and discipline that all civil servants must follow. The Code states:

> "Civil servants must not take part in any political or public activity which compromises, or might be seen to compromise, their impartial service to the Government of the day or any future Government".

That is reflected in the Department's Employee Handbook, a copy of which goes to all Court Service employees.

Ian Lucas: To ask the Parliamentary Secretary, Department for Constitutional Affairs what guidance his Department gives to the Court Service on appropriate use of its estate. [150443]

Mr. Leslie: Under the Government's wider market initiative courts have been encouraged to make commercial use of assets, including estates, to generate income. The Department for Constitutional Affairs has issued guidance about undertaking wider markets activities to its agencies, including the Court Service. The guidance includes specific advice about image/propriety, avoidance of disruption to core services, licensing, insurance, security and the use of in-house equipment when wider market activities are being considered. In addition separate guidance has also been produced by HM Treasury and the Court Service.

Immigration Appeal Tribunal

Mrs. Curtis-Thomas: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the criteria are for remittal by the Immigration Appeal Tribunal; and where they are listed. [150182]

Mr. Lammy: The President of the Immigration Appeal Tribunal has not issued a Practice Direction relating to the remittal of appeals, and no set criteria are laid down, but the Tribunal will only remit an appeal where there is no practicable alternative. The decision to remit an appeal is made in accordance with the overriding objective of Rule 4 of the Immigration and Asylum Appeals (Procedure) Rules 2003: "to secure the just, timely and effective disposal of appeals and applications in the interests of the parties and in the wider public interest".

Jury Research

Mrs. Curtis-Thomas: To ask the Parliamentary Secretary, Department for Constitutional Affairs what progress has been made with the consultation on jury research. [150342]

Mr. Leslie: The consultation paper on jury research and investigations into juror impropriety, as announced by the Secretary of State on 11 September 2003, has been delayed so that I could take into account the decision of the Law Lords in the conjoined appeals in R *v.* Shabbir AH Mirza and R *v.* Ben Connor Ashley, Kenneth Rollock.

The Law Lords returned their decision on 22 January. After I have fully considered how this decision affects it, the consultation paper will then be published.

When the paper is published, I will ensure that the hon. Member is sent a copy.

Monarchy

Mr. Rosindell: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will make a statement on the future of the monarchy in the UK. [150122]

Mr. Leslie: The Government believe that the country should remain a constitutional monarchy in its present form.

Royal Courts of Justice

Ian Lucas: To ask the Parliamentary Secretary, Department for Constitutional Affairs (1) if he will list the Court Service's dealings with Workham Marketing for the last three years; [150444]

(2) whether outside bodies are permitted to hold fundraising meetings in the Royal Courts of Justice; [150445]

(3) Affairs whether outside bodies are permitted to hold sporting events in the Royal Courts of Justice; [150446]

(4) whether outside bodies are permitted to hold political meetings in the Royal Courts of Justice; [150447]

(5) under what circumstances the Court Service hires the Royal Courts of Justice to outside bodies. [150448]

Mr. Leslie: The Royal Courts of Justice, through the Wider Markets Initiative, have been hiring out their facilities over the last two years for a range of functions. A booking was taken for a boxing charity fund-raiser through the company Workham Marketing. Unfortunately the normal procedures for bookings were not followed in this case. When a senior official examined the detail of the booking it was found that Workham Marketing were representing the Countryside Alliance, a non-charitable campaigning organisation. Since finding this out the booking has been cancelled and all necessary refunds have been made. The only other dealings that the Royal Courts of Justice have had with Workham Marketing are enquiries about the availability of other dates. In operating the Wider Markets Initiative the Court Service is concerned to maintain the independence and neutrality of the courts.

HEALTH

"Making Amends"

Mr. Baron: To ask the Secretary of State for Health whether he plans to publish responses to the consultation document, Making Amends; and when policy proposals will be published. [149917]

Ms Rosie Winterton *[holding answer 22 January 2004]:* Over 170 responses to the consultation document, Making Amends have been received and we have written to respondents to request permission to publish their comments. We are now in the process of converting comments from those respondents to electronic documents and they will be available on the Department of Health website shortly. A copy will also be placed in the Library in due course.

Responses to consultation are being assessed and analysed to assist with informing final policy details. The Government's proposals to reform and improve the way the national health service responds to clinical negligence will be announced later this year.

BSE

Mr. Burstow: To ask the Secretary of State for Health what assessment the Food Standards Agency has made of the arrangements in the USA for *(a)* testing slaughtered cattle for BSE, *(b)* surveillance and tracking of BSE in the food chain and *(c)* controlling the use of rendered by-products; and if he will make a statement. [146345]

Miss Melanie Johnson: I refer the hon. Member to the response I gave the hon. Member for South Cambridgeshire (Andrew Lansley) today.

Mr. Lansley: To ask the Secretary of State for Health what discussions he has had with the United States Administration since 22 December 2003 concerning the integrity of the food chain in the US and non-contamination of it by BSE-infected meat. [146717]

Miss Melanie Johnson: The Food Standards Agency advises that the risk to public health in the United Kingdom from BSE in third countries, including the United States, is minimised through the application of existing European Union rules. These require any such country exporting meat or live animals into the Community to have in place controls equivalent to those in the EU.

Imports of beef and beef products are permitted only if EU rules requiring the removal of specified risk material are met and veterinary certification of this is provided.

In recent years the UK has imported little beef from the US. This is because of unrelated controls designed to prevent exports from cattle that have been given growth-promoting hormones banned in the EU. Data from the Department of Environment, Food and Rural Affairs show that, since 2000, the UK has imported only around 80 tonnes of fresh or chilled bovine meat and around 1,800 tonnes of meat and offal preparations. In addition, since 1996 all meat and bone meal (MBM), a by-product of the rendering process, has been banned from use in feeding stuffs for all farmed livestock. It has also been banned as a fertiliser, except where used on non-agricultural land. Any MBM originating from the US could therefore not be used in the UK for this purpose.

The Food Standards Agency notes the recent introduction of a number of additional public protection safeguards against BSE by the United States Department of Agriculture. The EU is in active discussion with the US authorities about what is being done and I understand will shortly be arranging a technical visit to the US to evaluate the position.

I have not held any discussions with the US authorities over this issue.

Building Maintenance

Mr. Rosindell: To ask the Secretary of State for Health what percentage of the NHS budget for the current financial year has been allocated to the maintenance of buildings. [150362]

Mr. Hutton: Most significant maintenance that improves the condition of national health service buildings is capital-funded.

The allocation of capital resources to the NHS for the three-year period, 2003–04 to 2005–06, was announced on 8 January 2003. None of the resources allocated were identified specifically for the maintenance of buildings.

Operational capital is allocated directly to NHS trusts and primary care trusts (PCTs) and is used primarily for maintaining their asset bases and funding other minor investments. For 2003–04, £844 million has been allocated as operational capital, or 29 per cent, of the total public capital budget. It is, however, for local NHS

trusts and PCTs to decide how much of this is used to fund building maintenance and how much is allocated to other local priorities.

By funding the replacement of major assets, the strategic health authorities' strategic capital programmes, totalling £684 million in 2003–04 and private finance initiative programme also make a contribution to meeting the NHS's maintenance requirement.

Cancer

Mr. Baron: To ask the Secretary of State for Health what action the Government are taking on the prevention of cancer; and what targets have been set for cancer prevention. [150234]

Miss Melanie Johnson *[holding answer 26 January 2004]:* The Government funds an extensive health improvement and prevention programme aimed at preventing cancer and coronary heart disease, which are the two main causes of mortality. This includes work on tobacco control and smoking cessation, improving nutrition and diet and increasing levels of physical activity, all of which have an effect on cancer prevention.

Health improvement and prevention work is also undertaken directly by primary care trusts (PCTs). Since April 2003, 75 per cent., of the national health service budget has been devolved directly to PCTs, allowing them to control the resources to deliver on both national and local priorities, including cancer.

All the targets we have established for cancer, including those for treatment and reducing smoking rates, will contribute towards prevention.

Cannabis

Dr. Tonge: To ask the Secretary of State for Health what research he has undertaken into links between taking cannabis and schizophrenia. [149821]

Miss Melanie Johnson: The Department commissioned the following research projects as part of the Drug Misuse Policy Research Initiative, which funded £2.4 million research between 2000 and 2003.

Long term heavy cannabis use: patterns and problems. Mr. Niall Coggans, Strathclyde Institute for Biomedical Sciences

A national epidemiological study of dually diagnosed substance misuse and psychiatric disorders between 1993–1998, using the General Practice Research Database. Dr. Martin Frischer, Keele University.

Co-morbidity in the National Psychiatric Morbidity Surveys. Dr. Michael Farrell, Dr. Colin Taylor, Institute of Psychiatry.

Co-morbidity of substance misuse and mental health problems: a study of the prevalence and patterns of co-morbidity and the need for services amongst treatment populations. Mr. Tim Weaver, Imperial College School of Medicine.

Dual Diagnosis in a Primary Care Group (PCG), (100,000 population locality): a step by step epidemiological needs assessment and design of a training and service response model. Dr. Geraldine Strathdee, Oxleas National Health Service Trust.

The Department also monitors research in this area and has a range of expert advisers to inform policy.

Colonoscopies

Mr. Baron: To ask the Secretary of State for Health what proportion of colonoscopies were unsuccessful in each of the last five years. [151254]

Mr. Hutton: Information about the proportion of unsuccessful colonoscopies is not held centrally.

Coronary Disease

Mr. Burstow: To ask the Secretary of State for Health what clinical audit data hospitals and primary care trusts in England have collated that is more than 12 months old covering the information in Milestone 3 on heart failure set out in the National Service Framework on Coronary Heart Disease. [149855]

Miss Melanie Johnson: This data is not held centrally, as the delivery of the national service framework (NSF) is managed locally. The Department's assessment is that the national health service has made good progress on this issue, as seen in the decline in emergency admissions for heart failure. As the new general medical services contract takes effect and heart failure assumes a higher priority in the central phase of delivery of the NSF, we expect to see further rapid progress on this important group of patients. To support the publication of the National Institute for Clinical Excellence's clinical guidelines that set out recommendations for NHS care of people with chronic heart failure, the Department has published a booklet, "Developing services for heart failure".

Dentistry

Sarah Teather: To ask the Secretary of State for Health how many dentists' surgeries there are in Brent East constituency. [149904]

Mr. Hutton: Figures collected by the Department are by primary care trust (PCT) and not by constituency.

Brent PCT has 64 dental practices (latest data available as at January 2004).

These figures can be routinely obtained from the NHS UK web-site at www.nhs.uk.

Dermatology

Mr. Baron: To ask the Secretary of State for Health what steps the Government are taking to increase the number of general practitioners and nurses who undertake training in dermatology. [151252]

Mr. Hutton: The relevant statutory bodies are responsible for setting curricula for health professional training. We do share a commitment with those bodies that all health professionals are trained so that they have the skills and knowledge to deliver a high quality health service to all groups of the population with whom they deal. National health service trusts, primary care trusts and workforce development confederations are responsible for commissioning the training and development across their local health economies that their professionals need.

Mr. Baron: To ask the Secretary of State for Health how many *(a)* general practitioners and *(b)* nurses have been trained in dermatology in each of the last five years; and what percentage of the total numbers of each this represents. [151253]

Mr. Hutton: This information is not collected centrally.

Erythropoietic Treatments

Mr. Lansley: To ask the Secretary of State for Health (1) how many recorded incidences of pure red cell aplasia there were in England and Wales between 1999 and 2002 following treatment using erythropoietic products; [149173]

(2) if he will list the incidences of pure red cell aplasia occurring after treatment with *(a)* Epogen, *(b)* Aranesp, *(c)* Neorecormon and *(d)* Eprex since 1999; [149174]

(3) how many fatalities have been linked to the use of erythropoietic treatments for anaemia; [149175]

(4) if he will commission studies into the incidence of pure red cell aplasia after erythropoietic treatments for anaemia; and what studies he has assessed into the potentially adverse effects of erythropoietic treatments for anaemia. [149176]

Miss Melanie Johnson: The Medicines and Healthcare products Regulatory Agency (MHRA) and the Committee on Safety of Medicines (CSM) receive reports of suspected adverse drug reactions (ADRs) submitted by doctors, nurses, dentists, pharmacists and coroners via the Yellow Card Scheme, and there is a legal requirement for companies to report suspected ADRs to their products.

The table shows the number of suspected ADR reports of red cell aplasia received annually by the MHRA/CSM between 1999 and 2003. These numbers do not necessarily represent all cases that may have occurred, because there is an unquantifiable degree of under-reporting associated with the Yellow Card Scheme, as with all voluntary reporting schemes. Figures are presented for epoetin alfa (Eprex), and epoetin beta (Neorecormon). The MHRA/CSM has received no ADR reports involving red cell aplasia in association with either Aranesp or Epogen during this interval. The product known as Epogen was not marketed in the United Kingdom during the interval in question.

Number of case reports of red cell aplasia received

	1999	*2000*	*2001*	*2002*	*2003*
Epoetin alfa (Eprex) United Kingdom	4	4	9	21	6
England and Wales only	4	3	8	19	6
Epoetin beta (Neorecormon) United Kingdom	4	2	0	7	1
England and Wales only	4	1	0	7	1

The total number of suspected ADR reports received from UK sources between the start of 1999 and the end of 2003 in association with epoetin alfa was 44; the number associated with epoetin beta was 14. Both epoetin alfa and epoetin beta were implicated in 10 reports; therefore the total number of reports of red cell aplasia received in association with all epoetins was 48.

The cause of death was recorded as red cell aplasia in one case. This patient showed evidence of parvovirus B19 infection, which is a well-established cause of red cell aplasia. Therefore, there are reasonable grounds to doubt a causal association between the epoetin administered and the red cell aplasia that occurred in this case.

Two large studies are currently under way to investigate the apparent association between epoetins and red cell aplasia, including the incidence of red cell aplasia in patients treated with epoetins.

The epoetins available in the UK were authorised on the basis of data, including clinical trial data, that have demonstrated evidence of safety and efficacy in all licensed indications. All studies were assessed for evidence of potential unwanted effects that might be attributable to treatment. The number of patients exposed to treatment prior to grant of a Marketing Authorisation would not normally be large enough to permit the detection of very rare unwanted effects, which would usually only come to light as a result of post-marketing surveillance following the exposure of much larger numbers of patients, as was the case with red cell aplasia in association with epoetins.

EU Health Insurance Cards

Ms Stuart: To ask the Secretary of State for Health pursuant to his answer of 5 January 2004, *Official Report*, column 187W, on EU health insurance cards, what the timescale for the scoping study is. [147557]

Mr. Hutton: Ministers will shortly conclude their consideration of the options available for implementing the European health insurance cards for United Kingdom residents. We will then consult interested parties.

Fruit for Schools Scheme

Mr. Burstow: To ask the Secretary of State for Health (1) what evaluation he has undertaken of the effect of the Fruit for Schools pilot schemes on children's health; [149852]

(2) what central Government funds have been allocated in each of the next three years for the Fruit for Schools scheme; and if he will make a statement. [149859]

Miss Melanie Johnson: Increasing consumption of fruit and vegetables helps to reduce the risk of chronic diseases, like heart disease, stroke and some cancers.

The National School Fruit Scheme is at present available to schools in London, the East and West Midlands and the North West. 96 per cent. of schools invited have joined the scheme, and an estimated 95 per cent. of children eat the fruit.

Following positive results from the region-wide pilots, supported by £42 million from the New Opportunities Fund, the scheme is to be offered to all local education authority schools with children aged four to six by the end of 2004. The Department will provide £77 million over the next two years (£33.5 million has been allocated for 2004–05 and £43.5 million for 2005–06).

In a preliminary survey, more than a quarter of children and their families reported eating more fruit at home since their children were in the scheme. A large-scale evaluation, with the support of the New Opportunities Fund, is underway. This involves 6,000 children across 100 schools, using a specially developed assessment tool to measure the impact of the scheme on children's diet both at school and home. Data will be collected before and after the scheme starts in the North East in March and again in the autumn 2004 and a report is expected in 2005.

General Practitioners

Mr. Barnes: To ask the Secretary of State for Health if he will review Schedule 1, Part 1, paragraph 9 of the NHS (General Medical and Pharmaceutical Services) Regulations 1994 to assess whether the terms of service for doctors need to be revised to give patients better safeguards over having their names removed from general practitioners' lists; and if he will make a statement. [148153]

Mr. Hutton: We have already considered this in developing the new general medical services contract. This includes strengthened provisions requiring a practice to have reasonable grounds for removal and to advise the patient and primary care trust of that reason. Patients will be given warnings before such action is taken by a practice.

Sarah Teather: To ask the Secretary of State for Health how many general practitioner surgeries there are in Brent East constituency. [149902]

Mr. Hutton: Figures collected by the Department are by primary care trust (PCT) and not by constituency.

Brent PCT has 78 general practitioner surgeries as at January 2004.

Sarah Teather: To ask the Secretary of State for Health how many general practitioner surgeries in Brent East constituency closed their list in the last 12 months. [149903]

Mr. Hutton: We do not routinely collect information on the number of closed lists.

Sarah Teather: To ask the Secretary of State for Health how many patients, in the absence of an available general practitioner, have been allocated to a locum doctor in *(a)* Brent, *(b)* London and *(c)* England. [149961]

Mr. Hutton: A patient who experiences difficulty in registering to receive primary medical services may be allocated by the primary care trust to the list of a local general practitioner principal or personal medical services provider. Locum doctors, however, do not hold patient lists and patients may not be allocated to such a doctor.

Mr. Rosindell: To ask the Secretary of State for Health what the average cost of running a general practitioner surgery was in the last year for which figures are available. [150366]

Mr. Hutton: The average costs incurred by general practitioners in running their practices, based on the latest Inland Revenue Enquiry data for 2001–02, was £106,272.

Mr. Burstow: To ask the Secretary of State for Health if he will list the *(a)* number and *(b)* rate of general practitioner vacancies in each (i) strategic health authority and (ii) primary care trust in each year since each was established. [149864]

Mr. Hutton: The Department's annual general practitioner (GP) Recruitment and Retention Vacancy survey started in 2000.

The estimated three month GP vacancy rate for England in 2003 was 3.4 per cent. and 2.7 per cent. in 2002. It is not possible to produce reliable estimates of the vacancy rate at strategic health authority (SHA) level or primary care trust (PCT) level. Estimated three month vacancy rates are not available before 2002.

Information on the number of GP vacancies for each SHA since 2000 and on the number of GP vacancies in each PCT for 2003, the first year data was collected at PCT level has been placed in the Library. This is a count of all GP vacancies that have occurred during each year. It will include existing posts that doctors have left and also new posts created to increase the workforce, even where they were filled very quickly. Thus, the increase in vacancies in part is a result of there being more posts overall, reflecting the Government's plan to increase the GP workforce.

Mr. Rosindell: To ask the Secretary of State for Health how many general practitioner surgeries in Romford receive NHS funding. [150373]

Mr. Hutton: There are a total of 17 national health service general practitioner surgeries in Romford and all receive NHS funding.

Haemoglobinopathies

Mr. Rosindell: To ask the Secretary of State for Health how the Government plans to increase awareness of sickle cell and thalassaemia. [147894]

Miss Melanie Johnson: NHS Plan set out a commitment to introduce, by 2004, new and effective screening programmes for women and children, including a new national linked antenatal and neonatal programme for sickle cell and thalassaemia. The sickle cell and thalassaemia screening programme has held a series of workshops throughout the country, with the aim of increasing awareness of the objectives and principles of the programme among general practitioners, practice nurses, midwives, health visitors, laboratory and administrative staff. To support the national rollout of the newborn sickle cell screening, the programme is planning various activities to develop a mass media campaign to improve the visibility of these disorders in communities with the highest prevalence.

Mr. Rosindell: To ask the Secretary of State for Health how the Government plans to increase community support networks and facilities for sickle cell and thalassaemia sufferers and their families. [147895]

Miss Melanie Johnson: Local implementation of the national health service sickle cell and thalassaemia screening programme in England is being supported by a UK National Screening Committee development programme. The programme is being developed in partnership with the key community and voluntary sector stakeholders. A key element of the national work is a community consultation and engagement project to ensure community awareness and acceptance of the screening programme. The screening programme works closely with voluntary groups to ensure that they are well informed about developments.

The Department is working with professional organisations to consider proposals for clinical networks of services to be developed, allowing patients to be cared for locally.

Havering

Mr. Rosindell: To ask the Secretary of State for Health how much money has been allocated to NHS services in the London borough of Havering for financial year 2004–05. [150361]

Mr. Hutton: Funding is allocated to primary care trusts (PCTs) on the basis of the relative needs of their populations. Revenue allocations for PCTs covering the period 2003–04 to 2005–06 were announced on 11 December 2002.

For 2004–05, the revenue allocation for Havering PCT is £234.9 million. Havering PCT is co-terminus with the London borough of Havering.

Mr. Rosindell: To ask the Secretary of State for Health what steps he is taking to improve the quality of buildings in which NHS treatment is provided in the London borough of Havering. [150364]

Mr. Hutton: The new acute hospital at Oldchurch Park in central Romford, costing £200 million, is already under way and is scheduled for completion in late 2006. This will replace the acute facilities at Oldchurch and Harold Wood Hospitals, part of Barking, Havering and Redbridge Hospitals National Health Service Trust, in purpose-built accommodation and will improve dramatically the quality of buildings available for acute care in Havering.

From May 2003, Havering primary care trust (PCT), together with neighbouring Barking and Dagenham PCT, local councils and the North-East London Mental Health Trust (NELMHT) have been working in partnership with Primaria to improve local health services and the buildings that house them. This partnership provides a new way of funding the development of modern, efficient community-based services and the buildings that they are in and follows the NHS local investment finance trust (LIFT) initiative. Five health care premises in Havering will be developed initially. The PCT is currently identifying further developments to be undertaken in Havering through LIFT. Havering, Barking and Dagenham PCTs and NELMHT have developed a strategic outline case (SOC), which was approved by the North-East London Strategic Health Authority in September 2003. The SOC establishes the case for investment, and considers options for the reprovision of facilities for all existing services provided at St. George's hospital, Hornchurch, and the Harold Wood and Hornchurch local health clinics.

Mr. Rosindell: To ask the Secretary of State for Health what percentage of NHS spending in the London borough of Havering was spent on the *(a)* diagnosis and *(b)* treatment of sexually transmitted diseases in the last period for which figures are available. [150365]

Mr. Hutton: This information is not collected centrally.

Mr. Rosindell: To ask the Secretary of State for Health how much money the Havering NHS Trust was given in the financial year 2003–04. [150375]

Mr. Hutton: The data concerning the financial allocation to Barking, Havering and Redbridge Hospitals National Health Service Trust is not collected centrally; NHS trusts receive their funding from contractual relationships with primary care trusts (PCTs).

The allocation of funding to Havering PCT for 2003–04 was £214.0 million, a 7.2 per cent. increase in real terms and a 9.6 per cent. increase in cash terms.

Mr. Rosindell: To ask the Secretary of State for Health (1) what the average cost of performing a cataract operation in the NHS was in the London Borough of Havering in 2003; and what the cost was in *(a)* Barking and *(b)* Brentwood; [150435]

(2) how many cataract operations were performed in the London borough of Havering in 2003. [150434]

Mr. Hutton: The data regarding the average cost of performing a cataract operation and the number of cataract operations performed, are not collected by London borough but by national health service trust.

The latest information available is for the financial year 2001–02. In 2001–02, the average cost of performing a cataract operation at Barking, Havering and Redbridge Hospitals NHS Trust was £689.

In 2001–02, Barking, Havering and Redbridge hospitals carried out a total of 779 cataract extractions with lens implants as day cases.

Health Service Recovery Plans

Mr. Burstow: To ask the Secretary of State for Health which *(a)* NHS, *(b)* NHS mental health and *(c)* primary care trusts have financial recovery plans; what period the recovery plans cover; and what the level of (i) recurring and (ii) non-recurring deficit or overspend the plans are intended to recover. [151470]

Mr. Hutton: The information is not collected centrally for individual organisations. This is the responsibility of the managing strategic health authority.

Hepatitis C

Charles Hendry: To ask the Secretary of State for Health whether *(a)* haemophiliacs and *(b)* non-haemophiliacs will be eligible for compensation under the hepatitis C ex-gratia payment scheme; and when he expects to announce the details of the scheme. [151351]

Miss Melanie Johnson: I refer the hon. Member to the Written Ministerial Statement made to the House on 26 **January 2004,** *Official Report*, column 1WS, by my right hon. Friend the Secretary of State for Health, announcing the details of the scheme which will be open to both haemophiliacs and non-haemophiliacs.

HIV/AIDS

Mr. Woodward: To ask the Secretary of State for Health what percentage of rape victims are known consequently to have contracted *(a)* a sexually transmitted disease, *(b)* HIV/AIDS, *(c)* hepatitis B and *(d)* hepatitis C in each of the last five years. [149906]

Miss Melanie Johnson: Routine surveillance for sexually transmitted diseases, HIV/AIDS and hepatitis B and C, conducted by the Health Protection Agency, collects information on routes of transmission of these infections (for example, whether through homosexual or heterosexual sex), but does not record whether or not sex was consensual.

Mr. Woodward: To ask the Secretary of State for Health how many people in *(a)* St. Helens and *(b)* Merseyside had HIV/AIDS in (i) 2001, (ii) 2002, (iii) 2003 and (iv) the most recent in 2004 for which figures are available. [149910]

Miss Melanie Johnson: The table shows the number of HIV-infected people resident in St. Helen's and Knowsley and Merseyside local authorities who attended national health service services for HIV-related treatment and care in the last five years for which data are available.

	Residence	
Survey year	*St. Helens and Knowsley local authority*	*Merseyside local authority*[1]
1998	23	163
1999	24	180
2000	27	208
2001	27	220
2002	37	293

[1] Merseyside LAs include Liverpool, Sefton, St. Helens and Knowsley and Wirral.

North West HIV/AIDS Monitoring Unit, Liverpool John Moores University.

Hospital-acquired Infection

Brian Cotter: To ask the Secretary of State for Health what action his Department is taking to combat the spread of MRSA within nursing and residential homes. [147605]

Miss Melanie Johnson: We consider that implementation of our recent report, "Winning Ways—Working together to reduce Healthcare Associated Infection in England[1]", will reduce infections in both hospital and community settings. This report will raise standards by reinforcing the need to follow existing good practice [2].

[1] Available at www.doh.gov.uk/cmo/hai/winningways/pdf.

[2] The Public Health Medicine Environmental Group Guidelines on the Control of Infection in Residential and Nursing homes 1996—National Institute for Clinical Excellence. Infection control: prevention of health care associated infection in primary and community care 2003.

Tim Loughton: To ask the Secretary of State for Health what estimate he has made of the additional cost to the NHS of hospital acquired infections in each of the last six years; and what methodology he used to calculate that figure. [144148]

Miss Melanie Johnson: Precise data are not available. A commonly used estimate[1] is that hospital acquired infection may cost the national health service £1 billion a year.

[1] R. Plowman, N. Graves, M. Griffin, J.A. Roberts, A.V. Swan, B. Cookson, L. Taylor. The socio-economic burden of hospital acquired infection. Public Health Laboratory Service 1999

Hospitals (Durham)

Mr. Kevan Jones: To ask the Secretary of State for Health if he will make a statement on the implementation of the Darzi Review recommendations on health care in County Durham. [144868]

Miss Melanie Johnson: The proposals arising from the Darzi Review were referred to Ministers by the former South Durham and Weardale Community Health Council. These were subsequently approved for implementation in September 2002. To support the new model, the two trusts responsible for the management of the hospitals in Co. Durham and Darlington merged to form the County Durham and Darlington Acute Hospitals National Health Service Trust, with effect from 1 October 2002.

County Durham and Tees Valley Strategic Health Authority is overseeing the process of implementation of the proposals, which cover a wide range of services. The chief executive of the SHA wrote recently to all local right hon. and hon. Members informing them of progress on the review and a copy of his letter has been placed in the Library.

Local Government

Mrs. Calton: To ask the Secretary of State for Health what assessment he has made of the extent to which the recommendations in Circular HSC2001/016:LAC(2001)23 have been met by local authorities; and if he will make a statement. [150098]

Dr. Ladyman: We issued the implementation guidance Circular HSC 2001/016: LAC (2001)23 in August 2001. The guidance followed the publication, in March 2001, of the White Paper, 'Valuing People: A New Strategy for Learning Disability for the 21st Century' (Cm 5086). 'Valuing People' set out our proposals for improving services for people with learning disabilities, their families and carers said that it would take a minimum of five years to make the changes it described.

Our first annual report to Parliament on learning disability, 'Making Change Happen' (HC 514), published in April 2003, gave a comprehensive report about the progress made on implementing all of the objectives in the White Paper. A copy of the report is available in the Library and was sent to all English right hon. and hon. Members. The report shows that we have made good progress since 'Valuing People' was published, but that there is much more to do to achieve all its aims. Further progress will be reported in our second annual report in April.

The Learning Disability Task Force monitors the progress of 'Valuing People' and reports to the Government on this. Its first report, 'Making Things Happen' was published in January 2003 and a second report is due in February.

Lung Cancer

Mr. Baron: To ask the Secretary of State for Health what action the Government are taking to introduce better techniques for diagnosing lung cancer. [151255]

Miss Melanie Johnson: The Department of Health published "Improving Outcomes Guidance on Lung Cancer" in 1998. This guidance provides advice on how lung cancer services in the national health service should be organised to improve outcomes for lung cancer patients. It addresses the diagnosis and staging of lung cancer and recommends that a full range of diagnostic tests should be available within cancer services.

The National Institute for Clinical Excellence is also preparing clinical guidelines (advice on assessment and treatment of a condition) for the NHS on the diagnosis and treatment of lung cancer. The guideline will provide guidance on diagnosis including early diagnosis; key symptoms and signs upon which a patient should be referred; factors encouraging patients to present to healthcare services sooner; diagnostic methods; staging and the impact of lung cancer on a patient's activities, as well as the need to be referred to other health professionals if required. The guideline is expected to be published in November 2004.

In addition, in March 2000, Referral Guidelines for Suspected Cancer were published by the Department, and sent to all general practitioners in order to help them identify those patients who are most likely to have cancer, so that they can be referred urgently to a specialist. These guidelines include a chapter on lung cancer. NICE is in the process of updating these guidelines and the update is due to be published in February 2005.

The Department are aware of the potential benefits positron emission tomography (PET) scanning can offer patients with lung cancer, particularly in assessing the stage of the disease. We will be consulting with doctors, voluntary organisations and other stakeholders on a national framework which will set out which tumour groups would benefit from PET scanning, likely future demand, and the implications for the optimal configuration and location of PET scanners for both clinical and research needs.

The work of the Modernisation Agency's Cancer Services Collaborative 'Improvement Partnership' (CSC'IP') is central to the drive to improve the detection, diagnosis and treatment of lung cancer. A specific goal of the CSC'IP' is to promote early diagnosis of lung cancer.

Mental Health

Sandra Gidley: To ask the Secretary of State for Health what estimate he has made of the number of people assessed as being elderly mentally infirm. [149792]

Dr. Ladyman: Data is not collected on the basis of elderly mentally infirm.

The research quoted in the older people's national service framework estimates that approximately 600,000 people in the United Kingdom have dementia. It is estimated that about five per cent. of people over 65 have dementia, rising to about 20 per cent. in the population over 80. It is also estimated that at any point in time about 10 to 15 per cent. of the population over 65 will have depression.

Although the main mental health problems among older people are dementia and depression, there is also a considerable number of older people with other mental illnesses, such as schizophrenia.

Negative Extrathoracic Pressure

Phil Sawford: To ask the Secretary of State for Health pursuant to his answer of 19 January 2004, *Official Report*, columns 1069–70W, on North Staffordshire Hospital NHS Trust, when he expects to receive the results of the audit of the use of negative extrathoracic pressure at the University Hospital of North Staffordshire NHS Trust. [150593]

Dr. Ladyman: The independent follow-up study of continuous negative extrathoracic pressure patients at the University Hospital of North Staffordshire National Health Service Trust is being carried out independently by a research team based at Queens Medical Centre Nottingham University Hospital NHS Trust. This study is expected to be completed by the end of August 2004, but the results will need to be collated before publication.

NHS Bank

Mr. Burstow: To ask the Secretary of State for Health how much was borrowed from the NHS Bank by each strategic health authority in the past 12 months; how much was repaid to the NHS Bank by each strategic health authority in the last 12 months; and how much the NHS Bank forecasts it will lend to each strategic health authority in the next 12 months. [150461]

Mr. Hutton: In 2003–04, the NHS Bank made available £152 million special assistance to the following strategic health authorities. Surrey and Sussex (£40 million), Avon, Gloucestershire and Wiltshire (£70 million), Thames Valley (£25 million), and Kent and Medway (£17 million).

No money was repaid to the NHS Bank by the SHAs in the last 12 months.

Decisions on special assistance for 2004–05 have not been made.

Mr. Lansley: To ask the Secretary of State for Health what the relationship is between the NHS Bank and the NHS Financing Facility. [147032]

Mr. Hutton: NHS Bank and the NHS Foundation Trust Financing Facility carry out two separate functions. NHS Bank provides a service, via strategic health authorities, to National Health Service trusts. The purpose of the NHS Bank is to support NHS organisations in maximising the use of resources across the NHS and across years. The NHS Financing Facility provides a service to NHS foundation trusts. The Financing Facility will assess and agree capital loan applications from NHS foundation trusts on behalf of the Secretary of State.

NHS Finance

Sarah Teather: To ask the Secretary of State for Health (1) what money has been allocated to NHS local investment finance trust schemes in each year since the scheme was introduced in *(a)* Brent, *(b)* London and *(c)* England; [149959]

(2) what uptake there has been of NHS local investment finance trust scheme funding in each year since the scheme was introduced in *(a)* Brent, *(b)* London and *(c)* England. [149960]

Mr. Hutton: The table shows the total of allocations made to primary care trusts to help develop local investment finance trust (LIFT) schemes in the Brent, Harrow and Hillingdon LIFT area, London and England since NHS LIFT was first announced.

£000

	Brent, Harrow and Hillingdon	*London*	*England*
2000–01	0	0	1,460
2001–02	0	390	800
2002–03	60	10,765	30,127
2003–04	4,600	25,394	105,860
Total	4,660	36,549	138,247

Performance Indicators

Mr. Burstow: To ask the Secretary of State for Health if he will set out performance indicators and targets set by his Department in each year since May 1997 that concern public health, listing *(a)* when they were first set, *(b)* interim milestones or goals, *(c)* substantive revisions to the content and *(d)* those that were abandoned, with reasons why they were dropped. [145083]

Miss Melanie Johnson: All of the targets in the Department of Health Public Service Agreements for 1998, 2000 and 2002, including those related to public health, are listed in Chapter 5 of the 2003 Departmental Report, a copy of which is available in the Library.

The Department of Health Priorities and Planning Framework Targets (formerly called National Priorities Guidance), relating to the periods 1999–2000 to 2001–02 through to 2003–06, have all been published and are available in the Library. Many of these relate to public health.

National Health Service Performance Indicator sets have been published for each year since 1999, initially by the Department and latterly the Commission for Health Improvement. Many of these relate to public health and all are available on the Department of Health's website.

Public Bodies

Mr. Hancock: To ask the Secretary of State for Health how many public bodies were operating in the health service in 1997; how many are operating; what plans he has to review their number and purpose; and if he will make a statement. [150212]

Mr. Hutton: The information requested is shown in the table.

My right hon. Friend the Secretary of State announced to the Health Select Committee on 30 October 2003, his intention to review the Department's executive non-departmental public bodies, special health authorities and executive agencies. We want to ensure that the roles of these bodies are in line with current expectations and that the oversight of front-line health and social services is kept to an acceptable minimum. We expect that the review will reach its conclusions by the middle of this year. National health service trusts, strategic health authorities, primary care trusts and advisory and tribunal non-departmental public bodies will not be part of the review. Executive agencies, of which the Department has four, will be included.

	1 June 1997	*1 January 2004*
Executive NDPBs[1]	7	8
Advisory NDPBs	42	37
Tribunal NDPBs	3	3
Health authorities[2]	100	n/a
NHS trusts	402	275
Special health authorities	13	22
Strategic health authorities[2]	n/a	28
PCTs[3]	n/a	304
Other NHS bodies	2	0
Total	569	677

[1] NDPBs = non-departmental public bodies
[2] Health authorities were replaced by strategic health authorities from April 2002
[3] PCTs (Primary Care Trusts) were introduced from April 2000, most on 1 April 2002, and cover smaller populations than did health authorities.

Public Health

Stephen Hesford: To ask the Secretary of State for Health what progress is being made in the performance management of the public health function; and if he will make a statement. [148609]

Miss Melanie Johnson: The Health and Social Care Act 2003 imposes a duty on the national health service to put and keep in place arrangements for monitoring and improving the quality of health care including the promotion and protection of public health. Strategic health authorities have the role of performance managing primary care trusts (PCTs) and NHS hospital trusts, including their public health responsibilities.

The targets in the Priorities and Planning Framework, 2003–06, published in October 2002, and the performance indicators for PCTs (for example, those for 2003–04, published by the Commission for

Health Improvement in December 2003), include several related to public health. 2003–04 will be the second year for PCT ratings and this represents real progress in the performance management of public health. The Commission for Healthcare Audit and Inspection will take over responsibility for the ratings process from April 2004.

Mr. Burstow: To ask the Secretary of State for Health what arrangements have been made to collect and analyse the annual reports of directors of public health; and what guidance he has given to ensure comparability between reports. [144792]

Miss Melanie Johnson: Strategic health authorities are responsible for agreeing local national health service plans informed by these reports. In 2002 the Department of Health commissioned guidance for directors of public health on the production of their Annual Reports, which was published in 2003 by the Faculty of Public Health. We are in discussion with SHAs about ways of assessing the impact of these reports, in their performance management role.

Raloxifene

Chris Grayling: To ask the Secretary of State for Health what representations he has received from *(a)* patients suffering from osteoporosis and *(b)* groups representing them about the recent National Institute for Clinical Excellence assessment of Raloxifene; and how many patients have been prescribed the drug in each of the past three years. [150038]

Dr. Ladyman: The Department has had no formal representations from patient groups on the subject, but has received a number of letters.

Information on the number of people who receive medicines, or reasons why a drug was prescribed is not available. Information on how many prescription items of Raloxifene Hydrochloride were dispensed is shown in the table.

Number of prescription items of Raloxifene Hydrochloride that were dispensed in the community in England from 2000.

	Number of prescription items
2000	79,944
2001	118,950
2002	160,716
2003[1]	138,841

[1] January to September

Source:
Prescription Cost Analysis (PCA) data from the Prescription Pricing Authority.

Refusal of GP Referrals (Avon)

Mr. Webb: To ask the Secretary of State for Health if he will list the categories of treatment for which health trusts in the Avon area are refusing to accept referrals from general practitioners; what estimate he has made of the number of patients who have been refused in each case; and if he will make a statement. [149171]

Ms Rosie Winterton *[holding answer 19 January 2004]:* The information requested is not held centrally. It is for primary care trusts to ensure that suitable commissioning arrangements are in place. HSC 2002/007 (Securing Service Delivery: Commissioning Freedoms of Primary Care Trusts) and HSC 1998/198 (Commissioning in the new NHS) provide further information.

Residential Care

Adam Price: To ask the Secretary of State for Health (1) how many people in poor health in England have been located in residential care in each of the last six years; [148924]

(2) what the *(a)* total and *(b)* average amount contributed by people in poor health in England located in residential care was in the last period for which figures are available. [148926]

Dr. Ladyman: Information is not held centrally in the form requested. The 2001 census included questions on where people lived and whether they considered themselves to be living with a limiting long-term illness. According to the census, there were 324,192 non-staff residents in care homes, of which 303,908 said they had a limiting long-term illness.

Information is not available on the total and average amount contributed by people with poor health. Figures are only available showing the absolute levels of sales, fees and charges recorded by local authorities as income against nursing and residential care. The latest available figures are shown in the table.

Adults under 65 and older people 2001–02

£000

Residential care	*Sales fees and charges*
Nursing home placements	532,642
Residential care home placements	1,286,515

Salt Intake

Mrs. Iris Robinson: To ask the Secretary of State for Health what steps he is taking to limit the public's regular intake of salt. [148833]

Miss Melanie Johnson: As 75 per cent. to 80 per cent. of salt comes from processed foods, the Department has called on industry to take concerted action in reducing the salt content of processed foods. The Department, in partnership with the Food Standards Agency (FSA), held a salt stakeholders meeting to highlight the role of all sectors, including industry, health and consumer bodies, on 10 November 2003. I have asked the industry to provide plans of action for reducing the salt content of foods by 27 February.

The Department and the FSA have jointly written to all public procurement bodies to help in achieving the reductions in salt intake as recommended by the Scientific Advisory Committee on Nutrition by focussing on the salt content of processed foods as part of their procurement processes.

The FSA has set salt targets—to reduce average salt intake by 10 per cent., by 2005–06 and in the long term, to reduce the average population intake by a third over the next five years—bringing intakes down to the recommended six grams per day.

The Department and the FSA communicate the importance of reducing salt in the diet to the public and health professionals through various channels, including leaflets, websites and through NHS-Direct.

Sensory Impairment

Mr. Allan: To ask the Secretary of State for Health (1) for what reason sensory impairment does not feature on the list of priorities for research published on his Department's website; [149704]

(2) for what reason none of the research and development work on assistive technology listed in his Department's statutory report that was laid before Parliament in November 2003 related to sensory impairment. [149726]

Miss Melanie Johnson *[holding answer 21 January 2004]:* The report, published in November 2003, outlines a selection of the research and development activity relating to assistive technology funded by the Government in 2002. Full details of all the work funded are available on the Foundation for Assistive Technology website at www.fastuk.org. The website contains details of some twenty Government-funded projects related to sensory impairment that are current or were completed in 2003.

The report for 2001 contains sections on navigational aids for people with visual impairments and technologies to assist deaf and hearing-impaired people. Projects relating to sensory impairment will also be highlighted in the report for 2003. This will be laid before Parliament by July 2004.

The Department's website lists major strategic research developments in key Departmental priority areas, including cancer, mental health and coronary heart disease. In the national health service, research priorities are identified through widespread consultation with those using, delivering and managing services. They take account of the burden of disease, potential benefits and departmental objectives as well as the responsibilities and work of other funders—including the charities. Current projects relating to sensory impairment include a £0.3 million study of the acceptability, benefit and costs of early screening for hearing disability, and a £0.8 million study of interventions for mild to moderate permanent childhood hearing impairments identified by neonatal hearing screening.

Sexually Transmitted Diseases

Dr. Pugh: To ask the Secretary of State for Health what changes there have been to the rate of sexually transmitted diseases in the Southport and north Sefton area in the last five years. [148488]

Miss Melanie Johnson: The rate of diagnoses of the five principal sexually transmitted infections—infectious syphilis, uncomplicated gonorrhoea, uncomplicated chlamydia, genital herpes-first attack, and genital warts-first attack—by sex and age group from genito-urinary medicine clinics in the North West of England over the last five years (from 1998–2002) are shown in the following tables.

Table 1: Rates of diagnoses of infectious syphilis (primary and secondary) by sex and age group, GUM clinics, North West England, 1998–2002

			Rates (per 100,000 population)						
	Sex	Region	13–15	16–19	20–24	25–34	35–44	45+	Total
1998	M	North West	0.0	0.0	0.5	1.1	0.4	0.1	0.2
1999	M	North West	0.0	0.6	3.8	2.7	1.3	0.1	0.9
2000	M	North West	0.0	0.0	3.7	6.5	4.6	0.5	2.0
2001	M	North West	0.0	2.9	18.8	12.0	10.0	1.8	5.3
2002	M	North West	0.0	5.2	16.7	17.9	11.7	2.2	6.3
1998	F	North West	0.0	0.0	0.5	1.6	0.4	0.1	0.2

Shrewsbury and Telford NHS Trust (Overspend)

Mr. Paul Marsden: To ask the Secretary of State for Health what the forecasted level of overspend is for this financial year for the Shrewsbury and Telford Hospital NHS Trust. [151463]

Dr. Ladyman: I am advised that Shrewsbury and Telford Hospital National Health Service Trust is forecasting a surplus of £4.1 million for the 2003–04 financial year.

Sir Roy Meadow

Tim Loughton: To ask the Secretary of State for Health what discussions he has held with the General Medical Council about the possibility of accelerating its investigation into the record of Sir Roy Meadow. [151092]

Mr. Hutton *[holding answer 26 January 2004]:* No such discussions have taken place.

South Sefton Primary Care Trust

Mrs. Curtis-Thomas: To ask the Secretary of State for Health (1) what the South Sefton Primary Care Trust *(a)* network and *(b)* boundaries are; [150143]

(2) how many *(a)* diabetologists, *(b)* senior nurses, *(c)* paediatric diabetologists, *(d)* paediatric senior nurses, *(e)* psychologists, and *(f)* other diabetes specialist staff there are in South Sefton Primary Care Trust. [150144]

Miss Melanie Johnson: This information is not collected centrally. However it can be obtained from the following website: http://www.drfoster.co.uk/diabetes/objectlist.aspx?obid=271&w=1&p=1

The website can be accessed via www.diabetes.org.uk.

Strategic Health Authorities

Mr. Lansley: To ask the Secretary of State for Health when he expects to know how many staff were employed by strategic health authorities in September 2003. [149563]

Mr. Hutton: Subject to standard data integrity checks, current plans are to publish these figures—as part of the September 2003 national health service workforce census results on the Department's website—in February 2004.

Mr. Burstow: To ask the Secretary of State for Health what the latest financial position of each strategic health authority is, broken down by *(a)* forecast outturn, *(b)* financial risk, *(c)* brokerage required to achieve financial balance and *(d)* loans taken from the NHS Bank. [150462]

Mr. Hutton: Audited information on the strategic health authorities (SHAs) own financial position will be published in their individual annual accounts. This data will be available centrally in the autumn. We have no plans to publish un-audited information.

We have no plans to publish information on financial risk. It can be subjective, is affected by rapidly changing conditions and management action and as a result could be misleading.

We have no plans to provide brokerage to SHAs for the purpose of achieving financial balance.

In 2003–04, the NHS Bank has provided £152 million special assistance to the following SHAs:

Surrey and Sussex—£40 million

Avon, Gloucestershire and Wiltshire—£70 million

Thames Valley—£25 million

Kent and Medway—£17 million

Tees, East and North Yorkshire Ambulance Service NHS Trust

David Davis: To ask the Secretary of State for Health how much was spent on travel by directors of Tees, East and North Yorkshire Ambulance Service NHS Trust in each of the past three years. [143239]

Miss Melanie Johnson: Figures are only available for 2002–03. In this year, £7,122 was spent on travel by the directors of the Tees, East and North Yorkshire Ambulance Service National Health Service Trust.

Source:

Tees, East and North Yorkshire Ambulance Service NHS Trust

Weston Area Health Trust

Brian Cotter: To ask the Secretary of State for Health when his Department will appoint a Director of Infection Control for the Weston Area Health Trust. [147604]

Miss Melanie Johnson: Designation of the director of infection prevention and control is a local decision, but I can report that such a director has been designated for the Weston Area Health Trust.

Working Time Directive

Tony Baldry: To ask the Secretary of State for Health (1) what the value is of bids that have been submitted by NHS hospital trusts for extra resources to respond to the EU Working Time Directive; [149340]

(2) what request in respect of the EU Working Time Directive he has received from the Oxford Radcliffe NHS Trust for *(a)* extra medical staff and *(b)* extra resources. [149342]

Mr. Hutton: This information is not held centrally. Local delivery plans and financing of these plans is a matter for strategic health authorities and local trusts, including planning for implementation of the Working Time Directive for doctors in training.

Tony Baldry: To ask the Secretary of State for Health if he will make a statement on the action being taken by the Government to help smaller general hospitals respond to the EU Working Time Directive. [149343]

Mr. Hutton: A substantial programme of work is currently under way within the national health service to support implementation of the Working Time Directive (WTD). This includes 20 national WTD pilot sites and innovative work locally as part of a larger programme of modernisation and improvement to services.

Strategic health authorities are currently working with their respective trusts locally on plans to achieve compliance for doctors in training from August 2004.

WORK AND PENSIONS

Appeals

Paul Holmes: To ask the Secretary of State for Work and Pensions how many appeals against benefit decisions were *(a)* heard and *(b)* decided in the appellant's favour in the last 12 months, broken down by benefit; and if he will make a statement. [147814]

Maria Eagle: This is a matter Christina Townsend Chief Executive of the Appeals Service. She will reply to the hon. Member.

Letter from Christina Townsend to Mr. Paul Holmes, dated 27 January 2004:

The Secretary of State has asked me to reply to your question regarding how many appeals against benefit decisions were *(a)* heard and *(b)* decided in the appellant's favour in the last 12 months broken down by benefit.

The attached table shows the figures for the period December 2002-November 2003.

I hope this reply is helpful.

Number and Percentage of Appeals found in favour of the Appellant by benefit: December 2002 to November 2003

	Benefit Caseload	*Cleared at Hearing*	*Found in Favour*	*% found in Favour*

Child Maintenance

Vera Baird: To ask the Secretary of State for Work and Pensions how many and what percentage of child support cases are being assessed using the *(a)* old and *(b)* new system for calculating child maintenance liability. [144851]

Mr. Pond *[holding answer 18 December 2003]:* The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Ms Vera Baird dated 27 January 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked how many and what percentage of child support cases are being assessed using the *a)* old and *b)* new system for calculating child maintenance liability.

As at 30 September the Agency held around 1 million cases within its systems. At that date around 30,500 cases (just over 3%) had calculations made under the new arrangements for calculating child maintenance liability. The balance refers to cases either progressing toward a calculation or assessment or to cases assessed in accordance with the previous arrangements.

Child Support

Dr. Stoate: To ask the Secretary of State for Work and Pensions what progress is being made with transferring individual child support cases which are still subject to the rules of the old system of child support to the new system; and if he will make a statement. [150994]

Mr. Pond: I refer the hon. Member to the Written Answer I gave the hon. Member for Castle Point (Bob Spink) on 18 December 2003, *Official Report*, column 1092W.

Plans for transferring the old scheme caseload to the new scheme have yet to be finalised.

Citizenship Pension

Ms Atherton: To ask the Secretary of State for Work and Pensions if he will commission further investigation into the effects of the proposal in the House of Lords Select Committee on Economic Affairs' Report, Aspects of the Economics of an Ageing Population, for a citizenship pension based on years of residence. [150395]

Malcolm Wicks: We are assessing the implications of the recommendations made by the House of Lords Select Committee on Economic Affairs in their report Aspects of the Economics of an Ageing Population and will respond in due course.

Civil Servants

Dr. Cable: To ask the Secretary of State for Work and Pensions how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* Central London and *(b)* Greater London. [150276]

Maria Eagle: At 23 January 2004 the total space occupied by the Department for Work and Pensions in London is 286,569 square metres. This covers all the space we occupy within the London Government Office Region whose external border is the M25.

This figure includes space that is used for offices for civil servants and that used to provide public caller facilities.

The space we occupy is not divided between Central and Greater London but is recorded according to which district it is located in.

The breakdown of space occupied by district is in the table.

Breakdown of space occupied by district

District	*M*[2]
Brent Harrow and Hillingdon	28,403
Central London[1]	67,399
City and East London	22,061
Lambeth Southwark and Wandsworth	44,471
North East London	25,102
North London	18,683
South East London	16,162
South London	37,510
West London	26,778
London Government Office Region	286,569

[1] Central London includes the areas covered by the London Boroughs of Islington Camden, City of Westminster and Kensington and Chelsea.

Notes:

The districts are Jobcentre Plus districts. Figures include space occupied by all DWP businesses.

Departmental Advertising

Mr. Willetts: To ask the Secretary of State for Work and Pensions (1) what the total expenditure on *(a)* information campaigns and *(b)* advertising was for his Department in each year since 1997; [146015]

(2) what the total expenditure on information campaigns and advertising was for his Department for each year since 1997. [146007]

Maria Eagle: The Department for Work and Pensions was formed in June 2001. Between that date and March 2003, the Department spent a total of £35,031,354 alerting people to their rights, responsibilities and entitlements through information campaigns. Of this sum, £18,788,328 was spent on advertising using television, radio, cinema and press media. Information broken down by year is in the table.

£

	Total publicity costs	*Advertising costs*
June 2001 to March 2002	22,727,979	13,787,594
April 2002 to March 2003	12,303,375	5,000,734
Totals	35,031,354	18,788,328

Notes:

1. Machinery of Government changes during the period 1997 to 2001 mean that like-for-like figures are not obtainable without disproportionate cost. During this time communications activity was accounted for under different systems in the agencies, Headquarters and the Department for Education and Employment, part of which transferred to the Department for Work and Pensions.
2. All costs exclude VAT
3. Advertising costs are total publicity costs excluding all production costs.
4. Information campaigns costing under £250,000 have not been included as a disproportionate cost would be incurred in compiling these figures.

Departmental Staff

Mr. Russell Brown: To ask the Secretary of State for Work and Pensions what percentage of staff employed within his Department are over 55 years of age; and what *(a)* number and *(b)* percentage of staff recruited over the last 12 months are over 55 years of age. [145985]

Maria Eagle: I refer the hon. Member to the reply given to him by my right hon. Friend the Minister of State for the Cabinet Office (Mr. Douglas Alexander) on 20 January 2004, *Official Report*, volume 416, column 1130–34W.

Departmental Staff Sickness

Mr. George Osborne: To ask the Secretary of State for Work and Pensions what the *(a)* total number of days lost due to staff sickness and *(b)* average number of days off sick per member of staff in his Department and each of its executive agencies was in each of the last five years. [148850]

Maria Eagle: The information requested is not available in the format requested. Such information as is available is in the tables.

Table 1—Sickness absence information for DWP and the former DSS

Department	Year	Working days lost	Working days available	Average number of working days Lost
DSS	1999–2000	1,057,549.2	22,086,808.8	12.0
DSS	2000–01	1,085,307.5	22,024,101.1	12.3
DSS	2001–02	1,039,208.8	22,895,495.2	11.3
DWP	2002–03	1,674,435.3	34,054,324.0	12.3

Table 2—Sickness absence information for the DWP businesses in 2002–03

Business	Working Days Lost	Working Days Available	Average Number of Working Days Lost
Child Support Agency	147,761.9	2,891,913.6	12.8
Disability and Carers Service	93,163.4	1,928,378.8	12.1
Jobcentre Plus	1,141,339.7	21,987,970.3	13.0
Pension Service	139,165.4	3,504,399.6	9.9
Appeals Service	12,099.3	237,570.5	12.7

Notes:

1. The Department for Work and Pensions (DWP) was created in June 2001. Due to the migration of businesses into and out of the newly forming Department, and differences in calculation methods, figures for the Department as a whole are only available from April 2002.
2. The information in table 1 covers the years April 1999 to March 2002 relating to the former Department of Social Security (DSS), the main predecessor Department in place prior to the formation of DWP, and for DWP for April 2002 to March 2003.
3. Figures have been provided for DSS and DWP for each full operational year since 1999. Sickness absence information for the current year, April 2003 to March 2004, will be available in spring 2004.
4. The information in table 2 relates to the DWP businesses for the period April 2002 to March 2003.
5. The number of working days lost and working days available recorded for the DWP businesses in table 2 do not match the total figures for DWP in table 1. This is because the figures in table 2 relate only to the current DWP businesses.

Disability Living Allowance

John Barrett: To ask the Secretary of State for Work and Pensions pursuant to his answer of 15 December 2003, *Official Report*, column 690W, on disability living allowance, how many claimants are aged under 60 years in each case. [147778]

Maria Eagle: The numbers of DLA claimants, under 60 years of age in the geographical areas requested, are contained in the tables. Since the earlier answer was given, figures for the quarter ending 31 August 2003 have now become available and are set out in the tables.

DLA recipients in Edinburgh local authority by age as at 31 August 2003

Thousands

	All	Under 60	60 and over

IAD Information Centre.

Mr. Webb: To ask the Secretary of State for Work and Pensions what the cost would be of increasing the upper age limit on claiming disability living allowance to (i) 70, (ii) 75 and (iii) 80 years; what estimate he has made of the likely number of beneficiaries; and what take-up assumptions are made in this calculation. [150450]

Maria Eagle: The requested information is not available. The effect of increasing the upper age limit for claims to Disability Living Allowance would be to enable people aged 65 and over to claim and qualify for the mobility component and the lowest rate care component of the allowance. Entitlement to these and the other components of the allowance can be reliably established after a claim has only been made and the mobility and care needs of the customer assessed. There are no reliable data available on which estimates could be made of the number of people aged 65 and over who might be entitled to either the mobility component or the lowest rate care component of Disability Living Allowance if they were to make a claim. The higher and middle rate care components of Disability Living Allowance have the same entitlement conditions as Attendance Allowance which is available to people aged 65 and over when they claim help with their disability-related extra costs.

EU Enlargement

Andrew Selous: To ask the Secretary of State for Work and Pensions what entitlement to pension credit nationals of the EU accession countries will have if they come to live in the United Kingdom. [151069]

Malcolm Wicks: Under European law, a national of a member state must generally enjoy the same access to social security benefits as a national of the state of residence. Entitlement to income-related benefits and pension credit is subject to the habitual residence test, which nationals of the EU accession countries would need to satisfy. This acts as a deterrent to benefit tourism.

Incapacity Benefit

Mr. Goodman: To ask the Secretary of State for Work and Pensions how many people claimed incapacity benefit in each year since 1997, broken down by the condition that enables them to claim this benefit; and if he will make a statement on trends in claims. [148639]

Maria Eagle: The overall number of people claiming Incapacity Benefit (IB) has risen from 2.37 million in August 1997 to 2.4 million in August 2003; this slight increase reflects a number of factors such as demography and changes in the characteristics of those claiming. The rate at which the caseload is increasing has been reduced dramatically and, in recent years, people with mental health disorders are the only broad category of diagnosis not to see a reduction in the numbers claiming.

"Pathways to Work—Helping people into employment", published November 2002, set out a strategy for enabling people on IB to move into work. The first tranche of three pilot areas (Bridgend and Rhondda Cynon Taff; Renfrewshire, Inverclyde, Argyll and Bute; and Derbyshire) went live from October 2003; indications after the first seven weeks are very encouraging, with positive feedback from customers and over 150 people moving back into work. A further tranche of four areas (Gateshead and South Tyneside; Somerset; Essex; and East Lancashire) are on track to go live in April.

The information is in the table.

Leak Inquiries

Richard Ottaway: To ask the Secretary of State for Work and Pensions if he will list occasions on which his Department has conducted an inquiry into alleged leaks from members of staff since 1997; and if he will list the occasions on which the names of those persons accused of leaking information from his Department have been made public *(a)* by the Government and *(b)* by way of another source. [147191]

Maria Eagle: Since April 1997, the Department has conducted an investigation into a suspected leak of sensitive information on 31 occasions.

In line with exemptions 1(a) and 7(b) set out in Part II of the Code of Practice on Access to Government Information, it has been the practice of successive governments not to comment on the outcome of such inquiries in order to safeguard security and investigative arrangements. However, I can confirm that the Department has not made public the name of any individual under investigation. I am not aware of any disclosure by other sources.

Low-income Households

Hugh Bayley: To ask the Secretary of State for Work and Pensions how many children *(a)* in England and *(b)* in each English region there were in households with income below half of the national average (i) before housing costs and (ii) after housing costs in each year since 1994–95. [148810]

Mr. Pond: The latest available information relating to the financial year 2001–02 can be found in the publication 'Households Below Average Income 1994–05 to 2001–02', a copy of which is available in the Library.

Year-on-year comparisons of this information at a regional level are not advisable as changes are likely to be small in relation to sampling variation. Results for English regions are presented as percentages of children, not numbers; this is because the data does not provide robust estimates of numbers at this level.

Pension Credit

John Thurso: To ask the Secretary of State for Work and Pensions how many pensioners were in recept of pension credit in Scotland as at *(a)* 31 October 2003, *(b)* 30th November 2003 and *(c)* 31 December 2003. [150399]

Malcolm Wicks: The information requested is not available for 31 October. The information for 17 October, 30 November and 31 December is given in the table.

Recipients of Pension Credit, Scotland, October—December 2003

17 October 2003		*30 November 2003*		*31 December 2003*	
Households	Individuals	Households	Individuals	Households	Individuals
201,555	234,835	217,065	255,575	223,060	263,290

Notes:
1. Figures have been rounded to the nearest five.
2. Figures relate to the Geographical Government Office Region (GOR) of Scotland.

Pensioner Couples

Mr. Flook: To ask the Secretary of State for Work and Pensions how many pensioners who receive the basic state pension live together as man and wife but claim two single pension entitlements; what estimate he has made of the additional cost to the Exchequer of such claims compared with the cost if such people claimed only the married persons' entitlement; and if he will make a statement. [150602]

Malcolm Wicks: An individual's entitlement to state pension depends on the national insurance contributions paid during his or her working life. however, for married couples, provision is made for a spouse to become entitled to a state pension based on the other spouse's national insurance contributions. There is no such thing as married persons' entitlements. Therefore, we are unable to provide the information requested.

Pensions

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the annual cost of increasing the state pension in line with the usual UK uprating for UK citizens who reside in countries where their UK state pension is frozen. [150455]

Malcolm Wicks: To bring everyone up to the current rate of State Pension they would receive if they had remained in the UK, but not to pay arrears, could cost around 400 million in 2003–04.

Note:
Costs have been calculated using March 2003 Retirement Pension administrative data and the latest HMT Economic Assumptions.

Procurement (Outsourcing)

Norman Lamb: To ask the Secretary of State for Work and Pensions if he will make a statement on his

Department's procurement policy with regard to offshore IT and call centre outsourcing; whether his Department is outsourcing IT and call centre jobs to offshore companies; to which countries his Department has outsourced these jobs; how much his Department has spent on this outsourcing in each of the last two years; and how much has been budgeted for this purpose for the next two years. [147591]

Mr. Browne: The Department has no plans to outsource to countries abroad work performed by DWP call centre staff. The Department contracts for IT delivery work with IT providers, many of whom are worldwide organisations. There have been no specific IT contracts targeted offshore.

Progress2Work

Mr. George Osborne: To ask the Secretary of State for Work and Pensions (1) what proportion of the £40 million allocated to Progress2Work has been spent; [147910]

(2) what the average cost is of each Progress2Work participant who has been found sustained employment; [147912]

(3) what percentage of participants in Progress2Work have been placed in sustained employment. [147913]

Mr. Browne: In April 2001, £40 million was allocated to enable Jobcentre Plus to develop Progress2Work provision. To date approximately 22.5 per cent. of this budget has been spent.

7,797 people had started Progress2Work by the end of November 2003. Of these 1,402 people had been helped into work; 968 were still receiving in work support from their provider and a further 434 were in sustained employment. This represents 5.6 per cent. of the total participants.

Progress2Work is an evolving programme, phased in over 3 stages, with over 50 per cent. of participants joining in the last 6 months. The final phase contracts are still being put in place. The cost of a job and sustained job outcome will continue to drop as more participants move into employment. Currently costs per job outcome come out at £7,229 and at £23,136 per sustainable job.

Progress2Work has been effective at helping this very disadvantaged group back into employment. The proportion of current participants who are in supported job outcomes is approximately 20 per cent. Additionally there is also a consistent increase in the numbers moving from Progress2Work into employment. Costs and outcomes for Progress2Work have not yet stabilised as the programme is still developing.

Transfer Payments

Mr. Flight: To ask the Secretary of State for Work and Pensions what the cost of transfer payments, including social security benefits and tax credits directed at children and at people of working age, was in each year since 1991–92; and what projections have been made for the cost in *(a)* 2003–04 and *(b)* future years. [147377]

Mr. Pond: The information for social security benefits administered by the Department for Work and Pensions is shown in the table, and is consistent with forecasts published in the pre-Budget Report on 10 December 2003.

The information is drawn from DWP's Benefit Expenditure Table 5 (Benefit expenditure by age-based client group, Great Britain, 1991–92 to 2005–06), which may be found on the Department for Work and Pensions website at: http://www.dwp.gov.uk/asd/asd4/expenditure, asp. Forecasts of expenditure will next be updated at Budget 2004.

Tax credit expenditure and forecasts, and child benefit expenditure and forecasts from 2003–04 onwards, are the responsibility of the Inland Revenue.

£ million

	Children[1]	*People of working age*
Outturn		
1991–92	8,411	22,342
1992–93	9,767	26,727
1993–94	10,676	30,035
1994–95	10,827	31,251
1995–96	11,277	32,913
1996–97	11,659	33,640
1997–98	11,816	32,791
1998–99	12,105	32,685
1999–2000	13,129	31,989
2000–01	13,144	31,215
2001–02	13,729	31,827
Estimated outturn		
2002–03	14,386	32,421
Plans		
2003–04	5,410	33,251
2004–05	4,022	34,296
2005–06	1,802	35,515

[1] Spending on children drops in 2003–04 as a result of the transfer of child benefit to the Inland Revenue; during 2003–04 and 2004–05, spending on children is also reduced by the transfer of child elements of income support and income-based jobseekers allowance to child tax credit.

War Disablement Pensioners

Mr. Chaytor: To ask the Secretary of State for Work and Pensions when the £10 earnings disregard for war disablement pensioners applying for income-related benefits was last uprated; what the value of the disregard would be on 1 April had it been uprated in line with the Rossi Index; and how many war disablement pensioners are benefiting from the £10 earnings disregard. [149536]

Malcolm Wicks: There is no specific earnings disregard for people receiving a war pension, although they can benefit from the standard disregards available to anyone claiming undertaking part-time work while claiming an income-related benefit.

However, in recognition of the special nature of war disablement pension, there is a disregard of these payments when assessing entitlement to income-related benefits. This was set at £5 when income support was introduced in April 1988, and would currently stand at £8.15 had it been uprated in line with the Rossi index; it was increased to its current level of £10 in April 1990, and carried over at the same level for the new pension credit when it was introduced in October 2003.

In the case of housing benefit and council tax benefit, most local authorities disregard war pensions in full and all but two disregard more than the statutory £10; from April this year, local authorities will get extra subsidy of up to 75 per cent. for any local discretionary scheme they operate.

The most recent figures show that 8,800 income support recipients benefit from the £10 disregard; the number of people receiving jobseekers allowance (income based) who benefit from this disregard is nil or negligible. Figures are not yet available for pension credit.

Note:
Figures have been rounded to the nearest hundred and are based on a 5 per cent. sample so are subject to a degree of sampling variation.

Source:
DWP Information Centre, 5 per cent. sample

Winter Fuel Payments

Sandra Gidley: To ask the Secretary of State for Work and Pensions how many households in *(a)* England, *(b)* Scotland, *(c)* Wales and *(d)* Northern Ireland qualify for the winter fuel payment; how many individuals in each receives a winter fuel payment; and what the estimated expenditure on winter fuel payment was in each country in 2003–04. [150291]

Malcolm Wicks: Full information about payments made this winter will not be available until after 30 March, the final date for submitting claims. It is not possible to say how many households will qualify for the Winter Fuel Payment, or how many individuals will receive a Winter Fuel Payment for winter 2003–04.

However based on the figures for 2002–03 we estimate the expenditure on Winter Fuel Payments for winter 2003–04 to be as follows:

Forecast expenditure on Winter Fuel Payments for 2003–04

£ million

Country	*Forecast Expenditure*
England	1,610
Wales	100
Scotland	170
Northern Ireland	50

Note:
Costs rounded to the nearest £10 million.

Written Answers to Questions

Wednesday 28 January 2004

PRIME MINISTER

East Midlands Airport

14. **David Taylor:** To ask the Prime Minister, when he next plans to use East Midlands Airport on official business. [151111]

The Prime Minister: I have no current plans to do so.

TREASURY

Bribery

Mr. Simon Thomas: To ask the Chancellor of the Exchequer how many reports of evidence of overseas bribery or suspected bribery by a UK company have been passed to the Inland Revenue's Special Compliance Officer by Inland Revenue staff since November 1997; and how many of these reports were passed on by Inland Revenue to the *(a)* prosecution and *(b)* law enforcement agencies. [151442]

Dawn Primarolo: Section 19 of the Anti-Terrorism (Crime and Security) Act 2001 provides a gateway for the Revenue to pass information about a possible criminal offence of bribery to other agencies where the evidence warrants such a disclosure. No such gateway existed before.

The Inland Revenue does not keep central records of cases referred to other agencies, but does not believe that the section 19 gateway has been used to date to refer a case of suspected bribery.

Currency Speculation

Mrs. Curtis-Thomas: To ask the Chancellor of the Exchequer what assessment he has made of the implications of taxing currency speculation. [150783]

John Healey: The Government remain to be convinced that a tax on currency speculation would be particularly effective in stabilising international capital flows. Indeed, a report by the European Commission—"Responses to the Challenges of Globalisation", February 2002—concludes that a currency transaction tax may actually increase volatility, since trading volumes would be likely to fall significantly following its introduction.

There are also a number of practical issues concerning the coverage and enforcement of a currency speculation tax that would need to be resolved before, as is often suggested, it could become a feasible source of development finance. In particular, the Government are concerned that it would be almost impossible to achieve global coverage for such a tax, creating huge scope for evasion. Even if we could secure agreement among the G7, without global application speculative foreign exchange transactions would gravitate to those jurisdictions which did not enforce the tax. This would make poorly regulated offshore financial centres more attractive to speculators, increasing the threat of instability in the financial system.

The Government are open to exploring the full range of options for raising finance for development and the Chancellor has proposed the International Finance Facility, a new mechanism which would raise significant additional resources. The Facility would be built on developed countries' long-term commitments to increased aid flows and, on this basis, would leverage additional resources from international capital markets. The Facility would seek to double aid from US$ 50 billion a year today to $100 billion a year in the years up to 2015—the sum needed to meet the internationally agreed Millennium Development Goals.

Ivory

Mr. Banks: To ask the Chancellor of the Exchequer if he will list *(a)* ivory and *(b)* ivory products seized by HM Customs and Excise in each of the last five years. [150961]

John Healey: Customs has made the following seizures of ivory and ivory products in each of the last five years:

	Ivory tusks		*Other items containing ivory*		
Calendar year	*Number of seizures*	*Number of items seized*	*Number of Seizures*	*Number of items seized*	*Total number of seizures*
2003	7	22	23	3324	30
2002	4	5	18	74	22
2001	6	8	27	649	33
2000	6	19	19	84	25
1999	7	12	11	13	18
Total	30	66	98	4,144	128

Tax Credit

Mr. Webb: To ask the Chancellor of the Exchequer how many staff will be employed in each of the two new tax credit contact centres; where they will be located; and when they will become operational. [147655]

Dawn Primarolo *[holding answer 13 January 2004]:* The two new Tax Credit Contact Centres—in Newcastle upon Tyne and Bathgate (West Lothian)—will each employ the equivalent of 500 new full time staff dedicated to answering tax credits calls. The Bathgate Contact Centre will, in addition, house the equivalent of a further 300 existing full time staff. The tax credits staff will be taking calls in time to support the continued delivery of tax credits from April 2004.

Andrew Selous: To ask the Chancellor of the Exchequer whether the habitual residence test in regard to child and working tax credits will apply to nationals of the EU accession states if they come to live in the United Kingdom. [151070]

Dawn Primarolo: No, the habitual residence test does not apply to tax credits just as it has never applied to Child Benefit. However, to qualify for tax credits, a person must be both present and ordinarily resident in the United Kingdom.

Tax Deductibility

Mr. Simon Thomas: To ask the Chancellor of the Exchequer how many times staff at the Inland Revenue have denied tax deductibility on payments, under section 577A of the Income and Corporation Taxes Act 1988, on the basis that the payment was *(a)* a suspected bribe and *(b)* business entertainment on an overseas contract, since November 1997. [151441]

Dawn Primarolo: Section 577A of the Income and Corporation Taxes Act 1988 denies, for the purpose of computing business profits, a deduction on expenditure incurred on any payment, the making of which constitutes an offence in the UK, or would do so if the payment were made in the UK. The onus is upon the taxpayer not to claim a deduction on any such expenditure. The Inland Revenue does not keep central records of expenditure disallowed from deduction by its inspectors under this provision.

TRANSPORT

Advanced Driving Instructor Exams

Mr. Hoyle: To ask the Secretary of State for Transport if he will make a statement on the introduction of the new Advanced Driving Instructor part 1 examination; and what skills the examination will assess which are not covered by existing tests. [150015]

Mr. Jamieson: The driving instructor registration scheme involves periodic re-assessment of competence. We intend to use modern technology to assess instructor standards in an effective and efficient manner, as part of their supervision arrangements.

The new computer-based assessment will comprise a multiple-choice question test of knowledge and understanding of driving theory and instruction, plus a moving-image hazard perception test. The knowledge and understanding test draws on a bank of over 900 questions and is more comprehensive than when most instructors qualified.

Hazard perception testing has been a key part of the qualification process for learner car drivers, lorry drivers, bus drivers, motor cyclists, potential instructors and driving examiners since November 2002. Extending it to driving instructors who have not been assessed in this key skill will help their standards maintenance and professionalism and result in a driving instructor profession better placed to deliver high-quality instruction.

We want to ensure that when the public, often young people, buy driving lessons they can have confidence that the instructor they choose will have kept up to date with developments in the learning-to-drive syllabus and be familiar with how the hazard perception test works.

Central Railway

Mr. Peter Ainsworth: To ask the Secretary of State for Transport if he will publish the findings of the Strategic Rail Authority's latest study on the Central Railway proposal; and if he will make a statement. [151250]

Mr. McNulty *[holding answer 27 January 2004]:* We have no plans to do so at present given the commercial sensitivity.

Civil Service (Disabled People)

Mr. Goodman: To ask the Secretary of State for Transport if he will set out the number of employees in his Department who have a disability, broken down by disability type. [148993]

Mr. McNulty: Employees in the Department for Transport, who have informed the Department that they have a disability, are recorded in the following table. The figures given are at April 2003.

Type of disability	*Count*
Hearing	13
Learning difficulties	[1]
Mental illness	[1]
Mobility impairment	12
Physical co-ordination difficulties	18
Visual	10
Unspecified[2]	8
Total	62

[1] Indicates that the number is less than 5.
[2] Where a person has informed the Department that they are disabled under the Disability Discrimination Act definition but chosen not to inform the Department about the nature of their impairment/s.

While employees are encouraged to inform the Department that they have a disability, especially where an adjustment may better enable them to work to the best of their ability, they are not required to do so. It is likely that the numbers of disabled employees is actually higher. The Department is actively involved in the Cabinet Office run Disability Working Group. The group seeks to improve information on disabled civil servants both by, examining why employees are reluctant to pass on information on their impairments and, the approaches used to collect information.

Coastguard Service Vehicles

Mr. Hoyle: To ask the Secretary of State for Transport how many vehicles used by the coastguard service were built in *(a)* the UK, *(b)* the EU and *(c)* outside the EU, broken down by make of car. [151199]

Mr. Jamieson: The number of vehicles used by the HM Coastguard service is listed in the following table:

Place	*Total*	*Broken down by make of car*
UK	59	Land Rover (29) Vauxhall Astra Estate (20) Ford Escort Estate (7) Leyland Daf (3)
EU	161	Ford Focus Estates (90) Nissan Terrano (67) Nissan Patrol (3) Renault Espace (1)

Place	Total	Broken down by make of car
Outside the EU	174	Toyota Hilux(115) Nissan Nivara (30) Vauxhall Brava (15) Nissan Pick-up (6) Toyota Colorado (4) Mitsubishi (3) Nissan Xtrail (1)

Drivers (Bioptics)

Mr. Heath: To ask the Secretary of State for Transport whether European nationals who are licensed to drive in other EU member states using bioptics are allowed to drive using bioptics in the United Kingdom; and if he will make a statement. [151309]

Mr. Jamieson: One of the principal themes of the second EC Directive on driving licences (Directive 91/439/EEC) is the mutual recognition of licences, and all entitlements gained, between member states. Drivers from other member states who become resident in the UK, however, are subject to UK legislation and procedures. Information provided to such drivers informs them of the requirement to notify the Secretary of State of any medical conditions, including visual defects, that may affect fitness to drive. A driver who notified a visual defect or condition and was found to be unable to meet the required standards in relation to vision would not be licensed to drive in the UK despite the use of bioptic lenses.

Mr. Heath: To ask the Secretary of State for Transport (1) what assessment he has made of whether the European Directive on Driver Licensing allows the use of bioptics for driving; and if he will make a statement; [151310]

(2) what policy has been formulated by the Honorary Medical Advisory Panel on Driving and Visual Disorders regarding the use of bioptics for driving; and if he will make a statement. [151311]

Mr. Jamieson: Any assessment as to the degree to which the use of bioptic lenses for driving complies with the second EC Directive on driving licences (Directive 91/439/EEC) requires the advice of my Department's Honorary Medical Advisory Panel on Vision and Driving.

The Medical Advisory Panel advises on, rather than formulates, policy in relation to vision and driving. It has considered the issue of bioptic lenses and driving but feels that it is important to gain an understanding of other European member states' views and experience of this aid to vision before definitive advice can be given. I expect to receive the panel's advice, therefore, when the expert medical working group recently established by the EC Committee on the Driving Licence has considered the issue and the results of its discussions are known. The working group is expected to meet three or four times during 2004 and to report its results in approximately 18 months.

Driving Instructors

Mr. Burns: To ask the Secretary of State for Transport how many attempts approved driving instructors will be permitted to pass the test; whether ADIs will be removed from the register if they fail the test; when the Government intend to bring in these changes; and if he will make a statement. [149828]

Mr. Jamieson *[holding answer 26 January 2004]:* Driving instructors will not be limited in the number of attempts they are allowed to pass the computer-based assessment we are adding to their supervision arrangements. Only if an instructor was unable to pass the assessment at the end of a two-year period would action be taken to remove the person from the register.

We intend to introduce the assessment this autumn. It will comprise a multiple-choice question test of knowledge and understanding of driving theory and instruction, plus a moving-image hazard perception test. The knowledge test draws on a bank of over 900 questions and is more comprehensive than when most instructors qualified.

Hazard perception testing has been a key part of the qualification process for learner car drivers, lorry drivers, bus drivers, motor cyclists, potential instructors and driving examiners since November 2002. Extending it to driving instructors who have not been assessed in this key skill will help their standards maintenance and professionalism and result in a driving instructor profession better placed to deliver high-quality instruction.

We want to ensure that when the public, often young people, buy driving lessons they can have confidence that the instructor they choose will have kept up to date with developments in the learning-to-drive syllabus and be familiar with how the hazard perception test works.

East Midlands Airport

Keith Vaz: To ask the Secretary of State for Transport when he was notified that East Midlands airport was planning to change its name. [151060]

Mr. McNulty: The Department have received no formal notification from Manchester Airports Group, the owner of East Midlands airport, about the change of name. There is no requirement to notify the Department as it is a commercial decision for the airport operator.

Edinburgh Airport (Noise Pollution)

John Barrett: To ask the Secretary of State for Transport what estimate he has made of the number of households which will be subjected to *(a)* a noise level of (i) 63dBa Leq or more and (ii) 69dBa Leq or more and *(b)* an increase in noise level of 3dBa Leq or more directly as a result of the increased use of the existing runway at Edinburgh airport as outlined in the recent White Paper on Aviation. [150974]

Mr. McNulty: This information is set out in the Scottish Consultation Document and supporting technical reports. These estimate the number of people who would be affected by different levels of noise under a range of runway options at Edinburgh airport including maximum use of the existing main runway, greater use of the existing crosswind runway and development of a new close parallel runway. Our analysis suggests that by 2030, under the maximum use option, and assuming a 8dBA technology improvement,

there would be an increase of 300 people affected within the 63 dBA 16 hour Leq contour with no increase at the 69dBA 16 hour Leq contour. The equivalent figures with increased use of the crosswind runway are 800 and 200 respectively.

The numbers of houses within these contours in the maximum use case is estimated to be 400 at 63 dBA and 100 at 69 dBA. Under the crosswind option the equivalent figures are 600 and 100 respectively.

Information Technology

Mr. Allan: To ask the Secretary of State for Transport what audit mechanisms are in place to determine whether all Information Technology hardware and software products are being properly utilised in his Department. [151057]

Mr. McNulty: The Department maintains a list of approved hardware and software products and specific approval is required for any purchase not on that list. Microsoft desktop and server software is procured through Office of Government Commerce licensing arrangements. These licences are managed using software tools at the Microsoft licensing site. Other key software is licensed under a corporate agreement with Novell and is audited annually by them. The Department also utilises asset tracking and discovery software to monitor what other hardware and software is being used on the Department's network.

Liquid Petroleum Gas

Mrs. Helen Clark: To ask the Secretary of State for Transport how many tonnes of *(a)* 1,3-butadiene, *(b)* benzene, *(c)* particulates and *(d)* sulphur dioxide emissions he estimates have been saved as a result of the liquid petroleum gas duty rebate. [151037]

Mr. Jamieson: It is not possible to give a precise estimate. Liquefied petroleum gas is a clean fuel which results in very low emissions of a number of key air pollutants. It can have particular benefits, for example, when it is used as a substitute for diesel fuel in polluted urban areas. The nature and scale of the emissions savings, however, will depend on a number of factors, including the type of vehicle and fuel which is being replaced by LPG, and how and where it is being driven.

Mobile CCTV

Mr. Llwyd: To ask the Secretary of State for Transport whether funds retained by police authorities from fines imposed for exceeding speed limits may be used to set up mobile CCTV systems. [150019]

Mr. Jamieson: They cannot be used for this purpose. All fines resulting from speeding offences are paid to the courts. Funds returned to the safety camera partnerships (all these include the police) under the cost recovery scheme may only be used to cover the cost of purchasing, placing and operating speed and traffic light enforcement (safety) cameras.

Motor Vehicle Recovery

Mr. Chope: To ask the Secretary of State for Transport how many vehicles were recovered from motorways in the last year for which figures are available by *(a)* a private breakdown recovery service and *(b)* a contractor engaged by the police. [151249]

Mr. Jamieson *[holding answer 27 January 2004]:* This information is not available.

Road Accidents

Sue Doughty: To ask the Secretary of State for Transport how many road accident *(a)* injuries and *(b)* fatalities there were in each of the past 10 years, broken down by (i) children and (ii) adults. [150647]

Mr. Jamieson: The information requested is shown in the following table. These statistics have been published in the annual publications "Road Accidents Great Britain" (1993 to 2001) and "Road Casualties Great Britain" (2002), copies of which are in the Library.

Casualties from road accidents by severity and age: 1993–2002

Casualties

	Fatal			*Injuries*		
	Child	*Adult*	*Age missing*	*Child*	*Adult*	*Age missing*
1993	306	3,493	15	42,287	254,394	5,640
1994	299	3,320	31	44,853	260,512	6,344
1995	270	3,330	21	43,519	257,343	6,204
1996	270	3,304	24	44,567	266,682	5,731
1997	255	3,344	0	44,291	274,312	5,601
1998	206	3,213	2	43,239	272,708	5,844
1999	221	3,183	19	41,830	267,861	7,196
2000	191	3,211	7	39,524	269,511	7,839
2001	219	3,199	32	38,050	263,729	8,080
2002	179	3,221	31	34,510	257,015	7,649

Road Noise

Sue Doughty: To ask the Secretary of State for Transport if he will make a statement on Government strategy for decreasing the noise disturbances arising from main roads in residential areas, with particular reference to relevant measures in the Traffic Management Bill. [148369]

Mr. Jamieson: The Government recognise that traffic noise from main roads can be a significant nuisance, particularly where they run close to or through local communities. The Government are committed to reducing such noise and our strategy is to set vehicle construction standards that reduce noise at source wherever feasible and desirable on safety grounds. We also encourage the mitigation of noise with insulation, barriers, traffic management measures and low noise surfaces. The implementation of mitigation measures on the trunk road and motorway network, for which the Highways Agency is responsible, concentrates first on the most pressing locations. It is doing this by a variety of means, most importantly through a programme of re-surfacing all concrete roads with quieter materials by 31 March 2011 and re-surfacing blacktop roads with quieter materials as and when they require maintenance. In addition, the Government provides funds to local authorities to maintain local roads, though how much they spend and what they spend it on is their choice.

The primary aim of the Traffic Management Bill is to improve the smooth flow of traffic but there are a number of reasons for believing that it will also help with

noise problems. For example, better management of traffic incidents and street works will reduce the disruption caused to traffic and the noise created by slow-moving heavy traffic. It will also minimise the incentive for motorists to divert along adjacent residential roads.

The Government are also encouraging a substantial growth in investment in public transport. This will help reduce traffic noise by providing the public with a greater choice over how they travel.

Royal Train

Mr. Hoyle: To ask the Secretary of State for Transport how many times the royal train has been used in each of the last three years, broken down by journey. [151200]

Mr. McNulty: The royal train plays an important role in enabling members of the royal family to carry out their extensive official engagements throughout the UK. It is principally used for overnight travel and provides secure accommodation and secure mobile office facilities. In 2002–03, the train was used for 19 journeys; in 2001–02, for 15 journeys and 17 journeys in 2000–01. Full details of these journeys are provided in the appendices to the Annual Reports on the Grant-in-aid for Royal Travel by Air and Rail. Copies of these reports, which are prepared annually, are placed in the Libraries of both Houses.

Speed Cameras

Mr. Hoban: To ask the Secretary of State for Transport when determining where to site a speed camera, how far from the proposed site of a camera an accident can have occurred for it to justify that siting. [147154]

Mr. Jamieson: The distance from the proposed site within which accidents are counted takes account of the circumstances of each site, and may be between 400 and 1,500 metres, for fixed speed cameras.

Traffic Management Bill

Sue Doughty: To ask the Secretary of State for Transport if he will make a statement on the roles and duties that the Traffic Management Bill will accord to traffic managers and local traffic authorities to *(a)* respond to and *(b)* prevent traffic gridlock. [148371]

Mr. Jamieson: The Traffic Management Bill will require local authorities to appoint a Traffic Manager responsible for keeping traffic moving in their area. Neighbouring authorities will also have to work together to ensure traffic flows across the network as a whole.

Local authorities will need not only to manage existing problems but also to plan ahead, taking account of events they know about and making contingency arrangements for unforeseen incidents. They will have to do this in a way that does not compromise their other responsibilities such as for improving road safety.

The Bill will give authorities a number of additional powers to meet their new responsibilities. For example, they will be helped to deal with congestion caused by poorly planned and lengthy street works by greater control over when and where utility companies carry out street works. These powers will include the ability to specify what day of the week works can be carried out and at what times. They will be able to prevent certain roads from being dug up repeatedly by banning works on that road until a specified date. Any utility company wanting to carry out street works could be required to apply for a permit to do so. Utility companies failing to repair a road properly will face fines of up to £5,000.

Local authorities will also be given the ability to ensure that a number of moving traffic contraventions are enforced. This will include, for example, box junction and no right turn rules. These powers already exist in London. The Bill will extend them to cover the rest of England and Wales.

Lembit Öpik: To ask the Secretary of State for Transport what impact the Traffic Management Bill will have on motorcyclists; and if he will make a statement. [150142]

Mr. Jamieson: The Traffic Management Bill will give national and local highway authorities a number of additional powers and responsibilities to tackle congestion for the benefit of all road users. Authorities will be better able to manage their roads and the traffic using them. Motorcyclists, like other road users, will benefit from the reduced congestion and disruption. In particular, on local roads where much motorcycling takes place, local authorities will have a new network management duty aimed at keeping traffic moving in their area. Neighbouring authorities will also have to work together to ensure traffic flows effectively across the network as a whole. Again, motorcyclists will benefit from the better operation of the road network, along with other road users.

Mr. Donohoe: To ask the Secretary of State for Transport what is meant by serious traffic disruption in Part 4 of the Traffic Management Bill. [150201]

Mr. Jamieson: Section 56 of the New Roads and Street Works Act 1991 allows a street authority to direct an undertaker as to the times at which street works can be carried out, where they might otherwise cause serious disruption to traffic. Clause 42 of the Traffic Management Bill makes clear that this power includes the ability to direct not only the times but also the days on which works may or may not be carried out.

Whether or not there is likely to be serious disruption to traffic in the case of a particular proposed works must be determined by a street authority on the facts of the case. Guidance on the use of the current power is set out in the Code of Practice for the Co-ordination of Street Works and Works for Road Purposes and Related Matters, and we intend revising this guidance as part of producing regulations under the Bill. Ultimately, however, the interpretation of the law is a matter for the courts.

Mr. Donohoe: To ask the Secretary of State for Transport what assessment he has made of the impact of the streetwork provisions in the Traffic Management Bill on urban regeneration. [150202]

Mr. Jamieson: The aim of the street works provisions in the Traffic Management Bill are twofold. Firstly to reduce the disruption that these works cause to road

users, businesses and local residents and secondly to ensure that works are carried out to a high standard and to minimise the negative impact they can have on the environment and the appearance of streets. While each of these is an issue for both urban and rural areas, we believe that minimising the negative effect of these works is particularly important in helping to regenerate our cities.

Mr. Donohoe: To ask the Secretary of State for Transport what assessment he has made of the impact of the Traffic Management Bill on utilities infrastructure investment programmes, with particular reference to *(a)* water and gas mains replacement and *(b)* electricity cable renewal and upgrading. [150203]

Mr. Jamieson: The detail of those parts of the Traffic Management Bill which relate directly to utility works will be set out in regulations. We will be consulting extensively with utilities and utility regulators as part of drawing up these regulations, so that the revised legislative regime takes proper account of their investment programmes and does not put any unnecessary obstacles in the way of their carrying out these necessary works.

Mr. Donohoe: To ask the Secretary of State for Transport what plans the Government have to consult Ofgem on the additional costs envisaged from the introduction of permit schemes, as set out in the Traffic Management Bill. [150204]

Mr. Jamieson: Ofgem, together with Ofwat and Ofcom, are represented on the legislative working group set up by my Department which considered what provision should be included in the Bill, and which will continue to meet to consider the details of the secondary legislation which will underpin it. This will include looking at proposals for permit schemes and consideration of the possible costs involved. We shall continue to involve Ofgem and the other regulators closely as the proposals for regulations are developed.

Transport (Wales)

Mr. Wiggin: To ask the Secretary of State for Transport what discussions he has had with representatives of the National Assembly for Wales regarding the expansion of the road network in Wales. [151751]

Mr. Jamieson: None. The expansion of the motorway trunk road network in Wales is entirely a matter for the National Assembly for Wales who have devolved responsibility for these issues.

Vehicle Inspections

Simon Hughes: To ask the Secretary of State for Transport how many vehicles have been stopped for roadside checks by the Vehicles Inspectorate in London in each of the last five years for which figures are available; and how many *(a)* were found to have vehicle faults and *(b)* were motor cars and other non-commercial vehicles. [151073]

Mr. Jamieson *[holding answer 26 January 2004]:* The Vehicle and Operator Services Agency (formerly the Vehicle Inspectorate) conducts its enforcement activity within a network of 23 enforcement areas covering England, Scotland and Wales. Enforcement Area 15 (Metropolitan) covers the majority of London boroughs. The number of vehicles stopped at the roadside by the Vehicle Inspectorate in Enforcement Area 15 and the percentage found to have roadworthiness faults are shown in the following tables. Figures are only available for the last four years.

Spot checks carried out by the Vehicle Inspectorate (VOSA) between 1999–2000 and 2002–03 in Enforcement Area 15 (Metropolitan Area)

	Number of vehicles checked			
Vehicle category	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
HGV motor vehicles[1]	1,580	1,769	1,435	3,011
HGV trailers	284	337	170	358
HGV emissions	409	413	356	345
PSV vehicles[1]	480	898	851	547
PSV emissions	293	246	332	252

Percentage

	Prohibition rate[2]							
	Immediate prohibitions[3]				*Delayed prohibitions*[4]			
Vehicle category	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
HGV motor vehicles[1]	11.4	10.6	17.2	13.4	12.5	12.0	20.6	14.4
HGV trailers	10.6	8.0	7.6	11.2	12.3	11.6	12.9	16.8
HGV emissions	0.0	0.2	0.0	0.0	0.7	0.7	0.6	1.2
PSV vehicles[1]	4.6	5.1	5.3	7.1	2.3	4.8	7.3	6.4
PSV emissions	0.0	0.0	0.0	0.0	0.3	0.0	0.3	0.8

[1] Excludes emissions only checks, but includes foreign vehicles.

[2] Only one prohibition notice is issued per vehicle although it may contain a list of defects/offences where more than one has been found. The most serious defect/offence determines whether an immediate or delayed prohibition is issued.

[3] Immediate prohibition rate relates to all vehicles (including foreign vehicles).

[4] Delayed prohibition rate excludes checks on foreign vehicles. The Foreign Vehicles Act does not provide for the issue of delayed prohibitions to foreign vehicles.

Results of light vehicle roadside roadworthiness checks

	Number examined			
Vehicle category	*1999–2000*	*2000–01*	*2001–02*	*2002–03*

Vehicle Excise Duty

Mr. Webb: To ask the Secretary of State for Transport how many people benefit from the Vehicle Excise Duty exemption for people with the mobility component for disability living allowance; and what is the average amount of money they will save in 2003–04. [150449]

Mr. Jamieson: The latest available figures show that there are 1,548,512 people in receipt of the higher rate mobility component of disability living allowance. Of this figure, 790,000 claim the exemption from Vehicle Excise Duty (VED).

The financial value of a VED exemption is dependent on the age, engine size and carbon dioxide emissions level of a vehicle. This can be within the range of £75 to £165 per annum.

DEFENCE

Afghanistan

Mr. Lyons: To ask the Secretary of State for Defence what progress British forces have made in restricting the poppy harvest in Afghanistan. [150125]

Mr. Ingram: The United Kingdom has a comprehensive strategy to assist Afghanistan to end its opium trade. While our armed forces are not directly involved in the eradication of the opium poppy crop, their deployments with the International Security Assistance Force and the Provincial Reconstruction Team, and our support for local security forces, all help to contribute towards the counter-narcotics programmes of civilian law enforcement and development agencies. They also help the Afghans themselves to create the structures through which they can implement more effectively President Karzai's commitment to deal with both opium farming and trafficking in his country.

Bearskin

Norman Baker: To ask the Secretary of State for Defence pursuant to the answer of 10 December 2003, *Official Report*, column 463W, on bearskins, what species of bear's pelt is used to make the bearskin caps; whether this species is classified as endangered within the Convention on International Trade in Endangered Species; what steps the Department takes to ensure the taking of bears is a sustainable practice; and if he will make a statement. [150147]

Mr. Ingram *[holding answer 26 January 2004]:* Bearskin caps are made from the fur of the American black bear. This is listed under Appendix II of the Convention on International Trade in Endangered Species (CITES) as a species not currently rare or endangered, but which could become so if trade is not regulated, and all exports of American black bear

products from Canada must be accompanied by a CITES export license. CITES species in Canada are managed through the Canadian Wildlife Service and the American black bear is currently classified as not at risk by the Committee on the Status of Endangered Wildlife in Canada.

Bugaled Briezh

Andrew George: To ask the Secretary of State for Defence what military vessel manoevures took place in the vicinity of the Bugaled Briezh between 12.00 noon and 14.00 on 15 January. [150989]

Mr. Ingram *[holding answer 26 January 2004]:* Only two naval vessels were in the immediate vicinity of the Bugaled Briezh—HNLMS Dolfijn and HMS Tyne. HNLMS Dolfijn was surfaced and transitting to the start position of an Anti-Submarine Warfare Exercise. She was some 11 nautical miles away at 1252Z when a French fishing vessel reported the capsize of Bugaled Briezh. HMS Tyne was on Fishery Protection duties and was 22 nautical miles north-east of the trawler at this time. She then proceeded to the scene and was tasked by the Maritime Rescue Co-ordination Centre to co-ordinate the search.

Equipment Programmes

Mr. Soames: To ask the Secretary of State for Defence what assessment he is making of equipment programmes in relation to their key war fighting capabilities. [147274]

Mr. Ingram: The Defence White Paper (Cm 6041) noted the need to ensure that defence resources are directed at those capabilities which are most appropriate for future operations. The Department's annual planning round involves a thorough examination of defence costs and capabilities, and includes an assessment of the contribution of equipment programmes in meeting the policy set out in the White Paper.

Foreign Defence Equipment

Mr. Hoyle: To ask the Secretary of State for Defence how many foreign ships have been hired by his Department in each of the last five years. [150409]

Mr. Ingram: Freight-carrying ships chartered by the Ministry of Defence are categorized as either British or non-British registered. In the calendar year 2003, 58 non-British registered freight-carrying ships were chartered. I refer my hon. Friend to the answer given by my hon. Friend the Member for Kirkcaldy (Dr. Moonie) on 15 January 2003, *Official Report*, column 626W, to my hon. Friend the Member for Dover (Mr. Prosser) for details of all vessels chartered in earlier years.

Specialist ships chartered by the Ministry of Defence are categorized as either British or foreign-owned. The following foreign-owned specialist ships were chartered over the last five calendar years: 1999—eight, 2000—fourteen, 2001—four, 2002—twelve, 2003—nine.

Give as You Earn Scheme

John Barrett: To ask the Secretary of State for Defence how many and what percentage of staff in his Department contribute to a charity through the Give as You Earn scheme; how much money is donated to charity per month by staff in his Department through the scheme; and what steps he is taking to encourage greater participation in the scheme by staff in his Department. [143903]

Mr. Caplin: The answer to the question is, 1,315 civilian staff (approximately 1.4per cent.) contribute a total of £14,400 each month. These figures include Ministry of Defence Trading Funds.

Of course this represents only a single element of charitable donations in the Department. For example some £30,000 is paid each month direct from payroll to the Civil Service Benevolent Fund.

In 2004 we intend to remind all staff, by individual leaflet, of the benefits of donating to charity through the "Give as you Earn" scheme.

For the armed forces, the latest available figures are from December 2003. In this month 906 Naval Service personnel (2.2per cent.) contributed around £2,100 to the Charity Payroll Giving Scheme, with a further 1,273 personnel (3 per cent.) contributing around £8,800 through Voluntary Deductions from Pay. The Army figures for December show 21,069 personnel (12.26 per cent.) contributed £99,552 and the RAF £15,274 from 2,561 personnel (4.8 per cent.) through their respective Give as you Earn Schemes.

This represents only a single element of charitable donations in the Department. For example the equivalent of £120,000 per month (paid quarterly) is paid to the RAF Benevolent Fund directly from RAF pay.

In previous years the Department have published Defence Council Instructions (DCIs) and produced articles in the three main Service publications (Navy News, Soldier Magazine and RAF News) on the benefits of donating to charity through the "Give as you Earn" schemes. We intend to continue this effort into 2004.

Herbicides

Harry Cohen: To ask the Secretary of State for Defence whether the UK has bulk-stored herbicides with a view to possible military application; and if he will make a statement. [146707]

Mr. Ingram: The Ministry of Defence does not bulk-store herbicides.

Iraq

Harry Cohen: To ask the Secretary of State for Defence what complaints have been received about the adequacy of investigations into Iraqi deaths resulting from UK military action; and if he will make a statement. [142615]

Mr. Ingram: We have received a number of letters from members of the public and enquiries from the media some of which have expressed concern about investigations into Iraqi deaths allegedly caused by United Kingdom forces.

The most common concerns expressed have been about the speed with which investigations are carried out, their independence and whether their results would

be made public. In responding we make clear that investigations are thorough, which can take time; that both the Royal Military Police and, if called on, the single-service Prosecuting Authorities are fully independent of the chain of command; and that while the findings of investigations are subject to legal, operational and other security constraints, there may be some circumstances in which we are able to release certain details to entitled persons.

Adam Price: To ask the Secretary of State for Defence what his policy is on the use of hoods on Iraqi citizens in the course of their arrest or detention in Iraq. [147708]

Mr. Ingram: Current practice in Iraq is that hoods are not used on Iraqi citizens during or after their arrest.

Mr. Hancock: To ask the Secretary of State for Defence what information he has received on the smelting plant near Basra which is melting down tanks and armoured vehicles contaminated by depleted uranium; and what efforts are being made to identify and close down such facilities in the area controlled by British forces. [148056]

Mr. Ingram: There is no known legitimate operational smelting plant in the Basra region. A small number of illegal mobile smelting plants used for smuggled copper and aluminium have been found and closed down. There is no evidence they had been used to smelt tanks.

Military vehicles known to have been hit by DU munitions within the southern sector of Iraq controlled by the British military have been clearly marked. Arrangements are currently being negotiated with the US for a contractor to collect and store these military vehicles.

Andrew George: To ask the Secretary of State for Defence when the report on the accident involving two Royal Navy Sea King helicopters in Iraq in March 2003 will be published. [150990]

Mr. Ingram *[holding answer 26 January 2004]:* As is usual practice, on completion of the accident investigation, a copy of the findings of the Military Aircraft Accident Summary into the Royal Navy Sea King accident of March 2003 will be placed in the Library of the House. That investigation is not yet complete.

Mr. Paul Marsden: To ask the Secretary of State for Defence what assessment has been made of weapons used for the first time in battlefield conditions in the war on Iraq. [151373]

Mr. Ingram: Two weapons were used for the first time in Iraq, Storm Shadow and Maverick missiles.

Operational feedback is that both missiles were accurate and effective against a range of targets.

Overseas Deployments

Norman Baker: To ask the Secretary of State for Defence pursuant to his answer of 12 January 2004, *Official Report*, column 1124W, on overseas deployments, if he will list the countries where personnel are deployed other than those where they are stationed; and how many are deployed in each case. [151097]

Mr. Ingram *[holding answer 26 January 2004]:* I refer the hon. Member to the answer I gave on 26 January 2004, *Official Report*, column 67W to my hon. Friend the Member for Stroud (Mr. Drew).

Rape/Violence Against Women

Mr. McNamara: To ask the Secretary of State for Defence (1) what measures have been put in place to ensure that complaints of violence against women by UK military personnel employed overseas are properly investigated; [149666]

(2) if he will list the complaints received of violence against women, made against UK military personnel stationed abroad in the last 10 years. [149664]

Mr. Ingram: The armed forces do not tolerate any form of criminal behaviour and have well-established and effective procedures for dealing with allegations. Whether arising in the UK or overseas, complaints are thoroughly investigated and the relevant prosecution authorities consulted. Disciplinary action is taken as appropriate.

For troops serving overseas, the investigating authority is determined by the status and nationality of the complainant, the provisions of any Status of Forces Agreement or Memorandum of Understanding existing between the UK and the host nation.

Complete records of complaints of violence against women by service personnel are not held centrally, and the information requested could only be provided at disproportionate cost.

Road Construction (Parker Plan)

Mr. Key: To ask the Secretary of State for Defence what discussions *(a)* his Department and *(b)* agencies and companies operating on his behalf have had with Parker Plan road compaigners in respect of road construction in or near the south-east corner of Boscombe Down Airfield. [150806]

Mr. Caplin: None.

Royal Naval Reserve

Dr. Julian Lewis: To ask the Secretary of State for Defence how many members of the Royal Naval Reserve have *(a)* been called up and *(b)* served in Operation Telic; and how many have served for more than one tour. [150862]

Mr. Caplin: Up to 23 January 2004, 446 members of the Royal Naval Reserve had been called out for Operation TELIC, of whom 371 were accepted into service. Seven, all volunteers, have either completed more than one tour of duty or are currently doing so.

Royal Navy Projects

Mr. Martyn Jones: To ask the Secretary of State for Defence if he will make a statement on progress on the Royal Navy's *(a)* Surface Combatant Maritime Rotorcraft and *(b)* Future Anti-Surface Guided Weapon projects. [149542]

Mr. Ingram: The Surface Combatant Maritime Rotorcraft (SCMR) programme is currently nearing the end of its Assessment Phase. A Main Gate investment decision is expected later this year when, as with any other programme, the decision on Demonstration and Manufacture will be made, with the capability planned to be phased into service around the turn of the decade.

The Future Air to Surface Guided Weapon (FASGW) programme remains early in its concept phase. This includes studies into a range of solutions to provide a future Anti-Surface Warfare (ASuW) capability, superseding the Sea Skua missile currently carried by the Royal Navy Lynx helicopters. A final investment decision will be made at the programme Main Gate, currently planned for the second half of this decade, with the capability entering service during the first half of the next decade.

Security Passes

Mr. Oaten: To ask the Secretary of State for Defence how many security passes have been reported *(a)* lost and *(b)* stolen by staff in (i) his Department and (ii) departmental agencies in the last 12 months. [147978]

Mr. Caplin: Between 1 January 2003 and 31 December 2003, personnel employed at MOD establishments reported 2,012 passes lost and 90 stolen. During the same period, personnel employed at establishments of MOD agencies reported 882 passes lost and 23 stolen. The passes carry a photograph of the holder and have other features that inhibit their fraudulent replication. Therefore, the loss of such passes, in isolation, is not assessed to pose an increased threat, although this is kept under constant review.

TRADE AND INDUSTRY

National Power Supply

David Davis: To ask the Secretary of State for Trade and Industry what measures she is taking to ensure that the UK national power supply is protected from sabotage. [151257]

Mr. Timms: The Government provides protective security advice to key sectors and installations that are critical to the country's economic and social well-being. Our experience of domestic terrorist attacks over the past 30 years has shown that these arrangements have made an effective contribution to the counter-terrorism effort.

We provide tailored advice to a variety of industries, as well as to individual companies and public sector organisations, about how to make contingency arrangements and provide protective security. This advice comes from the Security Service and other sources.

This is an ongoing process and, for understandable reasons, it would be inappropriate to give details of what advice is provided to which organisations.

Bio-diesel

Mr. Simon Thomas: To ask the Secretary of State for Trade and Industry what information she has collated on the number of forecourts in *(a)* Scotland, *(b)* England, *(c)* Wales and *(d)* Northern Ireland which sell bio-diesel. [151439]

Mr. Timms: The Department of Trade and Industry does not record the number of forecourts which sell bio-diesel. However, from discussions with biofuels suppliers we estimate the following:

(a) Scotland—13

(b) England—116

(c) Wales—0

(d) Northern Ireland—7

It is worth noting that additionally a significant proportion of biodiesel is supplied in bulk directly to the commercial market.

Broadband

Michael Fabricant: To ask the Secretary of State for Trade and Industry pursuant to her answer of 15 January 2004, *Official Report*, column 845W, on broadband, when she will publish a report on the work and findings of the joint departmental Rural Broadband Team. [150770]

Mr. Timms: The role of the joint DTI/Defra Rural Broadband Unit is to facilitate understanding and promote partnerships between the telecommunications industry, Government agencies and community organisations to spread information and best practice. For instance, the Unit will shortly be publishing a 'Rural Broadband Toolkit' to help rural communities and businesses understand the issues surrounding access to broadband.

The Unit works as part of the wider DTI Broadband Unit and will not be producing a report specifically on its own work.

Civil Servants

Dr. Cable: To ask the Secretary of State for Trade and Industry how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150273]

Ms Hewitt: The Department currently occupies 80,000 sq metres in central London and an additional 7,000 sq m in Greater London. This excludes agencies but includes space occupied by the Department in buildings where other Government Departments have the lead responsibility.

Competition Commission Report (Littlewoods)

Mr. Pike: To ask the Secretary of State for Trade and Industry when she proposes to publish her decisions arising from the Competition Commission report on the proposed GUS/Reality and Littlewoods Mail Order/Home Trading organisations. [150229]

Ms Hewitt *[holding answer 26 January 2004]:* I refer my hon. Friend to my answer of 22 January 2004, *Official Report*, column 1453.

Innovation Funding

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will break down how

innovation funding in the areas of *(a)* industrial exploitation of science, *(b)* support for competitiveness, *(c)* space, *(d)* technical and design infrastructure, *(e)* support for construction industry, *(f)* expert advice and other expenditure and *(g)* invest to save projects, as set out in her departmental report 2003, was allocated in 2003–04; and what amounts were allocated in each year since 1997. [147804]

Ms Hewitt: Successive departmental reports have provided breakdowns and explanations of my Department's innovation expenditure, including on Space and Civil Aerospace Research and Development ('CARAD'), before and since the change in the innovation budget structure in 2001–02.

The following table is based on information published in the 1999 and subsequent departmental reports, where more details and explanation can be found. It includes expenditure on 'Support of the construction industry' under 'Industrial Exploitation of Science' and 'Support for Competitiveness' from 2002–03 (following a machinery of government transfer of responsibility in 2001) and on the Invest to Save Budget funded biotechnology portal, 'i-bio.gov.uk', under 'Support for Competitiveness'.

	1997–98 outturn	*1998–99 outturn*	*1999–2000 outturn*	*2000–01 working provision*[1]	*2001–02 outturn*	*2002–03 working provision*[2]	*2003–04 plans*
Knowledge transfer and collaboration	39.3	30.5	32.7	47.2	—	—	—
Innovation promotion and support	78.0	61.2	56.1	66.8	—	—	—
Standards and National Measurement System	56.6	60.0	60.4	61.7	—	—	—
Sector Challenge	4.6	11.5	10.4	4.3	—	—	—

Technical and design infrastructure	—	—	—	—	69.9	73.7	89.4
Expert advice and other expenditure	—	—	—	—	7.7	3.8	2.7
Total	305.5	271.7	267.8	290.0	293.5	322.3	342.1

[1] Budget structure changed from 2001–02.
[2] 2002–03 outturn will be reported in the 2004 departmental report.
[3] Excludes Office of Science and Technology expenditure on space (except for 2003–04 plans, which include BNSC budgets transferring to the Science budget from 2003–04).
Source:
1999–2003 departmental reports (Cm 4211, March 1999, Table 1.5; Cm 4611, April 2000, Figure 3.7; Cm 5112, March 2001, Figure 4.5; Cm 5416, June 2002, Figure 4.5; and Cm 5916, May 2003, Figure 5.2)

Miners' Compensation

Mr. Hepburn: To ask the Secretary of State for Trade and Industry how many miners' compensation claims for respiratory diseases *(a)* have been made, *(b)* have been settled and *(c)* are outstanding in (i) the Jarrow constituency, (ii) South Tyneside and (iii) the UK in each year since 1997. [149913]

Nigel Griffiths: Claims are dealt with on a priority basis, those from the eldest and sickest living miners and their widows being deal with first. Claims that are outstanding may be a lower priority or they may have an outstanding policy issue that is preventing settlement of the claim.

The figures are:

Year claim registered	*Claim receipts*	*Total settlements including denied/ withdrawn (as of 16 January 2004)*	*Number outstanding*
Jarrow			
1997[1]	9	5	4
1998[1]	93	55	38
1999[1]	140	75	65
2000	92	45	47
2001	191	59	132

2001	44,178	18,279	25,899
2002[2]	39,560	10,216	29,344
2003[2]	168,574	3,000	165,574
2004	17,097	29	17,068
Total	391,548	105,664	285,884

[1] The Department was not able to process claims until after the signing of the Claims Handling Agreement, agreed with the claimants' solicitors, on 24 September 1999.
[2] Estate claims put on hold as a lower priority, in agreement with claimants solicitors.
Notes:
1. South Tyneside consists of the Jarrow and South Shields constituencies.
2. Constituency figures can be found on the DTI website www.dti.gov.uk/coalhealth The information is complied in the middle of the month and shows figures for the end of the previous month.

Lottery Revenue

Mr. Willis: To ask the Secretary of State for Trade and Industry what the total value is of Lottery revenue used to support Government-sponsored projects within her Department since 1997. [149629]

Ms Hewitt *[holding answer 26 January 2004]:* My Department has no policy or operational responsibility for distribution of National Lottery proceeds. I refer the hon. Member to the answer given to him today by my right hon. Friend the Minister of State for Culture, Media and Sport.

Ministerial Meetings

Mr. Don Foster: To ask the Secretary of State for Trade and Industry what the *(a)* purpose and *(b)* outcome was of the meeting convened by her Parliamentary Under-Secretary of State, the hon. Member for Edinburgh South, on 21 January with representatives of North-East Somerset, Mowlen plc. and Nicholas Grimshaw and Partners Ltd. [151804]

Nigel Griffiths: The PUSS met as Construction Minister to discuss construction matters. This was achieved.

National Power Provision

David Davis: To ask the Secretary of State for Trade and Industry how many power cuts there were in each of the last five years, broken down by *(a)* parliamentary constituency and *(b)* individual power company. [151259]

Mr. Timms: *(a)* Information by constituency is not held centrally either by DTI or OFGEM— it could only be obtained via a detailed information request to companies which would take considerable time and cost.

(b) As part of the Regulatory reporting requirements, all Distribution Network Operators (DNOs) submit data to OFGEM (the Industry Regulator) pertaining to 'Customer Interruptions' (or CI) figures. These are effectively an indication of the number of customers who experience an interruption per 100 customers per year. This type of information is expressed in this way as the DNOs serve widely varying numbers of customers, and it enables a comparison to be made between the relative performances of the DNOs concerned.

The table details the available Customer Interruptions data for each of the DNOs for the last five reporting years.

Customer Interruptions—CIs

DNO	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*
Aquila (ex-Midlands)	132.24	120.82	139.69	147.77	123.54
EME (ex-East Midlands)	93.10	76.47	77.80	91.38	78.82
EPN (ex-Eastern)	73.71	60.40	66.11	68.83	192.02
Hydro (Scottish Hydro)	153.10	155.00	141.20	131.61	124.71
LPN (ex-London)	39.18	36.89	36.19	39.75	38.62
NEDL (ex-Northern)	90.07	92.59	89.91	98.09	93.65
SP Distribution (ex-Scottish Power)	72.95	85.75	82.24	91.52	76.27
SPN (ex-Seeboard)	91.00	95.50	89.90	88.50	93.29

WPD S. West (ex-Sweb)	105.50	80.10	90.40	86.50	107.06
YEDL (ex-Yorkshire)	80.00	71.79	73.03	69.80	78.79

Regional Development Agencies

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how many businesses have been helped by each regional development agency; what the average sum of money received by these businesses is; how many of the businesses helped are still operating; and how many of these businesses have increased their profitability. [148189]

Jacqui Smith: England's Regional Development Agencies (RDAs) help businesses both directly and indirectly through a range of activities and programmes including skills development, upgrading infrastructure and improving business competitiveness of the region in general.

Information on how many businesses have been helped, the average sum of money received, how many are still operating, and how many have increased their profitability, is not available and could only be provided at disproportionate cost.

The number of businesses added to the regional economy as a direct result of RDA activity is available for financial year 2002–03 and is broken down by Agency in the following table. The information is also available on the DTI website at http: //www. dti.gov.uk/rda/info/.

UK Investment

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry what action her Department has taken to stimulate UK investment in *(a)* Poland, *(b)* Lithuania and *(c)* Latvia. [150826]

Mr. Mike O'Brien: UK Trade and Investment does not stimulate outward investment to any market. The decision to invest is a commercial one and companies have to decide the best way of running their business. Where companies have made that decision they can ask UK Trade and Investment to provide advice and assistance to enable companies to invest successfully abroad, minimising the associated risks and maximising the benefit to companies and the UK economy.

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry (1) what action her Department has taken to stimulate UK investment in *(a)* the Czech Republic and *(b)* Bulgaria; [150828]

(2) what action her Department has taken to stimulate UK investment in *(a)* Hungary and *(b)* Estonia; [150827]

(3) what action her Department has taken to stimulate UK investment in *(a)* Malta, *(b)* Turkey and *(c)* Romania; [150825]

(4) what action her Department has taken to stimulate UK investment in *(a)* Slovakia, *(b)* Slovenia and *(c)* Cyprus. [150824]

Mr. Mike O'Brien *[holding answers 26 January 2004]:* UK Trade and Investment does not stimulate outward investment to any market. The decision to invest is a commercial one and companies have to decide the best way of running their business. Where companies have made that decision they can ask UK Trade and Investment to provide advice and assistance to enable companies to invest successfully abroad, minimising the associated risks and maximising the benefit to companies and the UK economy.

World Trade Organisation

Mr. Bercow: To ask the Secretary of State for Trade and Industry which members of the World Trade Organisation have yet to *(a)* ratify and *(b)* implement the World Trade Organisation Agreement on Financial Services. [149079]

Mr. Mike O'Brien: The WTO agreement on financial services dates from 12 December 1997 and required ratification and acceptance by 29 January 1999. To date, Brazil, Jamaica and Philippines have not done so.

Mr. Bercow: To ask the Secretary of State for Trade and Industry how many delegates from each member of the World Trade Organisation attended the ministerial conference in Cancun in September 2003. [149977]

Ms Hewitt: According to WTO Secretariat figures over 3,200 accredited delegates attended the 5th WTO Ministerial Conference in Cancun held in September 2003, from 144 member country delegations.

The WTO Secretariat does not provide a breakdown of the number of delegates by member country. A list of all accredited delegates is available from the WTO website at: www.wto.org.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Aldicarb

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to discontinue the use of aldicarb on crops in the UK. [150520]

Alun Michael: Council Decision 2003/199/EC of 18 March 2003 requires member states to withdraw approvals for most uses of products containing aldicarb by 18 September 2004.

However, the Decision allows for certain 'essential uses' of aldicarb to continue until 31 December 2007. These are limited uses for which no efficient alternative control methods currently exist. In the UK the essential uses are for the control of nematodes (parasitic worms) on potatoes, carrots, parsnips, onions and ornamentals.

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment has been made by the Pesticide Safety Directorate of the effects on human health of pesticides containing aldicarb. [150521]

Alun Michael: The UK was the 'rapporteur member state' for aldicarb in the EC review of pesticides under Directive 91/414/EEC. The Pesticides Safety Directorate was thus responsible for examining extensive scientific data on aldicarb to draft an assessment report for review by all other member states and the EC Commission.

The EC review of aldicarb concluded that under normal conditions of use there would be no unacceptable risks to workers or consumers. However, the substance is being phased out due to potential environmental impacts.

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what advice the Pesticide Safety Directorate has published on the handling of pesticides containing aldicarb. [150522]

Alun Michael: Advice on safe handling of pesticides is provided as 'safety precautions' on the labels and accompanying literature for pesticides. The safety precautions for each pesticide product are checked and agreed by the Pesticide Safety Directorate as part of the approval process.

Pesticides containing aldicarb carry over 20 safety precautions covering the following areas: operator protection (including details of specified protective clothing); consumer protection; environmental protection; and storage and disposal advice.

Animal Health Act

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department's statutory responsibilities are under the Animal Health Act 1981 in respect of the elimination of contiguous reservoirs of disease which have zoonotic and animal health implications. [150577]

Mr. Bradshaw: Under section 29 of the Animal Health Act 1981, the Secretary of State may, with a view to reducing the risk to human health of any disease of, or organism carried in, animals, make an Order designating any such disease or organism which, in her opinion, constitutes such a risk.

Badgers

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether the project designed to assess the impact of removing badgers from the ecosystem will also take into account *(a)* the impact of allowing unrestrained growth of the badger population and *(b)* the impact of controlled reductions in badger populations to various levels. [150473]

Mr. Bradshaw: Even where culling does not take place the local badger population is not undergoing 'unrestrained growth' as it will be subject to limits imposed by natural and human phenomena. The project designed to assess the impact of removing badgers from the ecosystem will assess the impact on other wildlife of

controlled reductions in badger populations to various levels, in comparison with areas where badgers are not culled.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether she reconciled the inability to estimate the effect of alternative capture methods of badgers which would remove 100 per cent. of the population with the findings during the Thornbury trial. [150490]

Mr. Bradshaw: The Krebs Report referred to the difficulty of assessing the effect of different control strategies on the prevalence of TB in badgers and on herd breakdowns. The report says

> "None of the control strategies have been assessed in a properly designed experiment to establish their efficacy." (Krebs Report pages 82–83).

A comparison of reactive culling areas of the Randomised Badger Culling trial (RBCT) and the Thornbury clearance area is not valid. Although indicative of the effect on cattle TB incidence that might be expected if a total badger clearance were achieved, the Thornbury badger removal was performed without contemporary control areas. This limits its usefulness as a basis for comparison with the impact of lesser percentage badger clearances achieved by other methods, since any change in the incidence of TB in cattle subsequent to culling could have resulted in whole or in part from some other cause.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 8 December 2003, *Official Report*, column 211W, what conclusions she draws from the data on the location of TB lesions in badgers as to the main route of infection; and whether it is possible to draw similar conclusions in respect of the data available on the location of TB lesions in cattle. [150491]

Mr. Bradshaw: Infection with *Mycobacterium bovis* most often causes lesions in the respiratory tract and the associated lymph nodes, which suggests that the most common route of infection in badgers and cattle is by inhalation, or ingestion followed by inhalation. In badgers infection by inoculation through bite wounds are also a relatively frequent route of infection.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the scientific rationale was for the choice of the different distance parameters adopted for the culling zones of badgers in *(a)* the Gassing Strategy and *(b)* the Clean Ring Strategy, of the Krebs trials. [150509]

Mr. Bradshaw: For the gassing strategy: where TB infection was found in badgers, an area of up to one kilometre from the farm boundary was surveyed, to include the full territories of badgers on the infected farm. Social groupings were identified and all infected social groups, and groups in contact with them, were gassed. The area gassed was determined by the location of infected farms, infected badgers, sett groupings and natural boundaries. (Krebs Report 1997, page 142)

For the Clean Ring strategy: infected social groups, and those contiguous with them were culled. Culling, of social groups that were contiguous to groups found to be infected, continued until a clean ring of social groups containing no infected animals was found and removed, or else there were no badgers found. (Krebs Report page 143)

The use of broadly circular treatment areas of 100 km^2 for the Randomised Badger Culling Trial is explained on pages 8–9 of the first report of the Independent Scientific Group on Cattle TB and is based on the suggested use of 10km by 10km squares in the Krebs Report, pages 90–93.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what distances can be travelled by adult badgers from their setts to their food sources; and what the radii were of the Krebs *(a)* reactive and *(b)* proactive areas. [150512]

Mr. Bradshaw: Adult badgers can travel between a few metres and a few kilometres from their setts to their food sources dependent on the quality of the habitat. None of the Krebs reactive and proactive areas are completely circular, so no exact radii can be evaluated. Trial areas are initially described using a 5.64 km radius circle but this shape is distorted by natural features and survey data to end up with areas of around 100 sq km. However, details of the total surface areas of the Krebs reactive and proactive areas are available on the Defra Internet site.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 211W, on badgers, what proportion of badgers culled as part of TB control strategies conducted during 1979–97 tested positive for *M. bovis*; and what the percentage was in *(a)* 1975–82, *(b)* 1982–88 and *(c)* 1988–97. [150547]

Mr Bradshaw: The following table gives these data:

Period	*1979–97*	*1975–82*	*1982–88*	*1988–97*
Badgers culled	20,252	2,661	6,367	13,401
Badgers positive for *M. bovis*	3,985	283	966	3,118
Percentage	20.1	10.7	15.2	24.0

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 212W, what inferences can be drawn from the preponderance of TB lesions found in badgers on post mortem examination arising in the lymphatic nodes of head and chest as to *(a)* the portal of infection, *(b)* the possible routes of infection and *(c)* the risk presented by those badgers to other animals. [150564]

Mr. Bradshaw: Infection with *Mycobacterium bovis* frequently causes lesions in the respiratory tract and the associated lymph nodes of badgers, which suggests that a common route of infection is by inhalation, or ingestion followed by inhalation. Where there is infection of the respiratory tract, it is probable that there are phases of *M. bovis* excretion of infected saliva via the respiratory tract, which may contaminate pasture or animal feed containers.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether material contaminated with the *M. bovis* bacilli deposited on grassland by badgers and subsequently entrained in hay

used for the feeding of cattle is considered to present a significant risk of infection to *(a)* cattle, *(b)* farmers and *(c)* other persons who may handle this material. [150570]

Mr. Bradshaw: As the organism *Mycobacterium bovis* prefers damp mild conditions it is unlikely to survive the hay making process. We consider that there is no significant risk of infection to cattle, farmers or other persons who may handle hay.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs in how many Krebs reactive areas badger culling was commenced in May 2003; how many farms were involved in these areas; how many of those farms had had *(a)* one and *(b)* two 60-day tests after the clearance operations; and what the results were of those tests. [150579]

Mr. Bradshaw: The first reactive operation in Triplet I commenced in May 2003. Reactive operations in Triplets A, B and C had commenced prior to May 2003 and further operations occurred during May 2003 in these Triplets.

The number of infected cattle herds triggering reactive culling operations in May 2003 in Triplets I, A, B and C totalled 20. The number and testing details of premises over which these operations took place cannot be provided at proportionate cost.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what methods other than gassing are available for the culling of badgers; and what statutory restrictions apply to those alternatives. [150585]

Mr. Bradshaw: Gassing is not a legal method of killing badgers.

The badger is a fully protected species. It is an offence to kill (or attempt to kill) a badger by any method (Protection of Badgers Act 1992 s.1(1)).

Badgers are also listed under Schedule 6 of the Wildlife and Countryside Act 1981, which makes it a specific offence to poison badgers (including by gassing) (s.11(2)(a)).

A person guilty of these offences is liable on summary conviction to imprisonment for up to six months and/or a fine of up to £5,000.

Where killing is carried out under a licence issued by Defra, the technique employed will depend on the particular circumstances of the individual case, but will normally involve cage trapping and humane dispatch by shooting.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what changes there were in the protocol for badger trapping in the period 1975 to 1997; and what effect they had on the success rate of trapping operations. [150590]

Mr. Bradshaw: The key operational features of badger control strategies from 1975 to 1996 are set out in Appendix 3 to the Krebs Report. We have no validated data on the success rate of the various culling strategies.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 212W, on badgers, what her best estimate is of the typical kill rates of badgers during the Krebs culling programmes; what the worst rates were; and what the impact was of low kill rates on the *(a)* conduct and *(b)* outcome of the trials. [150592]

Mr. Bradshaw: There is no precise way of measuring badger populations pre- and post-culling operations and estimates are made in the Randomised Badger Culling Trial based on field signs at a sample number of setts. Culling success is affected by a range of factors including levels of access, anti-trial activity and the time of the year, and where proactive culling in a triplet has been carried out at a sub-optimal time the next cull, where possible, is planned for more optimal periods.

Bovine TB

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what precautions can be taken by farmers to guarantee freedom from TB in cattle bought into herds; and to what extent she advises that they can rely on a test or other certification attesting to freedom from TB infection. [150495]

Mr. Bradshaw: There can be no guarantee of remaining free of bovine TB. However farmers are encouraged to take all practical disease prevention measures to reduce the risk of disease introduction when bringing in new stock, including arranging a tuberculin test of purchased cattle before they are brought into to the resident herd.

The Department provides advice in the form of a freely available booklet "TB in Cattle—Reducing the Risk". A concise list of disease prevention measures which was developed with livestock industry representatives and vets, was sent to all livestock farmers in 2002; it can be found on the Defra website.

The comparative tuberculin skin test is used to certify that cattle herds are free from bovine tuberculosis, the comparative skin test at the standard interpretation, provides sensitivity in the range 68 per cent. to 95 per cent. and specificity in the range in the range 96 per cent. to 99 per cent.

Clearly a negative test result on individual animals brought into a herd will not guarantee their freedom from disease, although it will substantially reduce the risk. A recent clear herd test result for the herd of origin will reduce the risk that imported animals have been exposed to infection still further.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs when the consultation on the new TB strategy will commence; and whether she expects that the detailed results and conclusions from the Krebs trials will be available prior to that consultation. [150497]

Mr. Bradshaw: We aim to publish a consultation document "Preparing for a new GB Strategy on bovine tuberculosis" in February. The document will represent the outcome of the first stage of the review announced by the Secretary of State for Environment, Food and Rural Affairs at last year's NFU Annual General

Meeting. The consultation document will contain proposals for action in the short term including measures to prevent the geographical spread of the disease.

The Independent Scientific Group on cattle TB (ISG) anticipates that the Randomised Badger Culling Trial (or the 'Krebs Trial') operations will be complete by 2006. The ISG will report to Ministers thereafter.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what has been the total expenditure by her Department on investigating the pathogenesis and epidemiology of Bovine TB since 1997; and what the planned expenditure is over the next five years. [150498]

Mr. Bradshaw: Total expenditure since 1997 on research projects investigating the pathogenesis and epidemiology of Bovine TB is £17.3 million. Research already commissioned for 2004–5 onwards totals £5.6 million and consultations for research requirements to start from the financial year 05–06 have been initiated. Epidemiology and pathogenesis will continue to be important parts of the bovine TB research programme.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to compensate herd owners for uninsurable losses arising from the event of a TB herd breakdown. [150501]

Mr. Bradshaw: The Government currently pays compensation to farmers for the market value of all cattle slaughtered under the TB control programme. There are no plans to compensate for consequential losses.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what inference she has drawn from the number of slaughterhouse cases of bovine TB as to the efficacy of the TB surveillance programme. [150503]

Mr. Bradshaw: The examination of carcases in the slaughterhouse complements surveillance through the periodic testing of cattle. Identification of infected carcases in slaughterhouses does not necessarily reflect a failure of the tuberculin test to detect the infection: given that infected cattle can develop grossly visible lesions within a relatively short time after infection with *Mycobacterium bovis*, it would be expected that some animals will become infected and be presented for slaughter in the intervals between herd tests, which can last up to four years. In recent years, the proportion of TB incidents that are detected in the slaughterhouse is lower in parishes where herds are tested more frequently, in other words frequent tuberculin testing reduces the risk that diseased cattle are disclosed during slaughterhouse inspection.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what action is taken in respect of slaughterhouse cases of bovine TB to trace the animals back to the farm of origin; what proportion of these cases were traced back to source in the last five years; and how many herds identified as a result of such action were subsequently confirmed as TB breakdowns. [150504]

Mr. Bradshaw: All suspects detected in the slaughterhouse are traced back to the farm of origin, movement restrictions are imposed and the herd is check tested.

Material from animals with lesions detected at slaughter is submitted for laboratory confirmation of the presence of the causative organism, *Mycobacterium bovis*. Typically, about 35 per cent. to 50 per cent. of suspected cases of TB detected during routine meat inspection are eventually confirmed by culture of *M. bovis* in tissue samples, which automatically triggers a confirmed TB breakdown in the herd of origin whether or not reactors are found in the subsequent check test. Between 10 and 13 per cent. of all new TB breakdowns confirmed in a given year are started by a 'slaughterhouse case' and between 34 and 47 per cent. of such breakdowns will have reactors in the subsequent check test.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether she has identified a statistically significant correlation between the distribution of TB infection in badgers and the distribution of TB in cattle. [150505]

Mr. Bradshaw: The report from the Independent Scientific Review Group, chaired by Sir John Krebs, which reported in 1997, concluded that there was "strong evidence for an association between TB in cattle and badgers". This relationship will be investigated further using data collected in the Randomised Badger Culling Trial, which is currently underway.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs where slaughterhouse cases of bovine TB are identified as having originated in animals which have transited through livestock markets immediately prior to despatch for slaughter; what measures are taken in those markets to contain the spread of disease; and what action is taken to trace possible contact animals consequently confirmed as TB breakdowns. [150506]

Mr. Bradshaw: The transmission of the causative organism, *Mycobacterium bovis*, between cattle requires in most cases for the animals to be in close proximity with each other. While there is a risk that the organism could be transmitted between cattle at a market, conditions are such that this is a relatively low risk. Thus tracings of cattle that have come into contact with infected animals do not take into account contacts that take place in markets.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what herd TB breakdowns have been recorded in the last 10 years in areas *(a)* where there have been no badgers detected and *(b)* following complete clearance of badgers. [150511]

Mr. Bradshaw: There is insufficient reliable data on the extent and varying density of the badger population of Great Britain to identify, with any certainty, areas where there is an absence of badgers. No area, in the last 10 years, has been completely cleared of badgers.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what causation models, or combinations thereof, are being used by her Department to determine the cause of bovine TB and

mechanisms of transmission; what the specific criteria are which make up the models; and which criteria remain to be satisfied before a firm association can be made between the presence of infection in the badger population and the presence of the disease in cattle. [150517]

Mr. Bradshaw: To help to determine the cause of bovine TB and mechanisms of transmission, the Department has investigated spatially explicit GIS-based stochastic simulation badger/TB models. The models are complex and are described in detail in a range of scientific publications available from the Central Science Laboratory. The Randomised Badger Culling Trial is seeking to address the question of the contribution of the presence of infection in badgers to the presence of the disease in cattle, and results will be available in due course.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs with regard to the TB control operation in Thornbury, what the level was of cattle TB in the trial area prior to the removal of badgers; how many times, by what methods, and how thoroughly the removal was effected; whether these operations led to an elimination of badgers; how soon after the completion of operations badgers re-colonised the area; and at what level the re-colonisation was noted. [150572]

Mr. Bradshaw: The incidence of herds with visible lesion reactors in the Thornbury intervention area, prior to badger clearance starting, was 74 in 1,314 herd years or 5.6 per cent. No reliable record exists of the number of gassing operations, but the Zuckerman Report refers to gassing starting in December 1975 and continuing to August 1976. Many setts were re-colonised immediately and "a considerable amount of re-gassing was necessary". The gas used in Thornbury was hydrogen cyanide and the badger activity was reduced to a "low level by 1979–80" (Zuckerman Report). The badger population at Thornbury took about 10 years to recover once action to prevent re-colonisation ceased.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs with regard to the TB control operation in Thornbury, for how long after the completion of operations cattle remained clear of TB, as assessed by use of cattle tuberculin tests. [150573]

Mr. Bradshaw: No confirmed cases of tuberculosis in cattle in the area of the Thornbury operation were disclosed by the tuberculin test in the 10-year period following the cessation of gassing.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 10 December 2003, *Official Report*, column 525W, when she expects to be able to release details of the content and funding of the future TB research programme, with specific reference to the funding of vaccine research. [150588]

Mr. Bradshaw: Future funding of the TB research programme, in common with all Government expenditure, will be considered as part of the 2004 Spending Review, which is under way and will be finalised later in the year.

Future TB research requirements, including those for vaccine research, will be announced in May or June with the publication of the Animal Health and Welfare Research Requirements Document (RRD). Details of bovine TB research work currently being funded by Defra can be found on the Defra website.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 216W, what criteria have to be satisfied by *(a)* farmers and *(b)* livestock hauliers in order to gain multiple pick-up approval; who is responsible for granting approval; and what costs are involved in granting approval. [150595]

Mr. Bradshaw: All multiple pick-ups and drop-offs must take place at premises that have prior approval from Defra to operate as a multiple pick-up/drop-off site. The conditions under which multiple pick-ups and drop-offs may take place are set out in Annex B of the General Licences for cattle, sheep, goats and pigs. These licences can be found on the Defra website at: http://www.defra.gov.uk/animalh/movements/documents/default.htm

Inspectors or local veterinary inspectors are at Defra's expense. An inspection is carried out to ensure that the requirements of the licences can be met. The inspection is carried out either by animal health officers, veterinary officers, temporary veterinary inspectors or local veterinary inspectors and is at Defra's expense.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what further estimate she has made of the increase in bovine TB following the discontinuance of reactive culling. [150625]

Mr. Bradshaw: The Independent Scientific Group on Cattle TB (ISO) has indicated that it will continue to analyse data from the treatment areas randomised as reactive areas as part of its regular interim analyses. The next such analysis, using data to March 2004, is expected to take place in April.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 10 December 2003, *Official Report*, column 523W, on badgers, how many individual clearance operations in the Krebs areas were specifically related to individual farms; how many such operations covered more than one farm; and what difference there was in the TB incidence in cattle on farms which were part of an operation covering more than one farm as compared with those which were subject to an operation covering only one farm. [150775]

Mr. Bradshaw: Management records indicate that 78 reactive operations were carried out under the Randomised Badger Culling Trial and these involved 172 notified, infected premises. Of these operations, 37 related to a single infected premise. The extent of TB incidence was not a factor considered when grouping geographically proximal breakdown premises for reactive culling operations.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the Department's responses to Professor Zuckerman's recommendations on protecting badgers and cattle from TB. [150858]

Mr. Bradshaw: The Department's responses to Professor Zuckerman's recommendations are summarised in Appendix 1 of Professor Dunnet's report to the Department in 1986 entitled "Badgers and Bovine Tuberculosis—Review of Policy". A copy of the report is available in the House of Commons Library.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs which of the *(a)* proactive and *(b)* reactive and *(c)* control areas of the Krebs trials underwent boundary changes after initial designation of the areas; and when these changes occurred. [150894]

Mr. Bradshaw: All trial areas were modified marginally to include or exclude whole farm premises following surveying and prior to initial proactive culling. On occasions, slight changes in treatment boundary have been agreed by the Independent Scientific Group on Cattle TB in response to changes observed in badger activity and social group organisation.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether her Department have established a field scale experiment to model postulated modes of transmission of bovine TB between badgers and cattle to test hypotheses relating to the spread mechanisms of the disease using live or attenuated TB bacilli, or indicator organisms which mimic the behaviour of the TB bacilli. [150943]

Mr. Bradshaw: Defra has not established a trial of this nature. Epidemiological surveys are being undertaken which will provide information on risk factors associated with the occurrence of disease outbreaks.

British Beef Ban

Mr. Chope: To ask the Secretary of State for Environment, Food and Rural Affairs what action the Government are taking to secure compensation for British farmers who suffered loss as a result of the action of the French Government in continuing to ban British beef following the breach of the European Court of Justice ruling of December 2001; and if she will make a statement. [151345]

Mr Bradshaw *[holding answer 27 January 2004]:* The Government cannot claim compensation because they have no direct commercial interest. Those parties who were directly affected by the illegal French ban must decide for themselves whether to seek such compensation for losses.

However we will provide information and practical assistance (although not financial support or detailed legal advice) to exporters who wish to pursue claims for compensation.

Civil Servants

Dr. Cable: To ask the Secretary of State for Environment, Food and Rural Affairs how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150283]

Alun Michael: Defra's total office space for its civil servants in central London is 63,045.35 square metres with an additional 98.41 square metres in outer London, giving a total for Greater London of 63,143.76 square metres.

Combustion Plants

Mr. Bill O'Brien: To ask the Secretary of State for Environment, Food and Rural Affairs how many states in the EU have applied for the National Plan option under the Large Combustion Plant Directive. [148754]

Mr. Morley: According to information provided by the European Commission, two other member states in addition to the UK: Ireland and Finland, have submitted a National Plan under the Directive.

Contractors

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what conclusions have been drawn by her Department on *(a)* commissioning the services of contractors during animal health emergencies and *(b)* the keeping and auditing of accounts; and what advice she will give to contractors who may be requested to supply goods or services to her Department in a future emergency. [150518]

Mr. Bradshaw: The conclusions that have been drawn by the Department on *(a)* commissioning the services of contractors during animal health emergencies and *(b)* the keeping and auditing of accounts are as follows:

The Department will deal with those contractors who meet its requirements for eligibility and economic and financial standing, together with the ability and technical capacity to deliver the goods, services and works required;

The Department will take all sufficient and necessary steps to prevent windows of commercial opportunity being opened up by contractors to taxpayers disbenefit during animal health or any other emergencies;

The Department requires its contractors to substantiate their charges and allow Defra to verify that the charges invoiced are fully in accordance with the contractual provisions.

Contractors who may be requested to supply goods, services or works to the Department in a future emergency will be asked, as is currently the case, to comply with the terms of the contracts agreed with them.

Correspondence

Mr. Salmond: To ask the Secretary of State for Environment, Food and Rural Affairs when she intends to reply to the letter dated 28 October 2003 from the hon. Member for Banff and Buchan to the Minister for Farming, Food and Sustainable Energy, regarding his constituent, Mr. T. Curran of Portsoy. [149778]

Alun Michael: The hon. Member's letter of 28 October was addressed to my right hon. Friend the Secretary of State for Trade and Industry.

The Department of Trade and Industry approached the Foreign and Commonwealth Office with a view to transferring the hon. Member's correspondence there. That Department then approached Defra.

The subject raised by the hon. Member is not a matter for this Department and therefore a transfer did not take place. The hon. Member may wish to raise this issue with the Department to whom he originally wrote.

Dairy Farming

Mr. Hoyle: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to meet representatives of supermarkets to discuss United Kingdom dairy farming. [149938]

Alun Michael: The Secretary of State has had no formal meetings with representatives of supermarkets to discuss milk prices. However, retailers are represented on the Dairy Supply Chain Forum chaired by my noble Friend Lord Whitty, which has been looking at collaborative solutions to improve supply chain efficiency, as well as other issues. Retailers are also represented in the Dairy Supply Chain Forum's Industry Development's Cap Reform Sub-Groups which aim to facilitate the long term sustainable development of the dairy supply chain and help it adjust to the new environment created by the reformed CAP.

Effluent Dumping

Mrs. Iris Robinson: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she is taking to prevent farmers from dumping effluent in rivers. [148830]

Mr. Morley: The dumping of effluent in rivers is an offence under the Water Resources Act (WRA) 1991. The Environment Agency (the Agency) is responsible for regulating discharges of effluent to watercourses and issues discharge consents under Schedule 10 of the WRA. In all cases, consents are subject to strict conditions to ensure protection of the receiving water.

It is rare for a consent to be issued to a discharge of farm effluent because of the difficulty of achieving the standards necessary to protect the watercourse. It is accepted practice that slurry, manure and dirty water from farm buildings is contained and usually applied to land in accordance with the relevant sections of Defra's Code of Good Agricultural Practice for the Protection of Water.

The Control of Pollution (Silage, Slurry and Agricultural Fuel Oil) Regulations 1991 (and as amended in 1997) specify the size, design and construction standards that must be used for structures built since 1991 and used for storage of these specified materials. These Regulations also provide powers for the Agency to serve a notice, requiring action to avoid pollution, on a storage structure of any age where the Agency considers there is a serious risk of pollution.

In addition, both Defra and the Agency publish a wide range of relevant advisory literature which is available to farmers.

Environmental Taxation

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 6 January 2004, *Official Report*, columns 255–56W, on environmental taxation, if she will break down into component parts the 2.85 per cent. UK figure. [150114]

Mr. Morley *[holding answer 26 January 2004]:* The OECD breakdown of UK environmental taxation into its component parts for the year 2001 is given in the table herewith.

OECD breakdown by tax of UK environmental taxation for 2001

Name of tax	*£ million*
Duty on hydrocarbon oils	22,046.0
Leaded petrol	3.1
Unleaded petrol	1,979.5
Ultra low sulphur petrol	11,042.2
Diesel	59.8
Ultra low sulphur diesel	8,754.2
Non-fossil fuel obligation levy	86.0
Vehicle excise duty	4,061.0
Air passenger duty	824.0
Landfill tax	505.0
Climate Change Levy	588.0
Gas regulator fees	13.0
Electricity regulator fees	14.0
Water regulator fees	13.0
Fees paid to the Environment Agency	190.0
Total	28,340.0

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many prosecutions in the UK were brought against fishermen in each of the last 10 years for landing black fish; and how many fishermen were convicted. [150239]

Mr. Bradshaw: Information in the form requested is not readily available. However information extracted from returns on serious fisheries infringements in the United Kingdom submitted to the European Commission since 2000 in response Council Regulation (EC) No 1447/1999 and Commission Regulation (EC) No 2740/1999 shows that the number of infringements involving the falsification of logbooks, landing declarations and sales notes, for which prosecutions were completed and with which black fish landings are associated, were:

Black fish landings

	Number
2000	31
2001	55
2002	78

Most of the infringements for which prosecutions were taken resulted in a successful conviction.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate her Department has made of changes in the tonnage of black fish landed by the United Kingdom registered fishing fleet in *(a)* home and *(b)* foreign ports in the last five years; and what her estimate is of the tonnage of black fish landed in the last year. [150243]

Mr. Bradshaw: No estimates have been produced by the Department of the overall levels of illegal landings for the 100 or so fish stocks for which the UK has quota.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what financial contributions her Department made in the last five financial years to fisheries research *(a)* undertaken and *(b)* commissioned by the European Union; and what the projects were. [150244]

Mr. Bradshaw: Details of the level of Defra financial contribution to EU fisheries research projects, and the project titles, active between 1999–2000 and 2003–04 is given in the following table.

DEFRA contributions to EU fisheries projects between 1999–2000 and 2003–04

£

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what representations she has received from *(a)* fishermen and *(b)* their representatives on the (i) application and (ii) utility of selective gear in reducing cod by-catch in haddock fisheries; [150251]

(2) what consultations her Department had with British fishing industry representatives about linking the increase in the haddock quota with spatial management; [150300]

(3) when she was first informed of the Commission's proposal to link spatial management with the increase in the British haddock quota; [150301]

(4) how much time was spent at the December Fisheries Council discussing options for increasing the haddock quota for Scottish boats in International Council for the Exploration of the Seas areas IVa and IVb without resorting to the principle of spatial management; [150302]

(5) what proposals she and her officials put to the *(a)* Council of Ministers and *(b)* Commission in or before December 2003 with the aim of enabling Scottish fishermen to maximise opportunities to catch European haddock. [150856]

Mr. Bradshaw: Representations from the industry indicated, variously, a preference for some kind of spatial management. Technical conservation methods (such as selective gear) were also advocated by some as an option to be considered in parallel with spatial management as they are developed.

At the December Fisheries Council all the options to enable responsible exploitation of the North sea haddock stock were considered at some length, but the solution agreed was developed from the spatial management proposed by the industry. In order to secure additional quota for the UK, we negotiated the special licensing system to ensure protection of the cod stock.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what proportion of cod sold in the British retail market is caught by British registered boats. [150303]

Mr. Bradshaw: Information available on landings of and trade in cod in 2002 indicates that landings by UK registered vessels accounted for 15 per cent. of total cod consumed in the UK during the year. However, most of the cod imported into the UK has been processed to some extent. As such on a standardised live weight equivalent basis, the landings by UK registered vessels accounted for 5 per cent. of total cod consumed in the UK in 2002.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what assessment has been made of the economic impact of including steaming time in the days at sea allowance on the fishing ports of north east England; [150318]

(2) what the reason is for including steaming time in the days at sea allowance. [150325]

Mr. Bradshaw: The time at sea limits in 2003 provided for a separate allowance of days for steaming to and from the fishing grounds, for vessels using gear of over 100 mm mesh. No separate allowance exists for 2004, because the calculation of days at sea for 2004 takes account of the fleet's time at sea in the base period, including its steaming time.

The permitted number of days for the vessels using over 100 mm mesh gear is 15 per month for 2004, the same total as in 2003.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what limitations have been placed on the locations in which the *(a)* monkfish and *(b)* megrim quota awarded to the Scottish fleet can be caught in International Council for the Exploration of the Seas areas IVa and IVb. [150321]

Mr. Bradshaw: No such limitations apply specifically to the monkfish or megrim quotas set for the management area comprising International Council for the Exploration of the Sea (ICES) areas lla (EC waters) and IV (EC waters).

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the reason is for excluding pelagic boats from the cod exclusion zone in International Council for the Exploration of the Seas area VIa. [150326]

Mr. Bradshaw: No scientific reason was adduced for this. The Commission has now acknowledged that the provision is more restrictive than is necessary to protect cod, and is working on revised wording.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the approximate landed fish values of the quotas of *(a)* cod, *(b)* haddock, *(c)* monkfish and *(d)* megrim, awarded to the Scottish fishing fleet in International Council for the Exploration of the Seas areas IVa and IVb were for this year. [150327]

Mr. Bradshaw: It is not possible to estimate in advance the value of quota. Fish quota, held in the form of Fixed Quota Allocation Units, has no intrinsic value. Any value placed on uncaught quota used in quota transfers will depend on market conditions and each parties assessment of its value. The table shows the value at first point of sale of fish landed by the Scottish fleet from ICES areas IVa and IVb in the most recent year for which complete figures are available. It gives an indication of the value realised by landings of these quota species.

Value of fish landed by the Scottish fleet 2002

£000

	Area of capture	
Landed fish	*IVa*	*IVb*
Monkfish	17,379	469
Cod	20,109	1,309
Haddock	20,114	4,804
Megrim	2,774	2

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what factors affect the *(a)* seaworthiness and *(b)* ability to trawl in adverse weather conditions of fishing vessels; what effect these factors have on the ability of vessels to exploit fully allocations of days at sea. [150479]

Mr. Bradshaw: The seaworthiness of fishing vessels, and their ability to trawl in adverse weather, depend on various factors, including their design and construction, the standard of maintenance, and the standard of operation of the vessels. It is the responsibility of the skipper to determine when it is safe to fish.

In any year fishing operations will be curtailed from time to time by adverse weather. The calculation of permitted days at sea for 2004 takes account of the time spent at sea in the base period, including when fishing was constrained by bad weather. It thus incorporates time for when fishing is not safe.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment has been made of the implications of the use of days at sea restrictions on regulating fishing effort. [150916]

Mr. Bradshaw: Limits on time at sea applied in 2003 in the North sea and West of Scotland, to help conserve cod stocks. On the basis of experience with this measure the European Commission and the member states concluded that limits on time at sea should be continued in order to reduce fishing effort as part of a cod recovery plan. Experience in administering the various elements of controls in 2003 informed decisions by the Council of Ministers on the details of successor arrangements for 2004. The Government's objective in negotiations on the 2004 arrangements took account of the views of the fishing industry on the 2003 measures.

Foot and Mouth

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will investigate the *(a)* adequacy of the grounds and *(b)* quality of decision-making in her Department in pursuing prosecutions of contractors for alleged fraudulent claims or other irregularities relating to the claims made for the work undertaken for or on behalf of her Department in respect of foot and mouth disease. [150561]

Mr. Bradshaw: The prosecution of contractors for alleged fraudulent claims is a criminal matter. In such cases, Defra would refer the matter to the appropriate authorities tasked with deciding whether to prosecute or not.

On the civil side, claims are initiated on the advice of Defra's lawyers. In the commercial disputes pertaining to the foot and mouth outbreak in 2001 this advice has been provided by external commercial law firms in conjunction with forensic accountants and quantity surveyors after detailed review of contractor accounts. In many cases Defra has been successful in resolving disputes through negotiation and/or alternative disputes resolution procedures. Other disputes are being pursued through the Courts.

Defra has a public law duty to protect the public purse. It will do so unfailingly in all circumstances where the evidence is sufficient to meet legal requirements in either a civil or criminal context.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total payments made to date to contractors in respect of works commissioned by *(a)* her Department and *(b)* its predecessor, carried out in relation to the foot and mouth epidemic of 2001 are. [150563]

Mr. Bradshaw: Total payments of £1,247 million have been made to date to contractors in respect of works commissioned by the Department carried out in relation to the foot and mouth epidemic in 2001.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what representations have been made to her Department concerning the intimidation of contractors and their representatives by officials of her Department in pursuit of reducing or discounting the value of invoices or claims made by them in respect of services provided to her Department in relation to the 2001 foot and mouth epidemic. [150566]

Mr. Bradshaw: The Chairman of the All Party Parliamentary Small Business Group has drawn the Department's attention to one case where a contractor has alleged intimidating and inappropriate communications from Defra.

To date, Defra has not received any evidence in support of the allegation that intimidation of contractors and their representatives has taken place.

Any such representations would be considered on their merits having regard to the motives of those persons making such representations.

Genetic Modification

Mrs. Curtis-Thomas: To ask the Secretary of State for Environment, Food and Rural Affairs if she will define the terms "very low" and "unlikely" as used in the GM Science Review in July 2003. [148904]

Mr. Morley: I take the terms "very low" and "unlikely" as used by the GM Science Review Panel to indicate sequences of events or risks that, while theoretically possible, do not occur with sufficient probability to be cause for concern. The precise level of probability associated with these terms with vary on a case-by-case basis, depending on the particular issue that is being discussed.

Lead Content

Mr. Swayne: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 14 January 2004, *Official Report*, column 737W, on lead content, what studies she has commissioned concerning lead in glass crystal; and if she will make a statement. [149453]

Mr. Morley: The Department has commissioned no studies concerning lead in glass crystal.

Management Consultants

Mr. Flight: To ask the Secretary of State for Environment, Food and Rural Affairs what the cost to her Department of using management consultants has been in each of the last five years. [148032]

Alun Michael: Defra was formed in June 2001. The information requested is not held centrally and could be provided only at disproportionate cost.

Municipal Waste

Mr. Bill O'Brien: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to ensure that local authorities continue to recycle municipal waste after 2005–06 when statutory responsibility ends; and if she will make a statement. [148755]

Mr. Morley: I refer my hon. Friend to the answer given on 14 January 2004, *Official Report*, column 740W. As that answer explained, this year's review of national recycling targets will include consideration of whether to set further statutory recycling targets for local authorities for the years beyond 2005–06. Although I cannot prejudge the outcome of that review, the Government's goal will remain to encourage local authorities to continue to move management of municipal waste up the waste hierarchy in order to meet their obligations under the Landfill Directive.

Pesticides

Paul Flynn: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what criteria the Government use to assess the progress of the voluntary initiative on pesticides; [150958]

(2) what progress has been made with the voluntary initiative on pesticides; and how many hectares of land are now covered by the Crop Protection Management Plan. [150959]

Alun Michael: The Government have charged the signatories to the Voluntary Initiative on pesticides with reducing the environmental impact of pesticide use and, in particular, effects on biodiversity and contamination of water. These environmental outcomes will be the ultimate measure of success for the Initiative.

However, measuring environmental outcomes is difficult because they are slow to emerge, hard to measure and hard to attribute reliably to a particular cause. Because of these difficulties, the Government also assesses progress with the Initiative in terms of uptake by farmers of the key components of the Initiative. Of

these, the most significant are the National Register of Sprayer Operators, the National Sprayer Testing Scheme and Crop Protection Management Plans.

To help test whether delivery of the Initiative will benefit the environment, the signatories are establishing an "Indicator Farms" project to examine the consequences of applying Initiative measures at a farm level. If the results of this project are positive, it will help provide assurance that national uptake of the Initiative could generate national environmental benefits.

Overall progress to date with the Initiative is encouraging. Uptake of Crop Protection Management Plans is ahead of schedule and, after a slow start, applications for the National Register of Sprayer Operators and National Sprayer Testing Scheme have accelerated with the backing of the crop assurance schemes. The Government will look to see this progress maintained and will also look for the most rapid possible progress with environmental outcomes. In particular, the Government will be monitoring the pilot water catchments and the Indicator Farms project.

The Crop Protection Association advise that, as of the week commencing 19 January, around 365,000 hectares were covered by Crop Protection Management Plans.

Security Passes

Mr. Oaten: To ask the Secretary of State for Environment, Food and Rural Affairs how many security passes have been reported *(a)* lost and *(b)* stolen by staff in (i) her Department and (ii) departmental agencies in the last 12 months. [147908]

Mr. Burstow: To ask the Secretary of State for Environment, Food and Rural Affairs how many security passes have been reported *(a)* lost and *(b)* stolen by staff in her Department in the last 12 months. [150888]

Alun Michael: During 2003 available figures for the core Department show that 108 passes were reported lost and 12 stolen. These passes are electronically programmed and give no indication of the Department to which they relate. Once a loss is reported the pass is cancelled immediately which ends any threat to security.

Figures for Defra Agencies are as follows:

	Lost	*Stolen*
Centre for Environment, Fisheries and Aquaculture Science	16	1
Central Science Laboratory	11	0
Veterinary Laboratories Agency	6	0
Veterinary Medicines Directorate	10	0
Rural Payments Agency	350	5
Pesticides Safety Directorate	1	0

The high figure for the Rural Payments Agency is a result of employees on short term contracts failing to return their passes when they leave. This is being addressed.

Sunset Clauses

Mr. David Stewart: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on her policy on the use of sunset clauses in legislation; and which Acts containing such clauses relevant to her Department were passed in each year since 1997. [149330]

Alun Michael: Defra actively promotes the better regulation agenda and the use of sunsetting where appropriate. The Regulatory Impact Assessment (RIA) guidance 'Better Policy Making: A Guide to Regulatory Impact Assessment' advises policy officials to consider sunsetting at an early stage of policy development and gives specific circumstances where sunsetting may be appropriate. Additional examples are included in the web-based version of the RIA guidance published in November 2003. No acts containing sunset clauses relevant to Defra have been passed since Defra was established in 2001.

Underground Fuel Tanks

Mr. Llwyd: To ask the Secretary of State for Environment, Food and Rural Affairs how many leakages from underground fuel tanks were reported to the Environment Agency in the last five years. [150051]

Mr. Morley: Information from the Environment Agency's database for these years will take a little time to compile but will be made available to the Library of the House as soon as possible. I will write to the hon. Member when that is, and I will place a copy of my letter in the Library of the House.

HEALTH

Dentists

Mr. Burstow: To ask the Secretary of State for Health how many *(a)* principal and *(b)* assistant dentists there were in (i) England, (ii) each NHS region and (iii) each strategic health authority who (A) offered NHS treatment and (B) had vacancies for NHS patients, in each of the last five years. [146218]

Ms Rosie Winterton *[pursuant to her reply, 14 January 2004, Official Report, c. 800W]:* I regret that the strategic health authority figures for general dentist service dentists for 2003 in table 1 of my previous response, separately for principal dentists and dental assistants were incorrect, and should have read as follows.

Table 1: Number of general dental service dentists in England by region and strategic health authority for September 1999 to 2003

	2003 Principal Dentists	*2003 Assistant Dentists*
England	16,649	1,312
Region		
Northern and Yorkshire	—	—
Trent	—	—
West Midlands	—	—
North West	—	—
Eastern	—	—
London	—	—
South East	—	—
South and West	—	—

Table 1: Number of general dental service dentists in England by region and strategic health authority for September 1999 to 2003

	2003 Principal Dentists	2003 Assistant Dentists
Strategic Health Authority		
Avon, Gloucestershire and Wiltshire	786	58
Bedfordshire and Hertfordshire	602	62
Birmingham and The Black Country	663	50
Cheshire and Merseyside	779	36
County Durham and Tees Valley	346	8
Coventry, Warks, Herefordshire and Worcs.	489	31
Cumbria and Lancashire	601	23
Dorset and Somerset	418	38
Essex	462	57
Greater Manchester	852	37
Hampshire and Isle of Wight	567	77
Kent and Medway	507	63
Leics, Northants and Rutland	424	17
Norfolk, Suffolk and Cambridgeshire	658	119
North and East Yorkshire and N. Lincs	499	18
North Central London	561	36
North East London	438	54
North West London	787	82
Northumberland, Tyne and Wear	469	13
Shropshire and Staffordshire	430	13
South East London	525	44
South West London	534	50
South West Peninsula	555	47
South Yorkshire	405	20
Surrey and Sussex	1,084	87
Thames Valley	795	78
Trent	724	69
West Yorkshire	689	25

Note:
Assistant dentist numbers do not include VDPs (vocational dental practitioners).

Food in Schools Programme

Chris Grayling: To ask the Secretary of State for Health whether the Food in Schools programme announced by his Department on 30 December 2003 is linked to the Food in Schools programme announced by his Department in April 2001; and what the differences are between the programmes announced on those dates. [147928]

Miss Melanie Johnson: In 2001 the Department of Health and the Department for Education and Skills announced a joint venture on Food in Schools. My announcement on the 5 January 2004 was to publicise the eight new regional projects being piloted in each English region to encourage healthy eating among children throughout the school day which are the Department of Health's strand of the Food in Schools Programme.

The Department for Education and Skills strand of the Food in Schools Programme comprises eight curriculum focused projects which cover teacher training and professional development, as well as development of guidelines, resources and curriculum materials.

Hospital Admissions

Helen Jones: To ask the Secretary of State for Health if he will investigate the delay in admitting Mrs. H. Potter of Warrington to Wrightington Hospital; and if he will make a statement. [144879]

Miss Melanie Johnson *[holding answer 18 December 2003]:* The strategic health authorities lead the strategic development of local health services and performance manage primary care trusts and National Health Service trusts on the basis of local accountability agreements, following the "Shifting the Balance of Power" initiative.

Unfortunately, to disclose information without the specific consent of the individual patient would breech patient confidentiality. My hon. Friend may wish to contact the Wrightington hospital.

Hospital-acquired Infection

Dr. Murrison: To ask the Secretary of State for Health whether published figures for deaths from hospital acquired infection are approximate; what the margin of error is for these figures; and what measures have been taken to improve the data. [147506]

Miss Melanie Johnson: The widely quoted figure of 5,000 deaths being caused by hospital acquired infections (HAIs) is an extrapolation from estimates of deaths due to all HAIs in the United States in the 1980s[1]. Although it is difficult to compare data from different health systems, if rates in the United States were applicable to the United Kingdom then 5,000 deaths might be primarily attributable to health acquired infections.

Better UK estimates cannot be produced as there are no centrally held statistics on deaths caused by hospital acquired infections.

[1] Haley et al (1985) The efficacy of infection surveillance and central programs in preventing nosocomial infections in US hospitals (SENIC). Amercican Journal of Epidemiology 121: 182–205

Residential Care

Bob Spink: To ask the Secretary of State for Health what provisions he has made to ensure that funding of independent residential care providers encourages them to supply expected increases in demands on their services from 2005 onwards. [149826]

Dr. Ladyman: There have been substantial increases in the level of funding provided for social services in recent years and it will continue to increase in the period to 2005–06. Councils can use these extra resources to increase local service provision taking into account the needs of the local population and the local supply of services.

We know that the majority of older people do not want to be in a care home and we are responding to this by investing in new models of provision such as extra-care housing schemes. It seems likely that the number of older people requiring residential care will not rise as fast as demographic pressures alone would suggest.

Scanners

Tim Loughton: To ask the Secretary of State for Health what the normal life expectancy in the NHS is of *(a)* MRI, *(b)* CAT and *(c)* PET scanners. [145055]

Miss Melanie Johnson: The expected life of computed tomography (CT), magnetic resonance imaging (MRI) and positron emission tomography (PET) scanners is approximately seven to ten years, dependent on the level of upgrade that is possible for that equipment during its lifetime. However, it is not unreasonable for equipment to remain in-situ and in working order after this period.

Sexual Health

Mr. Rosindell: To ask the Secretary of State for Health how many people in England were treated for a sexually transmitted disease in the most recent year for which figures are available. [150363]

Miss Melanie Johnson: There were 596,728 episodes of diagnosed or suspected sexually transmitted infections from genito-urinary medicine (GUM) clinics in England that were treated during the calendar year 2002. Additionally, there were 112,447 attendances at GUM clinics in England during 2002, where other conditions required treatment.

The quarterly statutory returns (KC60), made to Communicable Disease Surveillance Centre (CDSC) from GUM clinics, record confirmed episodes of disease, rather than the number of people attending. Individuals may attend more than one GUM clinic and may attend more than once over the course of a calendar year.

Waiting Times

Mr. Laws: To ask the Secretary of State for Health (1) if he will list each NHS trust which maintains planned lists on which people wait for operations but which are excluded from the inpatient and outpatient waiting list returns; what his Department's guidance is about the use of planned waiting lists; and if he will make a statement; [150538]

(2) how many people are waiting for cataract operations on *(a)* waiting lists and *(b)* planned lists in each English health trust for the latest date for which information is available; and if he will make a statement. [150540]

Mr. Hutton: Data are not collected on the number of patients currently waiting on planned lists.

The use of planned lists has been an established practice for over 10 years. The Department has issued guidance to National Health Service trusts within the central return KH07 on recording patients waiting on planned lists. It states:

> Planned Admissions are those who have been given a date, or an approximate date, for admissions, usually as a planned sequence of clinical care. The date of admission for such patients is determined mainly on social or clinical grounds.

In light of this guidance, it is likely that all trusts submitting waiting lists maintain planned lists for those patients requiring a planned sequence of clinical care.

Data are not collected on the number of patients currently waiting for cataract surgery. However, data are collected on the number of patients on inpatient waiting lists within the specialty of ophthalmology.

At quarter two, 2003–04, ending 30 September 2003, there were 130,060 patients on the inpatient waiting list for ophthalmology. Data are not collected on individual procedures within each specialty. Data for earlier quarters can be viewed on the Department's website at: www.doh.gov.uk/waitingtimes. The national cataract initiative has been introduced to reduce waiting times for cataract operations to three months by December 2004.

EDUCATION AND SKILLS

Children's Centres

Stephen Hesford: To ask the Secretary of State for Education and Skills how many children's centres are planned to open in 2004; and if he will make a statement. [148427]

Margaret Hodge: There are now 61 children's centres in England, all of which are based in disadvantaged areas. Local authorities' strategic proposals are currently being assessed and more children's centres that meet the children's centre core offer have been identified. These will be announced in the next few weeks.

We are currently unable to state how many children's centres will open in 2004 but the exact position will be clearer once local authorities have submitted their implementation plans by the end of May 2004.

Children's Fund

Dr. Tonge: To ask the Secretary of State for Education and Skills if he will make a statement on changes in the Children's Fund budget made after the mid-year review; and what assessment he has made of the effects of the changes. [148914]

Margaret Hodge: The 2003–04 mid year review of expenditure identified approximately £12.5 million in underspend from quarters 1 and 2.

The Department met representatives from the main voluntary sector organisations involved in the Fund, the LGA and the ADSS on 18 December to discuss the review and assess its impact. Officials then wrote to all Children's Fund partnerships on 19 December 2003. We advised partnerships that where our decision to take back underspends at the mid-year review had compromised their ability to meet contractual obligations, we would revisit them. Furthermore, we set aside some money to assist where there was a likelihood of staff redundancy or premature closure of services. The Children's Fund regional teams have continued to discuss the detailed implications with partnerships and this process will be completed at the end of January.

Disabled Children

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills (1) what assessment has been made of *(a)* disabled children's experience of abuse and *(b)* the effectiveness of existing systems in protecting disabled children; [150130]

(2) if he will develop a national strategy for the safeguarding of disabled children through consultation with disabled children and adults and organisations advocating on their behalf. [150131]

Margaret Hodge: The Department for Education and Skills regularly receives correspondence from parents and voluntary groups about issues affecting disabled children including child protection. This has included reports from the NSPCC, the Joseph Rowntree Foundation, and the National Working Group on Child Protection and Disability, which have influenced policy development. In particular, recent representations from the NSPCC were taken into account by the Disabled

Children's External Working Group developing standards as part of the National Service Framework for Children, Young People and Maternity Services which will be published later this year. We welcome the publication of the recent report from the National Working Group, "It doesn't happen to disabled children: child protection and disabled children", and will consider its recommendations when developing Government policy and guidance on child protection.

The Joint Chief Inspectors' Report "Safeguarding Children", published in October 2002, contained a recommendation that all relevant Inspectorates should ensure that, prior to the next report, appropriate inspection activity had been undertaken on children with disabilities. "Safeguarding Children" asked Chief Inspectors to consider whether there was a need to supplement the planned programme of inspections in any way. In planning for the next children's safeguards review, the Inspectorates have identified that additional activity is required in relation to children with disabilities and special needs and are developing plans to enhance their programmes in this area.

Divorce

Mr. McLoughlin: To ask the Secretary of State for Education and Skills how many children in the East Midlands were affected by divorce in *(a)* 2001–02 and *(b)* 2002–03. [150923]

Mr. Lammy: I have been asked to reply.

The only figures collected centrally relate to the number of children involved at the petition stage of divorce. The total number of children of couples who petitioned for divorce in the East Midlands region in the given periods are:

	Petitions	*Children involved*
2001–02	12,467	7,537
2002–03	12,991	7,707

Further Education

Mr. Hoyle: To ask the Secretary of State for Education and Skills if he will list the level of funding per pupil in further education in *(a)* Chorley and *(b)* Lancashire in 2003–04. [151278]

Alan Johnson: The Department does not collect information on the level of funding per pupil in further education at local or regional level. Mark Haysom, the Learning and Skills Council's Chief Executive, will write to the hon. Gentleman with details of the average level of funding per pupil in further education in *(a)* Chorley and *(b)* Lancashire in 2003–04. A copy of his reply will be placed in the House Library.

Mr. Paul Marsden: To ask the Secretary of State for Education and Skills what *(a)* the national average level of funding per further education student and *(b)* the level of funding per student for each further education college is in Shrewsbury and Atcham. [151374]

Alan Johnson: The Department does not collect information on the level of funding per pupil in further education at local or regional level. Mark Haysom, the Learning and Skills Council's Chief Executive, will write to the hon. Gentleman with details of the average level of funding per student for each further education college in Shrewsbury and Atcham. A copy of his reply will be placed in the House Library. Participation funding per full-time equivalent student in further education in England in 2003–04 is planned to be £3,830. This figure does not include funding for capital or funding for other specific initiatives. This figure is consistent with that published in the "Departmental Annual Report 2003".

Higher Education

Bob Spink: To ask the Secretary of State for Education and Skills what estimate he has made of the average cost to a student of the decision to undertake higher education, taking into account *(a)* loss of potential earnings while a full time student and *(b)* all other costs associated with the decision. [147600]

Alan Johnson: My officials have estimated that the average net present cost[1] of participating in a three-year HE course, starting in 2001–02, is around £29,000 (in 2001 prices). The figure includes:

(a) direct costs—i.e. contribution towards tuition fees (net of fee remission paid by Government), maintenance support from the family, and Government student loan repayments—of around £12,000 and

(b) indirect costs—i.e. foregone earnings whilst in HE net of earnings whilst studying of around £17,000.

In undiscounted cash terms, the direct and indirect average costs are around £13,600 and £18,000 respectively. The estimate is based on a hypothetical average individual entering HE at the age of 18, and the costs are averaged across all students.

[1] Discounted at 3.5 per cent.

Mrs. Ellman: To ask the Secretary of State for Education and Skills what estimate he has made of the proportion of people in Liverpool who have received higher education in each of the last 10 years. [150151]

Alan Johnson: The latest available information is shown in the table. Figures for earlier years are not held centrally.

Proportion of 18-year-olds from Liverpool local education authority who were accepted for entry to full-time undergraduate courses via the Universities and Colleges Admissions Service (UCAS)

Year of entry	*Proportion*
1994	12.7
1995	14.7
1996	13.4
1997	13.9
1998	14.0
1999	15.9
2000	16.3
2001	17.5
2002	18.2

Mature Students

Mr. Boswell: To ask the Secretary of State for Education and Skills what plans he has to modify the age cap on loans for mature students following his decision to introduce a 25 year cut-off period for student loans. [151113]

Alan Johnson: The age limit is 50 for eligible students meeting the residence requirements. Those aged 50 to 54 at the start of their course can also apply for a student loan provided that they plan to return to work after finishing their course. We have no plans to change these age limits for mature students.

Outstanding loans for mature students are already cancelled when a borrower reaches the age of 65, and we have no plans to change that age limit. Putting a 25-year cap on the loan repayment period allows outstanding loan amounts to be written off after 25 years or age 65, whichever is the earlier.

Modern Apprenticeships

Rob Marris: To ask the Secretary of State for Education and Skills what assessment he has made of the level of employer engagement with the modern apprenticeship scheme. [150003]

Mr. Ivan Lewis: "The Learning and Training at Work 2002" survey reveals that 10 per cent. of all employers of 16 to 24 year olds employ Foundation Modern Apprenticeships (FMA) and 4 per cent. employ Advanced Modern Apprenticeships (AMA). Larger employers are much more likely to employ modern apprentices than small firms: of all employers with over 500 staff who employ 16 to 24 year olds, 29 per cent. employ FMAs and 24 per cent. employ AMAs.

In 2002, 57 per cent. of employers were aware of AMAs (compared to 51 per cent. in 2001). Meanwhile, 45 per cent. of employers were aware of FMAs (compared to 39 per cent. in 2001).

The latest survey of MA employers reveals that, in 89 per cent. of cases, employers are very satisfied with the MA programme. Moreover, the majority of current employers (representing 91 per cent. of MAs) say they intend to continue offering MAs in the future.

National Botanic Gardens of Wales

Adam Price: To ask the Secretary of State for Education and Skills what discussions he has had with Welsh Assembly Government colleagues with regard to funding for the National Botanic Gardens of Wales. [150665]

Mr. Hain: I have been asked to reply.

I have regular discussions with Assembly Ministers about issues affecting Wales, these have included the National Botanical Gardens. It is a matter for the Welsh Assembly Government to determine funding priorities in Wales.

Student Loans

Charles Hendry: To ask the Secretary of State for Education and Skills what plans he has to raise the threshold at which existing graduates start repaying student loans. [151469]

Alan Johnson *[holding answer 27 January 2004]:* We plan to increase the threshold for the repayment of student loans from £10,000 to £15,000 with effect from April 2005. The increase in the threshold to £15,000 will apply to all borrowers regardless of when they took our their income contingent student loan.

Top-up Fees

Dr. Tonge: To ask the Secretary of State for Education and Skills what assessment he has made of the effect of tuition fees on the number of doctors choosing to work abroad after qualification. [151120]

Alan Johnson: There is no reason to expect a significant effect. The Government have no evidence that there is a problem of more doctors leaving the UK permanently to work overseas. Doctors earn considerably in excess of the national average. So medical graduates will be able to pay off their student loan for living costs and for tuition fees comparatively rapidly.

SOLICITOR-GENERAL

Bribery

Mr. Simon Thomas: To ask the Solicitor-General how many times since 1997 the Crown Prosecution Service has given advice to law enforcement agencies on whether an investigation into an offence of bribery of a foreign public official would have a realistic prospect of prosecution; and in how many of those instances its advice was that there would not be a realistic prospect of prosecution. [151440]

The Solicitor-General: The Crown Prosecution Service (CPS) does not keep records of the nationality of persons who are the subject of police investigations and about whom their advice is sought. In order to obtain this information all relevant files will have to be identified across the 42 Areas and individually checked. The information could not be obtained except at disproportionate costs. But even this would not necessarily provide comprehensive data as a number of relevant older files may well have been destroyed in accordance with archiving procedures.

Outsourcing

Norman Lamb: To ask the Solicitor-General if she will make a statement on the Department's procurement policy with regard to offshore IT and call centre outsourcing; whether the Department is outsourcing IT and call centre jobs to offshore companies; to which countries the Department has outsourced these jobs; how much the Department has spent on this outsourcing in each of the last two years; and how much has been budgeted for this purpose for the next two years. [147576]

The Solicitor-General: None of the Departments for which the Attorney General holds Ministerial responsibility currently outsource either call centre or IT services to offshore companies and have no current plans to do so. Consequently, the Departments have set no budget for this purpose over the next two years.

Security Passes

Mr. Burstow: To ask the Solicitor-General how many security passes have been reported *(a)* lost and *(b)* stolen by staff in the Law Officers' Department in the last 12 months. [150842]

The Solicitor-General: During 2003, CPS Headquarters was notified that 81 identity cards/access cards had been lost and five had been stolen.

28 security passes were reported as lost in the Treasury Solicitor's Department within the last 12 months. All 28 passes were reported as lost rather than stolen. Five security passes were reported as lost in the Serious Fraud Office within the last 12 months. All five were reported as lost rather than stolen. Six security passes were reported as lost in HM Crown Prosecution Service Inspectorate within the last 12 months. All six were reported as lost rather than stolen.

No security passes were reported as either stolen or lost by my own department, the Legal Secretariat to the Law Officers, over that period.

WORK AND PENSIONS

Management Consultants

Mr. Flight: To ask the Secretary of State for Work and Pensions what the cost to his Department of using management consultants has been in each of the last five years. [148022]

Maria Eagle: The Department for Work and Pensions was established in 2001. The latest financial year for which complete expenditure figures are available is 2002–03. Figures on the cost of management consultancy for the Department for Work and Pensions for 2001–02 and 2002–03 and for the former Department of Social Security for 1998–99, 1999–2000 and 2000–01 are in the table. Information for the former Employment Service is not available.

Management consultancy costs

Department and financial year	*Cost (£ million)*
DWP 2002–03	47.57
DWP 2001–02	23.79
DSS 2000–01	21.90
DSS 1999–2000	19.00
DSS 1998–99	12.98

Maternity Allowance

Sandra Gidley: To ask the Secretary of State for Work and Pensions (1) how many maternity allowance claims were *(a)* processed and *(b)* awarded in each year since 1997; and if he will make a statement; [149009]

(2) what reasons are given for refusing maternity allowance claims; [149010]

(3) how many women were eligible for maternity allowance in each year since 1997. [149011]

Maria Eagle: The available information is in the table.

In order to receive maternity allowance (MA), a woman must have been employed and/or self-employed in at least 26 weeks in the 66 week period ending with the week before her expected week of childbirth (the test period), and earn on average at least £30 a week averaged over any 13 weeks in that test period.

In most cases where a claim to MA does not result in an award, it is because the qualifying conditions have not been met. In a very small number of cases, a claim will not result in an award because it was outside the time limits; the earliest a woman may claim MA is 14 weeks before here expected week of childbirth, and a claim must be made within three months of the date her MA is due to start.

Information on the number of claims that were processed and the number of women who were eligible for MA is not available.

Maternity allowance claims awarded and disallowed in the periods shown

Period	*Awarded*	*Disallowed*
1 March 1997–31 August 1997	19,100	—
1 September 1997–31 August 1998	40,100	—
1 September 1998–31 August 1999	39,400	—
1 September 1999–31 August 2000	38,900	700
1 September 2000–31 August 2001	50,600	3,400
1 September 2001–31 August 2002	50,800	2,700
1 September 2002–31 August 2003	51,800	2,700

Notes:
1. Figures are rounded to the nearest hundred.
2. These figures have been updated to include late notification commencements.
3. Figures for the latest year are subject to changes due to late notifications.
4. Data for disallowed claims prior to August 2000 is not available.

Source:
DWP Information Centre, 5 per cent. samples.

CABINET OFFICE

Disabled People

Mr. Goodman: To ask the Minister for the Cabinet Office what remit the Strategy Unit has in relation to its work relating to people with disabilities; and if he will make a statement. [150530]

Mr. Alexander: The Strategy Unit has been asked to provide supporting analysis and a strategic assessment of disabled people's life chances—the opportunities available to disabled people, both children and adults, to improve their quality of life.

The Unit's role will be to:

improve understanding of disabled people's life chances, and of their underlying drivers; assess the implications of this analysis for disabled people, their families and for wider society; and inform the ongoing development of policy.

The Unit will work with disabled people and their representatives, with other interested organisations and with other Government Departments, and will report to the Minister for Disabled People.

The Unit's analysis will be fed into the Spending Review 2004.

Sunset Clauses

Mr. David Stewart: To ask the Minister for the Cabinet Office if he will make a statement on his policy on the use of sunset clauses in legislation; and which Acts containing such clauses relevant to his Department were passed in each year since 1997. [149326]

Mr. Alexander: No legislation introduced by my department during the period in question has contained sunset clauses. The Cabinet Office promotes the better regulation agenda and the use of sunsetting where appropriate. The Regulatory Impact Assessment(RIA) guidance 'Better Policy Making: A Guide to Regulatory Impact Assessment' advises policy officials to consider time limiting or sunsetting at an early stage of policy development and gives specific circumstances where sunsetting may be appropriate. In November 2003 we published web-based RIA guidance which contains additional examples of sunsetting.

CULTURE, MEDIA AND SPORT

Audio-described Services

Mr. Boswell: To ask the Secretary of State for Culture, Media and Sport what plans she has to increase the availability of audio-described services on digital cable television. [151115]

Estelle Morris: Digital cable television has a requirement to carry the audio description service, in the same way that we expect digital satellite and digital terrestrial television to carry this service.

There are technical problems surrounding provision of audio description on cable. It is for the cable operators to resolve these issues. However, DCMS officials have been working with manufacturers, broadcasters, software/applications providers and consumer groups as part of the Digital Television Action Plan to ensure that audio description can be received on all platforms.

BBC Charter Review

Lady Hermon: To ask the Secretary of State for Culture, Media and Sport what plans she has to meet representatives from the BBC in Northern Ireland in relation to the BBC Charter Review. [151331]

Tessa Jowell: I and my ministerial colleagues intend to undertake a number of visits around the UK, including to Northern Ireland as part of the consultation on the review of the BBC's Charter. Those visits are likely to include seminars with representatives of the industry, including the BBC.

In addition, Charter review more generally will cover all aspects of the BBC's role, structure and function, including its regional organisation. I hope and expect that the BBC will engage fully with the review.

Digital Television (Access)

Mr. Boswell: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on progress in developing access to digital television for users with *(a)* sensory disabilities and *(b)* other special needs. [151116]

Estelle Morris: The Communications Act 2003 introduced a number of provisions aimed at increasing access to digital television services. These include extending the targets for subtitling, audio description and signing of services to digital cable and satellite broadcasters for the first time. Ofcom also has a duty to encourage the availability of easily usable domestic electronic communications apparatus.

The Digital Television Action Plan includes actions to ensure that digital television equipment and services are accessible to the broadest range of people.

The Action Plan's Technical Equipment Group (comprising manufacturers, broadcasters, software/ applications providers and consumer groups) has been tasked to investigate the reception equipment requirements for users with sensory disabilities and to recommend actions to help promote usability and inclusive design for all.

Two recent reports have indicated that some advances have been made in access to services for sensory impaired people, but action is needed to promote their further development and that current designs make digital television equipment more difficult to use than analogue.

Clearly there are still challenges ahead and we are looking closely at the findings and recommendations of the reports. We will continue to work within the Action Plan, with industry and consumer organisations to address these issues.

The reports are available on: www.digitaltelevision.gov.uk

Management Consultants

Mr. Flight: To ask the Secretary of State for Culture, Media and Sport what the cost to her Department of using management consultants has been in each of the last five years. [148030]

Mr. Caborn: The cost to the Department for Culture, Media and Sport of using Management Consultants in each of the last five years can be found in the following table.

	Cost (£)
1998–99	27,289.12
1999–2000	71,106.30
2000–01	100,089.26
2001–02	90,407.30
2002–03	107,299.50

CONSTITUTIONAL AFFAIRS

Civil Servants

Dr. Cable: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150272]

Mr. Lammy: The Department for Constitutional Affairs occupies 64,716 square metres of office space in central London and none in Greater London.

Information Technology

Mr. Allan: To ask the Parliamentary Secretary, Department for Constitutional Affairs what cost savings have been made in the Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151052]

Mr. Leslie: The majority of systems used within my Department are supplied under outsource agreements with Liberata, EDS and Fujitsu Systems. It is the suppliers' responsibility to monitor the use of these systems and associated equipment. Dependent upon the particular system being used, there are a number of measures taken to ensure proper use. These include:

access restrictions ensuring that only authorised personnel can use the systems;

controlled change management procedures for adding and removing hardware and software;

software auditing and restrictions to ensure unauthorised software/hardware either cannot be installed or that its use is identified; and

software monitoring tools to ensure that access and use of the web is monitored and audited.

Publicity Campaigns

Brian Cotter: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much *(a)* his Department and *(b)* each agency and non-departmental public body sponsored by the Department has spent on (i) advertising and (ii) information campaigns in each year since its creation to 2003–04 (estimated); and if he will make a statement. [149622]

Mr. Lammy: The information is listed in the table.

Only DCA Policy Group and two NDPBs have incurred expenditure on advertising and information campaigns.

£

Financial Year April to March 2004	*Expenditure on advertising*	*Expenditure on information campaigns*
DCAHQ Policy Group (including Public Guardianship Office and the Court Service)	207,000	46,000
DCA Non-departmental public bodies		
Legal Services Commission	64,294	2,879
Office of the Information Commissioner	Nil	197,428
Total	[1]271,294	[2]246,307

[1] It is estimated that a further £200,000 will be spent by DCA policy Group on advertising covering a recruiting campaign for the lay magistracy up to the end of March 2004.

[2] The bulk of this figure covers on-going publicity for the Freedom of Information campaign and the provision of telephone advice lines and maintenance of the Just Ask website by the Legal Services Commission.

WALES

Civil Contingencies Bill

Miss McIntosh: To ask the Secretary of State for Wales what recent discussions he has had with the First Secretary on funding to implement in Wales the provisions of the Civil Contingencies Bill. [149444]

Mr. Hain: I have regular meetings with the First Minister to discuss funding for a range of issues including this one.

Civil Servants

Dr. Cable: To ask the Secretary of State for Wales how many civil servants, broken down by grade, there are in the Department and the agencies for which the Office is responsible; and what the figures were in January 1997. [150264]

Mr. Touhig: This Department was established on 1 July 1999 and has no agencies. The table shows the number of staff-in-post as at 1 October 2003.

Staff-in-post as at 1 October 2003

Responsibility level	*Number*
SCS	1
Grade 6	5
Grade 7	2
Senior Executive Officer	1
Higher Executive Officer	15
Executive Officer	14
Administrative Officer	10
Administrative Assistant	1
Total non-industrial staff	49

Ministerial Meetings

Mr. Llwyd: To ask the Secretary of State for Wales how many meetings he has had in his capacity as Secretary of State for Wales in the past 15 months. [150653]

Mr. Hain: In common with past Secretaries of State, I continue to hold a wide range of meetings with interested parties. These include meetings with Cabinet colleagues, the First Minister, Assembly Ministers, MPs (including the hon. Member for Meirionnydd Nant Conwy), business/commercial interests, voluntary sector and TUC.

National Assembly for Wales

Mr. Llwyd: To ask the Secretary of State for Wales (1) how many visits he has made to the National Assembly for Wales in each of the last 15 months; [150655]

(2) how many meetings he has had with the National Assembly for Wales in each of the last 15 months. [150656]

Mr. Hain: I have formally addressed three National Assembly Plenary sessions arising from my responsibilities under the Government of Wales Act. In addition, I meet with the First Minister on a weekly basis, Assembly Government Ministers and the Presiding Officer as the need arises.

Official Engagements

Mr. Llwyd: To ask the Secretary of State for Wales how many official engagements he undertook in Wales over the last six months; and how many of those were in Mid and North Wales. [150057]

Mr. Hain: As Secretary of State for Wales I regularly undertake official engagements throughout Wales, including addressing conferences, visiting business and industry and newspaper offices. I also attend major national events such as the Royal Welsh Show, and the National and International Eisteddfods. Since July 2003, I have made five visits to Mid and North Wales for such engagements.

Press Office

Mr. Llwyd: To ask the Secretary of State for Wales how many press releases the Wales Office Press Office issued each day in *(a)* November and *(b)* December 2003. [150060]

Mr. Hain: The Wales Office does not issue press releases on a daily basis but as demand requires.

Six press releases were issued in November 2003. In December 2003, 14 press releases were issued.

These figures do not include operational notes, lobby notes circulated after our weekly media briefings, articles for the media or contributions to joint press releases with other organisations.

The Press Office also arranges press conferences and briefings, media interview requests and inquiries and also maintains the Wales Office website.

Mr. Llwyd: To ask the Secretary of State for Wales what the total salary cost of the Wales Office Press Office was in 2003. [150061]

Mr. Hain: The Wales Office employs three Press Officers, whose basic salary scales currently range from £23,764 to £31,003, £26,688 to £35,214 and £42,999 to £56,737.

Young Offenders Institution, Glyn Neath

Mr. Llwyd: To ask the Secretary of State for Wales how many representations he received concerning the application for planning permission for a youth offender institution in Glyn Neath; and how many of those supported the application. [150054]

Mr. Hain: I have received a number of representations on this issue, expressing a range of views.

FOREIGN AND COMMONWEALTH AFFAIRS

Diplomatic Staff

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs how many staff work at the British High Commission in Islamabad, Pakistan. [149889]

Mr. Mike O'Brien: There are 94 UK based and 334 locally employed staff working at the British High Commission in Islamabad, Pakistan.

Sarah Teather: To ask the Secretary of State for Foreign and Commonwealth Affairs what the average number of staff working at a British High Commission was in 2003. [149890]

Mr. Mike O'Brien: The average numbers of staff working at a British High Commission (HM representation in Commonwealth countries) in 2003 was: UK based 19 and locally employed 67.

Guantanamo Bay

John Austin: To ask the Secretary of State for Foreign and Commonwealth Affairs for how long each of the British citizens being held in Guantanamo Bay has been held; and if he will make a statement. [151471]

Mr. Mullin: There are nine British nationals detained at Guantanamo Bay. Three of the British nationals were transferred to Guantanamo Bay in January 2002, two in February 2002, two in May 2002, one in October 2002 and one in February 2003.

The Government's discussions with the US about the future of all the British detainees at Guantanamo Bay are continuing. It is hoped that the situation will be resolved in the next few weeks.

Iraq

Mr. Chaytor: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on progress towards the establishment of the International Trust Fund to manage Iraq's oil revenues. [149534]

Mr. Rammell *[holding answer 27 January 2004]:* Iraq's oil revenues are being paid into a Development Fund for Iraq which is overseen by an International Advisory and Monitoring Board, as mandated by UN Security Council Resolution 1483.

Middle East

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent representations he has made to the Israeli Government concerning *(a)* illegal settlements in Gaza and the West Bank and *(b)* continued construction of the security wall. [149820]

Mr. Rammell: The Government regularly raise these issues with the Government of Israel. We have made clear that settlements are illegal under international law and an obstacle to a comprehensive peace in the region, and that we regard the building of the wall on occupied Palestinian land as unlawful.

Mr. Laws: To ask the Secretary of State for Foreign and Commonwealth Affairs what action the UK Government is taking in relation to the building of the partition wall by Israel in Palestinian territory; and if he will make a statement. [151161]

Mr. Rammell: The Government continues to urge the Government of Israel to re-route the fence away from Palestinian areas. My right hon. Friends the Prime Minster and the Foreign Secretary have made clear our concerns to the Israeli Prime Minister and Foreign Minister on a number of occasions. My noble Friend the Baroness Symons of Vernham Dean has raised the matter with the Israeli Foreign Minister, the Israeli

Ambassador and the Israeli Minister for National Infrastructure. My noble Friend saw the impact of the fence for herself on 22 January.

The Government recognises Israel's legitimate security concerns, and deplores the suicide bombings of Israeli civilians. But we consider Israel's building of a wall, or fence, on occupied land to be unlawful, and have urged the Israeli government to reconsider its route.

Statutory Sick Pay

Mr. Goodman: To ask the Secretary of State for Foreign and Commonwealth Affairs how many people employed in his Department have claimed statutory sick pay for *(a)* less than one week, *(b)* one to three weeks, *(c)* four to six weeks, *(d)* seven to 12 weeks, *(e)* 13 to 20 weeks and *(f)* 21 to 28 weeks in each year since 1997. [148635]

Mr. Mike O'Brien: The Foreign and Commonwealth Office holds detailed electronic records on SSP claims from 1999. To provide the information for 1997 and 1998 would incur disproportionate costs.

Information from 1999 is as follows:

	1999[1]	*2000*	*2001*	*2002*	*2003*[2]
Less than 1 week	125	244	229	169	105
1 to 3 weeks	30	91	75	62	41
4 to 6 weeks	6	22	23	15	12
7 to 12 weeks	9	16	24	22	9
13 to 20 weeks	6	15	11	15	9
21 to 28 weeks	0	0	0	0	0

[1] Data for 1999 is incomplete due to the commencement of the data system in-year.
[2] Data available to 1 September only.

We are committed to managing sickness absence effectively and expect to meet our Service Devlivery Agreement target for reducing sickness absence to an average of 5.7 days.

Terrorism (Political Parties)

Mrs. Iris Robinson: To ask the Secretary of State for Foreign and Commonwealth Affairs in which nations his Department deems that political parties which remain linked to terrorist groups are participating in Govern nent. [149614]

Mr. MacShane: Terrorism is incompatible with the legitimate political life of any nation. It is not clear how many political parties globally have operational or organisational links to terrorist groups. In cases where we do believe there are links, for example Hizbollah in Lebanon, we have pressed strongly for the abandonment of all terrorist activity and the exclusive pursuit of legitimate political engagement.

INTERNATIONAL DEVELOPMENT

Ghana

7. **Mr. Liddell-Grainger:** To ask the Secretary of State for International Development if he will make a statement on the help given to rural Ghana. [151169]

Mr. Gareth Thomas: The UK, in common with the majority of donors to Ghana, is supporting the implementation of the Ghana Poverty Reduction Strategy, which prioritises support for rural Ghana, where 56 per cent. of Ghanaians live. Together with others, we are backing programmes to improve land administration, forest management, agriculture, communications, and access to markets and financial services, and to improve standards in health care and primary education.

Zimbabwe

8. **Chris Grayling:** To ask the Secretary of State for International Development if he will make a statement on the humanitarian situation in Zimbabwe. [151170]

Mr. Gareth Thomas: The Government of Zimbabwe's poorly implemented land reform programme and misguided economic policies continue to fuel the humanitarian crisis in Zimbabwe, which is exacerbated by the effect of the HIV/AIDS epidemic and low and erratic rainfall. At least six million Zimbabweans will require food assistance in the months leading up to the harvest in April 2004. DFID has contributed £62 million for humanitarian assistance for Zimbabwe since the crisis began in 2001 and provides further funds to help tackle HIV/AIDS.

Uganda

9. **Mr. Reed:** To ask the Secretary of State for International Development if he will make a statement on the impact of conflict in Uganda on the Department's work there. [151171]

Mr. Gareth Thomas: DFID's programme in Uganda, as elsewhere, focuses on poverty reduction. As a result of the conflict, levels of poverty in the north remain high, and have not been falling as elsewhere in the country. 63 per cent. of households in the north live below the poverty line compared with 38 per cent. nationally. The conflict severely hinders long-term development activities. The UK programme in the north has focused on humanitarian support and interventions to help resolve the conflict. We have provided £7.3 million of humanitarian assistance over the last 12 months. We will be discussing the conflict with President Museveni during his UK visit this week.

Bilateral Aid

10. **Michael Fabricant:** To ask the Secretary of State for International Development what criteria are used by his Department to avoid fraudulent use of bilateral aid; and if he will make a statement. [151172]

Mr. Gareth Thomas: DFID's Programme and Project Management procedures are designed to minimise the risks of bilateral aid being diverted for fraudulent purposes. The procedures include strict controls over project appraisal, approval, procurement, payments, monitoring and evaluation. In addition, all DFID's activities are open to scrutiny by my Department's Internal Auditors and by the UK National Audit Office (NAO).

DFID is also committed to supporting the improvement of governance, transparency and accountability in developing countries. My Department itself operates, and encourages in others, a "zero tolerance" stance towards fraud and corruption.

Along with other aspects of development, DFID harmonises its anti-fraud and anti-corruption policies with other donors. The NAO commented in a recent report that "DFID's work is well-regarded by its partners who acknowledge the leading and proactive role that DFID plays in tackling corruption issues."

EU Overseas Aid

11. **Dr. Palmer:** To ask the Secretary of State for International Development if he will make a statement on the UK's priorities for EU overseas aid. [151173]

Mr. Gareth Thomas: The UK Government's main objective for EC development co-operation is to improve its poverty focus and the effectiveness of its programmes. Our Public Service Agreement sets a target for increasing the proportion of EC overseas development assistance going to low-income countries to 70 per cent. by 2006.

Over the next year it will be important to engage the new European Parliament, Commission, and member states on developments issues and to continue to ensure development issues are adequately reflected in the debates on future financing and post Inter-governmental Conference discussions.

Botswana

12. **Jim Dobbin:** To ask the Secretary of State for International Development if he will make a statement on his Department's work on HIV/AIDs in Botswana. [151174]

Mr. Gareth Thomas: DFID is contributing £7.65 million over five years to a programme implemented by the Southern African Development Community to help address HIV/AIDS in Botswana, Lesotho, Namibia and Swaziland. The programme supports the social marketing of condoms, strengthening of National AIDS Commissions in each of the countries and work to prevent HIV/AIDS transmission at cross border sites.

Vietnam

13. **Mr. Ben Chapman:** To ask the Secretary of State for International Development if he will make a statement on development assistance to Vietnam. [151175]

Mr. Gareth Thomas: The Department for International Development will spend approximately £24 million bilaterally to support poverty reduction in Vietnam in 2003–04, and up to £60 million by 2005–06. The new Vietnam Country Assistance Plan (CAP), to be published shortly, will set out in detail the Department's plans in Vietnam for the next 3–4 years. The key priority will be to support the broad strategy laid out in the Government of Vietnam's own poverty reduction plan, the Comprehensive Poverty Reduction and Growth Strategy (CPRGS

DFID's Country Assistance Programme for Vietnam will be published shortly and a copy will be placed in the House of Commons Library.

Iraq

14. **Mr. Boswell:** To ask the Secretary of State for International Development what assessment he has made of the current humanitarian situation in Iraq. [151176]

Mr. Gareth Thomas: In spite of difficulties resulting from the security situation in Iraq, there is no humanitarian crisis in the country. Significant progress has been made since the end of the conflict in restoring essential services, restoring the Public Distribution System for food rations, reopening hospitals and schools, and beginning the process of longer-term reconstruction.

US$33 billion in grants and soft loans was pledged for the reconstruction of Iraq at the Madrid Donors' Conference in October. DFID has already committed £220 million to humanitarian and reconstruction work in Iraq.

Mr. Bercow: To ask the Secretary of State for International Development what the result was of the consultation with the Association of Chief Police Officers on possible next steps in maintaining public order in Iraq. [150001]

Mr. Rammell: I have been asked to reply.

Officials from the Foreign and Commonwealth Office and Home Office consult regularly with Association of Chief Police Officers (ACPO) representatives on a range of issues related to the UK support for police training and reform in Iraq.

ACPO's international affairs office has made a critical contribution to these efforts. This has included facilitating the secondment of 80 serving British officers currently involved in advisory and training roles in Baghdad, Basra and at the Jordan International Police Training Centre; and advice on the overall shape and objectives of the UK police contribution in Iraq.

Mr. Swayne: To ask the Secretary of State for International Development what recent estimate had been made of the state of essential civilian infrastructure prior to the commencement of the military conflict in Iraq; and what plans his Department prepared for maintenance and repairs of the infrastructure. [150223]

Hilary Benn: United Nations and NGO organisations active in Iraq made assessments of civilian infrastructure prior to the conflict. These included United Nations Development Programme, UNICEF, International Committee Red Cross and CARE International UK. The Joint Needs Assessment prepared by the UN and World Bank before the Madrid Donors' Conference in October 2003 also assessed the condition of infrastructure pre and post conflict.

The Department's assistance prior to the conflict and in the immediate aftermath was largely channelled through United Nations agencies, the Red Cross and Red Crescent movement and NGOs. These organisations had experience of working in Iraq, well-established local networks and a capacity to deliver assistance on the ground. They were able to move back

into Iraq quickly after the major conflict ended and set up effective humanitarian operations. The Department helped these organisations to prepare for the post conflict phase.

As it became clear that the continuing insecurity meant that the UN was unable to operate in Iraq, we provided support to essential infrastructure in Southern Iraq. This was also informed by the needs assessment work in the lead-up to the Madrid Conference in October, following which we committed £20 million as a contribution to a US$127 million CPA Essential Services Programme for the restoration of essential infrastructure in Southern Iraq.

World Trade Negotiations

15. **Mr. Burns:** To ask the Secretary of State for International Development if he will make a statement on the progress of world trade negotiations, as they affect less developed countries. [151177]

Mr. Gareth Thomas: There have been intensive informal discussions since the Cancun ministerial meeting between Perez del Castillo, chair of the WTO Governing Council, and the various WTO delegations in Geneva, to try to resolve the outstanding issues left over from the Ministerial. However, del Castillo reported to the senior officials meeting on 15 December that these discussions had not achieved their objective.

Despite this, I am encouraged by the statements made by all WTO members that they remain committed to a resumption of talks and to the ambitions of the Doha Development Agenda. The expected increase in global welfare from a reduction of trade barriers will be shared by both developing and developed countries. It is in all our interest that we make progress with the trade negotiations and bring them to a successful conclusion.

Afghanistan

John Barrett: To ask the Secretary of State for International Development (1) what steps are being taken to ensure recent flooding in the Herat region of Afghanistan does not hamper future crop production; [150977]

(2) what assessment he has made of the impact which recent flooding has had on *(a)* basic transport and *(b)* educational infrastructure in the Herat region of Afghanistan; [150978]

(3) if he will make a statement on the humanitarian situation in the Herat region of Afghanistan, following recent flooding. [150975]

Mr. Gareth Thomas: A three-day persistent rain, which started on 16 January 2004, resulted in heavy flooding in Guzara district of Herat Province.

Although there were no human casualties, 500 families were affected, 250 houses were partially destroyed and over 850 hectares of cultivated land was left under water. However, there are as yet no confirmed reports of educational or basic transport infrastructure destruction.

A combined disaster management team including representatives from Government Ministries, UN agencies and non-governmental organizations (NGOs), has dispatched an assessment mission to the affected villages. Humanitarian assistance has now been supplied to the affected families by international aid agencies, which includes tents, blankets, jerry cans, kitchen utensils, and one-month food ration. The UN Food and Agriculture Organization (FAO) has pledged to provide seeds and will work on re-enforcement of the Guzara district canal, while the US led Provincial Reconstruction Team (PRT) has earmarked US $50,000 for rehabilitation efforts.

John Barrett: To ask the Secretary of State for International Development what impact the closure of the Salang tunnel has had on humanitarian efforts in the northern regions of Afghanistan; and if he will make a statement. [150979]

Mr. Gareth Thomas: Heavy snowfalls on 15 and 16 January with high winds and avalanches forced a temporary closure of the Salang tunnel, the key route from Kabul to the country's northern provinces. However, this closure was fortunately short, and the Salang road and tunnel reopened to traffic on 18 January. Although all UN road missions were temporarily suspended during the closure period, there are no reports of any significant impact on humanitarian operations, as a result of this closure.

Bangladesh

Mrs. Curtis-Thomas: To ask the Secretary of State for International Development what measures are in place to provide people living in the slums of Bangladesh with *(a)* clean water and *(b)* electricity. [150345]

Mr. Gareth Thomas: As elsewhere, slum dwellers in Bangladesh have few legal entitlements to essential services. As a consequence, they experience poor service provision, including water and electricity.

There are two distinct types of slum in Bangladesh, public and private:

(i) In public slums, some NGOs have taken the initiative to act as intermediaries between municipal water service providers and slum dwellers occupying public land. These NGOs become the customer of the water service provider and supply the slum dwellers through tap points. Those who use the tap points pay for the water they use. DFID is supporting such activities through a £17 million grant to WaterAid. Electricity is not usually affordable for slum dwellers, although it is not unusual for houses to be served by illegal connections; and

(ii) In private slums, the landlord makes arrangements for the provision of services such as water and electricity and charges slum dwellers for use of the service.

Central America

Mrs. Curtis-Thomas: To ask the Secretary of State for International Development what measures are in place to aid the employees of garment factories in Central America who are exploited by their employers. [150346]

Mr. Gareth Thomas: There are two sets of measures in place to try to assist employees of garment factories in Central America. First, in a range of Central America countries governments have in place, national Competitiveness Programmes. In Nicaragua for example, this Programme is supported through the World Wide Response on Apparel Production (WRAP), and funded by the World Bank. It aims to put in place codes of conduct that include labour standards.

Second, US retailers, the main purchasers of garments from the Central American garment or "maquilla" industry, are under pressure from northern consumers to conform to these codes and many are including monitoring of such codes as part of contractual agreements with wholesale garment producers, as well as spot checks in factories. In such cases lack of compliance is subject to sanctions by the retail purchasers.

During 2003 DFID Central America supported a national level workshop in Nicaragua to enable government, private sector and civil society to discuss national codes. This was the first time in Central America that institutions involved in the setting, operating and monitoring of codes had all met to debate this issue.

Ethiopia

John Barrett: To ask the Secretary of State for International Development what steps are being taken by his Department to ensure that food aid in Ethiopia is purchased from local farmers. [150104]

Hilary Benn: During the crisis of 2002–03, DFID was largely unable to provide food aid from local purchase. This was because of the severity of the overall national food shortage. Ethiopia required 1.8 million metric tonnes of food assistance, and at the request of the Ethiopian Government, this was mostly imported.

This year will provide better opportunities for local purchase of grains as production is up by 46 per cent. DFID is also considering providing cash instead of food to people in need. This will reduce the negative impact of imported food aid on local markets and farmers and will increase the purchasing power of those affected by food shortage.

John Barrett: To ask the Secretary of State for International Development if he will make a statement on the predicted harvest in Ethiopia and its impact on the numbers requiring food aid in that country. [150105]

Hilary Benn: The Food and Agricultural Organisation (FAO) estimate national cereal and pulse production for the main harvest of 2003–04 in Ethiopia to be just over 13 million metric tonnes. This is a 46 per cent. increase on the 2002–03 harvest and an 11 per cent. increase on the last five year average.

Despite the good crop, about 7.2 million people will need food aid—almost half that of last year. This equals an overall food requirement of 980,000 metric tonnes compared with 1.8 million metric tonnes in 2002–03.

Information Technology

Mr. Allan: To ask the Secretary of State for International Development what cost savings have been made in his Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151047]

Mr. Gareth Thomas: DFID are currently embedding the key COE functions in our programme for reviewing Business Processes and Corporate systems (which is called Catalyst). As cost benefits will not accrue until improvements start to take effect, it is too early to measure cost savings.

Detailed information will be available in future once the Catalyst programme is fully in place and has had an opportunity to collect the necessary statistics.

Mr. Allan: To ask the Secretary of State for International Development what audit mechanisms are in place to determine whether all Information Technology hardware and software products are being properly utilised in his Department. [151055]

Mr. Gareth Thomas: A series of audit mechanisms are in place within DFID to determine that all IT hardware and software products are being properly utilised. User guidance on Acceptable Use is in force and is published on the DFID Intranet (InSight).

The arrangements to track hardware assets are as follows:

1. Details of PC and printer hardware are maintained in the Desktop Inventory software package by Peregrine. Equipment is held both by type and by allocated serial number, and details are entered at the time of issue (or re-4 issue) of to whom equipment is issued and where it is located. Periodic stocktakes are undertaken to confirm and to update the information held in the inventory database, and anomalies are investigated.

2. Details of remote working laptop computers are held in a separate Microsoft Access database. This has been found to be more convenient from a support point of view since laptops tend to require rather more maintenance in service, and more configuration information can be held in this form of corporate record. Again, the equipment is recorded by a uniquely- allocated serial number, and is allocated to a named individual.

3. A separate issue and return record is maintained for pool laptops, under which authorised individuals may draw a laptop, and sign for it when taking it out. Issues are time dependant, with users being responsible for the safe return of the equipment—late returns are followed up.

The arrangements to record software products in use are as follows:

1. DFID employs a standard desktop system, which is distributed to all users. The latest version of this is locked down—this means that only the system supervisor can load application software onto the machine, and executable program files cannot be downloaded from the Internet.

2. The Information Systems Department will load other authorised software for specific individuals or departments who require it, but not until it has been fully tested to confirm that it does not interfere with any other software loaded on the machine or the network.

3. The Desktop Inventory product is used centrally to report on what software is loaded on DFID computers, and to check for the presence of files that contravene the central Acceptable Use Policy. Where suspicious files (eg .MP3, .jpg and .bmp files) are identified, these are either deleted or the reason for their presence is investigated by the Technical Security Manager.

Software licences are held and managed centrally, as a manual exercise at the moment. A Software Asset Management (SAM) system is currently under investigation to automate this process.

Operationally, user activity on the system, including file accesses, is logged, and the log files are subject to spot checks. User Internet activity is likewise logged and available for spot checks—this includes sites visited from remote working systems.

Malnutrition (Africa)

Mr. Bercow: To ask the Secretary of State for International Development what his most recent

estimate is of levels of malnutrition in *(a)* Ethiopia, *(b)* Malawi and *(c)* the Democratic Republic of Congo. [149979]

Hilary Benn: There are a number of ways to measure malnutrition. Height for age (stunting) is the most common way of measuring chronic poverty and malnutrition by showing the percentage of children that have not reached an expected height at a given age. According to UNICEF and correct up to 2001, the stunting rates for Ethiopia, Malawi and Democratic Republic of Congo (DRC) are 52 per cent., 49 per cent., and 38 per cent. respectively.

Wasting is an indicator that better measures short-term changes in malnutrition during an emergency by showing the percentage of children that are underweight in relation to their height. It is more difficult to determine for a country because it varies according to the degree of emergency and tends to be area focused rather than reflect a national trend. For example, in Ethiopia, 2002–03 figures for wasting rose as high as 32 per cent. in some areas. The same areas—a few months later—showed rates of 8 per cent. following the emergency operation.

Management Consultants

Mr. Flight: To ask the Secretary of State for International Development what the cost to his Department of using management consultants has been in each of the last five years. [148027]

Hilary Benn: Expenditure on consultancy services for the development programme in each of the last five years is recorded in "Statistics on International Development", Table 12. A copy of this publication is available in the Library of the House. We do not keep a central record of the cost of management consultants in particular and this information cannot be provided except at disproportionate cost.

Pakistan

Mr. Bercow: To ask the Secretary of State for International Development what recent assessment he has made of maternal mortality rates in refugee camps in Pakistan. [149996]

Mr. Gareth Thomas: A report by the Commonwealth Development Corporation covering the period from 1999 to 2000 found that 41 per cent. of deaths of Afghan refugee women of reproductive age in Pakistan were due to maternal causes. This exceeded the proportion of deaths related to any other cause for this group.

In response to the high levels of maternal mortality, the United Nations High Commission for Refugees runs basic health units in its camps for Afghan refugees. The health units include female health workers and doctors, who provide health care to pregnant refugees and advise women on all health issues. The improved access to health care has helped to reduce maternal deaths among refugee women.

Sub-Saharan Africa

Gregory Barker: To ask the Secretary of State for International Development how many new investments have been made by CDC in sub-Saharan Africa in the past 12 months. [151165]

Mr. Gareth Thomas: CDC Capital Partners has made six new investments totalling nearly £104 million in sub-Saharan Africa over the last 12 months. These include a £53 million investment in Songas, a Tanzanian power company and a £10 million investment in Flamingo Holdings, an integrated agribusiness in Kenya. CDC also made additional investments of £19.9 million into 26 of its existing holdings in the region during 2003.

Sudan

John Barrett: To ask the Secretary of State for International Development what assessment he has made of the humanitarian impact which the closure of Intifada camps Number one and Number two by Sudanese authorities will have; and if he will make a statement. [150110]

Hilary Benn: We continue to be concerned about the protection and assistance afforded to all internally displaced people (IDPs) in the Darfur region of Sudan, where there are reports of further significant population movements due to the ongoing conflict. This includes those IDPs relocated from the Intifada camp in Nyala, South Darfur. We continue to urge the parties to engage in peaceful negotiations, and to allow humanitarian agencies full and unimpeded access to IDPs and to those affected by the conflict.

Swaziland

John Barrett: To ask the Secretary of State for International Development what representations he has made to the government of Swaziland over the decision to build new palaces for King Mswati's wives. [150981]

Hilary Benn: We understand that the Government of Swaziland has not yet reached a decision on this matter. Our High Commissioner in Mbabane has discussed the issue with senior Ministers in Swaziland, and has expressed concern that non-essential government expenditure could undermine the government's ability to deal with pressing poverty issues, including food security and HIV/AIDS.

John Barrett: To ask the Secretary of State for International Development what impact the decision by the Government of Swaziland to spend $14 million on new palaces for King Mswati's wives will have on *(a)* UK bilateral aid programmes and *(b)* multilateral aid to that country. [150982]

Hilary Benn: Swaziland faces serious challenges in the next few years—including HIV/AIDS, constitutional reform and economic growth. At present DFID is only directly financing two programmes in Swaziland—support to the Coalition of Non-Government Organisations, and a programme on rural water supply. Neither channel funds directly to the Government and both are due to end during 2004.

The European Union, who expect to provide €43 million to Swaziland under the ninth replenishment of the European Development Fund is pursuing a process of political dialogue with the Government of Swaziland under the Cotonou Agreement.

Swaziland is also expected to receive support from international humanitarian agencies to assist with food security issues in the country, and from organisations such as the Global Fund against HIV/AIDS, TB and malaria to help address HIV/AIDS.

Trade-related Assistance

Mr. Bercow: To ask the Secretary of State for International Development if he will list the countries which have benefited from the Government's funding for trade-related capacity building and technical assistance since 1998; and how the money has been used. [149071]

Hilary Benn: £160 million has been committed to trade related capacity building from 1998—more than treble the pledge in the 2000 White Paper "Eliminating World Poverty: Making Globalisation Work for the Poor."

Trade related capacity building assistance and technical assistance has been delivered through bilateral, regional and multilateral channels for the benefit of individual countries and groups of countries.

Therefore all developing countries and territories and some of the countries and territories in transition listed in the Departmental Report 2003 have benefited from the Government's trade-related capacity building and technical assistance since 1998.

Funding has been provided for the development of trade sectors such as services, tourism, fisheries, forestry, public/private sector networking, banking and finance, business support services and institutions, industry and agriculture.

Assistance has also been provided for the formulation of trade policy through to benefit poor people with an emphasis on including trade issues in national poverty reduction and country assistance plans. Support has also been provided for training in trade negotiation techniques, agriculture, intellectual property rights, dispute settlement, regional trade agreements, assisting with accession to the WTO and trade facilitation.

Mr. Bercow: To ask the Secretary of State for International Development if he will list the countries that will benefit from the £50 million support announced by his predecessor in September 2003 for trade-related capacity building and technical assistance. [149072]

Hilary Benn: Nigeria will benefit from a programme designed to improve poor people's access to commodity and services markets.

Ukraine will benefit from a programme designed to support progress towards accession to the World Trade Organisation (WTO) and greater integration into the global economy.

The Government are also supporting a regional trade facilitation programme with the Southern Africa Development Community (SADC) and Common Market of Eastern and Southern Africa (COMESA) Secretariats. The precise allocation of resources within and between these regional groups will be for the Secretariats to decide.

In addition, direct support to central government budgets will be provided to a number of developing countries, especially in Africa.

Uzbekistan

John Barrett: To ask the Secretary of State for International Development if he will make a statement on the levels of household fuel poverty in Uzbekistan. [150980]

Mr. Gareth Thomas: DFID has not made an assessment of the levels of household fuel poverty in Uzbekistan. The World Bank is currently undertaking a survey of the Energy Policy Sector that will link poverty and access to fuel by households in Uzbekistan. The results of the study will be available later this year and can be accessed through the World Bank website (www.worldbank.org).

World Social Forum

Llew Smith: To ask the Secretary of State for International Development whether his Department *(a)* was represented at and *(b)* sent observers to the World Social Forum held in Mumbai this month. [149963]

Hilary Benn: Two Social Development Advisers from DFID's office in New Delhi attended the World Social Forum held in Mumbai, India from 16 to 21 January, as Delegates. Also, an official from DFID London attended the Forum as an Observer. Feedback suggests that their contribution to the broad range of issues discussed was highly valued.

DEPUTY PRIME MINISTER

Area Cost Adjustment

Mr. Luff: To ask the Deputy Prime Minister for what reason the data used to calculate area cost adjustment includes pay data for the public sector; and if he will make it his policy to use only private sector pay rates in future calculations. [151129]

Mr. Raynsford: The area cost adjustment (ACA) is the element of the funding formula which takes account of the different costs of labour and non domestic rates between areas. The labour cost element of the ACA is calculated using hourly wage data for both the public and private sector from the New Earnings Survey (NES).

To use exclusively private sector pay in calculating the ACA would take little account of how any public sector employers, such as the NHS, affect pay in their local labour market. Private sector wages also vary more across the country than public sector wages because many public sector employees are paid according to national pay scales. To base the ACA on private sector wages alone would overstate the variability in staff costs for local authorities across the country.

The Office of the Deputy Prime Minister recently reviewed the grant distribution system and introduced new formula from 2003–04. It was announced in the 2001 White Paper "Strong Local Leadership—Quality Public Services" (CM5237) that the funding formulae

will be frozen for at least 2004–05 and 2005–06. The Office of the Deputy Prime Minister does not intend to change the way that the ACA is calculated during this period.

Mr. Luff: To ask the Deputy Prime Minister for what reason the data used to calculate area cost adjustment excludes overtime pay data; and if he will make it his policy to include such data in future calculations. [151130]

Mr. Raynsford: The area cost adjustment (ACA) is the element of the funding formula which takes account of the different costs of labour and non domestic rates between areas. The labour cost element of the ACA is calculated using hourly wage data excluding overtime from the New Earnings Survey (NES). The NES is a snapshot of the wages people earn in a given week in April each year.

In calculating the ACA the Office of the Deputy Prime Minister need to be able to compare wage costs in different areas on a consistent basis. This is why the Office of the Deputy Prime Minister looks at hourly rather than weekly wages, and why the wage data used is only taken from those on adult pay rates, whose weekly wage has not been affected by absence and excludes overtime. The availability of overtime to individual workers is erratic. Because the NES is a snapshot, it is impossible to tell whether an individual is working overtime as a routine part of their job, or because a colleague is sick and the firm needs cover. And overtime payments often depend on the time and day overtime is worked. All of which diminishes our ability to compare labour costs between areas on a like for like basis.

The Office of the Deputy Prime Minister announced in the 2001 White Paper "Strong Local Leadership—Quality Public Services" (CM5237) that the funding formulae will be frozen for at least 2004–05 and 2005–06. The Office of the Deputy Prime Minister does not intend to change the way that the ACA is calculated during this period.

Fire and Rescue Service

Mr. Jenkin: To ask the Deputy Prime Minister (1) whom he has consulted on the plans to regionalise Essex's Fire Service; [149693]

(2) what discussions he has had with the Essex Police Authority on his plans to regionalise the Fire Service; [149695]

(3) what discussions he has had with *(a)* retained and *(b)* full-time firefighters in Essex on his plans to regionalise the Fire Service; and what their advice was; [149699]

(4) what community consultation he has held in Essex on his plans to regionalise the Fire Service; [149700]

(5) what effect regionalisation of the Fire and Rescue Service in Essex will have on fire stations in *(a)* Colchester, *(b)* Manningtree, *(c)* Dovercourt, *(d)* Frinton, *(e)* Clacton, *(f)* Brightlingsea, *(g)* Weeley, *(h)* Wivenhoe, *(i)* West Mersea, *(j)* Tollesbury, *(k)* Tiptree, *(l)* Coggeshall and *(m)* Halstead. [149705]

(6) whether the Fire and Rescue Service in Essex will be regionalised whether or not the people of Essex will vote for an elected regional assembly. [149718]

Mr. Raynsford: I refer the hon. Member to the answer given to the hon. Members for Buckingham, Taunton, North Thanet, North Wiltshire, Runnymede and Weybridge, South East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2003, *Official Report*, columns 1456–58W.

A 'soundings exercise', inviting views, information and evidence on the level of interest in each English region in holding a referendum on the creation of an elected regional assembly was held between December 2002 and May 2003. A summary of material received in this soundings exercise is available in the Library of the House. In the light of the views expressed, no referendum is currently planned for the East of England.

Michael Fabricant: To ask the Deputy Prime Minister (1) what community consultation he has held in Staffordshire on his plans to regionalise the Fire and Rescue Service; [149848]

(2) what discussions he has had with the Staffordshire Police Authority on his plans to regionalise the Fire and Rescue Service. [149850]

Miss Kirkbride: To ask the Deputy Prime Minister (1) whom he has consulted on the plans to regionalise Hereford and Worcester's Fire Service; [149833]

(2) what discussions he has had with the West Mercia Police Authority on his plans to regionalise the Fire Service; [149835]

(3) what discussions he has had with *(a)* retained and *(b)* full-time firefighters in Hereford and Worcester on his plans to regionalise the Fire Service; and what their advice was; [149839]

(4) what community consultation he has held in Hereford and Worcester on his plans to regionalise the Fire Service; [149840]

(5) what research relating to Hereford and Worcester he has commissioned to provide the evidential basis for his plans to regionalise the Fire Service. [149841]

Mr. Raynsford: I refer the hon. Members to the answer given to the hon. Members for Buckingham, Taunton, North Thanet, North Wiltshire, Runnymede and Weybridge, South East Cambridgeshire, Brentwood and Ongar, Poole and Spelthorne on 22 January 2004, *Official Report*, columns 1456–58W.

Leaseholders (Insurance)

Mr. Steen: To ask the Deputy Prime Minister when he expects to introduce a commencement order under the Commonhold and Leasehold Act 2002 to prevent landlords from insisting that their leasehold tenants use a particular insurance company to insure their property. [151541]

Keith Hill: I refer the hon. Member to the reply given to the hon. Member for Guildford (Sue Doughty) on 12 January 2004, *Official Report*, column 569W.

Leisure Facilities (Brent, East)

Sarah Teather: To ask the Deputy Prime Minister what assessment the Audit Commission has made of leisure facilities in Brent East. [151122]

Mr. Raynsford: The Audit Commission carried out an inspection of the London Borough of Brent's Sport and Leisure facilities in April 2002, in which the council was awarded a poor, no star score with poor prospects for improvement. The council has made investments in this area and an Audit Commission inspection team is planning to return to Brent later this year to check on the council's progress.

Local Government

Mr. Flook: To ask the Deputy Prime Minister if he will list the rurality factor given to each of the *(a)* county councils and *(b)* unitary authorities in England for the latest local authority financial settlements. [150601]

Mr. Raynsford: The formula spending shares (FSS) formulae listed in the following table have sub blocks which contain a sparsity factor.

Formula	*Sub block*
Environmental Protective and Cultural Services (EPCS)	Lower Tier EPCS
Education	Primary Education
	Local Education Authorities
Personal Social Services (PSS)	Older Peoples

The sparsity top up for each county council and unitary authority for each of the above formulae is listed in the following table:

	Education formulae		*PSS*	*EPCS*
	Primary education	*LEA*	*Older people*	*LT EPCS*
	Sparsity top up (£) per			
	Child aged 5–10	*Resident pupil aged 3–18*	*Person 65 +*	*Resident*

The figures are from the 2004–05 Local Government Finance Settlement, laid in Parliament on Thursday, 29 January and are consistent with the simple presentation guide to that settlement, available on the ODPM website.

Regional Assemblies

Mr. Jenkin: To ask the Deputy Prime Minister what representations he has received from organisations campaigning in *(a)* the North West, *(b)* the North East and *(c)* Yorkshire and Humberside in favour of an elected regional assembly for powers to be granted to those assemblies in addition to those set out in Your Region, Your Choice (Cm 5511). [151006]

Mr. Raynsford: My right hon. Friend the Deputy Prime Minister has received representations from Campaign for a North East Assembly, Campaign for Yorkshire, Copeland Liberal Democrats, Labour North West, Sheffield Hallam Liberal Democrats, North East and Yorkshire and Humber Liberal Democrats who have all expressed views that elected regional assemblies be given additional powers to those set out in the White Paper Your Region, Your Choice.

HOME DEPARTMENT

Motor Vehicle Recovery

Mr. Chope: To ask the Secretary of State for the Home Department when the statutory fee for the recovery of a motor vehicle from a motorway was last reviewed; and what the policy of the Government are in relation to variations of the fee. [151248]

Caroline Flint *[holding answer 27 January 2004]:* The statutory fees for the removal, storage and disposal of vehicles from motorways or other roads were last increased in 1993. Any charges outside these fees are non-statutory and a matter for resolution between the parties concerned.

The Government believe that the statutory charges should be set at a level which is fair to all parties, including the motorist and vehicle recovery operators.

We are currently considering the level of the fees and how they should be applied in different circumstances.

Anti-Social Behaviour Orders

Dr. Stoate: To ask the Secretary of State for the Home Department what level of proof is required by magistrates courts before an application for an anti-social behaviour order can be granted. [150996]

Ms Blears: In the McCann case in October 2002 the Law Lords ruled that the equivalent of the criminal standard of proof, ie beyond reasonable doubt, should be applied in the interests of fairness and pragmatism to prove past acts of anti-social behaviour which are usually of a criminal or quasi-criminal nature. The necessity of a anti-social behaviour order (ASBO) for the protection of other persons from future anti-social acts remains an exercise of judgment not subject to a standard of proof.

Mr. Nigel Jones: To ask the Secretary of State for the Home Department if he will make a statement on the success to date of anti-social behaviour orders in Gloucestershire. [150425]

Ms Blears: Anti-Social Behaviour Orders (ASBOs) are one of a number of methods being used in Gloucestershire as part of their local strategy to tackle anti-social behaviour. Local practitioners report that ASBOs have been successfully used alongside other tools—such as mediation and anti-social behaviour clauses in tenancy contracts—to reduce anti-social behaviour in the area and transform the behaviour of several perpetrators. Nine ASBOs were granted in Gloucestershire between April 1999 and September 2003.

As part of the Government's Together campaign to tackle anti-social behaviour, we will be doing more to improve the local response, this includes:

£75 million over three years to support the Government's action plan,

Funding for every Crime and Disorder Reduction Partnership,

An ActionLine, Academy and website to help practitioners do more to tackle anti-social behaviour.

Mr. Pickthall: To ask the Secretary of State for the Home Department how many Anti-Social Behaviour Orders have been put in place, broken down by *(a)* police authority and *(b)* local authority; and how many people have been charged with breaking anti-social behaviour order provisions. [151349]

Ms Blears *[holding answer 27 January 2004]:* Data on the number of Anti-Social Behaviour Orders (ASBOs) granted, from 1 April 1999 up to 30 September 2003 (latest available) by Magistrates' Courts Committees (MCC) area, Crown Court circuit, and the county court group and by local authority area have been placed in the Library.

Information on the number of people charged is not collected centrally. From the Home Office Court Proceedings database, available information relating to breaches of ASBOs, covering the period 1 June 2000 to 31 December 2002, shows that the number of people who have been prosecuted for breaching an ASBO is 329, of which 305 were found guilty.

Mr. Nigel Jones: To ask the Secretary of State for the Home Department how many anti-social behaviour orders have been *(a)* made and *(b)* breached in each police authority area; and if he will make a statement. [150426]

Ms Blears: Data on the number of Anti-Social Behaviour Orders (ASBOs) made are reported to the Home Office on a quarterly basis by Magistrates' Courts Committees (MCC), and on a rolling basis by the Crown court (since 2 December 2002) and county courts (since 1 April 2003). Table A gives data on the number of ASBOs made, from 1 April 1999 up to 30 September 2003 (latest available), by MCC area, Crown court circuit, and county court group.

The available information relating to breaches of ASBOs, covers the period 1 June 2000 to 31 December 2002. Table B gives data on the number of ASBOs made, and the number breached, within this period.

[2] Includes breaches where the ASBO recipient was a juvenile

[3] Including City of London

Anti-terrorism, Crime and Security Act

Lady Hermon: To ask the Secretary of State for the Home Department what assessment he has made of the effectiveness of the Anti-terrorism, Crime and Security Act 2001 in tackling terrorism in the United Kingdom; and if he will make a statement. [145077]

Mr. Blunkett: I refer the hon. Member to the statement I made on 18 December 2003, *Official Report*, column 147WS. The Anti-terrorism, Crime and Security Act 2001 has improved our ability to fight crime and terrorism in a number of ways. I have provided several examples of the Acts effectiveness as follows:

Under Disclosure of Information powers over 100 disclosures were provided to law enforcement agencies in relation to on-going terrorist investigations.

Terrorist cash has been seized on 18 occasions since the Act's introduction.

Several arrests and prosecutions have been made under the newly created offences of "withholding information relating to a terrorist act" and "Hoaxing".

24 individuals have been convicted under the newly created offence of "religiously aggravated crime".

A fuller and more detailed assessment of the improvements that Act has made will be made in the coming weeks when the Privy Council's report on Anti-Terrorism, Crime and Security Act 2001 is debated in both Houses of Parliament.

Asylum and Immigration

Nick Harvey: To ask the Secretary of State for the Home Department (1) what the basis was of his refusal to grant asylum to Shahir Patrolli, port reference number Man/02/176; and if he will make a statement; [144475]

(2) what evidential basis he stated in his refusal to grant asylum to Shahir Patrolli port reference number Man/02/176 that he was aware that no one from the Roma ethnic group lived at Suhodol; and if he will make a statement. [144476]

Beverley Hughes: I wrote to the hon Member on 27 January 2004.

Business Crime

Ross Cranston: To ask the Secretary of State for the Home Department what plans he has to require police authorities to provide him with statistics each year on the level of business crime in each area; and if he will make a statement. [150772]

Ms Blears: The Home Office currently publishes annual total crime statistics recorded by the police in England and Wales for the following offences specifically relating to business crime: robbery of business property, theft by an employee, theft from shops and theft of an automatic machine or meter. Statistics for these offences have not been published at police force area level. The most recent volume of recorded crime statistics was published in July 2003, in Statistical Bulletin 7/03, "Crime in England and Wales 2002/03", which is available via the Research Development Statistics (RDS) website. A copy of the Bulletin has been placed in the Library.

The business crime team within the Home Office has recently begun a process of examining how current information on business crime, including retail crime, can be enhanced. To this end, the Research, Development and Statistics Department have been approached to examine the feasibility of different options. This work is on-going.

However, in view of the complexity and range of crimes experienced by the business sector, it has rapidly become clear that no one single method of collecting data will provide a sufficiently complete picture. We are therefore considering how both police and survey data collection can be refined and extended to give us a more accurate and comprehensive overview of the crimes experienced by businesses.

Closed Circuit Television

Mr. Hoyle: To ask the Secretary of State for the Home Department what grants are available for introducing CCTV into *(a)* villages and *(b)* rural railway stations. [151267]

Ms Blears: There are currently funds available for the installation of CCTV in all locations, including villages and rural railway stations, under the Building Safer Communities Fund. The Home Office allocates the Building Safer Communities Fund to Crime and Disorder Reduction Partnerships to enable them to tackle local crime priorities through a number of interventions, including CCTV facilities. For 2003–04, the Building Safer Communities Fund has provided Crime and Disorder Reduction Partnerships with £72.3million.

Community Sentence Breaches

Dr. Stoate: To ask the Secretary of State for the Home Department if he will take steps to amend the rules on evidence relating to magistrates courts cases involving breaches of anti-social behaviour orders to allow hearsay evidence to be heard. [150995]

Ms Blears: Breach of an anti-social behaviour order is a criminal offence and rules relating to criminal evidence apply as they do for other criminal offences. The basic rule is that hearsay evidence is not admissible in criminal proceedings unless the maker of the statement is unavailable or where business documents are involved. The Criminal Justice Act 2003 will change the rules relating to hearsay evidence in criminal proceedings to make it admissible in specified circumstances such as where it is in the interests of justice.

Correspondence

Mr. Kaufman: To ask the Secretary of State for the Home Department when he will reply to the letter to him dated 10 November from the right hon. Member for Manchester, Gorton with regard to Mrs. S. Khan. [145963]

Mr. Blunkett: I wrote to my right hon. Friend on 27 January 2004.

Mr. Kaufman: To ask the Secretary of State for the Home Department (1) when he will reply to the letter to him dated 10 November 2002 from the right hon. Member for Manchester, Gorton with regard to Mr. Gohal Ali Khan; [147617]

(2) when he intends to reply to the letter to him dated 10 November 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. Gohal Ali Khan. [149548]

Mr. Blunkett: I wrote to my right hon. Friend on 27 January 2004.

Mr. Kaufman: To ask the Secretary of State for the Home Department when he will reply to the letter to him dated 13 November 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. E. Ebasani. [151233]

Mr. Blunkett: I wrote to my right hon. Friend on 23 January 2004.

Criminal Justice Boards

Mr. Ruffley: To ask the Secretary of State for the Home Department what representations he has received from victim and witness services since the announcement of the transfer of funding to local criminal justice boards. [143645]

Paul Goggins: We are piloting the devolution of funding for the Witness Service to Local Criminal Justice Boards in four areas (Essex, Lancashire, Greater Manchester and Surrey) from April 2004. The aim of the pilots is to improve local responsiveness to the needs of witnesses and accountability for services. We are working closely with the National Association of Victim Support Schemes and the local Victim Support schemes which run the Witness Service in the four areas on the detailed arrangements for the pilots.

In November, my right hon. Friend, the Home Secretary met the Chief Executive of the National Association of Victim Support Schemes and the Chair of National Association's Board of Trustees to discuss their concerns about the proposal, and a similar meeting took place in July with Baroness Scotland of Asthal.

The Chief Executive of the National Association of Victim Support Schemes has also drawn these concerns to the attention of the Criminal Justice Council, which advises the National Criminal Justice Board.

The Home Office has received 15 representations from Victim Support schemes that are not involved in the pilot projects.

There is a range of views among local Victim Support Schemes and other practitioners about the proposal to devolve funding to Local Boards. The purpose of the pilot is to test whether devolution of funding results in more effective support and services for witnesses. The pilots will only be rolled out nationally if the evaluation demonstrates that the new arrangements are effective.

Criminal Records Bureau

Mr. Oaten: To ask the Secretary of State for the Home Department (1) what assessment he has made of the number of employers who have decided not to employ someone as a result of a Criminal Records Bureau disclosure in the last five years; and what guidance is given to employers to ensure that such decisions are based on a fair assessment of the relevance of disclosed offences; [144963]

(2) what estimate he has made of the number of employees turned down for jobs following a Criminal Records Bureau check in the last five years. [144964]

Ms Blears *[holding answer 18 December 2003]:* There are no records available to indicate the number of employees that have been turned down for jobs following a Criminal Records Bureau (CRB) check. Recruitment decisions are entirely a matter for the employer and the CRB would not normally comment on a person's suitability for a position. However, an independent survey has shown that, since the CRB launched its Disclosure service in March 2002, an estimated 18 per cent. of employers that have used the service have decided not to employ an individual as a consequence of conviction information or another matter contained in a Disclosure.

All recipients of Disclosure information issued by the CRB are subject to a Code of Practice, made under the Police Act 1997 and laid before Parliament. This makes it clear that no recipient of Disclosure information shall unfairly discriminate against the subject of the information on the basis of conviction or other details revealed. The ode requires job applicants to be advised that successful applicants will be required to request a Disclosure, but that a criminal record will not necessarily be a bar to obtaining employment. The CRB has also produced other guidance, and has collaborated with and endorsed guidance produced by other bodies designed to help employers to arrive at fair and balanced recruitment decisions.

Dog Kidnapping

Mr. James Gray: To ask the Secretary of State for the Home Department (1) what the incidence of the kidnapping of dogs has been in the last 12 months; [150093]

(2) what strategy is in place to counter the effects of professional dog-nappers. [150094]

Ms Blears: Statistics on the kidnapping of dogs are not held centrally.

There is no national strategy to counter the effects of professional dog-nappers. Where this is a pressing local crime issue it would be for the police, in consultation with the Crime and Disorder Reduction Partnership to take appropriate action.

Knives

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what discussions he has had with the Association of Chief Police Officers regarding self-regulation schemes for retailers selling knives, with particular reference to the CV One Knife Code. [150952]

Ms Blears *[holding answer 27 January 2004]:* The Government support action which tackles the problem of illicit knife carrying. The Government and the Association of Chief Police Officers believe that it is best for individual police forces and local authorities to decide how to establish and set up schemes like the CV One Knife Code in Coventry, taking into account local factors.

Market Research

Dr. Cable: To ask the Secretary of State for the Home Department what *(a)* opinion polling and *(b)* market research projects his Department has undertaken in the last financial year; and what the costs were of each project. [149729]

Fiona Mactaggart: The Home Office research department undertakes a wide range of research activities that support the development of information-led policy, including scientific and social research, and includes research gathered from market research and focus groups.

The Department conducts or commissions market and opinion research and focus groups only when it is justified by the specific needs of a particular policy or programme and when this is the most economical, efficient and effective way to achieve the purpose. Consulting and involving the public helps inform both policy formulation and the delivery of better quality public services.

A table of commissioned projects involving opinion polling and market research is included at Appendix 1, and also placed in the Library. It has not been possible to provide detailed breakdown of costs of projects where this information is either not held centrally or is commercial in confidence.

Medicines (Disposal)

Ian Lucas: To ask the Secretary of State for the Home Department if he will make a statement on inspection procedures at sites licensed by the Drugs Inspectorate for disposal of medicines and pharmaceuticals. [150438]

Caroline Flint: Inspections may be conducted routinely, approximately once per year, or unannounced; such visits may take place on occasions when controlled drugs are being destroyed. In addition to checking the operating procedures the records containing details of consignments and their destruction will be examined.

Some operators are licensed to store controlled drugs pending destruction while others are only authorised to destroy upon arrival on site.

Ian Lucas: To ask the Secretary of State for the Home Department if he will make a statement on the minimum security procedures at sites licensed by the Drugs Inspectorate for disposal of medicines and pharmaceuticals. [150439]

Caroline Flint: Security requirements are assessed on an individual basis but in all cases controlled drug consignments are required to be recorded and kept safely locked away. In conjunction with the issue of the licence, advice is given on a range of matters bearing on security. This includes appropriate staffing, good handling practice, vehicle management and electronic security as well as liaison with local police.

National Offenders Management Service

Mrs. Gillan: To ask the Secretary of State for the Home Department where the National Offender Management Service will be based. [147435]

Paul Goggins: The headquarters will initially be based in London, probably in accommodation currently occupied by the Prison and Probation Services, but once the eventual size and structure has been decided, further consideration will be given to the most appropriate long-term location. Regional offender managers and their staff will of course be located in their regions.

Mr. Gerrard: To ask the Secretary of State for the Home Department who will act as the employer for *(a)* probation and *(b)* prison staff within the structure of the National Offenders Managment Services. [147721]

Paul Goggins: For most staff in prisons and probation the changes outlined in "Reducing Crime—Changing Lives" are unlikely to have an immediate impact. They will continue to be employed by the probation boards and prison service. In time the relationships will change but those changes have yet to be finalised and will be subject to the usual consultation arrangements with staff and unions.

Neighbourhood Warden Schemes (London)

Simon Hughes: To ask the Secretary of State for the Home Department which London boroughs run neighbourhood warden schemes; how many wardens each of these boroughs employed at the latest date for which figures are available; which London boroughs directly fund and employ police community support officers; how many police community support officers each borough funded or employed at the latest date for which figures are available; which London boroughs run community safety accreditation schemes; and if he will make a statement. [151076]

Ms Blears *[holding answer 26 January 2004]:* The following table shows London boroughs that have warden schemes funded by the Office of the Deputy Prime Minister's Neighbourhood Wardens Team and the number of wardens the council employs:

Borough	*Number of wardens*
Barking and Dagenham	4
Barnet	12
Brent	9
Camden	15
City of Westminster	25
Croydon	12
Ealing	8
Greenwich	10
Hackney	25
Hammersmith and Fulham	6
Haringey	14
Harrow	6
Havering	11
Hounslow	7
Islington	28
Kingston-upon-Thames	3
Lambeth	12
Lewisham	27
Merton	12
Newham	12
Redbridge	5
Southwark	27
Sutton	4
Tower Hamlets	29
Waltham Forest	10
Wandsworth	23

We are unable to supply figures for other types of warden schemes or warden numbers in London as these data are not collected.

Community Support Officers (CSOs), as defined by the Police Reform Act 2002, are all employees of the local Police Authority. In London and elsewhere local authorities have contributed to the funding of CSOs but they cannot employ them.

The Commissioner for the Metropolis informs me that the following boroughs operate additional CSOs funded through Special Services Agreements under section 25 of the Police Act 1996.

Borough	*Number of CSOs*
Camden	2
Greenwich	5
Hammersmith and Fulham	2
Hillingdon	7
Islington	4
Kensington and Chelsea	12
Tower Hamlets	8

At present the Metropolitan Police Service does not yet run a Community Safety Accreditation Scheme in any of the London boroughs.

Pesticides

Andrew George: To ask the Secretary of State for the Home Department how many incidents of theft of *(a)* pesticides containing aldicarb and *(b)* other pesticides have been reported in each of the last five years; and what quantities of pesticide have been (i) reported stolen, (ii) reported missing and (iii) recovered. [150519]

Ms Blears: The requested information is not available centrally.

Police

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department if he will make a statement on the Code of Practice on the police use of firearms and less lethal weapons. [150183]

Ms Blears: I refer my hon. Friend to the written ministerial statement I made on 3 December 2003, *Official Report*, column 61WS.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how he intends to sustain the planned increase in police numbers. [150128]

Ms Blears: The number of police officers in England and Wales reached a record 136,386 on 31 August 2003. The major component in the rise in police numbers since March 2000 has been the use of the Crime Fighting Fund to fund additional recruits above that which forces were planning to train.

As announced in the provisional funding settlement for 2004–05 on 19 November 2003, the Home Office will provide continuation funding for the 9,000 posts created by the Crime Fighting Fund from 2000–03. In addition it is proposed to provide part funding of 60 per cent for the 650 additional Crime Fighting Fund recruits in 2003–04.

The Home Office is also promoting a number of initiatives to ensure the increasing effectiveness of the resources devoted to policing. Both workforce modernisation and reducing bureaucracy will release officers to do the job they were trained to do and help them undertake their duties in an increasingly effective way. We will this year be establishing a baseline measure for the amount of time officers spend on front line duties, which will enable forces and police authorities to plan for improvement. The National Intelligence Model developed by the police service will enable forces to deploy officers in a more strategic way.

Mr. Oaten: To ask the Secretary of State for the Home Department how many police officers have retired early owing to ill-health in each year since 1997. [151416]

Ms Blears: The figures relating to the number of police ill-health retirements between 1997 and 2003 are given in the table.

	Medical retirements
1996–97	2,012
1997–98	1,811
1998–99	1,642
1999–2000	1,232
2000–01	1,209
2001–02	1,114
2002–03	821

Prisons

Mr. Oaten: To ask the Secretary of State for the Home Department whether the review of prison industries conducted by the Prison Service has been completed; and if a copy of the review will be placed in the Library. [143294]

Paul Goggins: An internal review of the strategic oversight and management of public sector prison industries in England and Wales was completed earlier this year. The report of the prison industries review was written for internal discussion, and contains proposals for improving the way in which prison industries are operated and managed. These proposals are now being implemented. A copy of the report has been placed in the Library.

Mrs. Gillan: To ask the Secretary of State for the Home Department (1) how many people have been held in prisons in each year since 1997; [147355]

(2) how many prisoners have been held in police cells in each year since 1997 because of overcrowding in the Prison Service; [147357]

(3) how many *(a)* convicted prisoners and *(b)* remand prisoners who should have been in a prison establishment have been held in police cells in each year since 1997. [147376]

Paul Goggins: Information on the annual average population in prison and in police cells by type of custody is given in table 1.3 of Prison Statistics England and Wales, 1997 to 2002. Copies of Prison Statistics England and Wales are available in the Library.

Mrs. Gillan: To ask the Secretary of State for the Home Department if he will make it his policy to reduce prison overcrowding in the next two years. [147360]

Paul Goggins: On 6 January a radical reform of the management of offenders was announced with the publication of the document 'Reducing Crime—Changing Lives'. The overriding purpose of the reforms is to improve the management of offenders and reduce re-offending. Offenders for whom prison is the right penalty will continue to be sent to prison. But there are many offenders for whom tough non-custodial penalties will be more appropriate. Our proposals will provide sentencers with a full range of penalties and advice on what is most likely to be effective in reducing re-offending in particular circumstances.

Prostitution

Mr. Lidington: To ask the Secretary of State for the Home Department what the Government's policy is on the licensing of brothels. [150633]

Caroline Flint: It is an offence to keep or manage a brothel.

Reoffending

Mrs. Gillan: To ask the Secretary of State for the Home Department what proportion of those who have undertaken the Intensive Change and Control Programmes in each year since 1997 reoffended within *(a)* one year, *(b)* two years, *(c)* three years, *(d)* four years and *(e)* five years. [147364]

Paul Goggins: The Intensive Control and Change Programme (ICCP) was launched on 3 April 2003. There have been 269 commencements to date, but since orders are made for 12 month periods no yearly reoffending statistics are available.

Retail Crime

Mr. Pickthall: To ask the Secretary of State for the Home Department whether separate statistics are kept on retail crime. [151350]

Ms Blears *[holding answer 27 January 2004]:* Currently, with the exception of a limited number of crime categories, such as 'theft from shops', which explicitly relate to retail crime—police recorded crime figures provide only a very limited picture of crimes experienced by the retail sector.

However, surveys such as the recent Commercial Victimisation Survey 2002 (a survey of over 6,500 retail and manufacturing premises) provide a fuller and more accurate picture of business crime, measuring both reported and unreported crime.

This survey captures statistics on crime experienced by businesses in the previous year, the cost of crime, concerns about problems and crime in the local area, action taken by businesses to respond to criminal incidents and their crime prevention precautions.

Provisional headline findings were released on 13 August 2003. The main findings should be published this spring.

Road Rage

Dr. Pugh: To ask the Secretary of State for the Home Department what data the Government collates on the average annual number of crimes committed as a result of road rage incidents. [148149]

Ms Blears: The requested information is not available centrally.

Young Offenders

Mr. Oaten: To ask the Secretary of State for the Home Department what representations he has received from Independent Monitoring Boards concerning the treatment of children in young offender institutions. [144363]

Paul Goggins: The treatment of children is mentioned in every Annual Report of the Independent Monitoring Boards of Young Offenders Institutions. There were five specific questions asked of the Secretary of State during the 2002–03 reporting year.

Written Answers to Questions

Thursday 29 January 2004

TREASURY

Immigration

20. **Mr. Lilley:** To ask the Chancellor of the Exchequer if he will make a statement on the contribution of immigration to economic growth. [151562]

Ruth Kelly: The economic analysis and projections set out in the Treasury paper on Trend Growth, published alongside the Budget in April 2002, imply a contribution from net migration of about 0.4 percentage points towards the 2¾ per cent. annual trend rate of output growth. Subsequent updates have not changed this.

Energy Efficiency

21. **Mr. Jim Cunningham:** To ask the Chancellor of the Exchequer what plans his Department has to use the tax system to encourage energy efficiency in housing. [151563]

23. **Mr. Chaytor:** To ask the Chancellor of the Exchequer what plans he has to report on his Department's public consultation on fiscal measures to support energy efficiency. [151565]

John Healey: The Government are already making extensive use of the tax system to encourage energy-efficient housing. We have introduced a reduced rate of 5 per cent. VAT for certain contractor-installed energy-saving materials, and grant-funded installation of central heating systems, heating appliances, factory-insulated hot water tanks, micro-CHP and renewable energy heating systems. The HM Treasury/DEFRA consultation on the use of economic instruments to promote household energy efficiency closed on 24 October 2003. The Government received 126 responses, and published a summary of responses on the Treasury web site on 11 December. Responses are being carefully considered as part of the Government's development of policy in this area. In the pre-Budget Report (Cm 6042), the Government announced that we believe that there is a case for further use of economic instruments as part of a package of measures to promote energy efficiency.

As a part of this work, the Government are continuing to examine the case for a domestic business tax allowance, and to explore the potential for capital allowances and VAT measures to help deliver this.

Trade Deficits

22. **Mr. Walter:** To ask the Chancellor of the Exchequer what assessment he has made of the long term effect on the UK economy of continuing trade deficits. [151564]

Ruth Kelly: The current scale of the UK trade deficit needs to be viewed in perspective. In recent years, the UK economy has been growing faster than many of our key trade partners, particularly those in the Euro area, so boosting our trade deficit. Nevertheless, the UK's trade and current account deficits have remained well below previous peaks.

Financial Services Authority

24. **Keith Vaz:** To ask the Chancellor of the Exchequer if he will make a statement on the supervision of banks by the Financial Services Authority. [151566]

Ruth Kelly: As the right hon. Gentleman is aware, responsibility for the supervision of banks moved from the Bank of England to the Financial Services Authority on 1 June 1998. The legislative framework for the regulation of banks was subsequently reformed under the Financial Services and Markets Act, which came into effect on 1 December 2001. The regime for prudential supervision of banks is kept under constant review, both at home and internationally, in forums such as the European Union and the Basle Committee on Banking Supervision.

Central Government Spending

Mr. Letwin: To ask the Chancellor of the Exchequer what the level of gross administrative expenditure in central government as a proportion of total managed expenditure was for *(a)* 1996–97 and *(b)* 2003–04. [R] [145608]

Mr. Gordon Brown: The most appropriate measure of comparison between this year and 1996–97 is for planned expenditure on central administration as a percentage of total government spending, using the measures available at the time. This yields a figure which is 4.4 per cent. for 2003–4 and falling in future years, against a planned 4.9 per cent. in 1996–97. We cannot yet compare final out-turns because figures are not yet available for this year but, based on previous years' experience, we would expect this year's out-turn to be lower than the 4.6 per cent. of total government spending out-turn figure for 1996–97.

Economic Indices (Wales)

Mr. Wiggin: To ask the Chancellor of the Exchequer what the *(a)* RPI, *(b)* RPI-X and *(c)* CPI was for Wales in each year since 1997. [151761]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician. I have asked him to reply.

Letter from John Pullinger to Mr. Bill Wiggin, dated 29 January 2004:

The National Statistician has been asked to reply to your recent Parliamentary Question asking what the *(a)* RPI, *(b)* RPI-X and *(c)* CPI was for Wales in each year since 1997. I am replying in his absence. (151761)

The RPI, RPIX and CPI are calculated and published for the United Kingdom only. Comparable indices for Wales, or any of the regions or countries of the UK, are not produced because the data required to make such calculations to an appropriate degree of accuracy are not available.

However, ONS published updated regional price levels in November 2003, in an article entitled *Relative Regional Consumer Price Levels in 2003*, available from the National Statistics website at: http://www.statistics.gov.uk/CCI/article.asp?ID=612

The data represent part of a longer-term project to develop regional price data, and reflect the need for this information expressed by the Chancellor of the Exchequer in his 2003 Budget Statement.

Endowment Mis-selling

Mr. Edwards: To ask the Chancellor of the Exchequer what recent representations he has received about the mis-selling of endowment policies. [151571]

Ruth Kelly: We receive occasional representations about the mis-selling of endowment policies. However, the Financial Ombudsman Service established under the Financial Services and Markets Act 2000 deals with individual disputes between consumers and financial firms.

Housing Market (Wales)

Mr. Wiggin: To ask the Chancellor of the Exchequer what assessment he has made of the housing market in Wales. [151760]

Ruth Kelly: The Treasury monitors regional housing market developments, and from time to time reports on them. For example Box A4 in the 2002 pre-Budget report (CM 5664) discussed regional house price differentials. The Office of the Deputy Prime Minister's "House Price Index Statistical Release" (available at http://www.odpm.gov.uk/pns//pnattach/20040004/7.pdf) includes regular reporting of regional housing market developments.

Low Pay

Sir Archy Kirkwood: To ask the Chancellor of the Exchequer if he will make a statement on his strategy to tackle areas of persistent low pay. [151558]

John Healey: Since its introduction in April 1999 the National Minimum Wage (NMW) has been increased by 25 per cent. to £4.50 per hour for workers aged 22 and over. Together with the NMW, the reforms to income tax and National Insurance Contributions and the introduction of tax credits have boosted in-work incomes for households on low and moderate earnings.

Mutual Insurance Companies

Mr. Love: To ask the Chancellor of the Exchequer if he will make a statement on the regulatory environment as it affects mutual insurance companies. [151555]

Ruth Kelly: The Financial Services and Markets Act 2000 sets the overall regulatory framework for mutual insurance companies. Under the Act, the FSA has operational responsibility for regulating these companies.

Personal Debt

Mr. Djanogly: To ask the Chancellor of the Exchequer what discussions he has had with representatives of the Bank of England regarding the sustainability of current levels of personal debt. [151560]

Ruth Kelly: The Treasury and the Bank of England hold regular meetings in a number of contexts to discuss a wide range of economic issues.

Security Passes

Mr. Burstow: To ask the Chancellor of the Exchequer how many security passes have been reported as *(a)* lost and *(b)* stolen by staff in his Department in the last 12 months. [151521]

Ruth Kelly: I refer the hon. Gentleman to the answer I gave to the hon. Member for Winchester (Mr. Oaten) on 26 January 2004, *Official Report*, column 115–16W.

Stamp Duty Land Tax

Mr. Gray: To ask the Chancellor of the Exchequer what plans he has to reform Stamp Duty Land Tax on leases. [151559]

Dawn Primarolo: All tax rates and thresholds are kept under review and can be changed as part of the annual Finance Bill. I cannot anticipate what my right hon. Friend the Chancellor of the Exchequer might announce in this year's Budget.

Following consultation earlier this year, substantial changes were made to the Stamp Duty Land Tax charge on the rental element of new leases which will help all tenants and will be of special benefit to small and medium sized businesses.

Tax Credits

Mr. Frank Field: To ask the Chancellor of the Exchequer how many letters to the Paymaster General from honourable Members complaining about the operation of the new tax credits have been answered by *(a)* civil servants and *(b)* the Paymaster General. [150027]

Dawn Primarolo: Under long-standing arrangements, Members' letters to Treasury Ministers on operational matters are normally forwarded to the Heads of the Offices concerned to reply direct, unless the Member indicates that he or she requires a Ministerial reply.

Since March 2003 around 1,500 such letters from hon. Members to Treasury Ministers have been referred to the Tax Credits Office in Great Britain for answer by officials.

World Debt

David Taylor: To ask the Chancellor of the Exchequer what proposals for debt relief mechanisms for poor countries are being considered for the period after the highly indebted poor countries initiative has ended. [151543]

John Healey: I refer the hon. Member to the answer given today by my right hon. Friend the Chancellor of the Exchequer to the hon. Member for New Forest, West (Mr. Swayne).

NORTHERN IRELAND

Air Transport

Lady Hermon: To ask the Secretary of State for Northern Ireland what discussions he has had with his colleagues in the Department for Transport in relation to the implications for Northern Ireland of the Department's White Paper, The Future of Air Transport; and if he will make a statement. [151336]

Mr. Spellar: The White Paper, The Future of Air Transport, reflects the overarching perspective of the Northern Ireland administration on the key issues surrounding the development of air transport within the United Kingdom, as they affect Northern Ireland. The Northern Ireland administration's input to the production of the White Paper reflected the cross-cutting and inter-departmental character of the issues previously consulted on during 2002. A senior official from the Northern Ireland Civil Service was a member, together with representatives from other regions and the Department for Transport, of the steering group that produced the White Paper. The implications of the White Paper for Northern Ireland's three commercial airports are currently being considered locally and in consultation with the Department for Transport within the 'balanced approach' of economic development, people's desire to travel, environmental impact, safety and security and the continuation of air services to the major London airports.

Anti-Social Behaviour Orders

Lady Hermon: To ask the Secretary of State for Northern Ireland what assessment he has made of the impact of the availability of anti-social behaviour orders in tackling such behaviour in Northern Ireland. [151332]

Mr. Spellar: In considering measures to tackle anti-social behaviour in Northern Ireland, and the impact of this, I have been informed by Home Office research in England and Wales. Research found that in many areas anti-social behaviour orders were considered by those using them to be an effective response to such behaviour. Reported benefits were a reduction in the behaviour targeted and positive outcomes in relation to public confidence and improved quality of life.

Car Parking Charges

Lady Hermon: To ask the Secretary of State for Northern Ireland by what percentage car park charging has changed in Northern Ireland in each year since 1997; and if he will make a statement. [151327]

Mr. Spellar: I have asked the Chief Executive of the Roads Service to write to the hon. Lady in response to this question. A copy of the letter will be placed in the Library.

Benefit Fraud

Lady Hermon: To ask the Secretary of State for Northern Ireland how many people were convicted of benefit fraud in Northern Ireland in the last year for which figures are available; what the average sentence was; and if he will make a statement. [150662]

Mr. Spellar: In the 2002–03 financial year a total of 325 people where prosecuted for benefit fraud and in the current year 2003–04 to date a further 200 people have been prosecuted. A breakdown of the sentences passed is shown in the table.

	Number of people	*Average sentence/Fine*
2002–03		
Probation	9	6–12 months
Suspended sentences	21	6 weeks-18 months
Conditional discharge	83	12 months-2 years
Community service	43	109 hours
Fines[1]	178	£191
2003–04		
Probation	8	2–18 months
Suspended sentences	12	1–5 months
Conditional discharge	78	6 months-3 years
Community service	20	126 hours
Fines	82	£209

[1] 9 of the 178 also received a fine in addition to either a conditional discharge or community service)

In 2002–03 a further 24 people received a formal caution and 67 people accepted administrative penalties totalling £18,255. In 2003–04 to date 22 people received a formal caution and 94 have accepted administrative penalties totalling £32,828.

Child Poverty

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on progress in Northern Ireland in reducing child poverty. [150674]

Mr. Spellar: New Targeting Social Need (TSN) is the Government's main policy for tackling poverty and social exclusion in Northern Ireland. New TSN aims to tackle poverty and social exclusion by targeting efforts and available resources within existing departmental programmes towards people, groups and areas in greatest social need.

An independent external evaluation of New Targeting Social Need has now been completed. This assessed the way in which the policy had been implemented and examined its impact. The outcome of the evaluation will feed into future thinking on New TSN and will soon be the subject of public consultation.

Presently in Northern Ireland, the Government are placing significant emphasis on initiatives that are focused on the early years of life, such as the Sure Start and Book Start and the Pre-School Education Expansion Programme. These complement mainstream service programmes.

Alongside these initiatives the Government are developing long-term strategies dealing with child poverty. To this end the Children's and Young People's unit of The Office of the First Minister and Deputy First Minister (OFMDFM) is currently developing a 10-year strategy of which child poverty is one of the key themes. The focus of the strategy is poverty, participation, protection and provision. As part of the development of this strategy, a multi agency group in November 2003 produced a strategic objective and related measures and outcomes specifically tackling child poverty. The group also considered how to take this forward and how the

Children's Strategy should dovetail with the wider New TSN strategy (current and future) for tackling poverty and social exclusion in Northern Ireland.

A total of £36 million has been made available through the Children's Executive Programme Fund with the specific aim of supporting children in need and young people at risk. £17 million has already been allocated for projects involving children and young people in areas including health, education, play and working with children at risk.

Recent research commissioned by OFMDFM entitled "Low Income Households in Northern Ireland" shows that the concentration (proportion of those in poverty who are children) of children in poverty between 1990–94 has dropped from 36 per cent. to 33 per cent. between 1999–2002. A copy of the report has been placed in the House Library and it can also be viewed on the internet at http://www.ofmdfmni.gov.uk/research/lowincome/index.htm

Cot Deaths

Lady Hermon: To ask the Secretary of State for Northern Ireland how many cot deaths there were in Northern Ireland in each of the last three years; and what advice is given by his Department to prevent such deaths. [151340]

Angela Smith: The information requested, based on the latest years for which figures are available, is as follows:

	Number of cot deaths
1999	11
2000	12
2001	10

Since the early 1990s parents have been advised of the risk factors associated with cot deaths and how to avoid them through the Reduce the Risk Cot Death leaflets. Last July my Department issued an updated leaflet to parents on how they can reduce the risks. The new leaflet was developed after consultation with health professionals and the Foundation for Sudden Infant Deaths and contains advice on the safest sleeping arrangements for babies.

My Department continues to monitor research findings and will issue revised guidance as appropriate.

Digital Hearing Aids

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many individuals were provided with digital hearing aids in 2003; and what estimate he has made of how many others would benefit from these devices. [151218]

Angela Smith: The phased introduction of Digital Hearing Aids (DHAs) commenced in October 2003. Information on the provision of hearing aids is not collected routinely by the Department. Health and Social Services Trusts with Audiology departments will shortly be asked to provide information on the provision of DHAs for the period October 2003 to the end of January. Information will thereafter be collected on a quarterly basis.

It is estimated that there are over 100,000 hearing aid users in Northern Ireland. Research suggests that digital hearing aids (DHAs) may benefit 80 per cent. of hearing aid users.

Doctors (Working Hours)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what proportion of *(a)* junior house officers, *(b)* senior house officers and *(c)* other doctors have weekly workloads in breach of the EU working time directives. [151210]

Angela Smith: From the latest monitoring of New Deal compliance, 91 per cent. of junior doctors (this includes Pre-Registration House Officers, Senior House Officers and Specialist Registrars) are already working and being trained in less than 56 hours per week and are thus meeting the requirements of the European Working Time Directive which will come into effect in August 2004. It is not possible, without disproportionate cost, to disaggregate the figures in the form requested.

The new consultant contract, which is being introduced from April 2004, aims to cap the average working week for consultants at 48 hours to ensure compliance with the Directive.

Drownings

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many drownings there were in Northern Ireland in 2003. [148838]

Mr. Pearson: Mortality statistics for 2003 have not been fully collated and therefore the latest available data relate to 2002. There were 28 deaths caused by drowning[1] registered in Northern Ireland in 2002.

[1] Cause of death was defined using the International Classification of Diseases, Tenth Revision (ICD-10) code T75.1.

Elective Surgery

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on progress on protected elective surgery centres in Northern Ireland. [151217]

Angela Smith: A number of protected elective facilities have been established, at Altnagelvin, Causeway, Erne, Lagan Valley and Mater hospitals. The unit at Altnagelvin hospital opened in 2001 and currently treats approximately 1,100 patients per year. The protected elective centre at Causeway hospital opened in November 2003 and is projected to provide 920 surgical procedures per annum. The unit at Lagan Valley hospital was opened in February 2003 and treats around 850 patients a year. The Mater hospital's protected facility opened in January 2003 and is anticipated to treat 1,100 patients per year. In addition, a new day procedures unit opened at Erne hospital in December 2003 and it will provide for an additional 300 day cases per annum.

Work is also currently being undertaken to establish a protected elective centre at South Tyrone hospital.

Game Licences

Lady Hermon: To ask the Secretary of State for Northern Ireland how many game licences were issued in Northern Ireland in *(a)* 1985, *(b)* 1990, *(c)* 1995, *(d)* 2000 and *(e)* in each year since 2001. [150680]

Mr. Spellar: The number of game licences issued in Northern Ireland were:

Year	*Number of Licences*
1985	[1]2,000
1990	1,722
1995	[1]1,000
2000	958
2001	983
2002	1,018
2003	1,251

[1] This is an estimation based on the value of licences sold.

GM Crops

Lady Hermon: To ask the Secretary of State for Northern Ireland what applications to grow GM crops have been made in Northern Ireland. [151339]

Angela Smith: There has only ever been one application to grow GM crops in Northern Ireland. This was made in 1996 by the Department of Agriculture to carry out a small field-trial on potatoes. This application was dealt with through the regulatory process established under the Genetically Modified Organisms (Northern Ireland) Order 1991 and the Genetically Modified Organisms (Deliberate Release) Regulations 1994. Papers are available for viewing by the public on a statutory Public Register at the Department of the Environment's Environmental Policy Division, River House, 48 High Street, Belfast, BT1 2AW. Telephone 028 90257362.

High Hedges

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will include measures to deal with high hedges in his consultation on tackling anti-social behaviour in Northern Ireland; and if he will make a statement. [150683]

Angela Smith: The current consultation on anti-social behaviour measures is focused on such behaviour linked to criminality. Therefore, it does not cover hedges between neighbours.

GP Vacancies

Lady Hermon: To ask the Secretary of State for Northern Ireland how many general practitioner vacancies there were in Northern Ireland in each year since 1997; and what steps he is taking to reduce such figures. [151322]

Angela Smith: There is generally no problem filling practice vacancies in Northern Ireland. The Central Services Agency (CSA) only hold information on GP vacancies where they were required to intervene to fill the vacancy. This typically occurs if the vacancy has arisen in what was previously a single-handed GP Practice. Otherwise the remaining GPs within the practice, as independent contractors, advertise and fill the position independently.

The number of vacancies notified to, and filled by, CSA are shown in the table.

GP vacancies notified to Central Services Agency: 1997–2003

Year	*Vacancies reported to Central Services Agency*	*Vacancies filled by Central Services Agency*
1997	3	3
1998	1	1
1999	0	0
2000	0	0

Hare Coursing

Kate Hoey: To ask the Secretary of State for Northern Ireland pursuant to the answer given by the hon. Member for Basildon (Angela Smith), on 11 December 2003, *Official Report*, columns 577–78W, on hare coursing, what sources other than the principal sources cited in his answer he used to reach his decision to refuse a licence to a coursing club to net hares. [150049]

Angela Smith: In addition to the two principal sources of information referred to in my previous answer of 11 December 2003, *Official Report*, column 578W, an unpublished research thesis by Karina Dingerkus, completed in 1997, provided contextual data reporting a decline in the population of the Irish hare in Northern Ireland over the preceding years. Her thesis, entitled "The Distribution and Ecology of the Irish Hare *Lepus timidus hibernicus* in Northern Ireland", is lodged in the Science Library of the Queen's University of Belfast. Her findings were summarised and discussed in the report of the 2002 Survey carried out by Dr. Jane Preston and others.

Hospital Doctors

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland which grades of hospital doctors will be required to undergo an appraisal process in 2004 in Northern Ireland. [150756]

Angela Smith: All consultant medical staff (including consultants in public health medicine and consultant clinical academic staff) and non-consultant career grade doctors (including Staff Grade doctors and Associate Specialists) will be required to undergo an appraisal in 2004.

Arrangements for the appraisal of doctors in the training grades are currently being developed, and it is anticipated that all such doctors will also be appraised in 2004.

Integrated Schools

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what percentage of pupils in education in Northern Ireland are being educated at integrated schools; and what the percentage was in each of the last five academic years. [148766]

Jane Kennedy: Information for the 2003–04 school year is not yet available. The percentages for the last five academic years are as follows.

Academic year	Percentage
1998–99	3.3
1999–2000	3.7
2000–01	4.0
2001–02	4.3
2002–03	4.6

Maghaberry Prison

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will make a statement on the recent disorder at HM Prison Maghaberry. [150684]

Jane Kennedy: I utterly condemn the serious rioting and wanton destruction of prison property that took place in Maghaberry on 14 to 15 January. It is to the great credit of prison staff that the incident was brought to a conclusion without serious injury to staff or prisoners.

Charges under prison rules have been laid against all those involved who are still in custody.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will estimate the financial costs resulting from overnight disturbance by prisoners at Maghaberry Prison on 14 to 15 January. [150733]

Jane Kennedy: The estimated cost of the damage caused during the disturbance on 14 to 15 January is £100,000 to £150,000.

Maze Prison (Redevelopment)

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans he has for the redevelopment of the former HM Prison Maze site; and if he will make a statement on progress. [150668]

Mr. Pearson: The Government's aim is to regenerate this key strategic site to bring the maximum possible social and economic benefit to Northern Ireland. A consultation panel has been established to provide advice on the best way forward. The panel is currently engaged in a public consultation process to generate ideas for the redevelopment of the site. The consultation will end on 29 February, and the panel is expected to submit its final report in May.

Minority Ethnic Groups (Harassment/Bullying)

Mr. McNamara: To ask the Secretary of State for Northern Ireland what reports he has received of bullying and harassment experienced by members of minority ethnic groups who are pupils, students and staff at schools and educational establishments in Northern Ireland; and what actions have been taken as a result. [149246]

Jane Kennedy: The Department of Education does not collect information about bullying or harassment of pupils who are members of minority ethnic groups at schools in Northern Ireland. However, the Department recognises that bullying in whatever form and for whatever reason has no place in schools. The Department has issued comprehensive guidance to all schools about how to tackle bullying. Further, the Education and Libraries (NI Order 2003), which came into operation on 1 April 2003, places a duty on all grant-aided schools in Northern Ireland to have a specific anti-bullying policy and to draw up measures to prevent all forms of bullying among pupils.

The Department of Education has received no reports of bullying or harassment of staff at schools in Northern Ireland who are members of minority ethnic groups. Schools have a Code of Practice on Harassment which would be applied should any such case arise.

The Department for Employment and Learning has received no reports of bullying and harassment experienced by members of minority ethnic groups who are students and staff at the universities, teacher training colleges and further education colleges in Northern Ireland.

Mobile Phone Masts

Lady Hermon: To ask the Secretary of State for Northern Ireland what his Department's policy is on the construction and location of mobile phone masts in Northern Ireland. [151338]

Angela Smith: The Department of the Environment's prevailing policy guidance for the development of telecommunication masts is set out in Planning Policy Statement 10 "Telecommunications", published in April 2002. This statement is available on the Planning Service website at: http: www.planningni.gov.uk/AreaPlans_Policy/PPS/PPS.htm and a copy has been placed in the Library.

NHS

Lady Hermon: To ask the Secretary of State for Northern Ireland how many health care professionals from outside the United Kingdom were recruited to work in the NHS in Northern Ireland in each year since 1997; what positions they held; and what their nationality was. [150670]

Angela Smith: Information on the total numbers of non-UK health care professionals recruited into the NHS could only be obtained at disproportionate cost. Information is available, however, on the numbers of staff that were recruited from outside the UK as part of specific recruitment drives since 2000; No medical or professional and technical staff were recruited in this way during this period . The number of nursing staff, their grade and nationality are shown in Tables 1 and 2 as follows.

Table 1: The number of non-UK nurses recruited to work in the NHS in Northern Ireland in each year since 2000 by grade

Year	Positions held	Number recruited by HSS[1] Trusts
2000	Registered Nurse	8
Total		8
2001	Registered Nurse	94
	Pre-Registered Nurse	33
Total		127
2002	Nursing Staff	12
	Basic Grade Nurses	33
	Staff Nurse (no grade given)	42
	Enrolled Nurse C	40
	Staff Nurse E	5
	Staff Nurse D	11

Table 1: The number of non-UK nurses recruited to work in the NHS in Northern Ireland in each year since 2000 by grade

[1] Health and Social Services

Night-time Flying

Lady Hermon: To ask the Secretary of State for Northern Ireland how many flights *(a)* arriving and *(b)* departing (i) Belfast City Airport, (ii) Belfast International Airport and (iii) City of Derry Airport were in breach of the night-time flying curfew in the last year for which figures are available. [151334]

Mr. Spellar: Belfast City Airport operates under a planning agreement, which governs operations, including flight hours, at the airport. The main elements controlling flight hours are: "permitted hours" between 6.30 am and 9.30 pm for normal scheduled operations; "extended hours" between 9.30 pm and 11.59 pm for delayed scheduled operations; and, "prohibited hours" between 9.30 pm and 6.30 am, which prohibits scheduled operations. During the calendar year 2003, six scheduled flights, four arrivals and two departures, used the airport between 12 midnight and 12.30 am during the "prohibited hours".

Belfast International Airport and City of Derry Airport have no night-time operating restrictions placed upon them.

Nursing Vacancies

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many nursing vacancies there are in the province; and if he will make a statement. [150743]

Angela Smith: The number of vacancies as at 30 September 2002 and 30 September 2003 are given in the table.

Number of nursing, midwifery and health visiting vacancies within all trusts as at 30 September 2002 and 30 September 2003

Trust	WTE[1] vacancies as at 30 September 2002	WTE[1] vacancies as at 30 September 2003
Almagelvin Group HSS Trust	80.3	33.7
Armagh and Dungannon HSS Trust	8.8	4.0
Belfast City Hospital HSS Trust	67.5	17.3
Causeway HSS Trust	15.0	33.0
Craigavon and Banbridge Community HSS Trust	8.7	2.0
Craigavon Area Hospital Group HSS Trust	35.1	15.6
Down Lisburn HSS Trust	n/a	13.9
Foyle Community HSS Trust	29.0	13.0
Greenpark Healthcare HSS Trust	41.0	45.8
Homefirst Community HSS Trust	30.0	n/a
Mater Infirmorum Hospital HSS Trust	46.0	71.7
Newry and Mourne HSS Trust	5.0	8.2
North and West Belfast HSS Trust	26.3	8.4
Royal Group of Hospitals HSS Trust	257.6	96.5
South and East Belfast HSS Trust	29.5	34.2
Sperrin Lakeland HSS Trust	26.0	16.0
Ulster Community and Hospitals Group HSS Trust	47.5	23.6
United Hospitals Group HSS Trust	59.0	23.5
Total	812.3 (does not include figure for Down Lisburn)	460.4 (does not include figure for Homefirst)

[1] Whole-time equivalent.

As can be seen from the table, the vacancy situation has slightly unproved between 30 September 2002 and 30 September 2003. A review of the Nursing, Midwifery and Health Visiting Review was carried in late 2001/ early 2002 and a report was issued in March 2002. It is proposed to carry out another detailed review of the Nursing, Midwifery and Health Visiting workforce in 2004.

Overseas Nurses

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many overseas nurses are employed in Northern Ireland. [150744]

Angela Smith: Overseas nurses are employed both within the private sector and the HPSS in Northern Ireland but information is only held in respect of HPSS employees. As at 31 December 2003, the total number of

overseas nurses employed within Health and Social Services Trusts in Northern Ireland was 709. Figures are detailed by Trust as follows.

HSS[1] Trust	*Number*
Altnagelvin Group HSS Trust	24
Armagh and Dungannon HSS Trust	0
Belfast City Hospital HSS Trust	55
Causeway HSS Trust	14
Craigavon and Banbridge Comm. HSS Trust	0
Craigavon Area Hospital HSS Trust	50
Down Lisburn HSS Trust	42
Foyle Community HSS Trust	0
Greenpark Healthcare HSS Trust	47
Homefirst Community HSS Trust	20
Mater Infirmorum Hospital HSS Trust	24
Newry and Mourne HSS Trust	5
North and West Belfast HSS Trust	0
Royal Group of Hospitals HSS Trust	239
South and East Belfast HSS Trust	0
Sperrin Lakeland HSS Trust	40
Ulster Community and Hospitals Group HSS Trust	102
United Hospitals Group HSS Trust	47
Total	709

[1] Health and Social Services

Physiotherapists

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what restrictions there are on the number of domiciliary visits by physiotherapists to a particular patient. [150735]

Angela Smith: Domiciliary visits are determined by clinical need. While there is no arbitrary limit placed on such visits, service provision is managed to balance total local need with available resources.

Pre-School Places

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland on what basis SEELB provides a greater number of funded pre-school places to the statutory nursery school sector than to the private/voluntary sector in Newtownards; and for what reason the playschool at Londonderry Primary School has not attracted any funded places. [149612]

Jane Kennedy: In Newtownards there are currently 234 pre-school places in statutory nurseries and 136 in settings in the voluntary and private sector. Of these, 52 statutory places and all of the voluntary and private places were created by the Pre-school Education Expansion Programme. The planning of pre-school provision and the allocation of voluntary/private sector places is a matter for each Board's Pre-School Education Advisory Group (PEAG), which identifies shortfalls in funded pre-school provision at local area level. The intention was that new places created under the programme for Northern Ireland as a whole would be broadly on a 50:50 basis between the statutory and voluntary/private sectors, though at local level the ratio varies considerably, depending mainly on the level of provision prior to the programme. In Newtownards, most of the statutory provision pre-dated the expansion programme.

The number of pre-school places which the South Eastern Education and Library Board's PEAG is funding in Newtownards is already sufficient to satisfy the demand from the parents of children in their immediate pre-school year. It is not necessary, therefore, for the PEAG to introduce additional providers such as the playschool at Londonderry Primary school.

Pulmonary Disease

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will estimate the cost of chronic obstructive pulmonary disease to the NHS in 2003. [150742]

Angela Smith: Information in the form requested is not readily available and could be compiled only at disproportionate cost.

Racism

Mr. McNamara: To ask the Secretary of State for Northern Ireland what evidence he has received of paramilitary group involvement in racist acts of vandalism carried out on peace walls between Protestant and Catholic communities; and if he will make a statement. [151138]

Jane Kennedy: I am not aware of any racist acts of vandalism that have taken place on peacelines between Protestant and Catholic communities by paramilitary groups however racist graffiti was removed from the gable wall of the home of a Chinese family living in the Donegal Road area. This graffiti was removed at the request of the PSNI.

Mr. McNamara: To ask the Secretary of State for Northern Ireland if he will make a statement on swastika-style graffiti on peace walls in Belfast. [151139]

Jane Kennedy: It is a fact that in Northern Ireland many peacelines have become the canvas for a wide range of social and political comment, some of which many would find offensive.

The Government will seek to remove graffiti that is considered likely to cause a breach of the peace.

SARS

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on preparations to deal with cases of SARS in Northern Ireland. [151213]

Angela Smith: In June 2003 the Department of Health, Social Services and Public Safety set up a Northern Ireland SARS Taskforce charged, inter alia, with preparing a contingency Plan for SARS in Northern Ireland. This in turn led to the establishment of eight sub-groups drawn from the HPSS to take forward various aspects of SARS preparation and these groups reported to a Conference in Belfast on 8 December at which the Contingency Plan was also launched. A tabletop exercise, to test the Plan, was held the following day and the lessons learned from that will be incorporated into the Plan at the next reprint.

The Contingency Plan includes arrangements for any one (or all) of three acute hospitals to be designated to deal with SARS patients. Plans for upgrading work at these, and other hospitals with A&E Departments, are in preparation, while steps to provide personal protection equipment (PPE) for health care workers, including GPs, in contact with suspected SARS cases

are also well advanced. A training package video/CD Rom covering a number of issues including infection control and the use of PPE has also been prepared for distribution to the service.

The Department has also opened a special SARS website with information both for health professionals and members of the public.

School Funding

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how much funding *(a)* integrated and *(b)* Irish Language schools have received in each of the last five years. [148769]

Jane Kennedy: The total funding allocated directly to *(a)* integrated and *(b)* Irish Language schools in each of the last five years is as follows:

£000

	Integrated	*Irish Language*
1998–99	46,146	5,533
1999–2000	53,587	5,216
2000–01	52,510	5,154
2001–02	51,257	4,759
2002–03	58,841	5,946

Notes:
1. The figures include *(a)* recurrent and capital funding awarded directly to both grant maintained and controlled integrated schools and Irish Language schools, *(b)* EU Peace I and Peace II funding awarded directly to both grant maintained and controlled integrated schools, and *(c)* funding provided to integrated and Irish Language schools through the Londonderry Regeneration Initiative and the Belfast Regeneration Office.
2. The above figures exclude services provided by the Education and Library Boards for schools, which are not disaggregated by individual sector or school (for example: services such as school meals, school transport and the Curriculum Advisory and Support Services).

School Travel

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the overall cost was of free travel to schools in Northern Ireland in the last 12 months for which figures are available. [148763]

Jane Kennedy: In the 2002–03 financial year the Education and Library Boards provided home to school transport assistance to almost 100,000 pupils. The cost of providing this service was £57.2 million.

Schoolchildren (Back Injuries)

Lady Hermon: To ask the Secretary of State for Northern Ireland what measures are in place in Northern Ireland to protect children from sustaining back injuries from carrying excessively heavy schoolbags to, in and from school; and if he will make a statement. [148813]

Jane Kennedy: School boards of governors have a duty to safeguard the welfare of registered pupils on the school premises. The Department of Education provides funding for lockers for pupils' learning materials in post-primary schools with the agreement of the school authorities. Pupils share the responsibility for ensuring that they only carry to and from school those materials and equipment essential for homework or school activities for that day. Parents are generally responsible for making arrangements to protect the health and welfare of the children outside the school premises.

Sexual Health

Lady Hermon: To ask the Secretary of State for Northern Ireland what steps he is taking to promote sexual health among young people in Northern Ireland; and if he will make a statement. [151324]

Angela Smith: The Department of Health, Social Services and Public Safety is working with other interested Departments and organisations to promote sexual health and wellbeing. A draft Sexual Health Promotion Strategy and Action Plan, which aims to improve, protect and promote the sexual health and wellbeing of the population of Northern Ireland, was issued for three months consultation in December 2003. It sets a target to reduce the number of sexually transmitted infections and identifies those aged under 20 as a priority group. It also proposes actions in the areas of prevention, education and training, services and data collection and research.

A Teenage Pregnancy and Parenthood Strategy and Action Plan was also published at the beginning of 2003 and it contains challenging targets to reduce teenage pregnancies. A multi-agency Implementation Group has been established to take the Strategy forward. The Group has identified education support, confidentiality, services and parent/child communication as priority areas for action.

Solectron

Mr. Beggs: To ask the Secretary of State for Northern Ireland what grants have been paid to Solectron Northern Ireland towards the cost of establishing factories in Northern Ireland. [151003]

Mr. Pearson: None. Although Solectron accepted an offer of grant assistance from Invest NI dated 10 May 2001, the company did not seek to draw down any of the grants offered.

Special Educational Needs

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the average time between referral of pupils for statutory assessment and receiving the required assistance for *(a)* learning difficulties, *(b)* speech and language, *(c)* autism, *(d)* behavioural difficulties and *(e)* medical needs within the South Eastern Education and Library Board was in the last year for which figures are available. [149784]

Jane Kennedy: The information requested is not readily available and could be provided by the South-Eastern Education Library Board only at disproportionate cost.

Starter Homes

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many starter home initiative schemes have begun in Northern Ireland. [150605]

Mr. Spellar: A starter home initiative, the Co-ownership scheme, which is part funded by the Department for Social Development, has been in

operation since 1978. The aim of the scheme is to provide assistance to those on marginal incomes, and who would not be eligible to obtain a full mortgage, to allow them to become homeowners. Since its inception the scheme has enabled 17,500 participants to gain a foothold on the property ladder through its equity-sharing scheme, over 13,000 of whom eventually moved to full home ownership.

Tourist Accommodation

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what *(a)* benefits and *(b)* grants are available when building (i) guest houses and (ii) other forms of tourist accommodation in Northern Ireland. [148765]

Mr. Pearson: Advice on establishing and certifying tourism accommodation businesses is available from the Northern Ireland Tourist Board (NITB). Support with operating, managing and developing tourism businesses is available through Invest NI.

Invest NI can provide grant assistance for the upgrading of existing guesthouses certified by the NITB, the development of high quality "country type" guesthouse accommodation in existing habitable properties and the building of new guesthouses on brown field sites in traditional seaside resort towns. In addition, Invest NI can make available financial assistance and a range of business support programmes for the building and development of hotels, hostels, self-catering and bed and breakfast establishments.

Assistance is also available from a number of other sources. For example, the Department of Agriculture and Rural Development offers assistance to create new tourist accommodation bed spaces under the EU Programme for Peace and Reconciliation in Northern Ireland and the Border of Ireland (PEACE II) funded Natural Resource Rural Tourism Initiative. Through the LEADER + programme, administered through 12 local action groups, existing NITB certified tourist accommodation properties may be eligible for funding to assist with upgrading and expansion. The Department of Social Development may make available grants to support the building of guesthouses or other forms of tourist accommodation to support, where appropriate, wider regeneration in Northern Ireland.

Travellers

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on the rights of members of the travelling community, with particular reference to *(a)* facilities, *(b)* education and *(c)* entitlement to benefits. [150748]

Mr. Spellar: Irish Travellers have the same rights of access to facilities, education and the same entitlement to benefits as every other citizen in Northern Ireland.

Ulster Hospital (Courtesy Bus)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will study the feasibility of a courtesy bus service from Belfast to the Ulster hospital; and if he will make a statement. [150746]

Angela Smith: The Ulster Community and Hospitals Trust is currently developing a Travel Plan that will consider existing services and future provision, including access to public transport for patients, visitors and staff.

As part of this process the Trust will meet with Translink to discuss bus services and the viability of various options.

Winter Influenza

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what preparations have been made to deal with a winter influenza outbreak in Northern Ireland. [151182]

Angela Smith: The Department's annual influenza immunisation campaign is the main element of its programme to minimise any winter influenza outbreak. There are two main groups involved in the campaign: everyone over 65 and those under 65 who are considered to be at risk because of an underlying medical condition such as asthma, diabetes, a heart condition etc. The Department has proactively promoted immunisation this year with a particular focus on those 'at risk', including children. Figures on vaccination uptake to the end of November show that the campaign is ahead of the targets set for this year.

This year also the Department has regularly reminded the public of measures to protect themselves from influenza and of the steps to take to look after themselves should they develop it.

The Communicable Disease Surveillance Centre (CDSC) at Belfast City Hospital monitors the incidence of influenza through a network of spotter practices and provides information directly to the Department. The assessment provided by CDSC in the middle of January 2004 is that influenza is circulating at very low levels in Northern Ireland. Boards and Trusts all have plans in place to deal with upsurges in the numbers of cases of flu, should this occur.

In 2003 the Department secured a small supply of a new anti-viral drug called Oseltamivir which can be administered, in the event of a serious outbreak, to patients and staff in nursing homes, residential homes and hospitals to prevent them catching the flu.

Young Offenders

Lady Hermon: To ask the Secretary of State for Northern Ireland how many young people are being held at young offender institutions in Northern Ireland; and if he will make a statement on the provision for young offenders in Northern Ireland. [151341]

Jane Kennedy: There are currently 191 male and two female inmates being held at young offender institutions in Northern Ireland.

Hydebank Wood Young Offenders Centre accommodates all young male offenders aged between 17–21 years and has a dedicated juvenile landing for those under 18. Female young offenders are detained in Mourne House at Maghaberry Prison.

All young offenders have access to a comprehensive regime, which provides for education, recreation and offending behaviour programmes.

TRANSPORT

Rural Policing Fund

Mr. Llwyd: To ask the Secretary of State for Transport what criteria apply to the quantification of the Rural Policing Fund; and if he will make a statement. [150020]

Ms Blears: I have been asked to reply.

External research carried out in 1998 demonstrated that additional annual costs of around £30 million associated with more sparsely populated police authority areas, were not reflected in the general police funding formula.

The Rural Policing Fund was introduced during 2000–01, when a specific grant of £15million was made available for policing in more rural areas, without reducing grant to the predominantly urban forces. £30 million has subsequently been made available annually to the 31 forces with the most widespread populations. The Fund has always been distributed according to the relative average sparsity of population.

Driving Licences

Chris Grayling: To ask the Secretary of State for Transport how many asylum seekers have been issued with driving licences in each of the past three years; and what estimate he has made of the number of asylum seekers driving without valid UK licences. [150048]

Mr. Jamieson: All applications for driving licences are subject to the same requirements in relation to age, health competency and identity. A wide range of identity documentation can be produced as evidence of identity in support of an application for a photocard driving licence and most would not indicate the residency status of the applicant. It is therefore not possible to determine what proportion of applicants were asylum seekers.

Pensioners (Free Transport)

Mr. Jim Cunningham: To ask the Secretary of State for Transport if he will make provision for pensioners to travel free on public transport during off-peak hours. [151636]

Mr. McNulty: We have no plans to introduce a statutory requirement for pensioners to be able to travel free on public transport during off-peak hours. The current statutory minimum requirement for concessionary travel in England introduced in 2001 ensures half fares for pensioners on local buses, with a free pass. From April 2003, we have extended concessionary travel schemes to men aged 60–64, bringing them into line with women of the same age. Local authorities may make more generous provision, including free travel, at their discretion.

Mr. Jim Cunningham: To ask the Secretary of State for Transport if he will estimate the cost of providing free off-peak travel for pensioners. [151637]

Mr. McNulty: We have made no estimate of the cost of providing free off-peak travel for pensioners on all forms of public transport. However we estimate that the total cost of providing free travel on all local bus services for pensioners would be in the order of £800 million per year.

Public Transport (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Transport what estimate he has made of how many people in Lancashire used *(a)* bus services and *(b)* train services in each year since 1997. [151198]

Mr. McNulty: Estimated figures for the number of bus journeys in Lancashire from 1999 is as follows:

	Number
1999–2000	57,614,463
2000–01	56,387,880
2001–02	58,672,576
2002–03	61,918,427

Note:
Comparable figures for years before 1999 are not available.

The number of train journeys starting and finishing at Lancashire stations since 1997 is as follows:

	Number
1997–98	1,515,692
1998–99	1,535,946
1999–2000	1,610,520
2000–01	1,632,682
2001–02	1,581,104
2002–03	1,427,132

Regional Airports (Security)

David Taylor: To ask the Secretary of State for Transport (1) what recent discussions he has had with *(a)* the Civil Aviation Authority and *(b)* international counterparts concerning security at regonal airports in the UK; [151012]

(2) how regularly security arrangements at regional airports are reviewed. [151013]

Mr. McNulty: The Department of Transport has policy responsibility for civil aviation security in the UK. We set practical security measures for the aviation industry to implement at all airports, based on UK security service threat information, and monitor compliance with those requirements. These measures are reviewed constantly with the industry. However, neither the UK CAA or our international counterparts have any responsibility or expertise in these areas and we do not therefore consult with them, although the department keeps in regular touch with them on a range of issues.

Rural Transport

Mr. Flook: To ask the Secretary of State for Transport how much grant his Department has given to Somerset county council for rural transport in each year since 1997. [150624]

Mr. McNulty: All local authorities in England (outside London) receive capital funding for local transport through the Local Transport Plan system. The Government also provides revenue support for all local authority spending programmes through the Formula Spending Share system. It is a decision for each authority as to how much of that funding is allocated to rural transport. Somerset CC also received Rural Bus Challenge and Rural Bus Subsidy funding throughout most of the period in question:

Rural Bus Challenge Funding

Year of award	*Name of project*	*Amount awarded (£)*
1998	The Mendips flexible bus project	130,000
1998	Exmoor community transport radio	1,004
1999	West Somerset Social Car Scheme	90,823
1999	Wells to Priddy Postbus	25,582
1999	Continuation of Mendip Flexibus Funding	225,195
2000	South Somerset	182,344
2001	Community Transport in Mendip 'Special Rural Component'	89,000
2001	South Somerset Links, Langport and Chard	197,000
2001	Rural Surrounds of Wiveliscombe	100,000
2002	Somerset Inclusion Bus Buddy	94,500

The total awarded to Somerset county council under the Rural Bus Challenge since its inception in 1998 is £1,135,448. Payments are made over a number of years, usually over three years.

Rural bus subsidy grant

	£
1998–99	1,017,790
1999–2000	974,750
2000–01	980,300
2001–02	1,285,610
2002–03	1,472,445
2003–04	1,518,856

Figures shown give actual grant paid since its inception in 1998, deducting any grant carried forward from the previous year. The figure for 2003–04 shows the full allocation for this financial year.

Traffic Management Bill

Mr. Donohoe: To ask the Secretary of State for Transport what estimate has been made of the likely costs per *(a)* water, *(b)* gas, *(c)* electricity and *(d)* telecommunications customer arising from the introduction of permit schemes as set out in the Traffic Management Bill. [150205]

Mr. Jamieson: While the Traffic Management Bill provides the broad powers to set up permit schemes, the detail of how they would work will be set out in secondary legislation and a further more detailed Regulatory Impact Assessment will be produced as part of preparing regulations.

Transport (Wales)

Mr. Wiggin: To ask the Secretary of State for Transport if he will list *(a)* the volume of freight passing through Welsh ports, *(b)* the volume of passengers passing through Welsh ports and *(c)* the number of ships and the average tonnage of ships operating out of Welsh ports for each year since 1997. [151754]

Mr. Jamieson: The available information is included in the table.

Welsh ports traffic 1997–2002

	(a) Total freight (million tonnes)	*(b) Total passengers (million)*	*(c) Number of ship arrivals (thousand)*	*(c) Average tonnage of ships arriving (thousand gt)*
1997	62.3	4.0	10.9	n/a
1998	56.2	4.3	10.3	n/a
1999	56.6	4.0	9.9	14.0
2000	57.9	3.9	11.1	13.3
2001	54.7	3.6	10.5	15.4
2002	52.0	3.6	10.4	16.5

HEALTH

Assistive Technology

Mr. Oaten: To ask the Secretary of State for Health what assessment he has made of the 3rd Audit Commission report, "Keeping People Independent with Assistive Technology". [151947]

Dr. Ladyman: This report has not yet been published and an assessment is not, therefore, possible.

Babies (Sleeping Habits)

Mrs. Iris Robinson: To ask the Secretary of State for Health what advice he issues to parents regarding risks associated with babies sleeping in the same bed as their parents at night; and if he will make a statement. [150755]

Dr. Ladyman: The Department have issued guidance on avoiding co-sleeping with babies in circumstances associated with cot death. The leaflet, 'Reduce the Risk of Cot Death', has been made widely available in hard copy and on the Department's web-site at www.doh.gov.uk/cotdeath/. The Department also supports the Child Accident Prevention Trust, whose leaflet, 'Keep Your Baby Safe', includes advice to parents against co-sleeping with a baby in their bed, and a warning against falling asleep on a sofa while holding the baby, in case of accidental injury.

Cancer

Mr. Baron: To ask the Secretary of State for Health what assessment he has made of the reasons for the changes in cancer incidence between 1995 and 2000. [150233]

Miss Melanie Johnson *[holding answer 26 January 2004]:* The number of cancers in England, excluding non-melanoma skin cancer, increased by 6.9 per cent. between 1995 and 2000. This is mostly accounted for by increases in breast cancer, prostate cancer, testicular cancer, bowel cancer, melanoma, mesothelioma and lymphomas. However, this should be balanced against significant decreases in the numbers of lung, stomach and cervical cancers.

There are many reasons for the changes in incidence of these cancers.

The increased incidence of breast cancer can be attributed not only to the success of the national breast screening programme in identifying new cases, but also

changes in factors that affect a woman's hormonal environment, such as obesity, use of hormone replacement therapy and differing patterns of child birth. The increase in reporting of prostate cancer is primarily due to the greater use of prostate specific antigen testing. Increased incidence of melanoma is due to greater over-exposure to sunlight. The increased number of bowel cancer cases is partly due to diet and lack of physical activity. For mesothelioma, the increase is due to the increased numbers of people exposed to asbestos in the 1960s and 1970s who, because of the long latency period of the disease, are only now developing this condition. The reasons for increased cases of testicular cancer and lymphomas are unclear.

The decrease in lung cancer incidence is due to reduced rates of smoking in men over the last two decades. The reduction in stomach cancer is primarily thought to be due to changes in diet. The reduction in the number of cases of cervical cancer is almost certainly due to the national screening programme identifying abnormalities which, left untreated, would later become cancerous.

Cannabis

Mrs. Iris Robinson: To ask the Secretary of State for Health if he will make a statement on the results of recent research into the association between cannabis use and psychosis. [150747]

Miss Melanie Johnson: We recognise that a causative link between early cannabis use and later development of schizophrenia is not conclusively proven. However, the recent epidemiological research on the issue of earlier use of cannabis and risk of later development of schizophrenia, 'schizophrenic symptoms' and 'schizophreniform disorder' has shown a stronger association than was previously evident from published studies. The British Medical Journal editorial accompanying the publication of the key research papers concluded that:

> "whether the use of cannabis triggers the onset of schizophrenia or depression in otherwise vulnerable people or whether it actually causes these conditions in non- predisposed people is not yet resolved."

The Department continues to monitor research in this area and has a range of expert advisors to continue to inform policy.

Care Home Beds (Worthing)

Tim Loughton: To ask the Secretary of State for Health what plans he has to ensure that there are adequate care home beds available *(a)* now and *(b)* in the future in Worthing; and what mechanisms he will employ to ensure that the care homes receive sufficient fees to care for their residents. [151293]

Dr. Ladyman: The Government have made available substantial increases in the level of funding provided for social services in recent years. Between 1996–97 and 2002–03, the overall level of funding has increased by 20 per cent., an average real terms annual increase of around three per cent. We intend to further increase resources to social services for personal social services by an annual average of six per cent, in real terms from 2003–04 to 2005–06.

Local councils should use these extra resources to determine a range of care options, including residential care places that are needed locally. This information should then inform their commissioning strategies and decisions. It is for each council to decide what should be the level of fees paid for care services, in the light of local needs and circumstances.

Community Health Councils

Dr. Tonge: To ask the Secretary of State for Health how much the Commission for Patient and Public Involvement in Health have spent to date in establishing new arrangements following the abolition of community health councils. [149764]

Ms Rosie Winterton: The amount spent by the Commission for Patient and Public Involvement in Health within the financial year 2003–04, up to 31 December 2003, was £19.9 million.

Dr. Tonge: To ask the Secretary of State for Health how much the Commission for Patient and Public Involvement in Health has spent on *(a)* headquarters and *(b)* regional offices in the current financial year. [149766]

Ms Rosie Winterton: The amount spent by the Commission for Patient and Public Involvement in Health within the financial year 2003–04, up to 31 December 2003, was £4.5 million on the national centre and £2.97 million on the regional centres.

Correspondence

Mr. Webb: To ask the Secretary of State for Health when he will reply to the letter of 28 August from the hon. Member for Northavon (his reference PO1035359) regarding vitamin B17. [147956]

Miss Melanie Johnson: A reply was sent to the hon. Member on 27 January 2004.

Drug-related Deaths

Mr. Burstow: To ask the Secretary of State for Health what progress has been made in reducing the number of drug-related deaths since 1999. [151462]

Miss Melanie Johnson: The figures on drug related deaths since 1999 are shown in the table. The drop in 2001 was the first reduction in drug related deaths (DRDs) since 1993.

	1999	*2000*	*2001*
Number of DRDs	1,567	1,662	1,623
Percentage change	—	+6	-2

Dual Diagnosis

Mr. Drew: To ask the Secretary of State for Health if he will make a statement on his plans to propose the introduction of a new definition of dual diagnosis into statute. [151788]

Ms Rosie Winterton: The Government have no plans to introduce a new definition of dual diagnosis into statute. Under the draft Mental Health Bill it is

proposed that there will be a single definition of mental disorder with no exceptions or exclusions, so that people can be treated according to their individual needs.

Under the current Mental Health Act 1983 a person cannot be treated as being mentally disordered (for the purposes of the Act) solely on the ground that he is dependent on alcohol or drugs, there must be dual diagnosis of a mental illness. We believe that, in practice, these exemptions have been misunderstood and misapplied. This has meant that some people have not received the compulsory treatment which they need to prevent them from harming themselves or others.

The intention of proposals in the draft Mental Health Bill is that strict conditions will ensure the powers are only used where the nature or degree of mental disorder requires treatment under the care of a mental health consultant; appropriate treatment is available for the individual patient and there is a risk to self or others that warrants such treatment. This will mean that there is no artificial barrier to people being treated under compulsory powers when this is necessary because the conditions in the Bill are satisfied.

In May 2002 the Department of Health published Dual Diagnosis Good Practice Guide. The guide reaffirms dual diagnosis as a priority for mainstream mental health services and emphasises the need for them to work in partnership with other agencies, such as substance misuse services and drug action teams.

General Practitioners (Chorley)

Mr. Hoyle: To ask the Secretary of State for Health how many general practitioners surgeries there are in Chorley. [151282]

Miss Melanie Johnson: This information is not held centrally in the format required.

The primary care trust reports that in Chorley town centre there are seven general practitioner practices, of which four own the premises and three are in one health centre.

In the Borough Council of Chorley there are 17 practices, of which 13 own their premises and four are in two health centres.

Health Forums

Dr. Tonge: To ask the Secretary of State for Health how many patient and public involvement forums have started monitoring the NHS. [149772]

Ms Rosie Winterton: Of the 572 patients' forums in England, 549 are operational. During December and the early part of January the majority of forums met together for the first time to begin planning their work. During January and February, most of the patients' forums will have their first meeting in public. All forums, even those not operational due to vacancies, are gathering information about their local health services, making contact with the National Health Service, and talking to their communities.

Mental Health

Mrs. Helen Clark: To ask the Secretary of State for Health what research has been *(a)* commissioned and *(b)* evaluated on the use of criminal guardianship powers in the Mental Health Act 1983. [149799]

Ms Rosie Winterton: I am not aware of any research that has been commissioned on the use of the guardianship powers given to courts under Section 37 of the Mental Health Act 1983.

Mr. Drew: To ask the Secretary of State for Health what plans he has to extend the use of triage in mental health provision. [151790]

Ms Rosie Winterton: A number of initiatives are being put in place to improve emergency assessment and treatment of people with mental health problems.

In line with the commitments outlined in the NHS Plan, crisis resolution services are being developed to provide intensive support for people in mental health crisis in their own home. Crisis resolution services are designed to provide prompt and effective home treatment, including medication, in order to prevent hospital admissions and give support to informal carers.

In addition, almost 500 Gateway workers will be in place by the end of the year to help people in mental health crises access appropriate services in the community.

People with mental health problems are also able to use the NHS Direct to get first-level advice and referral on to specialised helplines or to local services.

National Treatment Agency

Mr. Drew: To ask the Secretary of State for Health if he will make a statement on the current budgetary situation facing the National Treatment Agency, with particular reference to the South-West Region. [151789]

Miss Melanie Johnson: From an overall pooled drug treatment budget of £236.1 million in 2003-04, the South West received a total of £18.19 million. This was an average increase of 17.40 per cent., on the previous year. The National Treatment Agency (NTA) has responsibility for monitoring the spend of this resource.

In addition the NTA employ a team of four staff within the Government Office for the South West to support the development of drug treatment at local level. Nationally the NTA were allocated £5.5 million running costs in 2003-04 for their central and regional structure. The proportion of this allocated to the South West has not been disaggregated.

NHS Dentists

Mrs. Brooke: To ask the Secretary of State for Health whether NHS dentists are required to issue a warning to patients before their names are removed from the national database of NHS patients; and what guidance he gives on the removal of names. [150068]

Ms Rosie Winterton *[holding answer 22 January 2004]:* National health service patients are registered with a dentist under a continuing care (adults) or capitation (children) arrangement with a dentist for the provision of general dental services, which lapses after

15 months. The arrangement can be extended at any time during the 15 months, usually at the regular check up.

If the dentist does not agree to the extension of the arrangement, he/she must give notice in writing to the patient not later than three months before the date the arrangement is due to elapse and use his/her best endeavours to complete treatment before that date.

Where a dentist wishes to terminate an arrangement, he/she must give three months' notice to the patient. The relevant primary care trust can give permission for the arrangement to be terminated with less than three months notice, having given the patient an opportunity to make representations.

NHS Direct (Lancashire)

Mrs. Humble: To ask the Secretary of State for Health how many calls have been made to NHS Direct from *(a)* the constituency of Blackpool North and Fleetwood and *(b)* Lancashire. [150660]

Miss Melanie Johnson: NHS Direct North West Coast covers the constituencies of Blackpool North and Fleetwood, and Lancashire. The statistics collated by NHS Direct North West Coast for the last six months—1 July to 31 December 2003—broken down by constituency, are shown in the table.

Constituency	*Number of calls*
Blackburn	31,632
Blackpool	6,343
Burnley	4,473
Chorley	1,151
Darwen	4,096
Hyndburn	7,487
Lancaster and Wyre	4,181
Morecambe and Lunesdale	1,321
Preston	18,289
Ribble Valley	1,120
Total	80,093

Premature Babies

Mrs. Iris Robinson: To ask the Secretary of State for Health how much funding was provided to the premature baby charity, BLISS, in each of the last five years. [150738]

Dr. Ladyman: BLISS applied for funding from the Department in one of the past five years. The Department was pleased to be able to support them, with funding of £30,000 in 2003–04. In addition, we are looking to provide funding in 2004–05 for the production of guidance on the special care of pre-term babies.

Residential Care (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health if he will make a statement on funding of independent residential care providers in Lancashire; and how many beds there are in *(a)* Lancashire and *(b)* Chorley. [151280]

Dr. Ladyman: There have been substantial increases in the level of funding provided for social services in recent years. Local councils can use these extra resources to increase local provision or to rebalance the care home market and increase fee levels if that is what is needed, taking account of local circumstances and priorities.

The following table shows the number of care home places by type of accommodation available in Lancashire as at 31 March 2001. Figures for Chorley are not available.

Figures for later years have been collected by the National Care Standards Commission, but comparable details broken down by local authority are not available.

Number of care home places in Lancashire[1] by type of accommodation as at 31 March 2001

Residential homes	*Number*
Local Authority staffed	2,345
Private[2]	11,065
Voluntary[2]	1,035
Small[3]	590
Nursing homes	
Independent	7,323

[1] For residential care Lancashire has been interpreted as Lancashire, Blackburn with Darwen and Blackpool Local Authorities. For nursing care it has been defined as south, east and northwest Lancashire and Morecambe Bay Health Authorities.
[2] Includes dual registered homes.
[3] Independent registered care homes with less than four places.
Source:
RA and RH(N) form A.

Waiting Times

Mr. Hancock: To ask the Secretary of State for Health what the average waiting time for a scan for patients with a suspected stroke was in each of the last three years for which there are records. [150211]

Dr. Ladyman: This information is not collected centrally. The national service framework for older people targeted in this area is to achieve a computed tomography or magnetic resonance imaging scan in less than 48 hours. The summary report of the 2001–02 National Sentinel Stroke Audit reported that more patients than ever had brain imaging, with at least 83 per cent. meeting that target.

WALES

Bovine TB

Mr. Wiggin: To ask the Secretary of State for Wales how much bovine TB compensation has been paid in Wales. [150330]

Mr. Touhig: Statutory responsibility to pay farmers compensation at market value for cattle slaughtered under TB control policies is made by the National Assembly for Wales. Compensation is paid to farmers in Wales at 100 per cent. of market value as specified by the Brucellosis and Tuberculosis (England and Wales) Compensation (Amendment) Order 1996.

Between 1999 and 2003 the Assembly paid £12,939,000 by way of compensation to Welsh farmers.

EU Funding

Mr. Llwyd: To ask the Secretary of State for Wales what representations he has made to the Chancellor of the Exchequer regarding match-funding for Objective 1 projects in Wales in each of the past 15 months. [150652]

Mr. Hain: I have regular discussions with Treasury on a wide range of subjects.

The Government won Objective 1 status for West Wales and the Valleys and is providing public expenditure cover outside of Barnett for the Assembly's receipts under the Structural Funds.

It is for the Assembly to take its own spending decisions but this arrangement ensures that the Assembly can make match funding available, for that portion of match funding which it will be providing.

Mr. Llwyd: To ask the Secretary of State for Wales when he last met the First Secretary to discuss the funding of Objective 1 projects. [150014]

Mr. Hain: I have regular discussions with the First Minister on a wide range of subjects.

As at 31 December 2003, the Objective 1 Programme has committed more than £680 million of grant to more than 1,000 projects, representing a total project investment of nearly £1.65 billion. To date, projects have reported the creation of some 22,000 gross new jobs and more than 30,000 jobs have been safeguarded.

WORK AND PENSIONS

Disability Living Allowance

Mr. Llwyd: To ask the Secretary of State for Work and Pensions how many appeals against refusal to grant the *(a)* care and *(b)* mobility component of the Disability Living Allowance were made in each year since 2000; how many were allowed in each year; and if he will make a statement. [150022]

Maria Eagle: This is a matter for Christina Townsend Chief Executive of the Appeals Service. She will reply to the hon. Member.

Letter from Christina Townsend to Mr. Elfyn Llwyd, dated 29 January 2004:

The Secretary of State has asked me to reply to your question regarding the number of appeals against refusal to grant the *(a)* care and *(b)* mobility component of the disability living allowance were made in each year since 2000 and how many were allowed in each year.

The attached tables show the figures for the years 2000—2003.

I hope this reply is helpful.

As at August	*Disability Living Allowance 'on benefit' load*
2000	2,160,300
2001	2,271,100
2002	2,358,800
2003	2,526,700

Notes:
Figure is rounded to the nearest hundred.
Based on a 5 per cent. sample.
Source:
IAD Information Centre, 5% sample.

Disability Living Allowance Appeals with issues relating to care/mobility lodged at a first tier agency, received by the Appeals Service, cleared at hearing and found in favour of the appellant at hearing: 2000 to 2003

	Lodged	*Received*	*Cleared*	*Found in favour*	*Percentage found in favour*
2000	78,490	77,940	51,925	25,360	48.8
2001	67,670	71,920	71,755	37,020	51.6
2002	63,405	66,415	59,575	31,840	53.4
2003*	52,905	62,395	52,900	27,560	52.1

Disability Living Allowance Appeals with issues relating to care lodged at a first tier agency, received by the Appeals Service, cleared at hearing and found in favour of the appellant at hearing: 2000 to 2003

	Lodged	*Received*	*Cleared*	*Found in favour*	*Percentage found in favour*
2000	10,140	10,125	6,540	3,560	54.4
2001	8,555	8,970	8,535	5,030	58.9
2002	9,795	9,885	8,070	4,815	59.7
2003*	7,675	9,225	7,860	4,640	59.0

Disability Living Allowance Appeals with issues relating to mobility lodged at a first tier agency, received by the Appeals Service, cleared at hearing and found in favour of the appellant at hearing: 2000 to 2003

	Lodged	*Received*	*Cleared*	*Found in favour*	*Percentage found in favour*
2000	5,335	5,370	3,355	1,520	45.3
2001	4,540	4,645	4,625	2,345	50.7
2002	4,480	4,695	4,055	2,195	54.1
2003*	3,190	3,875	3,450	1,780	51.6

* Information for January to November 2003 only.
Received appeals in any given month may have been lodged in a previous month. Therefore the number of appeals received could exceed the number of lodgements.
Notes:
All figures are subject to change as more up to date data becomes available.
Figures for the latest months may rise significantly as information feeds through to the Appeals Service.
Figures are rounded to the nearest five and percentages to one decimal place.

IAD Information Centre, 100 per cent. sample.

Incapacity Benefit

Chris Ruane: To ask the Secretary of State for Work and Pensions what the waiting times are for the processing of IB50 applications in each constituency in Wales. [149717]

Maria Eagle: The information is not available in the format requested.

The IB50 is a self-assessment questionnaire issued to people claiming Incapacity Benefit (IB); once the claimant has completed the IB50, it is forwarded by Jobcentre Plus to SchlumbergerSema to determine whether a Personal Capability Assessment is appropriate.

SchlumbergerSema have two key targets for the provision of medical advice in respect of people claiming IB, which are being consistently met in Wales. They are: for the provision of advice without an examination, an average actual clearance time of four working days from receipt of a referral; for the provision of a written examination report, an average actual clearance of 32 working days from receipt of a referral.

Once the IB50s are returned, Jobcentre Plus have an internal target of 15 days to reach a decision. Information on performance against this target in Wales for 2002–03 is in the following table.

Incapacity Benefit (IB) Medical Test Results Cleared in 15 days in Wales

Percentage

Jobcentre Plus District	*April 2002*	*May 2002*	*June 2002*	*July 2002*	*August 2002*	*September 2002*	*October 2002*

Note:
Jobcentre Plus aims to clear all IB medical test results within 15 days. The planning assumption for business delivery is that this target will be met in 98 per cent. of cases

Source:
DWP Management Information Data

Learning Disabilities

Mrs. Dean: To ask the Secretary of State for Work and Pensions what training is given to staff to enable them to understand the needs of clients with learning disabilities. [151305]

Maria Eagle: There is an on-going programme of training for all staff in the Disability and Carers Service, which includes a one-day module on Disability Awareness encompassing a range of disability issues, together with two specialist one-day modules for Decision Makers covering Mental Health and Learning Disability issues. There is a commitment to review the scope of the Programme with a view to extending the specialist modules for Decision Makers to other impairments in due course.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Abandoned Vehicles

Mr. Evans: To ask the Secretary of State for Environment, Food and Rural Affairs how many abandoned vehicles were collected in the Ribble Valley and Fulwood area in each year since 1997. [149793]

Mr. Morley: The information requested for Ribble Valley borough council is given in the following table.

Financial year	*Number of abandoned vehicles collected*
2000–01	16
2001–02	35

Information on the number of vehicles abandoned was collected for the first time in the 2000–01 Municipal Waste Management Survey. 2001–02 is the most recent year for which data are available from the survey.

Badgers

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 20 November 2003, *Official Report*, column 1200W, how far in terms of linear distance badger culling extended from the buildings in reactive areas which housed cattle which were reported as TB reactors. [150489]

Mr. Bradshaw: Reactive culling attempted to remove badger social groups whose territories impinged on those parts of cattle premises where infected reactor cattle were housed or grazed, or from which their forage had been harvested. The extent of such removal operations varied depending on the outcome of badger activity surveys and local badger density. On average culling areas extended about 1 km around implicated land/buildings and was in the order of 5 km^2.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what factors determine the placing of badger traps in order to maximise the success of badger culling operations within the context of the Krebs trials; where traps have had to be repositioned to more discrete locations as a result of interference; whether that has required their positioning in sub-optimal locations; and what effect that has had on the conduct and the success of the culling operations. [150493]

Mr. Bradshaw: Standard operating procedures for the Krebs Trial as ratified by the Independent Scientific Group advise on number and location for trap sites; saturation trapping on setts being the preferred procedure. Traps are located at other sites where consistent anti-Trial interference or denial of consent renders trapping at sites impossible. The impact of varying trap locations is unknown.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the best estimate is of the additional cost to public funds of the *(a)* interference with and *(b)* theft of badger traps in the Krebs trials. [150494]

Mr. Bradshaw: Management records indicate that 6239 traps have been damaged during the Krebs Trial. A further 1926 have been recorded as stolen/lost, but a proportion of these have subsequently been recovered. The current replacement value of a badger trap is approximately £50.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 210W, on badgers, what measures can be taken to reduce the risk to badger cubs inhabiting the same sett as an infectious female suckling badger from infection from *M. bovis* bacilli. [150548]

Mr. Bradshaw: Practical measures that could be used to prevent the possibility of an infectious lactating female from infecting her cubs have not yet been identified.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 210W, what her estimate is of the typical proportion of badger faeces and urine deposited in latrines from a given social group; what proportion is distributed more generally over grassland; and what risk of *M. bovis* infection these deposits present to grazing cattle. [150550]

Mr. Bradshaw: Work carried out by Bristol University suggests that the proportion of faeces and urine deposited at latrines vary with badger density. The proportion of latrines located in different habitats is the subject of current research at the Central Science Laboratory, the results of which will be published in due course.

The majority of cattle actively avoid eating grass contaminated with badger faeces but tend not to select against grass contaminated with badger urine. Since most faeces tend to be deposited in latrines, which are often large and obvious, while urinations tend to trail onto pasture, infected badger urine at pasture might pose a greater transmission risk than infected faeces. However, there is likely to be some risk of onward transmission wherever either infectious faeces or urine are present on land grazed by cattle.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 10 December 2003, *Official Report*, column 522W, on badgers, what evidence there is that viable *M. bovis* bacilli remaining in badger setts following the culling of infected denizens can transmit the disease to healthy badgers which subsequently colonise those setts. [150567]

Mr. Bradshaw: *M. bovis* survival is promoted by low levels of sunlight, low to moderate temperatures and high relative humidity. A typical badger sett experiences 100 per cent. relative humidity at all times of year, a fairly constant temperature, which is always higher than ambient temperature and almost total darkness. Hence, although no quantitative studies have been carried out, it seems possible that *M. bovis* bacilli could remain viable in badger setts long enough to infect badgers during recolonisation.

For comparison, *M. bovis* has survived in manure for up to two years when buried at 5 cm deep, and for one year when buried 1 cm deep. On pasture, *M. bovis* has survived for five to 11 months.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the proportion of cubs born to infectious sow badgers which themselves go on to develop TB with the potential to spread to other animals; and what assessment she has made of whether this poses a significant threat to *(a)* other badgers and *(b)* cattle. [150578]

Mr. Bradshaw: Transmission of infection between infectious females and their offspring is thought to be an important process in the dynamics of TB in badger populations. The Central Science Laboratory's Woodchester Park study has shown that there is a significant statistical relationship between the number of infected cubs in a social group and the presence of an infectious female. However, no assessment has been made of the proportion of cubs born to infectious females which themselves go on to become infectious.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 217W, what warnings were given by her officials to farmers who were asked to volunteer for participation in the Krebs trials about *(a)* the risks involved in participation and *(b)* the consequences of failure of all or any part of the trials. [150582]

Mr. Bradshaw: The signing up of landowners agreeing to voluntary participation in the trial was carried out according to a Standard Operation Procedure ratified by the Independent Scientific Group on Cattle TB. Information on the Government's TB strategy and on the Culling Trial in particular was available in the form of fact sheets, website pages and reports from the Krebs and Bourne Groups. The basis for the Randomised Badger Culling Trial was well documented and communicated to participants by trained staff at the time of their voluntary agreement. Questions that could not be answered at the time on the basis of the briefing available were responded to subsequently in writing or by telephone.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs in cases where badgers have been translocated from the Krebs areas, whether her Department was informed of such translocations; and whether landowners were informed. [150584]

Mr. Bradshaw: We are unaware that any such translocations of badgers from the Randomised Badger Culling Trial areas have taken place.

Bird Conservation

Mr. Jim Cunningham: To ask the Secretary of State for Environment, Food and Rural Affairs what discussions she has had with her EU counterparts concerning measures to stem the decline of bird numbers in the regions of most intensive agriculture. [149829]

Mr. Bradshaw *[holding answer 26 January 2004]:* Discussions regularly cover a large range of issues concerning the environmental impact of agriculture. Information is shared between administrations as necessary. However, I can assure you that the Government have recognised the seriousness of the decline in farmland birds and has adopted a target to reverse this long-term decline by 2020. Latest statistics show that the index is stabilising.

I am attending an international conference organised by the British Ornithological Union in March, which will be discussing this issue in detail.

Bovine TB

Mr. Greg Knight: To ask the Secretary of State for Environment, Food and Rural Affairs what steps her Department is taking to prevent the spread of bovine TB to East Yorkshire; and if she will make a statement. [150328]

Mr. Bradshaw: There have been no confirmed outbreaks of bovine tuberculosis in East Yorkshire since before January 1996. There are currently no farms under TB restrictions.

Defra is shortly to launch a public consultation on a new TB Strategy for England, which will include proposals for a range of potential measures for introduction in the short-term. These are designed to halt the geographical spread of the disease, and include pre and post-movement testing of cattle and a review of local testing frequencies. One of the major concerns of the consultation is to reduce the risk of spreading TB from areas of high incidence to areas with little or no disease.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to standardise the collation of data on bovine TB in a format which allows for a comparison with the Office International des Epizootics figures for incidence of TB; what she estimates the costs of so doing would be; and what assessment she has made of the merits of so doing. [150510]

Mr. Bradshaw: Bovine TB is a regional problem with a higher incidence of disease in the South West of Great Britain and in Northern Ireland. Defra publishes the incidence of TB in Great Britain on a regional basis, to demonstrate the regional distribution of incidents. The OIE requires a composite annual report for the whole of the United Kingdom. The composite report indicates the average incidence of TB in the UK; but does not demonstrate the localised incidence within the regions. The composite report which is provided each year, as required for the OIE, is derived by amalgamating the regional reports for GB and Northern Ireland, therefore there would be no cost benefit in providing only a UK report and the true regional incidence of the disease would remain unclear.

In Great Britain there is an obligation under Council Directive 64/432/EEC and other Directives to provide the European Commission with herd and animal incidence figures for bovine TB every year in the prescribed format.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to the answer of 8 December 2003, *Official Report*, column 210W, what the presumptive infective dose

range of *M. bovis* is in respect of cattle; and whether some badgers suffering from bovine TB are capable of excreting sufficient numbers of *M. bovis* bacilli to constitute such an infective dose. [150526]

Mr. Bradshaw: Determination of the minimum infectious dose of *Mycobacterium bovis* in cattle is part of the TB pathogenesis research programme. Early indications are that the minimum infectious dose for cattle via the respiratory tract is relatively small; the lowest infectious dose recorded so far is 70 colony forming units (CPU) when introduced by the intracheal route or 9,600 CPU by the intranasal route.

Relatively high levels of *M. bovis* in the urine of badgers with renal TB have been identified. Bacterial loads of up to 300,000 CPU per millilitre of urine have been measured. This suggests that inhalation of as little as 0.03 ml of the urine could result in infection.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 217W, what plans she has to extend the restrictions on the sale of milk from farms under TB restrictions. [150549]

Miss Melanie Johnson: I have been asked to reply.

The new European Union consolidated Food Hygiene Regulation, which is expected to come into force in January 2006, will not permit the sale of milk from reactor animals for human consumption—including milk that has been heat treated.

Civil Service (Disabled People)

Mr. Goodman: To ask the Secretary of State for Environment, Food and Rural Affairs if she will set out the number of employees in her Department who have a disability, broken down by disability type. [148986]

Alun Michael: The number of staff who have informed or declared a disability and listed by type of disabilities are as follows. The types of disabilities are greater than the number of staff declaring a disability as some staff have declared more than one:

Disability	*Number of staff*
Angina	—
Asthma	60
Continence	6
Diabetes	27
Dyslexia	20
Epilepsy	15
Eyesight	35
Hearing	61
Lifting/carrying/moving everyday objects	36
Manual dexterity	38
Memory or ability to concentrate, learn or understand	11
Mental illness	19
Mobility	39
Other	131
Perception of the risk of physical danger	—
Physical co-ordination	16
Severe disfigurement	10
Speech	5
Total disabilities	535
Total staff	392

Figures less than five have been suppressed for reasons of confidentiality. Statistics on the disability profile of the civil service as a whole from April 2003 show that 3.6 per cent. of the civil service overall had a declared disability (1.7 per cent. in the SCS). Corporate data on disability by disability type is not published. Further data can be found on www.civil-service.gov.uk/statistics. The civil service anonymous Diversity Survey (2001) showed that 15 per cent. of respondents were declaring a disability or long-standing illness against a declared level of 4 per cent. staff with a disability. This could show that disabled staff are more likely to take part in the survey, or that many people who consider themselves to be disabled or have a long standing illness have not declared this to their employer. This level of disability is consistent with the Spring 2003 Labour Force Survey which reported a level of 12.9 per cent. disability in the economically active population.

Cabinet Office set up a Disability Working Group in January 2003 to look at disability collection issues, monitoring and non-declaration. Defra are represented on this group. The group has recently completed a consultation exercise—the outcome of which will be made available in due course.

Common Agricultural Policy

Mr. Bercow: To ask the Secretary of State for Environment, Food and Rural Affairs what cuts in trade distorting support and export subsidies will result from the reforms of the common agricultural policy agreed at the Agriculture Council of the EU in June 2003. [149108]

Alun Michael: The CAP reform agreement will substantially reduce trade distorting support as a result of the decoupling of direct payments. There is a degree of national discretion over the extent of decoupling but we anticipate that EU Blue Box support (defined as subsidies deemed less trade-distorting because they are linked to production-limiting programmes such as set-aside, e.g. arable area and livestock headage payments) will fall by at least two-thirds. Amber box support (defined as subsidies which significantly distort trade, e.g. support prices) is estimated to fall by a modest amount due to reductions in support prices and declines in production as a result of decoupling. However, amber box subsidies have already been falling substantially due to the previous Agenda 2000 reforms.

Both decoupling and reductions in support prices will reduce export subsidies, but the precise impact will depend on future conditions on world markets and on the exchange rate.

Dairy Farming

Mr. Hoyle: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the future economic viability of dairy farming in Lancashire. [149937]

Alun Michael: The Government understand the problems that low farmgate prices for milk have caused farmers in Lancashire and in the rest of the UK, and the challenges the dairy sector will face adjusting to the new conditions that will be created by a reformed CAP. While the Government recognise these difficulties, they

also believes that the UK dairy sector has a sustainable future and, in line with their "Strategy for Sustainable Farming and Food", will work alongside the industry to facilitate and support its development. The UK has a comparative advantage in terms of climate, farm efficiency and size over many of its competitors. If the dairy supply chain can work together to maximise this potential and address some of the difficulties it faces, then there is no reason why it should not succeed.

Sir Nicholas Winterton: To ask the Secretary of State for Environment, Food and Rural Affairs what the average income of dairy farmers in the United Kingdom was in each of the last 10 years for which figures are available. [148696]

Alun Michael: The average net farm income for dairy farmers in the UK is shown in the table. Net farm income is defined as the return to the principal farmer and spouse for their manual and managerial labour and on the tenant type capital of the business.

Forecast of dairy incomes in England for the year ending February 2004 will be published on 29 January 2004.

Net income per farm

£

	Current	*In real terms at 2002–03 prices*
1991–92	19,900	26,200
1992–93	27,000	34,500
1993–94	31,100	39,000
1994–95	27,200	33,200
1995–96	33,900	40,000
1996–97	28,000	32,300
1997–98	18,100	20,200
1998–99	10,700	11,600
1999–2000	9,000	9,700
2000–01	13,900	14,400
2001–02	27,900	28,400
2002–03	12,300	12,300

Source:
Farm Business Surveys

Farm Incomes

Mr. Llwyd: To ask the Secretary of State for Environment, Food and Rural Affairs what the latest figure for the average annual income of hill farmers in England and Wales is. [150058]

Alun Michael: The average net farm income in 2002–03 for hill farmers in England was £17,960. Net farm income is defined as the return to the principal farmer and spouse for their manual and managerial labour and on the tenant type capital of the business.

Welsh data are a matter for the National Assembly for Wales.

Farming Policy

Mr. Jim Cunningham: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on Government policy on the place of *(a)* environmental protection, *(b)* protection of wildlife and *(c)* animal welfare in UK farming policy. [149830]

Alun Michael: The Government are committed to help develop a farming industry which is environmentally, socially and economically sustainable. The Government's Strategy for Sustainable Farming and Food (SFFS), published in December 2002 sets out how the Government will work with the whole of the food chain to secure a sustainable future for English farming and food industries, as viable industries contributing to a better environment and healthy and prosperous communities.

One of the strategy's key aims is to protect the environment and reward farmers for providing environmental goods. Last year's agreement on CAP reform will help further this objective by removing an incentive to overproduce. In addition, the cross compliance measures to be introduced as part of the agreement will help farmers to reduce damaging environmental impacts by making farm subsidies dependent on meeting good agricultural and environmental conditions. The CAP reform deal also provided for the switching of support from production subsidies to environmental and rural development schemes. In England, we have been running a pilot Entry Level Scheme designed to link key elements of good environmental management across a wider area than the current schemes. Provided that the pilot is successful, the scheme will be made available across England during 2005.

Defra is also carrying out a strategic review of options to reduce diffuse water pollution from agriculture, and will be consulting further on this in the near future.

The Wildlife and Countryside Act 1981 (as amended by the Countryside and Rights of Way Act 2000) provides protection for wildlife and their habitats and sets out comprehensive statutory protection for all species and habitats. All wild birds are afforded statutory protection under the 1981 Act, which fulfils our obligations under the EC Wild Birds Directive. Certain animals and plants are also protected under the 1981 Act. In addition to the protection given to certain animals by the 1981 Act, further protection is also granted to certain species via the Habitats Regulations 1994.

Furthermore, England's Biodiversity Strategy builds on the foundations already laid in conserving habitats and species and aims to go further by ensuring that the implications for wildlife as a whole are considered an integral part of agriculture policy. The strategy encourages the management of farming and agricultural land so as to conserve and enhance biodiversity as part of SFFS.

Also as part of the SFFS, an outline Animal Health and Welfare Strategy for Great Britain was published for consultation in July 2003. The strategy sets out the direction for animal health and welfare related policy over the next 10 years. It aims to improve the health and welfare of kept animal, and protect public health from animal disease. The strategy is underpinned by the principle of partnership between government and all those involved in and affected by animal health and welfare. It sets out the factors that will help inform Government decisions and the rationale for

Government intervention in animal health and welfare including the need to protect and promote the welfare of animals.

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the difference is in *(a)* species and *(b)* size of fish caught between paired trawling and single vessel towing. [150296]

Mr. Bradshaw: In 2003 fishing vessels using single trawl gears caught a much wider range of species than those using pair trawl gears. While both single and pair trawlers caught predominantly more pelagic species, a greater proportion of landings by pair trawlers comprised pelagic species than by single trawlers.

Information on fish sizes is collected for marketing purposes. However since this is recorded as size bands which differ between species, and because the grading of fish is often not recorded, it is not possible given the data available to determine how the size of fish caught differs between the two fishing methods.

Relative percentages of the main species caught by UK fishing vessels using single and pair trawl gears (excluding nephrops gear) in 2003

	Percentage of landings by volume	
Species	*Pair trawls*	*Single trawls*
Mackerel	53	28
Herring	15	17
Haddock	7	6
Blue Whiting	5	11
Sprats	4	1
Pilchards	3	1
Horse Mackerel	3	1
Saithe	3	2
Cod	2	5
Whiting	1	1
Plaice	1	4
Nephrops	1	4
Others	2	19

Foot and Mouth

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs at what level in her Department the decision is made to pursue through the criminal courts the prosecution of persons or companies alleged to have committed or suspected of fraudulent activity in matters within the jurisdiction or responsibility of her Department; and whether such decisions are confirmed or reviewed by her or any member of her ministerial team. [150560]

Alun Michael: Decisions to prosecute for fraudulent activity are made in accordance with the Code for Crown Prosecutors (4th Edition) (2000) by prosecution lawyers in the Criminal Advisory and Prosecution Division of the Legal Services Directorate General of the Department. The lawyers are bound by Code for Crown Prosecutors (4th Edition) (2000) and their task is firstly to determine whether there is sufficient evidence to provide a "realistic prospect of conviction" and only then, if there is a realistic prospect of conviction, whether a prosecution is in the public interest.

Such decisions are not confirmed or reviewed by any Ministers although quite properly Ministers are informed of certain high-profile cases and may make representations to the prosecutor.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what criteria are applied by her Department in determining whether to pursue through the criminal courts the prosecution of persons or companies alleged to have committed or suspected of fraudulent activity in matters within the jurisdiction or responsibility of her Department. [150562]

Alun Michael: Decisions to prosecute for fraudulent activity in matters within the jurisdiction or responsibility of the Department are made in accordance with the Code for Crown Prosecutors (4th Edition 2000) by prosecution lawyers in the Criminal Advisory and Prosecution Division of the Legal Services Directorate General of the Department.

The lawyers are bound by Code for Crown Prosecutors (4th Edition) (2000) and their task is firstly to determine whether there is sufficient evidence to provide a "realistic prospect of conviction" and then, only if there is a realistic prospect of conviction, whether a prosecution is in the public interest. In their overall assessment of the public interest in prosecuting such cases, the lawyers take into account all relevant circumstances relating to the commission of the offence including those set out in paragraphs 6.5 (c) to (e) of the Code and the personal circumstances of the offender including those set out in paragraph 6.5 (f) to (h) of the Code.

Information Technology

Mr. Allan: To ask the Secretary of State for Environment, Food and Rural Affairs what audit mechanisms are in place to determine whether information technology *(a)* hardware and *(b)* software products are being used properly in her Department. [150930]

Alun Michael: A considerable amount of work is going on in Defra to improve our IT facilities and systems. We are also seeking to improve usage and exploitation of the capacity of the Department's systems in the interests of efficiency and service delivery. It is against that background that the variety of audit mechanisms need to be understood. They are:

1. Departmental audit:

The IT Audit Branch of the Department's own Internal Audit Division conducts a continuous programme of audit assignments (approximately 15–20 per year) in order to provide an assurance concerning the management of our IT systems' (hardware and software) lifecycle—specification, procurement, development, implementation, operations and decommissioning. The scope of audit assignments included in the programme is determined using a risk-based approach and ranges from in-depth examination of single projects or operational systems, to "horizontal" reviews of management processes which can be expected to apply reasonably consistently across projects or systems—for example, software licensing, infrastructure change management, IT governance.

Internal audits contribute to an assurance that hardware and software products are being used properly within the Department, in the sense that projects/systems contribute effectively and efficiently to the achievement of Departmental objectives, are compliant with legal and regulatory requirements,

apply mandated or claimed standards and acknowledged best practice, and are appropriately economical in the use of funds and other resources.

The Department's Security Branch conducts a rolling programme of IT security audits focusing on compliance with Departmental IT Security policies throughout the Defra estate. It also co-ordinates the implementation of BS7799—the British Standard for the Management of Information Security. Internal Audit Division is responsible for independent review of achievement of compliance with this standard.

2. Other internal tools and mechanisms:

There are IT-supported administrative systems in place to assist with the identification and management of IT assets (hardware and software).

A fixed asset inventory is maintained on the Department's Resource Accounting and Management Information System (RAMIS) and holds details of fixed assets valued at £2,000 or more, including IT assets.

The e-Business Directorate holds information about the software installed on our Office Systems network as well as about major server and application development software, and ensures that the correct number of software licences is held. An IT inventory management application is used to identify hardware on Defra's Local Area Networks.

"Audit Logs" recording information concerning users' access to and activity on the Department's IT systems are automatically specified and implemented for all significant IT systems. These are generally for the benefit of system owners in day-to-day management of the system, but may sometimes be used by Internal Audit to examine for signs of improper use of the systems.

3. External audit bodies and mechanisms:

External audit bodies which may examine IT management functions include reviews by NAO, and by EU Audit (where the system/function in question is involved in administration of EU-funded schemes). As with internal audit, external audits of administrative functions may also touch upon IT management issues and may prompt internal audit follow up.

All new major IT-enabled business change programmes within Defra are subject to OGC Gateway Reviews and Health Checks, which examine and report on the management of Programmes, and can also be regarded as a form of external audit.

Ivory

Mr. Banks: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make it her policy to ban the import of all ivory products; and if she will make a statement. [150962]

Mr. Morley *[holding answer 28 January 2004]:* The EU CITES Regulations, which implement the Convention on International Trade in Endangered Species (CITES) in the European Union, already prohibit trade in products made from wild-taken elephant and narwhal ivory.

Powers are also available:

(a) to control trade in all other ivory products, including pre-convention and antique specimens, by means of a permitting system; and

(b) to suspend the issue of such permits where we consider, on the basis of scientific advice, that the trade would be detrimental to the conservation of the species in the wild.

Mr. Tony: To ask the Secretary of State for Trade and Industry what estimate she has made of imports of mammoth ivory products in each of the last five years. [150960]

Mr. Mike O'Brien *[holding answer 28 January 2004]:* Under the system of classification used by HM Customs and Excise for categorising UK trade in goods it is not possible to distinguish between mammoth ivory and other ivory. The value of UK imports of ivory were as follows:

	£000
1998	20.6
1999	62.7
2000	0.7
2001	0.1
2002	2.7
Jan-Nov 2003	63.5

Note:
Ivory is defined by commodity codes 0507 1000 (unworked) and 9601 1000 (worked) of the Combined Nomenclature.

Lead Content

Mr. Desmond Swayne: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 14 January, *Official Report*, column 737W, on lead content, what assessment she has made of the implications for the *(a)* treatment of cathode ray tubes as hazardous waste and *(b)* the cost of their disposal of the readiness with which the lead content leaches. [149452]

Mr. Morley: The draft study being finalised for Defra, referred to in my earlier answer, shows that the lead oxide paste which welds the face plate of a cathode ray tube to its funnel, is prone to leach. Lead bound up within the glass of the cathode ray tube does not leach very readily. Research conducted by the Defra sponsored Market Transformation Programme estimates the cost of disposal for an average television set, after it has been deposited at a public waste disposal facility, to be in the region often pounds.

Medicines/Pharmaceuticals

Ian Lucas: To ask the Secretary of State for Environment, Food and Rural Affairs how many investigations the Environment Agency has undertaken in respect of sites licensed by the Drugs Inspectorate for disposal of medicines and pharmaceuticals. [150437]

Mr. Morley: The disposal of medicines is not licensed as such by the Home Office Drugs Inspectorate. However, the storage of controlled drugs at any site is subject to a Home Office Drugs Inspectorate licence.

The Environment Agency authorises processes for the destruction of wastes such as controlled drugs for disposal. It regularly inspects sites for conformity with the requirements of the authorisation, and investigations may be carried out where breaches of authorisations or other environmental legislation are believed to have taken place, and evidence may be sought in relation to enforcement action. One such major investigation has been carried out.

Additionally, other investigations may relate to technical matters, such as reasons for plant malfunctions, and are carried out as necessary in accordance with the Agency's inspection programmes.

Recycling

Sarah Teather: To ask the Secretary of State for Environment, Food and Rural Affairs what

recommendations she has made to local authorities for recycling levels of *(a)* domestic refuse, *(b)* commercial refuse and *(c)* industrial refuse. [149957]

Mr. Morley: The Government have set statutory performance standards for local authorities in 2003–04 and 2005–06 for the recycling and composting of household waste. The targets are based on the amount of household waste recycled and composted in 1998–99 and require each authority, on average, to double its recycling and composting rate by 2003–04, and triple it by 2005–06.

Local authorities are not required by law to collect commercial and industrial waste but can do so if asked to by an occupier of premises in their area. The occupier is required to pay the local authority for this service. There is no obligation placed upon local authorities to recycle this waste and, if they do, it will not contribute to their statutory performance standards, which only cover household waste.

Commercial and industrial waste collected by local authorities does, however, fall within the definition of municipal waste and is therefore subject to the Landfill Directive requirements to reduce biodegradable municipal waste going to landfill. All waste disposed of in landfill site is also subject to the Landfill Tax. Both the announced increases in the Landfill Tax to raise it to £35 a tonne in the medium to long-term and the introduction of the Landfill Allowance Trading Scheme from 2005, to implement the Landfill Directive requirements, will encourage more recycling.

Sarah Teather: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of *(a)* domestic refuse, *(b)* commercial refuse and *(c)* industrial refuse was recycled in (i) Brent, (ii) London and (iii) England in the last year for which records are available. [149958]

Mr. Morley: The information is as follows:

(a) The most recent year's figures for household waste are found in the Municipal Waste Management Survey for 2001–02.

	Percentage
London borough of Brent	7
London	9.3
England	12.4

(b) and *(c)* The most recent year's figures for commercial waste and for industrial waste are found in the Strategic Waste Management Assessment 2000, published by the Environment Agency, relating to figures for 1998–99. The survey collected data from a sample of 20,000 businesses across England and Wales.

Percentage

	Commercial waste	*Industrial waste*
London borough of Brent	Not collected	Not collected
West London (including Brent)	25.5	29.5
Greater London	30.6	37.6
England	22.5	34

US Vessels (Decommissioning)

Mr. Gummer: To ask the Secretary of State for Environment, Food and Rural Affairs what the status is of the four ships from the US ghost fleet sent to the UK for decommissioning. [150029]

Mr. Morley: The four ships are currently being stored at Hartlepool. Conditions attached to the site's waste management licence prevent any dismantling work on the ships. The site is inspected by the Environment Agency on a fortnightly basis.

Mr. Gummer: To ask the Secretary of State for Environment, Food and Rural Affairs what explanation she has received from *(a)* the US authorities and *(b)* the US Marine Administration on why warnings given by the Environment Agency on (i) 3 October 2003, (ii) 8 October 2003 and (iii) 10 October 2003 that the four ships from the US ghost fleet should not set out for the UK were not heeded. [150032]

Mr. Morley: Discussions with the US authorities and the US Marine Administration which occurred once the vessels had already left the US concentrated on securing the objectives of safety and environmental protection on the vessels. It was considered that temporary storage in Hartlepool best met those objectives. Consequently, no explanation in relation to warnings has been sought or given.

Warm Front

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs how many households she estimates are eligible for assistance from her Department's Warm Front Scheme; and how many households qualify for the Warm Homes Plus element of the programme. [150085]

Mr. Morley: We are preparing estimates of the number of households currently eligible for assistance under Warm Front as part of the next spending round process.

In addition we will be producing an Implementation Plan on the action required to achieve targets and tackle fuel poverty.

TRADE AND INDUSTRY

Boxing Day Trading

Mr. Wyatt: To ask the Secretary of State for Trade and Industry if she will take steps to introduce legislation prohibiting trading on Boxing Day. [149970]

Mr. Sutcliffe *[holding answer 22 January 2004]*: I have no plans to do so.

Employment Directive

Mr. Jim Cunningham: To ask the Secretary of State for Trade and Industry what steps her Department is taking to ensure that the Employment Directive improves the work opportunities of older people from disadvantaged groups. [146429]

Mr. Sutcliffe *[holding answer 12 January 2004]:* We shall bring legislation into force on 1 October 2006 under the Employment Directive outlawing age discrimination in employment and vocational training. Such legislation will improve the work opportunities of older people from all groups. Our consultation on proposals for this legislation ended in October 2003. We shall consult on draft regulations later this year. People who experience discrimination on other grounds will continue to be protected under the relevant current discrimination legislation.

In the meantime the Government encourages employers, through the Code of Practice on Age Diversity in Employment, and the Age Positive campaign, to adopt non-ageist approaches to recruitment, selection, training and development, promotion, redundancy and retirement.

Energy Policy

Mr. Tynan: To ask the Secretary of State for Trade and Industry what the average percentage level of availability was for each *(a)* onshore and *(b)* offshore windfarm in the UK in the last year for which figures are available. [R] [147518]

Mr. Timms: Figures for average levels of availability for individual windfarms are not available for reasons of commercial confidentiality. However the most recent figures available show an average load factor of all UK windfarms as being 29.9 per cent. in 2002.

Separate figures for offshore windfarms are not yet available as UK's first major offshore windfarm at North Hoyle has only been operational since November last year. However, we would expect average load factors to be greater due to the superior offshore wind resource.

Source:
DUKES 2003 available on the DTI website at www.dti.gov.uk/energy/inform/energy-stats/renewables/index.shtml. Data for 2003 will become available in June 2003.

Enterprise Act

Mrs. Curtis-Thomas: To ask the Secretary of State for Trade and Industry what powers were introduced by the Enterprise Act 2002. [148898]

Mr. Sutcliffe: The main provisions of the Enterprise Act 2002 are:

Office of Fair Trading

The Act establishes the OFT on a statutory basis as a corporate body. The Act provides the OFT with a number of new powers, including the following:

power to compel persons to answer questions or otherwise provide information or documents relevant to an investigation;

powers of surveillance, in accordance with the Regulation of Investigatory Powers Act 2000;

power to apply to court for orders disqualifying directors of companies which have committed a breach of competition law;

power to enter premises under a warrant.

Competition Measures

expert, independent, competition bodies take decisions on mergers and markets against a new competition-based test within a more transparent, predictable and accountable framework;

there is a new right of appeal to the Competition Appeals Tribunals in merger and market inquiries;

there are rules for the conduct of the Competition Commission's inquiries allowing for a more transparent remedies-setting phase;

criminal sanctions with a maximum penalty of five years in prison to deter those individuals who dishonestly operate hardcore cartels—agreements to fix prices, share markets, limit production and rig bids;

there are greater opportunities to gain redress for victims of anti-competitive behaviour, consumer bodies who are able to make claims on behalf of individuals who have suffered.

Consumer Protection Measures

the Stop Now Orders regime has been extended to protect consumers from traders who do not meet their legal obligations;

the OFT is able to give formal approval to codes of practice;

consumer bodies are able to make 'super-complaints' to the OFT.

Insolvency Reforms

The Crown's preferential right to recover unpaid taxes ahead of other creditors have been abolished;

reform of corporate insolvency law and a streamlining of administration;

a new Bankruptcy Restrictions Order regime has been introduced;

the financial regime of the Insolvency Service has been modernised.

Estate Agent Ombudsman Scheme

Mr. Martyn Jones: To ask the Secretary of State for Trade and Industry what recent representations she has received on the operation of the Estate Agent Ombudsman scheme; and if she will make a statement. [150881]

Mr. Sutcliffe: None. I expect the OFT to publish its report on estate agents shortly. I will study the recommendations carefully.

Manufacturing Industry

Mr. Hepburn: To ask the Secretary of State for Trade and Industry (1) how many young people in *(a)* the Jarrow constituency, *(b)* South Tyneside, *(c)* the North East and *(d)* the UK have entered the manufacturing industry following school in each year since 1997; [145121]

(2) how many young people in *(a)* the Jarrow constituency, *(b)* South Tyneside, *(c)* the North East and *(d)* the UK have been employed in the manufacturing industry in each year since 1997. [145122]

Ruth Kelly: I have been asked to reply.

The information requested falls within the responsibility of the National statistician. I have asked him to reply.

Letter from J. Pullinger to Mr. Stephen Hepburn, dated 29 January 2004:

The National Statistician has been asked to reply to your recent Parliamentary Questions about young people employed in the manufacturing industry. I am replying in his absence. (145121 and 145122)

The attached table gives estimates of the number of people aged 16 to 24 resident in the United Kingdom and the North East region employed in the manufacturing industry, for the twelve month period ending November of each year from 1997 to 2003.

These estimates are from the Labour Force Survey (LFS). The LFS sample size is too small to give reliable estimates for South Tyneside or the Jarrow Parliamentary Constituency.

Although the LFS can provide some retrospective information, its principal focus is on the current labour market status of people when they are interviewed. No estimates of young people who left school to enter manufacturing industry are available.

As with any sample survey, estimates from the LFS are subject to sampling variability.

Young people[1] employed in the manufacturing industry[2] by area of residence

Thousand

12-month period ending November	*United Kingdom*	*North East*
1997	679	33
1998	654	32
1999	604	29
2000	537	27
2001	530	24
2002	502	22
2003	447	20

[1] People aged 16–24

[2] People whose main job is in Standard Industrial Classification (SIC) 1992 Division D: Manufacturing

Note:

These LFS estimates have not been adjusted to reflect the 2001 Census results.

ONS Labour Force Survey

Ling Dynamics Ltd.

Mr. Heald: To ask the Secretary of State for Trade and Industry when she will reply to the letters of 13 November 2003 and 15 December 2003 from the hon. Member for North-East Hertfordshire on her Department's relationship with Ling Dynamics Ltd. of Royston. [150357]

Nigel Griffiths *[holding answer 26 January 2004]:* Following his letter of 13 November, the hon. Member will recall that I telephoned him to discuss his constituent's concerns. The hon. Member will also recall that, in early 2003, we both met with Mr. Williams to discuss various export control-related issues. We are well aware of the difficulties that Mr. Williams of Ling Dynamics Ltd. has been facing and are doing as much as we can to assist him.

Miners Compensation

Mr. Hepburn: To ask the Secretary of State for Trade and Industry what mechanisms are in place to ensure that miners' compensation claims for respiratory diseases are settled within a reasonable period of time. [149914]

Nigel Griffiths: The Department and our contractors are doing all we can to speed up the process for respiratory disease claims.

The company currently contracted to provide the Medical Assessment Process (MAP), Schlumberger, have recruited 250 respiratory specialists to work on this scheme. This represents 40 per cent. of those available in the UK.

To enable the medical assessments to be converted in to offers, IRISC, the Department's claim handlers, have increased their staff from 160 in November 1999 to around 1,150 at present.

To assist solicitors in turning round these offers, we have re-launched our website—www.coalclaims.com—where-solicitors are able to send in forms electronically and agree aspects of the claim online, particularly employment histories. Solicitors can also identify from the website their highest priority claims so they can better target their efforts on those cases that are most important.

The Department has received nearly 400,000 claims so far. We have made some 167,000 individual payments and settled 110,000 claims, totalling £959 million.

Note:

The Handling Agreement was approved by the judges concerned who still preside over the process of paying out the compensation. The Department and the claimants' solicitors are required to report back to the judge on progress three to four times a year. The next hearing is 3 February 2004.

Minimum Wage

Mr. Hoyle: To ask the Secretary of State for Trade and Industry how many people in *(a)* Lancashire and *(b)* Chorley have benefited from the minimum wage since its introduction. [149165]

Mr. Sutcliffe: It is not possible to provide estimates specifically for Lancashire or Chorley. However based on the Office for National Statistics' low pay data released in 2003, the DTI estimates that around 140,000 people in the north west stood to benefit from the introduction of the national minimum wage in April 1999.

The DTI estimates that between 130,000 and 160,000 people in the north west benefited from the increase in minimum wage rates in October 2003.

National Power Provision

David Davis: To ask the Secretary of State for Trade and Industry what the capacity of the national power grid is. [151264]

Mr. Timms: Figures published in National Grid Transco's Seven Year Statement of March 2003 show that the capacity of the England and Wales transmission system is 69.1 GW.

David Davis: To ask the Secretary of State for Trade and Industry what the projected demand for power is in the United Kingdom over the next 25 years; and what steps she is taking to ensure that this demand is met. [151265]

Mr. Timms: The latest provisional DTI energy projections which update those in Energy Paper 68 available in the Libraries of the House, project a demand of 375TWh in 2005, 385TWh in 2010, 386TWh in 2015 and 399TWh in 2020. The projections relate to gross supply to the grid and cover all major power producers and renewable generators and exclude the effect of a number of climate change programme measures whose exact impact had not been estimated at the time of publication.

The Government attach great importance to reliable energy supplies—reliable supply is one of the four goals of energy policy as set out the Government's Energy White Paper, published in February of last year.

We believe that a market based approach for provision of electricity generation will work. But if the market is to work it needs confidence that Government will not intervene. We have said we will not intervene in the market except in extreme circumstances, to protect safety, and that remains our position.

Through the Joint Energy Security of Supply working group (JESS), we and Ofgem continually monitor developments in the gas and electricity markets over the medium to long term and look for ways to improve the operation of the market. The latest JESS report was published on 12 November and copies have been placed in the Libraries of the House.

Public Bodies (Membership)

Keith Vaz: To ask the Secretary of State for Trade and Industry who the members of the *(a)* National Consumer Council, *(b)* Welsh Consumer Council, *(c)* Scottish Consumer Council, *(d)* Hearing Aid Council and *(e)* Gas Consumer Council were on 1 January; what their term of office is in each case; and what their remuneration is. [151289]

Mr. Sutcliffe: The information requested is as follows:

Name	*Appointment ends*	*Remuneration (£)*
(a) National Consumer Council		
Deirdre Hutton (Chair)	31 December 2006	48,567
Robert Chilton (Vice-Chair)	30 September 2004	13,100
Graeme Millar (Member and SCC Chair)	30 April 2006	10,481
Vivienne Sugar (Member and WCC Chair)	31 March 2007	10,481
Stephen Costello (Member and GCCNI Chair)	31 December 2005	10,481
Mark Boleat (Member)	31 December 2005	10,481
Andrew Dilnot (Member)	30 June 2008	10,481
Dianne Hayter (Member)	30 September 2004	10,481
Sir Christopher Kelly (Member)	30 September 2004	10,481
Stephen Locke (Member)	30 September 2004	10,481
Julie Mellor (Member)	30 September 2004	10,481
Julia Unwin (Member)	30 September 2004	10,481
(b) Welsh Consumer Council		
Viv Sugar (Chair)	31 March 2007	6,902
Heather Coates (Member)	30 September 2004	100 per day
Stephen Delahaye (Member)	30 September 2004	100 per day
Carys Evans (Member)	30 September 2004	100 per day
Geralit Hughes	30 September 2004	100 per day
Chris Neary	30 September 2004	100 per day
Anne Morgan	30 September2004	100 per day
Thelma Parry	30 September 2005	100 per day
(c) Scottish Consumer Council		
Graeme Millar	30 April 2006	16,192
Heather Brash	31 October 2007	100 per day
Ann Clark	31 May 2006	100 per day
Neil Edwards	31 May 2006	100 per day
John Hanlon	31 May 2006	100 per day
Kay Blair	31 May 2008	100 per day

Ashok Khindrea	31 May 2008	100 per day
Isabelle Low	31 May 2008	100 per day
Mukami McCrum	31 May 2008	100 per day
Drew Ratter	31 May 2008	100 per day
(d) The Hearing Aid Council		
Christopher Hughes (Chair)	31 August 2006	189.50 per day (max 50 days)
Christine Pearce	31 December 2004	189.50 per day (max 25 days)
Deepak Prasher	31 December 2004	189.50 per day (max 25 days)
Victoria Skeels	31 December 2004	189.50 per day (max 25 days)
Jonathan Ormerod	31 December 2004	189.50 per day (max 25 days)
Maurice Hawthorne	31 December 2005	189.50 per day (max 25 days)
Mark Geogevic	31 December 2005	189.50 per day (max 25 days)
Margaret Hughes	31 December 2005	189.50 per day (max 25 days)
Denise Yates	31 December 2005	189.50 per day (max 25 days)
Huw Thomas	31 December 2006	189.50 per day (max 25 days)
John Irwin	31 December 2006	189.50 per day (max 25 days)
Peter Ormerod	31 December 2006	189.50 per day (max 25 days)
Anthony Corcoran	31 December 2006	189.50 per day (max 25 days)

(e) Gas and Electricity Consumer Council1

Name	Appointment ends	Remuneration (£)
Andrew Horsler (Acting Chair)	31 March 2005	33,324 (as acting chair)
John Hanlon	31 March 2005	10,796
Bob Wilkinson	31 March 2005	10,796
Tim Cole	31 March 2005	7,556
Sharon Darcy	31 March 2005	7,556
Neil Menzies	31 March 2005	7,556
Les Roberts	31 March 2005	7,556

[1] Following the passage of the Utilities Act 2000, the Gas Consumers' Council and the Electricity Consumers' Committees of the Office of Gas and Electricity Markets (Ofgem) were abolished in November 2000, and replaced by the Gas and Electricity Consumer Council (GECC).

Note:

The GECC's Chief Executive, Allan Asher, is also a member of the Council.

Sellafield (MOX Facility)

Mr. Chaytor: To ask the Secretary of State for Trade and Industry what the current operational status of the MOX demonstration facility at Sellafield is; and if she will make a statement. [149533]

Mr. Timms *[holding answer 27 January 2004]:* Since February 2002, in accordance with a licence issued by Nuclear Installations Inspectorate (NII), BNFL has operated the MOX Demonstration Facility (MDF) as a support facility to the Sellafield MOX Plant (SMP).

Supermarket Code of Practice

Andrew George: To ask the Secretary of State for Trade and Industry when the Government will publish the report of the Office of Fair Trading inquiry into the operation of the voluntary Supermarket Code of Practice. [150986]

Mr. Sutcliffe: The Office of Fair Trading (OFT) is expected to conclude its review of the Code of Practice governing supermarkets' relations with their suppliers shortly. The OFT will then send its report to DTI for formal consideration. My right hon. Friend, the Secretary of State for Trade and Industry will then decide if any action is necessary and publish the report.

TETRA Masts

Annabelle Ewing: To ask the Secretary of State for Trade and Industry what discussions she has had with Scottish Executive Ministers about TETRA masts. [151792]

Mr. Timms: Neither I nor my right hon. Friend the Secretary of State for Trade and Industry have had discussions with Scottish Ministers on the subject.

Transport of Nuclear Fuel (Essex)

Mr. Jenkin: To ask the Secretary of State for Trade and Industry (1) what measures she has taken to protect trains carrying nuclear fuel and spent nuclear fuel through Essex from terrorist attack; [150523]

(2) what assessment she has made of the vulnerability to terrorist attack of trains travelling through Essex carrying nuclear fuel and spent nuclear fuel; [150524]

Mr. Timms: The transport of nuclear fuel strictly adheres to the stringent international and national regulations that govern such movements. In the UK security for the transportation of nuclear material is regulated by the Office for Civil Nuclear Security (OCNS). OCNS is kept fully briefed about terrorist threat intelligence and in turn keeps security arrangements under review at all times. It is not Government policy to disclose details of security measures or nuclear fuel movements, which may be of potential use to terrorists.

Mr. Jenkin: To ask the Secretary of State for Trade and Industry how many trains per month travel in Essex carrying *(a)* nuclear fuel and *(b)* spent nuclear fuel. [150525]

Mr. Timms: On average the movement of flasks containing spent nuclear fuel through Essex amounts to 12 separate rail movements per month. There are no fresh fuel movements currently through Essex by rail.

World Trade Organisation

Mr. Bercow: To ask the Secretary of State for Trade and Industry which members of the World Trade Organisation have still to implement fully the World Trade Organisation Agreement on Basic Telecommunications. [149080]

Mr. Mike O'Brien: The WTO agreement on basic telecommunications came into effect on 5 February 1998. To date, 70 WTO members have adopted the agreement. The nature of the GATS agreement means that members are free to choose the pace and extent of any commitments they wish to make.

Mr. Peter Ainsworth: To ask the Secretary of State for Trade and Industry what her policy is on admitting Russia to the World Trade Organisation; and if she will make a statement. [151251]

Mr. Mike O'Brien *[holding answer 27 January 2004]:* The Government supports Russian membership of the WTO, on the right terms, as both in our interests and in the interests of Russian economic development. We support the negotiating position taken by the European Commission on behalf of the EU, and we call upon the Russian Government to respond positively to the points raised by the Commission on our behalf. We also call upon the Russian Government to address the issues that have been identified by their WTO Accession Working Party as material to the readiness and ability of Russia to implement WTO rules upon accession. Since December 2000, the UK has provided £1.2 million worth of technical assistance to Russia to support their efforts to accede to the WTO.

CULTURE, MEDIA AND SPORT

Queen (Diamond Jubilee)

Mr. Rosindell: To ask the Secretary of State for Culture, Media and Sport (1) if the Government will make arrangements for a Diamond Jubilee Baton Relay should London host the 2012 Olympics; [149929]

(2) what plans she has to link the 2012 Olympic Games bid to the celebrations of the Diamond Jubilee; [150391]

(3) if she will recommend to the organisers of the London 2012 Olympic bid that they place more emphasis in their bid on the fact that 2012 will also be the Diamond Jubilee. [150392]

Tessa Jowell: The Government and the bid company, London 2012, are fully aware that it would be a momentous occasion to host the 2012 Olympic and Paralympic Games in the same year as Her Majesty the Queen's Diamond Jubilee. Some of the events to celebrate the Golden Jubilee were successfully integrated into the staging of the 2002 Manchester Commonwealth Games. It is too early to consider what specific celebrations will mark the Diamond Jubilee but London 2012 will consider what links could be made should we stage the Games. The IOC will select the host city on 6 July 2005.

DEFENCE

Airfield Support Service Project

Mr. Clifton-Brown: To ask the Secretary of State for Defence if he will make a statement on the future of the Airfield Support Service Project; when it was put out to tender; how many times bidders have been asked to resubmit their bids; what the projected date for conclusion of the bidding process was; when it will take place; and when the public sector comparator was finalised. [149056]

Mr. Ingram: The Airfield Support Services Project tender was issued on 20 September 2001.

Since receipt of their responses in April 2002, bidders have been requested to review their prices on three occasions—in December 2002, May 2003 and September 2003.

The original projected date for conclusion of the bidding process (Contract Let) was October 2003. The latest revised programme is mid-2004.

The Public Sector Comparator was originally set in September 2001 and communicated to bidders in November 2001. Since then there have been two revisions, which were advised to bidders in March 2002 and February 2003.

Colchester Garrison

Bob Russell: To ask the Secretary of State for Defence if he will make a statement on progress on proposals for the building of the new garrison at Colchester; what has caused delays; and when he expects work to start. [151784]

Mr. Ingram: The project to redevelop Colchester Garrison and to provide facilities management for the site has been complex to negotiate. It is very important to our people that we secure these much needed improvements to the Garrison and we have been working hard with our preferred bidder, RMPA to resolve all outstanding issues. I expect to make an announcement on the project in the very near future.

Procurement (Outsourcing)

Norman Lamb: To ask the Secretary of State for Defence if he will make a statement on his Department's procurement policy with regard to offshore IT and call centre outsourcing; whether his Department is outsourcing IT and call centre jobs to offshore companies; to which countries his Department has outsourced these jobs; how much his Department has spent on this outsourcing in each of the last two years; and how much has been budgeted for this purpose for the next two years. [147586]

Mr. Caplin: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Falkirk, East (Mr. Connarty) on 29 October 2003, *Official Report*, column 220W.

Remembrance Day

Mr. Lidington: To ask the Secretary of State for Defence if he will make a statement on the Government's policy on the laying of wreaths on Remembrance Day at the graves of Ulster Defence Regiment soldiers on behalf of the Royal Irish Regiment. [151613]

Mr. Caplin: There is no official policy regarding the laying of wreaths on behalf of the Royal Irish Regiment on the graves of fallen soldiers from antecedent regiments. However, this does not prevent Royal Irish Regiment battalions from carrying out individual acts of remembrance at the discretion of the Commanding Officer and where resources and appropriate personnel are available. Where it is not possible to carry on such acts and where Regimental Associations consider that a requirement still exists, the Royal Irish Regiment would encourage the respective associations to take on and carry on the tradition.

Reservists

Dr. Julian Lewis: To ask the Secretary of State for Defence what restrictions apply to the renewed call-up of a reservist who has completed a six-month operational deployment; and what time must elapse before he or she can be called up again. [150863]

Mr. Caplin: The Reserve Forces Act 1996 (RFA 96) sets specific limits for mobilised Service under different call-out orders. Under a section 52 call-out order (national danger, great emergency or attack on the UK), reservists may serve for a total of three years in five; under section 54 (warlike operations), reservists may serve for a total of one year in three; and under section 56 (essentially peacekeeping and disaster relief), reservists may serve for a total of nine months in 27.

Once mobilised, and subject to the needs of the Services and their Commanding Officer's approval, it is possible for a reservist to volunteer to extend their

mobilised Service beyond the limits set by RFA 96; usually for six months at a time. However, there are normally theatre specific limits to the period a reservist can serve. This is to ensure that no one serves too long in an operational environment.

Once demobilised, it is possible to call-out a reservist immediately, provided he has enough mobilised service available. However, in general we would not do so unless there were overriding operational reasons.

Sea King Helicopters

Mr. Tyler: To ask the Secretary of State for Defence what conclusions have been reached by his Department's review of the investigation into the collision of two UK Sea King helicopters, from RNAS Culdrose in Cornwall, off Iraq on 22 March 2003; what the implications were of the non-availability of night vision goggles for the pilots; and if he will make a statement. [150198]

Mr. Ingram *[holding answer 26 January 2004]:* A Board of Inquiry into the circumstances leading to the collision of the two Sea Kings from 849 Naval Air Squadron on 22 March 2003, was completed last November. The purpose of the Board of Inquiry was:

to establish the facts surrounding the incident;

to discover whether there were any shortcomings in Service equipment or procedures which either caused or contributed to the incident; and

where necessary, to make recommendations.

The BOI concluded that:

Both aircraft had reported visual contact with each other, but apparently lost situational awareness and collided. The aircraft were responsible for their own safety at the time of collision.

Following the BOI operating procedures are being reviewed.

A full technical investigation by the Royal Navy Flight Safety and Accident Investigation Centre is still under way, and the report of its findings is not expected for some time.

Helicopter flight safety is achieved through a number of measures including air traffic control, radar detection of hazards, communications, lighting and lookout. Night Vision Goggles (NVG) can, in certain circumstances, enhance these capabilities. However, NVG can be operated only in aircraft that have been specifically modified for this role and from compatible ships. Naval helicopters are fitted to allow operation with NVG according to their tactical role in operations. The operational role for the helicopters of 849 Naval Air Squadron involved in Operation Telic did not require the modifications to the helicopters that are necessary for the provision of NVG. We are currently considering whether to adopt as policy a fleet-wide NVG capability.

The next of kin have been informed of the outcome of the BOI.

UK Nuclear Weapons Tests

Mr. Todd: To ask the Secretary of State for Defence what steps have been taken to categorise into sub-groups by *(a)* operational activity and *(b)* incident those covered by the National Radiological Protection Board study of participants in UK nuclear weapons tests. [150844]

Mr. Caplin: The results of the epidemiological studies published by the National Radiological Protection Board have been presented in terms of mortality for all types of cancer, cancer incidence and risk relative to a comparison group within the following sub-categories: *(a)* by operation; *(b)* for participants with a recorded radiation dose as well as monitored participants with no recorded radiation dose (with information provided on the relative risks for these categories plus an analysis for any trend in mortality or cancer incidence for those with a recorded radiation dose); *(c)* personnel identified by MOD as liable to exposure to radiation (for example those aircrew involved in sampling radioactive clouds); and *(d)* personnel directly involved in the minor trials at Maralinga.

Mr. Todd: To ask the Secretary of State for Defence what funding has been granted to the British Nuclear Test Veterans Association to commission scientific advice on the epidemiology of exposure to nuclear tests. [150845]

Mr. Caplin: To date no funding has been granted to the British Nuclear Test Veterans Association (BNTVA) for purposes of commissioning scientific advice. The three independent studies by the National Radiological Protection Board into mortality and cancer incidence among nuclear test veterans were commissioned and funded by the Ministry of Defence.

DEPUTY PRIME MINISTER

Brent Housing Partnership

Sarah Teather: To ask the Deputy Prime Minister what percentage of Brent Housing Partnership homes are fitted with *(a)* smoke alarms, *(b)* fire doors and *(c)* double glazing. [150815]

Keith Hill: This is primarily a matter for Brent Housing Partnership (BHP), the Arms Length Management Organisation that manages 13,500 tenanted and leasehold homes owned by the London Borough of Brent. BHP reports that 34 per cent. of these homes now have smoke alarms, 23 per cent. have double glazing, and that planned works will increase these figures to 80 per cent. by April 2006 and 32 per cent. by September 2004 respectively. The hon. Member may wish to contact BHP to discuss the information she requires on fire doors.

Council Tax

Mr. Djanogly: To ask the Deputy Prime Minister what percentage increase in council tax he considers to be profligate; and how he defines low single figure percentage increases. [150135]

Mr. Raynsford: With the significant extra investment we have put into local government and the scope for efficiency improvements, the Office of the Deputy Prime Minister's view is that local authorities can and should deliver council tax increases in low single figures in 2004–05. It would not be appropriate for the

Government to specify a figure at this time. The Office of the Deputy Prime Minister does not want to use its powers to cap local authority budgets but is prepared to use them, if necessary, to protect council taxpayers from excessive council tax rises.

Fire and Rescue Service

Mr. Hammond: To ask the Deputy Prime Minister whether his regionalisation agenda for the Fire and Rescue Service envisages a single control room for all Fire Brigades in each region. [149360]

Mr. Raynsford: The Government accept the conclusions of the Mott MacDonald report, on the "Future of Fire and Rescue Service Control Rooms in England and Wales", published in December 2003. It believes that control rooms at regional level are appropriate for reasons of governance, resilience and intra-service working. It is seeking the views of the Practitioners' Forum, authorities and the service on the conclusions of the report and the Government's response. Copies of the report are available in the Library of the House.

Gypsy and Traveller Sites

Andrew Selous: To ask the Deputy Prime Minister what assessment he has made of the likely change in demand for gypsy and traveller sites following the admission to the EU of the accession states on 1 May. [151065]

Keith Hill: The Office of the Deputy Prime Minister has not made an assessment of the likely change in demand for gypsy and traveller sites following the admission to the EU of the accession states on 1 May.

Research undertaken by the Home Office on migration flows into the UK after enlargement concluded that there would not be a significant increase from current levels.

The Office of the Deputy Prime Minister will keep the issue of the possible demand for additional sites in mind while it reviews its policies on gypsy and traveller site provision, which is due to report to Ministers in the summer.

Housing

Mr. Hoyle: To ask the Deputy Prime Minister if he will make a statement on the availability of affordable housing in each of the Lancashire districts; and what plans he has to increase availability. [151203]

Keith Hill: This is a matter for local assessment. National planning advice in Planning Policy Guidance Note 3 "Housing" (PPG3) makes it clear that each local authority should assess the local need for affordable housing within its area.

The Office of the Deputy Prime Minister has published for consultation proposed changes to the current policies for affordable housing set out in PPG3 and in Circular 6/98, 'Planning for Affordable Housing'. They include allowing local authorities to seek affordable housing on smaller sites where this is justified. The proposed changes are designed to help deliver more affordable housing where it is needed, and deliver a better match between a community's housing needs and supply.

Regional Assemblies

Mr. Hammond: To ask the Deputy Prime Minister whether it is the Government's policy that the proposals for elected regional assemblies will not involve any review of the Barnett formula. [150078]

Mr. Raynsford: There are no plans to review the Barnett formula as a result of elected regional assemblies. The Government keeps all aspects of public spending under review, with allocations to the devolved administrations and the details of the Barnett formula updated in the spending review process in the normal way.

Robson Rhodes Review

Mr. Drew: To ask the Deputy Prime Minister if he will make a statement on when the Robson Rhodes review on the operation of supporting people is expected to report. [151787]

Yvette Cooper: The Government have received the report on the independent review and are considering their recommendations carefully. The Government will publish the report and announce their response shortly.

TETRA Masts

Annabelle Ewing: To ask the Deputy Prime Minister what guidelines have been issued by his Department on the siting of TETRA masts. [151794]

Keith Hill: Current planning guidance for all electronic communication developments is set out in Planning Policy Guidance Note 8 (revised) (PPG8). The Office of the Deputy Prime Minister has also issued a Code of Best Practice on Mobile Phone Network Development.

FOREIGN AND COMMONWEALTH AFFAIRS

Civil Servants

Dr. Cable: To ask the Secretary of State for Foreign and Commonwealth Affairs how many civil servants, broken down by grade, there are in the Department and the agencies for which the Department is responsible; and what the figures were in January 1997. [150269]

Mr. Mike O'Brien: The information requested is as follows.

Staff numbers by grade

Grade	*1 April 1997*[1]	*1 October 2003*[1]
SMS	450	474
D7	85	194
D6	581	702
C5	362	565
C4	1,081	1,260
B3	1,490	1,323
A2	1,327	1,188
Al	236	351
Total	5,612	6,057

[1] Includes Wilton Park.

EU Directives

Mr. Redwood: To ask the Secretary of State for Foreign and Commonwealth Affairs how many directives that should have been transposed into national law have not yet been transposed in *(a)* France and *(b)* Germany. [151488]

Mr. MacShane: The European Commission recently reported that France had transposed 97.41 per cent. and Germany 97.33 per cent. of directives that were due for implementation by 31 December 2003.

The European Commission report is available on the European Union website: http://www.europa.eu.int/comm/secretariat_general/sgb/droit_com/pdf/mne_country_2003123l_en.pdf

European Union

Mr. Spring: To ask the Secretary of State for Foreign and Commonwealth Affairs what mid-term Lisbon process targets the European Union has said it will *(a)* meet and *(b)* miss; and if he will make a statement. [151343]

Mr. MacShane: The hon. Gentlemen will be interested in the European Commission's "Delivering Lisbon'" report, published on 21 January—copies have been placed in the Library of the House. The report notes that although the EU has made some progress in job creation, market liberalisation and creation of a knowledge-based economy, there remains considerable work to be done if the EU is to meet its 2010 goal of becoming the most dynamic economy in the world. The Commission notes that the 2005 mid-term employment targets are likely lo be missed and it therefore urges member states to reinvigorate their commitment to the Lisbon reform agenda. The UK Government support this aim and will be looking to the March 25–26 European Council to provide this impetus.

Falkland Islands

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what the entry requirements are for visitors to the Falkland Islands; what visa restrictions are in place; to residents of which countries they apply; and what procedures are in place for those arriving without the correct documentation. [151644]

Mr. Straw: Entry requirements for visitors to the Falkland Islands are the responsibility of the Falkland Islands Government and are implemented by the Falkland Islands Immigration Service.

All visitors must have a valid passport. A valid visa is also required except by citizens of the UK, USA, Chile, Israel, Japan, Republic of Korea, Hong Kong Special Administrative Region of the People's Republic of China, San Marino, Andorra, Vatican City and countries of the European Community, the EEA, Mercosur and the Commonwealth. Transit passengers do not require a visa if they are continuing their journey immediately. Tourists are required to demonstrate on arrival that they have onward travel arrangements, accommodation and sufficient funds for their visit.

A visa national arriving without a valid visa may apply for a visa at the airport on arrival. Individuals arriving without a valid passport would be dealt with on a case-by-case basis.

Liberia

John Barrett: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the effectiveness of the UN peacekeeping force in Liberia; and if he will make a statement. [151201]

Mr. Mullin: The UN peacekeeping force in Liberia (UNMIL) currently consists of 9,000 troops, increasing to 15,000 by the end of March 2004, UNMIL initially deployed to Monrovia and its immediate surrounds. As numbers increase the force is extending its reach throughout the country. UNMIL is responsible for the disarmament and demobilisation process. It has collected about 9,000 weapons; is constructing three cantonment camps; and is sensitising ex-combatants towards the peace process. It is also actively involved in humanitarian relief and has made several valuable interventions to protect Liberian citizens.

Overseas Bribery and Corruption

Mr. Simon Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs what guidance diplomatic posts offer to UK companies about the use of agents and intermediaries. [151387]

Mr. Mike O'Brien: UK Trade and Investment, which operates overseas through UK Diplomatic posts, offers guidance as appropriate on agents and intermediaries in overseas markets. Guidance varies according to the circumstances of the local market or sector. Examples of advice can be viewed on the Sectors and Markets area of UK Trade and Investment's public website: www.uktradeinvest.gov.uk

Road Map

Mr. Laws: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had within the last six weeks with the representatives of the *(a)* US Administration, *(b)* Russian Government and *(c)* EU in relation to progress on the Middle East Road Map; and if he will make a statement. [151162]

Mr. Rammell *[holding answer 28 January 2004]:* In the last six weeks or so, my right hon. Friend the Prime Minister has discussed progress on the roadmap for peace in the Middle East with President Bush, President Putin and with EU leaders at the European Council in Brussels. In the same period my right hon. Friend the Foreign Secretary has discussed this issue with US Secretary of State Colin Powell and EU Foreign Ministers. Most recently my noble Friend the Baroness

Symons of Vernham Dean has discussed these issues with Marc Otte, the EU representation on the Middle East on 27 January.

The Government are committed to progress towards peace in the Middle East based on the Quartet's roadmap. We have been disappointed by the lack of progress on Phase One of the roadmap. Israel should implement a settlement freeze and remove the settlement outposts erected since March 2001. The Palestinian Authority should undertake sustained, targeted and effective operations against terrorists.

Singapore (Death Penalty)

Lady Hermon: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Singaporean Government in relation to the use of the death penalty in that country. [151329]

Mr. Mike O'Brien: My right hon. Friend the Foreign Secretary raised this issue during a meeting with his counterpart in Singapore on 8 January 2003. He stated the United Kingdom's opposition to the use of the death penalty and explained our experience of using long custodial sentences as an alternative. The Foreign and Commonwealth Office's Director General (Economic) also drew attention to the UK position when he met the Permanent Under Secretary of the Singapore Ministry of Foreign Affairs on 4 March 2003.

South Africa

Mr. Simon Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs which *(a)* Ministers and *(b)* officials from his Department met the former South African Defence Minister, Mr. Joe Modise, when he visited the UK during 1998; and whether his Department was informed of the visit and its purpose. [151389]

Mr. Mullin: The Foreign and Commonwealth Office has no record of Mr. Joe Modise visiting the UK in 1998.

PRIME MINISTER

Departmental Minutes

Richard Ottaway: To ask the Prime Minister whether recordings are kept of telephone conversations to and from 10 Downing street. [151615]

The Prime Minister: Telephone conversations to and from Downing street are not recorded.

Prisoners (Egypt)

Mr. Amess: To ask the Prime Minister pursuant to his answer of 26 January 2004, *Official Report*, column 50W, on prisoners (Egypt), if he will meet President Mubarak to discuss the case of the three detainees held in prison in Cairo. [151861]

The Prime Minister: I have no current plans to do so.

I have nothing further to add to the answer I gave him on 26 January 2004, *Official Report*, column 50W.

CHURCH COMMISSIONERS

Clergy Terms of Service

Mr. Ben Chapman: To ask the hon. Member for Middlesbrough, representing the Church Commissioners if he will make a statement on the first report of the McClean Review on clergy terms of service. [151117]

Sir Stuart Bell: The McClean report was published on 23 January and will be debated by the General Synod on 12 February. Subject to the views of Synod, the Report will then be the subject of consultation throughout the Church.

It recommends conferring through Church legislation a new package of rights and responsibilities for clergy. This will include: access to Employment Tribunals to claim unfair dismissal (at the same time as retaining the office holder status of clergy); legal entitlement to the rights covered by section 23 of the Employment Relations Act (except for the right not to work on Sundays); a new form of tenure, known as common tenure under which appointments for clergy without the freehold would normally be made until retirement; new Clergy Terms of Service Regulations which would clarify the responsibilities of clergy on a national basis; and a capability procedure to be invoked where clergy are failing to reach minimum standards.

INTERNATIONAL DEVELOPMENT

Arms Trade Treaty

Chris Grayling: To ask the Secretary of State for International Development what response he has made to the recent representations from international charities about an international arms trade treaty. [151118]

Hilary Benn: I wrote to Oxfam, Amnesty International and the International Action Network on Small Arms (IANSA) on 18 October, welcoming the launch of the Arms Trade Treaty as a useful contribution to the international debate on arms issues. The UK supports the goal of an international instrument on arms transfers, although to be effective any such measure would have to enjoy the support of all major arms exporting countries.

The UK Government are working to promote tougher controls on arms exports at an international level. In January 2003, DFID, FCO and MOD hosted a conference at Lancaster House on strengthening international controls on arms exports. The UK organised a meeting during the July UN Biennial Meeting of States on Small Arms, which sought to follow up on the Lancaster House conference.

These consultations suggest that there are many areas of common ground and significant political will among States. They also demonstrate that more needs to be done before we can secure a universal commitment to strengthening export controls.

In the next two years the UK will continue to call for international controls and support a series of regional meetings, to build consensus on the need for common, harmonised controls. We hope that if there is sufficient support at the regional level, then an international agreement could be reached by the 2006 UN Review

Conference on Small Arms. Although the draft Arms Trade Treaty covers all arms, not just Small Arms and Light Weapons, many of its principles are similar to those we are promoting as part of the UK initiative on strengthening transfer controls.

Between 2001 and 2004, the UK is providing over £20 million to programmes targeted at controlling the supply, demand and availability of arms.

Colombia

Tom Brake: To ask the Secretary of State for International Development what discussions he has held with the UN High Commission for Human Rights about the future of the Commission's office in Colombia. [151225]

Mr. Gareth Thomas: Neither the Secretary of State nor myself have personally spoken to the United Nations High Commission for Human Rights (UNHCHR) about this, but officials in DFID and the Foreign and Commonwealth Office keep in close contact with their work in Colombia.

Global Health Fund

Mr. Bercow: To ask the Secretary of State for International Development how much of the $200 million pledged by the Government to the Global Health Fund over five years has been disbursed. [149976]

Hilary Benn: The UK has pledged an additional US$80 million to the Global Fund to fight AIDS, Tuberculosis and Malaria (GFATM). This will bring our total contribution to US$280 million and extend our current funding commitment to 2008.

To date, the UK has disbursed £75million to the GFATM, or approximately US$120 million.

South Africa

Mrs. Curtis-Thomas: To ask the Secretary of State for International Development what assessment he has made of the underlying cause of the 50 per cent. rise in basic service prices in South Africa; and what is being done to remedy this. [150344]

Hilary Benn: It is difficult to make an overall assessment of the rise in prices of basic services in South Africa. The latest consumer price index figures published by Statistics South Africa suggest that overall inflation was 4.8 per cent. for the year to November 2003, while the price of fuel and power in urban areas rose over the same period by 6.8 per cent.

The Government of South Africa is committed to providing free basic services to the poor. The Free Basic Water policy entitles poor households to 6,000 litres of water each month, and the Free Basic Electricity policy to 50 kilowatt hours of electricity each month, free of charge. Poor households must pay for their use of services above these thresholds.

Tom Brake: To ask the Secretary of State for International Development what assistance his Department has provided to South Africa broken down by *(a)* programme type, *(b)* programme name and *(c)* funding provided in each of the last six years. [151286]

Hilary Benn: DFID's assistance to South Africa over the last six financial years has totalled:

000s

Financial Year	*Number*
1997–98	25,549
1998–99	28,858
1999–2000	29,557
2000–01	30,115
2001–02	25,485
2002–03	36,435

I will write to the hon. Member for Carshalton and Wallington with a list of the programmes which make up this total.

Tom Brake: To ask the Secretary of State for International Development what research his Department have *(a)* conducted and *(b)* commissioned into numbers of (i) pharmacists, (ii) doctors and (iii) nurses in South Africa; and what assessment he has made of South Africa's ability to implement its plan to distribute anti-retroviral AIDS drugs to its HIV-positive citizens. [151284]

Hilary Benn: DFID have not commissioned or conducted any such research. The South African Government's plan for the comprehensive care, management and treatment of HIV/AIDS envisages that anti-retroviral drugs will be introduced progressively, with all who need them having access within five years. The plan takes into account the need to train additional health professionals. DFID are in discussion with the Government of South Africa about how the UK can best support the implementation of the plan.

Tom Brake: To ask the Secretary of State for International Development what assistance his Department has provided to fighting HIV/AIDS in South Africa broken down by *(a)* programme type, *(b)* programme name and *(c)* funding provided in each of the last six years. [151285]

Hilary Benn: DFID's assistance for HIV/AIDS in South Africa over the last six financial years has totalled:

000s

Financial Year	*Number*
1997–98	1,925
1998–99	3,056
1999–2000	3,088
2000–01	4,345
2001–02	4,442
2002–03	8,758

I will write to the hon. Member for Carshalton and Wallington with a list of the programmes which make up this total.

UK Aid

Mr. Bercow: To ask the Secretary of State for International Development if he will list the Department's bilateral aid projects which have been evaluated as successful; and if he will publish the most recent criteria. [149193]

Hilary Benn: All DFID projects and programmes,

which are at least two years old and have a commitment value of £1 million and over, are reviewed annually and scored on likely success. The outcome of the review is recorded on DFID's central Performance Reporting Information System (PRISM), and is used to track DFID's performance against its Public Service Agreement (PSA) Value for Money Target.

The success rating consists of a 5-point scoring system ranging from 1 ('Likely to be "Completely" achieved') and 2 ('Likely to be "Largely" achieved') to 5 ('"Unlikely" to be realised'). In the context of the PSA, successful projects are those that have been scored as 1 or 2. Projects scored 3 ('projects likely to be "partially" achieved') are not counted when measuring progress against our PSA target. However, they will also include a range of successful outcomes. Projects are disaggregated by risk.

The following table shows the total number and proportion by commitment value of bilateral projects of £1 million and over that were reviewed as scoring 1 or 2 in calendar year 2003 (broken down by geographical region and risk category).

Value for money divisional breakdown for calendar year 2003

	High		*Medium*		*Low*	
Risk category	*Number of projects*	*Percentage of commitment value*	*Number of projects*	*Percentage of commitment value*	*Number of projects*	*Percentage of commitment value*
Africa	30	34	188	48	80	85
Asia	30	14	125	62	69	79
Europe, Middle East and Americas	23	66	108	67	58	67
Others	6	94	67	55	76	63

A list detailing the individual projects of £1 million and over covered in the table has been placed in the Library of the House, entitled 'Projects in 2003'. The project list is broken down by DFID department and region.

HOME DEPARTMENT

Speeding

Mr. Llwyd: To ask the Secretary of State for the Home Department what the net figure remitted to the Home Office in respect of speeding fines raised by police forces in England and Wales was in *(a)* 2002 and *(b)* 2003. [150018]

Mr. Jamieson: I have been asked to reply.

All fines for speeding offences are paid to the courts. Some revenue from speeding fines resulting from safety camera activity is netted off and returned to local authorities and police forces within safety camera partnerships for the operation of approved safety cameras. The balance is passed to the Consolidated Fund and none are passed to Government Departments.

SOLICITOR-GENERAL

Expert Witnesses

Tim Loughton: To ask the Solicitor-General (1) if she will list experts who *(a)* are currently and *(b)* have been in the last 10 years on the official list of expert witnesses for cases related to harm of children by their parents or carers; [151030]

(2) how long Sir Roy Meadow has been included on the official list of expert witnesses; [151031]

(3) what the procedure is for *(a)* including, *(b)* removing and *(c)* reviewing the appropriateness of continued inclusion of individuals on the official list of expert witnesses. [151032]

Tim Loughton: To ask the Solicitor-General what requirements were placed on Sir Roy Meadow in his capacity as an expert witness for the prosecution in criminal and civil cases to retain his notes for those cases after guilty verdicts have been secured. [151027]

The Solicitor-General: There are no specific requirements for the retention of personal notes following either a criminal or civil trial. Experts may be required to annex their original reports to a statement in order to explain their findings. There is also a statutory duty on expert witnesses to ensure that any information, which may undermine the prosecution's case, is disclosed.

The Royal College of Paediatrics and Child Health does not issue guidance to practitioners on retention of data. However, there is a professional duty upon all expert witnesses to consider carefully the possible use to which notes and records may be required in the future, for example possible appeals.

The Council for the Registration of Forensic Practitioners is implementing a system of registration of forensics practitioners. Each expert will be bound by a code of practice which will require practitioners to retain their work in order that it can be reviewed if necessary at a later date by another member of the Council.

The Intercollegiate Working Group chaired by Baroness Kennedy is examining issues surrounding the provision of training for expert witnesses and their use in the investigation process. The Group will report its findings in the Spring.

The Solicitor-General: There is no single official list of persons considered expert witnesses. Various organisations and bodies hold lists of expert witnesses for the purpose of assisting both their own members and other bodies which may require the assistance of an expert. The National Crime and Operations Faculty of the police force retains a database of persons with expertise in a wide range of areas, which is available to other law enforcement agencies. Other similar databases

include those held by the Law Society, which retains a database for the use of its members. The Home Office retains a database of pathologists, registered to conduct post mortems on behalf of police or coroners. The Crown Prosecution Service does not retain a central database of experts. Some CPS Areas do keep a list of suitable experts for use in cases.

The National Crime and Operations Faculty (NCOF) and its database have been in existence since 1997. It currently retains details on a wide range of experts, both medical and non-medical, which is used by police forces, security services and the Crown Prosecution Service.

The various bodies maintaining a database will each have different methods of inclusion and exclusion of experts. With respect to the NCOF database individual experts will be included usually following a referral by a police area as to suitability for inclusion. Professional credentials and experience are then carefully considered prior to any decision being taken to include the expert on the database.

The NCOF does not delete experts from its database, in order that a historical record is maintained. If concerns arise over a particular expert then a decision would be taken over his or her continued use. If the decision were not to use that expert again the record would be marked accordingly.

The National Council for the Registration of Forensic Practitioners is in the process of implementing registration of forensic practitioners nationally. This will cover all types of forensic practitioners but at present does not include paediatricians. Registration with the Council as a forensic practitioner is only possible after an assessment of an applicant's professional experience and credentials. Once suitable assessors are identified the scheme will be extended to paediatricians. This is a voluntary scheme, however once completed it will represent a definitive list of suitably competent practitioners.

Foreign Public Officials (Bribery)

Mr. Simon Thomas: To ask the Solicitor-General what criteria are used by the Serious Fraud Office to determine whether to initiate an investigation into bribery of a foreign public official. [151400]

The Solicitor-General: The key criterion the SFO uses when deciding whether to accept a case is that the suspected fraud appears to be so serious or complex that its investigation should be carried out by those responsible for its prosecution. The following factors are taken into account:

1. The sum at risk is estimated to be at least £1 million (this is simply an objective and recognisable signpost of seriousness and likely public concern rather than the main indicator of suitability).

2. The case is likely to give rise to national publicity and widespread public concern. This would include cases involving Government Departments, public bodies, the governments of other countries as well as commercial cases of public interest.

3. The investigation requires a highly specialised knowledge of, for example, financial markets and their practices.

The case has a significant international dimension.

5. There is a need for legal, accountancy and investigative skills to be brought together in a combined operation.

6. The suspected fraud appears to be complex and one in which the use of Section 2 powers (Criminal Justice Act 1987) might be appropriate.

The SFO does not have separate criteria that apply to allegations of bribery of a foreign public official. Allegations of this nature would have to meet the above criteria for the SFO to commence an investigation.

Mr. Simon Thomas: To ask the Solicitor-General how many referrals there have been since 1997 to the Serious Fraud Office where bribery of a foreign public official has been an ancillary offence to another offence; and in how many instances since 1997 the SFO has investigated or prosecuted a company or individual for an offence to which bribery of a foreign public official was ancillary, or in which bribery of a foreign public official may have played a part. [151402]

The Solicitor-General: The SFO have identified five referrals since 1997 where bribery of a foreign public official may have been an ancillary allegation of the wider matter referred. One case is currently under investigation for other offences. The other cases have not resulted in prosecution for any offences.

The SFO does not routinely record all potential offences that may exist within a referred matter. As such there may have been other referrals that included an element of bribery of foreign officials that was not recorded.

Serious Fraud Office

Mr. Simon Thomas: To ask the Solicitor-General whether investigation and prosecution under Part 12 of the Anti-terrorism, Crime and Security Act 2001 are included in enforcement priorities of the Serious Fraud Office. [151406]

The Solicitor-General: Part 12 of the Anti-terrorism, Crime and Security Act crates new offences. The SFO investigates and prosecutes offences of serious and complex fraud. In selecting cases, it gives priority to those that meet its published criteria agreed by Ministers. The SFO does not prioritise by reference to specific offences.

Once a case meeting the published acceptance criteria has been accepted for investigation, the SFO must consider which offence/offences are the most appropriate to prosecute. The offences falling under Part 12 of the Anti- terrorism, Crime and Security Act 2001 can now be considered.

EDUCATION AND SKILLS

Class Sizes

Mr. Hoyle: To ask the Secretary of State for Education and Skills if he will state the average class size of *(a)* primary and *(b)* secondary schools in (i) Chorley and (ii) Lancashire in each year since 2000. [151277]

Mr. Stephen Twigg: The information requested is shown in the table.

Maintained primary and secondary schools[1]: average class size[2]—Chorley parliamentary constituency and Lancashire local education authority

	Classes taught by one teacher			
	Chorley parliamentary constituency		Lancashire local education authority	
Position in January each year: 2000 to 2003	Primary	Secondary	Primary	Secondary
2000	28.3	23.6	27.7	22.7
2001	27.3	23.1	27.3	22.6
2002	26.9	23.6	26.7	22.4
2003	26.8	23.3	26.5	22.5

[1] Includes middle schools as deemed.

[2] Classes as taught during one selected period in each school on the day of the Census in January.

Source:

The Annual Schools' Census.

Departmental Policies (Plymouth)

Linda Gilroy: To ask the Secretary of State for Education and Skills if he will set out, with statistical information relating as directly as possible to the *(a)* Plymouth, Sutton constituency, *(b)* Plymouth, Devonport constituency and *(c)* South-West Devon constituency, the effects on (i) Plymouth Travel to Work area and (ii) Plymouth Unitary Authority area of his Department's policies and actions in (A) 2001, (B) 2002 and (C) 2003. [147924]

Mr. Miliband: Outlined as follows is background on a range of the Department's policies and actions, and their impact on Plymouth and Devon local education authorities. Where analysis has allowed, constituencies requested and the Plymouth Travel to Work Area are detailed.

Specialist Schools Programme

The Specialist Schools Programme is contributing to the creation of a specialist system in which every secondary school has its own special ethos and works with others to spread best practice and raise standards. The programme helps schools, in partnership with private sector sponsors and supported by additional Government funding, to achieve their targets to raise standards. It promotes school improvement by providing opportunities for schools to work to their strengths, enabling them to deliver effective teaching and learning in their area of expertise, as well as across the curriculum, and to drive innovation.

Any maintained secondary school in England may apply to be designated as specialist in one of 10 areas: arts, business and enterprise, engineering, humanities, language, mathematics and computing, music, science, sports and technology. Schools can also combine any two specialisms.

There are currently 1,444 specialist schools operating in eight of the 10 specialisms (this represents 46 per cent. of all secondary schools). We expect the first music and humanities colleges to begin operating in September 2004. Over 1.5 million pupils now attend specialist schools—half of all pupils attending secondary schools are attending specialist schools.

The number of applications from schools wishing to be specialist is at record levels. In October 2001, 267 schools applied; in October 2003 it was 411.

Specialist schools raise £50,000 from private sector sponsorship (less in the case of schools with less than 500 pupils attending) and prepare four-year development plans for improvements in teaching and learning and involving other local schools and the wider community. Designated schools receive a £100,000 capital grant and £126 per pupil per annum for four years. Schools making good progress in meeting their targets can apply for extension funding for another four years.

The Government have set a target to increase the number of specialist schools to 2,000 by 2006. The aim is that all secondary schools will become specialist schools.

Beacon schools:

The Department is currently phasing out the existing beacon schools programme.

The leading edge partnership programme is specific to secondary schools and builds on the success of the beacon schools initiative to encourage an accelerated pace of change and improvement. We need our very best schools and departments to play a leading role in this; to encourage excellence, to develop curriculum expertise and to work with other schools to raise standards through improved teaching and learning. Leading secondary schools will work with other secondary school partners to find solutions to the most critical learning challenges and those most likely to have the greatest impact on closing the attainment gap. We are committed to establishing a network of 300 partnerships by 2006.

In primary, the leading practice programme, described in the recent primary strategy document "Excellence and Enjoyment", a strategy for primary schools, will build on successful practice developed through the beacon programme. We intend to develop a leading practice programme with common national criteria and branding. It will focus on identifying outstanding work in particular areas, within schools that are performing well across the board. The LEA will have a role in working with leading practice schools to ensure they contribute to local networking arrangements so that excellent practice is spread widely.

Excellence Clusters:

Excellence Clusters are designed to bring the benefits of Excellence in Cities (EiC) to smaller pockets of deprivation. Some 197 secondary schools and over 440 primary schools are involved in Excellence Clusters. Like EiC, the clusters focus on some of the most deprived areas of the country, using a structured programme designed to raise standards.

Clusters benefit from extra resources to provide the three core strands of the EiC programme:

Extended opportunities for Gifted and Talented pupils

Access to full time Learning Mentors for pupils who need them

Learning Support Units to tackle disruption.

A fourth strand of funding is available to target particular local issues, as identified by the schools in each cluster.

Under our transformation strategy for Education Action Zones (EAZs) established under the Standards and Framework Act 1998 41 of the 73 EAZs will transform to Excellence Clusters. This process will be completed by the end of April 2005.

Leadership Incentive Grant:

The Leadership Incentive Grant is intended to accelerate the improvement in standards and to strengthen leadership at all levels in schools. The grant also enables schools to work together to share expertise, resources and effective practice to strengthen teaching and learning.

Primary Leadership Strategy:

In 2003, primary schools in every LEA were invited to take part in the Leadership Programme, funded by the Primary National Strategy and developed in partnership with the National College for School Leadership (NCSL). (The National Primary Strategy is a holistic whole-school improvement strategy, building on and incorporating the Literacy and Numeracy Strategies.)

The programme seeks to support schools in improving the leadership of the teaching and learning of English and mathematics, helping to ensure that the rate of progress of children within the school community continues to improve as more reach the standards expected.

Sure Start:

Sure Start programmes work with parents-to-be, parents and children to promote the physical, intellectual and social development of young children—particularly those who are disadvantaged—so that they can flourish at home, when they get to school and during later life. The programme aims to help strengthen families and reduce child poverty by enabling parents to maximise their opportunities to work, learn and study, confident their children are being cared for in a safe and stimulating environment; and contribute to building and sustaining strong local communities through high quality and innovatively delivered family services, which respond to the needs of the communities they serve.

Connexions:

Connexions is the Government's front line support service for all young people in England aged 13–19. Connexions will play an integral role in the delivery of the agenda for reform on services for children and young people proposed in the Green Paper "Every child matters".

Through multi-agency working, Connexions provides integrated advice guidance and access to personal development opportunities to help remove barriers to learning and progression and ensure young people make a smooth transition to adulthood and working life. Personal advisers play a lead professional role. They provide advice on careers and lifestyle issues as well as barriers such as homelessness and drugs. They refer young people to specialist support where needed.

The new vision statement for Connexions launched in November 2002, signed by eight Government Ministers, re-affirmed the universal nature of the service.

Connexions' overarching objective is to reduce the number of 16 to 18-year-olds who are not in education, employment or training (MEET). Connexions Partnerships have a target of reducing local MEET numbers by 10 per cent. by November 2004.

Plymouth, Devonport

Four specialist schools covering Arts and Technology;

One beacon school (primary);

14 EiC Excellence Cluster schools;

Four secondary schools receive Leadership Incentive Grant;

One primary school is part of Primary Leadership Strategy;

Sure Start and Connexions programmes in operation.

Plymouth, Sutton

Three specialist schools covering Arts, Engineering and Technology;

Two beacon schools (one primary/one secondary);

Seven EiC Excellence Cluster schools;

One primary school is part of Primary Leadership Strategy;

Sure Start and Connexions programmes in operation;

Lipson Community School is in the top 100 improving maintained schools based on sustained improvement in the GCSE/GNVQ five plus A*-C indicator 2000–03.

South-West Devon

Covers two local education authorities:

Plymouth:

Three specialist covering Language, Maths and Sports;

One beacon secondary school;

Two primary schools part of Primary Leadership Strategy;

Sure Start and Connexions programmes in operation.

Devon:

One specialist covering Sports

One beacon primary school;

One primary school is part of Primary Leadership Strategy;

Sure Start and Connexions programmes in operation.

Total for South West Devon constituency:

Four specialist covering Language, Maths and Sports;

Two beacon schools (one primary/one secondary);

Three primary schools part of Primary Leadership Strategy;

Sure Start and Connexions programmes in operation.

DORE Achievement Centres

Mrs. Curtis-Thomas: To ask the Secretary of State for Education and Skills pursuant to the Answer of 12 January 2004, *Official Report*, column 503W, on DORE achievement centres, when the meeting between officials and representatives of the DORE achievement centres and the dyslexia, dyspraxia and attention deficit treatment programme will take place. [150207]

Mr. Miliband: A meeting between officials from the Department's Special Educational Needs and Disability Division and representatives of the DORE Achievement Centres/DDAT programme has been arranged for the afternoon of 19 February 2004.

Education Funding

Mr. Djanogly: To ask the Secretary of State for Education and Skills whether the formula spending share figure for Cambridgeshire for 2004–05 takes account of the requirement for Cambridgeshire to spend

£4.5 million more on schools set out in the direction notice from his Department to Cambridgeshire county council. [151584]

Mr. Miliband: The direction notice sent to Cambridgeshire county council asks the authority to increase its Schools Budget to a level consistent with full passporting. Full passporting means increasing the 2003–04 Schools Budget by the increase in the Schools Formula Spending Share from 2003–04 to 2004–05. Therefore the direction notice is based on the Schools Formula Spending Share figure for Cambridgeshire.

Information Technology

Mr. Allan: To ask the Secretary of State for Education and Skills what audit mechanisms are in place to determine whether information technology *(a)* hardware and *(b)* software products are being used properly in his Department. [150934]

Mr. Charles Clarke: All members of the Department for Education and Skills have access to the internet. Filtering software is installed to block access to inappropriate sites and all accesses are monitored and recorded. Attempts to access inappropriate sites are referred for disciplinary action—staff have to accept the conditions for use of the equipment each time they log into the network.

Much of the software used by the Department are purchased on a corporate licence—where this is not the case records are maintained to ensure that only the number of licences purchased are used. All hardware is configured to prohibit the loading of unauthorised software.

The Department have started to use auditing software to reconcile the amount of software in use against the central records of software purchases. It is planning to conduct three monthly audits to achieve this.

Hardware is purchased centrally and details of all hardware items are held in an asset database. Hardware is subject to an annual audit where every item on the asset database is checked either physically or using auditing software to ensure it is still in being used correctly.

Appropriate action is taken in any cases where hardware cannot be found.

The Department's Internal Audit Division conduct regular audits to ensure that the conditions for use of hardware and software are both appropriate and are being enforced.

Landfill Tax Credit

Sue Doughty: To ask the Secretary of State for Education and Skills how much funding for environmental educational initiatives will be lost by schools following the end of the Landfill Tax Credit Scheme; and if he will replace such lost funding from his departmental budget. [150644]

Mr. Miliband: The Landfill Tax Credit Scheme (LTCS) has not ended, although two of the objects of the scheme were withdrawn in April 2003, those which concerned research and development, and education on sustainable waste management. Since April 2003 a number of projects in categories c and cc have continued to be financed by legacy funding through the Department for Environment, Food and Rural Affairs (Defra), the Welsh and Scottish Assemblies and the Northern Ireland Authorities but the current arrangements will cease at the end of March. The value of environmental education projects funded in calendar year 2003 under these categories is £71,300, although that amount may increase since claims can be made until April 2004. However, some types of education projects are currently, and will still be, eligible for funding under some of the remaining objects of the scheme, for example biodiversity.

As part of the sustainable waste delivery public expenditure programme established as a result of the reform of the LTCS, and managed by Defra, work will be taken forward on waste awareness. Therefore, my Department has no plans to increase the level of funding for environmental educational in schools.

Local Government

Michael Fabricant: To ask the Secretary of State for Education and Skills what aggregate percentage of central Government funding provided to Staffordshire local education authority is made up of the formula spending share. [150618]

Mr. Miliband: For 2003–04 Staffordshire's local education authority formula spending share made up 84 per cent. of the total resource funding for education made available to the authority, the remaining 16 per cent. being revenue grant funding within DfES Departmental Expenditure Limits.

School Buildings

Mr. Hoyle: To ask the Secretary of State for Education and Skills how much money has been spent on school buildings in Chorley, broken down by school, in each year since 1997. [151279]

Mr. Miliband: The Department does not collect detailed information about work carried out, but this should be held by Lancashire LEA. The following table sets out the capital allocations made by this Department to Lancashire LEA and its schools from 1997–98 to 2003–04.

Lancashire capital allocations 1997–98 to 2003–04

£000

	Capital allocation made
1997–98	13,288
1998–99	16,957
1999–2000	35,179
2000–01	38,021
2001–02	29,778
2002–03	46,470
2003–04	62,607

Physical Education

Mr. Paul Marsden: To ask the Secretary of State for Education and Skills what the average number of hours per week of physical education in schools in *(a)* Shrewsbury and Atcham and *(b)* Shropshire was in the last year. [151318]

Mr. Stephen Twigg: The information requested is not currently held in the format requested. Detailed data on physical education and school sport is now being collected for the first time—for publication in April 2004—including the amount time spent each week on physical education in schools.

Pupil Funding

Mr. Paul Marsden: To ask the Secretary of State for Education and Skills if he will list the *(a)* average funding of each schoolchild in England and *(b)* the level of funding for a schoolchild in Shrewsbury and Atcham. [151407]

Mr. Miliband: The average national funding for 2004–05 provided through the Education Formula Spending Share for 2004–05 is £3,515. The formula for the main primary and secondary sub-blocks comprises a basic entitlement for each pupil, which is the same across the country, plus a top-up for each pupil with additional educational needs, which is again the same across the country, plus top-ups for areas where it costs more to recruit and retain teachers. Local education authorities with a greater proportion of pupils with additional educational needs or higher average earnings will receive a higher level of funding per pupil. The Government do not directly fund school children in Shrewsbury and Atcham. The Government provide funding to Shropshire county council which is then responsible for funding its schools.

School Meals Service

Bob Russell: To ask the Secretary of State for Education and Skills how many representations he has received on the decision of Essex local education authority to delegate the school meals service to primary schools; and if he will make a statement. [151763]

Mr. Miliband: Since December 2003, the Department have received five representations about meals provision in Essex; three have been received from schools, including correspondence from a school via my hon. Friend the Member for Harwich. There have also been two emails—one from an Essex County Councillor and a general inquiry from Governor Line.

School Teachers

Mr. Evans: To ask the Secretary of State for Education and Skills how many *(a)* full-time and *(b)* part-time (i) primary and (ii) secondary school teachers were employed in the Ribble Valley and Fulwood area in each year since 1997. [149802]

Mr. Miliband: The following table shows the number of regular teachers in maintained primary and secondary schools in the hon. Gentleman's constituency at January in each year since 1997.

	Maintained primary		*Maintained secondary*	
	Full-time	*Part-time*	*Full-time*	*Part-time*
1997	290	110	430	70
1998	300	110	440	60
1999	300	140	450	80
2000	300	130	460	70
2001	310	150	460	60
2002	310	150	470	70
2003	310	150	480	90

Notes:
1. Includes middle schools as deemed.
2. Includes teachers on schemes leading to QTS and teachers not recognised as qualified.

Source:
Annual Schools' Census

Scottish Botanic Garden

Adam Price: To ask the Secretary of State for Education and Skills what funding the Scottish Botanic Garden in Edinburgh receives from his Department. [150664]

Mr. Stephen Twigg: This Department does not provide any funding for the Scottish Botanic Garden in Edinburgh. This is a matter for the Scottish Executive.

Specialist Comprehensive Schools

Mr. Chaytor: To ask the Secretary of State for Education and Skills what assessment he has made of the comparative performance of the 2003 Key Stage 4 performance tables of *(a)* specialist comprehensive schools whose admissions arrangements include selection by aptitude and *(b)* all other specialist comprehensive schools in respect of (i) raw scores and (ii) value added scores. [149537]

Mr. Miliband: No assessment along these lines has been carried out by the Department.

Written Answers to Questions

Friday 30 January 2004

TRANSPORT

Birmingham Airport

Keith Vaz: To ask the Secretary of State for Transport what plans he has to visit Birmingham airport on official business. [151062]

Mr. McNulty: The Secretary of State has no plans to visit Birmingham airport in the near future. Ministers regularly visit all parts of the country, including the West Midlands and I visited Birmingham airport last summer.

East Midlands Airport

Keith Vaz: To ask the Secretary of State for Transport when he last met the Chief Executive of East Midlands airport. [151059]

Mr. McNulty: Within the last six months, Ministers have met the Chief Executive of East Midlands airport and the Chief Executive of the Manchester Airports Group (which owns East Midlands airport).

EU Quick Start Programme

Mr. Redwood: To ask the Secretary of State for Transport what action the UK is taking to comply with EU Quick Start programme objectives in transport projects. [151497]

Dr. Howells: The EU Quick Start programme comprises key projects, within existing Community programmes, that meet a set of criteria including readiness to start by end 2006 and impact on economic growth. There are two UK transport projects included in the programme. We are reviewing whether there are others that meet the criteria for inclusion.

Information Technology

Mr. Allan: To ask the Secretary of State for Transport what cost savings have been made in his Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151045]

Mr. McNulty: A Centre of Excellence was established within the Department for Transport in June 2003 to integrate the essential functions which underpin the successful delivery of all types of acquisition-based programmes and projects. As cost benefits will not accrue until improvements start to take effect, it is too early to measure cost savings. All Centres of Excellence are currently developing future plans and as part of this process measurement of savings will be defined.

Ministerial Travel

Keith Vaz: To ask the Secretary of State for Transport when he last travelled on the London Underground on official business. [151061]

Mr. McNulty: The Secretary of State regularly travels by all modes of public transport. My right hon. Friend last travelled on London Underground in November.

Railway Platforms

Mr. Redwood: To ask the Secretary of State for Transport what plans Network Rail has to lengthen platforms at London commuter stations. [151484]

Dr. Howells: Platform extensions are under way at Hollingbourne, Harrietsham and Charing, and extensions are planned at Braintree, Braintree Freeport, Cressing, White Notley, Harrow and Wealdstone, Bushey, Kings Langley, Apsley, Kernel Hempstead, Berkhamsted, Tring, Cheddington, Bletchley, Billingshurst, Portslade, West Norwood, Hampden Park, Lewes, Farnham, Virginia Water, Basingstoke, Ascot, Farncombe, Milford, Witley, Liphook, Liss, Petersfield, Bentley, Brockenhurst, Camberley, Princes Risborough, Beaconsfield, Gerrards Cross, High Wycombe, West Ruislip, South Ruislip, Wembley Stadium and Denham.

Railways

Mr. Redwood: To ask the Secretary of State for Transport how many temporary speed restrictions are in force on Network Rail track. [151481]

Dr. Howells: Network Rail advises that there are currently 548 temporary speed restrictions on the railway network. This compares to a peak of approximately 1,200 speed restrictions in February 2001.

Mr. Redwood: To ask the Secretary of State for Transport how much public capital is allocated to the expansion of railway network capacity in the 10 Year Plan. [151483]

Dr. Howells: The latest allocations of public spending in the 10 Year Plan are set out in "Delivering Better Transport: Progress Report", which was published in December 2002. The total amount of public expenditure allocated for railways is £33 billion. This is broken down as follows:

	Amount (£ billion rounded)
2001–02	2.1
2002–03	2.8
2003–04	3.8
2004–05	3.8
2005–06	4.3
2006–07	4.2
2007–08	3.6
2008–09	2.9
2009–10	2.7
2010–11	2.8
10 Year Plan total	33

Road Deaths

Mr. Redwood: To ask the Secretary of State for Transport how many deaths have occurred on *(a)* the

A316 between the end of the M3 and the first roundabout and *(b)* the M4 between junctions 4 and 1 in the last three years. [151487]

Dr. Howells: There has been one fatal accident on the M4 between junction 4 and junction 1 in the three years from September 2000 to August 2003. This occurred on the westbound carriageway near junction 3.

There were no fatal accidents on the A316 between the M3 at Sunbury Cross and the first roundabout, at its junction with the A312, in the same period.

Rural Bus Challenge

Mr. Jenkin: To ask the Secretary of State for Transport what criteria are used to determine which Rural Bus Challenge grants are awarded. [152122]

Mr. McNulty: The main objective of the Rural Bus Challenge is to encourage cost-effective innovation in the provision or promotion by local authorities of rural bus transport. The full criteria used in assessing bids to the 2003 competition are set out in guidance to local authorities issued in July 2003, a copy of which has been placed in the Libraries of the House and on the Department's website.

Transport and Works Act

Mr. Damian Green: To ask the Secretary of State for Transport if he will list the public inquiries into applications made under the Transport and Works Act 1992 held in each of the last five years; how soon after the inquiry the inspector made his report to him in each case; and how long it took him to reach a decision in each case. [149986]

Mr. Jamieson: The following table shows the information requested in respect of applications made under the Transport and Works Act 1992 (TWA), with the exception of a few applications that will fall to be decided by the First Secretary of State, the Secretary of State for Trade and Industry or the National Assembly for Wales. The variable periods for reaching a decision can partly be attributed to differences in the complexity of the cases. But in many cases this has been for reasons outside our control, such as the need to obtain more information from an applicant or the inspector, or the need for a related consent from another Department.

Year in which public inquiry started	*Title of Transport and Works Act 1992 application/order*	*Period from end of inquiry to receipt of inspector's report (weeks)*	*Period from receipt of inspector's report to decision (weeks)*
2003	Proposed London Gateway Logistics and Commercial Centre Order	Inspector's report awaited	—
2003	Proposed Midland Metro (Birmingham City Centre Extension, etc.) Order	Inspector's report awaited	—
2003	Proposed Docklands Light Railway (Woolwich Arsenal Extension) Order	11	Under consideration
2003	Proposed River Tyne (Tunnels) Order	23	Under consideration
2002	Proposed Greater Manchester (Leigh Busway) Order	22	Under consideration
2002	Proposed Network Rail (West Coast Main Line) (No. 2) Order	26	Under consideration
2001	The Greater Manchester (Light Rapid Transit System) (Trafford Depot) Order	9	30
2001	Proposed Yorkshire Marina (Bridlington) (Works) Order	20	23
2001	Proposed Fawley Branch Line Improvements Order	40	Under consideration
2001	The Network Rail (West Coast Main Line) Order	30	38
2000	The Railtrack (Shortlands Junction) Order	10	16
2000	The London Underground (East London Line Extension) (No. 2) Order	5	43
2000	The Docklands Light Railway (Silvertown and London City Airport Extension) Order	17	53
2000	The Greater Manchester (Light Rapid Transit System) (Land Acquisition) Order	5	21
2000	The Alconbury Airfield (Rail Facilities and Connection to East Coast Main Line) Order	76	35
2000	The Chester Guided Busway Order	15	33
2000	Proposed London International Freight Exchange and Proposed London International Freight Exchange (Variation) Orders—joint inquiry	27	15
1999	The South Hampshire Rapid Transit Order	13	51
1999	The Greater Manchester (Light Rapid Transit System) (Trafford Park) Order	11	51

Mr. Damian Green: To ask the Secretary of State for Transport how many staff there are in his Department's Transport and Works Act processing unit, broken down by grade; and how many are *(a)* full-time, *(b)* part-time and *(c)* casual workers. [149988]

Mr. Jamieson: The Department's Transport and Works Act Orders Unit currently consists of 13 members of staff. The following table breaks down the Unit's staff into the categories requested.

Grade	*Number of staff at grade*	*Work pattern*
Grade 7 (PB6.1)	1	Full-time
Senior Executive Officer (PB5.1)	2	Full-time
Higher Executive Officer (PB4.3)	4	3 × full-time and 1 × part-time
Executive Officer PB3.2	4	Full-time
Administrative Officer PB2.1	2	Full-time

The Unit will shortly reduce to 12 members of staff, upon the reallocation of one Administrative Officer to other departmental duties.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Animal Pathogens

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the relationship is between risk of spread of animal pathogens from a laboratory and the infectivity of the organism; and which pathogens are classified as group 2. [150896]

Mr. Bradshaw: The risk of a particular organism escaping from a laboratory is not directly affected by its infectivity. Defra classifies animal pathogens in different groups for containment purposes, according to the risk they pose to the health of farmed livestock and poultry. The assessment of risk takes account of a number of factors, including the infectivity of the pathogen and the nature and seriousness of the disease it causes. The higher the level of risk posed by an animal pathogen, the higher the level of laboratory containment required for its safe handling. The following animal pathogens are currently classified as Defra group 2 pathogens:

Anaplasma spp.
Aujeszsky's disease virus
Avian paramyxoviruses other than paramyxovirus 1 (PMV1) group
Babesia bigemina
Babesia bovis
Babesia caballi
Babesia equi
Borna disease virus
Bovine leukosis virus
Bovine malignant catarrh virus (African type)
Chlamydia psittaci
Cowdria ruminatum
Derzsky's disease virus (goose parvovirus)
Echinococcus multilocularis
Echinococcus granulosis
Equine viral arteritis
Getah virus
Hypoderma bovis
Hypoderma lineatum
Maedi-visna virus
Mycobacterium bovis
Mycobacterium tuberculosis
Mycobacterium africanus
Mycobacterium kansasii
Mycobacterium leprae
Mycoplasma agalactiae
Mycoplasma capricolum sub species capripneumoniae
Mycoplasma mycoides var capri
Newcastle disease virus—Hitchener Bl and F strains only
Porcine influenza viruses
Pox viruses—camel
Psoroptes communis var. ovis
Theileria spp.
Trichinella spiralis
Trypanosoma spp
Viral haemorrhagic disease of rabbits virus
Any other non-enzootic animal pathogen not listed in Defra groups 3 and 4

Animal Quarantine

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what the period of notice provided to owners of facilities licensed to quarantine animals entering the UK before inspections are carried out is; [150790]

(2) what the minimum number per year is of inspections of facilities licensed to quarantine animals entering the UK; [150793]

(3) how many inspections of facilities licensed to quarantine animals entering the UK were carried out in each of the last five years. [150794]

Mr. Bradshaw: Under Article 9 of the Rabies (Importation of Dogs, Cats and other Mammals) Order 1974, which covers Great Britain, quarantine premises are required to be authorised by a licence issued by a Defra Minister.

In order to maintain their authorised status, quarantine premises for companion animals are required to be inspected by the State Veterinary Service. If the inspections are satisfactory, the premises are issued with an authorisation licence by Defra. The target for inspections is quarterly visits, that is four visits annually, two of which are pre-notified and two which are unannounced. Pre-notified visits are usually arranged two to four weeks in advance. There are normally, at least, three visits a year to authorised premises, and for some, there may be more than four annually.

In addition to these, when a complaint is received from the public, an unannounced visit is made to investigate the complaint.

Detailed records of inspections are kept for individual authorised quarantine premises, but are not collated centrally.

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs how many and what types of diseases were detected in domestic animals in quarantine after entering the UK in each of the last five years. [150795]

Mr. Bradshaw: Quarantine rules relate only to controls to prevent the introduction of rabies into this country and do not require the reporting of other diseases.

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs what proposals she has to reform the quarantine requirements for domestic animals entering the UK. [150796]

Mr. Bradshaw: Following the report in September 1998 by the Advisory Group on Quarantine (the Kennedy Report), "Quarantine and Rabies: A Reappraisal", the Government undertook a radical reform of the UK quarantine regulations. On 28 February 2000, the Pet Travel Scheme (PETS) was introduced, which allows cats and dogs from specified

countries, and which comply with certain conditions, to enter the UK without going into quarantine. The Scheme has now been operating successfully for four years. We have no plans for any further major changes to quarantine law.

However, between December 2000 and March 2001, MAFF undertook a consultation exercise on proposals for legislation to update the law governing quarantine premises. Agreement of new EU rules on the movement of pet animals will also require some changes to the national quarantine legislation. We therefore expect to review the detailed rules on quarantine during 2004.

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs how many facilities are licensed to quarantine animals in the UK; and where they are located. [150797]

Mr. Bradshaw: The Department is responsible for authorising quarantine premises for dogs, cats and all other rabies susceptible animals. These include zoos, research establishments and quarantine kennels and catteries. There are currently 40 authorised quarantine premises for dogs, cats and pet mammals in Great Britain; 36 are in England, one in Wales and three in Scotland. A list of these quarantine premises is freely available on the Defra website.

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs what the average cost was of keeping an animal in quarantine after entry to the UK in the last year. [150798]

Mr. Bradshaw: Quarantine premises set charges according to the facilities provided and it is a matter of contractual arrangement between the pet owner and the quarantine premises.

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* cats and *(b)* dogs have died while being kept in quarantine after entering the UK in each of the last five years. [150799]

Mr. Bradshaw: The table shows the number of cats and dogs notified that died in quarantine in the last five years. It is a requirement on quarantine premises to notify all deaths in quarantine to Defra.

	Number of cats died in quarantine	*Number of dogs died in quarantine*	*Total number of deaths in quarantine*
1999	54	25	79
2000	35	30	65
2001	16	24	40
2002	29	27	56
2003	22	11	33

Mark Tami: To ask the Secretary of State for Environment, Food and Rural Affairs what the last recorded case was of a domestic animal showing signs of rabies while kept in quarantine after entering the UK. [150800]

Mr. Bradshaw: The last recorded case of a domestic animal showing clinical signs of rabies while in quarantine in the UK was in September 1990. This diagnosis was subsequently confirmed by laboratory tests.

Badgers

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what information she has collated on the estimated badger population of mainland continental Europe. [150897]

Mr. Bradshaw: The most recent assessment of the status of the badger (*Meles meles*) in Europe was published in 1997[1].

The quality of information available from each country varied considerably and as a result it was not possible to accurately estimate the Continent's total badger population. In an earlier publication[2], the same authors estimated that the European badger population was at least 1,220,000. At that time the British population was thought to be 250,000, which is approximately 20 per cent. of all European badgers.

[1] *Source:*
The conservation and management of the European badger (*Meles meles*) (1997). Nature and Environment No. 90; by H. I. Griffiths and D. H. Thomas; Council of Europe Publishing (ISBN: 92-871-3447-2).

[2] *Source:*
The status of the badger *Meles meles* (L.,1758) (Carnivora, Mustelidae) in Europe (1993) by H. I. Griffiths and D. H. Thomas; Mammal Review; 23, 17–58.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what account is taken of routine sightings of badgers during daylight hours in calculating population size and density. [150945]

Mr. Bradshaw: Routine, or incidental, sightings are rarely suitable for estimating animal abundance, although such sightings can be useful for establishing the presence of a species in a locality—especially in the case of rare animals.

Badger sightings have been used to estimate densities, but only as part of planned surveys following a scientifically robust methodology (Heydon, M. J., Reynolds, J. C. and Short, M. J. (2000); *Journal of Zoology*; 251, 253–264). Furthermore, sighting-based surveys of badgers are carried out at night rather than during daylight hours, as this is when badgers are most likely to be observed above ground.

By far the most widely used method for estimating badger density is based on signs rather than sightings of badgers. During the national surveys carried out during the 1980s and 1990s badger numbers were extrapolated from the density of setts (taking account of their size and level of activity) and the average size of badger social groups.

Full details of the sett surveying methodology used in the last national badger survey are given in: "Changes in the British badger population, 1988 to 1997" by G. Wilson, S. Harris and G. McLaren (1997), published by the People's Trust for Endangered Species.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the expected date is of completion of the project designed to assess the impact of removing badgers from the ecosystem; what the budgeted cost of the project is; from which institution the project is being managed; and who the lead scientist is. [150474]

Mr. Bradshaw: The expected date for completion of the project is the end of March 2005. The budgeted overall cost of the project is £1.48 million. The project is being managed by the head of the team at the Woodchester Park site of the Central Science Laboratory.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will seek from the European Commission permission to compensate farmers who have suffered consequential losses as a result of the suspension of badger culling in reactive areas in the randomised badger culling trials. [150496]

Mr. Bradshaw: I do not plan to seek permission from the European Commission to pay compensation for consequential losses due the cessation of culling in reactive areas of the randomised badger culling trial. The decision to suspend the reactive culling element of the trial was taken because the preliminary results indicated that this action would reduce the risk of TB breakdowns.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will conduct investigations into whether perturbation in badger populations can be eliminated or substantially reduced by improved culling programme design and execution. [150499]

Mr. Bradshaw: Defra has funded research into perturbation of badger populations subject to culling. The results of the most recent work are yet to be published.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects to publish data on the prevalence of TB in badgers in areas of high incidence in cattle herds. [150500]

Mr. Bradshaw: Details of the incidence of TB in badgers captured during operations of the Randomised Badger Culling Trial will be published once the trial is finished, which is scheduled to be mid-2006.

These data will give an indication of the prevalence of TB in the badger population in trial areas; one of the criteria for the selection of these areas was that there was a high level of incidence of TB in cattle herds.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs based on the findings from post mortem examinations of badgers and other data, what her best estimate is of the number of TB-infected badgers existing in England and Wales; and what the best estimate was for that figure in 1994. [150507]

Mr. Bradshaw: It is not possible to give an accurate figure for the number of TB-infected badgers existing in England and Wales because of the difficulty of estimating the size of the badger population and the reliability of the prevalence data available.

The prevalence of TB in MAFF-taken badgers collected in England and Wales each year from 1975 to 1996 is given in Appendix 10 of the Krebs Report (PB 3423).

The prevalence of TB in Road Traffic Accident badgers collected in England and Wales each year from 1972 to 1996 is given in Appendix 11 of the Krebs Report (PB 3423).

A copy of the Krebs Report is available in the Library of the House.

Data on the incidence of TB in badgers collected under the present Road Traffic Accident survey and the Randomised Badger Culling Trial should yield more accurate information, but these data will remain confidential until the trial is finished, which is scheduled to be mid-2006.

Mr. Owen Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what level of TB in badgers is sufficient for the disease to be considered as epidemic in the population; and how in this context the term endemic differs from the term epidemic. [150508]

Mr. Bradshaw: Bovine TB is endemic in badgers in the UK; i.e. it is constantly present in badgers within this geographical area. An epidemic occurs where the occurrence of an infection increases clearly beyond normal expectancy. There is currently no evidence to suggest that levels of bovine TB in badgers have increased substantially in recent years.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what factors increase the susceptibility of *(a)* badgers and *(b)* cattle to disease following exposure to *M. bovis* bacilli. [150513]

Mr. Bradshaw: Factors that increase the susceptibility of cattle to disease following exposure to *M. bovis* include general health, nutritional status and immunological capability. It is likely that similar factors are important in determining the susceptibility of badgers although no studies have been carried out on this particular subject.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many badger setts that have been sticked have subsequently been found to have been recolonised; and what action is taken in the event that such recolonisation is observed. [150544]

Mr. Bradshaw: Sticking of a Randomised Badger Culling Trial (RBCT) sett is a method used to indicate whether the sett is in active use. The team carrying out the post-cull survey will note the sign and use this information to inform their report. It may be difficult to identify whether a sett has been recolonised or whether there are badgers remaining from the original colony which were not captured during the trapping operation.

RBCT design requires culling operations to be repeated annually in Proactive areas to maintain badger numbers as low as possible. During such operations, traps are placed on active setts on premises consenting to culling and additionally at locations indicating the movement of badgers from any adjoining non-consent land.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects the Oxford University research on badger perturbation being carried out on behalf of her Department to be

completed; when the report will be made available; who the lead scientist is; what the protocols are for this work; and what the budgeted cost is. [150546]

Mr. Bradshaw: It is expected that the Oxford University research on badger perturbation being carried out on behalf of the Department will be completed at the end of March 2004. It is likely that the final report will be available later this year. It is managed by a member of the university's Zoology Department. The project's protocol investigates whether the spatial and temporal scale of the perturbation processes, the pattern and speed of recolonisation and the relief of density-dependent inhibitions on reproduction and survival observed in the study area may be generalised. The budgeted overall cost for the project is £1.25 million.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what statutory measures exist for the licensing and authorisation of badger translocations; under what conditions licences or authorisations are issued; which Department is responsible for implementing their provisions; and what the nature and level of supervisions are over persons licensed or otherwise authorised to carry out translocations. [150581]

Mr. Bradshaw: I refer the hon. Member to the answers given on 6 January 2004, *Official Report*, column 249W, and 20 January 2004, *Official Report*, column 1186W.

The specific conditions imposed on any licence are tailored to the particular circumstances of the operation to be undertaken.

Licences are issued by the appropriate statutory conservation agency or agricultural department (English Nature and Defra, respectively, in England) depending on the purpose of the proposed translocation. The licensing body is responsible for specifying the conditions and licensee is responsible for complying with them.

All licensed translocations are closely supervised by the issuing authority and by wildlife advisers with experience in licensed badger operations from the Department's National Wildlife Management Team.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, columns 214–15W, on bovine TB, and 15 December 2003, *Official Report*, column 631W, on badgers, what plans she has to revise guidelines to farmers on the height, positioning and protection of feed and water troughs following the findings of the Central Veterinary Laboratory on the climbing capabilities of badgers. [150594]

Mr. Bradshaw: Recent research has demonstrated that in some circumstances badgers are capable of reaching cattle feed troughs set at least 80 cm above the ground.

There are no plans to change the existing height guidelines, as trough heights must be set so that the cattle intended to feed from them can still reach the contents. However, investigation into trough design to deter access by badgers is being carried out.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether persons wishing or authorised to undertake the relocation of badgers are required *(a)* to carry out tests on those animals and *(b)* to await the results of any such tests before setting them free in their new locations. [150609]

Mr. Bradshaw: I refer the hon. Member to the answer given on 20 January 2004, *Official Report*, column 1186W. To briefly reiterate, all badgers relocated under the authority of a licence are tested three times for bovine tuberculosis and are only released if all three tests are negative. A similar approach is also applied to the relocation of rehabilitated badgers by animal hospitals, only in this case testing guidelines are not mandatory, but are set down in a voluntary code of practice.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the conclusions were of Professor Solly Zuckerman's 1988 report to the Ministry of Agriculture; and what his recommendations were for future strategy to protect *(a)* badgers and *(b)* cattle. [150713]

Mr. Bradshaw: A copy of Professor Zuckerman's 1980 report, in which he describes in detail his conclusions and recommendations, is available in the House of Commons Library.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment has been made of the effects of the use of more discrete methods of badger culling on culling results. [150893]

Mr. Bradshaw: It is not possible to draw an accurate comparison between different methods of culling badgers because there are no reliable methods of estimating badger populations either before or after culling.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage cull of badgers was originally proposed for the Krebs trials; how the culling was to be achieved; and in what ways the protocol was amended in the final version. [150895]

Mr. Bradshaw: The Krebs report advised that in reactive areas all badgers, including lactating sows, should be removed from all social groups with territories including the breakdown farm. In the proactive areas there should be total removal of complete badger social groups from localised areas at high risk of breakdown, before herd breakdowns occurred. It also recommended that the use of stop-snaring should be explored as an alternative to trapping, and that an expert group should be established to oversee the detailed experimental design and operation of the trial.

The group which was established, the Independent Scientific Group on Cattle TB, considered the possible use of snaring. It decided against this method of capture in favour of cage trapping and recorded the rationale for doing so in its first report (PB3881). That report also records its reasons for introducing a closed season for three months each year, when no trapping takes place.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether any behavioural patterns have been observed in badgers showing signs of TB which predispose them to closer contact with cattle. [150944]

Mr. Bradshaw: The Central Science Laboratory has just finished a research project at Woodchester Park to investigate the behavioural consequences of bovine TB infection in badgers. The findings of this study will be published in the scientific press shortly.

Bovine TB

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her Answer of 8 December 2003, *Official Report*, column 218W on bovine TB, how many countries use the current skin sensitivity test as the primary diagnostic tool for bovine TB; and how many have reported problems with this test. [150492]

Mr. Bradshaw: There are a number of different types of skin test in use around the world. We do not hold comprehensive information on the number of countries using each of these tests nor the way in which these tests are interpreted.

All countries that have either eradicated, or have a programme to control, bovine tuberculosis use one or more forms of the skin test. The Government have close links with a number of countries in various stages of eradication and exchanges information and experiences on the use of the tests in the context of these programmes.

The Government are not aware of any country that has replaced the skin test as the primary test for bovine tuberculosis.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether it is possible to determine the relative culpability of an owner of a herd in which a TB breakdown is recorded as to why animals become infected. [150502]

Mr. Bradshaw: In some cases, a TB breakdown may be attributable to a specific event, for example the purchase of an infected animal. In many cases, despite a veterinary investigation, it is not possible to determine the source of the infection with certainty. Defra does not attempt to determine relative culpability but has encouraged all farmers to take sensible precautions to reduce the risk to their cattle through the issue of the yellow "Better biosecurity" card and various booklets which contain guidance on disease prevention and control measures.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs, (1) how many deer have been subject to post mortem examinations by her Department for the presence of TB during the least five years; and how many were found to be infected; [150514]

(2) what historical data are held by her Department on the prevalence of bovine TB in the British deer population; and what those data indicate as to the incidence of bovine TB in that population; [150516]

(3) what her estimate is of the population of wild deer in England and Wales; what the estimated prevalence is of bovine TB in that population; and what concentrations there are of the disease in the wild population. [150515]

Mr. Bradshaw: No statutory body routinely collects information on overall wild deer numbers in England and Wales. Stephen Harris *et al.* (1995) estimated the pre-breeding population sizes for deer in Great Britain (Table 1).

Table 1: Population of wild deer in England and Wales (estimated)

Species	*England*	*Wales*
Red deer	12,500	<50
Fallow deer	95,000	<1,000
Roe deer	150,000	50
Sika deer	2,500	0
Muntjac deer	40,000	<250
Chinese water deer	650	0
Total	300,650	<1,350

Source:
Harris, S., Morris P., Wray S. and Yalden D. 1995. "A Review of British Mammals: Population Estimates and Conservation Status of British Mammals Other than Cetaceans". JNCC, Peterborough.

Table 2 shows the number of wild and farmed deer carcases, investigated for TB between 1992 and 2002 and the number of samples where *Mycobacterium bovis* (*M. bovis*) was found following bacteriological culture.

Table 2: Deer samples tested for bovine TB

	Total number of deer tissue submissions investigated by Veterinary Laboratories Agency (VLA)	*Number of confirmed TB cases in wild deer*	*Number of confirmed TB cases farmed/park deer*	*Total number of deer confirmed with TB*
1992	50	0	1	1
1993	33	1	0	1
1994	21	1	0	1
1995	[1]—	3	0	3
1996	[2]17	11	0	11
1997	11	3	0	3
1998	37	6	1	7
1999	49	7	3	10
2000	39	3	6	9
2001	28	0	1	1
2002	54	3	10	13

[1] Data not available.
[2] Most accurate data currently available.

Defra has funded a survey of wildlife in the south-west of England by the Central Science Laboratory. The first phase established whether *Mycobacterium bovis* (*M. bovis*—the causative organism for bovine tuberculosis) was present in a number of wild mammal species, including deer. *M. bovis* has been confirmed in five of the six established wild and feral species of deer in GB. The second phase of the survey (due to end March 2004) is to estimate prevalence of *M. bovis* in those species where it is found, by carrying out a more targeted and extensive sampling.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) pursuant to her Answer of 8 December 2003, *Official Report*, column 218W, on bovine TB, whether the occasions of severe interference in the operational Krebs triplets areas represented a significant interference; whether that level of interference affected the conduct and outcome of

the trials; and what the effects were of that interference in terms of *(a)* the outcomes and *(b)* the costs involved; [150565]

(2) how many farms were affected during the Krebs trials by a partial clearance of the badger population which was subsequently stopped; how many partial clearances were undertaken after a delayed start; and how the incomplete clearances affected *(a)* the conduct of the trials and *(b)* their outcome. [150575]

Mr. Bradshaw: There has been a level of illegal activity and interference with the operation of the Randomised Badger Culling Trial which is certainly undesirable and could be considered significant. The cost of replacing stolen, lost and damaged traps is estimated to be approximately £400,000. Other costs relate chiefly to the loss of staff time, which cannot be provided at proportionate cost.

At the time of cessation of the reactive strategy one premises was in the process of being trapped and the operation was concluded with only half the number of trapping nights completed. A number of other operations have been stopped early for a variety of reasons, for example bad weather or activity by animal activists. If an operation is not able to start as scheduled, it is extended to ensure that the standard period of two weeks' trapping is maintained.

Standard Operating Procedures take account of the possibility of interruption to trapping operations. Although interference varied across trial areas, the Independent Scientific Group on Cattle TB found that the increase in the incidence of TB in reactive culling areas when compared with control (no culling) areas was consistent across all triplets.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the percentage increase was in the number of TB reactor herds reported in 2003 compared with 2002; and what factors are believed to be responsible for this increase. [150576]

Mr. Bradshaw: In 2003, up to the end of November, there had been 2,880 new cattle herd TB incidents in Great Britain. In the same period in 2002, there were 3,035 new TB herd incidents reported.

It is difficult to draw comparison between 2002 and 2003, because the testing effort in 2002 was very much increased to clear the backlog of testing after the foot and mouth disease outbreak in 2001.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many herds required 60-day tuberculosis tests in 1988. [150586]

Mr. Bradshaw: In 1988, 351 herds required short-interval ('60-day') tests.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the estimated infective dose is of TB bacilli (*var bovis*) in respect of cattle, by reference to infection portals; what the peak load is of bacilli that can be excreted in the urine of infected badgers; and what the predicted die-off rate is of the TB bacilli on grassland. [150591]

Mr. Bradshaw: Determination of the minimum infectious dose of *Mycobacterium bovis* in cattle is part of the TB pathogenesis research programme. Early indications are that the minimum infectious dose for cattle via the respiratory tract is relatively small; the lowest infectious dose recorded so far is 70 colony forming units CFU, when introduced by the intracheal route or 9,600 CPU by the intranasal route.

Relatively high levels of *M. bovis* in the urine of badgers with renal TB have been identified by culture methods, so far bacterial loads of up to 300,000 colony forming units per millilitre of urine have been measured.

It is known that the survival of *M. bovis* on pasture is widely variable depending on climate and pasture type. In hot dry weather survival may be a day or less whereas in cool damp weather *M. bovis* may survive for several months and in some circumstances in excess of six months.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 8 December 2003, *Official Report*, column 216W, on bovine TB, what other rapid assay techniques are *(a)* available and *(b)* in the course of development which have the potential to speed up the detection of *M. bovis* in suspected TB lesions submitted for laboratory analysis. [150597]

Mr. Bradshaw: Several liquid culture methods are commercially available for the isolation of bacteria of the *Mycobacterium tuberculosis* complex from clinical samples. These methods are mainly used in medical laboratories for the diagnosis of TB in humans. Although the liquid culture media can significantly shorten culture times, they have not been optimised for isolation of *M. bovis*. The growth requirements of *M. bovis* and *M. tuberculosis* are slightly different and culture media that work for one mycobacterium may not work so well for the other.

The Veterinary Laboratories Agency (VLA) is evaluating the *M. bovis* recovery rates and ease of use of two of these liquid culture media compared with the traditional method used for cattle and badger tissues. Preliminary findings suggest that one of these systems might be adequate for rapid isolation of *M. bovis* from badger tissues. Additional experiments are under way to validate these findings and see if they can be extrapolated to cattle samples.

The VLA is also collaborating with the Imperial College in the design and optimisation of a polymerase chain reaction (PCR) assay for the detection of *M. bovis* DMA in suspect TB lesions.

Although this is a priority area of research for Defra, it is unlikely that any of the new laboratory tests being evaluated can totally replace the traditional culture technique.

Carcase Burial Pits

Mr. Burnett: To ask the Secretary of State for Environment, Food and Rural Affairs what costs were incurred by her Department and its predecessor in relation to the proposed carcase burial pits at Ash Moor in Devon, broken down by *(a)* costs in relation to the acquisition of rights of way, *(b)* costs of construction

including materials and off-site works, *(c)* security costs, *(d)* costs of restoration, including off-site works, *(e)* legal and professional fees and costs and *(f)* consultants' fees and costs. [151086]

Mr. Bradshaw *[holding answer 26 January 2004]:* The site was declared closed by Defra in late 2001. Costs incurred prior to 12/2001 relate to site construction, costs after 12/2001 relate to site management and restoration.

£

	Up to end 11/2001	*From 12/2001*
Purchase of site (inc Acquire rights of way)	300,000	Nil
Cost of Construction	5,686,000	965,350
Security (inc fence maintenance)	395,000	215,000
Legal fees (estimated)	100,000	70,000
Consultant fees and costs	203,000	[1]603,950

Notes:
[1] Figure quoted includes site management changes

Environmental Protection

Ms Walley: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department has spent in each of the past three years on training for environmental health officers under the Contaminated Land Regime, Part IIA of the Environmental Protection Act 1990; and if she will make statement. [150612]

Mr. Morley: With grant-in-aid from the Department, the Environment Agency enables training in procedural and technical aspects of the regime to include places for both local authority and Agency staff, in a joint approach. The latter often make up 75 per cent. or more of those attending.

The Agency spent around £180,000 on developing such training in 2003–04, and an estimated £120,000 to £150,000 per annum in earlier years. They work closely with the National Society for Clean Air, and the Chartered Institute for Environmental Health who also provide training for local authority staff. The Agency has made materials available for use by other training providers.

Ms Walley: To ask the Secretary of State for Environment, Food and Rural Affairs what financial and practical assistance her Department has given to environmental health officers since the Contaminated Land Regime, Part IIA of the Environmental Protection Act 1990 came into force; and if she will make a statement. [150613]

Mr. Morley: The Department has been providing financial assistance to English local authorities for contaminated land capital projects for many years. Since the introduction in April 2000 of the contaminated land regime in Part IIA of the Environmental Protection Act 1990, a total of £33.083 million capital funding has been provided, covering the financial years 2000–01 to 2002–03. Final figures are not yet available for 2003–04, but approvals to local authorities total a further £10.8 million, although the final outturn may be lower. Our project assessors frequently give advice to individual authorities which can save money and improve results.

To reflect the revenue implications of the regime for local authorities, £12 million per year was added to revenue support grant, and distributed in the normal way through the system of standard spending assessments. Capital and revenue support will continue under the new prudential finance system.

The Department, together with the Environment Agency, has also been producing procedural and technical guidance, notably the Contaminated Land Exposure Assessment (CLEA) Model and associated materials. This work is continuing. Details are available on the Department's website. The Environment Agency have also produced a number of technical and other documents.

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what impact she expects the increase in the Scottish North Sea fleet haddock quota will have on landed prices; [150322]

(2) what the effect on market prices is of major quota increases for a fish species. [150323]

Mr. Bradshaw: The price for an internationally traded species of fish, such as haddock, will tend to be influenced by the world price.

The processing industry imports substantial quantities of fish to meet its needs and over time can adjust its import needs for species such as haddock, if the price and quality of domestic landings are considered appropriate.

However, in the short term, prices for fish landed at UK ports may be affected by a number of factors, including the quality and size of fish, and whether exceptionally heavy or light concentrations of fish, are landed at particular times.

Prices can also be affected by marketing activities. I understand that Seafish and Seafood Scotland, with the support of Scottish fishermen, are about to begin a consumer campaign for marketing haddock.

GM Crops

Mrs. Spelman: To ask the Secretary of State for Environment, Food and Rural Affairs when the Government's response to the farm scale evaluations of GM crops will be published. [151642]

Mr. Morley *[holding answer 29 January 2004]:* The Government have received advice from the Advisory Committee on Releases to the Environment (ACRE) on the implications of the farm scale evaluation results. We are consulting with the devolved Administrations before deciding whether to accept ACRE'S advice.

The Government are now considering their overall policy on GM crops in the light of all the available information, including ACRE'S advice. We are aiming to set out our conclusions shortly.

Mrs. Spelman: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has for further scientific tests of GM crops following the farm scale evaluations. [151643]

Mr. Morley *[holding answer 29 January 2004]:* The Advisory Committee on Releases to the Environment (ACRE) will advise on a case-by-case basis for each individual GM crop whether we have enough scientific evidence to enable us to make decisions. If further evidence is needed then we would expect the applicants to provide it. We are currently considering priorities for further publicly funded research in light of science review report.

Information Technology

Mr. Allan: To ask the Secretary of State for Environment, Food and Rural Affairs what cost savings have been made in her Department since the introduction of the Information Technology procurement Centre of Excellence; and how these were calculated. [151042]

Alun Michael: A Centre of Excellence was formally established within Defra in June 2003 to integrate the essential functions which underpin the successful delivery of all types of acquisition based programmes and projects. As cost benefits will not accrue until improvements start to take effect, it is too early to measure cost savings. All Centres of Excellence are currently developing future plans, and as part of this process measurement of savings will be defined and reported.

Ivory

Mr. Banks: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the Government's policy on the proposed sale of ivory stockpiles by *(a)* Namibia, *(b)* Botswana and *(c)* South Africa under the Convention on International Trade in Endangered Species. [150963]

Mr. Morley *[holding answer 28 January 2004]:* It was agreed at the 12th Conference of Parties to the Convention on International Trade in Endangered Species (CITES) in Chile in 2002, that any one-off ivory sales would be supervised through a strict control system. It was also agreed that no sales would take place before May 2004 at the earliest to provide time for baseline data to be gathered on population and poaching levels and for information to be obtained on whether potential importing countries can effectively regulate their domestic ivory markets. The aim of these controls is to prevent any illegal ivory from entering into legal markets and to discourage an upsurge in poaching.

The Government are strongly opposed to the illegal and unsustainable trade in elephant ivory. We will therefore insist at the CITES Standing Committee in Geneva in March 2004 that all of the strict conditions governing the one-off sale are met in full before any trade is allowed to go ahead.

Krebs Trials

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her Answer of 11 December 2003, *Official Report,* column 539W, what the detailed protocol was for the wildlife survey undertaken as part of the Krebs trials; and whether landowner participation was invited for the specific surveys carried out in pursuance of this survey. [150569]

Mr. Bradshaw: Survey techniques employed on this project to assess abundance of wildlife include spotlight surveys of hedgehogs, foxes, rabbits and brown hares and count surveys of ground-nesting birds. Radiotelemetry is also used to study the behaviour and mortality of hedgehogs, and video and still camera surveillance to monitor predation of birds' nests. Fox diet has been investigated through the collection of faecal samples. Detailed protocols of these techniques will be documented in scientific publications which are currently in preparation. All landowners were contacted to request their permission for access to land before surveys were carried out.

Rural Payments Agency

Mr. Oaten: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of appeals against the Rural Payments Agency were successful in *(a)* 2003–04 and *(b)* 2002–03. [151957]

Alun Michael: The Rural Payments Agency is responsible for the administration of the Integrated Administration and Control System (IACS) Appeal Procedure in England. The procedure was introduced on 1 April 2002 to provide IACS scheme applicants with easy access to an independent review of decisions on their claims. Those appellants who are unsuccessful at the first stage of the procedure have the opportunity to progress to a second stage. The percentage of successful appeals under each stage of the appeal procedure is as follows:

	2002–03	*2003 to date*
Number of appeals completed stage 1	50	48
Percentage successful/partially successful	30	27
Number of appeals completed stage 2	5	18
Percentage successful/partially successful	20	33

Mr. Oaten: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make it her policy to pay interest on the late settlement of rural payments due to appeals. [151959]

Alun Michael: The Rural Payments Agency will consider on a case-by-case basis requests for the payment of compensation in lieu of interest in successful appeals.

Mr. Oaten: To ask the Secretary of State for Environment, Food and Rural Affairs what the *(a)* total number and *(b)* average value of appeals under consideration by the Rural Payments Agency is. [151960]

Alun Michael: There are currently 28 Stage 1 and three Stage 2 appeals under consideration by the Rural Payments Agency under the Integrated Administration and Control System Appeal Procedure in England. Information on the average value of appeals under consideration can be obtained only at disproportionate cost.

Thames Gateway (Flood Risk)

John Austin: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment of flood risk in the Thames Gateway Development Area has been made by the Environment Agency; and if she will make a statement. [150902]

Mr. Morley *[holding answer 26 January 2004]*: The Thames Gateway Development area is currently protected from flooding to a standard in excess of 1:1000 (or a 0.01 per cent. chance).

This standard will be maintained until 2030 by the existing defences. The Environment Agency is now starting to consider the longer-term strategy for the whole Thames estuary beyond this date including mitigation for the impacts of climate change.

Warm Front

Ms Atherton: To ask the Secretary of State for Environment, Food and Rural Affairs what the rationale is behind the cut-off point of £14,200 for household income above which a family in receipt of working tax credit will not qualify for assistance through the Warm Front scheme. [150436]

Mr. Morley: This cut-off point was established to help target those on low incomes and therefore more likely to be in fuel poverty.

The eligibility criteria for Warm Front are broadly in line with the low income priority group for the Energy Efficiency Commitment (EEC). In a consultation document on the changes to the tax credit system affecting the priority group for the EEC, published by the Department in December 2002, a cut-off point of around £14,000 was proposed for child tax credit and working tax credit.

Following that consultation and consideration of the responses received, a cut-off point of £14,200 was set for the EEC. To maintain consistency, this was also introduced to the eligibility criteria for Warm Front.

NORTHERN IRELAND

Office of the Speaker

David Burnside: To ask the Secretary of State for Northern Ireland what the monthly cost of the Office of the Speaker of the Northern Ireland Assembly *(a)* was in the six months before suspension and *(b)* has been since suspension, broken down by (i) staff costs and (ii) administration costs. [150833]

Mr. Paul Murphy: The average monthly expenditure for the Office of the Speaker for the six months prior to suspension—from 1 May 2002 to 31 October 2002—was £15,234 of which staff costs accounted for £12,067 and administrative costs for £3,167. For administrative purposes figures have been included for the period up to and including 31 October 2002.

The average monthly expenditure for the Office of the Speaker for the eight months following suspension—from 1 November 2002 to 30 June 2003—was £18,881 of which staff costs accounted for £13,392 and administrative costs for £5,489. This included the costs of a number of events already planned prior to suspension of the Assembly.

The average monthly expenditure for the Office of the Speaker for the last six months—from 1 July 2003 to 31 December 2003—was £13,401 of which staff costs accounted for £12,846 and administrative costs for £555.

Children's Homes

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what plans he has to increase the number of children's home places in the province. [151185]

Angela Smith: In recent years the total number of available residential places has increased from 332 (2001) to 409 (January 2004). Plans for a further increase in the number of residential places and a continuing programme of replacements for unsuitable and substandard facilities are currently being developed but have not yet been fully finalised. It is expected that these further plans will involve an increase of around 50 in the number of residential places available over the next three years.

Civil Service

Mr. Mallon: To ask the Secretary of State for Northern Ireland what progress has been made in negotiating a pay settlement within the Northern Ireland Civil Service following the recent industrial action; and what steps the Department of Finance and Personnel have taken to engage in pay negotiations with union representatives. [151621]

Mr. Pearson: Extensive negotiations over several months did not result in an agreed pay deal for the 11 departments of the Northern Ireland Administration this year. Management Side presented an offer worth 3.67 per cent. on 5 November. As this could not be agreed, and Trade Union Side declined to negotiate within the 3.67 per cent. envelope, we took the decision to proceed to pay the award and communicated this to staff and Trade Union Side on 27 November . I have made clear to Trade Union Side that the 3.67 per cent. deal is the maximum that can be paid. We are however open to exploring other reasonable means of resolving the dispute. A further meeting of the Central Whitley Council between Trade Union and Management Sides has been arranged.

Classroom Assistants

Lady Hermon: To ask the Secretary of State for Northern Ireland how many *(a)* part-time and *(b)* full-time classroom assistants were employed in Northern Ireland's schools in each year since 1997; and if he will make a statement on (i) the recruitment and (ii) the retention of classroom assistants in Northern Ireland. [150678]

Jane Kennedy: The information requested is as follows.

	Part-time	*Full-time*
1997[1]	2,181	705
1998[1]	2,696	748
1999[1]	3,019	793
2000[1]	3,273	815
2001[1]	3,558	886
2002	4,157	1,137
2003	5,133	1,178

[1] Figures for Voluntary Grammar Schools and Grant Maintained Integrated Schools are not available for these years.

Recruitment and retention of Classroom Assistants does not pose any difficulties in Northern Ireland.

Armagh College Staff

Mr. Mallon: To ask the Secretary of State for Northern Ireland what the full-time equivalent staffing complement at Armagh College of Further and Higher Education was at the end of academic years *(a)* 2001–02 and *(b)* 2002–03. [151620]

Jane Kennedy: The full-time equivalent staffing complements for Armagh College of Further and Higher Education for the specified academic years are:

(a) 2001–02: 95.31; and

(b) 2002–03: 95.11.

Dementia

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what recent steps he has taken to improve services for those who develop dementia early in life. [151183]

Angela Smith: The Health and Social Services Trusts provide a range of hospital and community-based services to people with dementia, including those who develop this condition early in life. However there are some younger people whose needs are not being fully met and Trusts are therefore working with this group to determine their specific requirements. The emphasis will be on maintaining people with dementia at home with adequate support from qualified and trained staff.

Dementia services will be included in a comprehensive evaluation of policy and services being undertaken by the Review of Mental Health and Learning Disability.

Disabled Persons

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what means are used to assist disabled persons in gaining employment in Northern Ireland. [151181]

Jane Kennedy: The Department for Employment and Learning through the Disablement Advisory Service provides advice, guidance, training and a job-placing service for people with disabilities and health issues. The service assists disabled people who wish to obtain or retain employment and is delivered by a team of Disablement Employment Advisers based in JobCentres/Jobs and Benefits Offices across Northern Ireland.

The Department provides a range of programmes which have been designed to assist people with a range of disabilities enter and keep employment. These include the Job Introduction Scheme, Access to Work, Employment Support and New Deal for Disabled People. The Department also administers European funding under the Programme for Building Sustainable Prosperity and the EQUAL Community Initiative which support people with health problems and disabilities return to employment.

The Special Needs Careers Service provides a service to young people with disabilities in full-time education and training and after completion of these.

E-Government

Lady Hermon: To ask the Secretary of State for Northern Ireland what steps he has taken to promote e-government services within his Department. [150666]

Mr. Spellar: The electronic delivery of services is central to our commitment to providing modern, efficient services and to making government more open and accessible to the public.

The publication of the OnlineNI Strategy in April 2003 provides a framework for the future development of e-government and electronic service delivery in Northern Ireland. Both Northern Ireland Departments and the Northern Ireland Office have a target to have 100 per cent. key services capable of being delivered electronically by the end of 2005.

Maternity Statistics

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many women from outside the United Kingdom and the Republic of Ireland gave birth at each maternity unit in the last 12 months; and if he will make a statement. [150753]

Angela Smith: One woman from outside the United Kingdom and the Republic of Ireland gave birth at a maternity unit in Northern Ireland during the last 12 months.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many women from outside Northern Ireland gave birth in the province in each of the last 12 months who were from *(a)* Great Britain, *(b)* the Republic of Ireland, *(c)* other EU countries and *(d)* outside the European Union; and if he will make a statement. [150754]

Angela Smith: The table shows the number of women from *(a)* Great Britain, *(b)* the Republic of Ireland, *(c)* other EU countries and *(d)* outside the European Union who gave birth in Northern Ireland in each of the last 12 months.

Month	*GB*	*ROI*	*EU*	*Non-EU*
January 2003	9	21	0	0
February 2003	1	27	0	0
March 2003	4	26	0	0
April 2003	8	22	0	0
May 2003	11	17	0	0
June 2003	11	25	0	0
July 2003	6	35	0	0
August 2003	8	24	0	0
September 2003	8	24	0	1
October 2003	9	24	0	0
November 2003	7	30	0	0
December 2003	7	22	0	0
Total 2003	89	297	0	1

Child Health System

MOT Tests

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many *(a)* successful and *(b)* failed MOT tests were performed at each test centre in Northern Ireland in the last 12 months. [151208]

Angela Smith: Information on successful and unsuccessful MOT tests could be provided from the manual test records of the Department of the Environment's Driver and Vehicle Testing Agency (DVTA) only at disproportionate cost. However, new information technology recently installed in all DVTA test centres will allow this information to be extracted in the future.

In the meantime, the table shows, by test centre, the number of all tests and re-tests (previous test failures) for all vehicle categories for which roadworthiness certificates are required, including those generally referred to as MOT tests. It should be noted that the re-test figures can include multiple re-tests on a single vehicle, that the re-test may not take place at the same centre as the original test and that re-test numbers may be affected by the proportion of tests on different categories of vehicles at individual test centres. The re-test figures do not include vehicles which fail the full test but are not subsequently presented for re-test.

Number of vehicle tests carried out—January to December 2003 (inclusive)

	Number of full tests	*Number of retests*
Armagh	23,859	6,391
Ballymena	40,706	8,121
Belfast	56,825	13,547
Coleraine	38,892	7,814
Cookstown	34,867	7,976
Craigavon	33,482	9,009
Downpatrick	28,642	6,280
Enniskillen	24,842	5,216
Larne	22,166	4,197
Lisburn	34,837	9,558
Londonderry	27,673	7,056
Mallusk	37,137	8,632
Newry	29,097	6,520
Newtownards	51,263	12,206
Omagh	20,871	5,114
Total	50,5159	11,7637

Moylinn GP Co-operative

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will make a statement on the relocation of the Moylinn General Practitioner Co-operative. [150732]

Angela Smith: I can advise that the out-of-hours facility at Moylinn will be moved to new purpose built premises on the Craigavon Area Hospital site. Building work is set to begin in the spring with the transfer of the out-of-hours services from Moylinn due to be completed early autumn this year.

Muckamore Abbey Site

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what input he has sought from service users into plans for redevelopment of the Muckamore Abbey Site. [151186]

Angela Smith: The redevelopment of Muckamore Abbey Hospital was first identified in strategies for services for people with learning disabilities produced by the Eastern and Northern Health and Social Services Boards in the mid-1990s. These strategies were the subject of extensive consultation, including public meetings held in number of venues throughout the Boards' areas.

In July 2000, North and West Belfast Health and Social Services Trust distributed 800 copies of a consultation document on Muckamore Abbey Hospital. A number of public meetings were held, including a briefing meeting held by the Chief Executive for MLAs. A team of social workers visited the families of every inpatient in the hospital to hear their views on the proposed changes to the hospital.

A service users' focus group has been set up which has been independently facilitated from outside the hospital. The focus group is made up of people who are currently hospital patients and people who are ex-patients. This is informing the modernisation process.

NHS

Lady Hermon: To ask the Secretary of State for Northern Ireland what charges are in place for people using NHS services in Northern Ireland who do not reside in the United Kingdom; and whether these charges extend to citizens from *(a)* the Republic of Ireland and *(b)* other EU member states. [150669]

Angela Smith: The responsibility for calculating charges for private patients, or for patients who are not ordinarily resident in the United Kingdom, lies with Health and Social Services Trusts, each of which maintains its own list of charges. Residents of countries within the European Economic Area (EEA) are entitled to free treatment if they are taken ill while visiting Northern Ireland. Patients may also be referred to Northern Ireland for treatment of a specific condition under formal contractual arrangements between individual hospitals or health boards. With the exception of cross-border workers, visitors from the Republic of Ireland have the same entitlement to treatment as those from any other EEA country.

Racist Incidents

Mr. McNamara: To ask the Secretary of State for Northern Ireland what assessment the Community Relations Council has made of the level of race hate crime in Northern Ireland; what remedies they recommend; and what action he has taken as a result. [149245]

Mr. Spellar: I have asked the Chief Executive of the Community Relations Council to write to my hon. Friend and I shall arrange for a copy of the letter to be placed in the Library of the House.

Orthopaedic Services

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what the average waiting times are for *(a)* inpatient admission and *(b)* outpatient assessment in each of the Province's orthopaedic centres. [151212]

Angela Smith: The information is as follows:

(a) The average waiting time for inpatient admission to the Trauma and Orthopaedic Specialty by Provider Trust in 2002–03 is shown in the following table.

Provider Trust	Average wait in days
Royal Group of Hospitals HSS Trust	16
Green Park Healthcare HSS Trust	174
Ulster Community and Hospitals Trust	21
Altnagelvin Group HSS Trust	188
Northern Ireland Average	162

Note:
The data are calculated based on those people who were electively admitted to hospital during 2002–03.
Data for the Royal Group of Hospital HSS Trust include patients admitted to the Trauma and Orthopaedic specialty in the Royal Belfast Hospital for Sick Children.
The casemix at the Royal Group of Hospitals HSS Trust and the Ulster Community and Hospitals Trust is different to the casemix at Green Park Healthcare HSS Trust and Altnagelvin Group HSS Trust. This accounts for the large variation in average waiting time between these Trusts.

Hospital Inpatients System

(b) The information requested is not available

Racism (Chinese Community)

Mr. Dismore: To ask the Secretary of State for Northern Ireland how many racist incidents involving victims from the Chinese community occurred in Northern Ireland in *(a)* each of the last three years and *(b)* the current year to date. [148257]

Mr. Spellar: I am sorry for the delay in replying.

Reported racial incidents against the Chinese community in Northern Ireland

Financial year	Number of attacks
2000–01	78
2001–02	33
2002–03	44
2003 to Present	58

Security Passes

Mr. Oaten: To ask the Secretary of State for Northern Ireland how many security passes have been reported *(a)* lost and *(b)* stolen by staff in (i) his Department and (ii) departmental agencies in the last 12 months. [147988]

Mr. Paul Murphy: Since January 2003 a total of 12 passes have been reported lost and two stolen by staff in my Department; and during the same period five were reported lost and two stolen by staff in departmental agencies. The likelihood of any increased threat to the Department or Agency as a result of the loss of a pass is assessed on each occasion and any appropriate action is taken.

This reply relates only to the Northern Ireland Office and does not cover the 11 departments of the Northern Ireland Administration.

Mr. Burstow: To ask the Secretary of State for Northern Ireland how many security passes have been reported *(a)* lost and *(b)* stolen by staff in his Department in the last 12 months. [150403]

Mr. Paul Murphy: I refer the hon. Member to the answer I gave today to the hon. Member for Winchester (Question Ref. 147988).

Sign Language

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how many individuals in Northern Ireland are trained in sign language. [151220]

Angela Smith: There are 17,000 people in Northern Ireland who have severe or profound deafness. Approximately 4,500 of these people use sign language. Hearing people who associate with signers in business or personal life also use sign language. Statistics are not available on how many individuals are trained in sign language, however, there are currently only five fully qualified registered BSL interpreters in Northern Ireland and one ISL interpreter.

The Council for the Advancement of Communication with Deaf People (CACDP) in Northern Ireland have provided details of the BSL and ISL training given at each level from 2000 to 2003.

Sign Language	2000	2001	2002	2003
Level 1[1]	456	592	522	386
Level 1[2]	63	60	32	27
Level 2[1]	72	60	81	84
Level 2[2]	12	16	20	13
Total	603	728	655	510

[1] British
[2] Irish

Working Time Regulations

Mr. McGrady: To ask the Secretary of State for Northern Ireland how many civil servants have applied under new Working Time Regulations to work from home, broken down by gender; and how many requests have been successful in each case. [149214]

Mr. Pearson: The number of applications to work from home made by civil servants employed in NI Departments and the Northern Ireland Office under the Employment (Northern Ireland) Order 2002 (which came into effect on 6 April 2003), and the number of successful requests, are shown in the table.

The procedures and timescales to be followed are specified in the Flexible Working (Procedural Requirements) Regulations (Northern Ireland) 2003.

Also shown are the number of applications received since 6 April 2003 under existing work-life balance provisions, made outside the scope of the legislation, and the number of successful requests.

	Requests under legislation			Requests made outside the scope of the legislation		
Requests for home-working since 6 April 2003	Male	Female	Total	Male	Female	Total
Applications	[1]3	3	6	3	[1]3	6
Successful applications	1	2	3	1	1	2

[1] One application currently under consideration.

HEALTH

Abortion Act

Jim Dobbin: To ask the Secretary of State for Health (1) if he will make a statement on the application of section 1(1)(d) of the Abortion Act 1967 (as amended); [143172]

(2) if he will make a statement on whether cleft palate or cleft lip are regarded as serious handicaps for the purpose of section 1(1)(d) if the Abortion Act 1967 (as amended). [143173]

Miss Melanie Johnson: Parliament decided in 1967 that a pregnancy could be terminated by a registered medical practitioner if two registered medical practitioners are of the opinion, formed in good faith that there is a substantial risk that if the child were born it would suffer from such physical or mental abnormalities as to be seriously handicapped. The term "seriously handicapped" has not been interpreted by any court decisions.

Permission to proceed to a judicial review on these matters was granted on 1 December 2003 and will be considered by the courts at a hearing starting on 24 May 2004. The claimant is also seeking a declaration as to the incompatibility of section 1(1)*(d)* of the Abortion Act 1967 with Articles 2, 3, 8 and 14 of the European Convention on Human Rights. A Minister of the Crown is entitled to join any proceedings where the Court is considering whether to make a declaration of incompatibility. The Secretary of State for Health has now given formal notice of his intention to join the proceedings to assist the court on these matters.

Cancer Research

Mr. Baron: To ask the Secretary of State for Health when his Department plans to complete its evaluation of the SunSmart campaign; and when he will decide the amount of funds Cancer Research UK will receive to continue the campaign. [152010]

Miss Melanie Johnson: Evaluation of the SunSmart campaign is being undertaken on an on-going basis. Cancer Research UK is working on a plan for future activity on the basis of lessons learned from the underpinning qualitative research by the University of Strathclyde, which was completed in September 2003. Decisions on the funding of a future campaign will be taken in due course.

Civil Servants

Dr. Cable: To ask the Secretary of State for Health how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* Greater London. [150286]

Ms Rosie Winterton: The Department and its Executive Agencies occupies 71,369 m^2 in Central London for the offices of civil servants and an additional 1,904 m^2 in Greater London.

Ectopic Pregnancy

Jane Griffiths: To ask the Secretary of State for Health what steps his Department is taking to reduce the number of deaths from ectopic pregnancy; and if he will make a statement. [150771]

Dr. Ladyman: The Department is currently preparing a national service framework for children, which will include standards for maternity care, including the management of problems in early pregnancy. It also currently provides Section 64 support for the organisation The Ectopic Pregnancy Trust, which provides information, support and advice to those affected by ectopic pregnancy, and works to raise awareness. Details of the grants provided are shown in the following tables.

Core grant

	£
2000–01	20,000
2001–02	20,000
2002–03	10,00

Project grant for the Chlamydia and Ectopic Pregnancy project

	£
2001–02	9,500
2002–03	9,500
2003–04	9,500

Food Supplements Directive

Dr. Iddon: To ask the Secretary of State for Health (1) whether the Minister for Public Health has set a date for his proposed meeting with Commissioner Byrne to discuss the interpretation of Article 5 of the Food Supplements Directive;. [144870]

(2) if he will list the dates when he expects that Ministers from his Department will meet their counterparts in each of the Member and Candidate States of the European Union to discuss the interpretation of Article 5 of the Food Supplements Directive; which officials will accompany Ministers at each of those meetings; what main points he expects will be made; and if he will make a statement. [144871]

Miss Melanie Johnson: Article 5 of the Food Supplements Directive lays out a framework for the future setting of maximum permitted levels of vitamins and minerals in food supplements, The European Commission has not yet made a proposal listing European Union maximum permitted levels for vitamins and minerals in food supplements and we do not expect it to do so for another two to three years.

The United Kingdom continues to take every opportunity to press its view that maximum levels should be set on a safety basis. I am seeking to arrange a discussion with Commissioner Byrne at the earliest practical opportunity.

Influenza

Mr. Burstow: To ask the Secretary of State for Health (1) what definition the Department uses of an influenza epidemic; [142961]

(2) how many reported cases of influenza there were in each of the last five years; and in which of these years the reported level of influenza cases has been classified as an epidemic. [142962]

Miss Melanie Johnson: The numbers of influenza-like illnesses reported to the Royal College of General Practitioners in the past five winter seasons are shown in the table.

In none of these years did the level of general practitioner consultation rate reach 400 per 100,000 of the population, which is the level required to be classed as an epidemic.

	Number of influenza like illnesses
1998–99	10,044
1999–2000	8,513
2000–01	5,901
2001–02	4,111
2002–03	3,541

Lancashire Teaching Hospitals Trust

Mr. Hoyle: To ask the Secretary of State for Health what the forecast outcome for the Lancashire Teaching Hospitals Trust is for 2003–04; what assessment has been made of its level of financial risk; and what loans it has *(a)* taken and *(b)* applied for from the NHS Bank in 2003–04. [151239]

Miss Melanie Johnson *[holding answer 27 January 2004]:* Audited information on the financial position of national health service trusts will be published in their individual annual accounts. These data will be available centrally in the autumn.

At the Cumbria and Lancashire Strategic Health Authority (SHA) Board meeting on 20 January 2004, Lancashire Teaching Hospitals NHS Trust reported a deficit of £1.7 million as at the end of December 2003. The SHA has assessed the financial risk and is forecasting a break even position for the Lancashire Teaching Hospitals NHS Trust at the end of the financial year 2003–04.

The SHA has not made an application to the NHS Bank on behalf of the trust in 2003–04.

Long-term Care

Mr. Burstow: To ask the Secretary of State for Health (1) pursuant to his answer of 20 January 2004, *Official Report*, column 1110W, on personal care charges, what the sources of the estimate are; and if he will place in the Library the assumptions and analysis from which this estimate was derived; [151468]

(2) pursuant to his answer of 20 January 2004, *Official Report*, columns 1110–11W, on long-term care, what the evidential basis is for his estimate; and if he will place in the Library the assumptions and analysis from which this estimate was derived. [151628]

Dr. Ladyman: The estimate for the cost of introducing free personal care was prepared by Department of Health economists using a variety of data and assumptions. An explanatory note has been placed in the Library.

Mental Health

Mrs. Helen Clark: To ask the Secretary of State for Health if he will make a statement on the relationship between the criminal guardianship powers in the Mental Health Act 1983 and the community treatment orders proposed in the Draft Mental Health Bill 2002. [149798]

Ms Rosie Winterton: Like the guardianship order, the proposed power—that the courts would make a mental health order without requiring residence in hospital—could enable people who needed treatment subject to sanction to receive it without resort to detention in hospital. Unlike the guardianship order, the proposed power would enable the admission of the person to hospital for compulsory treatment in the event of that becoming necessary for his own health or safety or that of others.

Mrs. Helen Clark: To ask the Secretary of State for Health what assessment he has made of the target groups of people with mental health problems who will be helped by the introduction of community treatment orders. [149800]

Ms Rosie Winterton: The provisions in the draft Mental Health Bill for formal powers to be used in the community are based on the principle of least restriction. When treating someone for mental disorder under formal powers, the restriction of their liberty should be the minimum necessary, taking into account all their circumstances and the need to protect themselves or others. The conditions setting out the circumstances in which formal powers may be used, must always be satisfied, whether treatment is to be provided in hospital or in the community. The power to impose requirements on patients in the community will however, in some circumstances, avoid patients having to go to hospital if appropriate alternative arrangements can be made.

The most important group that it is intended that these powers would be used for is people who have a history of admission to hospital, improvement and discharge, followed by relapse (known as "revolving door" patients). Currently there may be no alternative to renewed admission to hospital. Where someone is well known to services it may not be necessary for them to be reassessed and treated in hospital. Treatment under a regime of conditions and requirements in the community may be more appropriate and avoid the distress of repeated unplanned admissions to hospital.

These powers would also be available for those whose mental condition has improved while being treated under compulsion in hospital and for whom formal treatment in the community would provide a supportive transition, helping to prevent patients relapsing on discharge from hospital. There may also be other individual cases in which treatment under compulsion in the community would be more appropriate.

Formal treatment in the community will also be an option for the Court to consider for mentally disordered offenders. It is intended that convicted offenders who require treatment for mental disorder could benefit if the court is satisfied that they do not need to be detained and clinicians confirm that treatment appropriate for the individual is available in the community.

The decision that compulsory treatment in the community is appropriate should always be based on the careful assessment of what is the most suitable way to treat and care for individual patients, taking into account all the circumstances of each individual case.

National Service Framework for Children

Tim Loughton: To ask the Secretary of State for Health when he expects to publish the National Service Framework for children. [152112]

Dr. Ladyman: The national service framework for children, young people and maternity services will be published later this year.

Osteoporosis

Chris Grayling: To ask the Secretary of State for Health what therapies other than Raloxifen will be provided by the NHS to patients suffering from osteoporosis. [151119]

Dr. Ladyman: There are a wide range of treatments available for patients suffering from osteoporosis. Some prevent bone breakdown and stimulate new bone formation while others help maintain bone density and reduce fracture rates. Individuals will receive treatment which best meets their needs.

Rainbows Children's Hospice (Leicestershire)

Keith Vaz: To ask the Secretary of State for Health if he will visit Rainbows Children's Hospice in Leicestershire. [151663]

Dr. Ladyman: Minister will be pleased to consider an invitation to visit from the Rainbows Children's Hospice in Leicestershire.

Telephone Masts

Sir Michael Spicer: To ask the Secretary of State for Health (1) what plans he has to set up a public inquiry into the health effects of G3 technology telephone masts; [147054]

(2) if he will make a statement on the health effects of G3 technology telephone masts. [147059]

Miss Melanie Johnson: Government advice on mobile phones and health is based on the Stewart Report, issued in May 2000 (www.iegmp.org.uk). In respect of base stations they concluded:

> The balance of evidence indicates that there is no general risk to the health of people living near to base stations on the basis that exposures are expected to be small fractions of guidelines.

The operators of mobile telephone equipment including 3rd Generation (3G) systems should ensure that public exposure does not exceed the guidelines of the International Commission on Non-Ionizing Radiation Protection. Measurements undertaken by the Radiocommunications Agency, now part of OFCOM (www.ofcom.org.uk/static/archive/ra/rahome.htm), have confirmed that public exposures are very much lower than the international guidelines.

The National Radiological Protection Board (NRPB) has statutory responsibility for providing overall advice on health risks from exposure to electromagnetic fields including radio waves. Research published since the Stewart Report, including research on 3G effects, has been reviewed by the NRPB's Advisory Group on Non-ionising Radiation. Their review was announced on 14 January 2004 and concludes that

> "The weight of evidence now available does not suggest that there are adverse health effects from exposures to RF (radiofrequency) fields below guideline levels, but the published research on RF exposures and health has limitations, and mobile phones have only been in widespread use for a relatively short time."

The report is available on the NRPB web site at: http://www.nrpb.org./ review/docs nrpb/absdl4–2.htm. Copies have been placed in the Library.

CONSTITUTIONAL AFFAIRS

Extradition

Mrs. Curtis-Thomas: To ask the Parliamentary Secretary, Department for Constitutional Affairs what steps are taken to satisfy district judges that each person consenting to extradition has had access to legal advice. [150341]

Mr. Leslie: Sections 45 and 127 of the Extradition Act 2003 state that a person may not give his consent to extradition unless he is legally represented. However, a sane person cannot be compelled to take legal advice if they do not wish it.

All defendants who waive legal advice either have the means, or have been offered legal aid, to obtain it, but have taken a decision not to do so. The Senior District Judge at Bow Street Magistrates Court has confirmed that no District Judge would permit a defendant to waive legal advice without satisfying him or herself that this requirement is met, and that the defendant has full understanding of the consequences of his decision.

In practice, all defendants in extradition proceedings are represented, either by their own solicitor, or by the court's duty solicitor, to whom they will have access.

Burglary

Vera Baird: To ask the Parliamentary Secretary, Department for Constitutional Affairs in how many and what proportion of cases resulting in convictions for *(a)* house burglary and *(b)* aggravated house burglary, bail was granted before conviction in each of the last six years. [152119]

Mr. Leslie: The number and proportion of defendants convicted in the Crown Court of either burglary or aggravated burglary of a dwelling, and who had been committed on bail by the magistrates' court are provided in the following table.

Convictions for offences of burglary and aggravated burglary in dwellings, and those defendants committed on bail by the magistrates' court, in the Crown Court, 1998–2003

	Convicted		Committed on bail		Proportion (per cent.)	
Year	Burglary	Aggravated burglary	Burglary	Aggravated burglary	Burglary	Aggravated burglary
1998	8,995	318	4,268	115	47.4	36.2
1999	8,266	271	3,746	108	45.3	39.9
2000	7,546	255	3,573	79	47.3	31.0
2001	6,435	265	3,007	99	46.7	37.4
2002	6,905	341	3,189	107	46.2	31.4
2003	7,061	301	3,232	75	45.8	24.9

Note:
Figures relate to number of defendants

Vera Baird: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many and what proportion of convictions for *(a)* burglary of a house and *(b)* aggravated burglary of a house resulted in a gaol sentence in each of the last six years. [152120]

Mr. Leslie: The number and proportion of defendants convicted of either burglary or aggravated burglary of a dwelling, and who received a custodial sentence in each of the last six years are provided in the following table.

Convictions and custodial sentences for offences of burglary and aggravated burglary in dwellings, in the Crown Court, 1998–2003

	Convicted		Custodial sentence		Proportion (per cent.)	
Year	Burglary	Aggravated burglary	Burglary	Aggravated burglary	Burglary	Aggravated burglary
1998	8,995	318	6,389	302	71.0	95.0
1999	8,266	271	6,070	270	73.4	99.6
2000	7,546	255	5,309	238	70.4	93.3
2001	6,435	265	4,564	261	70.9	98.5
2002	6,905	341	4,730	322	68.5	94.4
2003	7,061	301	4,530	264	64.2	87.7

Note:
Figures relate to number of defendants

Correspondence

Mr. Webb: To ask the Parliamentary Secretary, Department for Constitutional Affairs when he will reply to the letter of 29 August 2003 from the hon. Member for Northavon, forwarded to him by the Department for Work and Pensions, reference 142208, regarding Mr. Dicker. [151710]

Mr. Lammy: I shall reply to the hon. Member as soon as possible.

Information Technology

Mr. Allan: To ask the Parliamentary Secretary, Department for Constitutional Affairs what cost savings have been made in the Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151052]

Mr. Leslie: My Department established a centre of excellence covering all programmes and projects, including IT and procurement programmes and projects, in June 2003. The centre of excellence reviewed all pre-existing programmes and projects in October 2003 and identified £6.9 million savings that were made immediately. Further savings and other cost benefits will not accrue until planned improvements begin to take effect.

Legal Aid

Mrs. Curtis-Thomas: To ask the Parliamentary Secretary, Department for Constitutional Affairs what recent changes have been made to the provision of public funding to suspects before charge. [150792]

Mr. Lammy: No changes have been made to the provision of Criminal Defence Service (formerly criminal legal aid) funding to suspects before charge. However the Department for Constitutional Affairs consulted last year on proposals to improve value for money in the CDS and will shortly be announcing the result of the consultation.

Public Bodies (Membership)

Keith Vaz: To ask the Parliamentary Secretary, Department for Constitutional Affairs who the members of the *(a)* Imperial College Governing Body, *(b)* Court of UMIST, *(c)* Court of the University of Hull, *(d)* Court of the University of Sussex and *(e)* Court of the University of Ulster were on 1 January; what their term of office is in each case; and what their remuneration is. [151342]

Mr. Leslie: The Privy Council appointees for the bodies mentioned and their terms of office are set out as follows:

Imperial College—term of office 4 years:

Field Marshall Lord Vincent
Trevor Phillips OBE
Ms Charlotte L. Chothia
Balram Gidoomal
Sir Alastair Morton
Sir Peter Williams CBE

UMIST—term of office 3 years:

Denis Robson
Miss Dawn Gibbins MBE
Geoffrey Galley
Keith Beckett

University of Hull—term of office 3 years:

Lord Haskins

John Trebble

Michael Hollingbery

University of Sussex—term of office 3 years:

Mark Burrell

Mrs. Gail Rebuck

James Brathwaite CBE

University of Ulster—term of office 4 years:

The Lord Glentoran CBE

Mrs. Bernadette Grant

How Universities remunerate the members of their councils is not a matter for the Privy Council Office, but this information should be available from the bodies themselves.

Keith Vaz: To ask the Parliamentary Secretary, Department for Constitutional Affairs who the members of the *(a)* Court of Victoria University of Manchester, *(b)* General Medical Council, *(c)* Royal Council of Veterinary Surgeons and *(d)* Royal College of Court were on 1 January; what their term of office is in each case; and what their remuneration is. [151457]

Mr. Leslie: The Privy Council appointees for the bodies mentioned and their terms of office are set out as follows:

Victoria University of Manchester—term of office three years

Dame Valerie Strachan DCB

Dr. Inayat Khan Babar

Colonel John Bradford Timmins QBE TD JP

Ms Dawn Peters

Anthony Nixon

General Medical Council—term of office four years

Kevin Baron MP

The Very Reverend Graham Forbes

Robert Nicholls

Ruth Evans

Dr. Arun Midha

Mrs. Patricia Moberly

David Bean

Sir Michael Buckley

Mrs. Gillian Camm

Stuart Heatherington

Robin McLeod

Dr. Joan Martin

Fiona Peel

Ann Robinson

Royal College of Veterinary Surgeons—term of office four years

James M. Scudamore

F. Brian Jennings

Mr. Martyn Jones MP

Mrs. Barbara Saunders

Royal College of Art—term of office three years

Dr. Kenneth Grange CBE

How these bodies remunerate the members of their councils is not a matter for the Privy Council Office, but this information should be available from the bodies themselves.

CULTURE, MEDIA AND SPORT

Heathfield Transmitter

Mr. Waterson: To ask the Secretary of State for Culture, Media and Sport when she expects that work on the Heathfield Transmitter will take place; and if she will make a statement. [152099]

Estelle Morris: The responsibility to convert the transmitter network to digital lies with broadcasters. As there are not enough frequencies to broadcast both analogue and digital signals with sufficient power levels throughout the country, digital reception will not be available in Eastbourne before digital switchover. We are committed to switchover, which we believe could be achieved between 2006 and 2010, but we are not yet in a position to decide a firm timetable.

Heritage Lottery Funding (Trafford)

Mr. Brady: To ask the Secretary of State for Culture, Media and Sport how much Heritage Lottery funding has been awarded in the Trafford Metropolitan Council area in each of the last five years. [151125]

Estelle Morris: The Heritage Lottery Fund has awarded the following in the Trafford Metropolitan Council area in each of the last five years:

Financial year	£
1997–98	225,000
1998–99	32,800
1999–2000	nil
2000–01	91,000
2001–02	25,000
2002–03	nil

TREASURY

R and D Tax Credits

Mr. Stephen O'Brien: To ask the Chancellor of the Exchequer pursuant to the Answer of 19 January 2004, *Official Report*, column 1044W, on research and development tax credits, how many claims for research and development tax credits from companies have been *(a)* accepted and *(b)* rejected by the Inland Revenue; and if he will make a statement. [151786]

Dawn Primarolo *[holding answer 29 January 2004]:* The figure of over 8,000 claims given in the first of my answers of 19 January 2004, *Official Report*, column 1044W, represents the number of Corporation Tax Self Assessment returns where companies have claimed research and development tax credits. The number of claims that have been adjusted following an inquiry by Inland Revenue is not available.

Business Tax Credits

Mrs. Gillan: To ask the Chancellor of the Exchequer how many businesses notified the Inland Revenue of their intention to claim tax credits in future financial years when trading at a profit as a result of trading

losses, in the most recent year for which figures are available; and what the total sum of tax credits so notified was. [152184]

Ruth Kelly: Loss making small companies can in certain circumstances choose to either claim payable credits under the research and development tax credit scheme or instead claim enhanced tax relief in future accounting periods.

Information on the number of such companies that have chosen to claim the enhanced tax relief and the amount of this relief is not available.

Gangmasters (Agriculture)

Mr. Connarty: To ask the Chancellor of the Exchequer how much in unpaid *(a)* income tax and *(b)* national insurance contributions has been recovered from gangmasters operating in the UK's agricultural sector since 1994. [152097]

Dawn Primarolo: The Inland Revenue does not keep a separate record of recoveries of unpaid income tax and National Insurance Contributions from agricultural gangmasters. It would be disproportionately expensive to provide it.

Customs and Excise

Andrew George: To ask the Chancellor of the Exchequer (1) what *(a)* budgets have been agreed and *(b)* costs have been incurred in fulfilling HM Customs and Excise obligations in respect of ports and airports (i) in the south east of England and (ii) elsewhere for each of the last six years for which records are available; [150983]

(2) how much HM Customs and Excise has spent on *(a)* travel, *(b)* accommodation, *(c)* subsistence and *(d)* other costs in respect of the establishment of mobile teams to support its work at ports and airports in (i) the south east of England and (ii) elsewhere for each of the last six years for which records are available; [150984]

(3) what budget has been agreed for the creation of mobile Customs and Excise teams to cover ports and airports; and how much has been budgeted for *(a)* travel costs, *(b)* accommodation, *(c)* subsistence allowance and *(d)* other costs related to the expense of establishing the service and re-deploying staff. [150987]

John Healey *[holding answer 26 January 2004]:* HM Customs and Excise reorganised in April 2001, creating a Law Enforcement (LE) arm of approximately 7,500 officers. LE staff perform the majority of Customs operational activity at ports and airports in the UK. One of the aims of this restructuring and the subsequent LE business plan for 2003 to 2006 is to build a more intelligence-led, mobile and flexible workforce. The south region includes the south-east, south-west and central southern England.

The following table gives the authorised expenditure of the LE organisation on salaries, travel and subsistence and other running costs. These costs exclude the intelligence operational arm which is not managed on a comparable regional basis. Comparative data are not available for the years prior to the creation of Law Enforcement.

£ million

	Authorised regional spend	*of which: Travel and subsistence*[1]
2001–02 outturn		
South region	62.9	2.3
Elsewhere	148.9	7.7
2002–03 outturn		
South region	63.9	2.3
Elsewhere	144.3	8.4
2003–04 forecast		
South region	62.4	2.5
Elsewhere	143.7	8.2

[1] Includes costs for travel, temporary accommodation and subsistence costs.

Note:
Separate figures are not available in the format requested.

Mrs. Gillan: To ask the Chancellor of the Exchequer when the Acting Chairman of HM Customs and Excise will reply to the letter of 27 October 2003 from the hon. Member for Chesham and Amersham about the Chalfont St. Giles Bowling Club. [152185]

John Healey: Customs and Excise replied to the hon. Member's letter on 29 January 2004.

Inland Revenue

Mr. Bellingham: To ask the Chancellor of the Exchequer what targets have been set for the answering of correspondence by the Inland Revenue. [151836]

Dawn Primarolo: The targets for post in local tax areas in 2003–04 are:

80 per cent. of post worked within 15 working days.

95 per cent. of post worked within 40 working days.

80 per cent. of post worked within 15 working days dealt with completely and correctly.

Mr. Bellingham: To ask the Chancellor of the Exchequer how much correspondence to the Inland Revenue at present remains unanswered after *(a)* three, *(b)* six and *(c)* nine months. [151837]

Dawn Primarolo: The Inland Revenue does not keep records on this basis. The current target for local tax areas is to work 80 per cent. of post (which includes correspondence and other items) within 15 working days and 95 per cent. of post within 40 working days.

Labour Productivity Levels

Mr. Redwood: To ask the Chancellor of the Exchequer what action the Government is planning to improve labour productivity levels. [151478]

John Healey: The Government are committed to raising the rate of UK productivity growth over the economic cycle, improving competitiveness and narrowing the productivity gap with the US, France and Germany. The Government's approach to raising productivity is set out in "Productivity in the UK: The Evidence and the Government's Approach", which was published alongside the 2000 pre-Budget Report.

The Government reports on steps to increase productivity in every Budget and pre-Budget Report. Recent key steps include the introduction of the

Enterprise Act 2002, the introduction of R&D tax credits, the reduction of corporation tax rates, implementation of major reforms to capital gains tax, proposals for new Enterprise Capital Funds to increase venture capital investment for small businesses with high-growth potential, increased investment to raise standards in education and to improve adult skills, and a comprehensive review of capital markets through the Myners, Sandler and Higgs reviews.

Foreign Earnings Deduction

Mr. Carmichael: To ask the Chancellor of the Exchequer what discussions his Department has had with representatives of the shipping industry to discuss plans to prevent workers on offshore installations from receiving the foreign earnings deduction benefit; and if he will make a statement. [151603]

Dawn Primarolo: The intention of Foreign Earnings Deduction (FED) is to encourage seafarers to work on UK ships which can be called upon in time of conflict. Some workers on offshore installations are exploiting FED to seek a tax relief that was never intended for them. As announced in the pre-Budget Report, we will be introducing amendments to the legislation to make it clear that workers on offshore installations are not entitled to this relief and officials have begun discussions with industry representatives.

Mr. Carmichael: To ask the Chancellor of the Exchequer what plans he has to limit the entitlement to foreign earnings deductions for seafarers serving on ships registered in the UK or other EU countries; and what assessment his Department has made of the impact such a change would have on the UK shipping sector. [151605]

Dawn Primarolo: In the pre-Budget Report (Cm 6042), it was announced that there would be changes in the Foreign Earnings Deduction to prevent workers on offshore installations claiming the relief. Any changes beyond this would follow consultation with the shipping industry and trade unions and be consistent with the Government's continuing support for the UK shipping industry.

Pension Funds

Mr. Webb: To ask the Chancellor of the Exchequer what estimate he has made of the levels of public sector pension fund deficits. [150457]

Mr. Boateng: Information is not held centrally on all the pension schemes of public sector employers, which include schemes provided by public corporations and other bodies in addition to the major schemes established by statute for public service occupations. Among the major statutory schemes those for the civil service, NHS, teachers, police, fire and armed forces are unfunded and the only major public service scheme that has funds is the Local Government Pension Scheme (LGPS). The LGPS is supported by individual funds held at local level. The last triennial valuations of these funds for England and Wales were conducted in 2001 and showed an actuarial value of aggregate assets of £85.3 billion being held against liabilities of £91.5 billion, giving a deficit of £6.2 billion. All the LGPS funds met the solvency requirements of the scheme.

Project ASPIRE

Mr. Gray: To ask the Chancellor of the Exchequer pursuant to his Answer of 14 October 2003, *Official Report*, column 141W, on Project ASPIRE, on what date Inland Revenue first held a meeting to which it invited all suppliers with whom it was engaging in the market-making exercise for Project ASPIRE; and which of the suppliers did not attend. [152231]

Dawn Primarolo: As I stated in my answer of 14 October 2003, *Official Report*, column 140W, the Inland Revenue actively engaged with 14 suppliers in the course of the market-making exercise for Project ASPIRE. My answer provided the names of these companies. These suppliers were offered initial meetings with the Inland Revenue, and these took place during November and December 2001. None of the suppliers directly approached by the Inland Revenue, as part of this exercise, refused the opportunity to discuss the ASPIRE competition.

An open meeting was held for all interested suppliers on 7 March 2002, which was attended by 42 potential suppliers. No one supplier was directly approached for this meeting, instead the event was advertised through the Inland Revenue's website.

Mr. Gray: To ask the Chancellor of the Exchequer pursuant to his answer of 16 December 2003, *Official Report*, column 803W, who the board member responsible for Mr. John Yard's division was; and when he commenced planning for project ASPIRE. [152233]

Dawn Primarolo: As I stated in my answer of 16 December 2003, *Official Report*, column 803W, planning for the ASPIRE project began in January 2001. The Board member responsible for Business Services at that time was Tim Flesher, the Inland Revenue's Deputy Chairman. After Tim Flesher moved to another Government Department in April 2003, Helen Ghosh took on Board level responsibility for Business Services.

Sports Facilities

Charles Hendry: To ask the Chancellor of the Exchequer what estimate he has made of the VAT receipts that would accrue to the Treasury from the construction of new sports facilities associated with the 2012 Olympic bid. [151976]

Ruth Kelly: No estimate has been made. By long-standing convention, HM Customs and Excise does not publish details of the VAT collected from individual bodies or in respect of individual transactions. It is for individual bodies to publish any such information as appropriate to their reporting obligations. All construction projects undertaken in the UK are subject to the same set of VAT rules laid out in the VAT Act 1994.

Charles Hendry: To ask the Chancellor of the Exchequer what level of VAT receipts the Treasury has received from the construction of sports facilities for each year since 1997. [151977]

Ruth Kelly: HM Customs and Excise are unable to calculate VAT receipts from the construction of sports facilities. It is not possible to identify specific sources of VAT revenue from VAT returns. Any data available on expenditure on such construction projects would not be sufficient to estimate relevant VAT receipts as the degree to which VAT is due and reclaimable on the construction of sports facilities will vary.

Sunset Clauses

Mr. David Stewart: To ask the Chancellor of the Exchequer if he will make a statement on his policy on the use of sunset clauses in legislation; and which Acts containing such clauses relevant to his Department were passed in each year since 1997. [149335]

Ruth Kelly: HM Treasury, together with the Inland Revenue and HM Customs and Excise, actively promote the better regulation agenda and the use of sunsetting provisions where appropriate.

The need for any such provision is considered on a case-by-case basis. Every Finance Act, for example, contains some provisions which apply only for the purposes of the particular tax year to which it relates, and accordingly, these provisions may be considered to be sunset provisions.

Particular cases of Finance Act sunsetting provisions are section 107(5) of the Finance Act 2001 (which incorporated a sunset provision applicable to that section only) and section 112 of the Finance Act 2003 (which contains a time-limited power, which was exercisable only before the implementation of Part 4 of that Act on 1 December 2003, to amend the provisions of that Part).

Some of the transitional provisions connected with the coming into force of the Financial Services and Markets Act 2000 ceased to have effect on a certain date.

Taxable Income

Denzil Davies: To ask the Chancellor of the Exchequer what the total value was of the taxable income from employment in each of the last three financial years for which figures are available. [151704]

Dawn Primarolo: The latest information is contained in table 3.6 on the Inland Revenue website http://www.inlandrevenue.gov.uk/stats/income_distribution/pi_t06_1.htm. For earlier financial years I refer my hon. Friend to paper copies of Inland Revenue Statistics table 3.6 which are available in the House of Commons Library. These estimates are based upon the Survey of Personal Incomes.

Thalidomide Victims

Norman Lamb: To ask the Chancellor of the Exchequer what progress is being made in discussions with the Thalidomide Trust with regard to the tax treatment of payments to victims. [151606]

Dawn Primarolo: Discussions between the trustees of the Thalidomide Trust and officials of the Inland Revenue about the tax treatment of payments to beneficiaries of the trust are continuing. No conclusion has yet been reached.

DEFENCE

Air Defence Destroyers

Dr. Julian Lewis: To ask the Secretary of State for Defence what the *(a)* current and *(b)* planned requirements are for the number of air defence destroyers. [150870]

Mr. Ingram: There are currently 11 Royal Navy Type 42 air defence destroyers. There are six Type 45 destroyers currently on order. Decisions about further orders of Type 45s are not expected until the middle of this decade.

Aircraft Carriers

Dr. Julian Lewis: To ask the Secretary of State for Defence what the planned paying-off dates are for each of the fleet's aircraft carriers. [150871]

Mr. Ingram: The planned decommissioning dates for the Royal Navy's Invincible class aircraft carriers are listed as follows:

HMS Invincible: 2010

HMS Illustrious: 2012

HMS Ark Royal: 2013

Dismounted Countermine Capability Programme

Mr. Martyn Jones: To ask the Secretary of State for Defence if he will make a statement on progress on the Army's proposed Dismounted Countermine Capability programme. [149540]

Mr. Ingram: The Dismounted Countermine Capability (DCMC) programme is intended to provide dismounted personnel with an improved capability to locate and deal with anti personnel (AP) and anti tank (AT) mines. DCMC seeks to provide a solution based on the need to detect mines, mark individual mines and areas of mine contamination, neutralise individual mines, and communicate information about these actions to other forces on the battlefield.

DCMC gained Initial Gate approval in March 2003. In August 2003, following a competitive downselection, Thales Missile Electronics was awarded a contract to complete a Study Assessment Programme. Initial work suggests that a technological answer to the problem of detecting minimum metal and non metallic mines (modern mines made from plastics and other non metal materials) is likely to be feasible.

HMS Bridport

Dr. Julian Lewis: To ask the Secretary of State for Defence for how long HMS Bridport was laid up; and for what reason. [150865]

Mr. Ingram: HMS Bridport has been in a state of extended readiness since March 2002. This was a programming decision made as part of the routine management of the fleet.

HMS Enterprise

Dr. Julian Lewis: To ask the Secretary of State for Defence what elements of the propulsion system of HMS Enterprise have been transferred to HMS Echo;

and whether his Department is seeking compensation from the contractor following technical problems with HMS Enterprise. [150859]

Mr. Ingram: HMS Enterprise's Azipod Propulsors were transferred to HMS Echo in October 2003 in order to expedite her entry into service with the Royal Navy. The Department and Prime Contractor are currently negotiating over liability and compensation for the problems that gave rise to this transfer.

Iraq

Jeremy Corbyn: To ask the Secretary of State for Defence how many cluster bombs have been defused in Iraq by bomb disposal squads since 1 May 2003; and if he will make a statement. [148296]

Mr. Ingram: To date around 675,000 munitions have been cleared in the UK area of responsibility. We do not record individual types of munitions cleared.

Lieutenant Lewis Page

Dr. Julian Lewis: To ask the Secretary of State for Defence whether Lieutenant Lewis Page was given authorisation while a serving officer to publish an article in *Prospect* magazine. [150861]

Mr. Caplin: Lieutenant Page was not properly authorised to publish this article.

RAF Bicester

Mr. Lidington: To ask the Secretary of State for Defence how many accidents there were at RAF Bicester in the last five years; how many involved gliders or training aircraft; and if he will make a statement. [147964]

Mr. Caplin: The following table details incidents that have occurred at RAF Bicester over the last five years. The table includes incidents involving other users of the airfield, notably Oxford University Gliding Club. All the incidents occurred within the confines of Bicester airfield and none resulted in any injuries.

SER No	*Date*	*Agency*	*Glider type*	*Description of incident*
1.	31 May 1998	Oxford University GC	Oxford University GC K21	Ground incident when winch cable snagged glider. Minor damage to glider, but no injuries.
2.	11 June 1999	Joint Service Adventurous Training Gliding	RAF Gliding and Soaring Association K21	Ground loop on landing when wing tip makes contact with ground. Minor damage to glider, but no injuries.
3.	11 May 2001	Oxford University GC	Oxford University GC K18	Ground incident in that tractor ran over wingtip. Minor damage to glider, but no injuries.
4.	23 May 2001	Oxford University GC	Oxford University GC K21	Early solo student allowed undershoot to develop, clipping a tree resulting in a ground loop (See Ser No 2). Major damage to glider, but no injuries.
5.	23 May 2001	Joint Service Adventurous Training Gliding	RAF Gliding and Soaring Association K21	Heavy landing. Minor damage to glider, but no injuries.
6.	25 May 2003	British Gliding Association Visitor	Discus	Ground incident where glider was towed into wingtip contact with another glider. Minor damage to one of the gliders, but no injuries.
7.	25 August 2003	Oxford University GC	RAF Gliding and Soaring Association Astir CS GRP	Pilot allowed undershoot to develop. Glider ploughed through hedge onto the airfield. Major damage to glider and hedge, but no injuries.

Reservists

Lady Hermon: To ask the Secretary of State for Defence how many reservists mobilised for operational service under *(a)* Operation Telic 1 and *(b)* Operation Telic 2 under the provisions of the Reserve Forces Act 1996 have lost their jobs since returning from service; what his Department did to support them in retaining their employment rights; and if he will make a statement. [151426]

Mr. Caplin: There is no requirement for reservists to provide the information requested to the Ministry of Defence. There is, therefore, no comprehensive record of the numbers of reservists who may have lost their civilian job. However, indications are that civilian employers have been very supportive of reservists and, of over 8,600 reservists called-out to support Op Telic, we are aware of only 14 individuals who have brought cases under the 1985 Act.

The Ministry of Defence provides detailed advice to demobilising reservists to ensure that they are aware of their legal right to reclaim their civilian employment. The Supporting Britain's Reservists and Employers (SaBRE) campaign team provides a help line and a website which gives additional information and advice. Also, each Reserve Forces and Cadet Association (RFCA) has an Employment Support Executive who is able to offer advice and assistance to reservists who are experiencing problems returning to their civilian employment.

Lady Hermon: To ask the Secretary of State for Defence what provision is being made to ensure that life insurance and other financial services made available to reservists being mobilised for operational service in Iraq are of a similar standard and as affordable as those offered to reservists mobilised under Operation Telic 1; and if he will make a statement. [151427]

Mr. Caplin: The only financial service specifically for reservists which MOD facilitates is RPAX, which provide personal accident and life cover—there is a similar product, PAX, for regulars. RPAX was available to reservists mobilised under Operation Telic 1, and is still available now. Information about RPAX was then and still is advised to individual reservists and units.

Scottish Regiments

John Thurso: To ask the Secretary of State for Defence if he will list the Scottish Regiments; what their authorised strength was; and how many vacancies there were in each year since 1997. [150398]

Mr. Caplin: The establishment, trained strength and difference, of each of the Scottish Regiments, are as follows:

Highlanders

	Establishment	Trained strength	Difference
1997	660	615	-45
1998	660	585	-75
1999	660	505	-155
2000	660	500	-160
2001	610	495	-115
2002[1]	665	520	-145
2003[1]	625	520	-105

[1] Strength totals for 2002 and 2003 exclude Gurkhas attached to the regiment: 100 in 2002, and 110 in 2003.

Black Watch

	Establishment	Trained strength	Difference
1997	595	515	-80
1998	595	540	-55
1999	595	510	-85
2000	705	510	-195
2001	670	565	-105
2002	675	535	-140
2003	675	585	-90

Note:
Black Watch totals exclude BW LAD REME.

Royal Scots

	Establishment	Trained strength	Difference
1997	665	495	-170
1998	665	510	-155
1999	665	470	-195
2000	595	470	-125
2001	610	515	-95
2002	620	495	-125
2003	620	525	-95

Royal Highland Fusiliers

	Establishment	Trained strength	Difference
1997	705	595	-110
1998	705	620	-85
1999	705	580	-125
2000	595	625	30
2001	605	530	-75
2002	620	530	-90
2003	620	540	-80

King's Own Scottish Borderers

	Establishment	Trained strength	Difference
1997	595	545	-50
1998	595	565	-30
1999	595	505	-90
2000	595	550	-45
2001	640	585	-55
2002	620	645	25
2003	665	630	-35

Argyll and Sutherland Highlanders

	Establishment	Trained strength	Difference
1997	595	555	-40
1998	595	595	0
1999	595	600	5
2000	595	600	5
2001	610	590	-20
2002	620	580	-40

Argyll and Sutherland Highlanders

Royal Scots Dragoon Guards

	Establishment	Trained strength	Difference
1997	410	385	-25
1998	410	370	-40
1999	410	370	-40
2000	410	405	-5
2001	500	415	-85
2002	495	440	-55
2003	500	475	-25

Note:
RSDG totals exclude LAD REME.

Scots Guards

	Establishment	Trained strength	Difference
1997	595	530	-65
1998	595	520	-75
1999	595	530	-65
2000	595	560	-35
2001	610	645	35
2002	625	565	-60
2003	625	565	-60

F Coy Scots Guards

	Establishment	Trained strength	Difference
1997	105	85	-20
1998	105	100	-5
1999	105	95	-10
2000	105	115	10
2001	105	100	-5
2002	105	115	10
2003	110	115	5

Notes:
1. The figures are at 1 January each year.
2. All figures have been rounded to the nearest 5.
3. Totals are for Regular Army Officers and Soldiers.
4. FTRS have been excluded.
5. Totals include members of other Arms/Services attached to the regiment but exclude the 2 REME LADs attached to BW and SDG.
6. Historical establishments for F Coy Scots Gds to be confirmed.

Service Medals

Mr. Wyatt: To ask the Secretary of State for Defence when the General Service Medal with Canal Zone clasp will be awarded to service men and women in the constituency of the hon. Member for Sittingbourne and Sheppey. [152068]

Mr. Caplin: I refer my hon. Friend to the answer I gave on 5 November 2003, *Official Report*, column 634W, to my hon. Friend the Member for Chorley (Mr. Hoyle).

Trident Programme

Angus Robertson: To ask the Secretary of State for Defence in what circumstances the Government would *(a)* deploy Trident nuclear weapons and *(b)* deploy Trident nuclear missiles on a first strike basis. [151597]

Mr. Hoon: As the Government have made clear on many occasions, we would be prepared to use nuclear weapons only in extreme circumstances of self-defence. As our overall strategy is to ensure uncertainty in the mind of any aggressor about the exact nature of our response, and thus to maintain effective deterrence, we do not define the exact circumstances under which we would be prepared to use nuclear weapons.

We would not use our weapons, whether conventional or nuclear, contrary to international law.

Angus Robertson: To ask the Secretary of State for Defence which threats the UK's Trident nuclear weapons are *(a)* intended to deter and *(b)* targeted against. [151598]

Mr. Hoon: I refer the hon. Member to paragraph 3.11 of the Defence White Paper published in December 2003 (Cm 6041). The UK's nuclear weapons are not targeted at any country.

Angus Robertson: To ask the Secretary of State for Defence what the role of the Trident programme is in combating international terrorism. [151599]

Mr. Hoon: As the Government have made clear on many occasions, we would be prepared to use nuclear weapons only in extreme circumstances of self-defence. I also refer the hon. Member to paragraph 21 of the SDR New Chapter, published in July 2002 (Cm 5566 vol. 1), where we stated that:

> 'The UK's nuclear weapons have a continuing use as a means of deterring major strategic military threats, and they have a continuing role in guaranteeing the ultimate security of the UK. But we also want it to be clear, particularly to the leaders of states of concern and terrorist organisations, that all our forces play a part in deterrence, and that we have a broad range of responses available.'

Angus Robertson: To ask the Secretary of State for Defence when the UK's Trident nuclear weapons system is due to come to the end of its service period; when a decision is due on whether to commission a new UK nuclear weapons system to replace the Trident programme when it comes to the end of its service period; and what consultation will be undertaken in advance of a decision on replacement. [151702]

Mr. Hoon: I refer the hon. Member to paragraph 3.11 of the Defence White Paper published in December 2003 (Cm 6041). Any decision on the UK's future nuclear deterrent capability will be open to scrutiny and debate in the normal way.

Unexploded Cluster Bombs

Mr. Hancock: To ask the Secretary of State for Defence how many *(a)* adults and *(b)* children under 16 have been (i) killed and (ii) maimed by unexploded cluster bombs dropped by British aircraft in (A) Kosovo, (B) Afghanistan and (C) Iraq since their invasion by coalition forces. [145494]

Mr. Ingram: UK aircraft have not dropped cluster bombs in Afghanistan.

We have no viable means of ascertaining the information for either Kosovo or Iraq.

EDUCATION AND SKILLS

Civil Servants (Disabled People)

Mr. Goodman: To ask the Secretary of State for Education and Skills if he will set out the number of employees in his Department who have a disability, broken down by disability type. [148992]

Mr. Charles Clarke: My Department is an active member of the Cabinet Office led Civil Service Disability Working Group, which was set up in January 2003 to look at disability collection issues, monitoring and non-declaration.

Over 5 per cent. (280) of staff employed in my Department have recorded a disability.

Information on the numbers by type of disability is set out in the table. Details are not published where the numbers are below five in order to protect the privacy of the individual, in line with Exemption 12 of the Code of Practice on Access to Government Information.

Disability type	*Number*
Hearing impairment	43
Learning difficulties	7
Mental illness	5
Mobility impairment	47
Physical coordination difficulties	5
Reduced physical capacity	51
Visual impairment	20
Unknown disability	66

The statistics exclude DfES staff in the Government Office network with a recorded disability where a breakdown by disability type could be obtained only at disproportionate cost.

Global Gateway for Learning

Mr. Boswell: To ask the Secretary of State for Education and Skills if he will make a statement on development of the Global Gateway for Learning since the Commonwealth Education Ministers' Conference in October 2003. [151114]

Mr. Charles Clarke: Development of the Global Gateway has continued on schedule since last October. The Global Gateway will be a new one-stop-shop website for UK schools on all aspects of international education. It will also enable UK schools and schools from across the world to develop effective partnerships (e.g. joint curriculum projects, professional development, collaborative opportunities etc.) through a school linking facility. I am pleased to announce that I will formally launch the website on 10 February 2004.

Information Technology

Mr. Allan: To ask the Secretary of State for Education and Skills what cost savings have been made in his Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151051]

Mr. Charles Clarke: A Centre of Excellence in Programme and Project Management was established

within the Department for Education and Skills in August 2002, to improve the planning and management of improvements in the education system. In June 2003, its remit was extended to integrate the essential functions which underpin the successful delivery of all types of acquisition based programmes and projects (including those concerned with procuring IT). As cost benefits for IT procurements will not accrue until improvements start to take effect, it is too early to measure cost savings. All Centres of Excellence are currently developing future plans and as part of this process methods for measuring savings are being worked out.

Jenny Gray

Tim Loughton: To ask the Secretary of State for Education and Skills what the *(a)* position and *(b)* role is of Jenny Gray, a civil servant in his Department. [151093]

Mr. Charles Clarke *[holding answer 26 January 2004]:* It is not our policy to comment on the position of individual civil servants.

University for Industry

Mr. Willis: To ask the Secretary of State for Education and Skills which targets have been set by Government for the University for Industry; and what progress has been made in meeting them. [150777]

Mr. Ivan Lewis *[holding answer 26 January 2004]:* Stretching targets are agreed annually between my Department and Ufi. They are set at challenging levels and are designed to build upon the achievements of previous years and to maintain Ufi's rapid progress.

The attached table (Annex 1) shows the targets agreed for 2003–04 and the progress made towards them by 31 December 2003.

Annex 1

	Definition	*2003–04 Target*	*Position at 31 December 2003*
Number of Learners	The total number of learners starting learndirect courses in 2003–04.	450,000 learners	350,953
Number of enrolments	The total number of enrolments on learndirect courses in 2003–04	1 million enrolments	602,308
New learners	60 per cent. of learners starting their first learndirect course are 'new learners' (i.e. learners that have not engaged in any other learning in the three years prior to registering with learndirect	60 per cent. of learners	50 per cent.
Workforce Development (1) SMEs	Numbers of SMEs sponsoring one or more of their employers on learndirect courses	70,000 SMEs engaged	34,907
Workforce Development (2) SMEs	Number of employees in SMEs enrolling on learndirect courses	200,000 enrolments on learndirect courses	118,575
Course Portfolio Diversification Skills for Life achievement	Number of Business and Management course enrolments Refers only to achievement of qualifications in England that can be counted towards the Government's 750,000 PSA Skills for Life Target	112,000 enrolments 8,000 achievements	90,167 541
Income generation	Ufi will generate £3.7 million from the sale of courses unsubsidised with public money to employers and to individuals	£3.7 million	£995,018
LSC Budget Management	Ufi will use its best endeavours to use all the LSC funding allocated for learndirect provision	By end 31 March 2004, no less than £151 million of the £159.5 million made available by the LSC for learndirect provision in the financial year 2003–04 shall have been used for the funding of learndirect provision	£104,338,468
Quality: Hubs and Centres	In 2003–04 Ufi/learndirect will achieve an average inspection grade awarded by the Adult Learning Inspectorate of 2.5	Average ALI inspection grade of 2.5	2.89
Quality: Learner Satisfaction Users of the learndirect Information and Advice Service	The percentage of learners satisfied with learndirect A total of number of helpline callers, web users, emails received and responded to and webchats held	87 per cent. 4.7 million	85 per cent. 3,726,801
Callers from within Government target range	Calls received by learndirect call centres from callers who are eligible to count towards the Government's level 2 PSA target	550,000	240,304
Quality Information and Advice Service	Percentage canvassed through a rolling customer satisfaction survey who agreed with the statement: "the overall quality of the service was good" (applicable to all IAS users as defined by agreed volume targets)	87 per cent.	93 per cent.

FOREIGN AND COMMONWEALTH AFFAIRS

Correspondence

Mr. Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) when he intends to reply to the letter to him dated 15 December 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. R. ul Haque Malik; [149546]

(2) when he will reply to the letter to him dated 15 December 2003 from the right hon. Member for Manchester, Gorton with regard to R. ul Haque Malik. [151227]

Mr. Mullin: My right hon. Friend the Foreign Secretary replied on 23 January.

Mr. Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) when he intends to reply to the letter to him dated 16 December 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. Ammar Marfani; [149552]

(2) when he will reply to the letter to him dated 16 December 2003 from the right hon. Member for Manchester, Gorton with regard to Mr. Ammar Marfani. [151229]

Mr. Mullin: My right hon. Friend the Foreign Secretary replied on 26 January.

Mr. Clelland: To ask the Secretary of State for Foreign and Commonwealth Affairs when he expects to reply to the letter from the hon. Member for Tyne Bridge of 8 January. [151905]

Mr. Mullin: I replied to my hon. Friend's letter of 8 January on 29 January, explaining the delay, advising that the matters he raised were the responsibility of the Home Office and that I had forwarded his letter to my right hon. Friend the Minister of State with responsibility for Citizenship, Immigration and Counter-Terrorism at the Home Office (Beverly Hughes) with a request that it be replied to urgently.

Iraq

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Government have asked the state from which they obtained intelligence on Iraq's alleged attempt to procure uranium from Africa if they may share that intelligence with *(a)* the United States Administration and *(b)* other governments. [151301]

Mr. Straw: The Government asked the originators of the intelligence that Iraq sought the supply of uranium from Africa to discuss the issue with the International Atomic Energy Agency (IAEA). The Government understand this was done shortly before the IAEA report of 7 March 2003. I am withholding further details of intelligence exchanges with allies under Exemption 1(c) of Part 2 of the Code of Practice on Access to Government Information.

North Korea

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made with proposals for North Korean students to come to the United Kingdom for cultural and language education to increase links at a sub-governmental level. [151900]

Mr. Rammell: The Government have no objection to students from the Democratic People's Republic of Korea (DPRK) studying language and culture courses in the UK. Through our policy of engagement with DPRK, we encourage the country to increase its citizens' exposure to the outside world. Our on-going programme of educational activity with DPRK includes Foreign and Commonwealth Office-funded (FCO), UK-based English language courses for DPRK officials, and an FCO-sponsored/British Council-managed English language course for teachers and students in universities in Pyongyang. We also provide educational materials to schools and universities in DPRK.

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking to secure greater access for western non-governmental organisations into the Democratic People's Republic of Korea. [151901]

Mr. Rammell: We regularly urge the Democratic People's Republic of Korea (DPRK) authorities to allow freer and wider access to and within DPRK for western non-governmental organisations (NGOs). We also supported the resolution adopted by the 2003 UN Commission on Human Rights, which calls for free and unimpeded access for NGOs to all parts of DPRK.

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what requests the Government have made to the Government of the Democratic People's Republic of Korea on access for international inspectors to their prison system. [151902]

Mr. Rammell: We have raised the issue of prison camps in the Democratic People's Republic of Korea (DPRK) with the DPRK authorities on a number of occasions, through our embassy in Pyongyang and the DPRK embassy in London. We encourage the DPRK Government to allow access to independent international inspectors to verify the reports of human rights violations in their prison system. Requests have been made for access by western diplomats to prisons, but these have yet to be granted.

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking to provide protection for economic and political refugees who leave the Democratic People's Republic of Korea and are hiding in China. [151903]

Mr. Rammell: We regularly raise the issue of North Korean refugees with the Chinese, including at the biannual UK/China Human Rights Dialogue. At the last round of the Dialogue, on 10–11 November 2003, we urged China to allow the UNHCR access to the border areas and to observe its obligations under the 1951 Refugee Convention.

We will continue to encourage greater co-operation between China and UNHCR on this issue.

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking to assist aid workers in the Democratic People's Republic of Korea to obtain timely and unimpeded access to distribute food aid to those people most in need. [151904]

Mr. Rammell: Most food aid in the Democratic People's Republic of Korea (DPRK) is distributed by the World Food Programme (WFP), a UN agency. We work closely with WFP and the resident aid community, and embassy staff travel frequently with WFP on their monitoring missions. We deplore restrictions placed on WFP by the DPRK authorities which limit their monitoring of food aid in many areas of DPRK, and we regularly urge the DPRK authorities to grant WFP full, unrestricted access to all parts of the country. Although the situation is not satisfactory, we welcome WFP reports of improvements in monitoring, access and food distribution systems.

Visas

Mr. Clelland: To ask the Secretary of State for Foreign and Commonwealth Affairs what conditions relate to the issuing of visas to nationals of countries in the Indian sub-continent. [151981]

Mr. Mullin: All entry clearance applications are considered against the relevant requirements of the United Kingdom's Immigration Rules which state that applicants must satisfy an Entry Clearance Officer, on the balance of probabilities, that they meet the requirements of these Rules in the category that they apply. The Rules are applied equally throughout the world, regardless of the nationality of an applicant or the country in which the application is made.

PRIME MINISTER

Officials' Meetings

Mr. Amess: To ask the Prime Minister when and where his officials last met officials from the Egyptian Government. [152187]

The Prime Minister: The British ambassador, officials from the embassy and other officials meet representatives of the Egyptian Government on a regular basis, in Egypt and in international forums.

TRADE AND INDUSTRY

Broadband Stakeholder Group

Michael Fabricant: To ask the Secretary of State for Trade and Industry when she will publish her proposals for a new consultative body to replace the Broadband Stakeholder Group. [151476]

Mr. Timms: The Government value the work of the Broadband Stakeholder Group and the significant contribution it has made to the successful development of broadband in the UK. The DTI is reviewing with stakeholders how the work of the BSG might best be taken forward in the future. I will make an announcement when the review has been completed.

Bank of Credit and Commerce International

Keith Vaz: To ask the Secretary of State for Trade and Industry when the Secretary of State last met the liquidators of BCCI. [149584]

Mr. Sutcliffe: Officials met one of the liquidators of BCCI on 4 March 2003 to review the progress of the liquidation.

Keith Vaz: To ask the Secretary of State for Trade and Industry which liquidators of BCCI the Chief Executive of the Insolvency Service met on 4 March 2003; and for what reason. [151679]

Mr. Sutcliffe: The Chief Executive of the Insolvency Service met Mr. John Richards, one of the liquidators of BCCI, on 4 March 2003 to discuss the progress of the liquidation.

Bankruptcies

Mr. Hancock: To ask the Secretary of State for Trade and Industry how many *(a)* personal and *(b)* company bankruptcies there were in each of the last three years for which there are records; what assessment she has made of recent trends; and if she will make a statement. [150214]

Mr. Sutcliffe: The following table shows total personal and company insolvencies in England and Wales for 2000 to 2002 and the first three quarters of 2003. Figures for 2003 as a whole will be available on 6 February.

The latest quarterly figures (Q3 2003) shows decreases in company insolvencies and increases in individual insolvencies, when compared to both the previous quarter and the corresponding quarter of 2002. The latest annual figures continue increasing trends in levels of insolvency since 1997 for both companies and individuals. However the annual rate of company insolvencies for the last 12 months remains at the Q2 level of 1.0 per cent., the lowest level since Q1 1989 and just over a third of the level reached following the recession in the early 1990s.

Insolvencies in England and Wales: Seasonally adjusted

	Company insolvencies			*Individual insolvencies*		
Years	*Total*	*Compulsory liquidations*	*Creditors' voluntary liquidations*	*Total*	*Bankruptcy orders*	*Individual voluntary arrangements*[1]

[3] Provisional.

Bribery

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what departmental investigations her Department has initiated into bribery allegations against a UK company since November 1997. [151511]

Mr. Sutcliffe: The Department's records concerning Companies Acts investigations are not kept in a manner which facilitates provision of the information requested. However, officials do not believe that any such investigations have been initiated into allegations of bribery since November 1997.

The Department also has a criminal investigation function, established principally to follow up allegations of offences under the Companies and Insolvency Acts. Examination of the records of this section do not reveal any allegations of bribery having been investigated since November 1997.

Such an allegation would, in most instances, be better suited to be dealt with by the wider powers of the police.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how many allegations of bribery have been received by the National Contact Point for the Organisation for Economic Co-operation and Development's Guidelines for Multinational Enterprises; and how many of these allegations have been forwarded to the National Criminal Intelligence Service. [151512]

Mr. Mike O'Brien: The NCP has received one allegation of bribery. The allegation was received verbally while attending a conference. The NCP asked that details be provided in writing; these details were then passed to the National Criminal Intelligence Service.

Buzzard Oil Field Contract

Mr. Hepburn: To ask the Secretary of State for Trade and Industry what the value of the Buzzard oil field contract is; which companies tendered for the contract; what the country of origin of each company is; and which company won the bid. [151151]

Mr. Timms: EnCana (UK) Ltd., Operator of the North Sea Buzzard oil field, anticipates that development costs on the project will be around £1.35 billion. There is no single contract to develop this field and the operator, solely responsible for project procurement, is still engaged in the process of awarding more than 200 separate contracts to suppliers from the UK, the wider EU and elsewhere.

EnCana advise however that UK-owned and UK-based companies have already won around two thirds of over £500 million worth of major contracts awarded on the project. I am pleased to acknowledge the successes of these companies who have again proved themselves competitive internationally. I am also advised that UK-based companies are likely to win yet more work from the contracts currently being tendered.

The following list gives an indication, in respect of some of the major contracts awarded thus far, of the operational location of those tendering and identifies successful companies. Values of individual tenders, and of contracts placed, are still considered commercially sensitive by the operator EnCana.

Service/Company	*Operational country*	*Award date*
Front End Studies		
Granherne	UK

Civil Partnerships Bill

Mr. Webb: To ask the Secretary of State for Trade and Industry what assessment she has made of the effects extending the provisions of the Civil Partnerships Bill to heterosexual couples. [147061]

Jacqui Smith *[holding answer 13 January 2004]:* Civil partnership is aimed at same-sex couples who cannot obtain full legal recognition of their relationships. Opposite-sex couples can achieve this through marriage. There can be no real benefit of extending to opposite-sex couples the right to achieve legal recognition of their relationships when they already enjoy that opportunity.

Company Liquidation

Keith Vaz: To ask the Secretary of State for Trade and Industry how many companies went into liquidation in 2003. [151011]

Mr. Sutcliffe: Annual insolvency figures for 2003 are not yet available. The insolvencies press release for the fourth quarter of 2003 will be published on Friday 6 February at 9:30 am.

The seasonally adjusted figures for the first three quarters of 2003 are shown in the following table:

Company insolvencies in England and Wales in 2003
Seasonally adjusted

Quarter	*Total*	*Compulsory liquidations*	*Creditors voluntary liquidations*
Q1	3,672	1,540	2,132
Q2	3,825	1,416	2,409
Q3[1]	3,398	1,153	2,245

[1] Provisional.

Distance Selling

David Davis: To ask the Secretary of State for Trade and Industry what measures she is taking to inform consumers about their rights concerning distance selling. [151258]

Mr. Sutcliffe: Online information is available from my Department's website and from the Consumer Gateway (www2.consumer.gov.uk/consumer_web/e-shopping.htm), which provides links to a variety of websites that will help consumers make informed decisions about buying goods and services.

On 29 December DTI published guidance about buying from internet auction sites, and on 22 January the Department began a consultation on changes to the Distance Selling Regulations, including a proposal to clarify what suppliers must tell consumers about their cancellation rights.

DTFs Safe Internet Shopping campaign, launched in 2001, promotes wider access to information on e-commerce. Guidance has been delivered through TV and radio, and over the internet in partnership with private sector organisations such as Microsoft, Sainsbury's, Freeserve and Expedia. Hard copy information has been distributed through Citizens Advice Bureaux and libraries. The Office of Fair Trading also provides information on internet shopping and distance contracts more generally, on its website and through consumer roadshows.

In addition, Consumer Direct will offer advice to consumers by telephone, by e-mail or on the web. The service is likely to begin in three pathfinder areas this Summer and is expected to be operating nationally by 2007.

Energy Policy

Mr. Rosindell: To ask the Secretary of State for Trade and Industry what recent discussions she has had with the Russian Government on securing a supply of gas to the UK. [151707]

Mr. Timms: My right hon. Friend the Secretary of State for Trade and Industry discussed gas issues with Russian Government during the "Russia-UK Energy Conference: Long Term Partners" held in June last year, during President Putin's State visit. During the visit, she had a meeting with Deputy Prime Minister Kudrin where a wide range of issues were discussed.

Also at the conference, I signed a Memorandum of Understanding with Igor Yusufov, Minister for Energy for the Russian Federation, in which the UK and Russia agreed to work closely together on the North European Gas Pipeline project.

Export Credits Guarantee Department

Malcolm Bruce: To ask the Secretary of State for Trade and Industry how many valid applications have been received for the renewable energy initiative of the Export Credits Guarantee Department; which have been successful; what the *(a)* company involved, *(b)* amount allocated, *(c)* project type and *(d)* form of renewable energy concerned is for each successful application; and what the maximum liability is. [151693]

Mr. Mike O'Brien: Since the announcement of the renewables initiative ECGD has received 24 inquiries, nine of which required and were given preliminary indications of cover for business in prospect. So far none of these have progressed to the stage of becoming firm business.

Gas (Northern Ireland)

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what the average bill for domestic gas consumers in Northern Ireland who pay for gas by *(a)* direct debit, *(b)* quarterly credit and *(c)* prepayment meter was in the last year for which figures are available. [151527]

Mr. Timms: The average bill for domestic gas consumers in Northern Ireland at current 2004 prices for the various payment methods is as follows:

Payment method	*Bill (£ per annum)*
Direct Debit	377
Quarterly credit	398
Prepayment meter	402

Note:
[1] Figures are calculated using an annual consumption of 18,000 kWh, and are inclusive of VAT.
[2] Figures relate to prices charged by Phoenix Natural Gas, the sole domestic gas supplier for Northern Ireland.
Source:
Phoenix Natural Gas

Investment

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry what information she collates on the investment levels of small and medium enterprises of other Organisation for Economic Co-operation and Development states in Asian countries. [151805]

Nigel Griffiths: This information is not collected by HMG since this would involve tracking each individual company and therefore be a disproportionate cost to obtain the information.

National Business Angels Network

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what the budget was of the National Business Angels Network for each year since its inception; and what the anticipated budget is for each year until 2006–07. [151434]

Nigel Griffiths *[holding answer 27 January 2004]:* The National Business Angels Network is a private company, which has received the following funding from the DTI:

	£
2000–01	340,000
2001–02	250,000
2002–03	200,000
2003–04	200,000
2004–05	[1]150,000
2005–06	[1]150,000

[1] Subject to upward-only review up to a maximum of £200,000

National Power Provision

David Davis: To ask the Secretary of State for Trade and Industry what powers exist to penalise power companies whose service suffers from persistent power cut problems. [151196]

Mr. Timms: Both my right hon. Friend the Secretary of State for Trade and Industry and the Gas and Electricity Markets Authority have powers to penalise power companies whose service suffers from persistent power interruptions.

The DTI's Engineering Inspectorate has powers under Regulation 34 of The Electricity Safety, Quality and Continuity Regulations 2002, to impose actions on a company to improve its service. The Inspectorate may take action if there is evidence to suggest that repeated interruptions to supply are occurring and that no remedial measures have been taken.

The Gas and Electricity Markets Authority has powers under the Electricity Act 1989 to investigate whether a licence holder has breached the conditions of its licence, and if so, whether remedial action (such as a financial penalty) is appropriate. The Authority may impose a penalty upon a licence holder when it is satisfied that a licence holder is contravening or has contravened any relevant condition or requirement. No penalty imposed may exceed 10 per cent. of the turnover of the licence holder.

David Davis: To ask the Secretary of State for Trade and Industry how many power cuts there were in each of the last five years in *(a)* Howden, *(b)* Anlaby, *(c)* Willerby, *(d)* North Cave, *(e)* South Cave, *(f)* Kirk Ella, *(g)* Cottingham, *(h)* Eastrington, *(i)* Brough, *(j)* North Ferriby, *(k)* Swanland and *(l)* Holme Upon Spalding Moor. [151256]

Mr. Timms: It has not been possible for Yorkshire Electricity Distribution Limited (YEDL) to collate all the information sought within a short timescale.

I will respond to the right hon. Member in writing when I have received a full report from YEDL.

David Davis: To ask the Secretary of State for Trade and Industry what the power consumption of the United Kingdom was in each of the last 25 years. [151261]

Mr. Timms: Available data are shown in the following table.

TWh

	Total electricity consumption
1978	231.42
1979	242.00
1980	231.11
1981	227.21
1982	222.82
1983	226.09
1984	230.96
1985	241.85
1986[1]	249.34
1986[1]	259.82
1987	268.38
1988	274.50
1989	279.40
1990	284.42
1991	290.84
1992	291.45
1993	295.75
1994	292.83
1995	303.92
1996	319.78
1997	321.07
1998	325.35
1999	332.05
2000	340.30
2001	342.78
2002	343.83

[1] Prior to 1986 the consumption figures are based on electricity supplied from major power producers, transport undertakings and industrial hydro and nuclear stations only. From 1986 the consumption figures are based on electricity supplied from all generating companies.

David Davis: To ask the Secretary of State for Trade and Industry how much compensation for loss of power was paid by power companies to customers in each of the last five years, broken down by individual power company. [151262]

Mr. Timms: Payments made under Guaranteed Standards of Performance following loss of power were as follows.

	1998–99	1999–2000	2000–01	2001–02	2002–03	2002–03 storms compensation
Aquila	0	0	400	0	0	542,650
EME	150	30	100	0	350	44,820
EPN	390	85	1,[illegible]0	0	0	1,155,800
Hydro	0	120	0	0	0	
LPN	150	66,920	650	100	0	
NEDL	385,650	0	16,050	750	250	
SP	0	0	6,425	3,150	7,900	
SPN	0	12,660	100	0	0	3,725
Southern	0	60	100	0	0	2,000
SP Manweb	0	0	8,150	4,300	12,625	157,575
UU	628,520	240	6,250	2,800	400	
WPD S. Wales	0	30	400	0	0	[1]1,300
WPD S. West	0	0	0	0	0	
YEDL	180	0	4,075	2,450	0	

[1] WPD S. Wales payment relates to total paid by WPD S Wales and WPD S. West. From April 2000 payment in respect of first payment due increased from £30 to £50 and period triggering payment reduced from 24 to 18 hours.

David Davis: To ask the Secretary of State for Trade and Industry what steps she is taking to ensure that power companies give adequate compensation to customers who suffer from power cuts. [151263]

Mr. Timms: This is a matter for the Office of Gas and Electricity Markets (Ofgem). As part of its distribution price control review, which is presently under way, Ofgem is reviewing the standards of performance under which compensation payments are made.

As the next price control is not implemented until April 2005, with two winter periods before then, Ofgem has recently introduced interim arrangements for compensation in severe weather conditions. The aim of these arrangements is to ensure that the basis for compensation is clear and that customers who have valid claims are paid out quickly after the event. Under the new arrangements, for all but the most extreme events, customers who make a valid claim for compensation will be entitled to £25 if they are off supply for more than 48 hours plus £25 for each additional 12 hour period up to a maximum payment of £200.

Under normal weather conditions, the Guaranteed Standards of Performance continue to apply and a payment of £50 is triggered at 18 hours with £25 for each additional 12 hour period.

Nigeria

Malcolm Bruce: To ask the Secretary of State for Trade and Industry pursuant to the answer of 25 June 2003, *Official Report*, column 798W, on the Export Credits Guarantee Department, if she will list the contracts for which Nigeria has incurred its total debt to the ECGD, stating the project type and the UK company concerned in each instance. [151539]

Mr. Mike O'Brien: The current outstanding debt on Nigeria is £4.494 billion (this figure includes interest and arrears.) Due to the high number of transactions involved (over 26,000 dating back 20 years or more), it would not be possible to identify all projects individually without incurring disproportionate cost.

Nuclear Energy

Llew Smith: To ask the Secretary of State for Trade and Industry whether the confidentiality clauses at pages 88 to 90, paragraph 38 of the Nuclear Liabilities Fund Agreement covering British Energy Generation Ltd. and Newcol dated 1 October 2003 will preclude providing hon. Members with details of British Energy contracts with British Nuclear Fuels plc. [147620]

Mr. Timms: Clause 38(4) of the Nuclear Liabilities Funding Agreement provides that the Secretary of State may disclose information to Parliament to the extent that she considers that it is appropriate to do so pursuant to her duty to Parliament but, where reasonably practicable, shall consult with Newcol (the proposed successor company to British Energy under the restructuring) prior to such disclosure. Any request to the Secretary of State for disclosure of the contracts would be considered in the light of information already made available by British Energy, and Exemption 13: Third Party's Commercial Confidences of the Code of Practice on Access to Government Information.

Defence Facilities

Llew Smith: To ask the Secretary of State for Trade and Industry pursuant to her answer of 12 January 2004, *Official Report*, columns 505–06W, whether any visits by safeguards inspectors have been made to military nuclear facilities; and what the *(a)* dates and *(b)* purposes were of the visits. [151867]

Mr. Timms: As indicated in the previous answer, there are and have been no safeguards inspections at UK defence nuclear facilities. Senior officials from the International Atomic Energy Agency (the IAEA) did take up an invitation from the UK to visit such a facility in 1993 to discuss UK support for the use of sampling and measurement techniques which had the potential to help strengthen the IAEA safeguards regime as a whole.

Political Risk Insurance

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what the length of time is within which the Export Credits Guarantee Department must appraise whether a claim will be paid on political risk insurance. [151493]

Mr. Mike O'Brien: Under the terms of ECGD's insurance products, in order for ECGD to assess whether a claim will or will not be paid, evidence must be provided by the Insured to demonstrate to ECGD's

satisfaction that an insured loss has occurred. There is no fixed time limit on this process although the Insured must notify its intention to make a claim within a set period, which is three months for Overseas Investment Insurance Policy and 12 months for Export Insurance Policy and Bond Insurance Policy.

Under its financing products, ECGD will normally pay claims including interest to the financing banks following notification of default. Claims are normally paid three months after the due date of payment of the defaulted amount.

Postal Services

Mr. Redwood: To ask the Secretary of State for Trade and Industry what steps the Government are taking to implement postal competition in line with EU requirements set out in COM (2004) 29. [151492]

Mr. Timms: The UK has set an end date for the full opening of the UK postal market by 31 March 2007. Market opening is proceeding in three phases to allow Royal Mail to prepare for competition and for potential entrants to prepare to enter the market.

The first phase, which started in January 2003, provides three possible entry routes for new entrants designed to open up 30 per cent. of the UK letter market (by revenue). In phase two, from 1 April 2005, Postcomm intends to open another 30 per cent. of the mails market (by revenue) by increasing the proportion of the bulk mail market that is open to competition. We believe that this staged approach provides Royal Mail, other operators and customers with a clear end date and a simple step-by-step transition to make their plans.

Market developments are consistent with trends in Europe, and concordant with the requirements of the EU Postal Services Directives.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will break down how *(a)* the funding allocated to modernisation of the Post Office network, *(b)* her Department's financial support to Consignia, and *(c)* the grant-in-aid to the Consumer Council for postal services set out in her Departmental Report 2003 was allocated for 2003–04. [147803]

Mr. Timms: The funding provision for 2003–04 for postal services as published in my Department's Departmental Report 2003 is:

(a) £90 million allocated to modernisation of the Post Office network in support for the urban post office network reinvention programme to fund the compensation payment terms negotiated between Post Office Ltd. (POL) and the National Federation of SubPostmasters and the investment grant package;

(b) The DTI has provided a loan facility to POL (a wholly owned subsidiary of Royal Mail Group plc) to enable it to fund its working capital requirements. This is primarily to ensure that there is sufficient cash in post offices to meet benefit payment and other cash needs. POL's cash used to be pre-funded by the Department for Work and Pensions but the pre-funding will decline as benefits are paid directly into recipients' accounts and POL still needs to have the cash available for benefits to be paid in cash. The loan facility package is designed on commercial lines in terms of interest and commitment charges and administration fees;

(c) The provision of £7.810 million is based on the Consumer Council for Postal Services (CCPS) actual budget expenditure for 2001–02. The actual budget agreed for 2003–04 is £9.905 million. The breakdown of how the funding was allocated for 2003–04 will be published in the CCPS financial report on 30 July 2004.

Power Stations (Wales)

Mr. Wiggin: To ask the Secretary of State for Trade and Industry if she will list the power stations in Wales and their *(a)* maximum operating capacity and *(b)* average operating capacity over the last year. [151756]

Mr. Timms: Power stations in Wales owned by major power producers along with their installed capacities as at the end of May 2003 are listed as follows:

Station	*Fuel*	*Installed capacity (MW)*
Aberthaw B	Coal-fired	1,455
Aberthaw GT	Gas oil	51
Barry	Gas-CCGT	250
Connahs Quay	Gas-CCGT	1,380
Cwm Dyli	Hydro	10
Deeside	Gas-CCGT	[1]250
Dinorwig	Pumped storage	1,728
Dolgarrog	Hydro	37
Ffestiniog	Pumped Storage	360
Fifoots Point	Coal	[2]393
Maentwrog	Hydro	20
Rheidol	Hydro	50
Wylfa	Nuclear	980

[1] Excludes a further 250 MW that was mothballed, but brought back into service at the end of 2003.
[2] In receivership and not operating at that time but subsequently leased by Innogy for winter 2003–04 operations.
Source:
Digest of UK Energy Statistics 2003, Table 5.10

Operational data for individual power stations are matters for the operating companies themselves and are not collected centrally. In total, generation by the stations listed above in 2002 was 30,459 GWh. It is estimated that the aggregate plant load factor for these stations 4 per cent. for the UK as a whole.

Project Funding

Brian Cotter: To ask the Secretary of State for Trade and Industry what funding has been provided by her Department to finance *(a)* the UK High Technology Fund, *(b)* the Quality Mark Scheme, *(c)* the Inside UK Enterprise Scheme, *(d)* the Construction Line Programme, *(e)* the Basic Technologies Programme, *(f)* the Construction Best Practice Programme and *(g)* the Foresight Programme in each financial year since the inception of each; what funding has been allocated to finance each scheme in future financial years; and if she will estimate the extent to which businesses have benefited from each initiative to date. [149448]

Ms Hewitt: The following table shows the level of funding provided to 2002–03; and, the projected spend in future years.

Expenditure (£ million)

	UK High Technology Fund	*Quality Mark*	*Inside UK Enterprise*	*Construction Line*	*Basic Technologies*	*Construction Best Practice*[2]	*Foresight*
1998–99	—	—	n/a	—	—	n/a	1.4
1999–2000	3.0	—	n/a	—	—	n/a	2.8
2000–01	17.0		n/a	—	—	n/a	4.8
2001–02	0	[1,2] 6.7	n/a	0.2	—	2.1	2.2
2002–03	0		1.2	0.2	—	2.7	1.0
2003–04	0	2.0	1.2	0	0.6	2.6	1.8
2004–05	0	0	0	0	2.8	0	0

2007–08	0	0	0	0	0.3	0	0

[1] Combined expenditure 2000–03
[2] Funded by former DETR 1998—June 2001
Notes:
1. Some historic expenditure data has been omitted from this reply due to the disproportionate cost of providing it.
2. Forecast expenditure reflects outstanding legal and contractual obligations.
3. All figures have been rounded to the nearest £100,000

Benefits to Business

(a) UK High Technology Fund

The UK High Technology fund has stimulated private sector investments of £106.1 million, against a target of £105 million, significantly increasing the amount of finance available for investment in technology-based businesses.

From the total fund of £126.1million (which includes DTI investment of £20 million), over £123 million of this has, to date, been committed to nine specialist venture capital funds. These venture capital funds have in turn made investments in over 130 technology-based companies throughout the UK.

(b) Quality Mark

Quality Mark provides a competitive edge for accredited tradespeople by improving the information available to consumers.

(c) Inside UK Enterprise

In the three years to 2002, Inside UK Enterprise helped users to increase sales by around £175 million and increase profit margins by around £135 million.

(d) Constructionline

Constructionline streamlines procurement procedures and cuts costs by supplying the construction industry and its clients with a single national pre-qualification scheme.

(e) Basic Technologies

The first projects to be supported by this programme commenced in mid-2003. It is too early to estimate the benefits to businesses.

(f) Construction Best Practice

In 2002, businesses using Construction Best Practice increased profitability by £56 million—28 times the cost of running the scheme.

Productivity also improved with each user saving an average of 12 days and £3,300. This equates to a total of £8.5 million and 60,000 days saved.

It is currently estimated that in 2003, users increased their profitability by more than £100 million.

(g) Foresight

Between 1994 and 2001 the Foresight Programme helped Government, Research Organisations and Business prepare for the future by helping to identify potential threats and opportunities over the coming 10 to 20 years. New partnerships have been forged between business and the science base and across all sectors and disciplines to change the way business and the science base relate to each other and to the future.

Organisations such as Research Councils, Training Organisations, other Government Departments and education funding bodies used the results of Foresight to set priorities for the benefit of business.

Public Bodies (Membership)

Keith Vaz: To ask the Secretary of State for Trade and Industry who the members of the *(a)* Post Office Users Council for Scotland, *(b)* Post Office Users Council for Northern Ireland, *(c)* Post Office Users Council for Wales, *(d)* English Advisory Committee on Telecommunications and *(e)* Scottish Advisory Committee on Telecommunications were on 1 January; what their term of office is in each case; and what their remuneration is. [151448]

Mr. Timms: In 2001 the former Post Office Users National Council was replaced by a new Consumer Council of Postal Services, known as Postwatch. The Postwatch Council is made up of the Chairs of nine Regional Postwatch Committees and four national Council members, operating under a National Chairman. Full details of all Council members and their remuneration are set out in the Postwatch Annual Report. Currently the Northern Ireland, Scottish and Welsh committees are chaired by, respectively John Stringer, Tom Begg and Eifon Pritchard. The remuneration for the Regional Chairs is based on an average annual rate of £20,500 per annum for two days per week; with some working for two and a half and some three days per week.

The Advisory Committees on Telecommunications effectively ceased to exist with the vesting of Ofcom on 29 December 2003.

Science and Society Directorate

Sue Doughty: To ask the Secretary of State for Trade and Industry pursuant to her answer of 15 December 2003, *Official Report*, column 646W, on the Science and Society Directorate, whether the objectives of the Science

and Society Directorate's Public Engagement Team include the promotion of the public understanding of cultural factors impinging on and operating within scientific communities that will help the public make informed judgments. [151087]

Ms Hewitt: The Science and Society Directorate's Public Engagement Team promotes public awareness and engagement with all aspects of science. This includes the scientific 'process' in all its forms, for example: the setting of research priorities; peer review; the interaction of scientists within and across disciplines; the legal boundaries within which scientists operate; ethical considerations; and the lack of absolute certainty in science.

We believe this approach helps to set the context within which the public can consider specific science related issues as they arise.

Security Passes

Mr. Burstow: To ask the Secretary of State for Trade and Industry how many security passes have been reported *(a)* lost and *(b)* stolen by staff in her Department in the last 12 months. [150889]

Ms Hewitt: I refer to the answer given to the right hon. Member for Winchester (Mr. Oaten) on 22 January 2004, *Official Report*, column 1386W.

Telecommunications Masts

Annabelle Ewing: To ask the Secretary of State for Trade and Industry what studies have been commissioned by her Department into the safety of TETRA masts. [151793]

Mr. Timms *[holding answer 29 January 2004]:* My Department contributes to the Mobile Telecommunications and Health Research Programme (MTHR), which includes studies looking at TETRA technology. The Home Office also has an extensive research programme. Details of the MTHR research programme can be found at www.mthr.org.uk and the Home Office at http://www.homeoffice.gov.uk/docs/tetra.html

UK Business Online

Michael Fabricant: To ask the Secretary of State for Trade and Industry if she will make a statement on the closure of UK Business Online. [150617]

Mr. Timms: In November 2002, the Secretary of State announced that business support was to be radically restructured as a result of feedback from key stakeholders. Rather than being closed, therefore, UK online for business will be integrated into mainstream DTI and Business Link, from April onwards. The aim is to make it simpler for businesses to access the support that DTI provides and to make the support more effective.

While the UK online for business brand will therefore be discontinued, ICT support and promotion will nevertheless remain a key focus for DTI.

Unfair Dismissal

Brian Cotter: To ask the Secretary of State for Trade and Industry what advice her Department has given to small firms about unfair dismissal rules introduced under the Employment Act 2002. [144235]

Mr. Sutcliffe: Part 3 of the Employment Act 2002 set out a framework of new minimum statutory dismissal and disciplinary and grievance procedures, and also made some changes to the law on unfair dismissal and on employment particulars. The detailed operation of disciplinary and grievance procedures was left to be specified via secondary legislation. This was laid before Parliament on 20 January 2004, and is anticipated to come into force on 1 October 2004.

All employers, regardless of size, will normally be required to follow these minimum procedures before dismissing employees—failure to do so may result in a tribunal finding the dismissal automatically unfair. In addition, in ordinary unfair dismissal cases, the employment tribunals will continue to take account of the Acas Code of Practice on Disciplinary and Grievance Procedures in deciding whether or not an employer acted reasonably in dismissing. Acas launched this month a public consultation on a revised version of their Code of Practice.

The Government will put in hand an extensive guidance and advice campaign in good time for implementation, in consultation with small firms and other advisory organisations. This will inform employers and employees as necessary of the new rights and responsibilities created by this part of the Employment Act.

Utilities Act

Mr. Laurence Robertson: To ask the Secretary of State for Trade and Industry under which provisions of the Utilities Act 2000 she is prevented from making public the findings of the Engineering Inspectorate of its inquiry into the power failures in London and Birmingham; and if she will make a statement. [151346]

Mr. Timms *[holding answer 27 January 2004]:* Section 105 of the Utilities Act 2000 places general restrictions on the disclosure of information relating to the affairs of any individual or to any particular business obtained by virtue of the provisions of the Act, Part I of the Gas Act 1986 or Part I of the Electricity Act 1989 during the lifetime of the individual or so long as the business continues.

Disclosure is permissible with the consent of the individual or the person for the time being carrying on the business. Disclosure is also permitted in limited circumstances, for example where it is necessary for the purpose of facilitating the performance of certain functions of my right hon. Friend the Secretary of State for Trade and Industry or regulatory authorities or where it is required by a licence holder in order to fulfil a condition of his licence.

Section 105 makes unauthorised disclosure of information obtained under the 2000 Act, or under Part I of the 1986 Act or Part I of the 1989 Act, a criminal offence.

WORK AND PENSIONS

Attendance Allowance Claims

Mr. Frank Field: To ask the Secretary of State for Work and Pensions what proportion of attendance allowance claims, processed since the new claim pack was introduced in October 2003, have been subject to appeal. [146742]

Mr. Pond *[pursuant to his reply, 7 January 2004, c. 458W]*: The information given contained an inaccuracy in one of the figures; that of the number of decisions made in November 2003. The correct information is tabled as follows.

The following information shows the number of decisions made on new Attendance Allowance claims in the months of October and November 2003 and the number of Attendance Allowance appeals registered in the same months. Decisions appealed in October and November will contain a mix of claims made on the old and new forms. No separate data are available.

	October 2003	*November 2003*
Decisions made	35,111	30,521
Appeals registered	1,213	1,120
Percentage	3.45	3.67

Child Poverty

Andy King: To ask the Secretary of State for Work and Pensions how many and what percentage of children are living in poverty, using the *(a)* absolute low income, *(b)* relative low income and *(c)* material deprivation indicators announced in his Department's report, Measuring Child Poverty; and if he will give this information for (i) before and (ii) after housing costs for (A) 1998 and (B) 2001 for (1) the UK, (2) England, broken down by region, (3) Scotland, (4) Wales and (5) Northern Ireland. [151376]

Mr. Pond: The requested figures for absolute and relative low income are available from: "Households Below Average Income—An analysis of the income distribution for 1994–95 to 2001–02". This analysis covers Great Britain only; no data are available for Northern Ireland.

'Measuring Child Poverty', published in December 2003, outlines the Government's measure of UK child poverty for the long term; this new measure will begin from 2004–05. It also states that data for material deprivation will not be collected on the Family Resources Survey until the 2004–05 sample, and not available for full analysis until 2006.

All publications listed are available in the Library.

Andy King: To ask the Secretary of State for Work and Pensions if he will estimate *(a)* how many and *(b)* what percentage of children will be living in poverty in (i) 2004–05, (ii) 2010 and (iii) 2020, (A) before and (B) after housing costs, broken down by nation and region of the UK. [151377]

Mr. Pond: Pre-Budget report 2003 announced that the child element of the Child Tax Credit would increase by £180 to £1,625 a year, equivalent to a weekly increase of £3.50. This increase will benefit 7.2 million children in 3.7 million families. As a result of this investment the Government are on track to meet or exceed its PSA target to reduce by a quarter the number of children in low income-households by 2004–05 on a Before Housing Costs (BHC) basis. The target is more challenging on an After Housing Costs (AHC) basis, although the nature of the target means there are uncertainties either way.

Forecasting how many children will be in relative low income in future years is problematic. Any estimate is dependent on forecasting median household income growth from 2001–02 (the latest available data). This itself is dependent on a number of factors, including the rate of earnings growth, demographic changes, changes in household composition and employment patterns, and changes to the tax and benefit system. Consequently, there is inherent uncertainty in any estimates produced, which is exacerbated the further into the future one attempts to model. For this reason, while our estimates allow us to provide a broad indication of progress towards the 2004–05 PSA target to inform policy decisions, point estimates are not sufficiently robust to be put in the public domain.

Independent analysis by the Institute for Fiscal Studies suggests that the increase in Child Tax Credit will enable the Government to make substantial progress on both elements of the PSA. This extra investment will also enable the Government to make progress step by step towards their goal to halve child poverty by 2010 and eradicate it by 2020.

Departmental Office (Hebburn)

Mr. Hepburn: To ask the Secretary of State for Work and Pensions how many people are employed in the Department's offices in Hebburn; and how many of those are residents of south Tyneside. [146949]

Maria Eagle: The Department has 51 staff working in Hebburn of these eight have postcodes indicating a south Tyneside home address.

Mr. Hepburn: To ask the Secretary of State for Work and Pensions what the age profile is of the people employed in the Department's offices in Hebburn. [146950]

Maria Eagle: The age profile of the staff working in the Department's offices in Hebburn is shown in the table.

Age group	*Number of staff in age group*
Under 20	0
21–30	6
31–40	14
41–50	22
51+	9
Total	51

Mr. Hepburn: To ask the Secretary of State for Work and Pensions what the annual running costs are of the Department's offices in Hebburn; and when the offices are due for closure. [146996]

Maria Eagle: Inland Revenue is the major occupier of the Reyrolle Building in Hebburn. The amount to be paid by the Department for Work and Pensions (DWP) towards annual running costs for the building is estimated to be £395,701 for the year from April 2003 to March 2004.

The lease is due to expire in June 2006. It is anticipated that DWP staff will be relocated before then.

Industrial Injury Disablement Benefit

Mr. Gibb: To ask the Secretary of State for Work and Pensions what the procedures are for claiming industrial injury disablement benefit; and if he will list the claim forms required. [147944]

Mr. Browne: A person wishing to claim Industrial Injuries Disablement Benefit (IIDB) in respect of an industrial accident or a prescribed disease should, in respect of an industrial accident, fill in BI 100A and, in respect of prescribed diseases, BI 100B for all diseases apart from Chronic Bronchitis and Emphysema (BI 100C); Allergic Rhinitis (BI 100E); Occupational Asthma (BI 1000A); Occupational Deafness (BI 1000D); and Pneumoconiosis, Byssinosis or asbestos related diseases (BI 100PN).

An appropriate advice leaflet from the series SD6/7/8 will also be sent; a person wishing to claim IIDB should complete the appropriate form and forward it without delay to their local Social Security office.

Copies of all forms referred to are in the Library.

Information Technology

Mr. Allan: To ask the Secretary of State for Work and Pensions what cost savings have been made in his Department since the introduction of the Information Technology procurement Centre of Excellence; and how these were calculated. [151043]

Maria Eagle: Centres of Excellence were established in the Department for Work and Pensions in June 2003 to integrate the essential functions which underpin the successful delivery of all types of acquisition based programmes and projects. As cost benefits will not accrue until improvements start to take effect it is too early to measure cost savings. All Centres of Excellence are currently developing future plans and as part of this process measurement of savings will be defined.

Publicity Campaigns

Malcolm Bruce: To ask the Secretary of State for Work and Pensions how much *(a)* his Department and *(b)* each agency and non-departmental public body sponsored by his Department spent on (i) advertising and (ii) information campaigns in each year since 1995–96; what his estimate is for 2003–04; and if he will make a statement. [149722]

Maria Eagle *[holding answer 21 January 2004]:* The Department for Work and Pensions was formed in June 2001. Between that date and March 2003, the Department spent a total of £35,031,354 alerting people to their rights, responsibilities and entitlements through information campaigns. Of this sum, £18,788,328 was spent on advertising using television, radio, cinema and press media. Expenditure by the Department, broken down by year is in the table.

The Department's agencies and non-departmental bodies use advertising for various reasons, ranging from public information and recruitment to advertising opening hours of local offices. On each occasion, national and/or regional media may be used as well as various local newspapers. A breakdown of expenditure by agency and non-departmental public body could be provided only at disproportionate cost.

£

	Total publicity costs	*Advertising costs*
June 2001 to March 2002	22,727,979	13,787,594
April 2002 to March 2003	12,303,375	5,000,734
Total	35,031,354	18,788,328

Notes:

1. Machinery of Government changes during the period 1997 to 2001 mean that like-for-like figures are not obtainable without disproportionate cost. During this time communications activity was accounted for under different systems in the agencies, Headquarters and the Department for Education and Employment, part of which transferred to the Department for Work and Pensions.
2. All costs exclude VAT.
3. Advertising costs are total publicity costs excluding all production costs.
4. Information campaigns costing under £250,000 have not been included as a disproportionate cost would be incurred in compiling these figures.

Unclaimed Assets Register

Mr. David Stewart: To ask the Secretary of State for Work and Pensions how much money there is in the Unclaimed Assets Register. [148380]

Maria Eagle: As Government Accounting does not explicitly require the Department to maintain a register of unclaimed assets and neither is it in the nature of DWP's business to come into contact with such items, the Department does not keep an unclaimed assets register.

US Warships (Disposal)

Norman Baker: To ask the Secretary of State for Work and Pensions whether his Department has received from Able UK Ltd. reports on the condition of the visible asbestos on board the ships from the US Naval Reserve docked at Hartlepool; and if he will make a statement. [148615]

Mr. Browne *[holding answer 19 January 2004]:* DWP has not received any reports. However, in accordance with the conditions laid down by the Health and Safety Executive, Able UK arranged for an inspection to be undertaken of the visible asbestos aboard the four US Naval Reserve ships prior to the ship leaving the US. In accordance with said conditions Able UK advised HSE on 6 October for the first two ships and 17 October for the second two that the visual condition of the asbestos aboard was good. The ships docked in Hartlepool on 12, 13, 27 November and 3 December, soon after they arrived Able UK confirmed to HSE that the asbestos remained in a satisfactory condition. On 10 December

inspectors from HSE made a tour of one of the ships and confirmed Able UK's report that the visual condition of the asbestos in accessible locations was good.

HOME DEPARTMENT

Criminal Justice Boards

Mr. Allen: To ask the Secretary of State for the Home Department further to his answer of 10 December 2003, *Official Report*, column 497W, on the Nottinghamshire Criminal Justice Board, whether the action plans of local criminal justice boards are being sent to local hon. Members for comment. [145048]

Paul Goggins: It is a matter for Local Criminal Justice Boards how they consult locally on their plans.

Nottinghamshire Criminal Justice Board has not sent its plan to local hon. Members for comment. However, I understand that in the spring the Board plans to hold a consultation event on the criminal justice system for local hon. Members.

Knives

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what discussions he has had regarding a UK-wide amnesty on knives. [150953]

Ms Blears *[holding answer 27 January 2004]:* There are presently no plans to introduce a national knives amnesty. However, we are discussing a range of issues relating to the sale and possession of knives with the Association of Chief Police Officers.

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what assessment his Department has made of the merits of raising the age limit for the purchase of non-kitchen knives to 18 years of age. [150955]

Ms Blears *[holding answer 27 January 2004]:* We are currently seeking the views of the Association of Chief Police Officers on the sale of knives.

Prison/Probation Services

Mr. Oaten: To ask the Secretary of State for the Home Department how many people, broken down by grade, were employed *(a)* at the National Probation Directorate and *(b)* at the headquarters of the Prison Service on the latest date available; and how many of these are (i) consultants and (ii) contractual staff. [147633]

Paul Goggins: The information requested is listed.

Table A indicates the total establishment in the National Probation Directorate, broken down by grade and the relevant numbers of consultants and contractual staff from that establishment figure.

Table B indicates the total establishment in the Prison Service Headquarters, broken down by grade and relevant consultant/contractual establishment from that total.

These figures are the latest available as at 31 December 2003 and 31 October 2003 respectively.

Projects are currently under way to substantially reduce staff within the National Probation Directorate.

Note:
The figures shown in the Contractual/Consultant columns are included in the total figure. Agency staff only included in the total column.

Table A: Total National Probation Directorate staff by grade, as at 31 December 2003

Grade	*Staff in post 31 December 2003*	*Consultants within establishment*	*Contractual staff within establishment*
SCS	14	0	0
Grade 6	37	1	2
Grade 7	96	10	10
Senior Executive Officer	56	5	8
Higher Executive Officer (D)	1	0	0

Prisons (Foreign Nationals)

Mrs. Brooke: To ask the Secretary of State for the Home Department how many individuals due for detention in *(a)* Yarls Wood and *(b)* other specialist immigration detention centres have been imprisoned in the prison estate in the past (i) 12 months and (ii) 24 months. [151079]

Beverley Hughes *[holding answer 26 January 2004]:* Information on individuals detained in Prison Service establishments who were due to be detained in Immigration Removal Centres and on the number of individuals detained over a period is not available except by examination of individual case files at disproportionate cost.

The latest available data on the number of persons detained solely under Immigration Act 2002 powers relate to 27 September 2003. As at that date, 190 people were recorded as being detained in Prison Service establishments.

The figure of 190 may include individuals who are held pending deportation after completion of custodial sentences. Although the routine use of Prison Service accommodation for immigration detainees ended at the beginning of 2002, it may be necessary to continue to hold some individuals in Prison Service accommodation for reasons of security and control. Such decisions are taken on a case-by-case basis.

Information on Immigration Act 2002 detainees as at 27 December 2003 is due to be published at the end of February on the Home Office Research, Development and Statistics Directorate website at: http://www.homeoffice.gov.uk/rds/immigration1.html

Mrs. Brooke: To ask the Secretary of State for the Home Department what the *(a)* shortest and *(b)* longest period is that an individual due for detention in a specialist immigration detention centre has spent in detention in the prison estate; and what procedures are being implemented to ensure that immigrants who have not been convicted or accused of a crime or offence are not detained in the prison estate. [151080]

Beverley Hughes *[holding answer 26 January 2004]:* I regret it is not clear exactly what figures the hon. Member is requesting and therefore I cannot say if they are available or not.

The routine use of prisons to hold immigration detainees ended at the beginning of 2002. However, in ending the routine use of prisons to hold detainees, it was made clear that there would continue to be a need to hold small numbers of individual detainees in prison for reasons of security and control. That remains the case.

Remand Fostering Schemes

Mr. David Stewart: To ask the Secretary of State for the Home Department (1) how much his Department has spent on remand fostering schemes in each year since 1998; [145171]

(2) how many remand fostering schemes there are. [145175]

Paul Goggins: Remand fostering in England and Wales is funded by local social services departments and neither the Home Office nor the Youth Justice Board hold central information on them. However, some foster placements contribute to bail support and supervision schemes for young people which are sponsored by the Youth Justice Board.

The National Children's Homes (NCH) Wessex Community Remand Project is the largest example. This successful project provides remand fostering for the Wessex Youth Offending Team covering Hampshire, Portsmouth, the Isle of Wight and Southampton. Carers work with a variety of young defendants, most charged with more than two offences including violent and sexual offences and arson. The Home Office sees such schemes as important to the development of intensive community supervision for juveniles.

UK Entry Numbers

Mr. Evans: To ask the Secretary of State for the Home Department (1) how many people entered the UK from Sweden in the latest year for which figures are available; [151524]

(2) how many people entered the UK from Bolivia in the latest year for which figures are available; [151525]

(3) how many people entered the UK from Jamaica in the latest year for which figures are available. [151526]

Beverley Hughes: The latest available information shows that a total of 62,300 Jamaican nationals were admitted to the United Kingdom during 2002.

I regret that is not possible to identify nationals of Bolivia separately in our admission statistics.

Also, admission statistics are not collated on Swedish nationals. European Economic Area (EEA) nationals are free to enter the United Kingdom without requiring leave to do so. EEA nationals are therefore not included in statistics on border control.

Data on passengers given leave to enter the United Kingdom are published in the Command Paper 'Control of Immigration: Statistics United Kingdom 2002' (Cm6053), obtainable from the House Library, The Stationery Office and via the Home Office website http://www.homeoffice.gov.uk/rds/hobpubs1.html

Work Permits

Mr. Clelland: To ask the Secretary of State for the Home Department what conditions relate to the issuing of work permits to nationals of countries in the Indian sub-continent. [151982]

Beverley Hughes: There are no specific conditions applied through the work permit arrangements in respect of India or any other individual country. Work permits are issued to foreign nationals to come to work in the UK where an application by a UK employer has met the published criteria.

DEPUTY PRIME MINISTER

Cambridgeshire County Council

Mr. Djanogly: To ask the Deputy Prime Minister (1) what the Government grant for Cambridgeshire County Council *(a)* was in 2003–04 and *(b)* will be in 2004–05. [151586];

(2) whether the actual grant payable to Cambridgeshire County Council for 2004–05 has increased in comparison with the current budgetary year. [151583]

Mr. Raynsford: The table as follows shows the amount of grant received by Cambridgeshire County Council in 2003–04 together with the amount that will be paid in 2004–05.

£ million

	2003–04	*2004–05*
Revenue Support Grant	139.766	161.288
Redistributed Business Rates	148.375	140.759
Formula Grant	288.141	302.047

It is inappropriate to directly compare the amount of grant received by Cambridgeshire County Council in 2003–04 with that received in 2004–05 as there have been a number of changes in the functions of councils and the financing of particular services. This includes the change in the financing of combined fire authorities in England, which will become major precepting authorities on 1 April 2004. The table as follows shows the changes to grant on a like-for-like basis.

	Adjucted 2003–04 (£ million)	*2004–05 (£ million)*	*Change (£ million)*	*Percentage change*
Revenue Support Grant	137.040	161.288	24.249	17.7
Redistributed Business Rates	142.756	140.759	-1.997	-1.4
Formula Grant	279.796	302.047	22.252	8.0

Electoral Pilots

Dr. Pugh: To ask the Deputy Prime Minister what the cost of *(a)* consultation, *(b)* reports and *(c)* publications was in relation to the Electoral Commission's recommendations for electoral pilots of whole regions for the municipal and European elections in 2004. [151572]

Mr. Raynsford: This a matter for the independent Electoral Commission which reports directly to Parliament through the Speaker's Committee.

European Regional Funding

Ann Winterton: To ask the Deputy Prime Minister what the criteria were for obtaining European Regional Funding for the 2000 to 2006 period; and what the criteria are for the 2007 to 2013 period. [151891]

Mr. Raynsford: The criteria for obtaining European Regional Funding for 2000–06 were:

Objective 1—Areas corresponding with the EC's NUTS II level, with per capita GDP less than 75 per cent. of the EU average

Objective 2—Regions with structural problems requiring socio-economic conversion, including, in particular, the industrial and service sectors, declining rural areas, urban areas in difficulty and depressed areas dependent on fisheries.

Negotiations on the criteria for 2007–13 have not yet commenced with the European Commission.

Ann Winterton: To ask the Deputy Prime Minister what the criteria are for organisations to obtain European Regional Funding. [151892]

Mr. Raynsford: To obtain European Regional Funding, organisations must submit good quality projects, which meet the objectives and priorities, plus the project eligibility and selection criteria set out in the relevant Single Programming Document and Programme Complement for that particular area.

Ann Winterton: To ask the Deputy Prime Minister whether the criteria for obtaining *(a)* 2000 to 2006 and *(b)* 2007 to 2013 period European Regional Funding are based on (i) regional and (ii) national data. [151893]

Mr. Raynsford: The eligible areas for European Regional Funding for 2000–06 were based on both regional and national data.

It is too early to speculate on the likely criteria for selecting areas for 2007–13.

Ann Winterton: To ask the Deputy Prime Minister whether European Regional Funding has to comply with EU state aid rules. [151894]

Mr. Raynsford: Yes. European Regional Funding has to comply with the EU state aid rules.

Ann Winterton: To ask the Deputy Prime Minister whether European Regional Funding figures are quoted for *(a)* a seven-year period and *(b)* annually. [151895]

Mr. Raynsford: Yes. For the current 2000–06 round of programmes, European Regional Funding allocations are set out in the Single Programming Documents both annually and for the seven-year period. The Office of the Deputy Prime Minister also holds both seven-year and annual figures at the overall English level.

Ann Winterton: To ask the Deputy Prime Minister whether the proposed regional assemblies would be responsible to *(a)* Parliament and *(b)* the EU for European Regional Funding. [151896]

Mr. Raynsford: The arrangements for the future management of European Regional Funding programmes have not yet been finalised. The Office of the Deputy Prime Minister would expect the proposed Regional Assemblies to play a leading role, but that precise role has yet to be defined.

Ann Winterton: To ask the Deputy Prime Minister how much Objective One money has been allocated to the *(a)* Yorkshire and Humber Region, *(b)* North West Region and *(c)* North East Region in the current financial year, broken down by area. [151881]

Mr. Raynsford: The Objective 1 programmes operate to a calendar year and the allocations for 2003 and 2004 are as follows:

€ *million*

	2003	*2004*
South Yorkshire	170	150
Merseyside	193	171

The North East region does not qualify for Objective 1 funding.

Ann Winterton: To ask the Deputy Prime Minister what projections he has made of the level of Objective One money likely to be given to the *(a)* Yorkshire and Humber Region, *(b)* North West Region and *(c)* North East Region for the 2007–13 period. [151882]

Mr. Raynsford: None, at this stage. The Office of the Deputy Prime Minister is still awaiting proposals from the European Commission on their priorities for the future allocation of the Structural Funds.

Ann Winterton: To ask the Deputy Prime Minister if he will list the criteria which need to be fulfilled for an area to obtain Objective 1 funding. [151883]

Mr. Raynsford: For an area to qualify for Objective 1, it must correspond to level II of the Nomenclature of Territorial Statistical Units (NUTS level II) and have a per capita GDP less than 75 per cent. of the EU average.

Fire and Rescue Service

Michael Fabricant: To ask the Deputy Prime Minister (1) what estimate he has made of the change in the number of jobs in Staffordshire Fire Service as a result of the proposed regionalisation of the Fire and Rescue Service; [149842]

(2) what change in the number of managerial jobs he expects to result from the regionalisation of the Fire and Rescue Service in Staffordshire. [149847]

(3) whom he has consulted on the plans to regionalise Staffordshire's Fire and Rescue Service; [149843]

(4) what discussions he has had with Staffordshire County Council on his plans to regionalise the Fire and Rescue Service; [149845]

(5) what discussions he has had with *(a)* retained and *(b)* full-time firefighters in Staffordshire on his plans to regionalise the Fire and Rescue Service; and what their advice was. [149846]

(6) under what powers he would implement the regionalisation of the Fire and Rescue Service in Staffordshire without the consent of Staffordshire county council. [149844]

Mr. Raynsford: I refer the hon. Member to the answer given to the hon. Members for Buckingham (Mr. Bercow), for Taunton (Mr. Flook), for North Thanet (Mr. Gale), for North Wiltshire (Mr. Gray), for Runnymede and Weybridge (Mr. Hammond), for South-East Cambridgeshire (Mr. Paice), for Brentwood and Ongar (Mr. Pickles), for Poole (Mr. Syms) and for Spelthorne (Mr. Wilshire) on 22 January 2004, *Official Report*, columns 1454–1457W.

Grant Definition

Mr. Djanogly: To ask the Deputy Prime Minister what definition he uses of *(a)* raw grant and *(b)* adjusted grant in spreadsheets published by his Department on http://www.local.odpm.gov.uk/finance/0405/fandc2/index.htm. [151585]

Mr. Raynsford: 2004–05 raw grant is the sum of the following items:

The authority's share of the Distributable/Amount (Redistributed National Non-domestic Rates) calculated in accordance with section 6 of the draft Local Government Finance Report (England) 2004/05, *plus*

The amount of any police grant payable to the authority calculated in accordance with section 5 of the draft Police Grant Report (England and Wales) 2004–05, *plus*

Revenue Support Grant (RSG) before floors and ceilings for 2004–05.

RSG before floors and ceilings for each authority may be calculated as follows:

Total FSS in 2004–05 calculated in accordance with section 4 of the draft

Local Government Finance Report 2004–05, *minus*

redistributed business *minus*

the result of:

Taxbase as described Annex D of the draft Local Government Finance Report 2004/05, *multiplied* by

ANCT as given in paragraph 3.4 of the draft Local Government Finance Report 2004/05, *multiplied* by

the share of ANCT for the appropriate class of authority as given in Annex B of the draft Local Government Finance Report (England) 2004–05.

2003–04 adjusted grant is the sum of the following items:

My right hon. Friend the Deputy Prime Minister's estimate of the authority's share of the Distributable Amount (Redistributed National Non-domestic Rates) calculated in accordance with section 6 of the Local Government Finance Report 2003–04, after adjusting for changes in the functions of councils or the financing of particular services, *plus*

My right hon. Friend the Deputy Prime Minister's estimates of the authority's share of Revenue Support Grant calculated in accordance with section 3 of the Local Government Finance Report 2003–04, after adjusting for changes in the functions of councils or the financing of particular services, *plus*

My right hon. Friend the Home Secretary's estimate of the amount of any Police Grant payable to the authority for 2003–04 calculated in accordance with section 5 of the Police Grant Report (England and Wales) 2003–04, after adjusting for changes in the functions of councils or the financing of particular services.

Further information on how the 2003–04 adjusted grants are calculated may be found at http://www.local.odpm.gov.uk/finance/0405/adjpap.pdf

Local Government

Mr. Djanogly: To ask the Deputy Prime Minister whether the additional £344 million allocated to local authorities in December 2003 by the Treasury will be incorporated into the Revenue Support Grant settlement figure for future years. [150136]

Mr. Raynsford: The additional £340 million which Government have made available for local authorities in 2004–05 is a one-off payment for this year. The amount of money available for local government beyond 2004–05 will be as set out in the relevant Spending Review.

However, the extra funding put into the 2004–05 settlement will be taken into account when calculating floors and ceilings for future years.

Mr. Djanogly: To ask the Deputy Prime Minister what his policy is on the issuing of directions to local authorities before those authorities have completed local consultations on the matters to which such directions relate; and if he will make a statement. [150808]

Mr. Raynsford: The Minister for Local and Regional Government will exercise powers under section 15 of the Local Government Act 1999 and other comparable legislation when there is clear evidence that an authority is failing either to discharge its functions adequately or failing to meet its statutory obligations. Further details are set out in the Protocol on "Central government engagement in poorly performing local authorities" http://www.odpm.gov.uk/stellent/groups/odpm_localgov/documents/page/odpm_locgov_609124.pdf

Phone Boxes

Sarah Teather: To ask the Deputy Prime Minister how many derelict phone boxes there were in each London Borough at the latest date for which data is available. [151123]

Mr. Timms: I have been asked to reply.

Policy on public call boxes is a matter for the Office of Communications (Ofcom) and I understand the Chief Executive of Ofcom will be writing to the hon. Member shortly.

Regional Assemblies

Mr. Jenkin: To ask the Deputy Prime Minister what representations he has received from the *(a)* British chambers of commerce, *(b)* Confederation of British Industry and *(c)* Institute of Directors on proposals to establish elected regional assemblies; what response he has made; and if he will place in the Library copies of the exchanges of correspondence on this issue. [151005]

Mr. Raynsford: After the White Paper was published the Office of the Deputy Prime Minister received one response each from the Confederation of British Industry (CBI) and the British Chamber of Commerce. Each received a reply thanking them for their comments.

The Office of the Deputy Prime Minister has also received letters from a number of individual chambers of commerce.

It is not the practice to disclose the contents of correspondence by placing it in the Library. However a summary of the responses to the White Paper "Your Region, Your Choice" are available in the Library of the House.

Ann Winterton: To ask the Deputy Prime Minister what the *(a)* date and *(b)* venues were of the public consultations on the powers of the proposed regional assemblies for the (i) North West, (ii) North East and (iii) Yorkshire and the Humber. [151889]

Mr. Raynsford: A series of public hearings on the powers of the proposed regional assemblies will take place across the three northern regions. The dates and venues of the hearings have yet to be decided.

Written Answers to Questions

Monday 2 February 2004

SOLICITOR-GENERAL

Serious Fraud Office

Malcolm Bruce: To ask the Solicitor-General how many *(a)* allegations and *(b)* reports of bribery of a foreign public official by a UK company or individual have been forwarded to the Serious Fraud Office by the Fraud Section of the Department of Justice in the US since 1997; and on what dates they were received. [151523]

The Solicitor-General: The SFO has received no reports of allegations of bribery of a foreign public official by a UK company or individual from the US Department of Justice since 1997.

One request for mutual legal assistance has been made involving a suspicion of bribery. In this instance the alleged offences took place prior to the implementation of the Anti-terrorism, Crime and Security Act 2001.

Mr. Simon Thomas: To ask the Solicitor-General how many allegations of bribery of a foreign public official the Serious Fraud Office received between November 1997 and February 2002; and how many of these allegations led to an investigation. [151403]

The Solicitor-General: The SFO have identified four cases referred to it between November 1997 and February 2002 where bribery of a foreign official has been one of the allegations. None of these cases have resulted in an investigation.

Mr. Simon Thomas: To ask the Solicitor-General how many of the requests for mutual legal assistance on corruption offences received by the Serious Fraud Office have *(a)* indicated an offence by a UK individual or company and *(b)* led to an investigation by the SFO into a possible UK offence. [151404]

The Solicitor-General: Prior to the implementation of the Anti-terrorism Crime and Security Act 2001, the SFO did not record the category of offences referred for mutual legal assistance by foreign authorities.

Since February 2002, the SFO has identified three mutual legal assistance requests where there may be suspicion of corruption offences of persons overseas involving UK citizens or companies.

These requests have not resulted in a domestic investigation. Two of the requests are still being assessed and the relevant offences in the other request took place prior to the implementation of the Anti-terrorism, Crime and Security Act 2001.

Mr. Simon Thomas: To ask the Solicitor-General whether the Serious Fraud Office has received additional resources for enforcing Part 12 of the Anti-terrorism, Crime and Security Act 2001 since February 2002. [151405]

The Solicitor-General: The SFO has received no additional resource since February 2002 specifically for the purpose of investigating and prosecuting using the provisions of Part 12 of the Anti-terrorism, Crime and Security Act 2001.

As part of the 2002 Spending Review, the resource budget of the Serious Fraud Office will rise to £35.34 million by the end of the 2005–06 financial year. The Serious Fraud Office plans to use some of this resource to expand its permanent staff numbers from 232 to approximately 300 by the end of that financial year.

The Serious Fraud Office does not allocate its staff resource to a particular type of crime or case. Each case referred to the SFO is assessed on its individual merits, and this includes allegations of bribery by UK citizens or companies overseas.

INTERNATIONAL DEVELOPMENT

Commonwealth Scholarships Commission

Keith Vaz: To ask the Secretary of State for International Development who the members of the Commonwealth Scholarships Commission were on 1 January 2004; what their term of office is in each case; and whether they are remunerated. [151825]

Hilary Benn: The 14 members of the Commonwealth Scholarship Commission were:

Member	*First Appointed*	*Current Appointment Ends*
Professor Trudy Harpham (Chair)	[1]12.12.01	11.12.04
Professor William Hill (Deputy Chair)	[2]01.03.98	28.02.04
Professor Jang B. Dilawari	01.03.98	28.02.04
Mr Sharon Huttly	01.01.02	31.12.04
Professor Maxwell Irvine	01.01.02	31.12.04
Professor David Johns	01.01.02	31.12.04
Ms Caren Levy	01.04.00	31.03.06
Dr Derek Miles	01.04.00	31.03.06
Professor John Morgan	01.08.02	31.07.05
Dr Hilary Perraton	01.05.02	30.04.05
Dr Patricia Richardson	01.04.00	31.03.06
Professor Timothy Shaw	01.05.02	30.04.05
Professor Gurharpal Singh	01.01.02	31.12.04
Professor Martin Snaith	01.01.02	31.12.04

[1] As Chair. Member of Commission since 1 March 1998

[2] To the Commission. Appointed Deputy Chair on 12 December 2001

The Chair of the Commission receives an annual honorarium of £5,000. All other Commission appointments are unremunerated, but those serving on the Selection Committee receive an honorarium of £200 per meeting.

Departmental Staff (Disability)

Mr. Paul Goodman: To ask the Secretary of State for International Development if he will set out the number of employees in his Department who have a disability, broken down by disability type. [148988]

Hilary Benn: As at April 2003, there were 23 members of staff with a disability.

Type of Disability	*Number of DFID Staff*
Hearing Impairment	8
Visual Impairment	[1]—
Speech Impairment	[1]—
Mobility Impairment	5
Physical Impairment	[1]—
Reduced Physical Capacity	[1]—
Severe disfigurement	[1]—
Learning difficulties	[1]—
Mental Illness	0
Other	0
Total	23

[1]— Denotes a figure where the number of staff is less than five. The actual numbers in these categories are not published in order to protect the privacy of individual members of staff.

At DFID, staff with disabilities can often fall into more than one of the above categories; where this is the case, they have been assigned to the category relating to their primary disability. DFID is a member of the cross-departmental Cabinet Office Disability Working Group, the primary purpose of which is to improve data collection, monitoring and declaration within the Civil Service.

Direct Budget Support

Tony Baldry: To ask the Secretary of State for International Development what assessment he has made of fiduciary risk for direct budget support. [152083]

Hilary Benn: DFID has developed a comprehensive approach to assessing and managing the fiduciary risks associated with direct budget support, which has been agreed with the UK's National Audit Office.

Firstly, a thorough evaluation of the recipient government's public financial management and accountability procedures, systems, practices and associated risks must be carried out. We have set out eight good practice principles and 15 related benchmarks which provide a framework both to ensure that adequate and sufficient information is obtained and that a broad assessment can be undertaken.

Secondly, the recipient government must have a credible programme to improve public financial management and if necessary to incorporate temporary safeguards to mitigate identified risks. The decision to provide direct budget support is made where the potential development benefits justify the risk involved. DFID's policy in this area is clearly identified in the published document "Managing Fiduciary Risk When Providing Budget Support".

DFID is working with other development agencies and international financial institutions to harmonise approaches to fiduciary risk management, thereby limiting the burden placed on governments to meet the requirements of different donors and lenders. This includes harmonisation of donor assessment procedures.

Iraq

Miss McIntosh: To ask the Secretary of State for International Development if he will make a statement on humanitarian aid to Iraq. [151683]

Hilary Benn: DFID has committed £220 million towards humanitarian and reconstruction work in Iraq since the beginning of 2003. In spite of difficulties resulting from the security situation in Iraq, there is no humanitarian crisis in the country. Significant progress has been made since the end of the conflict in restoring essential services, maintaining the Public Distribution System for food rations, reopening hospitals and schools, and beginning the process of longer term reconstruction.

US$33 billion in grants and soft loans was pledged for the reconstruction of Iraq at the Madrid Donors' Conference in October, including over US$18 billion from the USA. The Coalition Provisional Authority, together with Iraqi Ministries, are making significant progress with the reconstruction effort.

DFID will publish its interim Country Assistance Paper for Iraq shortly.

Sudan

John Barrett: To ask the Secretary of State for International Development what assessment he has made of the impact that the Government of Sudan's rezoning of camps for internally displaced persons around Khartoum is having on *(a)* levels of homelessness and *(b)* other humanitarian requirements in the region; and if he will make a statement. [151202]

Hilary Benn: DFID continues to be concerned about the protection and assistance afforded to all internally displaced persons (IDPs) in Sudan and have provided humanitarian assistance, including to those in camps around Khartoum.

During my visit in December 2003 I visited one of the camps and saw how re-zoning has led to the demolition of homes. I raised the need for proper support for IDPs, following the rezoning with the Government of Sudan. HM Ambassador has also raised this issue with the Government of Sudan, including the Wali (Governor) of Khartoum.

TRANSPORT

Dengie Village Link

Mr. Jenkin: To ask the Secretary of State for Transport what the total cost of public subsidy for the Dengie Village Link is in the *(a)* current and *(b)* next financial year. [152291]

Mr. McNulty: Dengie Village Link service was awarded £271,000 from Rural Bus Challenge funding and £106,274 from the Rural Bus Subsidy Grant for the current financial year 2003–04.

The recently announced Rural Bus Challenge award will provide £840,000 of funding to the scheme over the next three years 2004–05, 2005–06, 2006–07. Announcement of the Rural Bus Subsidy Grant for the next financial year has not yet been made.

Mr. Jenkin: To ask the Secretary of State for Transport how many passengers the Dengie Village Link carried in the last 12 month period; and how many passenger miles this represented. [152292]

Mr. McNulty: The total number of passengers carried by Dengie Village Link during the last 12 months from January 2003 to December 2003 was 72,191.

Passenger mileage figures are not recorded.

Edinburgh Airport

John Barrett: To ask the Secretary of State for Transport what estimate he has made of the number of households which will be subjected to *(a)* a noise level of (i) 63dBa Leq or more and (ii) 69dBa Leq or more and *(b)* an increase in noise level of 3dBa Leq or more directly as a result of (A) the construction and (B) use of a second runway at Edinburgh airport as outlined in the aviation white paper. [151706]

Mr. McNulty: This information is set out in the Scottish Consultation Document and supporting technical reports. These estimate the number of people who would be affected by different levels of noise under a range of runway options at Edinburgh Airport including maximum use of the existing main runway, greater use of the existing crosswind runway and development of a new close parallel runway. Our analysis suggests that by 2030, the development of a new close parallel runway, assuming a—14 dBA technology improvement, would reduce the number of people affected within the 63 dBA 16 hour Leq contour by 300 with an increase of 200 people affected at the 69 dBA 16 hour Leq contour.

The numbers of houses within these contours for a new close parallel runway is estimated to be 200 at 63 dBA and 100 at 69 dBA.

Road Deaths

Mr. Redwood: To ask the Secretary of State for Transport how many deaths have occurred on the A40 from *(a)* the M40 to the A312 junction, *(b)* the A312 junction to the A4005 junction and *(c)* from the A4005 junction to Westway in the last three years. [151486]

Dr. Howells: On the A40 from the M40 to the London Boundary there have been seven recorded injury accidents in the 36 month period to 31 December 2003. All accidents were coded as slight.

The section of the A40 inside London forms part of the Greater London Authority Road Network—now known as the Transport for London Road Network—and is the responsibility of the Mayor and Transport for London (TfL). Further information concerning the accident statistics of the road should be obtained from:

Chris Lines
Head of London Road Safety Unit
Transport for London
Windsor House
42–50 Victoria Street
London SW1H OTL

Through Ticketing

Mr. Drew: To ask the Secretary of State for Transport if he will make a statement on how he intends to encourage through ticketing, particularly where changes in bus contracts for certain routes require a passenger to use different companies for their journey. [151942]

Mr. McNulty: Local authorities have a power under s135 of the Transport Act 2000 to require local bus operators to provide through ticketing. The Bus Partnership Forum, which I chair, has produced four templates intended for use as model ticketing schemes, including one that provides an example of a through-ticketing scheme involving different companies. We are placing the templates on the Department for Transport's website (under "Local Transport"), and I encourage all local transport authorities and bus operators to take advantage of these resources.

For services that are operated under contact to the local authority, there is nothing to prevent the authority imposing conditions as to ticket validity on those services.

Transport (Wales)

Mr. Wiggin: To ask the Secretary of State for Transport if he will list the figures for *(a)* reliability, *(b)* punctuality, *(c)* the public performance measure, and *(d)* complaints for each train operator operating services in Wales in the last year for which figures are available. [151750]

Mr. McNulty: The Strategic Rail Authority (SRA) measures train performance by the Public Performance Measure (PPM), which combines reliability and punctuality. It is published by train operator in the SRA's quarterly National Rail Trends (NRT). The latest publication covers performance to the year ending 30 September 2003 and is placed in the Library of the House.

Until March 2003, complaints data by train operator were published in the SRA's six monthly On Track publication. Copies of On Track are placed in the Library of the House. In future, complaints data by train operator will appear annually in Quarter 4 of NRT which will also act as an annual compendium of statistics. This will be published in the summer.

Mr. Wiggin To ask the Secretary of State for Transport if he will list the rail infrastructure improvement schemes and their projected cost *(a)* being carried out in Wales and *(b)* planned for Wales. [151752]

Mr. McNulty: There are no infrastructure improvement schemes currently in progress. The Vale of Glamorgan line is planned to re-open between Barry and Bridgend later this year, with two new stations to be built at Llanwit Major and Rhoose. This scheme is funded by the Welsh Assembly Government.

Mr. Wiggin: To ask the Secretary of State for Transport what representations he has received on aviation in Wales since the publication of the Aviation White Paper. [151753]

Mr. McNulty: Since the publication of the White Paper we have received one representation requesting further information about its conclusions for Wales.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Agricultural Employment

Mr. Connarty: To ask the Secretary of State for Environment, Food and Rural Affairs what budget has been allocated for the enforcement of employment law in agriculture during the period covering the last two financial years; and how many enforcement officers are dedicated to investigating breaches of employment law in agriculture. [152096]

Alun Michael: The only employment law enforced by Defra is the Agricultural Wages Order made by the Agricultural Wages Board for England and Wales under the Agricultural Wages Act 1948. Initial enforcement is undertaken by the five members of Defra's Agricultural Wages Team at an annual cost of some £133,000. This process is complaint led and complaints are investigated by Agricultural Wages Inspectors based in the Department's Rural Payments Agency. Some 37 Rural Payments Agency staff are authorised to investigate agricultural wage complaints. In the 2002–03 financial year it is estimated that agricultural minimum wage investigations undertaken by the Rural Payments Agency utilised staff resources of just over 0.5 staff years at a cost of £12,000. Rural Payments Agency staff inputs between April and December 2003 totalled some 0.25 staff years at a cost of £6,000.

Avian Influenza

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what records her Department keeps of outbreaks of avian influenza among *(a)* poultry flocks, *(b)* poultry meat processors and *(c)* egg processors in EU member states in the last five years. [151962]

Mr. Bradshaw *[holding answer 30 January 2004]:* Our records show the following outbreaks of Highly Pathogenic Avian Influenza in member states in the last five years. These have all been in poultry flocks:

Italy—1997 until April 2000;

Netherlands—March to May 2003;

Belgium—April 2003; and

Germany—May 2003.

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what biosecurity measures the Government have in place to protect *(a)* poultry farmers and *(b)* consumers from (i) legal and (ii) illegal (A) poultry meat and (B) egg imports from countries in South East Asia which have reported an outbreak of avian influenza. [151963]

Mr. Bradshaw *[holding answer 30 January 2004]:* Defra issued advice on biosecurity and on health and safety to the farming industry on 5 November 2003. In view of the avian influenza situation, we are writing to all known poultry keepers and to veterinary surgeons to highlight the problem and to reissue the advice.

There is no legal trade in poultry meat or eggs from South East Asian countries affected by avian influenza other than from Thailand. Prohibitions have been placed on imports from Thailand of meat, meat products and meat preparations from species susceptible to avian influenza.

HM Customs and Excise are responsible for measures to detect and prevent illegal imports into Great Britain of prohibited animal products They have put in place measures to address the possibility of illegally imported products. This included notification to all Customs staff of the new controls prohibiting imports from Thailand and ensuring controls are in place to prevent any trade imports in accordance with the EU Council Directive.

The Food Standards Agency advice is that eating chicken and eggs is not considered a risk to consumers. This is because the risk to people arises from close contact with live chickens that have the disease, and not through eating chicken or eggs.

Badgers

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 10 December 2003, *Official Report*, column 522W, on badgers, whether the reference to the gassing of badgers being considered to be inhumane refers only to the use of hydrogen cyanide gas; and what gases are available for use for the slaughter of subterranean animals which have properties that do not engender distress in those animals. [150568]

Mr. Bradshaw: In his 1980 report, "Badgers, Cattle and Tuberculosis", Lord Zuckerman considered gassing as a method of capture. Having consulted the Government Chemical Defence Establishment at Porton Down, he recorded that:

> "the only likely chemical alternatives to cyanide are carbon monoxide and nerve gases. The latter, however, are too dangerous to handle, and the former is, weight for weight, significantly less toxic than cyanide, and therefore likely to prove less effective than cyanide in practice."

He recommended that work be carried out to devise improvements in gassing procedures and this work concentrated on hydrogen cyanide. The Krebs Report points out that the subsequent investigation:

> "... cast doubt on the humaneness of this method of killing because research showed that badgers did not die immediately underground."

The following pesticides are currently approved for the control of subterranean animals:

Cymag, containing sodium cyanide, which generates cyanide gas for rat and rabbit control; and

Luxan Talunex, and Phostoxin, both of which contain aluminium phosphide and generate phosphine gas for the control of moles, rats and rabbits.

These pesticides are approved on the basis that they are safe, effective, and do not cause unnecessary pain and suffering to the target animal.

Bottom Trawl Survey

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what *(a)* standard trawl speed and *(b)* type of trawl gear is used by her Department's survey vessels in carrying out the International Bottom Trawl Survey in the North Sea. [149121]

Mr. Bradshaw: The trawl used for scientific surveys of bottom living fish in the North Sea is the GOV trawl ('Grande Ouverture Verticale'). This general purpose bottom trawl has a high headline of five to six metres, and is used where the target species are a mix of commercial whitefish such as cod, haddock, whiting, pout and saithe. The net also samples shoaling or pelagic species including herring and mackerel. Design, specification and operation of the GOV trawl are all agreed internationally and co-ordinated by the International Council for the Exploration of the Sea. The standard towing speed is four knots over the sea bed.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether the survey vessels employed in carrying out the International Bottom Trawl Survey are *(a)* stern trawlers and *(b)* side trawlers. [149122]

Mr. Bradshaw: They are stern trawlers.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether the gear used by survey vessels carrying out the International Bottom Trawl Survey in the North Sea differs from the gear used by commercial trawlers in the same area. [149123]

Mr. Bradshaw: Yes. Commercial gear is rigged by individual skippers to suit local conditions and to maximise the catch of target species. It is regularly modified to follow the changes in the technical conservation legislation, and is frequently adjusted to improve catchability. Survey gear is chosen to fish both a wide range of species and a wide range of sizes including juvenile fish. It is maintained and operated to an internationally agreed specification without modification over time, so that the results of different national surveys can be combined. True comparisons can thus be made from year to year unaffected by technical changes.

Bovine TB

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many cattle were slaughtered on average each year during *(a)* 1976 to 1982, *(b)* 1982 to 1988, *(c)* 1988 to 1997 and *(d)* 2003 because of TB, including reactors, dangerous contacts and IRs; and what percentage this represented of the national herd in each case. [150589]

Mr. Bradshaw: The data requested up to and including 1997 are provided in the table:

Period	*Average number of GB cattle slaughtered per year*[1]	*Percentage of GB national herd*
1976–82	955	0.01
1982–88	786	0.01
1988–97	2,215	0.02

[1] TB reactors plus contacts.

Source:
Animal Health—Report of the Chief Veterinary Officer 1976–97.

Provisional data indicate that 21,632 cattle[1] were slaughtered in Great Britain between 1 January and 30 November 2003. This equates to 0.24 per cent. of the national herd.

[1] TB reactors plus contacts. Provisional data downloaded from the State Veterinary Service database on 22 December 2003. Subject to change as more data become available.

EU Legislation

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list the EU legislation her Department has had responsibility for implementing since its inception; and what the *(a)* EU deadline for implementation and *(b)* date of final United Kingdom implementation were in each case. [148595]

Alun Michael: The Department for Environment, Food and Rural Affairs plays a leading role in the UK's EU policy on the environment, agriculture, fisheries, animal and plant health. Between 8 June 2001 and 31 December 2003, 89 EU Directives, for which Defra has responsibility for implementation, were adopted.

The table lists the directives adopted together with:

(a) the EU deadline for transposition into domestic legislation.

(b) where, appropriate, the final United Kingdom transposition date.

Details of all Directives in force can be found on the Eur-Lex database available on the European Union's website.

Directive number	*Directive name*	*Transposition date*	*Date UK transposition completed*
2001/047/EC	Placing plant protection products on the market	31 December 2001	25 February 2002
2001/048/EC	Fixing maximum levels of pesticide residues	28 February 02	25 February 2002
2001/049/EC	Placing plant protection products on the market	31 December 2001	25 February 2002
2001/057/EC	Fixing maximum levels of pesticide residues	28 February 2002	25 February 2002
2001/064/EC	Marketing of fodder plant seed and cereal seed	31 August 2001	5 March 2003
2001/080/EC	Limitation of emissions of certain pollutants into the air from large combustion plants	27 November 2002	9 September 2003
2001/081/EC	National emission ceilings for certain atmospheric pollutants	1 March 2002	10 January 2003
2001/082/EC	Community code relating to veterinary medicine products	27 November 2002	31 March 2003

2003/119/EC	Amending Council Directive 91/414/EEC to include mesosulfron, propoxycarbazone and zoxamide as active substances	30 September 2004	Full UK implementation not completed

Farm Incomes

Mr. Hoyle: To ask the Secretary of State for Environment, Food and Rural Affairs what the average income of *(a)* arable, *(b)* beef, *(c)* dairy, *(d)* poultry, *(e)* pig, *(f)* sheep and *(g)* mixed farmers was in Lancashire in the latest year for which figures are available. [149936]

Alun Michael: The average net farm income for farms greater than eight ESUs in the county of Lancashire was £20,450 for the year ending February 2003. Due to lack of farm numbers in the source survey this can only be broken down into the following farm types:

	£000
Cattle and Sheep in the LFA	15,530
Dairy Farms	16,730
All other farm types	26,260

Data source:
Farm Business Survey

Net farm income is defined as the return to the principal farmer and spouse for their manual and managerial labour and on the tenant-type capital of the business. It includes income from non-agricultural activities that are fully integrated into the farming business and which depend on the existence of the core farming activity.

Farming Subsidies

Mr. Wills: To ask the Secretary of State for Environment, Food and Rural Affairs how many farmers in the United Kingdom received subsidies with a value of *(a)* €0 to €5,000, *(b)* €5,000 to €50,000 and *(c)* more than €50,000 in (i) 2002–03, (ii) 2001–02, (iii) 2000–01 and (iv) 1999–2000. [144456]

Alun Michael: The following figures represent payments made in the European Agriculture Guidance and Guarantee Fund (EAGGF) Year (16 October to 15 October).

Payments on our financial systems are in Sterling. To generate the ranges in Euros the bands have been converted into sterling based on an average conversion rate for each EAGGF year.

These figures represent payments to English farmers. Information for other countries within the UK is a matter for their respective devolved assemblies.

EAGGF Year	€0 to €5,000	€5,000 to €50,000	Greater than €50,000
2002–03	88,398	39,823	4,936
2001–02	98,351	37,855	4,330
2000–01	97,182	39,169	4,962
1999–2000	92,220	38,030	4,062

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what proceedings have been brought against shore-side dealers who handle black fish in each of the last 10 years. [150240]

Mr. Bradshaw: Under the Sea Fishing (Enforcement of Community Control Measures) Order 2000 (SI 2000 No. 51) proceedings for the submission of false documentation, associated with the handling of black fish, may be taken against the representative (agent) of the master in respect of landing declarations, against the first seller of fish in respect of sales notes or the buyer of fish where the first marketing is not carried out by an auction centre or an authorised person or body and against the transporter of fish in respect of the transport documentation. There is a maximum of up to £50,000 for each offence committed on summary conviction.

Flooding

Mrs. May: To ask the Secretary of State for Environment, Food and Rural Affairs (1) when the Environment Agency will publish maps showing the climate change zone in relation to the one in 100 year floodplain; [148282]

(2) when the Environment Agency will publish policies on the incorporation of climate change calculation into the determination of floodplain. [148283]

Margaret Beckett: The Environment Agency's Flood Mapping Strategy of July 2003 outlines 2005 as the earliest date for delivery of the 'Flood Zones for year 2050' onto the National Flood and Coastal Defence Database. 'Flood Zones for year 2050' is a dataset to show planners the anticipated extent of a range of flood probabilities (including, for fluvial flooding, a zone showing the one per cent. or one in 100 year probability) in the year 2050, taking account of current guidance on climate change.

The Environment Agency follows government policies and guidance for climate change; for floodplain, this is found in PPG25. The 'Flood Zones for year 2050' will incorporate the climate change guidance found in Appendix A of PPG25, namely an allowance for sea level rise and an increase in fluvial flows of 20 per cent.

Mrs. May: To ask the Secretary of State for Environment, Food and Rural Affairs when the results of the work commissioned by the Environment Agency to model the impact of a one in 100 year plus 20 per cent. flood on the River Thames will be available. [148284]

Margaret Beckett: I understand that the Environment Agency expect the final results from modelling the impact of various floods on the River Thames, including the one in 100 year plus 20 per cent. will be available by summer 2004.

Haddock

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what steps have been taken to encourage a consumer shift from cod to haddock; and what assessment she has made of the impact on the British fleet of such a shift; [150853]

(2) what assessment has been made of whether haddock is an acceptable retail alternative to cod; [150854]

(3) what plans she has to offer marketing assistance to fish wholesalers and retailers to encourage increased consumption of haddock by British consumers. [150857]

Mr. Bradshaw: Decisions on which species of fish to buy are for consumers to take. However the Sea Fish Industry Authority undertakes work to promote seafood consumption, and, with Seafood Scotland, is beginning a consumer campaign for marketing haddock.

Hill Farmers

Mr. Paul Marsden: To ask the Secretary of State for Environment, Food and Rural Affairs what the average income was for a hill farmer in Shrewsbury and Atcham in the last year. [151317]

Alun Michael: Estimates of farm business income are obtainable from the Farm Business Survey, but results are not available at constituency level because the size of the sample is too small.

Net farm income for full-time farms either wholly or mainly in the less favoured areas in the West Midlands Government Office Region in 2002–03, excluding farms involved in the compulsory FMD cull, was £12,000 per farm. This compares with a net farm income of £13,200 for the West Midlands Government Office Region as a whole and £16,600 for England.

Net farm income is the return to the principal farmer and spouse for their manual and managerial labour and on the tenant-type capital of the business.

Foot and Mouth Disease

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs how many prosecutions have been initiated and are pending, by or on behalf of her Department against *(a)* contractors and *(b)* farmers, in respect of alleged fraudulent claims or other irregularities relating to (i) claims made for compensation, (ii) works undertaken on behalf of her Department, and (iii) animals slaughtered; how many court hearings have been completed; and how many of the prosecutions have been successful. [150555]

Mr. Bradshaw: Since 2001, no prosecutions have been commenced in relation to fraudulent claims by contractors for compensation or works undertaken on behalf of the Department. Three prosecutions were commenced into fraudulent claims for compensation by farmers: one farmer pleaded guilty, two farmers were acquitted. There are no outstanding prosecutions.

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs how many and what value of payments remain unpaid to Welsh contractors employed during and following the foot and mouth disease outbreak. [151727]

Mr. Bradshaw: I refer the hon. Member to the answer I gave to the hon. Member for Weston-Super-Mare (Brian Cotter), on 6 January, *Official Report*, column 261W.

The Department is in dispute with four Welsh contractors over charges arising, or which are claimed to have arisen, from the 2001 foot and mouth disease outbreak. As these matters are ongoing it would be inappropriate to comment further.

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs how many and what value of compensation payments remain unpaid to Welsh farmers as a result of the foot and mouth disease outbreak, broken down by *(a)* constituency and *(b)* local authority area. [151728]

Mr. Bradshaw: There are no compensation payments due to Welsh farmers that remain unpaid as a result of the foot and mouth outbreak.

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs how many compensation payments, of what value, have been paid to Welsh farmers as a result of the foot and mouth disease outbreak, broken down by *(a)* constituency and *(b)* local authority area. [151729]

Mr. Bradshaw: We cannot provide a breakdown of compensation payments by either constituency or local authority area. The compensation payments data is not held in that form.

However, we can provide the following breakdown of compensation payments made to Welsh farmers by county.

Payments

£

County	*Number*	*Total Amount*
Powys	991	41,470,929
Gwent	211	10,517,681
Mid Glamorgan	54	775,061
Clwyd	25	508,428
West Glamorgan	14	971,654
Dyfed	12	377,399
South Glamorgan	2	253,318
Totals	1,309	54,874,470

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs what the criteria are for interest payments to be made by her Department on outstanding foot and mouth disease claims; and if she will make a statement. [151839]

Mr. Bradshaw: The criteria will vary on a case by case basis and will depend on such things as the precise contractual terms providing for interest; the construction of the contract; the terms and applicability of The Late Payment of Commercial Debts (Interest) Act 1998; and the validity and timeliness or otherwise of the applications for payment received.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how many outstanding claims for foot and mouth disease clean-up contracts remain to be processed by her Department; and what estimate has been made of the total liability. [151840]

Mr. Bradshaw: As the Department has paid businesses on the basis of the contractual terms agreed it does not believe there are any valid unpaid and outstanding invoices submitted by businesses to the Department for work undertaken in connection with the foot and mouth outbreak in 2001.

The Department is withholding £52.9 million from businesses in connection with charges arising from the provision of goods, services and works during the outbreak. In these cases, it believes on the basis of the quantum, accounting, technical and legal advice it has received that it was overcharged for goods, services and works during the outbreak. In all other cases, the Department has paid businesses for the goods, services and works provided in connection with the outbreak in 2001.

As at 29 January 2004 the Department is in serious dispute with 22 contractors and five of these disputes are currently in the civil courts, with more expected to follow.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how much money has been spent *(a)* internally and *(b)* on outside assistance on the disputing and forensic analysis of invoices submitted by Northumberland and Durham Machinery Ring Ltd for foot and mouth disease clean-up contracts. [151841]

Mr. Bradshaw: The Department has spent *(a)* £2,480 internally and *(b)* £336,357 excluding VAT externally on professional services in connection with the forensic examination of the Northumberland and Durham Machinery Ring account pertaining to the foot and mouth outbreak in 2001.

This expenditure excludes the costs of the successful mediation on 20 January, which are the subject of standard confidentiality provisions agreed between the parties.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs what arrangements have been made by her Department with organisations or persons rewarded by payment of commission, percentage or other means for securing reductions in invoices submitted by contractors for foot and mouth disease clean-up contracts. [151842]

Mr. Bradshaw: No such arrangements have been made.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how many invoices submitted for foot and mouth disease clean-up contracts have been paid in full by her Department without negotiation or dispute as to quantum. [151843]

Mr. Bradshaw: I refer the hon. Member to the answer I gave to the hon. Member for Weston-Super-Mare (Brian Cotter) on 6 January 2004, *Official Report*, columns 260–62W. The information requested could be provided only at disproportionate cost, as it would require a review of all applications for payment submitted over four financial years in connection with the foot and mouth outbreak in 2001.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how many of the claims made for foot and mouth disease clean-up contracts which have been settled by her Department have been settled within the allocated time period. [151844]

Mr. Bradshaw: I refer the hon. Member to the answer I gave to the hon. Member for Weston-Super-Mare (Brian Cotter) on 6 January 2004, *Official Report*, columns 260–62W.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how many claims made for foot and mouth disease contracts submitted to her Department have been settled to date. [151845]

Mr. Bradshaw: I refer the hon. Member to the answers I gave to the hon. Member for Weston-Super-Mare (Brian Cotter) on 6 January 2004, *Official Report*, columns 260–62W.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how many claims for foot and mouth disease clean-up contracts have yet to be settled by her Department. [151846]

Mr. Bradshaw: The Department is withholding £52.9 million from businesses in connection with charges arising from the provision of goods, services and works during the outbreak. In these cases, it believes on the basis of the quantum, accounting, technical and legal advice it has received that it was overcharged for goods, services and works during the outbreak. In all other cases, the Department has paid businesses for the goods, services and works provided in connection with the outbreak in 2001.

As at 29 January 2004 the Department is in serious dispute with 22 contractors and five of these disputes are currently in the civil courts, with more expected to follow.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how many claims for foot and mouth disease clean-up contracts have been submitted to her Department since the outbreak of the disease. [151847]

Mr. Bradshaw: The Department considers it has received 30 claims for foot and mouth disease clean-up contracts since the foot and mouth outbreak in 2001.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how much money has been spent *(a)* internally and *(b)* on outside assistance on the disputing and forensic analysis of invoices submitted by businesses for foot and mouth disease clean-up contracts. [151848]

Mr. Bradshaw: I refer the hon. Member to the answer I gave to the hon. Member for Weston-Super-Mare (Brian Cotter), on 6 January 2004, *Official Report*, column 259W.

Internal costs total £430,000 to date.

Mr. Bellingham: To ask the Secretary of State for Environment, Food and Rural Affairs how much interest has been paid by her Department on outstanding claims for foot and mouth disease contracts; what estimate has been made of likely outstanding payments; and if she will make a statement. [151849]

Mr. Bradshaw: I refer the hon. Member to the answer I gave to the hon. Member for Weston-Super-Mare (Brian Cotter), on 6 January 2004, *Official Report*, columns 259–60W.

Mr. Flook: To ask the Secretary of State for Environment, Food and Rural Affairs how many of the claims made for foot and mouth disease clean-up contracts which have been settled by her Department with *(a)* companies and *(b)* individuals based in Somerset were settled within the allocated time period. [152001]

Mr. Bradshaw: I refer the hon. Member to the answer I gave to the hon. Member for Weston-super-Mare (Brian Cotter), on 6 January 2004, *Official Report*, column 261W.

The Department is in dispute with one contractor in Somerset over charges arising, or which are claimed to have arisen, from the 2001 foot and mouth disease outbreak. As this matter is on-going, it would be inappropriate to comment further.

Trawl Speeds

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what influence trawl speed has on *(a)* species caught and *(b)* size of fish caught. [149125]

Mr. Bradshaw: Trawl speed can influence the capture of different species, with faster swimmers requiring a faster towing speed, and the duration of tow may affect the size of fish caught, since larger fish may be able to swim for longer before they tire and fall back into the net.

CULTURE, MEDIA AND SPORT

Specialist Sports Colleges

10. **Mr. Truswell:** To ask the Secretary of State for Culture, Media and Sport if she will make a statement on specialist sports colleges in *(a)* England and *(b)* the Pudsey constituency. [151931]

Mr. Caborn: There are currently 228 specialist sports colleges in England, and a further 30 will join them from September 2004. The Government aims to establish 400 specialist sports colleges by September 2005, subject to sufficient high quality applications. Within Pudsey, Priesthorpe Secondary School became a specialist sports college in 2002.

Glasgow Science Centre

11. **Mr. Sarwar:** To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the level of financial assistance provided by the Government to Millennium projects in Scotland, with particular reference to the Glasgow Science Centre. [151932]

Mr. Caborn: The Millennium Commission, rather than the Government, has provided £209 million of National Lottery funding for Millennium projects in Scotland. £36.2 million has been awarded to the Glasgow Science Centre. The Glasgow Science Centre as also been funded by public bodies under the Scottish Executive, which is responsible for Science Centre policy within Scotland.

Licensing Act

12. **Mr. Greg Knight:** To ask the Secretary of State for Culture, Media and Sport what representations she has received from sports clubs about the impact of the Licensing Act 2003. [151933]

Mr. Caborn: We have received representations from several hon. Members, the Central Council for Physical Recreation, small sports clubs and from individual members of small sports clubs. These representations relate mainly to the issue of the fee levels which we intend to set shortly for small sports clubs under the provisions of the Licensing Act 2003.

Arts Facilities

14. **Mr. Jack:** To ask the Secretary of State for Culture, Media and Sport what recent studies her Department has conducted on the economic benefits to local communities of investment in arts facilities. [151935]

Estelle Morris: My Department has commissioned a review of the evidence of the economic, social and environmental impact of culture in regeneration. The findings will be published shortly, alongside a document consulting on proposals for maximising culture's impact on communities.

Community Fund/New Opportunities Fund

15. **Ann McKechin:** To ask the Secretary of State for Culture, Media and Sport what progress has been made in merging the Community Fund and the New Opportunities Fund. [151936]

Estelle Morris: The New Opportunities Fund (NOF) and the Community Fund are working closely together already. A single Chief Executive has been appointed. Full merger will happen when the legislation is in place.

Playing Fields

16. **Jane Griffiths:** To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the sale of playing fields. [151938]

Mr. Caborn: Planning guidance ensures that local authorities must fully consider the sporting needs of communities in decisions involving playing fields.

But community need may better be addressed by developing other forms of sports facility. Planning applications involving playing fields in 2001–02 produced 447 new or refurbished sports facilities worth £274 million.

Olympic Bid

17. **Bob Spink:** To ask the Secretary of State for Culture, Media and Sport what progress has been made on the London Olympics bid. [151939]

Tessa Jowell: The first stage of the bid, the Applicant Questionnaire, was delivered to the International Olympic Committee on 15 January.

The Government continues to work closely with the other stakeholders to develop the outline proposals in the Questionnaire.

Science and Technology

Dr. Iddon: To ask the Secretary of State for Culture, Media and Sport what support her Department is giving to the promotion of science and technology via museums. [151929]

Estelle Morris: We have increased revenue grant-in-aid to our sponsored science and technology museums by 23 per cent. in real terms to over £70 million per annum since 1997–98, including funding for free admission to their permanent collections. The number of visits to these museums has increased by 73 per cent. to 7.6 million.

TREASURY

Labour Disputes

Mr. Stephen O'Brien: To ask the Chancellor of the Exchequer what estimate he has made of the average cost of working days lost owing to labour disputes in the *(a)* public and *(b)* private sector in each year between 1995 and 2003; and if he will make a statement. [151832]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Stephen O'Brien, dated 2 February 2004:

As National Statistician I have been asked to reply to your recent question about the estimate of the average yearly cost of working days lost owing to labour disputes in the private and public sector each year since 1995. (151832)

The Office for National Statistics produces figures on the number of working days lost as a result of labour disputes, but does not estimate the cost of these lost days.

Whilst there are no statistics on numbers of working days lost that specifically relate to the public sector, figures are available for the public administration, education and health industries sectors which encompass most of the public sector. In the table below, the data for these sectors (Standard Industrial Classification (SIC) sectors 75, 80 and 85) are presented alongside data for the rest of the economy for 1995 to 2002, the last year for which annual data are available.

Working days lost due to UK labour disputes, 1995–2002

thousands

	Public administration, education and health industries (SIC 75, 80, 85)		*Rest of Economy*	
Year	*No of days lost*	*Percentage of all days lost*	*No of days lost*	*Percentage of all days lost*
1995	178	43	237	57
1996	295	23	1,008	77
1997	65	28	170	72
1998	50	18	232	82
1999	66	27	176	73
2000	221	44	278	56
2001	331	63	194	37
2002	1,013	77	310	23

Area Cost Adjustment (Statistics)

Mr. Luff: To ask the Chancellor of the Exchequer for what reason the Office for National Statistics does not release *(a)* New Earnings Survey micro-data since 2000, *(b)* details of the sensitivity of regression results, *(c)* alternative estimates using Labour Force Survey data and *(d)* disaggregated Labour Force Survey data to researchers investigating area cost adjustment calculations; and if he will make a statement. [151128]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Peter Luff, dated 2 February 2004:

As National Statistician I have been asked to reply to your recent Parliamentary Question about the availability of data to researchers. (151128)

Since 2002 the Office for National Statistics Micro-data Release Panel has implemented revisions to procedures for releasing all micro-data held by ONS. The procedures are derived from the principles of National Statistics, its Code of Practice and protocols, and the law.

New Earnings Survey (NES) micro-data up to 2003, the latest year for which data are available, have been released to other government departments. NES micro-data are available for statistical research purposes through the ONS "virtual data-lab", which provides access to micro-datasets on ONS premises under controlled access conditions, in line with the Code of Practice and protocols. A longitudinal NES dataset used by some academic and government researchers was suspended from 2001 when I initiated a review of the access contracts and methods. Work is now underway to make this dataset available through the virtual data-lab, under different contractual arrangements and methods consistent with the Code of Practice.

Labour Force Survey (LFS) estimates of employees' earnings by region, occupation and industry are published in the LFS Quarterly Supplement which is available on the ONS web-site: www.statistics.gov.uk/statbase/Product.asp?vlnk=545&More=N. Anonymised copies of all LFS micro datasets are available to researchers from the UK Data Archive (UKDA). Information about this service is available from the UKDA web-site: www.data-archive.ac.uk. Access requests by government and academic researchers to confidential (non-anonymised) copies of LFS micro-data are considered on a case-by-case basis by the Micro-data Release Panel.

Any research studies carried out by ONS using regression analysis of either NES or LFS earnings data would usually be published if of significance, and of publishable standard. No specific work on the sensitivity of regression results exists for publication, or has been prepared for other reasons. In general, micro-data access is a well recognised statistical service, and all researchers have access to more statistical records than in most countries in Europe.

Block Grant (Scotland)

Mr. Wilson: To ask the Chancellor of the Exchequer what the value was of the block grant allocation to the *(a)* Scottish Office and *(b)* Scottish Executive in each of the last 10 years; and what the projected figure is for the next two years in *(a)* cash and *(b)* constant terms. [151967]

Mr. Boateng: Information on the block grant from the Scotland Office to the Scottish Executive and the Scotland Office's own spending is contained in the Scotland Office's Estimates and the Scotland Office Departmental Report (Cm 5927), and prior to devolution in the Scottish Office's Estimates. Information on the Scottish Departmental Expenditure Limit for the period 1998–99 to 2005–06 is contained in table 1.2 of the Public Expenditure Statistical Analyses in nominal terms and in table 1.4 in real terms.

Central Government Spending

Mr. Letwin: To ask the Chancellor of the Exchequer what the loss to public funds was of gross administrative expenditure in central Government for *(a)* 1996–97 and *(b)* 2003–04. [R] [145609]

Mr. Gordon Brown *[holding answer 5 January 2004]:* I refer the right hon. Gentleman to the answer I gave to him on 29 January 2004, *Official Report*, column 448W.

Customs and Excise

Mr. Flook: To ask the Chancellor of the Exchequer when the last occasion was that a British citizen was charged under *(a)* section 42 of the Customs Consolidation Act 1876 and *(b)* section 170(2) of the Customs and Excise Management Act 1979; and what resulted from these charges. [151855]

John Healey: Section 42 of the Customs Consolidation Act 1876 imposes a prohibition on the import of indecent and obscene articles. Section 170(2) of the Customs and Excise Management Act 1979 creates the criminal offence of contravening this prohibition. The last occasion on which Customs charged a British Citizen under this legislation was 31 January 2003. This person was sentenced on 12 March 2003 to a three-year Community Rehabilitation Order and ordered to register as a sex offender for five years.

Since April 2003 Customs and Excise have refocused their strategy for detections of such material at import, placing greater emphasis on working more closely with other agencies, including the passing of intelligence to the police for further investigation and prosecution as appropriate.

ECOFIN

Mr. Hood: To ask the Chancellor of the Exchequer what the outcome was of the ECOFIN Council held on 20 January; what the Government's stance was on the issues discussed, including its voting record; and if he will make a statement. [150137]

Mr. Gordon Brown: I attended ECOFIN on 20 January.

The Irish Presidency presented its work programme. The focus of the first three months would be on the Lisbon economic reform agenda and enlargement for the final three months. I stressed the importance of the Lisbon Agenda, the need for ECOFIN Ministers to be fully engaged in the forthcoming debate on future financing of the EU and the importance of re-invigorating the EU/US economic relationship.

The Council agreed opinions on the updated Stability and Convergence programmes for Denmark, Austria, Finland and Sweden.

The Council discussed the Report of the Employment Task Force (Kok Report) on the basis of a note prepared by the Economic Policy Committee. The report set out that the EU was likely to miss the 2005 and 2010 Lisbon employment targets without immediate implementation of labour market reforms. I welcomed the report and its recommendations and stressed the onus was now on member states to demonstrate the political will to reform. The Presidency agreed concluding that follow-up to the Kok report was a priority for the spring Council.

Following a French request, the Council again briefly discussed VAT reduced rates. There was no consensus and the Presidency concluded that the item would return to a future ECOFIN. The Council also discussed a French paper on raising minimum rates on tobacco tax. The Commission and Presidency agreed there was little prospect of agreeing further harmonisation of rates.

The Commission reported to the Council on discussions with the International Accounting Standards Board (IASB) on proposed revisions to International Accounting Standards 32 and 39, relating to accounting for financial instruments. The Presidency welcomed the setting up of a High Level Group under IASB chairmanship to help find agreement on the outstanding issues.

The location of the three Lamfalussy Committees of banking, insurance and securities supervisors was agreed at lunch. The Banking Committee will be located in London, the Insurance Committee in Frankfurt and the Securities Committee will remain in Paris.

No votes were taken at the meeting.

Gold Receipts

Mr. Viggers: To ask the Chancellor of the Exchequer how much has been received from the sale of gold since 7 May 1999; how the receipts have been reinvested; and what the current market value of those reinvestments is. [152144]

Ruth Kelly: The proceeds from the sale of part of the United Kingdom's gold holdings between 6 July 1999 and 6 March 2002 totalled approximately $3.5 billion. These proceeds were invested in interest-bearing foreign currency assets in broadly the same proportion as currently held in the net foreign currency reserves (40 per cent. dollars; 40 per cent. euros; 20 per cent. yen). The gold sales reduced risk by around 30 per cent. (as measured by value-at-risk) and are not expected to deliver a loss in return when measured over the medium to long-term, the appropriate time horizon for such a decision.

The United Kingdom has been at the forefront internationally in promoting openness and transparency in reserves data. Details, including currency composition, are available from the Bank of England's website: www.bankofenqland.co.uk. The investment policy for the reserves is also outlined in the Exchange Equalisation Account Financial Accounts, most recently published on 1 December 2003 for financial year 2002–03. We do not provide market-sensitive information, however, about individual assets within the reserves portfolio.

Iraq

Mr. Dalyell: To ask the Chancellor of the Exchequer what his latest estimate is of the cost of United Kingdom military operations in Iraq. [151656]

Mr. Boateng: Of the £3 billion set aside by the Chancellor in last year's Budget to cover the cost of operations in Iraq, £1 billion was drawn down in the spring Supplementary Estimate for 2002–03. The remaining £2 billion of this special reserve has been carried forward to 2003–04.

In the recent PBR the Chancellor announced a further £500 million set aside for this financial year and a further £300 million for 2004–05 as a prudent allowance to cover Iraq and our continuing international commitment to the war on terrorism.

Public Service Agreements

Miss McIntosh: To ask the Chancellor of the Exchequer if he will make a statement on value for money in public service agreements relating to the environment. [151682]

Mr. Boateng: The latest Public Service Agreement (PSA) for the Department for the Environment, Food and Rural Affairs (DEFRA) was published in "2002 Spending Review—Public Service Agreements 2003–2006" (Cm 5571). DEFRA's PSA included a value for money target, focusing on a reduction in the unit cost of administering Common Agricultural Policy payments, and an increase in electronic service delivery capability. DEFRA published a report of performance against this target in its Autumn Performance Report in November 2003 (Cm 6017), and will update this further in the departmental report later this spring.

Tax Stamp Regimes

Miss McIntosh: To ask the Chancellor of the Exchequer what recent discussions he has had with *(a)* countries which have abolished tax stamp regimes for whisky and other spirits, *(b)* countries which, after consideration, decided against introducing tax stamps and *(c)* countries which have tax stamps regimes; and what the outcome of those discussions was. [151694]

John Healey: Officials are in regular discussions with other countries on these matters. Tax stamps have been introduced in 40 different countries for a variety of reasons ranging from quality assurance to tackling fraud. Of eight European Union and accession countries where direct inquiries have been made, Denmark, Italy, Portugal, Spain, Poland and the Czech Republic have no plans to withdraw their schemes. Greece have withdrawn their 'quality' marker stamp and Belgium decided after consideration not to introduce tax stamps. Additionally, we are aware that the USA withdrew their tax stamps in 1985 when the 1954 law governing marks on spirits was repealed. The variety of reasons for introduction and withdrawal of tax stamp schemes highlight that direct comparisons between different countries' excise regimes cannot be easily drawn.

Miss McIntosh: To ask the Chancellor of the Exchequer what assessment he has made of the effect on free trade of tax stamps. [151695]

John Healey: Under formal European Union agreements (Council Directive 92/12/EEC) member states may require the use of tax stamps or other fiscal marks on products subject to excise duty. Any such scheme must ensure that the tax stamps do not create obstacles to the free movement of the products.

Miss McIntosh: To ask the Chancellor of the Exchequer what effect he expects the electronic control of movements systems which will be in place in the EU by 2009 to have on tax stamp regimes. [151696]

John Healey: The EU Excise Movement and Control System (EMCS) should be introduced by July 2009 and should reinforce the Government's strategy to tackle alcohol duty fraud. It will allow member states to monitor, in real time, the despatch and receipt of movements of alcohol, as well as tobacco and certain fuel products, between tax warehouses located in different member states. EMCS will be an improvement on the current paper-based system of Accompanying Administrative Documents. However, tax stamps are still likely to have a useful role to play in the detection of smuggled and diverted products after the full implementation of EMCS.

Trade Balance (Wales)

Mr. Wiggin: To ask the Chancellor of the Exchequer what the balance of trade between Wales and *(a)* the

rest of the United Kingdom, *(b)* the rest of the European Union and *(c)* the rest of the world was for each year since 1997. [151757]

Ruth Kelly: Figures for trade in goods between Wales and the European Union, and for Wales and the rest of the world are shown in the following table:

Estimates of regional trade

£ million

Wales	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*January to September 2003*
Exports to EU	4,171	4,284	4,493	4,884	4,788	4,691	3,422
Imports from EU	1,299	1,649	2,005	2,234	1,999	2,376	1,821
Exports to Rest of the World	1,593	1,521	1,819	2,288	2,311	1,928	1,909
Imports from Rest of the World	2,310	2,671	3,515	3,604	3,709	3,475	2,210

Source:
Published in the 2003 Quarter 3 Regional Trade Statistics Press Release on 18 December 2003.

HM Customs and Excise do not collect information on the movement of traded goods between countries or regions within the UK.

These figures exclude the value of services and other intangibles included in the Balance of Payments, as the Balance of Payments estimates are published only for the UK as a whole.

VAT

Denzil Davies: To ask the Chancellor of the Exchequer what the total amount raised from VAT charged on goods imported into the United Kingdom was in each of the last three available financial years. [151723]

John Healey: The amount of import VAT received in the last three financial years was:

	£ million
2000–01	17,001
2001–02	16,194
2002–03	15,523

These figures include ex-warehouse VAT and are published in the Customs and Excise VAT Factsheet at www.uktradeinfo.com.

Importers registered for VAT reclaim import VAT on their VAT returns.

TRADE AND INDUSTRY

"Made in Britain" Identification

Michael Fabricant: To ask the Secretary of State for Trade and Industry what representations she has made to the European Commission with respect to their proposal that the "Made in Britain" identification be replaced by Made in Europe; and if she will make a statement. [150776]

Mr. Mike O'Brien: No proposal has been made to abolish national trading marks and replace them by a European Union wide trademark. The European Commission has produced a discussion document setting out options in considering possible EU origin marking. The document does not suggest abolition of national markings such as "Made in Britain". The Government are currently finalising its response to the Commission having consulted interested parties in the UK, including business, trade unions, retailers and consumer organisations. At a meeting with EU Trade Ministers on 25 January I made it clear that British companies would want to retain the ability to say "Made in Britain" or use other current marks and was assured by Commissioner Pascal Lamy that there was no proposal to interfere with companies continuing to do so.

Business Link

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry if she will assess the impact of Business Link on company productivity. [152055]

Nigel Griffiths: Two studies of the impact of Business Link have concluded that it provides good value for money in terms of additional jobs, turnover, profits, assets, exports and productivity growth. The work will be updated this summer.

An integral part of the new Business Link Performance Management Framework is the inclusion of a Gross Value Added measure. This enables Business Link Operators to quantify—in terms of wealth creation and productivity improvements—the impact of their support to businesses with whom they have built a more intensive relationship. Data will be available later this year.

Call Centres

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry when she intends to publish the competitiveness survey of UK call centres which her Department has commissioned. [151828]

Ms Hewitt: The study will examine the key factors contributing to the relative competitiveness of UK call centres. Subject to progress of the study, we will publish a report on the study and its findings in April 2004.

Civil Servants

Dr. Cable: To ask the Secretary of State for Trade and Industry how many civil servants, broken down by grade, there are in the Department and the agencies for which the Department is responsible; and what the figures were in January 1997. [150263]

Ms Hewitt: The Department of Trade and Industry and its agencies have reorganised their grading structures since 1997. This makes drawing direct comparison between current grades and those in 1997 very difficult.

In light of this, the following two tables have been provided:

Table 1 shows a comparison of the total number of staff in the Department of Trade and Industry on 1 January 1997 and the current date;

Table 2 shows a breakdown of the current staff in DTI and its agencies in terms of the closest equivalent of the old Civil Service grades.

To produce an equivalent table for 1997 would incur disproportionate cost.

Table 1: Staff on 1 January 1997 and as of the current date

	Number
1 January 1997	9,143
23 January 2004	9,224

Table 2: Breakdown of the current grade structure

Grade Level	*Headcount*
AA Level	498
AO Level	2,346
EO Level	1,576
HEO Level	1,806
SEO Level	834
Grade 7 Level	1,089
Grade 6 Level	398
Faststream	141
Senior Civil Service	468
Unknown Grade[1]	68
Grand total	9,224

[1] Unknown grade includes staff who have joined the Department from other organisations and who have not been fully assimilated into DTI systems.

Correspondence

Mr. Steen: To ask the Secretary of State for Trade and Industry when she will reply to the letter from the hon. Member for Totnes dated 5 December 2003 concerning Dr. Walter King of Totnes and insurance cover for US markets. [152199]

Ms Hewitt: My office has no record of having received the letter from the hon. Member.

Dark Matter Project, Saltburn

Vera Baird: To ask the Secretary of State for Trade and Industry how much has been spent on the Dark Matter Project at Boulby Mine, Loftus, Saltburn-by-the-Sea since its inception. [149216]

Mr. Mike O'Brien *[holding answer 19 January 2004]:* The DTI has, through the Particle Physics and Astronomy Research Council (PPARC), spent £13.366 million on the Dark Matter experiment at Boulby since 1992. This figure includes £2.4 million of a Joint Infrastructure Fund (JIF) award totalling £3.1 million.

Energy Efficiency

Mr. Drew: To ask the Secretary of State for Trade and Industry what discussions she has had with the Department for Environment, Food and Rural Affairs regarding the specifying of energy efficiency aims in the Energy White Paper. [151872]

Mr. Timms: The Energy White Paper was collectively agreed by Ministers (including the Secretary of State for Environment, Food and Rural Affairs) before being presented to Parliament in February 2003. Since then my right hon. Friend the Secretary of State for Trade and Industry has met regularly with colleagues from the Department for Environment, Food and Rural Affairs, in a variety of fora, to discuss sustainable development and energy issues. Energy efficiency and the implementation of the energy efficiency aims in the Energy White Paper have formed part of those discussions.

Export Credits Guarantee Department (Iraq)

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will list the contracts for which Iraq incurred its outstanding debt to the Export Credit Guarantee Department, including the names of the projects and the UK companies concerned; and if she will make a statement on the Government's intention to recover this debt. [151718]

Mr. Mike O'Brien *[holding answer 29 January 2004]:* ECGD has unrecovered claims of around £623 million arising from contracts with Iraq signed prior to the first Gulf conflict in 1991. This amount does not include interest, which, it is estimated, could bring the figure to around £1 billion.

These claims stem from more than 500 cases supporting the export of goods ranging from consumer items to heavy industrial equipment. The details of these contracts could be collated only at disproportionate cost.

The Government believe that Iraq's external debt is unsustainable and that creditors will need to agree a substantial reduction through a clear multilateral process in order to restore Iraq to sustainability. This is likely to lead to the writing off of the vast majority of Iraq's external debt.

Fusion Research Reactor

Mr. Chaytor: To ask the Secretary of State for Trade and Industry, pursuant to the answer of 16 December 2003, *Official Report*, column 814W, on the fusion research reactor, what assessment was made of the proximity of the Cadarache site to an earthquake fault when the United Kingdom gave its backing to the site. [149094]

Ms Hewitt *[holding answer 29 January 2004]:* In making its decision the UK considered the results of two assessments of the ITER candidate sites, the Joint Assessment of Specific Sites (JASS) in January 2003, and the European ITER Site Study Group (EISSG) in May 2003. Both concluded that Cadarache could meet the requirements for ITER. Safety regulations for the construction of new nuclear facilities in France to meet the risk of earthquakes are very strict. Earthquakes are more frequent and stronger in the vicinity of the Japanese candidate site, Rokkasho.

Business Start-ups

Mr. Woodward: To ask the Secretary of State for Trade and Industry how many businesses, and of what type, have received assistance in starting up from government schemes and initiatives in *(a)* St. Helens, *(b)* Merseyside and *(c)* the North West in each year from 1992. [144321]

Nigel Griffiths: Government support to start-up businesses is delivered primarily through a network of Business Link Operators under contact to the Small Business Service, an agency of the DTI. Numbers of start-up businesses assisted through this network in St. Helens, Merseyside and the North West from April 2001 are as follows:

	St. Helens	*Merseyside*	*North West*
2001–02	4	330	[1]
2002–03	23	667	1,623
2003–04 (To date)	17	579	3,502

[1] Total business start-ups not recorded separately at regional level before April 2002.

Information Technology

Mr. Allan: To ask the Secretary of State for Trade and Industry what cost savings have been made in her Department since the introduction of the Information Technology Procurement Centre of Excellence; and how these were calculated. [151046]

Ms Hewitt: A Centre of Excellence was established within the Department in June 2003 to integrate the essential functions which underpin the successful delivery of all types of acquisition-based programmes and projects. As cost benefits will not accrue until improvements start to take effect, it is too early to measure cost savings. All Centres of Excellence are currently developing future plans and as part of this process measurement of savings will be defined.

Mr. Allan: To ask the Secretary of State for Trade and Industry what audit mechanisms are in place to determine whether all Information Technology hardware and software products are being properly utilised in her Department. [151056]

Ms Hewitt: My Department has a range of software products and management policies to ensure that its IT is used in accordance with its intended purpose.

All IT services have an aligned security policy setting out the security measures to counter threats including misuse. Staff are advised of these policies and the checks that are made to ensure compliance. The Department's standard desktop service is owned and managed by our PFI partners and has been designed to prevent the unauthorised addition of products and devices. Auditing of this environment is carried out with a mixture of detection software, active monitoring of security logs and non-intrusive checks of data types, keeping in mind the parameters of data protection legislation and complying with OGC guidelines. Allied to these measures are the best practice guidelines available to all staff and line management.

New services must be procured and implemented in accordance with documented procedures which require business and security approval, with major services being subject to OGC Gateway Review.

Large Hadron Collider

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how much the Government have contributed to the funding of the Large Hadron Collider under construction in Switzerland. [152105]

Ms Hewitt: The Government have contributed a total of £361.88 million to CERN's Large Hadron Collider (LHC) project since its commencement in 1995. The contributions have been made in three ways:

(a) Construction of the LHC machine itself via the UK contribution to CERN (£214.57 million)

(b) The UK element of the CERN share of funding for the LHC Detectors (£67.26 million)

(c) UK domestic funding of the LHC Detectors (£80.05 million)

Miners' Compensation

Mr. Hepburn: To ask the Secretary of State for Trade and Industry what the average length of time was for settlement of miners' compensation claims for respiratory diseases in *(a)* the Jarrow constituency, *(b)* South Tyneside and *(c)* the UK in each year since 1997. [149912]

Nigel Griffiths: The figures are in the following table:

Average time from receipt of claim to settlement (days)

Year claim registered	*Jarrow*	*South Tyneside*	*UK*
1997[1]	2,109	1,953	1,823
1998[1]	1,417	1,454	1,485
1999[1]	1,151	1,163	1,125
2000	836	851	863
2001	634	641	621
2002	432	398	390
2003	-86(1)	136(1)	173

[1] Currently, the average length of time to settle a claim in Jarrow is 86 days. The table sets out the average time from 1997 to 2003.

Mr. Hoyle: To ask the Secretary of State for Trade and Industry what the average length of time was for settlement of miners' compensation claims for respiratory diseases in *(a)* Lancashire and *(b)* Chorley in each year since 1997. [151287]

Nigel Griffiths: The information is as follows:

Average time from receipt of claim to settlement (days)

Year claim registered	*Lancashire*	*Chorley*
1997[1]	1,921	—
1998[1]	1,448	1,504
1999[1]	1,123	1,104
2000	902	983
2001	598	504
2002[2]	387	505
2003[2]	175	147
2004	5	—

[1] The Department was unable to process any claims until after the signing of the Claims Handling Agreement, agreed with the claimants' solicitors, on 24 September 1999.

[2] Estate claims put on hold as a lower priority, in agreement with claimants' solicitors.

Mr. Hoyle: To ask the Secretary of State for Trade and Industry how many miners' compensation claims for respiratory diseases *(a)* have been made, *(b)* have been settled and *(c)* are outstanding in (i) Chorley and (ii) Lancashire. [151288]

Nigel Griffiths: The figures are as follows:

Chorley

Year claim registered	*Claim receipts*	*Total settlements including denied/withdrawn (as of 26 January 2004)*	*Number outstanding*
1997[1]	—	—	—
1998[1]	72	46	26
1999	47	32	15
2000	21	12	9
2001	26	10	16
2002[2]	33	3	30
2003[2]	309	5	304
2004	47	—	47
Total	555	108	447

Lancashire

Year claim registered	*Claim receipts*	*Total settlements including denied/withdrawn (as of 26 January 2004)*	*Number outstanding*
1997[1]	14	7	7
1998[1]	1,964	1,308	656
1999[1]	960	581	379
2000	684	381	303
2001	959	400	559
2002[2]	1,293	336	957
2003[2]	7,627	145	7,482
2004	815	4	811
Total	14,316	3,162	11,154

[1] The Department was not able to process claims until after the signing of the Claims Handling Agreement, agreed with the claimants' solicitor on 24 September 1999.

[2] Estate claims put on hold as a lower priority, in agreement with the claimants' solicitors.

Notes:

1. Lancashire consists of the following constituencies: Blackburn; Bolton, North-East; Bolton, South-East; Bolton, West; Burnley; Bury, North; Bury, South; Rossendale and Darwen; Blackpool, North and Fleetwood; Blackpool, South; Hyndburn, Lancaster and Wyre; Morecambe and Lunesdale; Leigh; Makerfield; Worsley; Pendle; Preston; and Ribble Valley.

2. Constituency figures can be found on the DTI website: www.dti.gov.uk/coalhealth. The information is compiled in the middle of the month and shows the figures for the end of the previous month.

3. Claims are dealt with on a priority basis, those from the eldest and sickest living miners and their widows being dealt with first. Claims that are outstanding may be a lower priority or they may have an outstanding policy issue that is preventing settlement of the claim.

National Business Angel Network

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what assessment she has made of the effectiveness of the National Business Angel Network in matching entrepreneurs with private investors. [151433]

Nigel Griffiths *[holding answer 27 January 2004]:* An external evaluation of the National Business Angels Network took place early in 2003 that examined all aspects of its operation, including its matchmaking activities. It was on the basis of the evaluation's findings that the Department decided not to continue funding this element of the National Business Angels Network's operations.

Overseas Investment

Mr. Arbuthnot: To ask the Secretary of State for Trade and Industry (1) what investment has been made in *(a)* China, *(b)* India, *(c)* Japan and *(d)* South Korea by United Kingdom small and medium-sized enterprises in each year since 2000; [151242]

(2) what investment has been made in *(a)* Pakistan, *(b)* Sri Lanka, *(c)* Brunei and *(d)* Cambodia by United Kingdom small and medium-sized enterprises in each year since 2000; [151243]

(3) what investment has been made in *(a)* Indonesia, *(b)* Laos, *(c)* Macao and *(d)* Malaysia by United Kingdom small and medium-sized enterprises in each year since 2000; [151244]

(4) what investment has been made in *(a)* Philippines, *(b)* Singapore, *(c)* Taiwan, *(d)* Thailand and *(e)* Vietnam by United Kingdom small and medium-sized enterprises in each year since 2000. [151245]

Mr. Mike O'Brien *[holding answers 27 January 2004]:* This information is not collected by HMG and there would be a disproportionate cost to obtaining the information.

Pneumoconiosis Benefit

Adam Price: To ask the Secretary of State for Trade and Industry how many applications for benefit under the Coalworkers Pneumoconiosis Scheme have been received in each of the last six years from claimants from *(a)* England, *(b)* Scotland and *(c)* Wales. [151495]

Nigel Griffiths: The information is as follows:

	Number of claims received (UK)
1998	746
1999	809
2000	550
2001	646
2002	1,014
2003	1,767

A geographical breakdown of claims is not kept.

Power Supply (Wales)

Mr. Wiggin: To ask the Secretary of State for Trade and Industry if she will make a statement on the security of the power supply in Wales. [151771]

Mr. Timms: The Government attach great importance to maintaining reliable energy supplies—it is one of the four key goals of energy policy identified in our Energy White Paper, published last year.

As the transmission licensee in England and Wales, National Grid Transco (NGT) is under an obligation to operate and maintain an efficient, economic and coordinated electricity system.

In its Winter Outlook, NGT assessed the risks to gas and electricity security of supply for England and Wales during the winter of 2003–04. The report predicted a generating plant margin of just over 16 per cent. for the winter and stated that,

"Under most scenarios network security can be maintained without any interruption of firm gas supplies or electricity demand."

Since the report, more generating plant has been returned from mothballs, and the projected plant margin for England and Wales has increased to just over 20 per cent., a similar level to last year.

To monitor developments in the electricity market in the medium to long term, the Department of Trade and Industry is working, with Ofgem, through the Joint Energy Security of Supply working group (JESS). The latest JESS report was published on 12 November and copies have been placed in the Libraries of the House.

Quality Mark Scheme

Phil Sawford: To ask the Secretary of State for Trade and Industry how many businesses in the construction industry have joined the Quality Mark scheme; and what action she is taking to promote the scheme. [151127]

Nigel Griffiths: To date 512 firms have joined the Quality Mark Scheme. 702 firms are going through the formal application process. DTI is also working with representative trade bodies and local authority schemes to align membership requirements with Quality Mark. The most recent in a series of launches to the trade was in the north-west in October/November 2003.

Discussions are being held with industry representatives about the best way to promote the benefits of Quality Mark.

Regulatory Impact Assessments

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how many *(a)* partial and *(b)* full regulatory impact assessments have been undertaken in relation to EU legislation for each year since 1998; and if she will make a statement. [151364]

Nigel Griffiths: Regulatory Impact Assessments (RIAs) are produced for all policy proposals that have a cost to or benefit for business irrespective of the origins of the policy. Copies of full RIAs are placed in the Libraries of the House. Records of the origin of each policy proposal are not held centrally.

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry if she will make a statement on the quantification of the costs and benefits of regulations on *(a)* consumers, *(b)* small and medium-sized businesses and *(c)* the Government in the course of regulatory impact assessments. [151365]

Nigel Griffiths: The costs and benefits of a policy proposal are collated in consultation with stakeholders and recorded in the Regulatory Impact Assessment (RIA). All RIAs are required to include a small firms impact test to ensure that policy proposals do not have a disproportionate effect on small businesses. The assessments also include a competition assessment to ensure that any policy proposals do not have negative effects on competition. Costs to Government, including enforcement costs, are included in the RIA.

Copies of full RIAs are placed in the Libraries of the House.

Small and Medium-sized Companies

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what steps her Department is taking to promote the use of the internet among small and medium-sized companies. [152044]

Mr. Timms: Since 2000, DTI has sought to promote the use of the internet among SMEs through the UK online for business programme. As a result of a decision to restructure business support within DTI, the activities of UK online for business will be integrated into the wider activities of the Department and the Business Link organisation. The decision to restructure has been a direct response to feedback from stakeholders and the aim will be to rationalise the wide range of schemes run by the Department into a small number of coherent and focused products.

The strategy for DTI will be to underline the business benefits that can be achieved through effective use of the internet and other information and communication technologies. Businesses need to become more sophisticated users of the technologies and address issues relating to people and processes as well as the technology itself. DTI will continue to put forward examples of best practice of ICT usage, through websites, publications and events, working closely with industry partners.

Mr. Hancock: To ask the Secretary of State for Trade and Industry what action she is taking *(a)* to improve access to investment capital and *(b)* to provide other support to small businesses; and if she will make a statement. [150215]

Nigel Griffiths: Since coming to office, the Government have taken a number of steps to improve SMEs' ability to access investment capital. These include the development of Regional Venture Capital Funds, the UK High Technology Fund, Early Growth Funds, The Community Development Venture Fund (known as the Bridges Fund), Community Investment Tax Relief and Investment Readiness demonstration projects. We are currently also developing Enterprise Capital Funds following the 'Bridging the Finance Gap' consultation announced in Budget 2003.

In addition, the changes proposed by the Chancellor in his pre-Budget report to enhance the already effective Venture Capital Trust and Enterprise Investment Scheme tax incentives will further improve the availability of investment capital.

The Government have provided, and continue to provide, a system for practical help and advice to small businesses via Business Link, providing easy access to objective information and support across a wide range of initiatives and financial packages. Business Link provides help and advice for those wishing to start a small business or who are already in a small business. Full details are available on the website (www.businesslink.gov.uk)

Recently, the Government have taken action to support small business via a wide range of initiatives, as outlined in "The Government Action Plan for Small Business" published on 8 January 2004 and available on the Small Business Service website (www.sbs.gov.uk). It provides a comprehensive account of the significant Government help being made available to small businesses.

Small Business Service

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how much the Small Business Service has cost in each year since it was established and how many people it employed in each year. [152047]

Nigel Griffiths: The administration cost of the Small Business Service for each year since it was established, is shown in the following table with the people employed each year. These figures are in the Small Business Service published accounts available in the Libraries of the House.

	£000	People (average full time equivalent)	Comment
2000–01	10,195	203	Excluding agency staff and secondments
2001–02	13,420	284	Excluding agency staff and secondments
2001–02	13,420	326	Revised to include agency staff and secondments
2002–03	18,012	440	Includes agency staff and secondments

Notes:

1. We have interpreted the question as being about how much the small business service costs to run (£18 million in 2002–03), rather than the cost of the programmes it delivers (outturn £354 million in 2002–03).

2. The total cost of running the SBS reported in the accounts includes not only the administration budget from DTI (outturn £11.5 million in 2002–03) which covers staff in London and Sheffield, and Directors for the regions, but also the cost of the regional teams, SBS's share of DTI central services and accommodation costs.

3. The leap in administration costs from 2001–02 (£13 million) to 2002–03 (£18 million) is due to the transfer of 94 staff (full-time equivalents) from Government Offices to SBS regional teams, and to a rise in accommodation costs.

Smart Award

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what plans she has *(a)* to increase the upper limit of Smart award grants and *(b)* to simplify the Smart application process. [152058]

Nigel Griffiths: The information is as follows.

(a) Following the DTI's review of business support, the Smart scheme has been replaced with a new product from 1 June 2003, Grant for Research and Development, which provides a higher maximum grant for each element than did Smart. The maxima are now £20,000 for a micro project, £75,000 for a research project, £200,000 for a development project and £500,000 for an exceptional development project.

(b) In December 2002 the Smart application form and guidance notes for applicants were simplified so that the number of questions on the form was reduced from 35 to nine. Those modifications have been carried over into the Grant for Research and Development application form. The application procedure is the minimum necessary to protect public funds but is kept under review.

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what proportion of Smart award-winners have reported increased profitability as a result of their award. [152059]

Nigel Griffiths: The report of the most recent, independent evaluation of the Smart scheme was published in September 2001. Of those award recipients surveyed 51 per cent. indicated that their business had become more profitable as a result of the Smart support received.

Space Research

Mr. Tynan: To ask the Secretary of State for Trade and Industry whether debt accrued by the Beagle 2 programme will be met from existing departmental budget allocations for space programmes and research. [148976]

Ms Hewitt: The Beagle 2 Mars lander was funded by a combination of public and private sector contributions. All funding provided by my Department, directly or by the Particle Physics and Astronomy Council, has been paid as grants. In certain circumstances, some elements of those grants were repayable. Those circumstances have not arisen to date. The Department has no outstanding commitments to the project.

UK Online for Business

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how much was spent on the agency UK online for business in each year since its inception. [152050]

Mr. Timms: The following was spent on the DTI programme, UK online for business:

	£ million
2000–01	[1]13.9
2001–02	15.1
2002–03	13.1
2003–04	[2]7

[1] UK online for business was established in September 2000 as a successor programme to the Information Society Initiative. Expenditure in 2000–01 includes the period April-August 2000, when the ISI was still in force.

[2] The figure for 2003–04 includes spend year to date plus forecast spend for remainder of the year.

CHURCH COMMISSIONERS

Clerical Terms of Service

25. **Laura Moffatt:** To ask the hon. Member for Middlesbrough, representing the Church Commissioners, if he will make a statement on the effect of the recent announcements on rights for members of the clergy; and whether the Church Commissioners will have a role in monitoring progress. [151917]

Sir Stuart Bell: I refer to the answer I gave my hon. Friend the Member for Wirral, South (Mr. Chapman) earlier. While the Review in question is being conducted under the auspices of the Archbishops' Council, hon. Members will know that I take a keen interest in this subject and the Church Commissioners will certainly be consulted by the Council as the matter is taken forward.

Church Repairs (VAT)

27. **Miss McIntosh:** To ask the hon. Member for Middlesbrough, representing the Church Commissioners, what recent representations he has received on reducing VAT on church repairs. [151919]

Sir Stuart Bell: The hon. Lady will be aware that the broader EU VAT review has currently reached an impasse following the rejection by the Council of Ministers of the proposals brought forward by the Commission last summer. The EU Presidency has now changed and the matter has yet to be formally brought forward for further discussion. The impending elections to the EU Parliament and the likely changes resulting from the appointment of the new Commission later this year may further delay resolution or even consideration of the EU VAT review.

Meanwhile, the Church VAT Group was delighted that the Listed Places of Worship Grant Scheme has been extended to March 2006. The Group remains in touch with officials at HM Treasury and we know that the Government are committed to achieving the aim of a VAT reduction in this area.

Financial Review

Mr. Key: To ask the hon. Member for Middlesbrough, representing the Church Commissioners, whether the recommendations of the Church Commissioners' strategic financial review will be developed into spending plans for 2005 to 2007. [151798]

Sir Stuart Bell: The recommendations of the financial review group will be debated by the Church of England's General Synod on 11 February. Spending plans for 2005–07 will be developed by the Archbishops' Council and the Church Commissioners in the light of that debate and consultation with other interested parties, and shared with Synod later in 2004.

EDUCATION AND SKILLS

"Minted"

Mr. Willis: To ask the Secretary of State for Education and Skills what definition of the term minted is used by his Department in *(a)* internal and external documents and *(b)* external advertising. [150610]

Mr. Stephen Twigg: The word 'minted' is a slang word. The meaning is imprecise but suggests 'having money'.

This word has been in a recent radio advert which aims to raise awareness about student support available to those considering higher education. It has not been used in any internal or external documents.

Child Deaths

Tim Loughton: To ask the Secretary of State for Education and Skills how many *(a)* cot deaths and *(b)* sudden infant death syndrome deaths were recorded in (i) 2003, (ii) 2002, (iii) 2001, (iv) 2000, (v) 1999, (vi) 1998 and (vii) 1997. [152031]

Ruth Kelly: I have been asked to reply.

The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Mr. Len Cook to Mr. Tim Loughton, dated 2 February 2004:

As National Statistician, I have been asked to reply to your recent question on how many a) cot deaths, and b) 'sudden infant death syndrome' deaths were recorded in (i) 2003, (ii) 2002, (iii) 2001, (iv) 2000, (v) 1999, (vi) 1998 and (vii) 1997. (152031)

In England and Wales the terms 'cot death' and 'Sudden Infant Death Syndrome' are used synonymously in classifying cause of death in babies. In producing figures ONS uses a broad definition of "sudden infant death". This includes any mention of "sudden infant death", "cot death", "crib death", "Sudden Infant Death Syndrome" or some similar term on the death certificate.

The latest available figures are for 2002. Figures since 1997 are given below.

Sudden infant[1] deaths, England and Wales, 1997–2002

	Numbers	Rates[2]
1997	393	0.61
1998	289	0.45
1999	280	0.45
2000	246	0.41
2001	240	0.40
2002[3]	187	0.31

[1] Babies less than one year old.
[2] Rate per 1,000 live births.
[3] Provisional.

Further information is available in two Health Statistics Quarterly articles: 'HSQ 10—Are unascertained deaths the same as sudden infant deaths?' and 'HSQ 19—Sudden infant deaths, 2002', which are available on the national statistics website at: http://www.statistics.gov.uk/statbase/Product.asp?vlnk=6725.

Children in Care

Mr. George Osborne: To ask the Secretary of State for Education and Skills how many children aged *(a)* three to six months and *(b)* six months to one year entered local authority care in the last 12 months for which figures are available. [147911]

Mr. Ivan Lewis: The information requested is given for children who started to be looked after during the year ending 31 March 2002, and for children looked after at 31 March 2002, and is presented in the table.

Children looked after in England aged under 1, year ending 31 March 2002

Age	Number of children who started to be looked after during the year ending 31 March 2002 (by age on starting)[1]	Number of children looked after at 31 March 2002 (by age on that date)
All aged under 1 year	3,900	2,300
0–3 months	2,600	390
3–6 months	510	600
6 months–1 year	800	1,340

[1] Only the first occasion on which a child started to be looked after in the year has been counted.

Mr. Grieve: To ask the Secretary of State for Education and Skills (1) what discussions the Minister for Children has held with the Lord Chancellor on ensuring the provision of Legal Aid to those who may wish to challenge past decisions to take children into care on the basis of previous cases of sudden infant death in their families; [150086]

(2) what steps he is taking to review cases where children have been taken into care on the basis of previous cases of sudden infant death in their families. [150087]

Mr. Charles Clarke: The Appeal Court announced its judgment in the case of R *v.* Angela Cannings on 19 January 2004. I am now studying the judgment carefully, in the light of the Attorney-General's statement on 20 January.

Responsibility for the provision of publicly funded legal services is a matter for the Lord Chancellor.

Civil Servants

Dr. Cable: To ask the Secretary of State for Education and Skills how much space, expressed in square metres, the Department occupies for the offices of civil servants in *(a)* central London and *(b)* greater London. [150280]

Mr. Stephen Twigg: My Department occupies in total 33,985 square metres of office space in central London, at Caxton House SW1 and Sanctuary Buildings SW1. We have no other offices in central London.

Criminal Records Bureau

Bob Russell: To ask the Secretary of State for Education and Skills what representations he has received on extending the checking procedures of the Criminal Records Bureau to people engaged in observer roles in classrooms and other school activities. [151765]

Mr. Stephen Twigg: My Department has received no representations on this matter.

Employer Training Pilots

Mr. Hoyle: To ask the Secretary of State for Education and Skills if he will list for Lancashire the firms and companies taking part in employer training pilots; and how much public funding they have been given. [151276]

Mr. Ivan Lewis: Pilots are currently running in 12 LSC areas: Birmingham and Solihull, Derbyshire, Essex, Greater Manchester, Tyne and Wear, Wiltshire and Swindon, Berkshire, East London, Kent, Leicester, Shropshire, and South Yorkshire.

Therefore there is not currently a pilot running in Lancashire. In the pre-Budget report statement, the Chancellor announced the extension of the Employer Training Pilots for a third year. Officials are currently working to develop guidelines for selecting pilots to be launched in September.

Education Maintenance Allowances (Liverpool)

Mrs. Eliman: To ask the Secretary of State for Education and Skills what assessment he has made of the effectiveness of education maintenance allowances in improving staying-on rates in Liverpool. [150152]

Mr. Ivan Lewis *[holding answer 26 January 2004]:* The independent evaluation of EMA began in September 1999 and assesses the impact of EMA among EMA-eligible young people in 10 of the first 15 pilot areas compared to 11 control areas. This evaluation estimated the impact nationally will be around 4.1 percentage points among the full cohort of young people.

Liverpool LEA began piloting EMA in September 2000 and is not formally part of the statistical evaluation. Therefore we do not have statistically reliable information on the exact impact of EMA in Liverpool. We do, however, collect information to assess participation by 16 and 17 year olds by LEA area. This data, which is available on the DfES website and includes information on the numbers of young people accepted for EMA, is replicated in the following table. Although we cannot say that EMA is the only factor causing the increase in participation, it must be a significant contributor to this effect.

	Liverpool				
Age	*1998*	*1999*	*2000*	*2001*	*2002*
Participation in education (percentage of age group)					
16	63	64	66	—	—
17	48	48	48	—	—
Combined	55	56	57	—	—

	Number of students in further education colleges by LEA of student residency
1997–98	29,394
1998–99	31,075
1999–2000	30,161
2000–01	31,668
2001–02	35,059

	Young people accepted for education maintenance allowance (EMA)
2000–01	3,300
2001–02	3,900

Further and Higher Education

Chris Grayling: To ask the Secretary of State for Education and Skills what plans he has to ask the Higher Education Funding Council for England to increase directly funded higher education provision in further education colleges; and if he will make a statement. [151498]

Alan Johnson: I have no plans to ask the Higher Education Funding Council for England to increase directly funded higher education provision in further education colleges. As we said in the White Paper, "The Future of Higher Education", it is important that higher education provision in further education colleges is of the high quality we expect from higher education. We believe that structured partnerships between colleges and universities—franchise or consortium arrangements with colleges funded through partner higher education institutions—will be the primary vehicle to meet these aims and deliver the best benefits for learners.

There are some instances of niche provision where direct funding of higher education in further education colleges is more appropriate and this will continue to be considered on a case-by-case basis.

Chris Grayling: To ask the Secretary of State for Education and Skills whether the Common Inspection Framework will take account of higher education provision in further education colleges; and if he will make a statement. [151500]

Alan Johnson: The Common Inspection Framework does not cover higher education provision in further education colleges and there are no plans for it to do so. The quality of higher education provided through further education colleges is subject to review by the Quality Assurance Agency (QAA) acting on behalf of the Higher Education Funding Council for England, which has a statutory responsibility to assure the quality of provision it funds. The QAA assesses quality at subject level in further education colleges under the 'Academic Review' element of its quality assurance regime.

Chris Grayling: To ask the Secretary of State for Education and Skills what discussions he has had with the *(a)* Quality Assurance Agency and *(b)* Higher Education Funding Council for England regarding successor arrangements to Academic Review for directly funded higher education which is provided by further education colleges. [151501]

Alan Johnson: None at present. I am aware that HEFCE and QAA are currently considering the successor arrangements after the current round has been completed, and are committed to introducing a revised system.

Chris Grayling: To ask the Secretary of State for Education and Skills what new research he is planning to ascertain the scale and scope of higher education delivered by further education colleges; and if he will make a statement. [151502]

Alan Johnson: The Department does not currently have any plans for further research into the scale and scope of higher education delivered by further education providers. The Department, HEFCE and the LSC already have information relating to the amount and type of higher education delivered in further education colleges.

The Government want to expand higher education, including through work-focused Foundation Degrees. Our expectation is that many new Foundation Degrees will be delivered by colleges working with higher education institutions. HEFCE recently invited further education colleges and higher education institutions to bid for additional student numbers and they will be announcing the outcome this spring.

Chris Grayling: To ask the Secretary of State for Education and Skills what plans he has to establish teacher training qualifications for higher education teaching in further education colleges; and if he will make a statement. [151503]

Alan Johnson: The White Paper, "The Future of Higher Education", published in January 2003, set out our expectation that professional teaching standards and mandatory qualifications for new higher education (HE) teachers should be established. These are due to be introduced by 2006 and will be applicable to those teaching HE in further education colleges. They will complement the regulations already in place for FE teachers.

Higher National Diplomas/Foundation Degrees

Chris Grayling: To ask the Secretary of State for Education and Skills what plans he has for the retention of Higher National Diplomas; and if he will make a statement. [151499]

Alan Johnson: It is our expectation that in due course the Foundation Degree will replace the Higher National Diploma. Higher National Diplomas have served employers well in the past and while employer loyalty exists in some sectors, the numbers applying for these courses are in decline.

Edexcel, who award the BTEC Higher National Diploma, have announced plans to make BTEC Foundation Degrees available. Colleges and universities currently offering HNDs will make decisions about whether they retain their HND provision, develop their own Foundation Degrees, or move to new BTEC Foundation Degrees. In doing so, they will take account of student and employer demand.

Lottery Revenue

Mr. Willis: To ask the Secretary of State for Education and Skills what the total value is of lottery revenue used to support Government-sponsored projects within his Department since 1997. [149626]

Mr. Stephen Twigg *[holding answer 26 January 2004]:* My Department has no policy or operational responsibility for distribution of National Lottery proceeds. I refer the hon. Member to the answer given to him on 26 January 2004 by my right hon. Friend the Minister for the Arts.

Management Consultants

Mr. Flight: To ask the Secretary of State for Education and Skills what the cost to his Department of using management consultants has been in each of the last five years. [148019]

Mr. Stephen Twigg: The following table shows the expenditure in the last five financial years on management consultancy in the Department for Education and Skills and its predecessor, the Department for Education and Employment, (including the Sure Start Unit and the then Children and Young People's Unit).

Expenditure on management consultancy

	£ million
1998–99	5.0
1999–2000	3.7
2000–01	4.3
2001–02	5.0
2002–03	4.0

These figures are for consultancy falling within the Department's administrative cost limit and exclude programme consultancy costs, which are currently not collected centrally and could be provided only at disproportionate cost.

Modern Apprenticeships

Rob Marris: To ask the Secretary of State for Education and Skills how much his Department has spent on Modern Apprenticeships in each year since their inception. [150004]

Mr. Ivan Lewis: Modern Apprenticeships (MA), in England are funded through the work based learning for young people budget of the Learning and Skills Council. This budget covers Advanced MAs, Foundation MAs, NVQ Learning and Entry to Employment. The LSC estimate that of the £673 million budget for Work Based Learning £467 million was spent on MAs in 2001–02. In 2002–03 the LSC's budget for WBL was £828 million of which it is estimated that £539 million was spent on MAs. The LSC's budget for WBL for 2003–04 is £791 million. Before April 2001 MAs were funded by the Training and Enterprise Councils (TEC). Disaggregated data showing the amount of funding spent on MAs from their work based learning for young people budget in this period is not available.

NVQs

Simon Hughes: To ask the Secretary of State for Education and Skills what estimate he has made of the percentage of the population of London who have National Vocational Qualifications at level *(a)* 1, *(b)* 2 and *(c)* 3. [151071]

Mr. Ivan Lewis: The percentages of the working age[1] population in London who have National Vocational Qualifications (NVQs) at level 1, 2 or 3 are presented in table 1 as follows:

[1] Working age is defined as males aged 16–64 and females aged 16–59.

Table 1: Highest level of NVQ held by people of working age, London and England, autumn 2003

	England		London	
Level	*Thousand*	*Percentage*	*Thousand*	*Percentage*
Level 1	438	1.4	53	1.1
Level 2	1,274	4.1	117	2.4
Level 3	973	3.1	67	1.3
Level 4	181	0.6	18	0.4
Level 5	45	0.1	[1]—	[1]—
Level unknown	389	1.2	36	0.7
Total	3,301	10.5	294	5.9
Working age population	31,296		4,971	

[1] Sample size too small for reliable estimate.

Labour Force Survey, Autumn 2003.

School Absenteeism

Mr. Hoban: To ask the Secretary of State for Education and Skills how many children in England and Wales missed at least one half day session of school in *(a)* 1997–98 and *(b)* 2002–03 in each local education authority. [150148]

Mr. Ivan Lewis *[holding answer 26 January 2004]*: The information requested is shown in the following table for local education authorities in England.

The average number of sessions missed per absent pupil due to authorised and unauthorised absence has also been provided together with the attendance rate in percentage terms.

Absence information for schools in Wales can be obtained from the National Assembly for Wales.

Notes:
1. Figures relate to maintained primary and secondary schools but exclude maintained special schools and CTCs.
2. Figures cover pupils that were absent between September 1997 and May 1998, and September 2002 and May 2003.

School Buses

Mrs. Brooke: To ask the Secretary of State for Education and Skills how many serious accidents have occurred on school bus journeys in England in the last five years as a consequence of the behaviour of pupils travelling unsupervised on the bus. [151864]

Mr. Stephen Twigg *[holding answer 29 January 2004]:* Road accident statistics are a matter for the Department for Transport. Their road accident statistics do not record whether bus accidents affecting children occur on school buses or public service buses, or record the causes of accidents.

School Meals and Trips

Mr. Hurst: To ask the Secretary of State for Education and Skills how many pupils in Essex were provided by the county council with school meals in each year from 1990 to 2003. [150909]

Mr. Stephen Twigg: The information requested is not available centrally.

The Department collects information on free school meals as part of the annual schools' Census, but not the total number of all (that is, free and paid for) school meals.

Mr. Pike: To ask the Secretary of State for Education and Skills what discussions he has had on introducing charitable status for the provision of *(a)* school meals and *(b)* school trips. [151275]

Mr. Stephen Twigg: My Department has not had any discussions about introducing charitable status for the provision of school meals or school trips.

Training and Enterprise Council

Paul Holmes: To ask the Secretary of State for Education and Skills if he will place the audited statutory accounts for Training and Enterprise Council in England for financial year ending 25 March 2001 in the Library; and if he will make a statement. [151858]

Mr. Ivan Lewis: I have made arrangements for copies of the audited statutory accounts for the 72 TECs in England to be placed in the Library.

Undergraduates (Bankruptcy)

Mr. Willis: To ask the Secretary of State for Education and Skills how many undergraduate students in England have declared themselves bankrupt in each year since 1992; and if he will make a statement. [151713]

Alan Johnson *[holding answer 29 January 2004]:* The following table shows the number of student loan borrowers, both graduates and undergraduates, who have had bankruptcy orders made against them since 1992. There are no figures showing undergraduates as a separate group.

Bankrupt year[1]	Number of borrowers[2,3,4,5]
1992	8
1993	13
1994	22
1995	40
1996	49
1997	77
1998	97
1999	142
2000	153
2001	249
2002	276
2003	[6]899
Total	2,025

[1] Calendar year in which the borrower became bankrupt.
[2] Data show the number of student loan borrowers.
[3] Includes borrowers who may or may not have graduated from their course.
[4] Includes all types of students (including PGCE—Postgraduate Certificate of Education students).
[5] Data cover both types of student loan—Mortgage Style (including loans sold to the private sector) and Income Contingent.
[6] The increase in the numbers of bankruptcies in 2003 seems to be as a result of greater public awareness that students loans are provable in bankruptcy.

Student Loans Company.

University of Lincolnshire and Humberside

Mr. McNamara: To ask the Secretary of State for Education and Skills what *(a)* reports he has received and *(b)* action he has taken in response to the termination of the University of Humberside enrolment programme in July 1999. [152194]

Alan Johnson: I assume my hon. Friend is referring to the actions taken in July 1999 by the University of Lincolnshire and Humberside to terminate its recruitment to franchised courses in Israel. I have

received no report or taken any action. However, I understand that the University (now entitled the University of Lincoln) has been cooperating with the relevant authorities in Israel and is keeping the Higher Education Funding Council for England informed of any developments.

Mr. McNamara: To ask the Secretary of State for Education and Skills how many branches of the University of Humberside have been established since its franchise operation was first introduced; and in which countries. [152197]

Alan Johnson: The Department does not maintain lists of the overseas franchise arrangements of UK universities. However, I am aware that that the University of Lincolnshire and Humberside (now renamed University of Lincoln) ceased recruitment to all of its overseas franchise operations in 2000.

University Overseas Franchises

Mr. McNamara: To ask the Secretary of State for Education and Skills which universities have established overseas franchise operations; and which overseas universities, colleges and other bodies have agreed to facilitate these partnerships. [152198]

Alan Johnson: The Department does not maintain lists of the overseas franchise arrangements of UK universities. However, the Quality Assurance Agency (QAA) carries out audits which cover the arrangements by which an awarding institution secures the standards of its awards and the effectiveness of its quality management arrangements for partnership links both within and outside the UK. Since 1996 it has audited 109 overseas collaborative links involving 64 HEIs in 24 countries.

Working Skills

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills what steps he is taking to reduce the number of people in the working age population in the West Midlands with no qualifications. [149831]

Mr. Ivan Lewis *[holding answer 26 January 2004]:* We are committed to raising the skill levels of adults in the workforce, and in particular, supporting adults with no, or low qualifications to gain qualifications that give them the foundation skills for employability.

The Skills Strategy White Paper, "21st Century Skills Realising Our Potential", published in July last year, set out a number of key measures to address this issue. And we have already put in place support for adults with basic skill needs through our Skills for Life Strategy.

The White Paper announced the introduction of a new entitlement to free learning for all those studying for their first full level 2 qualification as foundation for employability. We have begun to pilot the introduction of a new adult learning grant of up to £30 a week for full time learners studying for their first NVQ Level 2 qualification or equivalent.

We have also put in place a strategy to ensure that low-skilled adults receive high quality information, advice and guidance to help them choose the right course for them.

We are running 12 Employer Training Pilots, of which two are in the West Midlands, to encourage employers to invest in skills and qualifications, particularly for low skilled trainees. They are testing out a package of financial support measures to improve access to training and enable employees to develop basic skills and NVQ level 2 qualifications.

In the West Midlands, six professional development centres have been established as a result of partnerships between the local LSCs and the Universities of Wolverhampton, Warwick, Worcestershire and Staffordshire. These are aimed at providing support and opportunities for all those working across the spectrum of Skills for Life delivery—teachers, voluntary sector workers and those working in Adult and Community Learning.

We are working nationally to engage employers in activity to address the basic skills needs of their employees. This includes raising demand in the workplace and ensuring that appropriate advice and guidance is available to employers to help them establish the learning programmes they require for their employees. In the West Midlands, we have established a group of employer champions who will push the message that basic skills are important to other employers.

Advantage West Midlands has responded to our invitation to RDAs and their regional partners to draw up proposals for Regional Skills Partnerships. The Partnerships aim to ensure that the work of different agencies involved in delivering the aims of the Skills Strategy—the Learning and Skills Councils, Jobcentre Plus, the Skills for Business network, the Small Business Service and others—are better co-ordinated and delivered in a way that connects with the needs of employers at individual and regional, local and sectoral levels. We will be talking to Advantage West Midlands about their proposal and their plans to set up the Partnership in the West Midlands in April 2004.

ELECTORAL COMMISSION COMMITTEE

Voting Age

20. **Bob Spink:** To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission, how the outcome of the review on lowering the age of voting will be communicated to the House. [151912]

Mr. Viggers: On the day of publication of its report on the age of voting and of candidacy, the Electoral Commission will send a copy to each Member of Parliament and will place copies in the Library.

Local Government Finance

26. **Mr. Bill O'Brien:** To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission, what assessment is made of the effect on grant allocations and inward investment consequent on levels of deprivation in local authority wards when boundary reviews are being carried out; and if he will make a statement. [151918]

Mr. Viggers: None. While a number of agencies use local authority ward boundaries as a convenient basis for the allocation of grant aid and regeneration funding, such considerations do not fall within the scope of the matters which are taken into account in carrying out boundary reviews.

FOREIGN AND COMMONWEALTH AFFAIRS

Burundi

Mr. Love: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps he is taking to ensure that the Government of Burundi does not offer an amnesty for crimes against humanity committed against British and other nationals during the civil war; and if he will make a statement. [151767]

Mr. Mullin: The violation of human rights and international humanitarian law in Burundi continues to be of serious concern. While we cannot dictate the terms of any eventual ceasefire between the parties to the conflict in Burundi, we are working closely with the international community on the issue of post-conflict justice in Burundi and how best to bring an end to impunity.

In this respect, we support the proposal of the United Nations to send an assessment mission to Burundi, which is to consider the advisability and feasibility of establishing an international commission of judicial inquiry for Burundi.

In respect of crimes committed against British nationals, we continue to raise individual cases with the Burundi authorities.

Correspondence

Mr. Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs when he will reply to the letter to him dated 17 December 2003 from the right hon. Member for Manchester, Gorton with regard to Mrs. Ahmed. [151226]

Mr. Mullin: My right hon. Friend the Foreign Secretary replied on 20 January.

Mr. Kaufman: To ask the Secretary of State for Foreign and Commonwealth Affairs when he will reply to the letter to him dated 15 December 2003 from the right hon. Member for Manchester, Gorton with regard to S. Rahman. [151228]

Mr. Mullin: My right hon. Friend the Foreign Secretary replied on 12 January.

Council of Europe

Sir Teddy Taylor: To ask the Secretary of State for Foreign and Commonwealth Affairs what contribution was made by the United Kingdom to the Council of Europe in 2003–04. [151795]

Mr. MacShane: In 2003, the UK's contributions to the Council of Europe totalled €27,023,466. This breaks down into 10 strands:

Contributions made by the United Kingdom to the Council of Europe in 2003

Budget	*Government Department*	€ *Amount*
Ordinary budget	Foreign and Commonwealth Office	21,918,076
Pensions	Foreign and Commonwealth Office	2,197,145
Extraordinary budget (buildings)	Foreign and Commonwealth Office	501,787
European Youth Foundation	Foreign and Commonwealth Office	311,238
Venice Commission	Foreign and Commonwealth Office	405,318
Partial Agreement in the Social and Public Health Field	Department of Health	287,889
European Pharmacopoeia	Department of Health	691,424
Co-operation Group to Combat Drug Abuse and Illicit Trafficking in Drugs (Pompidou Group)	Home Office	241,215
Enlarged Partial Agreement on the Group of States against Corruption	Home Office	235,775
Graz Centre	Department for Education and Skills	233,600

In 2004 the UK's contributions to the Council of Europe will total €28,356,459. This breaks down into 10 strands:

Contributions to be made by the United Kingdom to the Council of Europe in 2004

Budget	*Government Department*	€ *Amount*
Ordinary budget	Foreign and Commonwealth Office	22,376,585
Pensions	Foreign and Commonwealth Office	3,060,401
Extraordinary budget (buildings)	Foreign and Commonwealth Office	497,665
European Youth Foundation	Foreign and Commonwealth Office	337,136
Venice Commission	Foreign and Commonwealth Office	375,414
Partial Agreement in the Social and Public Health Field	Department of Health	259,132
European Pharmacopoeia	Department of Health	681,760
Co-operation Group to Combat Drug Abuse and Illicit Trafficking in Drugs (Pompidou Group)	Home Office	249,773
Enlarged Partial Agreement on the Group of States against Corruption	Home Office	287,213
Graz Centre	Department for Education and Skills	231,381

Benefit Fraud

Mr. Webb: To ask the Secretary of State for Foreign and Commonwealth Affairs how many staff in his Department have been *(a)* investigated, *(b)* suspended, *(c)* dismissed, *(d)* prosecuted and *(e)* convicted for involvement in benefit fraud in each of the last six years; and what the amounts involved were in each of the categories listed. [151460]

Mr. Mike O'Brien: As far as the Department is aware no staff in the Foreign and Commonwealth Office have been investigated, suspended or dismissed for benefit fraud in the last six years. Under Diplomatic and Home Service Regulations, all staff are obliged to tell the Department if they are charged with any criminal offence. According to departmental records, none have been prosecuted or convicted for benefit fraud in the last six years.

Mr. Craig Alden

Mr. Fallon: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the detention of Mr. Craig Alden in Brazil. [151724]

Mr. Mullin: Staff at our Embassy in Brasilia closely monitor developments in Mr. Alden's case and provide him with all the consular assistance they properly can. We have raised our interest in his case with the Brazilian authorities on a number of occasions, including when my right hon. Friend the Foreign Secretary met the Brazilian Foreign Minister in July 2003. Consular staff at our Embassy also raise any welfare aspects of the case with the local authorities, most recently with the new Federal Director of Prisons in November 2003.

Under international law we cannot interfere in the judicial processes of another country. Mr Alden's lawyers continue to pursue his case through legal channels and keep our consular staff updated of developments. We understand his lawyers have decided to submit a second habeas corpus application. As the legal case proceeds we will continue to offer the appropriate consular assistance to Craig and his family.

Democratic People's Republic of Korea

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government have taken to promote use of the World Service in the Democratic People's Republic of Korea. [151884]

Mr. Rammell: The Government of the Democratic People's Republic of Korea (DPRK) jams radio broadcasts from outside the country. Short wave would be the main frequency for BBC World Service, but short wave radios are illegal in DPRK. We urge DPRK to remove the restrictions on access to information and freedom of expression by its people.

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking in bilateral talks with the Democratic People's Republic of Korea to further the protection of human rights there. [151885]

Mr. Rammell: We are concerned about reports of serious human rights violations in the Democratic People's Republic of Korea (DPRK). The lack of access for independent monitors makes it difficult to verify these reports. We raise human rights issues regularly with the DPRK authorities via our embassy in Pyongyang and the DPRK embassy in London. We also encourage DPRK to comply with the recommendations set out in the resolution adopted at last year's UN Commission on Human Rights. The Foreign and Commonwealth Office (FCO) sponsored two DPRK officials to attend a human rights training course at Essex University in 2002, and proposed a visit by the Head of the FCO's Human Rights Policy Department in 2003. The latter has yet to be granted.

Mr. Streeter: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government are taking within the *(a)* EU and *(b)* UN to further the protection of human rights in the Democratic People's Republic of Korea. [151886]

Mr. Rammell: The EU has been closely monitoring the human rights situation in North Korea, and having seen little evidence of improvement in recent years, tabled a resolution at the UN Commission on Human Rights (UNCHR) in 2003. The resolution expressed concern at reports of serious and continued human rights violations in North Korea, and called on DPRK to co-operate with the UN human rights machinery. The resolution was adopted by the largest majority of any country-specific resolution.

Energy Efficiency Programmes

Mr. Chidgey: To ask the Secretary of State for Foreign and Commonwealth Affairs what *(a)* green and *(b)* energy efficiency programmes are pursued by his Department in (i) the UK and (ii) missions abroad. [149199]

Mr. Rammell *[holding answer 22 January 2004]*: The FCO has established Environmental Management Systems (EMS) across most of its UK estate. The system covering our London Offices has been certified to ISO 14001 and covers 75 per cent. of UK based staff. We will extend this to 95 per cent. in 2004 by including our Hanslope Park site.

The EMS aims to improve the FCO's environmental performance. Examples of improvements already made include:

100 per cent. of electricity used in the Main Building is from renewable sources.

The range of waste recycled now includes fluorescent tubes, paper, unsaleable furniture, and toner cartridges. A new waste contract in 2004 will extend the range of waste recycled in line with Government targets.

We have implemented revised government policy on the purchase of sustainable timber. We also purchase a range of energy-efficient equipment and office supplies. All major contracts are evaluated against environmental performance.

All new FCO buildings, in the UK and overseas are designed to comply with best practice, including sustainable development issues.

In the UK, we have met the interim Government energy target of reducing carbon emissions from buildings through closer temperature control, and the purchase of renewable energy for the Main Building. This also helped us meet the target for the purchase of energy exempt from the climate change levy.

Overseas Posts are required to apply the same environmental principles where possible. Some have undertaken local environmental initiatives. But it would be impracticable to apply the full UK programme with immediate effect to all 232 Posts in the overseas estate.

European Commission (Defence Research)

Mr. Cousins: To ask the Secretary of State for Foreign and Commonwealth Affairs whether it is the Government's policy to support defence research and development expenditure by the European Commission. [149639]

Mr. MacShane: The UK supports a European Security and Defence Policy, where the responsibility for decisions relating to defence, including research and development, rests primarily with Member States (Articles 13 and 17 of the Treaty on European Union). The Government recognises the need to consider the scope for co-operation with the Community's civil research programmes. The Community's programmes, under Article 163 of the Treaty establishing the European Community (TEC), cover "promoting all the research activities deemed necessary by virtue of other chapters of this Treaty [the TEC]". In this context, in November 2003, the General Affairs and External Relations Council agreed to create an Agency, under the authority of the Council, whose responsibilities would include "promoting, in liaison with the Community's research activities where appropriate, research aimed at fulfilling future defence and security capabilities requirements".

Immigration

Mr. Nigel Evans: To ask the Secretary of State for Foreign and Commonwealth Affairs how many people entered the UK from *(a)* Papua New Guinea, *(b)* Jordan and *(c)* East Timor in the latest year for which figures are available. [151150]

Beverley Hughes: I have been asked to reply. The latest available information shows that a total of 22,200 Jordanian nationals were admitted to the United Kingdom during 2002.

I regret that is not possible to identify nationals of Papua New Guinea and East Timor separately in our admission statistics.

Data on passengers given leave to enter the United Kingdom are published in the Command Paper 'Control of Immigration: Statistics United Kingdom 2002' (Cm6053), obtainable from the Library, The Stationery Office and via the Home Office website http://www.homeoffice.gov.uk/rds/hobpubs1.html

Iraq

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs how many personnel are serving with the Iraq Survey Group in Iraq; of those how many are British; and if he will make a statement. [151668]

Mr. Straw: There are, at present, 1,272 personnel serving with the Iraq Survey Group. Of these, 52 are British. These figures may change on an almost daily basis due to the regular roulement of staff. Over the past nine months there has been an average of approximately 1,400 personnel. Figures for British personnel vary according to the availability of suitably qualified staff.

Latvia

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Latvian Government concerning prospects for a referendum on the proposed European Constitution in Latvia; and if he will make a statement. [151708]

Mr. MacShane: My right hon. Friend the Foreign Secretary has not discussed with the Latvian government prospects for a referendum on the draft EU Constitutional Treaty. Our Embassy in Riga follows Latvian Government policy on this and other issues. The Latvian Government has said that it has no plans for a referendum.

Middle East

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with EU colleagues about *(a)* trade policy towards Israel and *(b)* aid policy towards the Palestinian territories; and if he will make a statement. [151676]

Mr. Straw: EU Foreign Ministers regularly discuss Israel and the Palestinian territories at the General Affairs and External Relations Council (GAERC) in the context of our discussions on the Middle East Peace Process.

EU Foreign Ministers discussed the EU position for the EU/Israel Association Council at the GAERC on 17 November 2003. The Association Council discusses political and economic issues, including trade. EU Ministers in December agreed to further liberalisation of agricultural trade between the EU and Israel and on 1 January 2004 this round of liberalisation came into force.

I discussed with EU colleagues aid policy towards the Palestinian territories at the GAERC on 29 September 2003. As stated in the Council conclusions, "the EU, as the largest donor to the Palestinian territories, supported the Quartet's call on the International and Regional Community to assist the Palestinian Authority in the implementation of reforms, institution-building and socio-economic development".

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs how many times since 1997 UK officials have raised human rights concerns and the plight of the Palestinians with Israeli officials; and if he will make a statement. [151677]

Mr. Straw: We have frequently lobbied the Government of Israel since 1997 about human rights concerns and the plight of the Palestinians. But many of the details of this lobbying are no longer held centrally and could be provided only at a disproportionate cost. However, our lobbying has increased since the start of the intifada in September 2000.

Among the issues raised on many occasions in 2003 were:

civilian casualties;

targeted assassinations;

demolitions;

confiscation of land;

prisoners held in administrative detention;

impact of the fence and "closed zone";

settlements and outposts;

inappropriate behaviour by the Israel Defence Forces and rules of engagement;

checkpoints and other internal barriers;

the closure and curfew regimes;

the hindrance to the movement of humanitarian aid;

access problems for humanitarian workers and other essential staff;

movement restrictions of dual nationals.

Separately, we have also raised issues concerning the Bedouin and Arab Israelis.

Mr. Robert Ellis

Mr. Arbuthnot: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his answer of 20 January 2004, *Official Report*, column 1162W, on Mr. Robert Ellis, what the nature was of the representations made and of the response given during the discussion of the case of Mr. Robert Ellis that took place between the Minister of State and the Head of the Turkish European Secretariat General in Ankara on 13 January. [151768]

Mr. MacShane: As I said in my answer of 20 January and in my letter of 7 January to the right hon. Member, Robert Ellis has received an extraordinary level of support from British Ministers and our diplomatic, commercial and consular network in Turkey. My own meeting with the European Union Secretariat General in Ankara on 13 January was simply the most recent occasion on which we drew attention to our continuing interest in this case. Our concerns were noted.

Pakistan

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Pakistan's adherence to UN Security Council Resolution 1373. [151672]

Mr. Straw: Pakistan has submitted three reports to the United Nations Counter-Terrorism Committee, showing commitment and real progress in meeting the requirements of United Nations Security Council Resolution 1373. Pakistan has signed or ratified 10 of the 12 anti-terrorism conventions, and is an important partner on counter-terrorism. We are encouraged by Pakistan's efforts and will continue to work closely with Pakistan in this area.

Security Council Resolutions

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of international compliance with UN Security Council Resolution 1373; which countries have not fully complied; and if he will make a statement. [151669]

Mr. Straw: The United Nations Counter-Terrorism Committee (CTC) was established in order to encourage and ensure global compliance with United Nations Security Council Resolution 1373. The CTC works to promote full implementation of the Resolution by UN member states in a transparent and effective manner. All member states are engaged in this process. Reaching full compliance is an ongoing process with long-term action for many States. The CTC's monitoring of this is continuous.

The CTC reviews and replies to states' reports, which outline the domestic provisions in place and the progress made in fighting terrorism in accordance with the Resolution. In addition to reviewing and replying to states' reports, the CTC promotes compliance with Resolution 1373 by facilitating technical assistance to states, and encouraging co-operation with international and regional bodies to strengthen counter-terrorism capacity building globally.

The Committee is currently reviewing its reporting requirements and mechanism in an effort to encourage fuller and more timely reporting, and further substantive progress, from all member states. The UK remains a strong and active supporter of this effort.

Taiwan

Mrs. Curtis-Thomas: To ask the Secretary of State for Foreign and Commonwealth Affairs what the country-specific visa code is for Taiwan nationals. [150634]

Beverley Hughes *[holding answer 26 January 2004]*: I have been asked to reply.

The country-specific code used to identify nationals from Taiwan is TWN. This is based on ISO3166 data from UN Statistics Division List 31 July 2003, and International Civil Aviation Organisation Code List 11 February 2003.

Terrorism

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will list the states which have *(a)* signed and *(b)* ratified the International Convention for the suppression of the financing of terrorism; and if he will make a statement. [151670]

Mr. Straw: To date, 105 states have ratified the Suppression of the Financing of Terrorism convention, while a further 46 are signatories. The UK signed it on 10 January 2000 and ratified it on 7 March 2001. Further information on which countries have signed and ratified, and when they did, is available on the UN website: www.untreaty.un.org.

This convention is an important instrument imposing international standards for countering the financing of terrorism. The UK actively encourages international partners to ratify and fully implement its provisions, including through the EU, G8 and the UN.

United Nations Security Council Resolution 1373 calls on all states to adhere to the suppression of the financing of terrorism convention, as well as a number of other counter-terrorism measures, including the UN's 11 other counter-terrorism conventions. The United Nations Counter-Terrorism Committee monitors member states' adherence to Resolution 1373, including ratifying and implementing the conventions.

HEALTH

"Agenda for Change"

Mr. Norman: To ask the Secretary of State for Health what the projected total *(a)* wage and *(b)* administration costs for implementation of the "Agenda for Change" are; and whether these costs have changed after evaluation of the 12 early implementer sites. [150642]

Mr. Hutton: The total annual costs of the proposed new national health service pay system, "Agenda for Change", in England are estimated to be just under £1 billion by 2005–06 (compared with costs in 2002–03). The Department of Health, NHS employer representatives and NHS trades unions are monitoring closely the cost impact in the 12 'early implementer' sites, but it is too early to re-assess the national cost estimates in the light of experience in these sites. The cost estimate excludes non-recurrent costs involved in implementing the new system, which are difficult to estimate accurately and are being tested through the 'early implementer' process.

Mr. Norman: To ask the Secretary of State for Health how much money has been allocated to each *(a)* primary care trust, *(b)* acute and specialist hospital trust, *(c)* mental health trust, *(d)* ambulance trust and *(e)* strategic health authority in England for each of the next five years to implement the "Agenda for Change" programme. [151143]

Mr. Hutton: Additional funding, worth 0.8 per cent. of main allocations, has been allocated to primary care trusts (PCTs) in 2004–05 and a further 0.8 per cent. in 2005–06 to cover the costs of implementing "Agenda for Change" in acute and specialist hospital trusts, mental health trusts, ambulance trusts and PCTs themselves. Funding for implementation costs in strategic health authorities is currently being assessed but has not yet been allocated.

Mr. Norman: To ask the Secretary of State for Health what the total cost of developing the nationally agreed job profiles for the "Agenda for Change" programme has been. [151145]

Mr. Hutton: National job profiles for the proposed new national health service pay system, "Agenda for Change", have been developed in partnership between representatives of the United Kingdom Health Departments, the NHS Modernisation Agency, NHS trade unions and NHS employing organisations. It is not possible to give an accurate estimate of the costs incurred by these organisations in releasing staff for this purpose.

Mr. Norman: To ask the Secretary of State for Health (1) how much his Department has spent on knowledge and skills framework training for staff and managers in the 12 early implementer sites as part of the "Agenda for Change" programme; and what his estimate is of the total cost to the NHS of knowledge and skills framework staff training; [151146]

(2) how much has been spent on job evaluation training for staff and managers in the 12 early implementer sites as part of the "Agenda for Change" programme; and what his estimate is of the total cost to the NHS for staff training in job evaluation. [151147]

Mr. Hutton: The direct costs so far incurred centrally in providing training in use of the proposed new national health service job evaluation system and NHS knowledge and skills framework are around £256,000. This excludes the costs incurred by NHS organisations in making staff available to receive training.

Mr. Norman: To ask the Secretary of State for Health how many staff in the 12 early implementer sites have had a reduction in pay consequent on the "Agenda for Change" programme; and how many staff in the NHS *(a)* immediately after implementation and *(b)* after April 2011 will have a reduction in pay consequent on the programme. [151148]

Mr. Hutton: As a result of agreed pay protection arrangements, none of the national health service staff in the 12 'early implementer' sites will have had a reduction in pay as a result of the "Agenda for Change" pay modernisation programme, nor will any other NHS staff receive a reduction in pay after implementation of the proposed new pay system. Where, in a minority of cases, staff need to have their pay protected, there will be a review of their skills, knowledge and role as soon as possible during the period of protection. This will be used to assess whether they can be re-assigned to a more highly weighted job or offered development and training to fit them for a more highly weighted job. This is designed to keep to an absolute minimum the number of staff, if any, who are still covered by the protection arrangements immediately before those expire in April 2011.

Agency Staff

Mr. Burstow: To ask the Secretary of State for Health pursuant to his answer of 13 January 2004, *Official Report*, column 708W, on agency staff, if he will estimate the cost of fraud covered by criminal prosecutions; and what extrapolation has been made from these figures of the wider cost of timesheet fraud. [149853]

Mr. Hutton: The value of detected fraud amounts to £33,465 in those cases resulting in criminal prosecution of agency staff. No wider, meaningful extrapolation can be made from this figure.

Bournemouth and Christchurch (NHS Trust)

Mr. Chope: To ask the Secretary of State for Health why the Royal Bournemouth and Christchurch Hospitals NHS Trust had its Commission for Health Improvement assessment reduced from three stars to two stars in July 2003. [150534]

Mr. Hutton *[holding answer 26 January 2004]:* The Royal Bournemouth and Christchurch Hospitals national health service trust received a two star rating in July 2002 because its clinical governance review report from the Commission for Health Improvement (CHI) did not show enough strengths to allow a three star rating to be awarded by the Department of Health. The trust was awarded a three star rating by CHI in July 2003.

Dentistry

Dr. Murrison: To ask the Secretary of State for Health when the Dental Manpower Review will be published. [147514]

Ms Rosie Winterton *[holding answer 13 January 2004]:* We have now completed the first review of the dental workforce since 1987 and plan shortly to publish the report with the Government's response to its findings.

Dr. Murrison: To ask the Secretary of State for Health what assessment he has made of the progress primary care trusts have made towards assuming responsibility for NHS dentistry in April 2005. [147503]

Ms Rosie Winterton: Responsibility for administration of the general dental services arrangements passed from health authorities to primary care trusts (PCTs) in October 2002. The National Primary and Care Trust Development Programme (NatPaCT) published a dentistry competency framework to support PCTs during the transition.

Proposals in the Health and Social Care (Community Health and Standards) Act 2003 for primary dental services will underpin a modernised, high-quality primary dental service provided through contracts between PCTs and dental practices, properly integrated with the rest of the national health service and providing better access to services with an improved patient experience. The NatPaCT programme will continue to support PCTs through to implementation in April 2005.

The Health and Social Care (Community Health and Standards) Act also provides for the replacement of the existing Dental Practice Board by a new special health authority for England and Wales with a wider remit for modernisation and change. This will happen in 2005. In the meantime, shadow arrangements are in place to work in partnership with the existing Dental Practice Board to lead the modernisation process and provide support to PCTs and dentists to ensure a smooth transition to the new arrangements.

Mr. Burstow: To ask the Secretary of State for Health when his Department *(a)* commissioned and *(b)* received the Dental Workforce Review; and when he will publish the review report. [150809]

Ms Rosie Winterton *[holding answer 26 January 2004]:* We commissioned the first Dental Workforce Review since 1987 in July 2001. It was completed last autumn and we plan shortly to publish the report with our response to its findings.

Epilepsy

Mr. Todd: To ask the Secretary of State for Health what steps he has taken to ensure that the risks of misdiagnosis of epilepsy are minimised in local delivery of services. [152302]

Dr. Ladyman: We expect several related policies to help reduce the number of cases of misdiagnosis of epilepsy. The National Institute for Clinical Excellence (NICE) has already made its report of the National Clinical Audit of Epilepsy Related Death available to local national health service clinicians and organisations to help improve the management of epilepsy and epilepsy-related death. NICE is also planning to publish a clinical guideline for the diagnosis, management and treatment in July 2004 which will be available to the NHS to support improvements in services. Additionally, implementation of the clinical quality standards of the new general medical services contract from April 2004 will help improve the management of epilepsy in primary care. We are also developing the national service framework (NSF) for long term conditions which will focus on improving the standard of neurology services across England for conditions such as epilepsy. We currently plan to publish the NSF in December 2004 for implementation from 2005.

General Practitioners (Lancashire)

Mr. Hoyle: To ask the Secretary of State for Health how many general practitioners there are per head of population in *(a)* Lancashire and *(b)* Chorley. [151281]

Miss Melanie Johnson: This information is not available in the format requested. However, information for the primary care trusts in Lancashire is shown in the table.

Primary care trust	*GPs per 100,000 population*
Blackburn with Darwen PCT	62
Blackpool PCT	60
Burnley, Pendle and Rossendale PCT	56
Chorley and South Ribble PCT	59
Fylde PCT	56
Hyndburn and Ribble Valley PCT	63
Preston PCT	52
West Lancashire PCT	55
Wyre PCT	65

2. 2001 ONS Population Census.

GP Contract

Mr. Drew: To ask the Secretary of State for Health what estimates he has made of the number of general practitioners who will opt out of night-time cover following the introduction of the new contract; and what contingency plans he has in place to tackle any reduction in cover. [142260]

Mr. Hutton: Under the new general medical services contract, which is to be introduced from April 2004, general practitioners (GPs) will be able to opt-out completely from responsibility for care during the out-of-hours period and it will become a responsibility of the

local primary care trust (PCT) who are working with local practices to establish how many intend to exercise this option. We expect that a large majority will exercise this right to opt out of responsibility for arranging out of hours services.

Many GPs will still participate in the delivery of out-of-hours services organised under the auspices of the PCT. Patients will therefore continue to have access to a GP if their condition requires the attention of a doctor.

These changes provide a challenge for PCTs, but they also provide an opportunity for PCTs to review and reconfigure the provision of out-of-hours services across their area and to co-ordinate this with other services including accident and emergency, social care and in-hours services such as national health service walk-in centres.

Mr. Rosindell: To ask the Secretary of State for Health by what means a general practitioner practice can increase its level of funding. [150372]

Mr. Hutton: The new general medical services contract funds practices on the basis of patient need and the range and quality of services provided. Practices can increase their funding by providing higher quality services and services that contribute to the expansion of primary care. United Kingdom expenditure on primary care services will rise from £6.1 billion in 2002–03 to £8.0 billion by 2005–06.

Havering

Mr. Rosindell: To ask the Secretary of State for Health (1) how many general practitioners were appointed in the London borough of Havering in the last 12 months; and how many vacancies there were in that period; [150367]

(2) how many general practitioners are in practice in the Havering area. [150368]

Mr. Hutton: A total of six general practitioners were appointed in Havering Primary Care Trust (PCT) within the period between year end 2002 and June 2003.

Figures for GP vacancies in the 12 month period up to 31 March 2003 are shown in table 1.

GP numbers in Havering PCT are shown in table 2.

1. GP vacancy numbers in Havering PCT[2], 2003

	Headcount
England total	[1]3,245
of which	
London total	[1]459
of which	
North East London SHA	104
of which	
Havering PCT	10

[1] 1 PCT (Sutton and Merton PCT, South West London SHA) did not respond to the survey

[2] Figures show total number of vacancies occurring at any time in the 12 month period up to 31 March 2003

Note:

No figures for PCTs are available before 2003 as previous years vacancy numbers were collected from health authorities

Source:

Department of Health General and Personal Medical Services Statistics

Mr. Rosindell: To ask the Secretary of State for Health what the operating costs of the NHS in the London borough of Havering were in the financial year 2003–04. [150374]

Mr. Hutton: Audited final accounts figures for the financial year 2003–2004 will not be available until Autumn 2004.

However, Havering's total personal social services budget for 2003–04 is £56.667 million, 4.8 per cent., more than its forecast outturn for 2002–03. The 2003–04 national average increase in expenditure is 11.7 per cent.

Havering Primary Care Trust's allocation for 2003–04 is £214.0 million, a 7.2 per cent., increase in real terms and a 9.6 per cent., increase in cash terms.

Health Services (Chorley)

Mr. Hoyle: To ask the Secretary of State for Health how much money has been allocated to NHS services in Chorley in each of the last three years. [151241]

Miss Melanie Johnson *[holding answer 27 January 2004]:* Allocations to the former South Lancashire Health Authority, 2001–02 and 2002–03, and Chorley and South Ribble Primary Care Trust for 2003–04 are shown in the table.

Up to the end of 2002–03 national health service services for Chorley were funded through the South Lancashire Health Authority which covers a wider region. From 2003–04 services are funded through Chorley and South Ribble PCT.

Allocations were as follows.

Allocations

£000

	South Lancashire Health Authority	*Chorley and South Ribble Primary Care Trust*
2001–02	223,342	[1]—
2002–03	247,205	[1]—
2003–04	[1]—	171,696

Histopathology

Mr. Burstow: To ask the Secretary of State for Health if he will list the vacancy *(a)* rates and *(b)* numbers for histopathology in (i) England and (ii) each region in each year since 1997. [147932]

Mr. Hutton: The Department has collected vacancy data since 1999.

Information showing the three-month vacancy rates and numbers for histopathology in England by Government office region between March 2001 and March 2003 has been placed in the Library. The individual specialty of histopathology was not collected in the vacancy surveys in 1999 and 2000.

Isolation Wards

Tim Loughton: To ask the Secretary of State for Health which hospitals have dedicated purpose-built isolation and infection control wards. [145046]

Dr. Murrison: To ask the Secretary of State for Health how many English NHS hospitals have dedicated infection control wards. [147500]

Miss Melanie Johnson: Health Service Circular 2000/002 on the "Management and control of hospital infection" required trusts to undertake a risk assessment to determine appropriate provision of isolation facilities within each trust but these date were not collected centrally.

The Chief Medical Officer published his report "Winning Ways—Working together to reduce Healthcare Associated Infection in England", in December 2003 and this states that "NHS Trust Chief Executives will ensure that, over time, there is appropriate provision of isolation facilities within their healthcare facilities".

Mental Health

Mr. Burstow: To ask the Secretary of State for Health what progress has been made towards meeting the National Service Framework for Mental Health in the areas of *(a)* early intervention, *(b)* support for carers and *(c)* waiting times for mental health services; and if he will make a statement. [149867]

Ms Rosie Winterton: Good progress is being made with implementing the national service framework for mental health.

As part of the programme to develop early intervention services, 27 early intervention teams have been put in place.

In accordance with the national service framework for mental health standard six, carers of people with mental health problems are now entitled to an assessment of their caring, physical and mental health needs and to have their own written care plan. Services are also working towards employing 700 carer support workers by the end of the year.

With the development of new community based mental health services such as crisis resolution teams, progress is also being made with reducing waiting times for mental health services.

Information relating to waiting times for in-patient and out-patient mental health services has been placed in the Library.

Mr. Burstow: To ask the Secretary of State for Health what progress has been made towards the target to *(a)* reduce the duration of untreated psychosis to a service median of less than three months and *(b)* provide support for the first three years for all young people who develop a first episode of psychosis, by 2004. [150046]

Ms Rosie Winterton: In line with the commitments outlined in the "NHS Plan" and the "Priorities and Planning Framework 2003–06", early intervention services are being developed across England. As part of this, 27 early intervention teams have been put in place to provide care and treatment for young people who develop a first episode of psychosis.

It is envisaged that the duration of untreated psychosis will decrease as early intervention teams continue to develop across the country.

Mr. Burstow: To ask the Secretary of State for Health what definition he uses of *(a)* mental health crisis resolution teams, *(b)* mental health assertive outreach teams, *(c)* mental health early intervention teams and *(d)* secure personality disorder places, as established by his Department; and how many of each there are. [150047]

Ms Rosie Winterton: Detailed service specifications for crisis resolution, early intervention and assertive outreach teams are contained in the "Mental Health Policy Implementation Guide" (2001), which is available from the Department's web-site at www.doh.gov.uk/mentalhealth/implementationguide.htm.

There are 238 assertive outreach, 132 crisis resolution and 27 early intervention teams currently in place in England.

Secure personality disorder places are intended for those people who are assessed as dangerous as a result of a severe personality disorder. These services are being designed to treat those people who demonstrate a clear functional link between their personality disorder and their offending behaviour, and who pose a high risk to the public.

A ten bed pilot unit is already in operation and there will be 140 more secure personality disorder places in Broadmoor and Rampton Hospitals by the end of the year.

Mr. Drew: To ask the Secretary of State for Health what plans he has to extend the use of primary care models for treating mental health, with specific reference to the role of general practitioners. [151791]

Ms Rosie Winterton *[holding answer 29 January 2004]:* The Department of Health and the Royal College of General Practitioners have produced a framework for implementing a scheme for general practitioners with special interests. As part of this framework; guidelines for primary care trusts and staff have been developed to provide more specific recommendations for general practitioners with a special interest in mental health. These developments

are in line with the NHS Plan commitment to recruit up to 1,000 general practitioners with special interests by 2004.

The new general medical services contract offers new incentives and rewards for practices that meet prescribed quality standards in caring for people with mental health problems. Under the general medical services contract primary care trusts may commission enhanced services. Specialist care of people with depression has been identified as a national enhanced service. Primary care trusts may also commission local enhanced services to address locally identified needs.

Services are also working towards the NHS Plan commitment to recruit up to 1,000 graduate mental health workers who are trained in brief therapy techniques of proven effectiveness to help general practitioners treat common mental health problems in primary care.

Midwives

Mr. Baron: To ask the Secretary of State for Health what steps he has taken to reduce the three-month vacancy rate for midwives in London since March; and if he will make a statement. [140582]

Mr. Hutton *[holding answer 1 December 2003]:* In line with our policy of shifting the balance of power we have devolved more power to the frontline of the national health service to ensure that more decisions, such as staffing levels, could be made locally where they will have a greater impact on delivery. Responsibility for reducing vacancy rates now rests with strategic health authorities.

Between 30 September 2000 and 30 September 2002 the number of midwives in London increased by 202.

In 2003–04, £88,500 has been allocated to London work force development confederations to fund return to practice places for midwives.

Mobile Phones

Mr. Amess: To ask the Secretary of State for Health if he will make a statement on the Government's policy on the health implications of *(a)* mobile phones and *(b)* mobile phone masts. [150906]

Miss Melanie Johnson: On 21 January 2004, I wrote to all right hon. and hon. Members describing the current position as follows:

Mobile phone technology and health issues have hit the headlines again following the publication of a scientific review by the National Radiological Protection Board's Advisory Group on Non-ionising Radiation (AGNIR). News headlines about such issues tend to raise the levels of people's concern and you may well receive inquiries about mobile phones or mobile phone base stations. I am glad to say that the report confirms the conclusions of the Stewart Report and there is no new evidence suggesting that mobile phone use is likely to cause ill health in the general population. In the words of AGNIR's carefully considered report:

"The weight of evidence now available does not suggest that there are adverse health effects from exposures to RF fields below guideline levels, but the published research on RF exposures and health has limitations, and mobile phones have only been in widespread use for a relatively short time. The possibility therefore remains open that there could be health effects from exposure to RF fields below guideline levels; hence continued research is needed."

The rapid expansion of mobile phone telecommunications has brought with it huge benefits to individuals and the business community. Government are however taking seriously the concerns that people have that there might be health effects resulting from exposure to radiofrequency signals from this technology. It is for this reason that the Independent Expert Group on Mobile Phones (IEGMP) was set up under the chairmanship of Sir William Stewart FRS, FRSE.

Sir William's expert group published its report on Mobile Phones and Health in May 2000 and it can be read in full on the website (www.iegmp.org.uk). The overall conclusion was that

"the balance of evidence to date suggests that exposures to RF (radiofrequency) radiation below guidelines do not cause health effects to the general population."

They went on to say that the emerging new technology should be accompanied by appropriate research and that a further review of the evidence for potential health effects should be reviewed in three years or earlier if circumstances demand it. These were just two of the 30 or so Stewart recommendations that have subsequently been acted upon by Government Departments or by the appropriate agencies.

The siting of base stations was identified by the Stewart group as an issue of some concern. When they examined all the scientific evidence they concluded that

"there is no general risk to the health of people living near to base stations on the basis that exposures are expected to be small fractions of guidelines."

About 300 measurements undertaken by the Radiocommunications Agency (RA), now part of Ofcom, have confirmed that public exposures are very much lower than the widely accepted guidelines published by the International Commission for Non-Ionizing Radiation Protection (ICNIRP). This information is available on the websites of these organisations: www.ofcom.org.uk and www.icnirp.de.

Although the Stewart Group did not identify any adverse health effects caused by exposures by mobile phones or base stations they were aware that if people are unduly concerned about potential exposures then that in itself may affect their well-being. They made a number of recommendations, therefore, designed to provide more information about mobile phones and base stations. The Department of Health has produced a pair of leaflets and these can be seen on the Department's website www.doh.gov.uk/mobilephones. A description of work undertaken by various organisations since the Stewart Report has been written by Dr. John W. Stather of the NRPB entitled "Mobile Phones and Health—an Update". This article was published on the NRPB website http://www.nrpb.org/publications/bulletin/no3/article3.htm) in March 2003 and provides more detailed information on the issues.

The sites of base stations in this country are now shown on the Sitefinder location of the Ofcom website www.ofcom.org.uk. Planning arrangements have been improved and a "Code of Best Practice on Mobile Phone

Network Development" has been developed with the aim of providing for more discussions between operators, local authorities and members of the public. The booklet and current planning arrangements (PPG8—Policy Planning Guidance on Telecommunications) can be found on the ODPM website www.planning.odpm.gov.uk.

Over the last few years a number of groups have assessed the possible health effects of exposure to RF radiation such as from mobile phones and mobile phone masts. These include reports from Canada (1999), the Netherlands (2000), France (2001, 2003) and the British Medical Association (2001). These groups have come to broadly similar conclusions to the Stewart Report and have recommended further research. The new AGNIR review also supports the Stewart conclusions.

Public interest in mobile phone base stations has been quite marked recently and a number of concerted campaigns against mobile phone masts have come to my attention. I am pleased that the AGNIR report has addressed this issue and concluded that

"Exposure levels from living near to mobile phone base stations are extremely low, and the overall evidence indicates that they are unlikely to pose a risk to health."

Having considered research issues, AGNIR has helpfully made a number of specific recommendations that aim to improve the quality and interpretability of future health-related research and current health research programmes.

The Government, in conjunction with industry, are already sponsoring a £7.4 million research programme in this country on a number of important health related issues identified in the Stewart Report. The research is being carried out under the management of an independent Programme Management Committee. The research is mainly concerned with users of mobile phone handsets as recommended in the Stewart Report but has recently decided to extend its range of studies to accommodate concerns about exposures from base stations. Full details of the research studies and the committee membership can be found on the Mobile Telecommunications and Health Research website: www.mthr.org.uk. This programme represents a significant contribution to a world-wide research effort encompassing the World Health Organisation (WHO), the European Union, the United States and others.

The Department continues to monitor research largely through the work of National Radiological Protection Board who have a statutory duty to advise on risks from all types of radiation. The AGNIR report was placed on the NRPB web site on 14 January 2004 http://www.nrpb.org./ review/docs nrpb/absd14–2.htm

Nanoparticles

Norman Baker: To ask the Secretary of State for Health what assessment his Department has made of the potential for nanoparticles used in consumer goods to slip through membranes and lodge in the brain. [150115]

Ms Hewitt: I have been asked to reply.

My Department has not made any assessment of the potential for nanoparticles used in consumer goods to slip through membranes into the brain. We are aware that recent research has raised concerns in this area.

Last year, my Department commissioned an independent study by the Royal Society and the Royal Academy of Engineering to examine in detail the risks and benefits of nanotechnology. The study includes consideration of environmental, health and safety, ethical and social implications of the technology, both now and in the future, and its outcomes will be used to inform policy on what safeguards might be required, over and above existing legislation and guidance. We expect a report to Government in late spring 2004.

NHS Bereavement Services

Mr. Burstow: To ask the Secretary of State for Health when he expects his Department to undertake a follow-up survey on NHS bereavement services as outlined on the Chief Medical Officer's webpage. [148246]

Ms Rosie Winterton: The Department plans to support a follow-up survey on national health service bereavement services in the spring of this year as outlined in the Chief Medical Officer's web page.

Mr. Burstow: To ask the Secretary of State for Health if he will place in the Library a copy of the results of the Department's survey of the scale and scope of NHS bereavement services. [148247]

Ms Rosie Winterton: The Department's survey of bereavement services available in the national health service acute trusts was undertaken in the summer of 2001. A report of this survey is available on the Department's website at: www.doh.gov.uk/bereavement

NHS Governance

Mr. Amess: To ask the Secretary of State for Health what declaration of political affiliation health board convenors are required to make. [152152]

Ms Rosie Winterton: The Code of Practice issued by the Commissioner for Public Appointments requires that all candidates for appointment to non-executive positions on the boards of public bodies are asked to make a declaration on any political activity undertaken (as opposed to political affiliation). This is for monitoring purposes only and the information is not passed on to sifting and interview panels considering candidates for appointment. Complaints convenors who are also non-executives will therefore have been asked to make such a declaration. However, those who are not non-executives will not have been asked.

NHS Staff Council

Mr. Norman: To ask the Secretary of State for Health what the costs *(a)* are of establishing and *(b)* were estimated to be in each of the next five years of running the NHS Staff Council. [151149]

Mr. Hutton: There are not expected to be any additional costs involved in establishing or running the proposed new NHS Staff Council. The NHS Staff Council and the new Pay Negotiating Council for non-Review Body staff will between them replace the General Whitley Council and 11 functional Whitley Councils and other negotiating bodies for different national health service staff groups. This is expected to result in a more

streamlined and efficient system for overseeing NHS pay issues and agreeing future changes to pay, terms and conditions.

Nursing and Midwifery Council

Mr. Baron: To ask the Secretary of State for Health what the fee to nurses is for registration with the Nursing and Midwifery Council; and what it was in each of the last five years. [152123]

Mr. Hutton *[holding answer 30 January 2004]:* The Nursing and Midwifery Council is an independent statutory body and this information is available directly from that organisation.

Performance Indicators

Mr. Rosindell: To ask the Secretary of State for Health how many performance indicators were in place for NHS Trusts in *(a)* 2003–04 and *(b)* 2001–02. [148490]

Mr. Hutton: The independent Commission for Health Improvement (CHI) has published the set of indicators which will be used to rate national health service organisations in 2003–04.

The number of indicators are shown in the table.

	Number
Acute and specialist trusts	44
Ambulance trusts	24
Mental health trusts	38
Primary care trusts	42

The Department of Health published a limited set of performance indicators for 2001–02 in July 2002, as shown in the table.

	Number
Acute trusts	37
Specialist trusts	29
Ambulance trusts	10
Mental health trusts	16
Primary care trusts	[1]21

[1] Primary care trusts were measured against these indicators, but were not performance rated in 2001–02.

Post-mortems

Dr. Murrison: To ask the Secretary of State for Health how many *(a)* hospital and *(b)* coroners' post-mortems were carried out in each of the last 10 years. [150359]

Mr. Hutton: Information on hospital post mortems is not collected centrally. The annual total of coroners' post mortems carried out in the period 1993–2002, the latest year for which information is available, is shown in the table.

000s

	Coroners post mortems
1993	129.1
1994	125.2
1995	126.4
1996	126.2
1997	123.0
1998	124.4
1999	124.8
2000	124.5
2001	121.1
2002	117.7

Respite Care (Children)

Keith Vaz: To ask the Secretary of State for Health how many projects he has visited that provide respite care that deal with children who are terminally ill. [151667]

Dr. Ladyman: My right hon. Friend the Secretary of State, has not had the opportunity to visit any projects whose sole remit is to provide respite care for terminally ill children. Should an opportunity arise to undertake such a visit, he would give it his full consideration.

Secure/Forensic Facilities

Mr. Burstow: To ask the Secretary of State for Health what progress has been made with the Department's aim to ensure appropriate use of secure and forensic facilities by 2004. [150044]

Ms Rosie Winterton: As part of the Government's programme to modernise mental health services, an accelerated discharge programme is under way aimed at moving up to 400 patients from high security hospitals to more appropriate accommodation by 2004. The programme is on track to meet its target.

Acute Beds (Gloucestershire)

Mr. Laurence Robertson: To ask the Secretary of State for Health how many *(a)* stroke units and *(b)* acute beds there are in the NHS in Gloucestershire; and if he will make a statement. [149465]

Ms Rosie Winterton: Information on beds is collected annually from each national health service trust. The average daily number of available acute beds for 2002–03 for Gloucestershire Hospitals NHS Trust was 1,142. Information on the number of stroke units is not held centrally.

Waiting Times

Mr. Laws: To ask the Secretary of State for Health what plans he has to collect and publish information from NHS trusts on waiting times for diagnostic testing; and if he will make a statement. [150541]

Mr. Hutton *[holding answer 28 January 2004]:* Data are not collected specifically on waiting times for diagnostic tests. Waiting times are collected on the consultant's main specialty. There have been no substantive changes to the basis on which waiting times are calculated during the lifetime of this Government.

The Government aims to improve access to diagnostic services and the Department is working in partnership with strategic health authorities and other stakeholders to ensure a responsive service.

Mr. Laws: To ask the Secretary of State for Health if he will publish recent guidance which his Department has given to *(a)* health authorities and *(b)* NHS trusts

on the recording of waiting times for (i) diagnostic tests and (ii) consultant to consultant referrals; and if he will make a statement. [150542]

Mr. Hutton *[holding answer 28 January 2004]:* There has been no recent guidance issued by the Department.

The Department recently provided clarification on how angiographies should be recorded and reported.

Information on the recording of waiting times is available on the Department's website. Further advice is available directly from the Department via its mailbox.

HOME DEPARTMENT

Anti-Social Behaviour

Lady Hermon: To ask the Secretary of State for the Home Department for what reasons Part 8 of the Anti-Social Behaviour Act 2003 was not extended to Northern Ireland; and what discussions he had with his colleagues in the Northern Ireland Office during the Bill's passage through Parliament in relation to the extension of Part 8 to Northern Ireland. [150663]

Ms Blears: The high hedges provisions were introduced into the Anti-Social Behaviour Bill following extensive consultation in England and Wales and after lengthy discussions in Parliament as several Private Members' Bills failed to become law. The consultation showed widespread support for legislation to give local authorities in England and Wales the powers to deal with complaints about high hedges.

No similar consultation has been conducted in Northern Ireland and there is no solid evidence to suggest that legislation is necessary. We have kept our colleagues in the Northern Ireland Office in touch with our proposals for England and Wales throughout.

Asylum Detention Centres

Mr. Hoyle: To ask the Secretary of State for the Home Department if he will list the constituencies being considered for detention centres for asylum seekers. [151269]

Beverley Hughes: As part of the expansion of the detention estate we are exploring the possibility of various sites throughout the country. However we are at an early stage. As soon as we seriously consider any particular site we will put it into the public domain and the local MP(s) will be notified.

Asylum Seekers

Mr. Crausby: To ask the Secretary of State for the Home Department what the cost was in each of the last five years of the administration of the National Asylum Support Service. [147784]

Beverley Hughes: The administration cost of the National Asylum Support Service (NASS) for the last five years was as follows.

	£ million
1998–99	[1]—
1999–2000	[1]—
2000–01	36
2001–02	36
2002–03	[2]—

[1] NASS was established as a separate directorate within Immigration and Nationality Directorate (IND) from 2000–01. Equivalent administration costs for prior years are not separately identifiable.
[2] The actuals for 2002–03 are yet to be audited and published.

Mr. Crausby: To ask the Secretary of State for the Home Department what the cost was in each of the last five years of the support of asylum seekers under the 1999 legislation. [147785]

Beverley Hughes: The asylum support costs for the last five years was as follows:

	Costs
1998–99	475
1999–2000	589
2000–01	747
2001–02	1,046
2002–03	[1]—

[1] The actuals for 2002–03 are yet to be audited and published.

Mr. Crausby: To ask the Secretary of State for the Home Department what the cost was in each of the last five years of overseas transport for those asylum seekers deported and removed from the United Kingdom. [147786]

Beverley Hughes: The cost in each of the last five years of overseas transport for both asylum and non-asylum removals from the United Kingdom was as follows:

	Total (£000)
1998–99	4,384
1999–2000	4,515
2000–01	6,068
2001–02	11,485
2002–03	[1]—

[1] The actuals for 2002–03 are yet to be audited and published.

Mr. Crausby: To ask the Secretary of State for the Home Department what the cost was in each of the last five years of detention in *(a)* detention centres and *(b)* elsewhere. [147788]

Beverley Hughes: The cost in each of the last five years the cost of detention in detention centres and elsewhere for the Immigration and Nationality Directorate was as follows:

	£000
1998–99	10,219
1999–2000	13,821
2000–01	24,979
2001–02	47,243
2002–03	[1]—

[1] The actuals for 2002–03 are yet to be audited and published.

These costs include both the actual costs of holding detainees and expenditure related to the expansion of the detention estate during this period. It is not possible to separate these costs.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what the difference is between an induction centre and a detention centre; and if he will list those centres which are both induction and detention centres. [147864]

Beverley Hughes: Differences between induction centres and detention centres, which were renamed removal centres under section 66 of the Nationality, Immigration and Asylum Act 2002, are substantial. Induction Centres provide additional services for the asylum applicant, including health screening, and initiate the consideration of their asylum claim and support needs. Induction Centres provide short-term accommodation, where necessary, prior to dispersal. Accommodation and services are provided in a variety of buildings which are expected to have a low profile in the existing community. Asylum applicants staying in induction centres are not detained and are free to leave their accommodation. Removal centres provide safe and secure accommodation for those who are detained under immigration legislation. No facility acts as both a centre for induction and detention.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many asylum seekers were removed from the UK in each month since January 2002; how many of these were part of the voluntary assisted return programme; to what countries individuals were returned; and how long they had been present in the UK before their repatriation. [148040]

Beverley Hughes: The number of asylum seekers removed from the United Kingdom in each month from January 2002 to September 2003 (the latest month for which data are available) is shown in the table.

Of the 10,740 principal asylum applicants removed from the United Kingdom in 2002, 895 departed under the Voluntary Assisted Return Programmes (VARP). Information on the number of these who departed each month is not available. Data on the number departing under the VARP programmes in 2003 will be published at the end of August on the Home Office website: www.homeoffice.gov.uk/rds/immigration.html

Information on the destination of people removed from the UK and the length of time that they had been present here prior to departure is not available, except by examination of individual case-files at disproportionate cost.

Assisted Voluntary Returns aim to secure the dignified, safe and sustainable return of those who wish to leave the UK voluntarily. The International Organisation for Migration, which runs this programme on behalf of the Home Office, will assist the returnee prior to departure with counselling and independent advice. They will also help with travel arrangements, tickets etc.

On arrival in their country of origin the returnee can receive, if they so choose, reintegration assistance worth up to approximately £500 (not cash). Reintegration assistance includes help in the country of origin to access existing services such as health, education and housing. Employment-related training and help to access available employment is also offered to enhance the sustainability of the return.

Asylum Removals January 2002 to September 2003 [1,2]

Month	*Principal applicants*	*Dependants*	*Total*
January 2002	855	155	1,050
February 2002	865	150	1,015
March 2002	725	135	860
April 2002	860	165	1,025
May 2002	955	180	1,135
June 2002	845	230	1,075
July 2002	970	245	1,215
August 2002	995	310	1,305
September 2002	845	295	1,135
October 2002	945	340	1,285
November 2002	965	370	1,335
December 2002	920	550	1,470
January 2003	770	390	1,160
February 2003	890	455	1,350
March 2003	955	525	1,480
April 2003	1,025	395	1,420
May 2003	1,175	405	1,580
June 2003	945	335	1,285
July 2003	1,230	395	1,630
August 2003	1,075	390	1,470
September 2003	1,120	435	1,560
Total	19,935	6,900	26,835

[1] Includes persons departing "voluntarily" after enforcement action had been initiated against them and persons leaving under the Assisted Voluntary Return Programmes run by the International Organisation for Migration.
[2] Provisional data.
Note:
Data are rounded to nearest five and may not sum due to rounding.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department where the individuals who participated in the International Organisation for Migration voluntary assisted return programme returned to. [148044]

Beverley Hughes: Of the 10,740 principal asylum applicants removed from the United Kingdom in 2002, 895 departed under the Voluntary Assisted Return Programmes (VARP).

Information on the nationality and destination of asylum seekers who leave under the VARP is not centrally available and could only be obtained by examination of individual case-files at disproportionate cost.

Tom Cox: To ask the Secretary of State for the Home Department how many young people up to 16 years were allowed to enter the United Kingdom from Somalia during 2003. [148070]

Beverley Hughes: The requested information is not available.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what conclusions the Department has reached on data collection methods for the assessment of the number of failed asylum seekers remaining in the UK. [150332]

Beverley Hughes: It is assumed that 'data collection' refers not to failed asylum seekers specifically but to work to assess the size of the illegally resident population in the UK. The Home Office has commissioned a review of methods used in other countries to estimate the size of their illegal populations. The research was commissioned in order to help define methods appropriate for the UK.

The illegally resident population includes overstayers, clandestine entrants and workers in breach of their right to remain in the UK, as well as failed asylum seekers.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what target for the removal of failed asylum seekers has been set. [150334]

Beverley Hughes: Our Public Service Agreement target for asylum removals is to remove a greater proportion of failed asylum seekers from the United Kingdom. The Immigration Service, like other Government Departments, also has various internal measures against which its performance is monitored and managed.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what steps are being taken to encourage participation in the Voluntary Assisted Return Programme. [150335]

Beverley Hughes: The Voluntary Assisted Return and Reintegration Programme (VARRP) is widely advertised directly by the Home Office within the asylum system and through outreach and advice work by non-governmental and international organisations. Information on the programme can be found in Reporting Centres, Reception Centres and Removals Centres as well as from the Home Office website. Asylum seekers who have been refused asylum are sent an information sheet which gives details of how to return voluntarily. We also hold regular meetings with non-governmental and international organisations including the Refugee Council, Refugee Action, UNHCR and IOM to discuss promotion of voluntary return. The voluntary sector organisations conduct outreach work with community groups directly to advise them of the option of voluntary return. The Home Office hosts meetings with Afghan community groups to raise the profile of voluntary return including the Return to Afghanistan Programme and the recently launched Afghan Explore and Prepare Programme.

In the first instance, those who are interested in returning home voluntarily are required to register their interest with the International Organisation for Migration (IOM) who are co-funded by the Home Office and the European Refugee Fund (ERF) to operate VARRP.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many strip searches have been conducted at removal centres in the last 12 months. [150338]

Beverley Hughes: Strip searches of adult detainees in immigration removal centres may take place only on the basis of specific evidence or intelligence of a risk to the safety and security of the centre, its staff or other detainees. Central records of the number of such searches are not maintained and the information requested is therefore available only at disproportionate cost.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department whether the booking of flights for departing asylum seekers is centrally co-ordinated by the Immigration and Nationality Directorate. [150340]

Beverley Hughes: The booking of flights for the removal of asylum seekers is not centrally co-ordinated by the Immigration and Nationality Directorate but is made by the immigration office dealing with the individual case.

Where the removal is to be effected at the expense of the inbound carrier under the provisions of paragraphs 8 and 9 of schedule 2 to the Immigration Act 1971, arrangements will be made directly with the carrier. If removal is to be effected at public expense under paragraph 10 of the same schedule they will be made via the travel company contracted to the Immigration and Nationality Directorate for that purpose. In these cases there is a central unit in the Immigration Service which provides a ticket procurement and payment function for these bookings. These arrangements apply in all removal cases and there are no separate processes for those who have sought asylum here.

Mr. Clappison: To ask the Secretary of State for the Home Department how many failed Iraqi asylum seekers *(a)* have been removed from the UK, *(b)* have voluntarily left the UK with government support and *(c)* have otherwise been recorded as leaving the UK in each year since 1997. [150619]

Beverley Hughes: Estimates of the number of nationals of Iraq who had sought asylum at some stage and who were removed from the UK from 1997 to June 2003 (the latest date for which figures are available) are shown in the table. These figures include persons departing 'voluntarily' after the initiation of enforcement action against them, and persons leaving under Assisted Voluntary Returns Programmes run by the International Organisation for Migration.

Removals and voluntary[1] departures of principal asylum applicants (excluding dependants): January 1997 to June 2003[2,3,4]

	Nationals of Iraq
1997	40
1998	40
1999	n/a
2000	n/a
2001	90
2002	195
January to June 2003	175

n/a = Not available.

[1] Includes persons departing "voluntarily" after enforcement action had been initiated against them, persons leaving under Assisted Voluntary Return Programmes run by the International Organisation for Migration, and removals on safe third country, grounds.

[2] Figures rounded to the nearest five and may not sum to total due to rounding.

[3] Data have been estimated due to data quality issues.

[4] Provisional figures.

At present removals to Iraq are on a voluntary basis only. Enforced returns will commence when the circumstances are right.

Information on the destination of these removals and whether they departed voluntarily with government support is not available, except by examination of individual case-files at disproportionate cost.

Estimates of the nationality of those asylum seekers who were removed from the UK in the third quarter of 2003 are due to be published on 24 February 2004 on the Home Office website: www.homeoffice.gov.uk/rds/immigration1.html

Mr. Clappison: To ask the Secretary of State for the Home Department how many failed asylum seekers he estimates are in the UK without legal basis for their presence; and how many are failed Iraqi asylum seekers. [150621]

Beverley Hughes: Information on the total number of asylum seekers currently in the UK, including failed asylum seekers, is not currently available. This could be obtained only at disproportionate cost by examination of individual case records. Even such an exercise, however, would not produce a valid estimate as some applicants may leave the United Kingdom without informing the Immigration Service.

The Government have commissioned research into the methods used in other countries to estimate the size of the illegal population in order to define methods appropriate for the UK.

The work required is challenging because, by definition, illegal migrants fall outside official statistics and are therefore difficult to measure. People illegally present in the UK are also motivated to ensure they remain hidden, further compounding the difficulties of conducting research.

The number of cases (principal applicants) awaiting initial decision or awaiting appeal determinations continues to fall as the level of applications falls, initial decisions continue to outstrip the number of applications, and record numbers of appeals are determined by the IAA. The latest published figures show that as at the end of September 2003 there were:

29,100 cases awaiting an initial decision (of this total, 8,500 cases were work in progress, i.e. the application had been outstanding for six months or less), the lowest level for a decade;

an estimated 16,000 appeals lodged with the Home Office which had not been sent to the Immigration Appellate Authority (a proportion of appeals lodged do not result in appeal bundles being sent to the IAA); and

28,800 asylum cases work in progress in the IAA (18,100 at the Adjudicator Tier, 5,600 applications for permission to appeal to the Tribunal, and 5,100 Tribunal Appeals).

Information on asylum applications is published quarterly. The next publication will be available at the end of February 2004 on the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Mr. Clappison: To ask the Secretary of State for the Home Department how many Iraqi asylum seekers have returned to Iraq since the fall of Saddam Hussein. [150622]

Beverley Hughes: Estimates of the number of nationals of Iraq who had sought asylum at some stage and who were removed from the UK since the fall of Saddam Hussein in April 2003 to June 2003—the latest available figures—are shown in the table. These figures include persons departing 'voluntarily' after the initiation of enforcement action against them, and persons leaving under Assisted Voluntary Returns Programmes run by the International Organisation for Migration.

Removals and voluntary[1] departures of principal asylum applicants (excluding dependants): April 2003 to June 2003 [2,3,4]

	Nationals of Iraq
April 2003	45
May 2003	25
June 2003	20
Total	85

[1] Includes persons departing "voluntarily" after enforcement action had been initiated against them, persons leaving under Assisted Voluntary Return Programmes run by the International Organisation for Migration, and removals on safe third country grounds.

[2] Figures rounded to the nearest five and may not sum to total due to rounding.

[3] Data have been estimated due to data quality issues.

[4] Provisional figures.

Information on the destination of these removals is not available.

At present removals to Iraq are on a voluntary basis only, enforced returns will commence when the circumstances are right.

Figures for principal asylum applicants removed from the United Kingdom in the period July to September 2003 will be available after publication of Asylum statistics Quarter 4 2003 on 24 February 2004 on the Home Office website: www.homeoffice.gov.uk/rds/immigration1.html

Lady Hermon: To ask the Secretary of State for the Home Department what the average length of time taken to process asylum applications originating in *(a)* England, *(b)* Scotland, *(c)* Wales and *(d)* Northern Ireland was in the last year for which figures are available. [151330]

Beverley Hughes: Information on the average length of time taken to process asylum applications lodged in each of the regions of the UK is not available and could be obtained only at disproportionate cost. Asylum applications data are not available at regional level.
